PREFACE

THIS EXTRA VOLUME of the DICTIONARY OF THE BIBLE contains thirty-seven Articles, six Indexes, and four Maps. A word will be sufficient on each of these parts of its Contents.

I. THE ARTICLES

Those who have kept in touch with the study of the Bible in recent years will understand why it has been found necessary to prepare an Extra Volume. Discoveries have been made which have an important bearing on the interpretation of both the Old Testament and the New. It is enough to name the three articles which stand first in the alphabetical list given below—**AGRAPHA**, **APOCRYPHAL GOSPELS**, and **CODE OF HAMMURABI**. A Dictionary of the Bible cannot ignore such discoveries. But they do not form part of the Contents of the Bible; nor do they deal directly with its Language or its Literature; so that they are not likely to be looked for in the alphabetical order of words in the Dictionary. The best way seemed to be to gather them into an Extra Volume.

Other articles will be found in this volume, for reasons which will be readily understood and appreciated. Some of them, like the article on the Sermon on the Mount, with which the volume opens, might have taken their place in the alphabetical order of the Dictionary. But they have not usually been so included, and it was felt that the Extra Volume would give more prominence to their special character and importance.

II. THE INDEXES

The Indexes have been prepared with great care. They are full, and yet it will be found that every item in them has been carefully selected and described.

The INDEX OF TEXTS contains all the passages of Scripture upon which there is any note of consequence in the Dictionary; and, again, the most important notes are

PREFACE

distinguished by their authors' names. Further, it sometimes happens that a text is quoted in support or illustration of some argument: when such a quotation throws significant light upon the text itself, it is included in the Index.

The INDEX OF SUBJECTS contains the titles of all the articles in the Dictionary, including the Extra Volume. It also refers to a great many other topics which are dealt with in the course of the work. When the subject of an article comes up for treatment in other places, and a reference is made to these places, then the *first* reference in the Index is always to the article itself. Thus—I^{THAMAR}, ii. 519^a; i. 6^b; ii. 123^a; iv. 89^b—the second volume is mentioned before the first because in it falls the article under its own title; there is also some account of Ithamar in the article on Abiathar in vol. i. p. 6^b, as well as in the other places noted. When the article is of some length the name of the author is given. His name is not repeated under the same heading, so that references without a name attached are to be ascribed to the first author mentioned.

The *cross-references* in the Index of Subjects are always to other parts of the Index itself. Words which occur only in the Apocrypha are marked 'Ap.' or 'Apoc.': as Dabria (Ap.).

III. THE MAPS

The maps are intended to illustrate the articles on ROADS AND TRAVEL. These articles will be of great service to the student of either Testament, and the maps will add to the value of the articles. But they have been prepared so as to be complete maps of the countries they cover, the Roads which are marked on them being additional to the information which such maps usually contain. They have been prepared under the direct supervision of Professor Buhl (for the Old Testament) and Professor Ramsay (for the New), who have spared no pains to make them accurate and up to date.

And now the work on this Dictionary of the Bible is at an end. The Editor has been assisted by the same friends as before and with the same readiness, and he heartily thanks them all. He is also grateful for the way in which the four volumes already published have been received.

AUTHORS OF ARTICLES IN THE EXTRA VOLUME

BARTLET, Professor J. VERNON	Didache.
BEBB, Principal LLEWELLYN J. M. . . .	Continental Versions.
BENNETT, Professor W. H.	Wages.
BLOMFIELD, Rear-Admiral R. M. . . .	Ships and Boats.
BUHL, Professor FRANTS	New Testament Times.
" " "	Roads and Travel in the Old Testament.
DRUMMOND, Principal J.	Philo.
FAIRWEATHER, Rev. W.	Development of Doctrine in the Apocryphal Period
FARNELL, Dr. L. R.	Worship of Apollo.
GARVIE, Professor A. E.	Revelation.
HARRIS, Dr. J. RENDEL	Sibylline Oracles.
JASTROW, Professor MORELS	Races of the Old Testament.
" " "	Religion of Babylonia and Assyria.
JOHNS, Rev. C. H. W.	Code of Hammurabi.
KAUTZSCH, Professor EMIL	Religion of Israel.
KENYON, Dr. F. G.	Papyri.
KÖNIG, Professor ED.	Samaritan Pentateuch.
" " "	Style of Scripture.
" " "	Symbols and Symbolical Actions.
LUPTON, Dr. J. H.	English Versions.
MCCURDY, Professor J. F.	Semites.
MENZIES, Professor ALLAN	Gospel according to the Hebrews.
MURRAY, Dr. J. O. F.	Textual Criticism of the New Testament.
RAMSAY, Professor W. M.	Numbers, Hours, Years, and Dates.
" " "	Religion of Greece and Asia Minor.
" " "	Roads and Travel in the New Testament.
REDPATH, Dr. H. A.	Concordances.
ROPES, Professor J. HARDY	Agrapha.
SCHECHTER, Dr. S.	Talmud.
SCHÜRER, Professor E.	Diaspora.
SCOTT, Professor H. M.	Trinity.
STANTON, Professor V. H.	Theocracy.
STENNING, JOHN F.	Diatessaron.
TASKER, Professor J. G.	Apocryphal Gospels.
THACKERAY, H. ST. JOHN	Josephus.
TURNER, CUTHBERT H.	Greek Patristic Commentaries on the Pauline Epistles.
VOTAW, Professor CLYDE W.	Sermon on the Mount.
WIEDEMANN, Professor A.	Religion of Egypt.

ALPHABETICAL LIST OF ARTICLES IN THE EXTRA VOLUME

Page.	Title of Article.	Author's Name.
343	AGRAPHA	J. HARDY ROPES, Ph.D., Professor of New Testament Criticism and Exegesis in Harvard University.
420	APOCRYPHAL GOSPELS	Rev. J. G. TASKER, Professor of Biblical Literature and Exegesis in Handsworth College, Birmingham.
584	CODE OF HAMMURABI	Rev. C. H. W. JOHNS, M.A., Lecturer in Assyriology, and Fellow of Queens' College, Cambridge.
531	CONCORDANCES	Rev. HENRY A. REDPATH, M.A., D.Litt., Rector of St. Dunstan's in the East, London, and Grinfield Lecturer on the Septuagint in the University of Oxford.
402	CONTINENTAL VERSIONS	Rev. LLEWELLYN J. M. BEBB, M.A., Principal of St. David's College, Lampeter; formerly Fellow and Tutor of Brasenose College, Oxford.
272	DEVELOPMENT OF DOCTRINE IN THE APOCRYPHAL PERIOD	Rev. W. FAIRWEATHER, M.A., Kirkealdy.
91	DIASPORA	E. SCHÜRER, Ph.D., Professor of Theology in the University of Göttingen.
451	DIATESSARON	JOHN F. STENNING, M.A., Fellow and Lecturer in Hebrew and Theology, Wadham College, Oxford.
438	DIDACHE	JAMES VERNON BARTLET, M.A., D.D., Professor of Church History in Mansfield College, Oxford.
484	GREEK PATRISTIC COMMENTARIES ON THE PAULINE EPISTLES	CUTHBERT HAMILTON TURNER, M.A., Fellow of Magdalen College, Oxford.
338	HEBREWS (GOSPEL ACCORDING TO THE)	Rev. ALLAN MENZIES, D.D., Professor of Church History in the University of St. Andrews.
461	JOSEPHUS	HENRY ST. JOHN THACKERAY, M.A., Examiner in the Board of Education; formerly Divinity Lecturer in Selwyn College, Cambridge.
45	NEW TESTAMENT TIMES	FRANTS BUHL, Ph.D., Professor of Semitic Languages in the University of Copenhagen.

ALPHABETICAL LIST OF ARTICLES

Page.	Title of Article.	Author's Name.
473	NUMBERS, HOURS, YEARS, AND DATES	W. M. RAMSAY, D.C.L., LL.D., Litt.D., Professor of Humanity in the University of Aberdeen; Honorary Fellow of Exeter and Lincoln Colleges, Oxford.
352	PAPYRI	FREDERIC G. KENYON, M.A., D.Litt., Ph.D., of the Department of Manuscripts in the British Museum; late Fellow of Magdalen College, Oxford.
197	PHILO	Rev. JAMES DRUMMOND, M.A., LL.D., Litt.D., Principal of Manchester College, Oxford.
72	RACES OF THE OLD TESTAMENT . .	MORRIS JASTROW, junr., Ph.D., Professor of Semitic Languages in the University of Pennsylvania, Philadelphia.
531	RELIGION OF BABYLONIA AND ASSYRIA	Professor JASTROW. (See preceding article).
176	RELIGION OF EGYPT	KARL ALFRED WIEDEMANN, Ph.D., Professor of Egyptology in the University of Bonn.
109	RELIGION OF GREECE AND ASIA MINOR	Professor W. M. RAMSAY. (See art. NUMBERS, etc.).
612	RELIGION OF ISRAEL	E. KAUTZSCH, Ph.D., Professor of Theology in the University of Halle.
321	REVELATION	Rev. ALFRED ERNEST GARVIE, M.A., D.D., Professor of the Philosophy of Theism in Hackney and New Colleges, London.
368	ROADS AND TRAVEL (in OT) . .	Professor BUHL. (See art. NEW TESTAMENT TIMES).
375	ROADS AND TRAVEL (in NT) . .	Professor W. M. RAMSAY. (See art. NUMBERS, etc.).
68	SAMARITAN PENTATEUCH	ED. KÖNIG, Ph.D., D.D., Professor of Old Testament Exegesis in the University of Bonn.
83	SEMITES	J. FREDERIC MCCURDY, Ph.D., LL.D., Professor of Oriental Languages in the University of Toronto.
1	SERMON ON THE MOUNT	CLYDE WEBER VOTAW, M.A., Ph.D., Assistant Professor of New Testament Literature in the University of Chicago.
359	SHIPS AND BOATS	Rear-Admiral R. M. BLOMFIELD, C.M.G., Controller-General of Ports and Light-houses.
66	SIBYLLINE ORACLES	J. RENDEL HARRIS, M.A., Litt.D., Principal and Lecturer, Settlement for Social and Religious Study, Woodbrooke; late Fellow and Librarian of Clare College, Cambridge.
156	STYLE OF SCRIPTURE	Professor ED. KÖNIG. (See art. SAMARITAN PENTATEUCH).
169	SYMBOLS AND SYMBOLICAL ACTIONS .	Professor ED. KÖNIG. (Author of preceding article).
57	TALMUD	S. SCHECHTER, M.A., Litt.D., President of the Faculty of the Jewish Theological Seminary of America, New York.
208	TEXTUAL CRITICISM (of NT) . .	Rev. J. O. F. MURRAY, M.A., D.D., late Fellow of Emmanuel College, Cambridge; Warden of St. Augustine's College, Canterbury.

LIST OF ABBREVIATIONS

I. GENERAL

Alex. = Alexandrian.
 Apoc. = Apocalypse.
 Apocr. = Apocrypha.
 Aq. = Aquila.
 Arab. = Arabic.
 Aram. = Aramaic.
 Assyr. = Assyrian.
 Bab. = Babylonian.
 c. = *circa*, about.
 Can. = Canaanite.
 cf. = compare.
 ct. = contrast.
 D = Deuteronomist.
 E = Elohist.
 edd. = editions or editors.
 Egyp. = Egyptian.
 Eng. = English.
 Eth. = Ethiopic.
 f. = and following verse or page : as Ac 10³⁴.
 ff. = and following verses or pages : as Mt 11²⁸.
 Gr. = Greek.
 H = Law of Holiness.
 Heb. = Hebrew.
 Hel. = Hellenistic.
 Hex. = Hexateuch.
 Isr. = Israelite.
 J = Jahwist.
 J' = Jehovah.
 Jerus. = Jerusalem.
 Joa. = Josephus.

LXX = Septuagint.
 MSS = Manuscripts.
 MT = Massoretic Text.
 n. = note.
 NT = New Testament.
 Onk. = Onkelos.
 OT = Old Testament.
 P = Priestly Narrative.
 Pal. = Palestine, Palestinian.
 Pent. = Pentateuch.
 Pers. = Persian.
 Phil. = Philistine.
 Phoen. = Phœnician.
 Pr. Bk. = Prayer Book.
 R = Redactor.
 Rom. = Roman.
 Sam. = Samaritan.
 Sem. = Semitic.
 Sept. = Septuagint.
 Sin. = Sinaitic.
 Symm. = Symmachus.
 Syr. = Syriac.
 Talm. = Talmud.
 Targ. = Targum.
 Theod. = Theodotion.
 TR = Textus Receptus.
 tr. = translate or translation.
 VSS = Versions.
 Vulg. = Vulgate.
 WH = Westcott and Hort's text.

II. BOOKS OF THE BIBLE

Old Testament.

Gn = Genesis.	Ca = Canticles.
Ex = Exodus.	Is = Isaiah.
Lv = Leviticus.	Jer = Jeremiah.
Nu = Numbers.	La = Lamentations.
Dt = Deuteronomy.	Ezk = Ezekiel.
Jos = Joshua.	Dn = Daniel.
Jg = Judges.	Hos = Hosea.
Ru = Ruth.	Jl = Joel.
1 S, 2 S = 1 and 2 Samuel.	Am = Amos.
1 K, 2 K = 1 and 2 Kings.	Ob = Obadiah.
1 Ch, 2 Ch = 1 and 2 Chronicles.	Jon = Jonah.
Ezr = Ezra.	Mic = Micah.
Neh = Nehemiah.	Nah = Nahum.
Est = Esther.	Hab = Habakkuk.
Job.	Zeph = Zephaniah.
Ps = Psalms.	Hag = Haggai.
Pr = Proverbs.	Zec = Zechariah.
Ec = Ecclesiastes.	Mal = Malachi.

Apocrypha.

1 Es, 2 Es = 1 and 2 Esdras.	To = Tobit.
	Jth = Judith.

Ad. Est = Additions to Esther.	Sus = Susanna.
Wis = Wisdom.	Bel = Bel and the Dragon.
Sir = Sirach or Ecclesiasticus.	Pr. Man = Prayer of Manasses.
Bar = Baruch.	1 Mac, 2 Mac = 1 and 2 Maccabees.
Three = Song of the Three Children.	

New Testament.

Mt = Matthew.	1 Th, 2 Th = 1 and 2 Thessalonians.
Mk = Mark.	1 Ti, 2 Ti = 1 and 2 Timothy.
Lk = Luke.	Tit = Titus.
Jn = John.	Philem = Philemon.
Ac = Acts.	He = Hebrews.
Ro = Romans.	Ja = James.
1 Co, 2 Co = 1 and 2 Corinthians.	1 P, 2 P = 1 and 2 Peter.
Gal = Galatians.	1 Jn, 2 Jn, 3 Jn = 1, 2, and 3 John.
Eph = Ephesians.	Jude.
Ph = Philippians.	Rev = Revelation.
Col = Colossians.	

III. ENGLISH VERSIONS

Wyc. = Wyclif's Bible (NT c. 1380, OT c. 1382,
Purvey's Revision c. 1388).
Tind. = Tindale's NT 1526 and 1534, Pent. 1530.
Cov. = Coverdale's Bible 1535.
Matt. or Rog. = Matthew's (i.e. prob. Rogers')
Bible 1537.
Cran. or Great = Cranmer's 'Great' Bible 1539.
Tav. = Taverner's Bible 1539.
Gen. = Geneva NT 1557, Bible 1560.

Bish. = Bishops' Bible 1568.
Tom. = Tomson's NT 1576.
Rhem. = Rhemish NT 1582.
Dou. = Douay OT 1609.
AV = Authorized Version 1611.
AVm = Authorized Version margin.
RV = Revised Version NT 1881, OT 1885.
RVm = Revised Version margin.
EV = Auth. and Rev. Versions.

IV. FOR THE LITERATURE

AHT = Ancient Hebrew Tradition.
AJSL = American Journal of Sem. Lang. and
Literature.
AJTh = American Journal of Theology.
AT = Altes Testament.
BL = Bampton Lecture.
BM = British Museum.
BRP = Biblical Researches in Palestine.
CIG = Corpus Inscriptionum Græcarum.
CIL = Corpus Inscriptionum Latinarum.
CIS = Corpus Inscriptionum Semiticarum.
COT = Cuneiform Inscriptions and the OT.
DB = Dictionary of the Bible.
EHH = Early History of the Hebrews.
GAP = Geographie des alten Palästina.
GGA = Göttingische Gelehrte Anzeigen.
GGN = Nachrichten der königl. Gesellschaft der
Wissenschaften zu Göttingen.
GJV = Geschichte des Jüdischen Volkes.
GVI = Geschichte des Volkes Israel.
HCM = Higher Criticism and the Monuments.
HE = Historia Ecclesiastica.
HGHL = Historical Geog. of Holy Land.
HI = History of Israel.
HJP = History of the Jewish People.
HPM = History, Prophecy, and the Monuments.
HPN = Hebrew Proper Names.
IJG = Israelitische und Jüdische Geschichte.
JBL = Journal of Biblical Literature.
JDT = Jahrbücher für deutsche Theologie.
JQR = Jewish Quarterly Review.
JRAS = Journal of the Royal Asiatic Society.
JRL = Jewish Religious Life after the Exile.
JThSt = Journal of Theological Studies.
KAT = Die Keilinschriften und das Alte Test.
KGF = Keilinschriften u. Geschichtsforschung.
KIB = Keilinschriftliche Bibliothek.
LCBl = Literarisches Centralblatt.
LOT = Introd. to the Literature of the Old Test.

NHWB = Neuhebräisches Wörterbuch.
NTZG = Neutestamentliche Zeitgeschichte.
ON = Otium Norvicense.
OP = Origin of the Psalter.
OTJC = The Old Test. in the Jewish Church.
PB = Polychrome Bible.
PEF = Palestine Exploration Fund.
PEFSt = Quarterly Statement of the same.
PSBA = Proceedings of Soc. of Bibl. Archæology
PRE = Real-Encyclopädie für protest. Theologie
und Kirche.
QPB = Queen's Printers' Bible.
RB = Revue Biblique.
REJ = Revue des Etudes Juives.
RP = Records of the Past.
RS = Religion of the Semites.
SBOT = Sacred Books of Old Test.
SK = Studien und Kritiken.
SP = Sinai and Palestine.
SWP = Memoirs of the Survey of W. Palestine.
ThL or ThLZ = Theol. Literaturzeitung.
ThT = Theol. Tijdschrift.
TS = Texts and Studies.
TSBA = Transactions of Soc. of Bibl. Archæology
TU = Texte und Untersuchungen.
WAI = Western Asiatic Inscriptions.
WZKM = Wiener Zeitschrift für Kunde des
Morgenlandes.
ZA = Zeitschrift für Assyriologie.
ZAW or ZATW = Zeitschrift für die Alttest.
Wissenschaft.
ZDMG = Zeitschrift der Deutschen Morgen-
ländischen Gesellschaft.
ZDPV = Zeitschrift des Deutschen Palästina-
Vereins.
ZKSF = Zeitschrift für Keilschriftforschung.
ZKW = Zeitschrift für kirchliche Wissenschaft.
ZNTW = Zeitschrift für die Neutest. Wissen-
schaft.

DICTIONARY OF THE BIBLE

EXTRA VOLUME

SERMON ON THE MOUNT.—

- I. Origin and Transmission.
 1. Historicity of the Discourse.
 2. Circumstances of its Delivery.
 3. Transmission and Translation.
 4. Relative Authenticity of the two Accounts.
 5. Present State of the Text.
- II. Interpretation.
 1. Popular, Gnostic, and Figurative Style.
 2. Effect of the Translation into Greek.
 3. Theme of the Discourse and its Development.
 4. The Chief Problems of Interpretation.
 - a. The Beatitudes.
 - b. The World Mission.
 - c. Relation to the Old Testament.
 - d. Inner Righteousness
 - e. Unselfishness and Forgiveness.
 - f. Universal Love.
 - g. Religious Worship.
 - h. The Lord's Prayer.
 - i. Devotion to the Kingdom.
 - j. The Treatment of Others.
 - k. The Duty of Righteousness.
 5. The Relation of the Sermon on the Mount to the Teaching of Jesus as a whole.
Literature.

The message of Jesus to men contained in the Sermon on the Mount can be essentially understood, and is valid and useful, apart from the historical, literary, and exegetical questions concerning it which are now receiving so much attention, and which tend to overshadow the real significance and power of His teaching. There are problems still unsolved regarding the origin and transmission of the discourse, problems also regarding the interpretation and application of some of its utterances; but the truth, the preaching, and the living of the Gospel have not to wait upon the results of such investigations. The words of Jesus in this Sermon present an ideal of human life, founded upon religious truth and ethical principles, which has been and is intuitively recognized as the highest standard of life yet conceived, or even as the ultimate standard to which mankind can and must attain. They need not so much to be explained by men as to be appreciated, accepted, and lived by them. A sufficient understanding of the Sermon was not meant to be the possession of the few only. In this teaching Jesus aimed at being universally intelligible; and He was so, for through the Christian centuries the kind of life which He here describes has been the guiding star of civilization. If misconceptions as to the origin and interpretation of the discourse have at times

arisen, out of imperfect historical knowledge and limited ethical and spiritual insight, these will gradually disappear before a better knowledge and a clearer vision.

i. *ORIGIN AND TRANSMISSION.*—The historical and literary criticism of the Gospels, which has attracted the labours of many eminent scholars in the past three generations, is by no means finished. Yet some important conclusions have been reached regarding the origin and preservation of the NT records of Jesus' life. To this field of investigation belong the introductory questions concerning the Sermon on the Mount. Was there, in fact, such a discourse? If so, what were the circumstances of its delivery? How were the accounts of the discourse affected by the processes of transmission and translation? And what is the condition of the text of the discourse as we now have it?

1. *HISTORICITY OF THE DISCOURSE.*—It is the prevailing opinion among NT scholars that in Mt 5-7 we have an account of a discourse actually delivered by Jesus, the theme and substance of which are here preserved.* It is entirely consistent with this view, and is by the majority held in conjunction with it, that the account as it stands in the First Gospel is not coextensive with the discourse originally given by Jesus. Probably not all of the Sermon is contained in Matthew's report, but only excerpts or a digest; for there is no reason to think that means were at hand for reporting the discourse *verbatim* and entire; Jesus seems not to have cared that His discourses should be so preserved; He was accustomed to teach the people *at length* when a multitude was with Him,† while the matter given in Matthew could easily be spoken in twenty minutes; and one would think it faulty pedagogical method to present a series of striking sayings, full of meaning and difficult for the hearers offhand to grasp, without connecting with each germinal saying a more explicit and concrete teaching to illustrate and apply it.

Conversely also, the Matthean report of the Sermon probably contains some matter which did not form a part of the original discourse. Certain sections of Mt 5-7 are less evidently connected

* So Origen, Augustine, Chrysostom, Luther, Tholuck, Meyer, Keim, Achelis, Ederheim, Godet, Bruce, Broadus, Kubel, Noesen, Feine, Steinmeyer, Wendt, Sanday, Plummer, B. Weiss, H. Weiss, Grawert, Burkitt, Bartlett, Bacon, and many others.
† See Mk 4:1-26.

than the others with the specific theme of the Sermon and its development, e.g. 5^{21, 28, 31, 32} 6⁷⁻¹⁵ 7^{9, 17-21, 24}. With regard to these and other passages the possibility of their belonging to the actual Sermon cannot be denied, but the probability is felt by most scholars to be against some or all of them. This view is strongly confirmed by the fact that we find parallels to these sections elsewhere in the Gospels, in other settings which in some cases commend themselves as original. It is difficult to conceive that Luke, or any one else, would break up a discourse of Jesus which had been handed down so fully as in Mt 5-7 and scatter the fragments as in the Third Gospel.* And, finally, it has become recognized that the First Gospel arranges its teaching material into topical groups;† all of the four Gospels exhibit the results of this process, but the First Gospel more than the others.

There have been, and are to-day, a number of eminent scholars who regard the Sermon as a compilation throughout, holding that no such discourse was really delivered by Jesus, and that

* See Heinrich, *Bergpredigt*, i. 49 f. It is obviously true that Jesus taught the same truths and principles on various occasions to different individuals, and in doing so may have at times repeated some of His sayings in quite the same, or nearly the same, words. Such repetition may sometimes serve to explain the several forms in which similar sayings have been handed down. But it cannot be used as a universal solvent of the mass of variations. This stock argument of the apologetic harmonists proceeds upon the assumption that Jesus' words must have been transmitted in every case precisely as He uttered them. But the assumption is unwarranted, and the phenomena of variation abundantly and decisively disprove it. Nearly all NT scholars now agree that the differences which appear in parallel passages of our Gospels are due chiefly to the vicissitudes of transmission and translation. The Gospel teaching did not consist of a set of formulae, to be learned and repeated verbatim.

† See Godet, *Collection of the Four Gospels, and the Gospel of Matthew*, p. 181 ff.; Wendt, *Lehre Jesu*, i. 52, 84, 106, 185; Wernle, *Synopt. Frage*, pp. 61-80; Weizsacker, *Apost. Zeitalter*², pp. 389-393 [Eng. tr. ii. 33-62]; Julicher, *Einführung i. d. NT*, p. 195; Heinrich, *Bergpredigt*, i. 8 f.; B. Weiss, *Meyer-Komm. i. d. Mattheum*, in loc.; H. Holtzmann, *Hand-Comm. u. d. Synoptiker*, in loc. The discourses of Mt 5-7, 10, 13, 18, 23, 24, 25 are compilations in the sense that to the historical nucleus of each discourse there has been joined some matter upon the same or a kindred subject which originally belonged to other historical connexions. Thus Mt 10 contains as a nucleus some instruction which Jesus gave the Twelve when He sent them out on their trial mission (10⁵⁻¹⁶); but to this section there has been added material from another occasion (10¹⁶⁻⁴², esp. 17-23), when Jesus in the latter part of His ministry was preparing His disciples for the work they must do after His departure. The first Christians found it practically convenient to have the mission teaching grouped together. Mt 13 contains a collection of Jesus' parables upon the nature and development of the kingdom of God. The collection is not found in the corresponding passages Mk 4 and Lk 8. It is quite unlikely that Jesus would make up a discourse of these seven parables (Mt 13^{1-9, 24-30, 31 f.} 33, 44 45^{f.} 47-50). If the disciples did not understand the first parable until it was explained to them privately (Mk 4¹⁰), it would be of little use to add six others no more intelligible. But the chapter itself, by the two breaks at v. 10 and vv. 24-35, shows that it is a compilation; vv. 3, 23, which seem to make all that intervenes a connected discourse, is the editorial device for giving unity and vividness to the teaching. It is probable that the parable of the Sower was given on some occasion (vv. 1-3) in Jesus' Galilean ministry, accompanied by explicit teaching along the same line. On other occasions the other parables were given; then, their original setting having been lost, all seven were topically grouped by the early Christians for practical instruction. Mt 15 contains a collection of teachings from various occasions, grouped about the nucleus of an original discourse (cf. Mk 6³⁵⁻⁵⁰) concerning the relations and duties of the Twelve and the community life of the first disciples. Mt 23 is a collection of sayings from different parts of the ministry (cf. Mk 12³⁸⁻⁴⁰, Lk 11³⁷⁻⁵³ 13^{34 f.} 20-47), in which Jesus condemned certain acts and characteristics of the Pharisees. The nucleus is apparently in vv. 1-12; seven woes (the complete number) are here grouped together as were the seven parables of ch. 13. Mt 24 exhibits the same topical arrangement of material (cf. Lk 12³⁹⁻⁴⁶ 17²²⁻³⁷ 21). And in Mt 21, 22 and 25 appear similar compilations of related teaching. It is probable that the author of the present Gospel of Matthew found this material grouped in this way, although he may have carried the process farther, and have unified these groups by editorial retouching. If, then, the First Gospel has several discourses, consisting in each case of the nucleus of some original sermon augmented by kindred material from other occasions, it becomes quite probable that the discourse in Mt 5-7 is of a similar construction. The added matter is just as valuable and trustworthy as the nucleus matter, being equally the authentic utterances of Jesus.

the alleged occasion of it was a well-meant fiction of tradition or of the Evangelists.* According to this hypothesis, the material grouped under the title of a mountain discourse to His disciples came from various occasions in the ministry which were no longer remembered. The compilation was made for the practical use of the early Christians, to furnish them with a manual of Christian conduct.† But this is to press the theory of compilation to an extreme. It is not an impossible view, and would not entail serious consequences, since it does not deny the authenticity of the sayings; but it must be counted less probable. The examination of the great teaching masses in Matthew seems to show that the briefer sayings were generally grouped with the historical remains of some great discourses, whose approximate position in the ministry and whose circumstances were not wholly forgotten. The main portion of the Sermon, contained in Mt 5²⁻⁶¹⁹, is (with the exception of certain verses) so closely woven as theme and exposition that it cannot well be denied historical unity and occasion. Jesus must logically have given such teaching as the Sermon presents, in the earlier Galilean ministry to which the Gospels assign this teaching; and we know that He was accustomed to speak long and connectedly to His hearers. It is therefore probable enough that at least this much of a digest of one of Jesus' most important and impressive discourses should have been preserved.

2. CIRCUMSTANCES OF ITS DELIVERY.—The occasion on which the Sermon was given appears to be clearly indicated by Lk 6¹²⁻²⁰, which makes it follow closely upon the appointment of the twelve apostles.‡ The Gospel of Matthew agrees with that of Luke in locating the Sermon on the Mount in the first half of Jesus' ministry in Galilee, although Matthew places it somewhat nearer to the beginning of that period.§ There is good

* So Calvin, Baur, Neander, Bleek, Pott, Semler, Strauss, Kuinol, Wieseler, H. Holtzmann, Weizsacker, Julicher, Heinrich, Ibbeken, Hawkins, Schmiedel.

† Weizsacker, *Apost. Zeitalter*² (1892), p. 880 f. [Eng. tr. ii. 461 f.]: 'The discourse, as Matthew has adopted it, was in fact a kind of code, but such as originated in and was designed for the Church. . . . The nucleus consists of a few long main sections, 5²¹⁻⁴⁸ 6¹⁻¹² 12¹⁹⁻³⁴. . . . The commandments in these three sections together form a sort of primer, which was, however, first composed by the combination of these didactic pieces, whose original independence is at once apparent from the parallel sections of Luke's Gospel. . . . The evangelist put on an introduction, 5¹²⁻¹⁶ and an appendix, 7¹⁻²⁹, to fit the whole to the historical situation which he gave it.' H. Holtzmann, *Hand-Comm. u. d. Synoptiker*, p. 99: 'Probably the discourse was constructed by the evangelist himself out of written and oral sources, with the primary purpose of furnishing an order of life for the new Church.' Heinrich, *Bergpredigt*, i. 39: 'The Sermon on the Mount of Matthew seems to be a free composition of a speech of Jesus from certain genuine sayings of His, which were in part already grouped together, in part in circulation as single sayings.' Similarly Julicher, *Einführung i. d. NT*³ (1901), p. 232; Hawkins, *Horae Synopticae* (1899), pp. 131-135; Schmiedel, *Encyc. Bibl.* vol. ii. col. 1898.

‡ The corresponding passage in Mark is 3¹³⁻¹⁹, but the Sermon is not found at that point nor elsewhere in the Second Gospel. There is no indication at Mk 3¹⁹ that a discourse followed historically.

§ Too much has often been made of the difference between Matthew and Luke regarding the position to which the Sermon is assigned by each. Matthew places after the Sermon, in chs. 8, 9, 12-21, some matter which Luke places before the Sermon in 4³¹⁻⁶¹; but this section contains only incidents, miracles, and brief teachings, which, even if they are all in their proper places in Luke (and Mark, which corresponds), would not require more than a few weeks of time. Matthew does not record the appointment of the Twelve, but first mentions them as apostles in ch. 10 in connexion with their mission. Nor does Matthew represent the Sermon as Jesus' first teaching, since he distinctly relates before the discourse (4^{23 f.}) that 'Jesus went about in all Galilee, teaching in their synagogues, and preaching the gospel of the kingdom, and healing all manner of disease and all manner of sickness among the people. And the report of him went forth into all Syria' (i.e. throughout Jewish territory). The earlier work and teaching are compressed rather than ignored, and the words are given more prominence than the deeds. A compilation of representative teaching by Jesus in chs. 5-7 is followed by a compilation of representative deeds of Jesus in chs. 8, 9.

reason to think that they are sufficiently correct. The contents of the discourse, as clearly as its position in the Gospels, mark it as a part of His Galilean teaching,—not, indeed, the first instruction Jesus gave, but of the kind fitted for receptive hearers who had gained some acquaintance with Him, and had by skilful preparation on His part become ready for a general presentation of His religio-ethical ideas. To find Jesus giving one of His most significant discourses in connexion with the appointment of the twelve apostles is altogether what one might expect. That appointment was a great event in His ministry. It marked the stage when His popular success required Him to choose and train some men to assist Him in His work (Mk 3¹⁴); and it behoved Him also, since the storm of opposition was gathering on the horizon (Mk 2¹⁻³⁶, cf. Mt 23²⁸⁻³⁰), to prepare these men to carry forward His work after He should lay down His life at Jerusalem.

The Sermon is not, however, addressed exclusively or specifically to the newly-appointed apostles. It contains no trace of esoteric teaching. There is no portion of the discourse which does not pertain equally to all of Jesus' followers, present and future. The internal evidence of the Sermon, therefore, sustains the correctness of the Evangelists' statements (Mt 7²⁸⁻²⁹, Lk 7¹) that Jesus spoke directly and inclusively to the people who thronged Him at this time.* The multitude was a *disciple* multitude in the sense that many were professed followers of Jesus, many were contemplating discipleship, and all were favourably disposed towards Him, listening with interest to His teaching. The Sermon contains no direct polemic against opponents, but an appeal to all to adopt and to attain a higher type of righteousness than that which was conventionally taught them by the scribes.

The exact time, i.e. the year, month, and day, at which the Sermon was given cannot be determined. There is no agreement among scholars as to either the duration or the calendar dates of Jesus' public ministry.† But on any chronological hypothesis the discourse stands about half-way between the beginning of Jesus' public work and His crucifixion.

The Sermon was spoken in Galilee, the scene of the main ministry of Jesus (cf. Mt 4²³⁻²⁵, Lk 6¹⁷). If there is an indication in Mt 8⁵, Lk 7¹ that the place of the event was near Capernaum, the precise locality would not even then be defined, since the site of Capernaum itself is in dispute. The mountain referred to in Mt 5¹⁻⁸, Lk 6¹² is not named and cannot be identified.‡ We may suppose, how-

ever, that the scene of the Sermon was in the region to the west of the lake, not far distant from the thickly-populated shore.

3. TRANSMISSION AND TRANSLATION.—We seem to have in Mt 5-7, Lk 6²⁰⁻⁴⁹ two accounts of the Sermon; they differ somewhat in setting, verbal expression, and content, but are nevertheless essentially one discourse.* Both Gospels assign the Sermon to the earlier Galilean ministry. The circumstances of the discourse are similar—the mountain, the representative multitude, the healings, the address to disciples. The theme of the discourse is the same in each—the true righteousness. The development of the theme is similar—a characterization of this righteousness, with specific teaching as to how it is to affect thought and conduct, and an exhortation to men to live in this way. Each account begins with the Beatitudes, and closes with the injunction to *do God's will* as revealed in Jesus' teaching, enforced by the parable of the Two House-builders. And, finally, nearly the whole of Luke's discourse is contained in Matthew's.

and features of *Karn Hattin* correspond sufficiently well with the history; but there are a number of other hills along the western shore of the lake which are also suitable (Robinson, *BRP* iii. 487). (2) Some specific mountain is referred to, and was known to the early Christians as the scene of the discourse, but its identity became lost from the Gospel tradition. So Tholuck, Meyer, Keil, Kübel, Achelis, Andrews. (3) The phrase *τὸ ὄρος* designates not a particular hill or mountain peak, but the range of tableland rising to the west of the Sea of Galilee; and the site of the event is not more specifically designated. The Jews used three leading terms to distinguish the surface features of their territory—'mountain,' 'plain,' and 'valley': of these designations the first is understood to have referred to the tableland, whether broken into isolated peaks or not (cf. Gn 19¹⁷, 19. 30 §123. 25 368. 9, Mt 14²³ 15²⁹, Mk 6⁴⁵, Lk 9²⁸, Jn 6⁵). Therefore *τὸ ὄρος* would in any particular instance refer to the high land—whether tableland or peak—in the vicinity of the event. This view also leaves the site of the Sermon undetermined. So Bleek, Robinson, Ebrard, Thomson, Edersheim, Broadus, Bruce, Nosgen, Stewart, B. Weiss, Bacon. (4) Those who regard the Sermon as a mosaic only, resting upon no particular discourse, but made up of material gathered from many connexions (see names in footnote above), perforce look upon 'the mountain' as a part of the artificial scenery which the compiler of the Sermon arranged about it to give verisimilitude to the whole. Of these four views one may adopt the second or the third, but between these two it is difficult to choose.

The accounts in Mt 5¹⁻⁸, Lk 6¹²⁻¹⁷, which describe the setting of the Sermon, both make mention of the mountain, but are not in agreement concerning it. Matthew locates the entire scene upon the mountain; Jesus and His disciples ascend it, apparently by His deliberate choice, to speak and to hear the Sermon; when it is finished they descend. According to the Third Gospel, Jesus goes up the mountain to spend the night in solitary prayer (cf. Lk 9²⁸, Jn 6¹⁵); when it is day He calls His disciples to Him, and appoints the Twelve; afterwards He comes down from the mountain to the multitude which had gathered on a level place below, where He heals many, and later delivers the discourse. The well-meant harmonistic efforts expended upon these passages do not seem convincing. But the discrepancy is neither sufficient to remove the datum of a mountain in connexion with the discourse, nor, in face of strong evidence for their identity, to force the conclusion that the reports of Matthew and Luke represent two separate and distinct discourses with different settings.

* This is the almost unanimous opinion of scholars: Tatian (*Diatessaron*), Origen, Jerome, Chrysostom, Euthymius, Theophylact, Luther, Calvin, Maldonat, Meyer, Bengel, Neander, Schleiermacher, Stier, Ewald, Wieseler, Keim, Keil, Kostlin, Robinson, Ellicott, Schneckenburger, Hilgenfeld, Edersheim, Godet, Tholuck, Tischendorf, Achelis, Andrews, Beyschlag, Broadus, Farrar, Feine, Schanz, Sanday, Steinmeyer, Sieffert, de Wette, Wendt, H. Weiss, B. Weiss, Bruce, Burton, Heinrich, H. Holtzmann, Ibbeken, Julicher, Kübel, Nosgen, Wernle, Bacon, and many others. The theory of two separate discourses was advocated for apologetic purposes by Augustine, and, following him, by St. Gregory and certain minor Rom. Cath. writers, as, recently, Azibert (*Revue Biblique*, 1894). A few modern Protestant writers also have taken this view, as Gresswell, Lange, Plumptre, and, most recently, Plummer (*Comm. on Luke* 1890), p. 177.

The arrangement of the material in Tatian's *Diatessaron* (see Hill, *Earliest Life of Christ, being the Diatessaron of Tatian* [1894], pp. 73-84), which combines the Matthew and Luke accounts, is thus: Mt 5¹⁻¹⁴ Lk 6¹²⁻¹⁷ [Mk 3¹⁴⁻¹⁵] Mt 5¹⁵⁻²⁸ Lk 6¹⁸⁻²⁶ [Mk 3¹⁶⁻¹⁷] Mt 5²⁹⁻³² Lk 6²⁷⁻²⁹ [Mk 3¹⁸⁻¹⁹] Mt 5³³⁻³⁸ Lk 6³⁰⁻³⁵ [Mk 3²⁰⁻²¹] Mt 5³⁹⁻⁴² Lk 6³⁶⁻³⁸ [Mk 3²²⁻²³] Mt 5⁴³⁻⁴⁶ Lk 6³⁹⁻⁴¹ [Mk 3²⁴⁻²⁵] Mt 5⁴⁷⁻⁴⁸ Lk 6⁴²⁻⁴³ [Mk 3²⁶⁻²⁷] Mt 5⁴⁹⁻⁶² Lk 6⁴⁴⁻⁴⁹ [Mk 3²⁸⁻³¹] Mt 6¹⁻¹⁶ Lk 11¹⁻¹³ [Mk 6⁷⁻¹³] Mt 6¹⁷⁻¹⁹ Lk 11¹⁴⁻¹⁶ [Mk 6¹⁴⁻¹⁶] Mt 6²⁰⁻²³ Lk 11¹⁷⁻²¹ [Mk 6¹⁷⁻¹⁹] Mt 6²⁴⁻²⁶ Lk 11²²⁻²⁴ [Mk 6²⁰⁻²²] Mt 6²⁷⁻²⁹ Lk 11²⁵⁻²⁷ [Mk 6²³⁻²⁵] Mt 6³⁰⁻³⁴ Lk 11²⁸⁻³⁰ [Mk 6²⁶⁻²⁸] Mt 6³⁵⁻³⁸ Lk 11³¹⁻³³ [Mk 6²⁹⁻³¹] Mt 6³⁹⁻⁴² Lk 11³⁴⁻³⁶ [Mk 6³²⁻³⁴] Mt 6⁴³⁻⁴⁶ Lk 11³⁷⁻³⁹ [Mk 6³⁵⁻³⁷] Mt 6⁴⁷⁻⁵⁰ Lk 11⁴⁰⁻⁴² [Mk 6³⁸⁻⁴⁰] Mt 6⁵¹⁻⁵⁴ Lk 11⁴³⁻⁴⁵ [Mk 6⁴¹⁻⁴³] Mt 6⁵⁵⁻⁵⁸ Lk 11⁴⁶⁻⁴⁸ [Mk 6⁴⁴⁻⁴⁶] Mt 6⁵⁹⁻⁶² Lk 11⁴⁹⁻⁵¹ [Mk 6⁴⁷⁻⁴⁹]

* That the discourse was addressed to the multitude is the view of Achelis, Bleek, Bruce, Godet, Meyer, Nosgen, and others. That it was addressed to close disciples, but overheard by the multitude to whom it did not directly pertain, is held by Tholuck, B. Weiss, Grawert, and others. Burton and Bacon maintain that the discourse was spoken only to an inner circle of followers. But these hypotheses presuppose a sharper line between disciples (Mt 5¹, Lk 6²⁰) and general followers of Jesus than Jesus Himself indicates in the Sermon, or than can otherwise be made out at this stage of the public ministry. The use of the second personal form by Luke cannot be adduced as evidence that Jesus was speaking only to a close circle of disciples; it was equally applicable to a large company. Matthew's account also has the second personal form after 5³⁻¹⁰. Yet both Evangelists have statements (Mt 5¹⁻⁸, Lk 6¹²⁻¹⁷) to the effect that Jesus addressed His teaching to the multitudes at this time; and it is not clear that these statements are mere literary features, without historical value. The discourse contains positively nothing to indicate that Jesus was speaking only to a small, inner circle of His followers.

† See art. CHRONOLOGY OF NT, vol. I, and JESUS CHRIST, vol. II.; also art. 'Chronology of NT' in *Encyclopædia Biblica*, vol. I.; and Literature cited in connexion.

‡ Four views are now current concerning this 'mountain': (1) Latin tradition identifies it with *Karn Hattin*; the theory is accepted by Stanley (*SP* p. 363f.), and also by Plummer and H. Weiss. This Latin tradition did not arise until the 13th cent., and is quite unknown to the Eastern Church, so that it cannot have been more than a plausible guess. The location

The relation of the contents of the two accounts can be shown in a table:—

Mt 5 ¹ = Lk 6 ³⁰	Mt 7 ¹⁻² = Lk 6 ^{37, 38b}
5 ^{4, 6} = 6 ³¹	7 ⁹⁻⁵ = 6 ^{41, 43}
5 ^{11, 13} = 6 ^{32, 33}	7 ¹² = 6 ⁴¹
5 ^{20, 40, 42} = 6 ^{30, 30}	7 ^{16, 17} = 6 ^{42, 44}
5 ⁴⁴⁻⁴⁵ = 6 ^{27, 28, 32-33}	7 ²¹ = 6 ⁴⁵
6 ¹⁻³⁴ has no parallel in Lk 6 ³⁰⁻⁴⁹	7 ²⁴⁻²⁷ = 6 ⁴⁷⁻⁴⁹

Matthew's account has 107 verses, Luke's account 29. Of Luke's 29 verses, 23½ find a parallel in the Matthean account, where they are arranged as 26 verses. There is no parallel in Mt 5-7 for Lk 6^{34-35, 38a, 38, 40, 45}. Of Matthew's remaining 81 verses, 34 find a parallel in Luke outside of ch. 6 (in chs. 11-14, 16)† as follows: ‡—

Mt 5 ¹³ = Lk 14 ^{34, 35}	Mt 6 ^{22, 23} = Lk 11 ³⁴⁻³⁵
5 ¹⁸ = 11 ³³ (8 ¹⁶)	6 ²⁴ = 16 ¹³
5 ¹⁹ = 16 ¹⁷	6 ²⁵⁻³³ = 12 ²²⁻³¹
5 ^{25, 26} = 12 ^{33, 30}	7 ⁷⁻¹¹ = 11 ⁹⁻¹³
5 ³² = 16 ¹⁸	7 ^{12, 14} = 13 ³⁴
6 ⁹⁻¹³ = 11 ³⁻⁴	7 ²³ = 13 ³⁷
6 ¹⁹⁻²¹ = 12 ^{33, 34}	

This leaves 47 verses of the Matthean discourse which have no parallel in the Third Gospel: Mt 5^{2, 7-10, 14, 15, 17, 19-24, 27-31, 32-33, 41, 43} 6^{1-8, 14-18, 34} 7^{6, 15, 18-20, 22}. That is, four-ninths of the Sermon in Matthew is peculiar to that Gospel.§

These phenomena of the comparative contents of the two accounts of the Sermon present a complex and difficult problem, and compel one to investigate the history of this discourse from the time of its utterance until it took its present two-fold form in our First and Third Gospels.

Another important feature of these two reports of the Sermon, and one which must be investigated in conjunction with the problem of content, is the remarkable variation in wording—in the literary expression of the same ideas. Sometimes this variation is slight, as in: ||—

* But there are parallels for two or three of these passages elsewhere in Matthew, thus: Lk 6³⁰ = Mt 1^{14b}, Lk 6⁴⁵ = Mt 12³⁵; and with Lk 6⁴⁰ compare Mt 10²⁴ (Jn 13¹⁶ 13^{20a}).

† These chapters belong to the somewhat clearly marked middle third of Luke's Gospel (10³-18⁴), which consists mainly of discourse material. It is commonly known as the 'Perman section,' because its position in this book is between the final departure of Jesus from Galilee (Lk 9⁵¹-10²⁰) and His public entrance into Jerusalem (Lk 19²⁸-19⁴⁸). During this period Jesus perhaps spent some days or weeks in Perea (Mt 10¹ = Mk 10¹, Lk 13¹, Jn 10⁴⁰), and some of the material in Lk 10-18 may belong to that period, as 12¹⁻¹² 22-50 13¹⁻⁹ 22-30 31-35 17³⁰⁻³⁷ 19¹⁻⁴. But the main contents of these chapters (Lk 11¹⁻³⁶ 19¹³⁻³⁴ 13¹⁰⁻¹⁴ 15 16 17¹⁻¹⁰ 18¹⁻³⁴) quite surely belong to the Galilean ministry, because (1) this is indicated by various allusions in the chapters themselves, e.g. 11³²⁻³³ (cf. Mt 13³⁰⁻⁴²), 13¹⁰ 17¹⁸⁻²¹ (cf. Mt 13^{31, 32}), 14³⁵⁻³⁶; (2) the subject of most of this teaching is more suitable to that period; (3) it is altogether unlikely that Jesus would have left so large and so important a portion of His general teaching till the last weeks of His ministry. Luke had for these chapters (10-18) a special source, probably a document of some extent, which contained most valuable teaching; but the settings of the teaching had been largely lost, and he therefore put these passages, with other unattached material from the *Logia* and other sources, into this middle, mixed section of his book,—in fact, what else could he do? The material was too important to omit, and he was too conscientious a historical author to create scenes for the several pieces.

‡ In the case of three of these passages there are parallels in Mark also: Mt 5¹³ = Mk 9⁵⁰ = Lk 14^{34, 35}; Mt 5¹⁸ = Mk 4²¹ = Lk 11³³ (and 8¹⁶); Mt 5²⁵ = Mk 10¹¹ = Lk 16¹⁸. There is but one sentence which is put by both Matthew and Luke into the Sermon that has a parallel in Mark, namely, Mt 7⁹ = Mk 4^{9b} = Lk 6^{38a}; and this saying is of the gnomic type, so that it may have been repeated on various occasions by Jesus. Consequently one is inclined to say that the portion of the Sermon common to Matthew and Luke is not found in Mark. And of the matter in Matthew's Sermon which is found in Luke outside of the Sermon, or not found in Luke at all, Mark has parallels perhaps for five verses,—the three just indicated, and the two named in the following footnote,—so that the Second Gospel scarcely knows of this teaching material which the First and Third Gospels make so prominent.

§ Except, perhaps, Mt 5^{20, 30} = Mk 9^{43, 47}, Mt 6^{14, 15} = Mk 11²⁵. It is worth observing that three passages of the Matthew Sermon have parallels within the First Gospel itself: Mt 5^{20, 30} = Mt 18⁹, Mt 5²⁵ = Mt 19⁹, Mt 7¹⁸ = Mt 12²⁵.

|| The Greek text here used is that of Westcott and Hort.

Mt 7^{9b}.

καὶ ἐν ᾧ μέτρω μετρεῖτε
μετρηθήσεται ὑμῖν.

Mt 7^{9c}.

ἂν τί δὲ βλέπει τὸ κάρφος τὸ ἐν τῷ ὀφθαλμῷ τοῦ ἀδελφοῦ σου, τὴν δὲ ἐν τῷ σὺ ὀφθαλμῷ δοκὸν οὐ κατανοεῖς; ἂν πῶς ἐρεῖς τῷ ἀδελφῷ σου Ἀφες ἐκβάλω τὸ κάρφος ἐκ τοῦ ὀφθαλμοῦ σου, καὶ ἰδοὺ ἡ δοκὸς ἐν τῷ ὀφθαλμῷ σου;

ἢ ὑποκριτὰ, ἐκβαλε πρῶτον ἐκ τοῦ ὀφθαλμοῦ σου τὴν δοκὸν, καὶ τότε διαβλέψεις ἐκβαλεῖν τὸ κάρφος ἐκ τοῦ ὀφθαλμοῦ τοῦ ἀδελφοῦ σου.

Lk 6^{38b}.

ᾧ γὰρ μέτρω μετρεῖτε ἀντι-
μετρηθήσεται ὑμῖν.

Lk 6^{41, 42}.

ἂν τί δὲ βλέπει τὸ κάρφος τὸ ἐν τῷ ὀφθαλμῷ τοῦ ἀδελφοῦ σου, τὴν δὲ δοκὸν τὴν ἐν τῷ ἰδίῳ ὀφθαλμῷ οὐ κατανοεῖς; ἂν πῶς δύνασαι λέγειν τῷ ἀδελφῷ σου Ἀδελφέ, ἀφες ἐκβάλω τὸ κάρφος τὸ ἐν τῷ ὀφθαλμῷ σου, αὐτὸς τὴν ἐν τῷ ὀφθαλμῷ σου δοκὸν οὐ βλέπων; ὑποκριτὰ, ἐκβαλε πρῶτον τὴν δοκὸν ἐκ τοῦ ὀφθαλμοῦ σου, καὶ τότε διαβλέψεις τὸ κάρφος τὸ ἐν τῷ ὀφθαλμῷ τοῦ ἀδελφοῦ σου ἐκβαλεῖν.

Similarly compare Mt 6³⁴ = Lk 16¹³ and Mt 7^{9c} = Lk 11^{9, 10}. In these four passages there is almost complete verbal agreement—not quite, however—which must be explained. And the four sayings are widely scattered in Luke as compared with Matthew.

But such close verbal agreement is exceptional. In all the other parallel passages the variation in literary form is great, as in:—

Mt 5^{20, 40}.

ἂν Ἐγὼ δὲ λέγω ὑμῖν μὴ ἀντιστῆναι τῷ πονηρῷ· ἀλλ' ὅστις σε ραπίζει εἰς τὴν δεξιὰν σιαγόνα [σου], στρέψον αὐτῷ καὶ τὴν ἄλλην·
καὶ τῷ θέλοντί σοι κριθῆναι καὶ τὸν χιτῶνά σου λαβεῖν, ἀφες αὐτῷ καὶ τὸν ἱμάτιον.

Lk 6³⁰.

τῷ τύποντί σε ἐπὶ τὴν σιαγόνα παρέχε καὶ τὴν ἄλλην, καὶ ἀπὸ τοῦ αἰροντός σου τὸ ἱμάτιον καὶ τὸν χιτῶνα μὴ κωλύσῃς.

Mt 7¹².

Πάντα οὖν ὅσα ἐὰν θέλῃτε ἵνα ποιῶσιν ὑμῖν οἱ ἄνθρωποι, οὕτως καὶ ὑμεῖς ποιεῖτε ἀ τοῖς· οὕτως γὰρ ἔστιν ὁ νόμος καὶ οἱ προφῆται.

Lk 6³¹.

καὶ καθὼς θέλετε ἵνα ποιῶσιν ὑμῖν οἱ ἄνθρωποι, ποιεῖτε αὐτοῖς ὁμοίως.

Mt 7²¹⁻²⁷.

ἂν Πᾶς ὁν ὅστις ἀκούει μου τοὺς λόγους [τοῦτους] καὶ ποιεῖ αὐτοὺς, ὁμοιωθήσεται ἀνδρὶ φρονίμῳ, ὅστις ᾤκοδομησεν αὐτοῦ τὴν οἰκίαν ἐπὶ τὴν πέτραν. καὶ κατέβη ἡ βροχὴ καὶ ἦλθαν οἱ ποταμοὶ καὶ ἐπνευσαν οἱ ἀνεμοὶ καὶ προσέτεσαν τῇ οἰκῇ ἐκείνῃ, καὶ οὐκ ἔπεσεν, θεμελιωτὸ γὰρ ἐπὶ τὴν πέτραν. καὶ πᾶς ὁ ἀκούων μου τοὺς λόγους τοῦτους καὶ μὴ ποιῶν αὐτοὺς ὁμοιωθήσεται ἀνδρὶ μωρῷ, ὅστις ᾤκοδομησεν αὐτοῦ τὴν οἰκίαν ἐπὶ τὴν ἄμμου. καὶ κατέβη ἡ βροχὴ καὶ ἦλθαν οἱ ποταμοὶ καὶ ἐπνευσαν οἱ ἀνεμοὶ καὶ προσέτεσαν τῇ οἰκῇ ἐκείνῃ, καὶ ἔπεσεν, καὶ ἦν ἡ πτῶσις αὐτῆς μεγάλη.

Lk 6⁴⁷⁻⁴⁹.

ἂν Πᾶς ὁ ἐρχόμενος πρὸς με καὶ ἀκούων μου τὸν λόγον καὶ ποιῶν αὐτοὺς, ὑποδείξω ὑμῖν τι ἐστὶν ὁμοίος· ὁμοίος ἐστὶν ἀνθρώπῳ οἰκοδομῶντι οἰκίαν, ὃς ἔσκαψεν καὶ ἐβάθυνεν καὶ ἔθηκεν θεμελίον ἐπὶ τὴν πέτραν· πληγμῆς δὲ γενομένης προσέρρηξεν ὁ ποταμὸς τῇ οἰκῇ ἐκείνῃ, καὶ οὐκ ἴσχυσεν σαλευθῆναι αὐτὴν διὰ τὸ καλῶς οἰκοδομηθῆναι αὐτήν. καὶ ὁ δὲ ἀκούσας καὶ μὴ ποιήσας ὁμοίος ἐστὶν ἀνθρώπῳ οἰκοδομῶντι οἰκίαν ἐπὶ τὴν γῆν χωρὶς θεμελίου, ἢ πεισθεῖς ὁ ποταμὸς, καὶ εὐθὺς συνέπεσεν, καὶ ἐγένετο τὸ ρῆγμα τῆς οἰκίας ἐκείνης μέγα.

Similarly compare Mt 5⁴⁴ = Lk 6³⁵, Mt 7¹ = Lk 6³⁷, Mt 7^{16, 17} = Lk 6^{43, 44}, and also Mt 5¹³ = Lk 11³³, Mt 5¹⁸ = Lk 16¹⁷, Mt 5^{20, 30} = Lk 12^{33, 30}, Mt 6¹⁰⁻²¹ = Lk 12^{33, 34}, Mt 6²⁵⁻³³ = Lk 12²²⁻³¹.

In some passages the wording of Matthew is so

different from that of Luke that a difference even of the thought results, or seems to result:—

Mt 5²⁻⁴.

^a Μακάριοι οἱ πτωχοὶ τῷ πνεύματι, ὅτι αὐτῶν ἐστὶν ἡ βασιλεῖα τῶν οὐρανῶν.
^b μακάριοι οἱ πενθοῦντες, ὅτι αὐτοὶ παρακληθήσονται.
^c μακάριοι οἱ πεινῶντες καὶ διψῶντες τὴν δικαιοσύνην, ὅτι αὐτοὶ χορτασθήσονται.

Lk 6²⁰⁻²¹.

²⁰ Μακάριοι οἱ πτωχοί, ὅτι μετὰ ἐστὶν ἡ βασιλεῖα τοῦ θεοῦ.
²¹ μακάριοι οἱ κλαίοντες νῦν, ὅτι γελάσετε.
²² μακάριοι οἱ πεινῶντες νῦν, ὅτι χορτασθήσεσθε.

Mt 5⁴⁵.

Ἔσθε οὖν ὑμεῖς τέλειοι ὡς ὁ πατὴρ ὑμῶν ὁ οὐράνιος τέλειός ἐστιν.

Lk 6³⁵.

Γίνεσθε οἰκτίρμονες καθὼς ὁ πατὴρ ὑμῶν οἰκτίρμων ἐστίν.

Mt 6⁹⁻¹².

^a Πάτερ ἡμῶν ὁ ἐν τοῖς οὐρανοῖς·
^b ἁγιασθήτω τὸ ὄνομά σου,
^c ἔλθῃ ἡ βασιλεῖα σου,
^d γενήθω τὸ θέλημά σου, ὡς ἐν οὐρανῷ καὶ ἐπὶ γῆς·
^e τὸν ἄρτον ἡμῶν τὸν ἐπιούσιον
^f δός ἡμῖν σήμερον·
^g καὶ ἄφεσιν ἡμῖν τὰ ὀφειλόμενα ἡμῶν,
^h ὡς καὶ ἡμεῖς ἀφήκαμεν τοῖς ὀφειλέταις ἡμῶν·
ⁱ καὶ μὴ εἰσενέγκῃς ἡμᾶς εἰς πειρασμόν,
^j ἀλλὰ ῥῆσαι ἡμᾶς ἀπὸ τοῦ πονηροῦ.

Lk 11²⁻⁴.

² Πάτερ,
^a ἁγιασθήτω τὸ ὄνομά σου·
^b ἔλθῃ ἡ βασιλεῖα σου·
^c τὸν ἄρτον ἡμῶν τὸν ἐπιούσιον
^d δίδου ἡμῖν τὸ καθ' ἡμέραν·

Similarly compare Mt 5²² = Lk 16¹⁸ (= Mk 10¹¹ = Mt 19⁹) and Mt 7¹¹ = Lk 11¹³. The corresponding context or setting of each pair of these parallel sayings, or as regards the Lord's Prayer the nature of the case (see below, ii. 4 h (2)), indicates that however variant the words have become in transmission, they started from the same utterances of Jesus. The parallel records run the entire gamut of variation from close verbal similarity to wide verbal divergence, and in a few cases even to difference of idea itself.

Now the explanation of these striking phenomena of content, form, and substance in the Sermon of Matthew and Luke is to be found in the history of the transmission of this material during the years c. 29–85 A.D. This section of history is one part of the great 'Synoptic problem.'* While many elements of this problem are still in dispute, certain fundamental facts pertaining to it now seem well established.

(1) Jesus habitually taught in Aramaic, not in Greek† The thorough and deliberate discussion of this question seems to have reached a settled conclusion.‡ We were all eager to

* In the extensive and highly important literature upon this subject is to be sought the presentation and treatment of the matters outlined in the following paragraphs. See the art. GOSPELS, vol. ii., and literature there cited; also art. 'Gospels' by Sanday in Smith's *DB*², and by E. A. Abbott and Schmiedel in *Encyclopædia Biblica*, vol. ii.; also Wernle, *Synopt. Frage* (1899); Wendt, *Lehre Jesu*, 1 Th. (1886); B. Weiss, *Matthäusevangelium* (1876); H. Holtzmann, *Synopt. Evangelien* (1903); Weissacker, *Untersuchungen u. d. evangelische Geschichte* (1894, 2nd ed. 1901); Wright, *Composition of the Four Gospels* (1890); Hawkins, *How Synoptics* (1899); Burkitt, *Two Lectures on the Gospels* (1901).

† It is not unlikely that Jesus knew some Greek, for many Greek-speaking Gentiles lived in Galilee, and that language must have been used not a little in such a hive of commerce as Capernaum was. Jesus' work, however, was exclusively among the Jews, and there is no conclusive evidence that He knew or spoke Greek at all; even His trial before Pilate cannot prove this, as Pilate must have been accustomed to use an interpreter in treating with the Sanhedrin. See O. Holtzmann, *Leben Jesu* (1901), p. 22.

‡ That Jesus taught in Greek has been ably argued by Roberts (*Greek the Language of Christ and His Apostles*, 1888) and by

believe that these very Greek words of our Gospels came directly from Jesus' lips; yet historical investigation shows that they are but a translation from the original utterances. While the theories of Resch, Marshall, Dalman, Blass, E. A. Abbott, and others as to a primitive Aramaic or Hebrew Gospel are uncertain, it is clear that the Memorabilia of Jesus were originally and for some years in the Aramaic language. The Aramaic vocabulary, syntax, and influence can everywhere be seen through the Greek of the Gospels, like the earlier text in a palimpsest manuscript.

(2) Jesus' more important teachings were marked and remembered from the time they were spoken. It is not too much to suppose that He impressed certain teachings—not their form, but their substance—upon His disciples. From day to day, therefore, during Jesus' public ministry, His followers were gathering and pondering His utterances, holding them in memory and repeating them to one another nearly or quite in Jesus' own words. After His death and resurrection His followers treasured these sayings of their Master's, studied them, preached them, and faithfully taught them to all who came into the Christian brotherhood (cf. Ac 2⁴²). The story of Jesus' life, His deeds and His words, was the guide of every individual Christian, of every Christian community, and of the entire Christian movement. What He had taught was the staple matter of all Christian instruction and worship, and was everywhere regarded as the norm of Christianity. And of all that Jesus had taught there was nothing more prominent, vital, and practical—indeed nothing more generally revered and used—than the teaching contained in the Sermon on the Mount.

(3) It is also certain that, for years after Jesus had given His teaching, it was circulated and transmitted by word of mouth. Jesus Himself wrote nothing, nor did His disciples until long after. Both these facts were due to the Jewish custom of the time. The teaching of the Rabbis in Jesus' day was entirely oral—only their sacred books, the Old Testament, might be written; therefore the pupils of the Rabbis heard and memorized their teaching. Out of this custom arose a special qualification for, and efficiency in, oral instruction and oral transmission among the Jews. To men of this nation and country Jesus' sayings were given, and by them preserved. It cannot, of course, be supposed that Jesus insisted upon forms of words; He was neither a literalist nor a verbalist. Therefore His disciples did not place undue emphasis upon the *ipsissima verba* of His teaching. But so perfectly worded were the most significant of His shorter sayings—many of which can be seen in this discourse—that they would persist in their original form. For the remainder of the teaching an exact verbal transmission was unlikely, and the evidence shows that it did not so happen.

(4) After fifteen or twenty years (c. 45–60 A.D.) Christianity began to reach out into the great Roman world by the labours of the Apostle Paul and many others; and it became necessary to translate the Gospel story into Greek, since the non-Palestinian Jews and the Gentiles did not know Aramaic—the language in which the story had arisen, and had thus far been handed down. That this translation took place 50–80 A.D. is proved by our present Greek Gospels and the early disappearance of all Aramaic Gospel documents. Now there is every reason to think that this translation of the Memorabilia of Jesus was a process rather than an act. The data do not permit us to think of one formal, authoritative translation, comprising the whole Gospel story, and passing directly into the use of all the Greek-speaking Christians. Rather there were numerous persons in various places and at different times who translated portions—the same as well as different portions—of the story from the Aramaic into Greek. These individual and fragmentary translations were characterized by various degrees of literalness, differing vocabulary and syntax, loss of original colouring, obscuration of shades of meaning, interpretative modifications and expansions, varying success in reproducing the original ideas, and some adaptation of the sayings (by way of selection, arrangement, and altered expression) to the practical needs of the Churches for whom the respective translations happened to be made. Then these various translations, at first located at the chief centres of the Christian movement, passed into general circulation, and acted and reacted upon each other, mixing the phenomena of the several translations. The features just described can all of them be traced in our two Gospel records of the Sermon on the Mount.

(5) It is now generally understood* that, after fifteen or twenty years of circulating and transmitting the utterances of Jesus by word of mouth, the Gospel Memorabilia were gradually put into writing. We have in Eusebius (*HE* iii. 39. 16) the important testimony of Papias, which is regarded by most scholars as trustworthy, that the Apostle Matthew composed (*ὑμνήσατο*, *ἢ συντάξατο*, cf. Lk 1¹ *ὑμνήσατο*) a collection of the sayings (*ἱστορίαι*) of Jesus, in the Hebrew (i.e. the Aramaic?) language. If Papias' statement, and the common interpretation of it as a written account, are correct, then we have a distinct witness that there was a written record of Jesus' teaching, which we may assign to c. 60 A.D. That it was in Aramaic(?) shows an adoption of writing, even by the Palestinian Christians, as a

T. K. Abbott (*Essays chiefly on the Original Texts of the OT and NT*, 1891, ch. 5). The contrary, that Jesus taught in Aramaic, has been shown by Neubauer, *Studia Biblica*, i. 39–74 (1885); A. Meyer, *Jesu Mutterprache* (1890); Zahn, *Einleitung i. d. NT*, i. 1–51 (1897); Dalman, *Worte Jesu*, i. 1–72 (1898); see also art. LANGUAGE OF THE NEW TESTAMENT, vol. iii.

* Although there still remain a few earnest advocates of an exclusively oral tradition.

means of collecting, circulating, and preserving the Memorabilia of Jesus. But whether Papias' statement is correct or incorrect, it is practically certain that when the Gentiles received the story of Jesus they committed it to writing, for they were not accustomed to the oral transmission of extended material. This change of oral to written records was informal, unauthorized, and gradual, like the translation already described. But it is probable that soon after 50 A.D. there were many written portions of the Gospel Memorabilia in existence and use. These documents then grew in number and extent until after twenty to fifty years our canonical Gospels absorbed them and became recognized as the final records of Jesus' ministry (cf. Lk 11-4). There are also indications that the oral tradition continued along with the written tradition through the whole period until our Gospels were composed (and indeed afterwards also), and furnished a larger or smaller amount of the material which went into them.

The history here sketched of the transmission of the entire Gospel story is at the same time the history of the transmission of the Sermon on the Mount, which was one of the most valuable sections of the Memorabilia of Jesus. The whole process has left its marks upon our two accounts of the Sermon, for to it are to be attributed in the main the difference of setting, content, arrangement, variety of literary expression, and divergence of thought. But the fundamental agreement of the

part, by different persons and in several localities: then these complete or fragmentary translations had each its own history for about 30 years, during which they experienced the vicissitudes of transmission. When the First and Third Evangelists came to prepare their Gospels in c. 80-85 A.D. there were in circulation and use these various Greek forms of the Matthean *Logia*. The two authors adopted different forms, according to the usage of the locality in which each wrote, or, less likely, according to their judgment of which form was best historically.

(2) In addition to this basal *Logian* source of both our accounts of the Sermon, there were probably other lines of transmission of the discourse in both oral and written tradition. Many disciples had heard the Sermon when Jesus gave it, and 10 years afterwards had told of it. There must thus have grown up variant reports—one used in one church or circle of churches, and another in another. These further reports also are likely to have been handed down, and some of them may well have come under the notice of the two Evangelists in composing their Gospels.* How

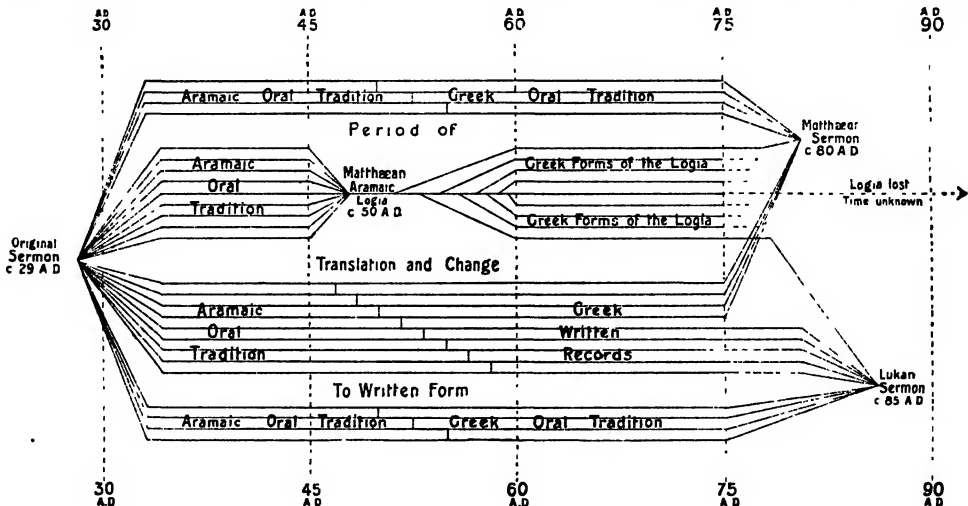

Diagram to Illustrate the Transmission of the Sermon on the Mount.

two accounts, which shows them to be reports of the same historical discourse, has not been seriously obscured in transmission.

When one attempts to trace more in detail the particular history of the Sermon on the Mount during the years c. 29-85 A.D., one comes upon many perplexing problems about which at present there is no agreement. Opinions ventured in this sphere can only be tentative and modest.

(1) It seems probable that the Matthean *Logia* was used in a Greek form, indeed in differing Greek forms, by both the First and the Third Evangelists.* If the same Greek form of the *Logia* was used by both, the one or the other (or perhaps both) has introduced a remarkable series of changes in content, arrangement, and wording which it would be difficult to explain. A much more probable supposition is that the Matthean *Logia* was variously translated into Greek,† in whole or in

much influence such outside sources had upon their reports it would be difficult to determine—perhaps it was considerable.

(3) We need to allow for a fair amount of editorial selection, arrangement, adaptation, and revision on the part of our two authors. Luke (11-4) has given us important information concerning his material, purpose, and method; and the First Evangelist probably wrote under similar conditions. As they gathered their sources, they found themselves in possession of three classes of sayings from Jesus—(a) brief sayings still joined to specific events of His ministry, and which they could in part arrange in their right order; (b) the remains

* The First Gospel of our NT Canon is neither the Matthean *Logia* itself, which was in Aramaic (Eusebius, *HE* iii. 39. 16), nor is it an immediate translation of that *Logia*, since it does not contain the inevitable indications of a translated work. The Greek Gospel of Matthew is rather a combination of the *Logia* in some mediate Greek form with the Gospel of Mark, plus the addition of various portions and characteristics which did not belong to either of the original books. However, because it substantially incorporated the *Logia*, it continued to bear the Apostle's name. The author of the enlarged Greek edition of the original Matthew work is unknown. On this matter see the works on NT Introduction by B. Weiss, H. Holtzmann, Jülicher, Zahn, Salmon, and others; also Commentaries on the Gospel of Matthew.

* See Wendt, *Lehre Jesu*, i. 52, 53; Jülicher, *Einführung* t. d. NT³, p. 219; Wernle, *Synopt. Frage*, pp. 79, 80; Hawkins, *Horae Synopticae* (1899), pp. 88-92; J. Weiss, *Predigt Jesu vom Reiche Gottes* (1900), pp. 179-182. That the same Greek form of the *Logia* was used by both the First and Third Evangelists is maintained by O. Holtzmann, *Leben Jesu* (1901), pp. 22-24.

† See Feine, *Jahrb. f. Protest. Theologie*, 1885, p. 1 ff.

of certain of Jesus' greatest discourses, containing the theme and some of the essential matter belonging thereto; these also could generally be assigned to their proper places in the history; (c) small sections of teaching or single sayings, the original connexion of which was no longer known; these would be inserted here and there in the narrative without particular attachment, or would be associated with the nuclei of the great discourses wherever the subject of the one was similar to that of the other. Such compilation would produce the phenomena of extraneous material which we find in both accounts of the Sermon, as well as in other discourse sections of both Gospels. When the material of his Gospel had been arranged satisfactorily by the author, it remained for him to adjust the several parts to each other, to smooth over the joints by his literary skill, and in various ways to give the book a unity and finish such as an author would desire for his work.

(4) In view of the fact that the Gospels were written for the *practical* use of the Christians in their life and worship, the Evangelists felt at liberty to make such a selection and presentation of the Gospel facts and teachings as would be most acceptable and useful to the circles of Christians for whom their books were prepared. Each Gospel therefore has a marked individuality. Matthew, in accordance with his purpose, dwells at length upon the relation of Jesus and His message to the Hebrew Scriptures and the current Judaism. But Luke, or his source, with a Gentile public in mind, passes over this material in the main and presents the Gospel in its universal aspects as a spiritual and altruistic religion for all men. These characteristics of the First and Third Gospels appear strikingly in their respective accounts of the Sermon on the Mount.

The accompanying diagram aims at giving some suggestion of the general course of transmission of the Sermon, and of the kind of sources which each Evangelist may have had before him in preparing his report of the discourse.

4. RELATIVE AUTHENTICITY OF THE TWO ACCOUNTS.—Proceeding now upon the view which has been elaborated, that the two discourses contained in Mt 5-7 and Lk 6³³⁻⁴⁹ are variant reports of one historical Sermon on the Mount, it becomes an important consideration which of the two reproduces the Sermon with the greater completeness and accuracy. The question is as to their *relative* excellence, for the phenomena of the accounts and the vicissitudes of transmission show that neither the First nor the Third Gospel has perfectly reproduced the content and wording of the original discourse.

In content, Matthew has much more than Luke of that material which is commonly recognized as having been an essential portion of the Sermon, namely, Mt 5³⁻⁴⁸ 6^{1-7, 16-18}; compare with this Lk 6^{20-23, 27-36}.

Luke or his source omitted most of this section, apparently on the ground that it was inapplicable to the Gentiles, for whom the account was prepared.* This omission was perhaps justifiable for the practical purpose of a Gospel, although innumerable Gentiles ever since Luke's day have preferred the Sermon of the First Gospel, as we now do; but however that may be, from a historical point of view such an extensive omission could leave only a seriously incomplete account of the discourse. The further section of the Matthean discourse (6¹⁹⁻³⁴) may or may not have been a part of the historical Sermon; opinion is quite evenly divided upon this point, and there seems no con-

clusive evidence either way. The fact that Luke places this material in 12²²⁻³¹, where it has a topical connexion with what precedes it (12¹⁹⁻²¹), suggests another occasion, although that occasion is not chronologically located by Luke. On the other hand, if the theme of the Sermon is found in the Beatitudes rather than in the verses Mt 5¹⁷⁻²⁰, this passage, which inculcates devotion to the Kingdom and trust in God, is germane, and marks the discourse as more than an anti-Pharisaic manifesto. For the present, at least, one may prefer to regard this section as belonging to the Sermon. In this case Luke's account of the Sermon, which contains nothing of this portion, is again strikingly incomplete.* The final section of the Matthean discourse (7¹⁻²⁷) has been preserved with some fulness by Luke (6³⁷⁻⁴⁹), varying less than the two preceding sections from the Matthean account. It will appear farther on, that in both the Matthean and Lukan reports there are some brief extraneous passages which cannot have been in the original Sermon, such as Mt 5^{26, 28, 31, 32} 6⁷⁻¹⁶ 7^{6-11, 22, 23}, Lk 6^{44-26, 28a, 29, 40, 45}. But in this kind of variation the two reports have both expanded the historical discourse. Considering the relative contents of the Sermon in Matthew and Luke, there can be no doubt (even waiving the question of Mt 6¹⁹⁻³⁴) that the First Gospel presents a much more complete account of the Sermon than that presented by the Third Gospel.†

* It seems impossible to suppose that Luke could have had before him the Sermon in the form in which it now appears in the First Gospel. This is also the opinion of Wernle (*Synopt. Frage*, p. 80), Bartlett (art. MATTHEW in vol. iii.), O. Holtzmann, (*Leben Jesu*, 1901, p. 21), and of Heinrich (*Bergpredigt*, i. 10). Heinrich says the two reports of Matthew and Luke 'are reconstructions of a discourse restored independently by Matthew and Luke rather than in dependence upon one another or upon the same written source.' The Evangelists have re-worked their material, but that alone cannot explain the phenomena of the two accounts. Would Luke have deliberately broken up a collection of teachings so usefully grouped as in the Matthean accounts, and have scattered them so unreasonably through seven chapters of his own work? On the other hand, the First Evangelist might, so far as the Sermon is concerned, have had Luke's account before him. His own report was surely better than Luke's, and so would not be altered into conformity with the latter. The general phenomena of the two Gospels, however, are against this particular interrelation, and the prevailing opinion assigns Matthew's Gospel to a somewhat earlier date than Luke's.

† It is a somewhat difficult matter to explain the absence of the Sermon from the Gospels of Mark and John. The only parallels in Mark to any of the Sermon material are Mk 4^{21, 24, 25, 47, 50} 10^{11, 12}; in John, 13¹⁶ (15²⁰). And these sayings are only possible parallels, i.e. they need not have come into the Gospel of Mark from accounts of the Sermon. The opinion of Ewald, H. Holtzmann, Keim, and Wittichen, that Mark originally contained the Sermon, but that it has disappeared from the canonical work, cannot be accepted. Feine (*Jahrb. f. Protest. Theologie*, 1885, p. 4), is right in holding that Mark did not use the sources which, containing variant accounts of the discourse, were used by Matthew and Luke independently. It seems quite certain, however, that Mark could not have been ignorant of the Sermon. If that discourse did not appear in his sources, oral and written, it must have been because he voluntarily limited those sources. The Sermon was altogether too highly valued and too widely used in the Apostolic age to have escaped any careful compiler of the Gospel Memorabilia. This would be esp. true of Mark, who, if common opinion is correct, had an ultimate Petrine base for much of his material. Is it imaginable that Peter did not give the Sermon a prominent place in his teaching? Surely Mark must have known the Sermon. Why, then, did he omit it from his Gospel? A plausible explanation, which may be the true one, is this:—

When Mark wrote his Gospel, about 65-70 A.D., the Matthean *Logia* (in various Greek forms) was in general use; this *Logia* passed over the narrative material of the story of Jesus, and consisted mainly of a collection of Jesus' discourses and shorter sayings; it included the Sermon, although in what precise form it is very difficult to determine—probably not that in which it appears in either of our canonical Gospels. Now Mark's Gospel, in striking contrast, reports mainly the acts and events of Jesus' public ministry, giving much less attention to the teaching (the longest sections of discourse material are in 2^{18, 22} 3²³⁻³⁰ 4¹⁻³² 6¹³⁻¹⁵ 7²³ 8³⁴⁻³⁸ 9^{1, 30, 50} 10^{24-31, 33-45} 11²³⁻²⁵ 12, 13). Perhaps Mark wished to put into more complete and permanent transmission that other side of the Gospel story which was neglected in the *Logia*. If so, it was unnecessary for him to repeat the Sermon and certain other discourse elements of that work, since he wrote to complete the

* So B. Weiss, *Meyer-Komm. u. d. Matt. evng.* p. 163; Wendt, *Leben Jesu*, i. 58; Plummer, *Comm. on Luke*, p. 183; Wernle, *Synopt. Frage*, p. 62; Bacon, *Sermon on the Mount* (1902), pp. 86-89; and most other scholars.

In wording, a like verdict of superior excellence falls to the Gospel of Matthew. Since both Gospels contain the discourse in Greek, therefore in translation we cannot find in either of them the *ipsissima verba* of Jesus (except for the few Aramaic words transliterated, as in Mt 5²²). But when we ask which Gospel has more accurately transmuted into Greek the ideas that Jesus expressed in Aramaic, which has more faithfully interpreted His meaning in this teaching, there are many indications that Matthew gives the better record. A complete study of the parallels in the two accounts of the Sermon shows that in almost every instance there is a greater authenticity in the Matthean account; of this a few illustrations will suffice. (1) The first Beatitude is variously worded (Mt 5³ μακάριοι οἱ πτωχοὶ τῷ πνεύματι; Lk 6²⁰ μακάριοι οἱ πτωχοί). It is perhaps true that the Lukan form corresponds more nearly to the Aramaic utterance of Jesus, which may not have had a term corresponding to Matthew's τῷ πνεύματι; the important consideration, however, is as to the idea rather than the form. In the Lukan Beatitude, material poverty is intended, as is shown conclusively by the converse woe in 6²⁴ οὐαὶ ὑμῖν τοῖς πλουτοῖς (woe could not be pronounced upon those who were spiritually rich). But in the Matthean Beatitude the ambiguous term πτωχοί—corresponding to the OT עֲנִי (Ps 69²³, Is 61¹) and עֲנִיָּה (Ps 109¹⁶, Is 14³⁰), and standing in the LXX for those Hebrew words (see art. POOR in vol. iv.), with a primary moral and spiritual import—is made explicit for the moral and spiritual signification by the addition of the phrase τῷ πνεύματι, to protect the Beatitude from the material interpretation which had made its impress upon Luke's source. Thus Matthew has preserved Jesus' original meaning of the first Beatitude (perhaps at the expense of its form); of course it is the meaning rather than the form that is of value. (2) In Mt 5⁴³⁻⁴⁵ = Lk 6³²⁻³⁵ there are many indications of the secondary character of Luke's material: Mt 5⁴³ does not appear; the idea of lending (Lk 6³⁴) is a disturbing importation; instead of τελεῖναι Luke has ἀμαρτωλοί; Mt 5^{45a} is given in a non-Jewish form—ἐσεσθε υἱοὶ τοῦ ὕψους instead of ὅπως γένησθε υἱοὶ τοῦ πατρὸς ὑμῶν τοῦ ἐν οὐρανοῖς; Mt 5^{45b} does not appear, nor the term οἱ ἐθνικοὶ of Mt 5⁴⁷; and the reminiscence of Dt 18²² in Mt 5⁴⁸ ἐσεσθε . . . τέλειοι is replaced by a non-Jewish and much weaker γίνεσθε δικτήριμοι. That is to say, Luke's account lacks the Palestinian setting, the local colour, the Jewish phrases, and the OT allusions, besides introducing an extraneous practical element. (3) A similar practical addition or expansion of Mt 7²⁶ may be seen in Lk 6⁴⁶; a true teaching, but foreign to the context. Similarly Lk 6⁴⁵. (4) In the Mt 7¹² and Lk 6³² forms of the 'Golden Rule' (quoted above), the

Matthean wording approves itself as being a better reproduction of what we may understand Jesus to have said; the Matthean phrase οὗτος γὰρ ἐστὶν ὁ νόμος καὶ οἱ προφῆται is absent from the Lukan account on the constant principle of expunging Jewish elements. (5) The same principle explains the significant difference of wording in Mt 7²¹ (οὐ πᾶς ὁ λέγων μοι Κύριε κύριε εἰσελεύσεται εἰς τὴν βασιλείαν τῶν οὐρανῶν, ἀλλ' ὁ ποιοῦν τὸ θέλημα τοῦ πατρὸς μου τοῦ ἐν τοῖς οὐρανοῖς) = Lk 6⁴⁶ (τί δέ με καλεῖτε Κύριε κύριε, καὶ οὐ ποιεῖτε τὰ λέγω); (6) It is obvious in a comparison of the Matthean and Lukan accounts (quoted above) of the closing parable of the Sermon that the Palestinian colour and the vivid picturesqueness of the story as given in the First Gospel do not appear in the commonplace, secondary expressions of the Third. (7) To these six illustrations from the parallel reports of the Sermon must be added the twofold account of the Lord's Prayer (Mt 6⁹⁻¹³ = Lk 11²⁻⁴), which is discussed below (under ii. 4 h), and most strikingly shows the relative merits of the Matthean and Lukan reports of Jesus' teaching. It is not to be denied that the Matthean form may be somewhat expanded from the original Aramaic; but this has to do with form rather than with substance, and the expansion is in the interest of the true interpretation of the Prayer. Here, also, we note (see the two accounts quoted above) the absence from Luke of the Jewish phrases which speak of God as in heaven, and of His 'will' as supreme. The comprehensive and deeply ethical and spiritual term ὁφειλήματα of Matthew is replaced in Luke by the conventional term ἀμαρτίας. And the petition for deliverance from evil, a characteristically Jewish conception, is expunged.

It cannot be doubted that the strong Jewish element and Palestinian colour of Matthew's discourse actually pervaded Jesus' teaching as originally given. Jesus was a Jew, and spoke to Jews only; His language and His ideas were therefore Jewish and adapted to Jews. There is no room for a theory that this feature was a subsequent artificial transfusion of Judaism into the teaching of Jesus. But it is easy to see how just this feature was eliminated from His teaching in the course of the Gentile mission. The Gentiles neither understood nor liked the Jews, with their peculiar notions and exclusive ways. In order, therefore, to make the Gospel acceptable to them, the Christian missionaries thought it necessary to universalize the language of Jesus. This has clearly been done in the case of Luke's account of the Sermon, possibly by himself,* but more likely by a long process of elimination, through which the material had passed on the Gentile field whence Luke drew his sources for the Third Gospel. It is possible that portions of the original Sermon which were too strongly Jewish to remain in that position found their way into Luke's Gospel apart from that discourse, and with the Jewish colouring removed. Perhaps this is the explanation of the variant position of Mt 6²⁹⁻³⁴ = Lk 12²⁹⁻³¹, since the same kind of elimination of the Jewish element is apparent here, e.g. τὰ πετεινὰ τοῦ οὐρανοῦ is replaced by τοὺς κόρακας; ὁ πατὴρ ὑμῶν ὁ οὐράνιος is replaced by ὁ θεός, note the peculiar addition in Lk 12³⁰; τὰ ἐθνη is replaced by πάντα τὰ ἔθνη τοῦ κόσμου (a clear

current record of Christ's life, not to produce a new Gospel which should antiquate and supersede the *Logia*. This appears also in the fact that the present Greek Matthew combines probably the Matthean *Logia* with the Gospel of Mark (plus some additional matter) into a quite extensive account of the life of Christ. What makes this theory somewhat unsatisfactory is the fact that no small amount of Jesus' sayings actually contained in Mark's Gospel was in all probability present in the *Logia*, e.g. Mk 41-20 84-88 91-39-50 12; but perhaps an explanation for this can be found. At any rate, the problem of Mark's omission of the Sermon cannot yet be considered solved.

As for the absence of the Sermon from the Gospel of John, the entire character of that book offers a probable reason for its omission. The author has distinctly chosen not to reproduce Synoptic material, but to make a Gospel with different contents, and setting forth Gospel truth in a different way. That he passes over the Sermon is, therefore, not at all due to his ignorance of the discourse, but to his motive, according to which he passes over all the Synoptic discourses (Mt 5-7, 10, 11, 18, 21-25, Lk 6, 10-21), and most of the narrative matter as well. Nor did he, in passing by all this, wish his readers to regard that part of the Gospel story as unhistorical or unessential. He chose to treat a particular phase of Christ's life and personality—what he probably considered the highest phase. This Gospel was designed to illumine, not to supersede, the others.

* Bacon, *Sermon on the Mount* (1902), p. 109 f., says: 'It was indeed, from the standpoint of the historian of Jesus' life and teaching, a disastrous, almost incredible mutilation to leave out, as our Third Evangelist has done, all the negative side of the teaching, and give nothing but the commandment of ministering love toward all. We can scarcely understand that the five great interpretative antitheses of the new law of conduct toward men *versus* the old [Mt 5²¹⁻⁴⁸], and the three corresponding antitheses on duty toward God [Mt 6¹⁻¹⁸], could have been dropped in one form of even the oral tradition; but the Third Evangelist has done this in order to 'concentrate the teaching upon the simple affirmation of the law of love.'

alteration to remove the disparaging reference to the Gentiles' love for material wealth and power); again, the absence of *ὁ οὐράνιος* in Lk 12³⁰; and the absence of *τὴν δικαιοσύνην αὐτοῦ* (a technical Jewish term) from Lk 12³¹. There would seem, therefore, to be no room for question that, historically considered, the Sermon as given by Matthew is of much greater authenticity than the Sermon of Luke, since it has better preserved the actual contents of the historical discourse, its theme and development, its Jewish elements, its Palestinian colour, and the true interpretation of its sayings; and, in addition to these merits, the Matthean account has a Greek style of higher literary skill and finish. In this preference for the Matthean report of the Sermon nearly all scholars are now agreed.*

But this relative superiority of the account in the First Gospel does not mean its *absolute* authenticity. This account is still but a series of excerpts from the historical Sermon, marred by the incidents of long transmission, showing the inevitable effects of the process of translation, and containing certain passages which originally belonged to other occasions (see below). Even in some cases we are uncertain whether the ideas themselves of Jesus are not misrepresented by the wording of Mt 5-7. Two instances about which there has been much dispute may be mentioned. In Mt 5^{18, 19} the peculiar tone of Jewish literalness has led many scholars to postulate a Judaistic-Christian colouring of Jesus' words in these verses, since they seem quite foreign to His anti-literal utterances and spirit. Every explanation of them as coming in just this sense from Jesus is beset with difficulties, and fails to satisfy completely (see under ii. 4c). Again, in Mt 5³² we find a most significant addition to the teaching of Jesus concerning divorce. This saying probably belongs to the occasion with which it is associated in Mt 19¹⁻¹², where it is repeated. In both the Matthean instances we have the exceptive phrase *παρεκτός λόγου πορνείας* (*μὴ ἐπὶ πορνείᾳ*), which is not found in the other Synoptic parallels, Mk 10¹¹, Lk 16¹⁸. A serious question is involved concerning the permissibility of divorce. The phrase is rejected as a later interpolation by many of the best modern scholars (see under ii. 4d).

But if we cannot think of the Sermon in Matthew as presenting an absolutely authentic account of that historical discourse, we may yet feel much certainty that it contains many essential teachings from that discourse with substantial trustworthiness. In the Evangelists' reports of the Sermon we have not complete historical accuracy, but practical adequacy.

5. PRESENT TEXT OF THE DISCOURSE.—The text of the Sermon as it finally took form in the First and Third Gospels has come down to us through the centuries with less variation than might have been expected; it is in excellent condition. The number of variations is not many hundred, and few of them are of special importance. The Textus Receptus of the 16th cent. (and therefore the AV of 1611 A.D.), compared with the text given us by the great uncials of the 4th-6th cents., shows here as elsewhere numerous elements of assimilation, emendation, revision, and variation; but these have been excluded in the critical texts of the modern editors, Westcott and Hort, Tischendorf, the English Revisers, and others. The most conspicuous changes are the dropping out of words and phrases which have been imported into the

text of one Gospel to assimilate its readings to the text of the other, and the literary 'improvements' which the scribes have introduced. The variations which are of importance for interpretation will be treated in their respective places below.

ii. INTERPRETATION.—All study of the origin and transmission of the Sermon on the Mount is but a preparation for its interpretation, just as all study of its interpretation is but a preparation for its practice. Both lines of preparation are essential if the teaching is to be understood historically and comprehensively, and is to be applied truly and thoroughly. Surely the untrained English reader can find through the Sermon the spiritual assurance and strength which he needs, and an ideal of life which can determine his conduct in the limited sphere in which he thinks and acts; the gospel is for all, and essentially intelligible to all, rather than the exclusive possession of the educated few (as is the case with intellectual systems of theology, philosophy, ethics, and the like). But when the Sermon is used—as it can and should be used—to illumine the great problems of religion, of morals, and of society, every resource of spiritual capacity, mental ability, and the acquisition of learning should be brought to bear upon this supreme teaching of Christ, in order that it may exert its due and proper influence upon the world.

1. POPULAR, GNOMIC, AND FIGURATIVE STYLE.—Interpretation must take full account of the literary style in which Jesus chose to express Himself. That style, as seen in the Sermon on the Mount and throughout the Synoptic Gospels, was distinctly popular and Oriental. Too often Jesus' teaching has been handled as though it were a systematic, scientific treatise on theology and ethics, whose expressions were fittingly to be subjected to laboratory test, each element to be exactly determined by finely-graduated measuring-rod or delicate weighing-scales. No greater mistake could be made, and the results so obtained must be hopelessly incorrect and perverse. Microscopic analysis is a radically wrong process to be applied to Jesus' teachings. For He chose to deal with the masses, and His ideas were expressed in language which they could hear and consider. If at times He disputed with the learned men of His nation, and in doing so in part adopted their dialectical method (see the Johannine discourses), still this was not His main interest or His chief field of work. The common people were open-minded and receptive: to them, therefore, He addressed His teaching. It was to the Galileans that He gave Himself and His message, while in Jerusalem and elsewhere He had to defend both against the hostile leaders.

As He taught the multitudes, in their synagogues, upon the highways, along the seashore, and on the hillsides of Galilee, He put His religious truths and ethical principles into concrete popular sayings, contrasting His ideal of life in many simple ways with the conventional notions and practices, and illustrating His teaching from the ordinary avocations, experiences, and environment of His hearers.* Entirely free from scholasticism and intellectualism, He did not tell the how and why of things, nor present scientific definitions, nor deal in abstractions; but with Divine wisdom and skill He taught those things

* The constant preference shown by H. Holtzmann, Wendt, and a few others for the Lukan account of the Sermon as against that of Matthew is, in view of these considerations, a mistake. It is not a true historical criticism to eliminate from the records of Jesus' teaching as much as possible of the characteristic Jewish element, or to give the place of honour to the briefer and more fragmentary of two parallel accounts.

* One reading should be given to the Sermon in Mt 5-7 with no other intent than to note Jesus' remarkably fine and abundant allusions to things around Him—religious practices, ethical conceptions, commerce, industries, agriculture, animals, plants, home life, house furnishings, civic institutions, social customs, the conduct of men, human needs, fortune, and misfortune. His observation and appreciation of everything was unequalled, and the relative valuation which He placed upon things was the true norm of all subsequent judgment. No poet—not even Shakespeare—has seen so clearly, felt so truly, or pictured so perfectly the hearts and lives of men.

which it is essential for all men to know. The religious facts and truths which He presented form the foundation of Christian theology, and His instruction concerning human conduct must lie at the root of any true system of ethics; but He did not teach these subjects in the manner of the ancient or modern schools. He put His ideas in such a way as to make His knowledge universal. He spoke with a simplicity, insight, and fervour which would appeal to all serious listeners.

It was a part of Jesus' method to use all kinds of *figurative* language. That was natural to Him as an Oriental, and by no other means could He have reached the Orientals who formed His audiences. Similes, metaphors, all kinds of illustrations, parables, hyperbolic expressions, were constantly upon His lips.* We have constantly to be on our guard against interpreting literally what He has spoken figuratively.† The Sermon presents the true righteousness, the ideal human life, popularly and practically portrayed and enjoined. To treat this teaching as scientific ethics is to produce confusion. But to draw from it the essential principles of ethics is to find light and peace for mankind.

Many of Jesus' utterances, especially in this discourse, are of the gnomic type in poetic form—a style so effective in the Wisdom literature of the OT and Apocrypha. The wise men of Hebrew history, particularly after the Babylonian exile, put into this attractive literary dress their crystallization of experience, their philosophy of life, their instruction for conduct and practical affairs. This was a favourite style of teaching with the Jews—a fact that was at once the cause and the motive for Jesus' adoption of it. As a literary mode of expression, Jesus used the gnome, as He used the parable, with consummate art.‡ Even the translation of these sayings into a radically different language has not destroyed their literary finish, rhythm, and symmetry, e.g. the Beatitudes, the Lord's Prayer, and many other passages in Mt 5-7. The simplicity, lucidity, and energy of Jesus' utterances mask the art with which they were fashioned. Not that we are to conceive of Jesus as *labouring* over His literary productions to bring them to perfection, but that ideal thought intuitively found ideal expression. Jesus' supreme interest was assuredly not in mere letters, but in the truth He taught. Yet this included the vital lodgment of the truth in the minds and hearts of men, and to this end the language in which He clothed His teaching was of great importance. The uniqueness of Jesus manifests itself in the ability to present His teaching acceptably and effectively, as well as in His perfect insight into the truth itself.

* Metaphorically, Jesus calls the disciples the salt of the earth and the light of the world (Mt 5:13-14). Symbolically, He commands the plucking out of the right eye (5:29). Figuratively, He speaks of the mote and beam (7:3-5), of the pearls before swine (7:6), of the narrow way (7:13-14), of the false prophets (7:15), of the tree and its fruits (7:18-20). He gives the parable of the Two House-builders (7:24-27). And most difficult of all to interpret correctly, we have His hyperbolic utterances, in which He says more than He means, setting forth a principle rather than a rule of conduct, and leaving its application to the judgment of men. Such are the four famous 'non-resistance' injunctions (5:39-42), and the sayings concerning the secrecy of benevolence (6:3), prayer in the closet only (6:6), anxiety for the necessities of life (6:25-34), answers to prayer (7:7), and the 'Golden Rule' (7:12).

† See Wendt, *Lehre Jesu*, II. 74-112; Tholuck, *Bergpredigt*, p. 169 ff. (Eng. tr. p. 165 f.).

‡ See Heinrich, *Bergpredigt*, I. 19-20; Kent, *Wise Men of Ancient Israel* (1890), pp. 176-201; Briggs, 'The Wisdom of Jesus the Messiah' in *Expository Times*, 1897, vii. 393-8, 452-5, 492-6, ix. 69-75. Dr. Briggs says: 'Jesus put His wisdom in this poetic form for the reason that Wisdom had been given in the artistic form of gnomic poetry for centuries, and was so used in His time. If He was to use such Wisdom, He must use its forms. Jesus uses its stereotyped forms, and uses them with such extraordinary freshness, fertility, and vigour that His Wisdom transcends all others in its artistic expression' (viii. 396).

But not only was Jesus the true successor of the OT sage. The Hebrew prophets also gave their messages in remarkably fine literary form, as in the Psalms, Isaiah, and Amos. And the prophetic utterances of Jesus, too, were clothed in language full of beauty, fire, and force. Indeed, Jesus was more a prophet than a sage.* He taught not so much as a philosopher of this life; rather, as a seer who has a vision of a higher life which is to be produced in men. Jesus' earnestness and tempered zeal in His teaching were more persuasive and searching than the fervour of any preceding prophet of truth and righteousness. In the Sermon on the Mount He showed men the ideal life, but that was not all—He strenuously urged them to attain it. They must forthwith *do* the will of God which He had made plain to them (Mt 7:21-27). Active love, self-denial, and service He fixed as absolute requirements for those who would be members of the kingdom of God. In these utterances the voice of the true prophet is heard proclaiming God's will and demanding that 'justice roll down as waters, and righteousness as an everflowing stream' (Am 5:24). Jesus was both wise man and prophet, but greater than either and greater than both; and never greater than in the Sermon on the Mount, where He immeasurably surpassed every lawgiver, seer, and sage. It is with this supreme appreciation of Jesus and His teaching that one should enter upon the specific interpretation of His words in Mt 5-7 and the Lukan parallels.

2. EFFECT OF THE TRANSLATION INTO GREEK.—In view of the fact that we have Jesus' words only in a translation (the original of which has probably passed out of existence), it will be always a wise proceeding to attempt to reproduce the Aramaic form of the words of Jesus which have come down to us only in Greek. By this process, even though success in it can be only partial, an atmosphere for interpretation is obtained, and shades of meaning are disclosed which would otherwise escape us. Unless we get back into the Semitic world to which Jesus belonged and in which He worked, we can never completely understand Him or His teaching. It is therefore a proper and useful undertaking upon which a number of excellent scholars are now engaged,† to restore by conjecture the original Aramaic of Jesus' words. Some of the results already reached are of importance, and still greater things may be expected of it in the future. It is likely that to some extent the variant vocabulary in the Greek of parallel Gospel passages can be explained as the result of translation, a single Aramaic term being represented in the several translations by two or more synonymous Greek words.

A thorough study of the Septuagint in close comparison with the Hebrew text, showing how translators actually put Hebrew into Greek, gives a valuable insight into method, and furnishes criteria for judging of the Aramaic original behind the Greek of our Gospels. Various degrees of literal and free rendering of the Aramaic can be seen in our two accounts of the Sermon on the Mount. Sometimes the translators have been unable to find exact Greek equivalents for the Aramaic words; sometimes they have imperfectly comprehended, and therefore have failed exactly to reproduce, the Semitic ideas; sometimes they

* See this view defended by J. Weiss, *Prodigt Jesu vom Reiche Gottes* (1900), pp. 53-57, against Wellhausen, *Israelitische u. Jüdische Geschichte* (1897), ch. 24.

† See Resch, *Logia Jesu* (1898), who endeavours to reconstruct in Hebrew the Matthean *Logia*, which he regards as the primary source for the material of the Synoptic Gospels; suggestive for this study is his reconstruction of the Sermon on the Mount, pp. 19-29. Further, Marshall, art. in *Expositor* (1891-2); Dalman, *Worte Jesu*, I. (1898); E. A. Abbott, *Chue: A Guide through Greek to Hebrew Scripture* (1900); Nestle, *SE* (1896).

have placed a current interpretation upon Jesus' sayings; sometimes they have expanded the sayings as they put them into Greek to remove ambiguity, or to improve the literary form. These and other inevitable phenomena of translation appear in this discourse of the First and Third Gospels, and must be adequately dealt with in an exposition of its contents.

3. THEME OF THE DISCOURSE AND ITS DEVELOPMENT.—It is the unanimous opinion of all students of the Sermon on the Mount (whether they regard its contents as original or compiled), that the discourse as it appears in Mt 5-7 and Lk 6²⁰⁻⁴⁹ has a real unity, presenting a definite theme and developing it logically and effectively. If an actual discourse of Jesus constitutes the nucleus of these accounts, the unity of the Sermon is original with Jesus, notwithstanding the presence of certain extraneous material in the Gospel reports. But, even on the supposition that there was no historical Sermon, still the unity of this discourse in Matthew and Luke remains, and is to be attributed to the sources used by the Evangelists, or to the Evangelists themselves. We have seen good reason, however, for holding that the Sermon, as it comes down to us, rests upon a real event and contains excerpts from a great discourse of Jesus, whose theme and development are here preserved. What the theme is must be carefully considered. There are differing shades of opinion and various statements on this point. The crucial question seems to be: Is the theme of the discourse to be found in the Beatitudes (Mt 5³⁻¹² = Lk 6²⁰⁻²³) or in the verses about the fulfilment of the Law (Mt 5¹⁷⁻²⁰)?

If the theme lies in Mt 5¹⁷⁻²⁰, as is maintained by some,* several conclusions must follow. (1) The Beatitudes, given both in Matthew and in Luke as the beginning of the discourse, are extraneous matter brought in from some other connexion, or are merely introductory, containing no essential element of the discourse. (2) The account in Luke omits the very verses of the discourse which contain the theme, since Mt 5¹⁷⁻²⁰ has no parallel in Lk 6²⁰⁻⁴⁹; yet Luke's discourse *has* a theme, and an excellent one, in the promulgation of a perfect life of patience, trust, love, service, and obedience. (3) To find the theme in Mt 5¹⁷⁻²⁰ is to make the discourse an apologetical one, in which Jesus was defending Himself against the charge of destroying the OT Law. What follows, however, in 5²¹⁻⁴⁸ is not at all in accordance with this conception, for Jesus' teaching in these verses abrogates the OT Law in some points, and in other points supersedes it by a higher ideal of thought and conduct; in other words, He is here showing how little rather than how much He has in common with that legal system—He criticises rather than defends it. (4) Or, the theme in Mt 5¹⁷⁻²⁰ may call for a polemical discourse in condemnation of the perverse Pharisaic interpretation of the OT Law. But the occasion of this discourse did not suggest or make appropriate a polemic against Pharisaic conceptions any more than a defence of Himself against Pharisaic charges. If we can trust Luke to have given us the substantially correct setting of the Sermon, it was an address to the Galilean multitude who followed Jesus, eager to hear His words, well disposed towards Him, and many of them already His professed disciples. Jesus had just formally chosen twelve men to assist Him in His work, which was now assuming the character and proportions of a new religious movement. At this juncture a discourse of a *negative* quality, apologetical or polemical, would have been unsuitable and unwise. The occasion called for a positive, comprehensive setting forth of what this new

religious movement aimed to accomplish, for what it practically stood. (5) Finally, to take the theme from Mt 5¹⁷⁻²⁰ makes it impossible to find any place in the discourse for the greater part of the material contained in Mt 5-7, since the great sections 5²¹⁻²⁶ 6¹⁹⁻²⁴ 7¹⁻²⁷ have no logical relation to a defence against the charge of destroying the OT Law, or a polemic against the Pharisaic interpretation of it.

These considerations point strongly towards another theme for the Sermon. Where should one look for that theme but in the first section, in the Beatitudes themselves? They present the ideal life in character and conduct, the true righteousness over against current shallow and perverse conceptions of righteousness. This, then, is the true theme of the Sermon on the Mount, because: (1) It stands, where the theme should, at the head of the discourse. (2) It is the theme which both Matthew and Luke fix for the discourse, and the only theme which is common to both accounts of the Sermon.* (3) This theme *includes* the section about the Law, Mt 5¹⁷⁻²⁰, with the Jewish allusions contained in its logical development in 5²¹⁻⁴⁸ 6¹⁻¹⁸, as one of several elements in the discourse, which therefore Luke or his source can omit without radically changing the thought of the Sermon. In this feature of the section the ideal life of Jesus' conception is painted against the background of the Pharisaic conception; and not with an apologetical or polemical purpose, but as an effective mode of positive instruction. When the Gospel story was shorn of this local colouring to make it suitable for the Gentiles, the essential, universal elements of the teaching were extracted and used; compare Lk 6²⁷⁻³⁶ with Mt 5²¹⁻⁴⁸. (4) This theme is appropriate to the occasion described by Luke. There is abundant probability that Jesus, at some middle point in the Galilean ministry, after careful preparation of the people, and to a general company of His followers, would undertake to set forth somewhat specifically and comprehensively the kind of men and women for whom the kingdom of God called; what it meant in actual life to become a member of that kingdom; the kind of righteousness which God required as contrasted with the current scribal teaching. This would be a definite theme for a great discourse. It would logically involve a characterization of ideal character and conduct; a comparison of this ideal with the ideal commonly held among them; some illustrations of how this ideal character and conduct would manifest themselves in one's attitude towards God, self, and fellow-men; and, lastly, earnest injunctions to the actual attainment of this ideal. This is what we have in the Sermon on the Mount. And there is in the public ministry of Jesus no occasion so suitable for just such a discourse as that of the appointment of the apostles, with which event Luke associates the Sermon.

Certain scholars hold that this general theme of the ideal life, or the true righteousness, unifies the whole contents of Mt 5-7 so that *every verse* finds a place in its development. On this view the Sermon contains no extraneous material, is in no degree a compilation, but, on the contrary, came from Jesus exactly in its present contents and arrangement.† It does not need to be said that we should all like to think of the Sermon in this way, if it were possible. But in the judgment of

* Luke's form of the Beatitudes does not show this as clearly as Matthew's, but the subsequent material of Luke's discourse leaves no doubt that the original import of them was the same as of those of the First Gospel. On other grounds also it appears that the Lukan interpretation of the Beatitudes (placed upon them probably not by the Evangelist but by his source) is seriously misconceived.

† So Stier, Morison, Kell, Kübel, Steinmeyer, H. Weiss, Broadus, Grawert.

* H. Holtzmann, Ibbeken, B. Weiss, Wendt.

the great majority of NT scholars* two facts are decisive against this hypothesis. (1) Particular verses in the two accounts have no logical connexion with the theme of the discourse and its development, e.g. Mt 5^{25, 26, 31, 32} 6⁷⁻¹⁰ 7^{6-11, 22, 23}, Lk 6^{24-26, 28, 30, 40, 45}. It does not meet the point to reply that, since the Gospel reports contain only excerpts from the Sermon, abrupt transitions are to be expected. That is true, as we may see at Mt 5^{12, 14, 48} 6^{12, 24}, Lk 6^{26, 31, 42}. But in these cases it is possible to discover a thought relation in the contiguous sections, although the sections are not smoothly joined to one another. In the former class of passages, however, it is difficult to see any logical relation to the theme and discourse as a whole. If now it be said that thought connexion need not exist throughout the contents, this is to attribute to Jesus a mosaic of sayings instead of a discourse, which seems very unlikely. (2) The second fact to be mentioned is still more certain. Most of the material in Matthew which appears to be extraneous to the discourse has parallels in Luke's Gospel outside of his Sermon (see table of parallel passages above). Now, if Matthew has right places for these verses, Luke has wrong ones. But can it be considered probable that the Sermon should have been preserved so complete as Matthew's account in one line of transmission, and should have become so disintegrated as Luke's account in another? Would not Luke, who had 'traced the course of all things accurately from the first' (Lk 1³), have discovered and obtained for his book this far superior account of the Sermon? Again, the original historical setting of some of these extraneous passages in Mt 5-7 is fixed by Luke as not in the Sermon but elsewhere. The Lord's Prayer is shown by Lk 11¹⁻⁴ to have been given by Jesus on another occasion in response to a specific request from His disciples. The true place of the divorce teaching (Mt 5^{31, 32}) is established by Matthew's own Gospel, in Mt 19³⁻⁹ = Mk 10²⁻¹², where it is germane to the occasion, while in the Sermon it interrupts the movement of the discourse.† Similarly, the parable of the blind guiding the blind, Lk 6³⁹, belongs more likely to the position assigned it in Mt 15¹⁴.

There are, then, some passages in Mt 5-7 and Lk 6²⁴⁻⁴⁹ which did not historically form a part of the Sermon on the Mount, but which by a process of compilation (either in transmission or as the work of the Evangelists) have become associated with it. But one cannot be sure just how much extraneous matter is present in these reports, and the question is more difficult in Matthew than in Luke. There is much difference of opinion as to the amount of compilation, even among those who are best qualified to judge. It may be best to indicate three grades of the material: that which probably belonged to the original discourse, that about which there is uncertainty (accompanied by an interrogation-point in the table), and that which must be considered foreign addition (marked by enclosing brackets). The table that follows is intended to show the general opinion of scholars rather than any individual opinion.

Mt 5 ^{3, 4, 6, 11, 13} = Lk 6-0-22	Mt [5 ^{25, 26}]
? 5 ^{5, 7, 8, 9, 19}	5 ^{27, 28}
	[6 ²⁴⁻²⁶]
? 5 ¹³⁻¹⁶	? 5 ^{29, 30}
5 ¹⁷⁻²⁴	[5 ^{31, 32}]
	5 ³³⁻⁴⁶ = Lk 6 ^{27-30, 32-36}

* Calvin, Baur, Strauss, Neander, Tholuck, Wieseler, Kuinol, Bleek, Keim, Weissäcker, Godet, Meyer, Bruce, H. Holtzmann, Nösgen, Achelis, Wendt, B. Weiss, Ibbeken, Wernle, Jülicher, Heinrici, Sanday, Bartlett, Bacon, and many others.

† The parallel passage in Luke is at 16¹⁸, but this verse and the preceding one are both unattached in this position, which indicates that they are dislocated; 16¹⁷ belongs to the original Sermon, but this determines nothing for 16¹⁸, which stands in no logical relation to it.

Mt 6 ¹⁻⁶	Mt 7 ¹³ = Lk 7 ³¹
[6 ⁷⁻¹⁵]	? 7 ¹³⁻¹⁵
6 ¹⁶⁻¹⁸	? 7 ¹⁶⁻²⁰ = ? 6 ^{43, 44}
? 6 ¹⁹⁻³⁴	[6 ⁴⁵]
7 ¹⁻⁵ = Lk 6 ^{37, 38b, 41, 42}	7 ²¹ = 6 ⁴⁶
[6 ^{39a, 39, 40}]	[7 ^{22, 23}]
[7 ⁶⁻¹¹]	7 ²⁴⁻²⁷ = 6 ⁴⁷⁻⁴⁹

In a problem so important as this of the theme and content of the Sermon on the Mount, attention must be given to the opinions of many scholars. A brief conspectus of these opinions follows, arranged in two groups: those who hold that the discourse of Mt 5-7 is a perfect and original whole, and those who regard as extraneous a smaller or larger portion of these chapters.

Morison thinks Mt 5-7 a complete unit, given by Jesus to 'the constantly increasing multitude of such as took Him to be the long promised Messiah, and who wished to be instructed by Him as to what they should do in connection with the inauguration and establishment of His kingdom' (*Comm. on Matthew*, new ed. 1884, p. 57).—Broadus maintains that the discourse was given exactly as in the First Gospel, and that in it Jesus 'sets forth the characteristics of those who are to be subjects of this reign [of heaven] and share the privileges connected with it, and urges upon them various duties. In particular He clearly exhibits the relation of His teachings to the moral law, in order to correct any notion that He proposed to set the law aside, or to relax its rigour, when, on the contrary, He came to inculcate not merely an external, but a deeply spiritual morality' (*Comm. on Matthew*, 1886, pp. 83, 84).—Steinmeyer assumes that the Sermon as it appears in Matthew 'came from Jesus in this order and in these words . . . Righteousness is the glittering thread which clearly runs through the whole discourse from the beginning to the end; this is the idea which constitutes its unity' (*Die Rede des Herrn auf dem Berge*, 1885, pp. 10, 20). He makes a threefold division of the contents: the longing for righteousness, ch. 5; the striving for righteousness, ch. 6; the attainment of righteousness, ch. 7.—Hugo Weiss also defends the integrity of Matthew's discourse, and considers it as 'a necessary strand in the development of the Messianic movement. . . . [It contains] a characterization of the Messianic kingdom and of the duties of its members against a background of Jewish and Gentile conceptions of the world, teaching and practice' (*Die Bergpredigt Christi*, 1892, p. 2, 3).—Nösgen theoretically admits the possibility of the presence of some extraneous verses in Mt 5-7, but he does not as a matter of fact discover any. He thinks that in the discourse Jesus, as the fulfiller of the Law and the Prophets, aims to set forth the moral conditions of obtaining membership in the Messianic kingdom which is at hand (*Das Evangelium nach Matthäus* 2, 1897, p. 54).—Plummer holds that Luke's Sermon is a different one from Matthew's, though Luke has dropped out of his account the long section Mt 5¹⁷⁻⁶¹⁸ as inapplicable to his readers. And as to the theme, 'the main point in Matthew is the contrast between the legal righteousness and the true righteousness; † in Luke the main point is that true righteousness is love' (*Comm. on Luke*, 1896, p. 133).—Grawert is the latest defender of the complete unity of Mt 5-7 (*Die Bergpredigt nach Matthäus*, 1900). The proof of this integrity is developed on a new line: the Beatitudes as given by Matthew constitute the key to the whole discourse, each Beatitude corresponding to a particular section of these chapters and forming its epitome. He thinks that for this reason the Beatitudes must have stood originally at the close of the Sermon instead of at the beginning, so that Mt 5¹³⁻¹⁶ was the proper prologue to the Sermon (pp. 5-8). The eight Beatitudes as they now stand in Matthew are in inverse order as compared with the material of the discourse, thus: 5¹⁰ = 5¹¹⁻¹⁶, 5⁹ = 5¹⁷⁻²⁶, 5⁸ = 5²⁷⁻³⁷, 5⁷ = 5³⁸⁻⁴⁸, 5⁶ = 6¹⁻³⁴, 5⁵ = 7^{1, 2}, 5⁴ = 7³⁻⁵⁰, 5³ = 7⁷⁻¹¹ (p. 66). The purpose of the Sermon was 'the consolidation of the disciple-group. By this we mean the inner and outer separation of the disciples from their former Jewish past, and the establishment of their new position on the basis of their relation to the Lord, and in their actual outer connexion with Him as His followers and future messengers of the Kingdom of Heaven' (p. 18). But the discourse has a double character, for it also 'indicates the point at which Jesus steps forth from His former reserve with respect to the ever-increasing hostility of the Pharisees and scribes, and engages in open war against them' (p. 18). It was this that made the picking out and the union of the disciples a necessity. The occasion of the Sermon, as of the appointment of the Twelve with which it was immediately connected, was the daily increasing labours of the Pharisees against

* Steinmeyer's analysis is entirely formal—it does not characterize the material. The whole treatment is shallow, uncritical, and disappointing.

† From Plummer's view of Luke's discourse it seems fair to conclude that he would hold Matthew's discourse to be practically original as it stands. If so, this statement of the theme of Mt 5-7 is unsatisfactory, since the Jewish contrast appears only in 5¹⁷⁻⁴⁸ 6¹⁻¹⁶ 7¹⁻⁵, less than one-half of the whole Sermon. But this conception of the Sermon is also shown to be inadequate by the fact that it lacks the breadth, point, and positiveness which the circumstances of the Sermon on the Mount required.

Jesus and their persecution of His followers, which called out a public manifesto from Jesus and a positive resistance (p. 33). He makes five divisions of the Sermon: 5:17-37 5:38-48 6:1-18 6:19-34 7:1-11; the introduction is 5:1-16, and the conclusion 7:12-27, while the Beatitudes 5:1-10 form a résumé of the whole teaching.*

The compilation view, which sees in the discourses of Matthew and Luke a larger or smaller quantity of extraneous sayings, is held by the great majority of scholars, who can be represented here by quotations from but a few. Some members of this class have the same large idea of the theme of the Sermon on the Mount as the seven just named. Godet (*Collection of the Four Gospels, and the Gospel of Matthew*, 1899, p. 135) says that 'the report of this discourse in Matthew is a work of a composite order, in which have been combined many heterogeneous elements; but this does not deny that there was really a great discourse of Jesus.' The passages which he thinks belonged originally to other connexions are Mt 5:12-26 28 29-32 6:1-18 19-34 7(6) 7:14 21-23 (pp. 132-134). The purpose of the Sermon was 'the installation of the true people of God on the earth by the proclamation of the only righteousness conformable to the holy nature of God, which should characterize the true members of His people, in opposition to the formal righteousness inculcated by the traditional teaching and the example of the doctors. This righteousness, far from being contrary to the law, is the very fulfilment of it, since the meaning of the law has been falsified by those who call themselves its interpreters' (p. 135).—B. Weiss (*Meyer-Komm. d. d. Mattheum*, 1848) holds that a primitive Logian account of the Sermon was essentially shortened by Luke but largely expanded by Matthew. 'If we remove the additions of our Evangelist, we get the form of an original discourse which may well be substantially the Sermon of Jesus, by reason of its unity of thought, its certain prologue 5:1-12 and epilogue 7:12-27, its highly important theme 5:17-30, with the exposition in twice three antitheses against the scribal interpretation of the law 5:21 27 31 33-37 39-42 43-48; also in twice three antitheses against the practices of the Pharisees 6:1-4 16-18 7:1 2-4 12, with their genuine reflexion of the conditions of the time' (p. 163). Therefore the extraneous matter in the Matthean account is 5:13-16 23 26 29 30 6:7-15 19-34 7:6-11. In the discourse 'clearly the opposition to the prevailing teaching of the law and the Pharisaic practice of righteousness form the leading point of view and historical motive' (p. 164).—Tholuck (*Die Bergpredigt Christi*, 1872 [Eng. tr. from ed. 4, 1860]) thinks that there is some indication of compilation, as perhaps Mt 5:28 29 30 6:7-15 7:1-11 (p. 22), but hesitates to pronounce against any specific passages; he defends the Matthean position of the Lord's Prayer 6:7-15 and of the important section 6:19-34. Jesus' purpose in the Sermon was 'to exhibit Himself as the fulfiller of the law, and to enunciate the Magna Charta of His new kingdom. . . . To exhibit the new economy of the kingdom of God as the true fulfilment of the old; in this the condemnation of the superficial religion of Pharisaic Judaism was of course implied' (pp. 14, 15). The Sermon must have contained throughout a strictly progressive train of thought, but this disappears in Mt 6:12-7:11 by the fault of the Evangelist.—Bruce (*Expositor's Greek Testament*, vol. 1, 1897) presents a novel theory: the material in Mt 5-7 is a literary assemblage of various teachings given during a period of instruction. It is supposed that the Beatitudes were given on one day, teaching concerning prayer on another day, warning against covetousness on a third day, and so forth. 'As these chapters stand, the various parts cohere and sympathize wonderfully, so as to present the appearance of a unity' (pp. 94, 95).—Achelis (*Die Bergpredigt*, 1876) holds that 'the speech of Mt 5-7 is to be regarded as a work of compilation, in which the genuine Sermon of Jesus was combined with sections from other discourses into a new unity' (p. 491). The portion Mt 53-618 is the actual nucleus of the Sermon, and 7:12-27 was the actual close; but the entire portion 6:12-7:12 consists of extraneous matter brought in here from other connexions (p. 400). In this great discourse Jesus 'set before His disciples the norm and the essence of the righteousness of the Kingdom of Heaven' (p. 321).—Wendt (*Die Lehre Jesu*, vol. 1, 1888) regards the speech as in part a compilation, the foreign passages being Mt 5:13-16 28 29 30 6:7-15 19-34 7:6-11 19 20 22 23.—Feine (*Jahrb. f. Protest.*

Theologie, 1885, pp. 1-35) holds firmly to a historical discourse, and regards the Matthew account as the more authentic, but separates as extraneous matter Mt 5:11-16 18 22-23 29-32 6:7-15 19-34 7:6-11 13 19 27 28 (p. 84). The theme of the Sermon is the true righteousness as against the current Pharisaic conception and practice of righteousness (p. 35).—Bacon (*Sermon on the Mount*, 1902) argues stoutly for an actual discourse of Jesus, and defends the account of the First Gospel as the more complete. The portions which did not originally belong to the Sermon are Mt 5:5 7:10 12-16 18 22-23 29 30 6:7-15 19-34 7:6-11 12-17 19-22. He calls the Sermon 'the discourse on the Higher Righteousness' (p. x), and thinks it 'worthy to be called the new Torah of the Kingdom of God' (p. 35).

H. Holtzmann (*Hand-Comm. u. d. Synoptiker*, 1892) thinks the speech is a work of compilation *in toto* by the Evangelist, whose aim was to furnish an order of life for the new Church (p. 99). The theme of the entire discourse is in his opinion to be found in Mt 5:17-30 (p. 103).—Weizsäcker (*Apost. Zeitalter*, 1891) also regards the Sermon as a collection by the Evangelist of passages adapted to the instruction of the primitive Church (p. 378 f.).—Heinrici (*Die Bergpredigt*, vol. 1, 1900) similarly views Matthew's discourse as a free composition from scattered authentic sayings (pp. 10, 39). As to the theme of the Sermon, 'the whole appears as the Magna Charta of true discipleship to Jesus' (p. 13).—Ibbeken (*Die Bergpredigt Jesu*, 1890) offers a striking view which calls for careful consideration. According to him, the First Gospel was designed throughout to show a close parallelism between the events of Israel's history and the events of Jesus' life, as may be seen in the Evangelist's treatment of the Infancy Narrative (chs. 1, 2), the Baptism (ch. 3), and the Temptation (ch. 4). Then when the author comes to the Sermon (chs. 5-7) he provides for Jesus a multitude explicitly described (⁴²) as representative of all the Hebrew territory, drawing significantly the parallelism between the giving of the Law on Sinai and the second giving of the Law by Jesus on 'the mount of Beatitudes' (cf. Mt 5:1 7:28 with Ex 19:3 24:13). The contents and arrangement of the Sermon also correspond, Ibbeken thinks, with the Sinai law-giving. There are four chief sections of the Matthean account: 53-48 concerning ethical perfection (the Beatitudes corresponding to the Ten Commandments), 61-18 concerning piety, 619-34 concerning the highest good, 71-12 concerning the judging of members of the Kingdom of Heaven; then follows an epilogue 712-27 containing earnest warnings and admonitions to faithful obedience to this new law (pp. 1-11). He declines to decide whether this parallelism between the old and the new law-giving was drawn by Jesus Himself or only by the Evangelist: 'however many may be the grounds for thinking that the speech was first put together out of the Matthean Aramaic *Logia* by the author of the First Gospel, the possibility remains that Jesus Himself gave the discourse in this form and on this occasion. . . . It seems to me to be unnecessary for the understanding of the Sermon to determine whether Jesus Himself actually gave it in this form, at this time and place, or whether the material of it was first gathered together by Matthew out of scattered single sayings and arranged in this way' (pp. 5, 6).*

But granting, as seems necessary, that the Sermon on the Mount, as it comes down to us in twofold form, is in some degree a compilation, though with the nucleus of a historical discourse, it is yet possible to recognize that the material as it stands in Matthew and Luke has a kind of unity, by the consonance of all Jesus' religious-ethical teaching, and by the intelligent grouping of the additional matter within the framework of the actual address. And considering that in those sections of the discourse which are original we have mere excerpts from the whole, only a small part of all that Jesus said in that epoch-making discourse, we can still feel confident that in these verses the theme of the Sermon is before us, and many of the essential ideas—a sufficient number to show the main development of the theme by Jesus. If an

*Logically, however, Ibbeken is driven to a belief in the entire compilation of the Matthean discourse, and he seems to acknowledge this on p. 5. It is impossible to agree with him that it makes no difference for the interpretation of the Sermon whether the parallelism is from Jesus or from the Evangelist. But his observation is a true one, often noted (see H. Holtzmann, *op. cit.* p. 99; Godet, *op. cit.* p. 131), that the First Evangelist delights in arranging parallels between the events of Hebrew history and the events of Jesus' life. In this interest and occupation he probably represented a large school of primitive Jewish Christians. It is quite likely that he and they found deep significance in comparing the law-giving by Moses with that by Christ. There is clearly an important truth in the parallelism; Jesus came to create a second great epoch as Moses had created a first, and He gave to men a Gospel which superseded the legal system (see Bacon, *Sermon on the Mount*, pp. 81, 26, 36). But the artificial and dramatic devices for indicating the parallelism, which Ibbeken supposes, are hardly to be attributed to Jesus, and it is even doubtful whether the Evangelist intended them to be implied in his narrative. The circumstances and description of the giving of the Sermon are fairly simple and have verisimilitude.

*Grawert's theory is composed of two parts which are not interdependent. (1) His analysis of the discourse, parcelling out a number of verses to each Beatitude as its epitome, is artificial and reaches absurdity when it is forced to make 'Blessed are they that mourn' (54) the epitome of the saying about the mote and the beam (72-4). Certainly the Beatitudes contain the essential ideas of the Sermon, which are developed, made concrete, and illustrated by the teaching which follows. But no such absolute connexion between the Beatitudes and the contents of the discourse can be shown as shall guarantee that every verse of Mt 5-7 was a part of the original Sermon. Not only this, but he has entirely ignored the phenomena of Luke's parallel account and the distribution of much of Matthew's discourse through chs. 10-14, 16 of the Third Gospel. (2) The conception which Grawert has of the theme, occasion, and purpose of the Sermon might as readily be held in conjunction with a mild compilation theory, and unquestionably contains a great deal of truth. The main objection to it is that it presses to an extreme the idea of the Pharisaic opposition to Jesus and His followers at this stage of the ministry, and postulates a much sharper separation between the Christian and the Jewish adherents than was then at all probable.

†A similar view concerning the theme of the Sermon is held by Baur, Neander, Delitzsch, Ebrard, Ewald, Meyer, Kostlin, and Hilgenfeld.

analysis of the Sermon on the Mount is, properly speaking, excluded by the facts just mentioned, we can at least construct an outline of the discourse as given to us by the Evangelists.*

THE SERMON ON THE MOUNT

AS RECORDED BY MATTHEW AND LUKE.

Theme: The Ideal Life:† Its Characteristics, Mission, and Outworkings, and the Duty of attaining it.

- A. The Ideal Life described, Mt 5:1-16, Lk 6:20-36.
 - (a) Its characteristics, Mt 5:1-12, Lk 6:20-26.
 - (b) Its mission, Mt 5:13-16.
- B. Its Relation to the Earlier Hebrew Ideal, Mt 5:17-20.
- C. The Outworkings of the Ideal Life, Mt 5:21-48, Lk 6:27-49.
 - (a) In deeds and motives, Mt 5:21-48, Lk 6:27-30, 32-36.
 - (b) In real religious worship, Mt 6:1-18.
 - (c) In trust and self-devotion, Mt 6:19-34.
 - (d) In treatment of others, Mt 7:1-12, Lk 6:37-42.
- D. The Duty of living the Ideal Life, Mt 7:13-27, Lk 6:43-49.

4. THE CHIEF PROBLEMS OF INTERPRETATION.

—It is an interesting evidence of the relativity of language, and of the large subjective element in all interpretation, that Jesus' words in the Sermon have been variously understood in the Christian centuries. Men have found in them what they were prepared to find, by reason of their political ideas, their social environment, their philosophical theories, their theological beliefs, their moral character, and their spiritual aspirations. Nor can we hope to escape similar contemporary influences when we attempt an interpretation. But in three important respects the expositor of to-day is in a more favourable position than his predecessors for getting at the true interpretation of Jesus' teaching: (1) the prolonged, able, and thorough historical investigation of the four Gospels during the 19th cent. has given us a new knowledge and wisdom in determining the origin and the first meaning of Jesus' words; (2) the present high development of the science of ethics—both individual and social ethics—has enabled us as never before to understand and to appreciate Jesus' teaching in the Sermon; (3) the modern change of emphasis from a Christianity of right belief to a Christianity of right character and right social service has brought us nearer to Christ, and has made us both able and willing to learn from Him.

Space here permits only a brief, general treatment of the interpretation of the material contained in Mt 5-7, Lk 6:20-49.

a. *The Beatitudes*.—Mt 5:3-12 = Lk 6:20-23 (24-26). In a discourse whose one purpose was to describe and to enjoin the true righteousness, it was altogether appropriate that the Divine ideal for men should be characterized at the outset. Jesus presented this ideal in a most significant way; not in a re-enactment of the Ten Commandments of Moses—which His people for centuries had regarded as embodying the will of God for man; nor in a new table of commandments to take the place of the old: but in a series of sayings which pronounce the highest blessings upon those who aspire to the best kind of life. 'Blessed are the poor in spirit,

* The entire material of Mt 5-7 and Lk 6:20-49 is included in this outline, since the passages regarded by the present writer as extraneous would not, if removed, essentially alter what is here given. That Mt 5:25, 26, 31, 32, 37-15, 22, 23, Lk 6:21-26, 32-36, 40, 42 can be best explained as belonging originally to other connections seems quite clear; but Mt 5:13-16, 30, 6:19-34, 7:12-20, Lk 6:31, 43, 44 are here left uncertain.

† Or, The True Righteousness. The former phrase is given the preference here because 'righteousness' (*dikaioσύνη*) is a technical term of theology, and is seldom used outside of the vocabulary of religion. In Jesus' day also it was a technical Jewish term. While it occurs five times in Matthew's account of the Sermon (5:10, 20, 6:1, 23), it is wholly absent from Luke's account. Nor does it appear in Luke's Gospel except at 17:1, nor in John except at 16:10; and in Mark not at all. This indicates that the term was largely displaced among Gentile Christians by the non-technical terms 'love' (*ἀγάπη*) and 'mercy' (*ἔλεος*). St. Paul's constant use of the term (*dikaioσύνη*) continued its theological designation.

the mourners, the meek, those who hunger and thirst after righteousness, the merciful, the pure in heart, the peacemakers, those who are persecuted for righteousness' sake.'

This beatitude type of utterance was not new upon Jesus' lips, for it appears abundantly in the OT.* But Jesus made the Beatitude His own (as He made the Parable His own), and constantly used it as a mode of expression which carried the idea of love rather than of exaction, the idea of persuasion rather than of force, the idea of God's blessing and assistance to His children whom He tenderly leads and exalts.† When in the 5th cent. B.C. the legal element in the Hebrew Scriptures had become the chief interest of the nation, there followed logically the dominance of the legal idea of God, according to which He was an austere lawgiver and judge, demanding under severe penalties an exact obedience to His statutes, regarding men as slaves to be driven to their tasks or to be punished if they failed. The higher conception of God which is expressed in the Psalms and the Prophetical Writings was for centuries sadly obscured by this supremacy of legalism. It fell to Jesus, as one part of His mission, to restore the former better idea of God as a loving Father who cares for, comforts, guides, and blesses His children.‡

When, therefore, Jesus sets at the beginning of the Sermon these Beatitudes, He does so with the profound intention of revealing at once the spirit and the substance of the Gospel. Man is not made subservient to an external law forced upon him from without, but is made responsive to a creative light and power within. The criterion by which God judges him is not primarily a standard of external performance, but a standard of internal purpose and aspiration, of which external performance is in due time a necessary outworking. This fact is seen in the Beatitudes, whose description of the ideal of human life pertains to the fundamental nature of a person and concerns all men equally. Jesus furnishes here a universal ideal and a universal criterion. Not only did He describe the ideal in words; He also illustrated it in His own life.§ According to Jesus' teaching

* See particularly Ps 41:1, 65:4, 84:5-7, 89:15, 119:1, 2, 128:1, 2, Ps 32:2, 34, 130:1, 32:20, 50:2, 129:1; also 1 S 2:26, 1 K 8:15, Ps 23:6, 38:10, 72:18, 118:26, Jer 17:1. The idea 'Blessed' is expressed in the Hebrew OT (see also Sir 14:1, 2, 30, 25:9, 20:1, 23:10, 48:11, 50:2) by two different words, בָּרֵךְ and אֲשֵׁר. The former is a noun in construct case from the root בָּרַךְ meaning 'to go straight, to advance, to prosper.' בָּרֵךְ is in OT usage nearly confined to the Psalms, where it appears nineteen times (elsewhere seven times). It is always rendered in the LXX by μακάριος, which in classical meaning was quite akin to this Hebrew word (see Heinrich, *Bergpredigt*, i. 27). בָּרֵךְ, Qal pass. ptc. of בָּרַךְ meaning 'to bless' occurs fifteen times in the Psalms, and frequently (twenty-two times) elsewhere. It is always rendered in the LXX by εὐλογητός or εὐλογημένος, never by μακάριος. In the Psalms without exception, and predominantly elsewhere, it is used with reference to God as the object of the blessing, 'Blessed be the Lord God of Israel.' The NT uses both μακάριος and εὐλογητός (-μένος), and after the prevailing practice of the LXX, for μακάριος is used of men and εὐλογητός (-μένος) of God as recipient. בָּרֵךְ denotes a status of true well-being, due to right thoughts and right conduct, the harmony of a man with his God. בָּרֵךְ when referring to men as recipients denotes some special blessing bestowed by God and coming upon one from without. It is a fair inference from these data that Jesus used בָּרֵךְ rather than אֲשֵׁר, and the Greek translators of His words did well to follow the LXX in rendering this by μακάριος. The point is of some importance for determining the exact meaning of Jesus when He uses this term in His Beatitudes. In the 'Blessings and Cursings' of Dt 27, 28 the terms are בָּרֵךְ and אָרַךְ, rendered in the LXX by εὐλογημένος and μακαρίωντος. The Greek word for 'Woe' in the Woe passages of the Gospels is οὐαί.

† Like as a father pitieth his children, so the Lord pitieth them that fear him, Ps 103:13. See also Dt 8:2, 10:13, 32:6, Mal 1:2, 10.

‡ Cf. especially Wendt, *Lehre Jesu*, II, 139-160 (Eng. tr. i. 184-209); G. B. Stevens, *Bibl. Theol. of the NT*, pp. 65-76.

§ Gore, *Sermon on the Mount*, pp. 15, 16: 'The character which we here find described [in the Beatitudes] is beyond all

and example, a man's success or failure is to be judged not by the amount of money he can accumulate, or by the amount of social distinction he can command, or by the extent of his intellectual or official achievements; but rather by the essential character which he fashions within himself, and by the service which he renders to his fellow-men. In the Beatitudes Jesus calls men away from the superficial tests and standards which so commonly prevail, to a criterion which concerns the real nature of man, is equally just to all, and stands in relation not alone to the few years of a man's present existence, but to the whole of his eternal career. In no respect was the Judaism of Jesus' day more perverse, and perhaps in no respect has error been more perpetuated, than in the maintenance of superficial tests of righteousness and of success (cf. Lk 18⁹⁻¹⁴, the parable of the Pharisee and the Publican). The Gospel of Christ was, in the 1st cent. A.D., the rebuke and the correction of this condition; and that Gospel needs, as much now as then, to be established in the world. In no words of Jesus has His essential teaching concerning the ideal of humanity been so simply and clearly epitomized as in the Beatitudes of Mt 5³⁻¹². The man, woman, or child who sincerely, persistently aspires and strives to attain to the character and to perform the service described in the Beatitudes, will not fail of Christianity either in knowledge or achievement.*

Whether all the Beatitudes which now appear in Mt 5³⁻¹² originally stood at the beginning of the Sermon cannot be affirmed with certainty. The fact that the parallel section in Lk 6²⁰⁻²³ presents but four Beatitudes, suggests that the four additional Beatitudes in Matthew (the meek, merciful, pure in heart, peacemakers) may not have belonged historically to this connexion, but possibly were a part of the composite material which came later to be associated with the historical nucleus of the Sermon.† Even on this theory these four Beatitudes would be authentic utterances of Jesus. And since on many occasions He used the beatitude form of expression, the theory is by no means impossible that the eight Beatitudes of Matthew are a compilation. Yet there are good reasons for the contrary opinion, that they constitute an original unit: (1) the absence of four of the eight Beatitudes from the Lukan account can be explained as a part of the drastic treatment which Luke's material had received in course of transmission. The materialistic import which has been forced upon the four Beatitudes in Lk 6²⁰⁻²³ gives evidence of such treatment. Since the other four Beatitudes of Mt 5³⁻⁷ will by no means admit of a materialistic interpretation, it is not improbable that for this reason they dropped out of the narrative in that line of transmission. (2) The Third Gospel has not in any connexion recorded these four Matthean Beatitudes; neither does the Second Gospel have them. So that as the First Gospel has them only in this connexion, no other setting is suggested for them. (3) Their truth is quite too searching and sublime to allow us to regard them as a later creation. They must have come from Jesus. And He must have given them in some significant connexion, such as the Sermon. (4) These four Beatitudes are necessary to the connexion in which they stand in Mt 5³⁻¹², since without them the ideal of life which the Beatitudes seem designed to characterize would be essentially incomplete and ineffective. If, as has been argued above, the Beatitudes of Matthew present the theme of the Sermon, and in a way epitomize all that the following discourse contains,

question nothing else than our Lord's own character put into words, the human character of our Lord corresponding always in flawless perfection with the teaching which He gave. Here are two reasons why our Lord's teaching is capable of universal and individual application: (1) because it is not made up of detailed commandments, but is the description of a character which, in its principles, can be apprehended and embodied in all circumstances; (2) because it is not only a description in words, but a description set side by side with a living example.

* Harnack, *Das Wesen des Christentums*, 1901, p. 47 (Eng. tr. p. 74), says: 'Should we be threatened with doubts as to what He [Jesus] meant, we must steep ourselves again and again in the Beatitudes of the Sermon on the Mount. They contain His ethics and His religion, united at the root, and freed from all external and particularistic elements.'

† So Resch, Wendt, H. Holtzmann, Adeney (*Expositor*, 5th ser. vol. II.), O. Holtzmann (*Leben Jesu*, 1901, p. 186f.), and Bacon (*Sermon on the Mount*, p. 129). J. Weiss (*Predigt Jesu* 2, pp. 127, 187) excludes the three Beatitudes of Mt 5⁷⁻⁹. Klopfer, *Zeitschr. f. wiss. Theol.* 1894, thinks that the eight Beatitudes were originally scattered through the Sermon, but were collected and placed at the beginning by the First Evangelist; an improbable supposition.

one cannot well suppose that the four Beatitudes found only in the Matthean account were absent from the original group.

As to the number of Beatitudes in Mt 5³⁻¹² there is difference of opinion. It is customary to count them as either seven or eight, and prevaillingly the latter.* Of the first seven, in vv. 3-9, there is little question: the disagreement relates to the enumeration of vv. 10-12, whether they should be counted into the group at all; or if counted, whether they contain more than one additional Beatitude. The occurrence of the word 'Blessed' (*μακάριοι*) is not generally regarded as determining the number of the Beatitudes, for it appears nine times (vv. 3-11); instead, the enumeration is by subject-matter—since vv. 10-12 all treat of persecution for righteousness' sake, they are counted as one Beatitude.† Then is the teaching concerning persecution for righteousness' sake to be classed with the preceding seven ideas as fundamental to ideal manhood, so that these verses present an eighth Beatitude? Such classification seems preferable, and it is strongly supported by the fact that Luke also gives this teaching concerning persecution in his account as the closing Beatitude. Exact correspondence of idea and form among the eight Beatitudes is not to be required.

The order in which the eight Beatitudes of Mt 5³⁻¹² stand in relation to one another does not appear to be a closely wrought one, such that any other arrangement would have been illogical. They do not seem to present an ascending, climactic order; Nos. 1 and 4 pertain to the longing for God and righteousness, Nos. 2 and 8 pertain to patient endurance and spiritual growth under affliction and persecution, Nos. 3, 5, 6, 7 pertain to the outworkings in character and service of the internal righteousness. The desire for righteousness, of course, precedes the achievement of righteousness, so that Nos. 1 and 4 should precede Nos. 5, 6, 7; but logically the place of Nos. 2 and 3 seems to be after No. 4. This transposition is made in Luke's account, where the two Beatitudes of desire (6^{20, 21a}) precede the other two (6^{21b, 22, 23}). If this order of the Beatitudes has the semblance of originality, it may be that Matthew's Beatitudes were rearranged in transmission. It scarcely seems necessary,

* The number of Beatitudes is counted as seven by Ewald, Hilgenfeld, Kostlin, Lange, Meyer, Nosgen, Steinmeyer, B. Weiss. The arguments for this view are that Mt 5¹⁰⁻¹² does not really co-ordinate with vv. 3-11 to make an eighth Beatitude, that Matthew has an intentional parallel to his Beatitudes in the seven Woes of ch. 23, and that probability is in favour of the sacred and frequent number seven being used instead of eight. Bacon (*Sermon on the Mount*, p. 127) counts seven Beatitudes by regarding Mt 5⁹ as a marginal gloss interpolated from Ps 37¹¹. The Beatitudes are counted as eight by Achelis, Bleek, Feine, Hahn, Heinrich, Ibbeken (although he holds that they correspond closely to the Ten Commandments), Keil, Keim, Kubel, Tholuck, H. Weiss, Weizsacker, and many others. Delitzsch (*Neue Untersuchungen*, p. 76) enumerated them as ten, to complete their parallelism with the Ten Commandments; but this view has found little acceptance.

† Since v. 10 and vv. 11-12 have a common theme and are actual duplicates, it may be that the one or the other passage is not original in this connexion. The Beatitudes had originally a short form, and were probably of about equal length. Given one of these passages at this point, the other might easily have become topically associated with it. That this has happened is further suggested by the fact that while v. 10 is given in the third personal form, like the other Beatitudes in Matthew, vv. 11-12 are given in the second personal form, like the Beatitudes of Luke. Achelis and B. Weiss, however, regard all three verses as original, saying that at v. 11 Jesus turns to speak directly to His disciples. Whether, on the former theory, v. 10 would be the extraneous passage or vv. 11-12 (so Feine, Hilgenfeld, Weizsacker, J. Weiss), it is difficult to decide. H. Holtzmann thinks all three verses foreign to the connexion. But the unity of the eight Beatitudes is not affected by the question of duplicate material in these verses.

‡ Most commentators endeavour to show a special meaning and significance in the Matthean arrangement of the several Beatitudes. Tholuck, *Bergpredigt*, p. 56 f. (Eng. tr. p. 64 f.): 'These eight Beatitudes are arranged in an ethical order. The first four are of a negative character. They express the state of spiritual desire which belongs to the indispensable conditions of participation in the Kingdom of God. The next three following are positive: they set forth what attributes of character are required in the members of that Kingdom. The eighth shows how the world will treat the members of the Kingdom.' However, 'the progression among the qualities pronounced blessed is not to be regarded as of such a nature that each stage excludes the rest; or that, in advancing to another, the former are left behind.' Achelis, *Bergpredigt*, pp. 73-75, classifies the first four Beatitudes as pertaining to the desire for salvation, the second four as pertaining to the possession of it; he further subclassifies them also. H. Weiss, *Bergpredigt*, pp. 9, 23, regards the first four as passive, the second four as active. Feine, *Jahrb. f. Protest. Theol.* 1883, thinks the eight Beatitudes make four neatly-fitting pairs. Ibbeken, *Bergpredigt* 2, p. 19, says that the effort to find a close logical order in the Beatitudes as they stand has been unsuccessful. Heinrich, *Bergpredigt*, i. 28, thinks that if they had been arranged logically according to their inner relation, the order would have been Nos. 1, 4, 6, 3, 5, 7, 2, 8. It is scarcely necessary to say that the idea that in their present arrangement the Beatitudes indicate the several consecutive stages of normal Christian growth is a purely fanciful one.

however, to suppose that Jesus insisted upon a particular succession of them.⁴

Of much more importance is the question whether Matthew or Luke presents the more authentic form of the Beatitudes. The difference between them is of two kinds: (1) Luke gives the Beatitudes in the second person, in the form of direct address; while Matthew has them in the third person, in the form of a general statement (see a similar phenomenon in Mt 317 = Lk 322). An examination of Jesus' other Beatitudes recorded elsewhere in the Gospels indicates that He used both forms, and apparently without preference for either. The OT Beatitudes are in the third personal form. But since Matthew agrees with Luke in giving the remainder of the discourse (from 5:11 onwards) in the second person, some scholars hold that the Beatitudes themselves were originally of this form.⁵ On the other hand, a change to the second person in the Lukan account might arise from the materialistic interpretation which has been cast over the Beatitudes and Woes in this Gospel. The change would make the Beatitudes personal and specific to his hearers, instead of general and universal as in Matthew. (2) The wording of the same Beatitudes is in some respects strikingly different in the two accounts. Concerning the first Beatitude (as suggested above, i. 4), it seems probable that Matthew's form of it, while conveying more explicitly Jesus' meaning, has been expanded in transmission by the addition of *ἐν πνεύματι*, the original Aramaic form of the utterance being shorter, as in Luke.⁶ The fourth Beatitude (Luke's second) presents a somewhat similar case; when Matthew says, 'Blessed are they that hunger and thirst after righteousness,' it is possible or even probable that Jesus' words were shorter (as suggested by the Lukan form) by the implication rather than the expression of the idea contained in *ἐν δικαιοσύνῃ*, perhaps also of that contained in the *ἐν ψυχῇ*. These words, too, may have been added to prevent a materialistic misinterpretation. Since the idea of hungering spiritually was common in the OT, Jesus may have used the *ἐν πνεύματι* alone with that meaning, the additions being made later to remove all ambiguity. In the second Beatitude (Luke's third) the *ἐν πνεύματι* of Matthew and the *κλαίοντες* of Luke are probably two varying Greek words employed to translate one Aramaic word; the former is the better in this context, since it carries a deeper, finer meaning. The double occurrence of *ἐν* in Lk 6:1 is an obvious importation. In regard to the eighth Beatitude (Luke's fourth), concerning patient endurance and spiritual growth under persecution, one notices that Luke has no parallel to the first of the two duplicate forms in which Mt 5:10 gives it; instead, Lk 6:22 = Mt 5:11.¹² A comparison of these passages shows general thought agreement, but much difference in wording; nor can there be any doubt that the Lukan form of the Beatitude is secondary (consider especially 6:22b, 23b).

The Gospel of Luke contains, in addition to its four Beatitudes and in immediate sequence upon them, four corresponding Woes. With these Woes an increasing difficulty has been felt; many scholars have come to regard them either as so modified in transmission that they no longer represent Jesus' spirit, or as a free traditional expansion of the four Beatitudes, and therefore unauthentic. Four chief objections are made to them: (1) These Woes find no parallel in the Matthean account, nor elsewhere in any of the Gospels. Jesus used the Woe type of expression (cf. Mt 11:21 18: 23:13-36, Lk 10:11-15 11:37-52) against those who had long and deliberately refused Him and His message; but these four Woes of Lk 6:24-26 are found only in this passage. If Jesus gave them at this time, they have failed to be preserved in the longer and better of the two reports of the discourse which have come down to us. (2) These Woes have a crass material import. Each of the four Woes gives the converse of each of the four Beatitudes, in the same order, and fixes upon them a materialistic sense. 'Blessed are ye poor!' conversely, 'Woe unto you that are rich!'; therefore only economic poverty and wealth are meant, since spiritual riches cannot be deprecated. 'Blessed are ye that hunger now!' conversely, 'Woe unto you, ye that are full now!'; therefore the 'hungry' are those in physical need of food, for the

spiritually 'full' are not doomed to eternal spiritual privation. Also the third and fourth Woes are harsh in their terms, shallow and external in their conceptions. The exaltation of material poverty and distress which thus appears in Luke's Beatitudes and Woes can be seen also in other parts of his Gospel (see the account of the rich young man, Lk 18:18-30; the parable of the Rich Fool, Lk 12:16-21, 33; the parable of Dives and Lazarus, Lk 16:19-31, cf. 18:33).^{*} The Evangelist probably is not responsible for these views; rather they had already impressed themselves upon the material which constituted the sources for his Gospel. They represent a strong sentiment in the first century, which grew out of a false contempt for the earthly life and an exaggeration of Jesus' teaching about riches. (3) These Woes are out of character with Jesus. He never condemned wealth as such; what He condemned was that a man should permit wealth to be his supreme purpose and his master. On this subject Jesus taught much, and with profound insight into the true relation of men with things; from Him we must learn the real aim of living and the proper use of the material world about us.[†] It is difficult, if not impossible, to bring the tone and import of these Woes into accord with Jesus' spirit, conceptions, and method. (4) These Woes are inappropriate to the Sermon. This discourse was given to a large company of people who had been attracted to Jesus by His words and His works; many of them were His professed followers, all of them were well disposed towards Him. The occasion was not suitable for violent language and condemnatory pronouncements. Jesus used the Woe type of utterance for His final judgments against those who rejected their Messiah; but here He is in the midst of His Galilean ministry, the people hear Him gladly, and the enmity of His opponents has not yet reached its final stage. In view of these four considerations, the full authenticity of the four Woes in Lk 6:24-26 must be counted an open historical question. If they are not authentic as they stand, they may represent in a modified form actual Woes spoken by Jesus in another connexion during the closing months of His work. Or, if they cannot be attributed to Jesus at all, they will be explained as free expansion in transmission, due to a desire to intensify the teaching against earthly goods. The verses may then have been constructed on the pattern of the 'Blessings and Cursings' of the Old Covenant (Dt 27, 28), or still more likely on the pattern of the great Prophetic utterance (Is 5). Such an expansion should not be charged to Luke himself, but to the line of tradition from which he drew his material.

The blessedness which Jesus in His Beatitudes affirms of men who attain to the character and perform the service therein described, belongs both to the present and to the future. In one aspect it is eschatological: the endless future of such men is assured as one of perfect happiness, glory, and communion with God. Since Jewish hopes and expectations were largely eschatological, Jesus met them on this ground. But the blessedness which Jesus promised belonged also, and primarily, to the present life; in His teaching Jesus constantly kept the present life clearly and strongly to the front. Jesus' Beatitudes, just as the Beatitudes of the

* For this view see Campbell, *Critical Studies in St. Luke's Gospel* (1891), ch. 2; Rogge, *Der irdische Besitz im NT* (1897), pp. 9-68; Peabody, *Jesus Christ and the Social Question* (1901), pp. 190-201; Schmiedel in *Encycl. Bibl.* vol. ii. col. 1841; Cone, *Rich and Poor in the NT* (1902), pp. 118-142; and J. Weiss, *Predigt Jesu vom Reiche Gottes* (1900), p. 182 f., who says: 'There can no longer be any doubt that Luke [in his Beatitudes] aims to draw a sharp contrast between the different external social conditions; his Beatitudes contain nothing of an ethical or religious element.'

† Matthews, *Social Teaching of Jesus*, ch. 6; Peabody, *op. cit.* ch. 4; Rogge, *op. cit.* pp. 1-68.

‡ The authenticity of the Woes in Lk 6:24-26 is defended by Wendt, *Lehre Jesu*, ii. 168 f.; Bacon, *Sermon on the Mount*, p. 126; O. Holtzmann, *Leben Jesu*, p. 187; and by Plummer, *Comm. on Luke*, p. 181 f., who says: 'There is no evidence that these were not part of the original discourse. Assuming that Matthew and Luke report the same discourse, Matthew may have omitted them. But they may have been spoken on some other occasion.' On the other hand, many reject them. Tholuck, *Bergpredigt*, p. 54 (Eng. tr. p. 62): 'Unquestionably, these Woes must be regarded as an expansion of the thought by the recorder of the narrative.' H. Holtzmann, *Synoptiker*, p. 102: 'The Woes of Luke were constructed for the purpose of strengthening and explaining [the Beatitudes] according to the model of Dt 27:1-28, 15-22, and not without a remembrance of Jer 5:1, Mic 2:1.' Similarly B. Weiss, *Feine (Jahrb. f. Protest. Theol.* 1885, p. 15 f.), Wernle (*Synoptische Frage*, p. 62), Schleiermacher, Strauss, F. H. Woods, *Expos. Times*, 1893, p. 256, says: 'The first Christians' aimed at giving the general sense rather than the exact words. We can easily understand, e.g., an early preacher so repeating the Beatitudes as to give them in what may be called a negative as well as a positive form; especially when by so doing he would be making a more exact parallel between the blessings and cursings of the old law and the blessings and cursings of the new law. Such a modification of Christ's language might arise in course of time quite unconsciously, when we remember how often so striking a portion of our Lord's teaching must have been repeated to catechumens.'

* The reversal of the order of the second and third Beatitudes of Matthew which is found in Codex D, 33, S, r cur and a few other early text witnesses, was adopted into the text by Lachmann, Tischendorf, and Tregelles; Achelis approves it, and H. Holtzmann thinks it may be the true reading. It is rejected, however, by Tholuck, Westcott and Hort, Nestle, and B. Weiss. The transposition may have been due to the close OT association of the two ideas of 'poor' and 'meek' (the LXX renders the Hebrew עָנִי by both עָנָה Ps 69:33 and עָנָה Ps 37:11); or it may have been merely fortuitous.

† Similarly Wendt, *Lehre Jesu*, i. 56; Bacon, *Sermon on the Mount*, p. 126.

‡ So Kloppe, *Zeitschr. f. wiss. Theol.* 1894; Kabisch, *SK*, 1896; J. Weiss, *Predigt Jesu*, 2. p. 182 f.; Schmiedel, *Encycl. Bibl.* vol. ii. col. 1855; Heinrich, *Bergpredigt*, i. 29, who says: 'An effort to exclude all misinterpretation is seen in the phrases of closer definition, *ἐν πνεύματι* (v. 5), *ἐν δικαιοσύνῃ* (v. 6), *ἐν ψυχῇ* (v. 8), and *ἐν ἡλικίᾳ* (v. 10). These additions mar the parallelism. They cannot be explained except as expansions of the original made in the process of translating Jesus' words into Greek. Similarly Bacon, *op. cit.* p. 127 f. The preservation of the precise meaning of the Beatitudes was of the first importance, and to Greek-speaking Christians they would not have been quite clear in their original brevity, for they would not have understood the terms 'poor' and 'hungry' to have a meaning primarily spiritual. The addition of these phrases removed all ambiguity.

Psalms, have to do first of all with present well-being. The term *μακάριος* appears in this connexion, as always,* to refer to that condition of true well-being which results from committing one's self wholly to God, with the purpose of living according to His will; it connotes also the effect produced by this status, namely, the peace and joy arising from the consciousness of God's approval and blessing, and the feeling that one's present and future well-being is assured. The conception of blessedness in Mt 5¹² is not essentially different from that which the OT at its best had already presented, but Jesus perfected and exalted the idea of blessedness, setting it before men with a new attractiveness and power. That Jesus' Beatitudes re-echo the highest ideals and promises of the Psalms and of the Prophets has been frequently and truly noted; both the conceptions and the phrases stand in the closest relation to the OT. In the Beatitudes, as everywhere in His teaching, Jesus was building upon the foundation of the Hebrew religion, fulfilling it, i.e. perfecting it and establishing it.

The Beatitudes consist each of two phrases: the one expresses the condition, the other the result; the one states the character or service to be attained, the other the blessedness of attaining it. In neither portion of the sayings are the phrases used by Jesus new ones; on the contrary, they are taken up by Him from the OT and current Jewish terminology, and turned to good account in His own teaching, receiving from Him a larger, higher import. Thus the phrases the 'poor,' the 'mourners,' the 'meek,' the 'hungering and thirsting,' the 'merciful,' the 'pure in heart,' the 'peacemakers,' the 'persecuted,' are staple conceptions and terms of the OT and of the Judaism of Jesus' day. And the same thing is true of those ideas and phrases which constitute the second members of the Beatitudes, the 'Kingdom of Heaven,' the 'comfort of the afflicted,' the 'entering into possession of the earth,' the 'satisfaction of longing for righteousness and truth,' the 'seeing God,' and the 'becoming sons of God.'† Jesus' use of OT and current religious terminology served to form an essential connexion between His hearers and Himself; but He did not use it as a mere matter of expedience, a pedagogical device to gain the attention and confidence of His hearers; rather He used it because He found an essential unity between His own ideas and those of the Hebrew prophets. These phrases in their highest meaning were rooted in fundamental spiritual needs, realities, and aspirations such as Jesus came to satisfy, to proclaim, and to fulfil.

The Beatitudes present each a special idea, but they are not mutually exclusive. An organic unity binds them all together, and they interlace with one another. Like so many facets of a diamond, they present the ideal life in eight different aspects, they indicate the several characteristics which make up the whole. The specific meaning of each of the Beatitudes must be carefully determined, in order that we may apprehend correctly the ideal of Jesus for men which they embody.

(1) 'Blessed are the poor in spirit: for theirs is the kingdom of heaven.'‡ The phrase 'the poor' (*πτωχοί* = *עניים* and *דלילים*) was a current one among the Jews,

arising in the OT period and bearing a somewhat technical meaning (see art. POOR in vol. iv.). It designated that class, generally in humble circumstances, who lived the higher life, fixing their thought upon God and seeking His spiritual blessings, instead of living in a worldly way, to accumulate property and to attain social distinction and political power; they were in the world, but not of it; they were the faithful and righteous ones whom God could approve and bless.* It seems probable, since Jesus in the Beatitudes has taken up many current Jewish phrases to put upon them His own interpretation, that He here used the phrase 'the poor' in the sense of, and with regard to, the current conception of it. In that case the words 'in spirit,' which in Matthew are associated with the phrase, but not in Luke, may be an expansion of the original utterance made in the Greek for the purpose of protecting Jesus' words from a material misinterpretation.† The *τῷ πνεύματι* would, then, although a later addition, preserve the original meaning of Jesus; as it stands, it limits *οἱ πτωχοί* (not *μακάριοι*) as a phrase of closer definition,‡ like 'the pure in heart' of Mt 5⁸ and the 'lowly in heart' of Mt 11²¹; cf. also Mk 8¹², 1 Co 7²⁴. It fixes the sphere in which the poverty is predicated. Jesus means, not that spiritual poverty is in itself a good thing, but that the man who has a deep sense of his spiritual deficiency and dependence upon God will turn to Him, and will then receive the spiritual blessings which he needs. Therefore the phrase 'the poor in spirit' designates an internal rather than an external condition, a moral and spiritual rather than an economic status.§

other Gospels and the other books of the NT use *ἡ βασιλεία τοῦ θεοῦ*. Did Jesus use both phrases in their Aramaic equivalents? If so, did the two phrases mean different things? Or was only one of the phrases used by Jesus, the other being of a different origin? If so, which was Jesus' phrase? These questions have been variously answered. The majority of scholars, however, are of the opinion that the two phrases are identical in meaning, that Jesus was accustomed to use both of them, and that His more frequent term was 'the Kingdom of God.' (See esp. O. Holtzmann, *Leben Jesu*, pp. 124-126). The other phrase, 'the Kingdom of Heaven,' is to be explained as arising out of the fallacious reverence for the name of God which characterized the Jewish people and led them to use circumlocutions instead of speaking the name itself. Jesus, however, did not share this superstitious regard for the name of God; on the contrary, he spoke of God constantly. The First Gospel adopted the phrase, 'the Kingdom of Heaven,' which probably was in general use among Jewish Christians, in order to be more acceptable to the Jewish readers for whom it was intended. On the other hand, in the Second and Third Gospels, and elsewhere, the phrase 'the Kingdom of God' occurs, since this universal use of terms was more acceptable to the great body of Gentile Christians for whom and among whom most of our NT books were written.

* So Ps 91.2. 102.2. 12. 128. 4017. 9929. 792. 4. 12. 18. 822.4. 861. 10922. 1137. Is 61.1 (cf. Lk 4.19). 662. See Achelis, *Bergpredigt*, p. 71.; Kabisch, SK, 1896; Kloppe, *Zeitschr. f. wiss. Theol.* 1894; Wellhausen, *Israelitische u. Jüdische Geschichte*, 1897, ch. 15; Rahls, 'Jü und Jü in den Psalmen', 1892; J. Weiss, *Predigt Jesu vom Reiche Gottes*, 1900, pp. 183-185; Driver, art. POOR in vol. iv., who argues for Rahls' distinction between 'Jü' (poor, needy) and 'Jü' (humble towards God).

† It is obvious that when Jesus' words came into the hands of the Gentiles, who were not familiar with the history, literature, ideas, and religious terminology of the Jews, there would be great danger of His words being misunderstood. The first Beatitude, for instance, was likely to be misinterpreted, because the term 'poor' was used by the Gentiles only in a material sense, not with an ethico-religious content. It was therefore necessary to add the words 'in spirit,' in order that Jesus' meaning might not be misunderstood. Modern English usage of the term 'poor' is also economic instead of religious, and therefore we also need the words 'in spirit' to guard against misinterpretation.

‡ So H. Holtzmann, Ibbeken, Kabisch, Kloppe, Tholuck, R. Weiss. The *πνεύματι* does not refer to the Holy Spirit, as maintained by Achelis (*Bergpredigt*, p. 5); so that the phrase 'the poor in spirit' does not mean 'the poor through the Holy Spirit,' nor 'the poor by the Holy Spirit,' nor 'the poor in the possession of the Holy Spirit.' Rather, the *πνεύματι* refers to the spiritual nature of the man himself.

§ So the best of the ancient commentators, Origen, Chrysostom, Augustine, Theophylact, and nearly all modern scholars. Tholuck, *Bergpredigt*, p. 63 f. (Eng. tr. p. 70 f.): 'a consciousness of poverty in the blessings of salvation. . . . The idea of

* See the discussion of the term in the footnote * on p. 14.
† Tholuck, *Bergpredigt*, p. 59 (Eng. tr. p. 68): 'There can be no doubt—and this should be carefully noted—that all the ideas which meet us here in the Sermon on the Mount, those of the Kingdom of God, the righteousness of that Kingdom, the poor in spirit, the pure in heart, seeing God, etc., were no new ideas, but well-known ones, of which Christ only revealed the deepest meaning.' The passages of the OT in which these ideas are found will be indicated below.

‡ Mt 5⁸ *μακάριοι οἱ πτωχοὶ τῷ πνεύματι, ὅτι αὐτῶν ἰστέν ἡ βασιλεία τοῦ θεοῦ*; Lk 6²⁰ *μακάριοι οἱ πτωχοί, ὅτι ὑμεῖς ἐστὶν ἡ βασιλεία τοῦ θεοῦ*. The Gospel of Matthew usually, though not always, employs the phrase *ἡ βασιλεία τοῦ θεοῦ*, while all the

This is in accordance with the tone of the whole group of Beatitudes, for they present an ideal of character and service in its essential elements; while external conditions, the possession or lack of property, are not essential. The Beatitudes and Woes, as given by Luke, speak only of material want and misery; * but that is a perversion of

physical poverty is here carried over into the sphere of poverty of spirit. . . . those poor are pronounced blessed who are sensible of their spiritual poverty.' Kabisch, *SK*, 1896, says that the *εὐφρανται* is added 'in order to remove the poverty into the realm of the religious sense.' Klopp, *Zeitschr. f.wiss. Theol.* 1894, holds that there is no reference in the Beatitude of Matthew to the poor in social position; rather they are the poor in spiritual things, those who in opposition to the wise and understanding (Mt 11²⁵) are characterized as 'babes' or 'little children' (Mt 18⁴); dissatisfied with the traditional wisdom of the scribes, they long for direct Divine instruction. J. Weiss, *Predigt Jesu vom Reiche Gottes* 3, 1900, pp. 130-132: 'They are called "poor" . . . not because they have no money, but because, as the *עניים* *עניים*, they have no religious, and therefore no social, standing. They do not belong to the righteous, pious class, but are shunned by them like the lepers. . . . They could not and would not conform to the conventional standard of piety. But what was to hinder them from pouring out their heart before their God in their inner chamber? They live as children of God in a true simplicity, naïve and unassuming, without great joy over their condition; because it has been so deeply impressed upon them that they never can attain the true righteousness according to the Pharisaic ideal. . . . They do not realize that they already have, what is precious in God's sight, *τὸ πνεῦμα καὶ τὸ ἔλεος τοῦ Θεοῦ* (1 P 3⁴). They do not see that God, in his mysterious wisdom, has chosen to pass by the wise and the learned in order to reveal salvation to just such *εὐφρανται* as they (cf. Lk 10²¹, Mt 18⁴).'—It is true that a materialistic interpretation of the first Beatitude prevailed in the early and middle Christian centuries, whereby voluntary poverty was pronounced blessed; and this view is still taken by Roman Catholic commentators, as Hugo Weiss, *Bergpredigt*, p. 10. The Lukan form of the Beatitudes arose out of and gave a foundation for this false attitude towards material things. But the whole notion of asceticism is wrong: Jesus neither taught nor practised it; He did not regard material poverty and physical misery as in themselves meritorious. It cannot be said that the poorer men are, the better they are; not even when the poverty is voluntary. Jesus did not require the abandonment of wealth, except in specific cases where it formed an insuperable obstacle to spiritual well-being; what He did require was the supremacy of the spiritual life and the right use of material things.

* So O. Holtzmann, *Leben Jesu*, 1901, p. 186 f. Similarly Plummer, *Comm. on Luke*, p. 179: 'In the four [Beatitudes] that Luke gives, the more spiritual words which occur in Matthew are omitted, and the blessings are assigned to more external conditions. Actual poverty, sorrow, and hunger are declared to be blessed (as being opportunities for the exercise of internal virtues); and this doctrine is emphasized by the corresponding Woes pronounced upon wealth, jollity, and fulness of bread (as being sources of temptation).' Here the materialistic tone of the Lukan Beatitudes is recognized, but the writer has avoided the problem of adjusting the two accounts of the Beatitudes to each other by regarding them as two distinct utterances on different occasions; this is to ignore the facts and data of the Synoptic problem. Wendt, *Lehre Jesu*, ii. 167 f., thinks that the economic poor are meant: 'Because this salvation of eternal life offers an incomparably rich return for all troubles of the earthly life, Jesus can at the beginning of His discourse concerning the true righteousness pronounce blessed the poor, the hungry, the mourning, the persecuted, because of their future participation in the heavenly blessedness of the Kingdom of God. His meaning here is not that in earthly poverty and unhappiness as such lies the ground for their longing for the future salvation of the Kingdom of God; still less in the following Woes against the rich, the satisfied, the laughing, and the praised, does He present earthly happiness as in itself the ground for the future loss of salvation. He intends only to affirm with the greatest emphasis that all future salvation is the single true and full salvation, in comparison with which the earthly unhappiness is insignificant and earthly happiness is not really such. Consequently he declares that those very persons who from the world's point of view are counted miserable are the truly happy ones because of the part which awaits them in that future salvation.' Wendt holds that the Lukan form of the Beatitudes, together with the Woes, is authentic as against the Matthew report, and can therefore give this interpretation; but if the Beatitudes of Matthew are the more authentic report, then Jesus' teaching at this point must be understood as presented by them—and they give a very different set of ideas. Kabisch, *SK*, 1896, interprets: 'Blessed are those who have freed their minds from the earthly wealth: for theirs is instead the heavenly wealth. . . . The absence of earthly goods and happiness is placed in the foreground, here [in Matthew] as in Luke; but not as there that accidental poverty must be blessed, only that voluntary, quiet and meek poverty will be blessed. . . . I regard the Lukan form [of the first Beatitude] as the more original, but at the same time hold that the First Evangelist in his added phrase has come nearer to the actual meaning of Jesus than the Third Evangelist, who

Jesus' teaching as recorded in Matthew. It is intelligible how the more spiritual teaching might have been coarsened in transmission, under the influence of strongly held false theories concerning a man's relation to the material world, to the form which Luke derived from his sources; but how could the reverse have happened? Who could subsequently have perfected Jesus' teaching by creating the lofty spiritual conceptions contained in Mt 5³⁻¹²?

Jesus wished to establish, as the first principle of the better life, that true well-being is not reckoned in earthly goods, or obtained by them; on the contrary, ideal manhood and womanhood come through complete self-committal to God, drawing from Him our spiritual sustenance, making His will our will, and finding in His supreme purpose the only object of our lives. Of such men, and of such alone, can it be said that the Kingdom of God is theirs. He would turn men away from the customary material standard of well-being to the pursuit of the highest good, where one's external conditions become a matter of comparative indifference. Those are blessed who, instead of being self-seeking and self-sufficient, strive earnestly for that communion and co-operation with God which will enable them to realize the highest type of character and to perform the highest kind of service. The conditions of possessing the Kingdom are not external but internal, not material but spiritual. Poor and rich may alike possess it. The poor have it, not as a reward or a recompense for their poverty, but because they set their hearts on things which are above; and the rich have the Kingdom for the same reason, inasmuch as they use their material possessions for the spread of righteousness, truth, joy, and peace.

The second clauses of the Beatitudes respectively express the results of realizing the character or performing the service described in the first clauses. They are promised blessings which correspond to current longings, and are worded in the fixed phrases by which those longings had of old found expression. These blessings, although varied in form, are kindred in meaning; they promise not so much a number of different things, as they convey the idea in various ways that the entire good of which God is the creator and provider will come to those who sincerely seek it in the way He appoints.† 'The Kingdom of God' was a phrase which had long been used to express all conceivable good, to sum up the longings of the devout souls of Israel. Jesus therefore tells them how they may obtain all their desire. And the possession of the Kingdom is not a thing of the far distant future, but of the immediate present: 'theirs is the Kingdom of Heaven.' The Kingdom of God, while it has its consummation in the future, was an existing reality when Jesus spoke; and its blessings were available at once for those who would comply with the conditions of receiving them.‡

(2) 'Blessed are they that mourn: for they shall be comforted.'§ Here, also, Jesus has taken up an OT phrase, which may be seen in Is 61¹⁻³ ('to with Ebionitic tendency has interpreted the words of the Lord which lent themselves to this apparent condemnation of all material possessions, as well as other words concerning the Kingdom, in a similar way.'

* Yet O. Holtzmann, *Leben Jesu* (1901), p. 186 f., holds that just this change was made.

† So Kabisch, *SK*, 1896; Ibbeken, *Bergpredigt* 2, p. 19. Tholuck, *Bergpredigt* 5, p. 57 (Eng. tr. p. 64), says: 'If we consider the substance of the several promises, we shall find that they are all essentially identical, and that the difference is merely rhetorical; formally, they correspond to the thing desired or possessed, but each of them really comprises all spiritual blessings.'

‡ Upon the meaning and use of the term 'Kingdom of God' in Jesus' teaching, see esp. Wendt, *Lehre Jesu*, ii. 293-328.

§ Mt 5⁴ μακάριοι οἱ πένθοντες, ὅτι αὐτοὶ παρακληθήσονται; Lk 6²¹ μακάριοι οἱ κλαίοντες νῦν, ὅτι γέλοιστε. The Lukan form is secondary, and its harsh, superficial tone is unsatisfactory. Compare with it Ja 4⁹.

comfort all that mourn,' מְנַחֵם and Ps 126^{5, 6}. The term 'mourning' (πενθοῦντες) is so general a one that it is difficult to determine precisely its scope. The early commentators inclined to regard it as the sorrow of penitence for sin (cf. 2 Co 1⁴ 7¹⁰), while others think of it as the sorrow which comes from afflictions, adversities, and persecutions.* There seems no sufficient reason why the term should not be understood here in the inclusive sense, to designate all those experiences of life—internal or external, physical, mental, or spiritual,—which bring sadness and sorrow to men. The world is full of mourning; no one escapes the anguish of pain, disappointment, bereavement, and conflict with sin. And men have always longed for a better day, when this mourning shall be no more. It was one element of the Messianic hope that with the advent of that glorious Divine Kingdom complete comfort and consolation for the world's sorrows would be given to God's faithful ones, Is 61²; cf. Lk 22⁴ 41⁸. Jesus gave the assurance that this hope would be realized. The Apocalypticist has repeated with thrilling joy the promise: 'And he shall wipe away every tear from their eyes; and death shall be no more; neither shall there be mourning, nor crying, nor pain any more: the first things are passed away' (Rev 21⁴).

Although the promise of comfort is in the Beatitude expressed in the future tense, its bestowment is not to be regarded as exclusively eschatological. As the Kingdom was present among men at the time when Jesus spoke these words, so the comfort of the Kingdom was already a present reality and available to all. Not that all mourning was then to cease,—that stage belongs to the future consummation of the Kingdom,—but that Jesus brought a true consolation for all sorrow, in the knowledge that God is a loving Father who does all things well, and that all men, like the Son Himself, are perfected through suffering (He 5⁸ 12⁸⁻¹¹). Rest and peace came to the world in and through Christ (Mt 11^{28, 29}, Jn 14^{1, 27} 16³³).

(3) 'Blessed are the meek: for they shall inherit the earth.'† The idea is that of Ps 37¹¹: 'the meek shall inherit the earth,'‡ and the LXX renders μακάριοι by πραεῖς. Meekness is an OT ideal, and is closely related to that of the 'poor,' which Jesus had already taken up in the first Beatitude. This same Hebrew word is rendered in the English VSS now by the one word, now by the other; also עַלְוָה, commonly translated 'poor,' is sometimes translated 'meek' (cf. Is 61¹ in RV text and margin, and see Lk 4¹⁸). In Is 66² the term עַלְוָה is associated with נְחֻמָּה, נְחֻמָּה, where the three ideas seem closely akin: 'To this man will I look, to him that is poor and of a contrite spirit, and that trembleth at my word.' Cf. also Ps 25⁹⁻¹³ Pr 16¹⁹. The OT conception of meekness seems therefore to concern a man's attitude towards God rather than towards other men. The opposite of this meekness is pride and arrogance towards God, and such men He will bring to nought, Ps 75⁴⁻⁷ 94²⁻⁴. It is primarily His attitude towards God which Jesus has in mind when He says, 'Take my yoke upon you, and learn of me; for I am meek and lowly in

heart: and ye shall find rest unto your souls' (Mt 11²⁹). And the 'meek' who in the third Beatitude are pronounced blessed are those who live in trustful submission to God, seeking to know and to do His will; humility rather than self-assumption and pride characterizes them. Compare also the parable of the Pharisee and the Publican, Lk 18⁹⁻¹⁴. They become a part of the great world, and are fellow-labourers with God in His great purposes, instead of being ends in themselves and isolated elements in the Divine system. They do not thereby lose their identity and their importance; instead, by complete self-committal to God, they find the perfect realization of themselves, and achieve a personality of greatest influence in the universe.

A necessary outworking of this meekness towards God is a quality of gentleness, forgiveness, and self-abnegation in a man's relations to his fellow-men. This is the conception which St. Paul seems to have had of the meekness of Jesus, 2 Co 10¹ (cf. also Eph 4², Ja 3¹⁷, 1 P 3⁴); and it is the meaning which the earlier interpreters found in this Beatitude, since they paid more heed to the classical Greek usage of πραεῖς than to the Hebrew conception of עַלְוָה. The Greeks had scarcely an idea of that humility of man towards God which formed so true and striking an element in the religion of Israel.

When Jesus promised that the meek 'shall inherit the earth,' He adopted the popular phrase of the Hebrew covenant conception, which was then in use among the more deeply religious as a symbolic expression to denote all those good things which were to come with the Messianic kingdom.* The material and ephemeral elements of this hope Jesus passed by; but the spiritual content of it, the inspiring expectation that God would triumph over the world in the persons of His faithful and obedient servants among men, He reaffirmed. Nor did Jesus conceive that this supremacy of the meek on the earth would be solely eschatological and catastrophic; quite the reverse, for the growth of the Kingdom was to be gradual (Mk 4²⁶⁻²⁹), and the dominance of the world by meekness and humility is progressively realized. Men of such character become increasingly influential and successful; the Divine ideal is making its way among men. Every passing year marks real advance towards the supremacy of the people of God.†

(4) 'Blessed are they that hunger and thirst after righteousness: for they shall be filled.'‡ The

* The phrase אֲרֻחַי אֶתְּחַבֵּא arose in a literal sense, with reference to the inheritance of the Promised Land of Canaan by the Israelites; cf. Gn 15⁷, Mt 4²⁸, Jos 14⁹. After the Israelites had come into possession of Canaan, the conception was enlarged, and the phrase became figuratively used to designate an anticipated material, moral and spiritual supremacy of the people of God on the earth, as in Ps 37, esp. vv. 9, 11, already quoted, and in Ps 25⁹⁻¹³. 'The meek will he guide in judgment, and the meek will he teach his way. . . His soul shall dwell at ease, and his seed shall inherit the land.' See also Is 60²¹, Dn 7²⁷; and in the NT the idea can be seen in Mt 23³⁴, Mk 12⁷, Ro 4¹³, Gal 3¹⁸, Rev 5¹⁰.

† Tholuck, *Bergrede*, p. 78 (Eng. tr. p. 83): 'In this promise humility and meekness are by him pronounced to be the truly world-conquering principle, with reference to their ultimate victory in the history of the future.' B. Weiss thinks this idea lies very remote from the passage, and describes the meek as 'those quiet sufferers who, trusting in God, hear, without bitterness or a feeling of revenge, the abuse of those who afflict and persecute them. The painful consciousness of their own shortcomings makes them humble when they are treated unjustly by others.' Certainly this teaching is germane to Jesus (Mt 5³⁹) but it comes under the eighth Beatitude rather than under the third.

‡ Mt 5⁶ μακάριοι οἱ πεινῶντες καὶ διψῶντες τὴν δικαιοσύνην, ὅτι αὐτοὶ χορτασθήσονται. Lk 6^{21a} μακάριοι οἱ πεινῶντες τὴν δικαιοσύνην, ὅτι χορτασθήσονται. It may be that the original saying was shorter than that which appears in Matthew's Greek form, the τὴν δικαιοσύνην, or even καὶ διψῶν, τὴν δικαιοσύνην, being possibly an expansion; but it seems sufficiently clear that in any case the Matthew account preserves the true idea, and that the material tone of Luke's Beatitude (compare his corresponding Woe, 6²⁷) is a later perversion of Jesus' utterance.

* For the former view, Clem. Alex., Chrysostom, Jerome, and recently Achelis; for the latter view, Augustine, Luther, Calvin, and recently Ibbeken. B. Weiss holds that it is impossible to tell whether the one or the other idea is intended or both. Tholuck, *Bergrede*, p. 73 (Eng. tr. p. 79), says: 'The mourning spoken of is the sorrow of penitence immediately flowing from a felt poverty of spirit. . . This penitential grief is not, however, to be regarded as confined to the period of conversion, but ought to be viewed as a continuous condition of the soul.'

† Mt 5⁶ μακάριοι οἱ πραεῖς, ὅτι αὐτοὶ πληροῦσονται τὴν γῆν. Luke has no parallel.

‡ Bacon, *Sermon on the Mount*, pp. 116, 127, holds that this Beatitude was not given by Jesus, but 'is a mere scribal gloss, a marginal addition from Ps 37¹¹, which has crept in after v. 3 in some manuscripts, after v. 4 in others.' This is a possible, but not a likely, hypothesis.

terms 'hunger' and 'thirst,' representing the fundamental physical necessities, had been of old used symbolically to denote intense spiritual longing, cf. Is 49¹⁰ 55¹, 2 65¹³, Am 8¹¹, Ps 34⁹, 10 42¹ (and in the NT see Jn 6³⁵ 7³⁷, Rev 22¹⁷); *χορδαίωμα* also was used figuratively of spiritual supply, Ps 17¹⁵ 107⁹. Of the meaning of this Beatitude there can be no doubt. The righteousness which men are to seek is that righteousness which the entire Sermon is designed to elucidate and to enjoin. Those who earnestly desire it are pronounced blessed, because it is theirs; every one who sincerely wills to have righteousness obtains it (Rev 22¹⁷). Righteousness was the technical Jewish term to connote that quality and quantity of character and conduct which God requires of men, and which it is the one aim of life to attain. It was Jesus' mission to correct and to perfect men's conception of righteousness, and to inspire them to its actual realization. In this Beatitude He speaks of the blessedness of those who long for righteousness, while in the other Beatitudes and throughout the discourse He shows them what true righteousness is, and how it is to be obtained. Since righteousness consists in right character and service, it cannot be externally bestowed,* but must be achieved, by each individual, with the help of God through Christ. And its achievement is a process of growth into the likeness of our Divine Example. It is the glory of the Gospel that to every desirous soul is promised the attainment of God's ideal for him and membership in the eternal Kingdom of the sons of God.

(5) 'Blessed are the merciful: for they shall obtain mercy.'† It is probably by intention that this Beatitude stands immediately after the one concerning righteousness, for in both OT and NT the two ideas of righteousness and mercy are correlative:‡ Mic 6⁸ 'He hath showed thee, O man, what is good; and what doth the Lord require of thee, but to do justly, and to love mercy, and to walk humbly with thy God?' (cf. also Ps 18²⁴⁻²⁶, Is 58¹⁻¹¹); Mt 23²³ 'Woe unto you, scribes and Pharisees, hypocrites! for ye tithe mint and anise and cummin, and have left undone the weightier matters of the law, judgment [i.e. justice], and mercy, and faith.' There is no righteousness without mercy, whether of God or man. One of the most frequent OT ideas is that God is merciful towards men, and one of its most frequent injunctions is that men must be likewise merciful towards one another. Jesus re-established both teachings,

* Neither in this passage nor elsewhere does Jesus use the term 'righteousness' in the forensic sense to which St. Paul gave currency. That God does, in His love and mercy, pardon and receive every man who in and through Christ sets himself seriously towards the Divine ideal, is abundantly taught by Jesus; but He does not use this term to denote that idea. So nearly all commentators. Achelis, *Bergpredigt*, p. 22: 'The words indicate that high degree of longing which rests upon the certainty that the object of the longing is essential to life, that without it life would become death. Righteousness is the object of such desire; what is meant by it is that moral condition which is in accordance with God's will.' B. Weiss defines the righteousness here referred to as that 'righteousness which corresponds to the norm of the Divine will, the highest good of every true Israelite, upon the possession of which depends the certainty of God's good pleasure and the participation in all the promises. The Kingdom of God proclaimed by Jesus offers men this good in an abundance which will satisfy all longings, bring full contentment, and fill them with righteousness. For in the Kingdom of God, and only there,—though there with the greatest of certainty,—will the ideal of righteousness be actually realized.'

† Mt 5⁷ *μακάριοι οἱ ἐλεήμονες, ὅτι αὐτοὶ ἐλεηθήσονται*. Luke has no parallel.

‡ So closely connected are the two ideas that the Heb. *ḥesed*, which more commonly should be and is represented in the LXX by *ἀγαπή*, is at times translated by *δικαιοσύνη*; cf. Dt 6⁵ 24¹³, Ps 24⁹ 38⁹ 108⁹, Is 1¹⁷. In the Sermon passage Mt 6¹ *δικαιοσύνη* appears as a variant reading of *ἀγαπή*; and the former, however, is not strongly attested (EL against ABD), and is accepted by few scholars.

§ So H. Holtzmann, B. Weiss, Wendt; cf. Ps 33⁹.

and gave them great prominence in His instruction. Mercy is twofold: subjective and objective. Subjectively, mercy requires that a man shall be loving and forgiving towards all; not revengeful nor cherishing ill-will; not thinking evil of others (Mt 18²¹⁻²³, 1 Co 13⁴⁻⁷, Eph 4³¹). Objectively, mercy requires that a man shall show deep, inexhaustible sympathy with all his fellows, manifesting itself in unrenitting, helpful service, and in a loving consideration towards all (Mt 5⁴³⁻⁴⁸ 9¹⁰⁻¹³ 12⁷ 25³¹⁻⁴⁶, Lk 10²⁵⁻³⁷ 16¹⁹⁻³¹, Ro 12⁹⁻²¹, Gal 5²²⁻²³, Col 3¹²⁻¹⁴, 1 Jn 3¹⁴⁻¹⁸). It is striking that in the Beatitudes no specific mention is made of love, although love (towards God and man) is proclaimed by Jesus as the sum of all duty (Mt 22³⁷⁻⁴⁰, cf. Ro 13⁹⁻¹⁰, Gal 5¹⁴). And farther on in the Sermon, at Mt 5⁴³⁻⁴⁸, the duty of love is explicitly taught. But the fact is, that although the term 'love' does not appear in the Beatitudes, yet the idea of love underlies every one of them. Roughly grouped, the first four concern love to God, the last four love to men. All that the eight Beatitudes contain is but an application of the principle of love to the most important aspects of life, formulating more specifically what love requires in the essential experience and relations of human existence.

The mercy of God precedes the mercy of men, and is its prototype. Inasmuch as God is merciful towards men, He rightly requires that men shall be merciful towards one another. In the parable of the Unmerciful Servant this is most impressively taught, Mt 18²¹⁻³⁵. And as the last verse of the passage sets forth, unless men show mercy in their relations to each other, God cannot ultimately deal mercifully with them; cf. also Mt 6¹²⁻¹⁵, Mk 11²⁵, Eph 4³², Ja 2¹³. This is not retaliation on God's part. If it seems severe, it is yet a necessary provision to the end that love may triumph in His world. If love is to transform all and to reign supreme, then what is unloving must disappear.

(6) 'Blessed are the pure in heart: for they shall see God.'* The phrase 'pure in heart' occurs in Ps 73¹ *כִּי לֹבֵן לֵב, LXX τοῖς ἐσθέραις τῇ καρδίᾳ* and in Ps 24⁴ *כִּי לֹבֵן לֵב, LXX καθαρὸς τῇ καρδίᾳ*; cf. also Ps 51¹⁰. In the NT the phrase is only twice used (1 Ti 1⁵, 2 Ti 2²²), although the thought is all-pervasive. The term *καρδία*, corresponding to the Hebrew *לֵב* and in the NT deriving its signification therefrom, denotes the essential personality, the inner central self, where all feeling, thought, and action originate.† In its dative form here it indicates the sphere in which the purity is predicated, like τῷ πνεύματι in the first Beatitude. By 'purity of heart' is meant that profound sincerity and uprightness of thought and feeling which produces an honest, clean, holy life in all its elements and relations. It does not need to be said that this condition of things can exist only where the individual is committed, body and soul, to the love and obedience of God, and regards all men as his brethren and himself as a sacred trust. Jesus has in mind the superficial standards of goodness which prevailed in His day. The rich young man had kept all the commandments from his youth, and yet his heart was set upon his material possessions (Mk 10¹⁷⁻²¹); the Pharisees outwardly appeared righteous unto men, but within they were full of hypocrisy and iniquity (Mt 23²³⁻²⁸). Against such shallow, false conceptions of right living, Jesus most emphatically sets the duty of real righteousness, of purifying the fountain of a man's life in order that what flows from it may indeed be pure.

That the 'pure in heart' 'shall see God' is an

* Mt 5⁸ *μακάριοι οἱ καθαροὶ τῇ καρδίᾳ, ὅτι αὐτοὶ τὸν Θεὸν ὄψονται*. Luke has no parallel.

† See Wendt, *Lehre Jesu*, II. 116-121; Cremer, *Bibl.-Theol. Wörterbuch* 7 (1892), in loc.; art. HEART in vol. II.

essential result of their character, not a mere unrelated reward for their goodness. Nor is this seeing of God a solely eschatological event; for, while the perfect vision of Him belongs to the future, there is a present vision which increases day by day with the growth of the pure in heart. Seeing God is, of course, not a physical process, but a spiritual one; it is to enter into full communion with Him, to be spiritually in His immediate presence and to be at rest there, to share directly His favour, joy, and blessings. The phrase to 'see God' arose in ancient Hebrew usage out of the fact that men counted it a supreme privilege to come into the presence of an earthly king (1 K 10⁸, Est 1¹⁴); * how much more would it mean to come into the presence of the King of kings! The hope of such a vision of God grew with the development of the Hebrew religious conceptions, and became the rapturous aspiration of the OT saints (Ps 117 'the upright shall behold his face'; 17¹⁵ 'As for me, I shall behold thy face in righteousness; I shall be satisfied, when I awake, with thy likeness'). In the NT also the aspiration, now become a certainty, reappears (1 Jn 3² 'we shall see him even as he is'; He 12¹⁴, Rev 22⁴); the veil of the temple has been rent in twain (Mt 27⁵¹), for in and through Christ men have immediate access to God. This standing in the very presence of God, this direct communion with Him and direct responsibility to Him, is more than a theological theory—it is an actual and essential fact of the utmost practical significance. God is not an absentee ruler, who can be dealt with only through intermediaries; on the contrary, those who love Him live in His presence, rest in His care, receive His blessings, and participate in His joy.

(7) 'Blessed are the peacemakers: for they shall be called sons of God.'† The term *εἰρηνοποιός* occurs in the LXX form of Pr 10¹⁰, and the thought is present also in Pr 12²⁰. But 'peace' was not so common an OT idea as those dealt with in the previous Beatitudes. Some have maintained that the meaning of *εἰρη* in this passage is exclusively passive, i.e. 'peaceable.' But the mass of interpreters find a larger meaning, which includes this while containing also an active element—to make peace.‡ Certainly Jesus' idea here is comprehensive; He has in mind to commend and to inculcate the spread of peace—all kinds of peace—among men (cf. He 12¹⁴, Ja 3¹⁸). In this He is the great leader and example, Mt 11²⁹, Jn 14²⁷ (the paradox, Mt 10³⁴), Eph 2¹⁵⁻¹⁸, Col 1²⁰ 3¹⁵; for God is the God of Peace, Ro 15¹³, 2 Co 13¹¹, Ph 4⁷⁻⁹, 1 Th 5²³, He 13²⁰, who sent peace to the earth in Christ, Lk 2¹³⁻¹⁴. Peace between God and men was proclaimed by Jesus, and peace between men and their fellow-men was enjoined. Peace therefore is the Christian ideal. Individual composure and social harmony are to be brought about by the concentration of all interests and forces on the achievement of the individual and social ideal as taught by Christ, and by the realization, within one's self and among all, of those Divine principles of concord and co-operation through which alone true peace can be obtained.

The peacemakers 'shall be called sons of God' because in this essential characteristic they are like Him, the God of Peace. The fact that the article does not accompany the *οἱ* signifies that

the designation is to be understood qualitatively. This idea of sonship as consisting in moral resemblance is of Hebrew origin, and is found in both Testaments; cf. esp. Mt 5⁴⁸, Rev 21⁷. The expression 'called' sons of God is also a Hebraism, found frequently in the Book of Isaiah; its special function here seems to be to emphasize the fact of sonship (cf. Mt 5¹⁹, 1 Jn 3¹) as something not only true, but recognized to be true.

(8) 'Blessed are they that have been persecuted for righteousness' sake: for theirs is the kingdom of heaven. Blessed are ye when men shall reproach you, and persecute you, and say all manner of evil against you falsely, for my sake. Rejoice and be exceeding glad, for great is your reward in heaven: for so persecuted they the prophets which were before you.* Although the essence and purpose of the gospel was peace, nevertheless those who enjoyed and endeavoured to spread this peace in the world would incur reproach and abuse from their fellow-men. The OT does not supply passages similar in form to this Beatitude, but the Hebrews had no lack of experience in persecution for righteousness' sake, and the conception is developed with marvellous insight and feeling in Is 40-66. In the NT it is an ever-present idea—the sufferings of the OT saints are recalled (He 11³³⁻⁴⁰), Jesus lives and dies a martyr to this principle, He predicted persecution for His followers (Mt 5¹⁰⁻¹², Jn 16²), and this persecution actually befell them (Jn 9²², Ac 5⁴¹ 8¹⁻³, 1 P 3¹⁴ 4¹⁴⁻¹⁶). The primitive Christians bravely endured and faithfully preached when they were despised, ostracized, punished, and maliciously slandered.†

* Mt 5¹⁰⁻¹² μακάριοι οἱ διδιωγμένοι ὑπὸν δικαιοσύνης, ὅτι αὐτοὶ ἔσονται ἡ βασιλεία τῶν οὐρανῶν, μακάριοι ἰσχυροὶ ὅταν ἐνδιώκωσιν ὑμᾶς καὶ διώκωσιν καὶ εὐνοίαν πᾶν πονηρῶν καὶ ὕμῶν ψευδόμενοι ὑπὸν ἡμῶν. χαίριτε καὶ ἀγαλλιᾶσθε, ὅτι ὁ μισθὸς ὑμῶν σκόδι ἐν τοῖς οὐρανοῖς. ὅτι οὕτως ἐδίωξαν τοὺς προφῆτας τοὺς πρὸ ὑμῶν. Lk 6²²⁻²³ μακάριοι ἰσχυροὶ ὅταν μωχθῶσιν ὑμᾶς ὁ ἄνθρωπος, καὶ ὅταν ἐκφοβῶσιν ὑμᾶς καὶ ἐκδιώκωσιν καὶ ἐβλαβῶσιν τὸ ὄνομα ὑμῶν ὡς πονηρῶν ἵνα σὺ υἱὸς τοῦ ἀνθρώπου. χαίριτε ἐν ἰσχυρί τῇ ἡμέρᾳ καὶ ἐκτρέψατε. ὅτι ὁ μισθὸς ὑμῶν σκόδι ἐν τοῖς οὐρανοῖς. καὶ τὰ αὐτὰ γὰρ ἔποιον οἱ προφῆται οἱ παῖδες αὐτοῦ. With regard to these two reports of what must be regarded as a single utterance, two things are to be said: (1) the corresponding Lukan Beatitude 6²²⁻²³ is parallel not to Mt 5¹⁰, but to Mt 5¹¹⁻¹². It is suggested above that 5¹⁰ and 5¹¹⁻¹² may be duplicates, the one or the other passage appearing here through the process of compilation. Since one feature of the Beatitudes was their brief, striking form (like the Ten Commandments of the OT), the original eighth Beatitude must have contained few words, and 5¹⁰ is closely parallel in form to the preceding seven Beatitudes; both of which things favour its originality. In Luke also the last Beatitude is very long compared with the others. Perhaps, therefore, Mt 5¹¹⁻¹² and Lk 6²²⁻²³ are varying words from one historical saying, introduced here by a transmitting or editorial hand because of their close similarity in thought to that of the eighth Beatitude. Or another view would be that Mt 5¹¹⁻¹² is an expansion of the idea contained in Mt 5¹⁰ by Jesus Himself (or possibly by some subsequent Christian teacher when the persecutions actually came upon the Christians); for the essential thought of the three verses is the same, the general conception of persecution in v. 10 being expanded in vv. 11-12 into the specific ideas of verbal abuse, hostile acts, and false reports. (2) The Lukan form of this Beatitude is in several respects secondary in character, i.e. it shows greater departure than Matthew's from the probable original form of the utterance. These modifications arose out of a freer handling in transmission, a partial conformity to the new Gentile field in which the material circulated, and a greater yielding to the influence of the actual events of persecution in the Apostolic age. The term *μωχθῶσιν* is used in a characteristic Lukan way, cf. Lk 14²⁸ 16¹³ 21¹⁷. The *ἐβλαβῶσιν τὸ ὄνομα ὑμῶν ὡς πονηρῶν*, as also the *ἐκφοβῶσιν*, refer to the excommunication of the Christians as heretics from the synagogues and other Jewish relationships—things which actually happened, but which the Matthew passage does not specifically predict. The *ἵνα σὺ υἱὸς τοῦ ἀνθρώπου* of Luke. Lk 6²³, first clause, seems modified. And Lk 6²³, last clause, shows various secondary elements, due to the denationalizing of the material. These phenomena are constant throughout Luke's Gospel as compared with Matthew's.

† The *ψευδόμενοι* of Mt 5¹¹ is attested by MBOE and the majority of witnesses; it is omitted by D and certain other witnesses of the 'Western' text. The word is therefore commonly accepted here. But if the new claims for the 'Western' type of text have good foundation, it is not impossible that this *ψευδόμενοι* is, in the terminology of Westcott-Hort, a 'Western non-interpolation.' Jesus, of course, implied the thought which

* On the 'vision of God' as held by Philo, see Schürer, *Geschichte d. Jüdischen Volkes* (1898), vol. iii, p. 561.

† Mt 6⁹ μακάριοι οἱ ἐμωχθῶντες, ὅτι [αὐτοὶ] υἱοὶ υἱοῦ πληθύνονται. Luke has no parallel.

‡ For the passive sense only, Grotius, Socinus, Wetstein, and recently Ibbeken, *Berypredigt*, p. 43. For an active meaning also, Luther, Meyer, Tholuck, Bleek, Achelis, H. Holtzmann, B. Weiss, and the RV. Others incorrectly regard the 'peace' mentioned as that obtained by the atoning work of Christ; so Chrysostom, Stier.

And in this conduct they were richly blessed—not by the persecutions, but through them; for Jesus, of course, did not mean that persecutions are essential to the development of the ideal life, but only that, where outward circumstances are such as to induce them, they are blessed who steadfastly and joyfully glorify the Gospel. The *ἐπεκεν δικαιοσύνης* of Mt 5¹⁰ and the *ἐπεκεν ἐμοῦ* of the following verse are synonymous. The persecutions which would afflict Jesus' disciples were to be met in carrying forward the work which He had begun; if they lived as He lived, and taught as He taught, they would experience the same treatment as He had received (Jn 7¹⁵, 15¹⁸, 17¹⁴). Had He not been a true successor of the OT prophets in suffering for righteousness' sake (Mt 5¹² 23³⁴⁻³⁵)? With the advancing centuries the kind of persecution directed against Christianity has changed, and the amount has lessened; but Christian people can never expect to be free from misinterpretation, ridicule, and abuse until all men become devoted to the righteousness and truth for which Christianity stands. And this Beatitude promises the highest blessings to those who in trust, patience, and forgiveness uphold the Gospel, and allow the persecution to fulfil its own true mission in their lives and in the Church (He 12⁵⁻¹¹).

These promised highest blessings are denoted here by the term 'the Kingdom of Heaven,' so that in the eighth Beatitude Jesus has returned to the promise which accompanied the first Beatitude. This conception of the Kingdom of Heaven is the inclusive one, since it comprises all conceivable good and brings absolute well-being. The phrase 'great is your reward in heaven,' which appears in Mt 5¹²=Lk 6²³, is practically one in meaning with that of Mt 5¹⁰ 'for theirs is the Kingdom of Heaven.'* The term 'reward' (*μισθός*) was taken over into the Gospel from the commercial, *quid pro quo* terminology of legal Judaism; its legalistic designation had therefore to disappear, and now it was a term to express those gracious spiritual blessings which are at hand and in store for the true children of God. In this Beatitude, then, is promised 'the Kingdom of Heaven' and 'great reward,' but not the Kingdom of Heaven *plus* some additional reward, since the Kingdom itself contains all the good which men can receive.

b. The World Mission.—Mt 5¹³⁻¹⁶ (cf. Lk 11³³ 14³⁴, 28).† The connexion of these verses with those which precede is close. Men of such character and conduct as Mt 5²⁻⁹ has described will assuredly meet with opposition and calumny, Mt 5¹⁰⁻¹²; but they must not on this account go into hiding—rather must they stand forth, endure persecution, and uphold the Gospel standard in the world, Mt 5¹³⁻¹⁶. Salt is a preservative element, light is a life-giving one;‡ both were current

figurative terms for spiritual realities. Men who appreciate the Divine ideal of life which Jesus has presented in the Beatitudes, and who strive to attain it, are God's chosen instruments for the realization of His purpose in the world. They are to live and to work among men, where their character and their deeds may exert their full, true influence. The Christian is not permitted either to withdraw himself from the world, or to live an isolated, unprofessed religious life in the world. He must not only himself be good and do good; he must also help others into the appreciation and the attainment of the same ideal. Salvation is not merely individual; it is social as well. Until Christians do the most and the best they can with themselves and for all others, they are not faithful to the mission which Jesus has laid upon all of His followers, and the consummation of God's Kingdom is in so far delayed.

c. Relation to the Old Testament.—Mt 5¹⁷⁻²⁰ (cf. Lk 16¹⁷). The logical relation of these verses to what precedes is clear: Jesus has set forth the new Gospel norm of life (5²⁻¹²), and has enjoined His followers to live this life openly before the world (5¹³⁻¹⁶); now He proceeds to show the relation of this new Gospel norm to the Hebrew norm of life which in the OT had come down through the centuries and now held the field among His countrymen. Since Jesus' ideal differed so much from the current scribal standard (as any one could see), the question easily arose—not only among His opponents, the religious leaders of the day, but also among those who 'heard him gladly'—whether this revelation of God's will by Jesus was a wholly new revelation superseding that made by Moses and the Prophets. Jesus gave the answer to this question when He said, 'Think not that I came to destroy the law or the prophets: I came not to destroy, but to fulfil.'

Ph 2¹⁵, 1 Th 5⁵. The phrase of v. 16 *ὅτι εἰς ὑμᾶς*, means either 'the light which is intrusted to you,' viz. the Gospel (so H. Holtzmann, B. Weiss), or 'the light which you are,' as in v. 14.

* Mt 5¹⁷ *μὴ νομίζετε ὅτι ἦλθον καταλῦσαι τὸν νόμον ἢ τὰς προφῆτας: οὐκ ἦλθον καταλῦσαι, ἀλλὰ πληρῶσαι.* The customary phrase, *ὁ νόμος καὶ οἱ προφῆται*, is a phrase which arises from the Jewish designation of the OT literature, the *νόμος* designating the first five books, the *προφῆται* the remainder; while the whole phrase denotes the OT in its entirety and its unity. It is noticeable that in Mt 5¹⁷ we have the disjunctive particle *ἢ* instead of the usual *καὶ* in this phrase. The variation is probably intentional, introduced in order to suggest that the Law and the Prophets were distinct portions of the OT, and that a different attitude might be assumed by the same person towards the two divisions—He might abrogate either one without the other, but He wishes to abrogate neither (so Tholuck, Meyer, Ibbeken, Bruce, Wendt, B. Weiss).

While Jesus mentions 'the Prophets' in 5¹⁷, He does not again refer to them throughout the whole following section, 5¹⁸⁻⁴⁸. All that He goes on to say pertains to the Law; He does not present any similar illustrations of how the teaching of the Prophets is to be perfected. This silence concerning the Prophets is explained in different ways. Achelis (*Bergpredigt*, p. 79) thinks that if what He said was true of the Law, that He came not to destroy but to fulfil, a *fortiori* it was true of the Prophets. The more common explanation is that He passed by the Prophets in the remainer of His teaching at this point because He was much more in accord with them, and because the contemporaneous religious teachers paid so little attention to the Prophets that He did not come seriously into conflict with them concerning the prophetic teaching. Recently Professor Briggs (*Expos. Times*, viii. 898) has argued that Mt 5¹⁷ as given by Jesus stood, 'Think not that I came to destroy the law: I came not to destroy but to fulfil,' for 'the Evangelist added "the Prophets" in order to make the statement refer to the whole OT. This addition destroys the measure of the line, and has nothing in the context of this discourse or in the experience of Jesus to justify it. He was constantly charged with violating the Law, but nowhere with destroying the Prophets.' Bacon takes a similar view (*Sermon on the Mount*, pp. 87, 176). This hypothesis is worthy of consideration. The words *ὁ νόμος καὶ οἱ προφῆται* might easily have been introduced subsequently to round out the original utterance of Jesus, for of course He did come to fulfil both Law and Prophets; even though on this historical occasion He had spoken only of the Law, His attitude towards which was liable to be misunderstood and needed careful explanation. The material contained in the First Gospel has perhaps been retouched at several points to show Jesus as the fulfiller of the entire OT, and especially of the Prophets; the

it contains, but it was quite superfluous to express it, and its expression disturbs the proper emphasis in the saying. The word is much more likely to have been added later (as a practically useful expansion) than to have been excluded.

* On the NT term 'reward' see B. Weiss, *Bibl. Theologie des NT* (1896), § 32; Tholuck, *Bergpredigt*, pp. 99-101 (Eng. tr. p. 101 f.); Achelis, *Bergpredigt*, pp. 52-53.

† This section is regarded as not belonging to the original Sermon by Feine, H. Holtzmann, B. Weiss, Wendt, Bartlett, Bacon; it is defended by Achelis, Meyer, Tholuck, and most commentators. If the theme of the discourse is comprehensive, as maintained above, these verses supply a logical and useful portion of the whole treatment given it.

‡ The exact function of salt which Jesus had here in mind is somewhat uncertain: was it its quality to save from decay, as in 2 K 2¹⁹⁻²⁰ (so Meyer, B. Weiss), or its quality as a pleasing condiment, as in Job 6⁶, Col 4⁶ (so Bleek, H. Holtzmann), or its ritual function as developed in the ancient sacrificial system, cf. Mk 9⁴⁹⁻⁵⁰ (so Achelis, Keil, Tholuck, *Bergpredigt*, pp. 102-106 [Eng. tr. pp. 105-109])? The second of these views is perhaps too shallow for this passage, and the third too complex, too erudite; it seems a simpler and stronger utterance when the salt is conceived in its fundamental property of a preservative. The other metaphor, light, is one of the most common religious expressions, cf. esp. Is 42⁸ 49⁶ 60^{1,2}, Jn 1⁹ 8¹² 12³⁵, 46, Eph 5⁸.

Jesus' constant warfare during His ministry was not so much against the OT standard of life in itself as against the interpretation of the OT standard which was held and taught in His day. For hundreds of years the priests and scribes had been busily engaged with the legal literature of their religion. These labours had resulted in an elaboration and externalization of the Law; so that when Jesus came the current Jewish teaching was in some respects extremely perverse: (1) it largely ignored the Prophetic portion of the OT, which was the very soul of the Hebrew history and Bible; (2) it exalted legalism until Judaism had become a system of precepts for the performance of an innumerable series of great and small duties which few could know and none could fully obey; (3) it so externalized the Law that religion came to consist chiefly in the observance of minute ceremonial performances, while the internal, spontaneous, and genuinely spiritual elements of the Law were neglected or ignored. Against this scribal abuse of the OT, Jesus had on many occasions to assert himself, and He did so with vehemence. He would not keep their fasts (Mk 2¹⁸); He would not observe the Sabbath according to their code (Mt 12¹⁻¹⁴, Mk 2²³⁻²⁸, Jn 5¹⁶⁻¹⁸); He denounced, with a true prophetic insight and indignation, their whole legislation regarding the ceremonially clean and unclean (Mt 15¹⁻²³, Mk 7¹⁻²³, cf. Is 1¹⁰⁻¹⁷, Mic 6⁴⁻⁸); He continually associated with the sinful and the despised who did not keep the Law, in order to do them good (Mk 2^{16, 17}). Such an attitude on Jesus' part towards the teaching of the scribes and Pharisees was involved in His introduction of a higher standard. In this attitude He was not, in fact, opposing the OT; rather, He was defending it against the false interpretation which had become current. Nevertheless, and quite naturally, the Jewish leaders identified their conception of the OT with the OT itself—how could they be mistaken about it? Therefore Jesus was a traitor to the religion, the history, and the literature of the race; He richly merited a traitor's death. It seemed to them logical and conclusive, because in their bigotry they regarded their own ideas and interpretations as heaven-penetrating and infallible. To be sure, Jesus' teaching went much deeper than the mere removal of the rubbish which had accumulated about the OT during the preceding centuries; His work did not consist solely in re-establishing the OT as it came from the hands of its makers. But had the Jews been true to the OT in the breadth and height of its teaching, they would have welcomed Jesus instead of rejecting Him; they would have been prepared to appreciate and to receive the fuller revelation of God's will which He brought into the world.

That His Gospel was a fuller revelation, Jesus made abundantly plain. He did not re-enact the Ten Commandments, but only re-established the principles which underlay them (Mt 22³⁴⁻⁴⁰). He abrogated such provisions and implications of the Law as were adapted only to the earlier stages of civilization, thus: mere external conformity to statutes regarding moral conduct, Mt 5^{21-24, 27, 28}; divorce, 5^{31, 32}; the use of oaths, 5³³⁻³⁷; the practice of retaliation, 5³⁸⁻⁴⁰; the pride of race, which made men despise other nations, 5⁴³⁻⁴⁶. In these matters, which He dealt with as specimen cases, Jesus revealed an attitude, a method, and certain principles which He intended to be applied to the OT through-

phrase 'the law and the prophets' is a favourite one in Matthew, compare 7¹² with Lk 6⁴¹; 22⁴⁰ with Mk 12³¹, Lk 10²⁸. But to this argument it may be replied that the Gospels of Mark and Luke, being written for use among the Gentiles, incorporated tradition from which many of the distinctly Jewish elements and phrases actually employed by Jesus had been removed in the interest of a universal Gospel

out.* He did not repudiate the past, He did not even break with the best which the past had produced; He only developed and perfected the high ideal of life which had found embodiment in the Hebrew Bible. He did not set the seal of absolute duty and truth upon all that the lawgivers and prophets had taught, but He took up and reaffirmed the essential ethical principles and religious ideas which the Hebrew lawgivers had endeavoured to formulate and the Hebrew prophets had endeavoured to instil into the lives of men. That Jesus regarded His own revelation of the will of God as immeasurably superior to that contained in the OT is most strikingly expressed when He says, 'Verily I say unto you, Among them that are born of women there hath not arisen a greater than John the Baptist; yet he that is but little in the kingdom of heaven is greater than he' (Mt 11¹¹, cf. also Mt 13¹⁷). To the same effect is Mk 2^{21, 22} 'No man seweth a piece of undressed cloth on an old garment; else that which should fill it up taketh from it, the new from the old, and a worse rent is made. And no man putteth new wine into old wine-skins; else the wine will burst the skins, and the wine perisheth, and the skins.' Full of a similar meaning, also, is Jesus' parabolic statement in Mt 13³² 'Every scribe who hath been made a disciple to the kingdom of heaven is like unto a man that is a householder, which bringeth forth out of his treasure things new and old.'†

When, therefore, Jesus says, 'I came not to destroy, but to fulfil' (Mt 5¹⁷), He places in our hands the key to His relation to the OT; and bids us see the continuity of God's purpose among men, the eternity of right and truth, and the absolute certainty that the Divine ideal is to develop and triumph in the world. In these words is comprised all that Jesus was, and did, and taught; they describe His mission. And He felt Himself competent to perform this mighty work, this manifestation of God to men, because He knew Himself to be chosen by God and qualified by Him for the conveyance of this revelation. Since He was superior to all previous revealers of God, He was capable of passing judgment upon their teachings; He was appointed to pronounce what elements in those teachings were of permanent and what of transient value. And it was also His mission to unify, to perfect, and to establish the whole sum of religious and ethical ideas among men. For this service He had the

* Jesus attacked existing ideas, practices, and institutions only to the extent absolutely necessary for the establishment of His gospel. Many of the evils and wrongs of society He did not attempt to correct, many of the current misconceptions He left for subsequent teachers to remove. His purpose was to transform mankind, not to produce a social or political revolution, and He saw most truly that this transformation was a process for which abundant time must be allowed (Mt 13³⁴⁻³⁵, Mk 4²⁶⁻²⁹). His work was not destructive but constructive, not negative but positive, as all true work for the world is. Progress involves the putting aside of old bottles for new, the correction of false ideas and practices, the clearing away of spurious accretions, the defeat of those who counsel stagnation; but no one who follows Jesus' example in advancing the Kingdom will labour exclusively, or even primarily, to overthrow the false; rather will be lovingly and trustfully devote himself to the establishment of what is true. There is a radical difference between a critical and a helpful attitude in one's work for the world.

† On the interpretation of Mt 13³² see particularly Wendt, *Lehre Jesu*, ii. 340.

‡ St. Paul's conception of the relation between the Law and the Gospel is the same as that of Jesus, as may be seen in the Epistles to the Romans and Galatians. In Ro 3³¹ St. Paul claims not to annul but to establish the Law; not in form and letter, but in substance and spirit. This is to acknowledge the great law of progress, or development, in the universe. An acorn fulfils its mission not by remaining an acorn, but by growing into an oak. A child fulfils its mission not by remaining a child, but by becoming a man. So the OT Law was fulfilled and established not by continuing in literal force when men were ready for something better, but by becoming in due time through Christ a perfected revelation (cf. Gal 4^{4, 5}), adapted to the higher needs and possibilities of mankind. On the attitude of Jesus and St. Paul towards the Law, see esp. art. LAW IN THE NT in vol. iii.

Divine ideal within Himself, and needed no external criterion.

So that there seems no room for a difference of opinion as to what Jesus meant by saying that He came to 'fulfil' the Law and the Prophets. He could not have meant that He would secure the literal accomplishment of everything hoped for and promised in the OT, as though the OT simply presented a programme which it was His mission to carry out. Nor could He have meant that He would secure the complete, literal observance and performance of all that is commanded in the Law and the Prophets. He neither did nor attempted to do the one thing or the other. If His Jewish hearers might at first understand Him to promise that in 'fulfilling' the Law and the Prophets He would reaffirm their authority, and render and secure absolute obedience thereto, He yet explicitly and emphatically provided against such a misconception of His words by what He immediately adds in vv. 12-14. Jesus could only have meant that He came to 'fulfil' the Law and the Prophets by first perfecting them and then accomplishing them.*

In accordance with this view of Jesus' thought in Mt 5:17 must be interpreted His words in Mt 5:18. The former, v. 12, seems to say: I affirm most emphatically that to the end of time† the OT Law, and every portion of that Law, shall remain and shall be actually and completely realized. The latter, v. 13, seems to say: The minute observance and inculcation of this OT Law, in every statute and in every detail, is literally and strictly required of every member of the Kingdom of Heaven.‡ Now

* This is now the generally accepted interpretation. Tholuck, *Bergpredigt*, pp. 124, 126 [Eng. tr. pp. 125, 127]: 'So Christ has come to perfect, to fill up with religious knowledge and life, all that in the OT revelation existed only in outline. . . . That the fulfilling was merely an external supplementing or improvement of the Law cannot be admitted' (see Tholuck's entire discussion of Mt 5:17, pp. 113-131 [Eng. tr. pp. 115-131]). Bruce, *Expositor's Greek Testament*, 1: 104: 'He brings in a law of the spirit which cancels the law of the letter, a kingdom which realizes the prophetic ideals while setting aside the crude details of their conception of the Messianic time.' B. Weiss, *Meyer-Komm.* u. d. *Matth.* p. 102: 'He comes not at all to undo or to abrogate; his mission is a positive one, to provide a new revelation of the will of God, in which he will bring to perfection all God's revelations and plans of salvation.' Feine, *Jahrb. f. Protest. Theol.* 1885: 'Thus he says that no essential difference exists between the OT revelation and his message of the Kingdom, but that there is a close continuity between them; true religion, presented as an ideal in the OT, is now realized, and the Gospel is the fulfilment of the OT prophecy.' Wendt, *Lehre Jesu*, ii. 338 f.: 'He would say that he recognizes in the Law and the Prophets a true revelation of the will of God, and consequently he does not feel called upon to annul its value for others. But at the same time he would affirm that he could not leave just as it stood the presentation given by the Law and the Prophets of this earlier revelation of God's will, and that he would not explain and confirm that revelation in the detailed manner of the scribal teaching; but that instead he would perfect that revelation, so that the OT presentation of the will of God would find its ideal expression' (see Wendt's entire discussion, pp. 333-351). Similarly also Luther, Meyer, Hilgenfeld, Achelis, Bacon, and many others. H. Holtmann, *Comm. d. d. Synoptiker*, p. 104, says, concerning Mt 5:17: 'It is open to question whether during the public life of Jesus so radical an interpretation of His mission could have been formulated, either in the positive sense (cf. Ro 10:4) or in the negative sense.'

† The phrase *ἄχρι τοῦ αἰῶνος καὶ ἄχρι πάντων τῶν ἡμερῶν* does not define a *terminus ad quem*, but means 'for ever', in the sense that He has no pronouncement to make as to a time when the Law shall be no longer valid. So Luther, Calvin, Meyer, Tholuck, Ibbeken, Bruce, B. Weiss: a contrary opinion by Achelis, *Bergpredigt*, p. 84, and Lechler, *SK* 1854. The former view is supported also by the parallel saying in Lk 16:17 *πάντα πάντα ἄχρι τοῦ αἰῶνος καὶ ἄχρι πάντων τῶν ἡμερῶν* (On this passage and its relation to Mt 5:18 see esp. Feine, *Jahrb. f. Protest. Theol.* 1885, pp. 81-85). B. Weiss, *Meyer-Komm.* u. d. *Matth.* p. 104, says that in the phrase 'fill heaven and earth pass away' Jesus 'does not indicate a point after which the Law shall no longer be in existence, but [this] is only a popular expression (cf. Job 14:19) for the permanent authority of the Law. Since Jesus is speaking of what shall take place in the present world-era, he states that the Law can never pass away. But of a continuation of the Law beyond the last world-catastrophe, as referred to in Mt 24:29, nothing is here said.' The second phrase *ἄχρι τοῦ αἰῶνος καὶ ἄχρι πάντων τῶν ἡμερῶν* is parallel to the *ἄχρι τοῦ αἰῶνος καὶ ἄχρι πάντων τῶν ἡμερῶν* in meaning can only be synonymous with it.

‡ Concerning the interpretation of the phrase *ἡ ἡμῶν ἀρχὴ* *πάντα πάντα ἄχρι τοῦ αἰῶνος καὶ ἄχρι πάντων τῶν ἡμερῶν*, B. Weiss, *Meyer-Komm.* u. d. *Matth.* p. 106, says: 'The phrase "one of the least of these commandments" refers not to the Pharisaic distinction

neither of these statements could have been made by Jesus; they are diametrically opposed to both His teaching and His practice. The OT Law, as a system and as a code, He distinctly set aside, to supersede it with a Gospel dispensation. It was the spirit, not the letter, of the Law which Jesus approved and continued; the high conceptions of God and man and the noble principles of moral obligation which are taught in the OT, Jesus reaffirmed as true and perpetuated for ever. Do these verses then contain some inconsistent elements, or can their apparent inconsistencies be explained away? The commentators have commonly been satisfied with thinking that these difficult statements in vv. 12-13 could in some manner be harmonized with Jesus' other teaching and His general attitude towards the OT. Some have attempted to show how the Law in every branch and in all its minutiae was fulfilled in Christ; * others have maintained that Jesus had reference to the Law only on its ethical side and in general, the ceremonial and predictive elements in the Law being passed over; † and still others, having regard to Jesus' frequent use of hyperbolic language, have held that these verses contain hyperbolic statements, the hyperbole being used not to deceive, but to impress the truth he wished to convey.‡ But an increasing number of scholars have come

between small and great commands; since Jesus has in v. 18 denied that there was any such distinction in fact, the reference can only be to such commands as seem less important to superficial observation. But these also stand in real organic union with the ideal contents of the whole.' On the contrary, Achelis, *Bergpredigt*, p. 91: 'It is Jesus himself who here makes the distinction between great and small commandments, and in so far he recognized the Pharisaic (later rabbinic) distinction which was the object of their ardent efforts in spite of their tendency to regard unessential things as essential.' The difficulty of regarding the words of this verse as coming from Jesus in just their present form is great. He did make a distinction in values and obligations, cf. Mt 23:23: 'Woe unto you, ye scribes and Pharisees, hypocrites! for ye tithe mint and anise and cummin, and have left undone the weightier matters of the law, judgment, and mercy, and faith: but these ye ought to have done, and not to have left the other undone'; see also Mt 23:23-40.

* See particularly Tholuck, *Bergpredigt*, pp. 142-146 [Eng. tr. pp. 141-144], who holds that 'more than the moral law is included here, as the expression *ἡ ἡμῶν ἀρχὴ* shows; while v. 19 indicates that the fulfilment here spoken of extends to all the *ἡμῶν ἀρχὴ*. To limit the meaning of the verse to the ethical law is accordingly inadmissible. . . . The Redeemer can have spoken of the necessity of a fulfilment of the ritual law only in its pedagogical and typical symbolical character.' This fulfilment was accomplished 'in His own sacrificial death, in which the shadowy outline of the OT sacrifices was filled up, and their idea realized (He 10:1)'. Similarly, 'the idea of the theocracy is realized in the Church; of the priesthood, in the Christian people; the passover, in the Lord's Supper; circumcision, in baptism; the command to avoid the dead and the ceremonially unclean, in avoiding the morally dead and unclean, etc.'

† Achelis, *Bergpredigt*, p. 78 f.: 'The reference here is not to the Law in respect of its typical prophetic element (e.g. the law of sacrifice), nor to the Prophets in respect of their predictions concerning the Messianic future; but to the Law and the Prophets in so far as they, corresponding to the new demands and promises of Jesus in the first section of the Sermon, embrace the codified demands and promises current in Israel.' Ibbeken, *Bergpredigt*, p. 64, 56: 'That he is thinking here (v. 18) especially of the Ten Commandments, which in the Hebrew original had a very much shorter form than in the modern translations, is evident when he says that not a jot or tittle shall pass away; of these short commands at least, not the smallest part could be taken away. . . . The whole difficulty which is felt in this verse (v. 19) arises from taking the expression "the law and the prophets" too literally, as though Jesus had intended to say that not the slightest detail of the Mosaic law, including the ritual law, should pass away. If he meant this, then his later life and especially his attitude toward the Sabbath law were entirely inconsistent with his words. But the phrase "the law and the prophets" is to be understood here in a much narrower sense, as signifying only the existing legal order of the common moral life, an interpretation which is placed beyond doubt by the repetition of this phrase in Mt 7:12. For if he can say, "All things therefore whatsoever ye would that men should do unto you, even so do ye also unto them: for this is the law and the prophets," then it cannot be denied that in 5:18 he refers only to those commands of the law by means of which the legal order of the common society of men is maintained. Burton and Mathews, *Constructive Studies in the Life of Christ*, p. 101 f.: 'It is evidently the moral teachings of both Law and Prophets that Jesus is speaking of, not the predictions. . . . Jesus declares his devotion to the Law, and its permanence in the new Kingdom. This Jesus could do, although he disregarded or disapproved certain statutes of the Law (for example, respecting fasting, Mk 2:18, 20; clean and unclean meats, Mk 7:18-19; and divorce, Mt 19:9), because he identified the Law with its great principle of love (Mt 7:12 22:37-40). This was to him the Law and the Prophets, and individual statutes were of value and of permanent authority only in so far as they embodied and expressed this central principle. This was just the opposite position from that which the Pharisees took. They gave all heed to the statutes as authoritative in themselves, and lost sight of the principles. Hence the conflict between them and Jesus.'

‡ The figurative language should therefore be interpreted qualitatively, not quantitatively. So apparently, though not

to question the precise authenticity of the utterances as they stand reported in Mt 5:18.¹⁹ The wording of them presents the rabbinical conception of the Law as eternally and literally valid;† the formulae used are those of the rabbinical phraseology. The statements themselves are too likely to be misunderstood and to mislead the hearers. The hyperbole is too much in the direction of the literalism which He was strenuously opposing.

It is not necessary to suppose, nor is it at all probable, that Mt 5:18 was a free composition of a subsequent period. The two verses seem to have a real nucleus of something said by Jesus on this occasion. But a certain Jewish-Christian colouring they may have received in transmission. Jesus may well have used some strong expressions in this connexion, for the purpose of affirming the Divine character and the essential correctness of the OT revelation, and of impressing the duty of members of the Kingdom which He was establishing to recognize and preserve the truth thus entrusted to them. And these words of Jesus, already more conservative than He was accustomed to use in His general teaching, may, through the processes of transmission and translation, have taken on a still more conservative tone than He had given them. When it is remembered that for 15 or 20 years after Jesus' death the primitive disciples had no other conception of the OT than that it was literally and completely in force, Jesus' teaching being only supplementary thereto, it is not difficult to see how these words which dealt with that matter assumed a form and interpretation in accordance with the disciples' conceptions of the relation of the New to the Old Dispensation. In such a transformation of Jesus' words and meaning there would be no intention to misrepresent Him, but rather a conscious purpose to make more definite what they at that time conceived Him to have meant by these utterances. What these verses now say is inconsistent with Jesus' other teaching and with His practice regarding the OT Law; but it is consistent with the primitive Apostolic teaching and practice of the Law, which maintained the former Jewish position, ignoring for a time that constant and significant portion of Jesus' teaching and conduct which was against the literal authority and the permanent observance of the OT.

In the following verse, Mt 5:20, we are again on firm ground. Jesus assures His hearers that the current conception and attainment of righteousness, as taught and practised by the scribes and Pharisees, was entirely insufficient—not enough to admit one to the Kingdom of Heaven.‡ Instead, therefore, of abrogating or diminishing religious requirements, as they charged against Him, He was, in fact, demanding of men a great deal more than they demanded, with all their boasted devotion to the Law. What the character of the Pharisees' righteousness was can be seen in Mt 23:23, Lk

clearly, B. Weiss, *Meyer-Komm. d. d. Mattheum*, p. 104: the jot and tittle 'signify in the concrete-plastic form of Jesus' expression every part of the Law, however small. . . . That Jesus has in mind here only the moral law, not the ceremonial law, is an untenable view. He includes the whole Law, and contemplates an antitypical fulfilment of the ceremonial element in it.' With Weiss agree Tholuck, Achelis, Feine, H. Holtzmann, and others, that a distinction of moral and ceremonial portions in the Law, which could be separately and might be differently viewed, is an entirely modern one, unrecognized by Jesus and His contemporaries.

* So Baur, Strauss, Keim, Wiltichien, Köstlin, Weissäcker, Hilgenfeld, Feine, H. Holtzmann, Schmiedel. Holtzmann, *Komm. d. d. Synoptiker*, p. 106, regards the three verses, vv. 17-19, as an answer of the Evangelist to the Pauline anti-legalism. Feine, *Jahrb. f. Protest. Theol.* 1885, pp. 26-35, argues at length that vv. 18-19 cannot be authentic, but must be Jewish-Christian additions. Bacon, *Sermon on the Mount*, pp. 133-138, rejects v. 18, but thinks that v. 19 can be explained here as it stands.

† The Jews of Jesus' day conceived the Law to be the Divinely revealed will of Jehovah, made known to Moses for the permanent guidance of the people; it could not therefore change or pass away. So Tholuck, H. Holtzmann, B. Weiss (against Meyer, who on the basis of Jer 31:31 thought that the Jews looked for a new law). See also Bar 4:1, To 10: Philo, *De Vita Mosii*, ii. 656; Josephus, *contra Apionem*, ii. 83. *Beresith R.* 10:1 reads: 'Everything has its end, the heaven and earth have their end; only one thing is excepted which has no end, and that is the Law.' *Shemoth R.* 6: 'Not a letter shall be abolished from the Law for ever.' *Midrash Kohelah*, 71:4: '[The Law] shall remain in perpetuity for ever and ever.'

‡ It is difficult to understand how the words of Mt 23:23 can be authentic just as they stand. How could Jesus command the people to render complete obedience to the teachings of the scribes and Pharisees ('All things whatsoever they bid you, these do and observe')? Their teaching was certainly better than their practice, but both were essentially defective and perverse. Jesus characterized the scribes and Pharisees as 'blind,' Mt 23:13-15: His whole mission was concerned with the establishment of an anti-Pharisaic ideal of belief and conduct. So that we seem to have in Mt 23:23, as in Mt 5:18, a certain false colouring of Jesus' language, the modification of His words in transmission to express an ultra-conservative Jewish-Christian conception.

11:27-32 16:14, 18:19-21 18:9-14; their painful shallowness and perversity, in comparison with what they would have been had they lived faithful to the OT teaching, need not here be described. In vv. 17-19 Jesus has explained the relation of His Gospel norm to that of the Law and the Prophets. In v. 20 He has contrasted His ideal standard of life with that of the Pharisees. And now in the verses which follow, vv. 21-48, He illustrates how both the OT and the Pharisaic norms fall short of that Divine ideal for men which He has come to establish in the world. As generally enumerated, these illustrations are six in number, concerning: (1) anger, vv. 21-26; (2) social purity, vv. 27-30; (3) divorce, vv. 31-32; (4) oaths, vv. 33-37; (5) retaliation, vv. 38-42; (6) love for all, vv. 43-48. They illuminate the field of social relations between men by showing what principles are to determine their feelings and their conduct towards one another. These principles we may for convenience designate as the principle of inner righteousness, the principle of unselfishness and forgiveness, and the principle of universal love; although the first comprises really the second and third also.

d. *Inner Righteousness*.—Mt 5:21-37 (cf. Lk 12:58, 16:13). The essential difference between the OT system and the Gospel is that between an external code forced upon one from without and an internal life which first develops character and then manifests itself in conduct. The OT Law told what a man must do and must not do, mainly the latter; although it contemplated right motives, it did not generally formulate them or effect them. A man might 'keep all the commandments from his youth up,' and yet lack some essential element of righteousness (Mk 10:17-22). If it is true that for the childhood of the race an external system of conduct is alone suitable and possible, if a child must be dealt with on the basis of precepts until knowledge, judgment, and conscience qualify him for a basis of principles, the reason for the radical difference between the OT and the NT becomes clear: they belong to different stages of human development. And St. Paul is right in saying that 'when the fulness of time came, God sent forth his Son' (Gal 4:4). The OT was really and properly superseded by the Gospel, which enjoined life by principle, internal as well as external righteousness, true character as well as good conduct, right thinking and right feeling as the source of all that one is and does.

Consequently, Jesus in His teaching, recorded in these vv. 21-48, does not need to distinguish between the OT and the scribal interpretation or elaboration of it, because His teaching supersedes both* and furnishes the one true and sufficient guide to life. The scribes and Pharisees, to be sure, misunderstood the Law and neglected the Prophets, whereby their religious ideas and practices fell far short of the OT standard. Sometimes Jesus tried to make His contemporaries realize this; cf. Mt 15:3-6, Jn 5:45. But Jesus did not renege the Hebrew Bible, even though it was better than Pharisaism. It was His mission to perfect the Law and the Prophets. He therefore let the OT stand as a monument of previous Divine revelation and earlier human development, giving in its stead

* This is the only possible view, notwithstanding Tholuck's elaborate argument, *Bergrede* 5, pp. 156-164 [Eng. tr. pp. 154-159], to prove that Jesus did not offer any 'correction of the Mosaic Law,' as He taught only that 'the righteousness of His disciples must go beyond—not the Mosaic Law, but the legal religion of its representatives' (his italics). That the righteousness of His disciples must exceed the righteousness of the scribes and Pharisees, Jesus has distinctly said in Mt 5:20; but that their righteousness need not exceed that commanded by the Mosaic Law, is a statement which Jesus is not reported to have made. Nor could He have consistently so taught, since He came to fulfil the OT, not by re-enacting it but by perfecting it—which is Tholuck's own view when he is interpreting Mt 5:17.

a fuller and better revelation adapted to a higher stage of the world's progress. Now and then Jesus had occasion to attest the absolute truth and permanent value of much which the OT contained; but these things He regarded as true and valuable, not because He found them in the OT, but because He knew of Himself that they were so. He set up an ideal of religious belief and conduct which was not put together out of the OT (however many resemblances there may have been), or dependent upon the OT for its truth and authority, but was His own creation, resting on the separate foundation of His own immediate perception of Divine truth and human duty. Jesus was not a mere restorer of a former revelation, but a new authority in the field of religion and ethics, the bearer of a new revelation of God to men. This is the explanation of His words, 'But I say unto you' (vv. ²¹₂₁, ²³₂₃, ³²₃₂, ³⁴₃₄, ³⁹₃₉, ⁴⁴₄₄). And this is what the people recognized when they testified that 'he taught them as one having authority, and not as the scribes' (Mt 7²⁹).

Jesus' ideal of human brotherhood is first illustrated by an exposition of the principle which lay behind the Sixth Commandment, 'Thou shalt not kill.' In this Commandment the act of murder was explicitly forbidden, and the Jews conscientiously abstained from murder; they kept the letter of the precept. But there existed also the spirit of the Commandment, the principle on which it was founded, that brethren should not hate one another; for it was out of hatred that murder came. Since the Commandment did not explicitly forbid hatred, men had allowed themselves to cherish anger, hatred, and contempt against others without regarding themselves as disobedient to the Law. Jesus set over against this notion the emphatic teaching that all feelings of anger and hate are in themselves sinful, whether or not they take effect in acts of violence; they fall under the condemnation and punishment of God, since His Kingdom cannot fully come until all men love one another.* And for that reason He adds in vv. ²³₂₃, ²⁴₂₄ that no act of worship, however sacred (such as

* With *ἐν γενέσει* (v. ²¹₂₁) compare LXX of Ex 20¹³, Dt 5¹⁷, *ἐν γενέσει* (v. ²⁴₂₄) refers to the reading and exposition of the OT in the synagogues. *οὐκ ἀπαγορεύεται* (v. ²¹₂₁) is a dative of indirect object, as nearly all scholars (against Ewald, Keim) now hold: 'to the ancients,' i.e. to those who first received the Mosaic Law (so Bleek, Tholuck, Achelis), or to both those who first received it and also subsequent generations (so B. Weiss). *ἐκείνους* (v. ²¹₂₁) refers to the official trial and condemnation of the murderer by the appropriate Jewish court; the punishment was death, Ex 21¹⁴, Lv 24¹⁷, Dt 17¹³⁻¹⁵. *ἀποκρίσεις* (v. ²²₂₂) does not include or deny 'righteous indignation,' which has its proper place, cf. Mt 5²³, Mk 3²⁹, Eph 4²⁶. *ἀνὴρ*, which is read in v. ²³₂₃ by Text. Recept., is not found in MB, and is rejected by modern editors and commentators as a superfluous and weakening expansion. *ἑκάστης* (v. ²²₂₂) means any and every person, as in 5²⁴ 7³ 4⁵ 18¹⁵ 21. The threefold characterization of hatred and punishment in v. ²³₂₃ seems to be cumulative: anger unexpressed, anger expressing itself in contemptuous epithet (*ἡλιθίου* = 'fool'), and anger expressing itself in a term which implies at once lack of sense, character, and piety (*ἡσυχίου* = 'quiet' 1 S 25²⁵, Ps 14¹, or *ἡσυχίου* Nu 20²⁴, Dt 21¹⁸⁻²¹); while the *ἐκείνους* refers to the local Jewish courts (Dt 10¹⁸, Mt 10¹⁷), the *ἐν γενέσει* to the supreme SANHEDRIN in Jerusalem, and the *οὐκ ἀπαγορεύεται* to the Divine judgment and its consequences. It is important to consider, however, that Jesus has used this triple, cumulative form of expression, not for the purpose of distinguishing grades of guilt in hatred, or of indicating how nicely punishment is meted out in accordance with desert, but to make as emphatic as possible His teaching that all hatred is sinful and destructive, for which reason it can have no place among the members of God's Kingdom. So that the detailed interpretation of Mt 5²² is more a matter of historical interest than of practical importance. Bacon, *Sermon on the Mount*, pp. 88¹, 189, 177, adopts the reconstruction of v. ²²₂₂ which was advocated by Peters (*Journal of Bib. Lit.* 1892), according to which he would read the passage: 'Ye have heard that it was said to the ancients, Thou shalt not kill, and whosoever killeth shall be amenable to judgment. But I say unto you, Whosoever is angry with his brother shall be amenable to judgment. [Moreover, it was said,] Whosoever shall call his brother scoundrel shall be amenable to the court. [But I say unto you,] Whosoever calleth him simpleton shall be amenable to the hell of fire.'

they understood the offerings in the temple to be*), was acceptable to God when the formal worshipper cherished ill-will against any fellow-man. The real brotherhood is a paramount religious obligation.

It is doubtful whether vv. ²³₂₃, ²⁴₂₄ are original in this connexion.† Neither does the setting of the parallel passage in Lk 12³³, ³⁰ seem to be the historical one. The saying is figurative, and may be interpreted in either of two ways: (1) it may teach that a man must put away all hatred of others, and be brotherly towards them, in order that he may be qualified to receive God's forgiveness, so Mt 5⁷ 6¹⁴, ¹⁵ 18²¹⁻²⁵, Lk 7³⁶⁻⁵⁰; or (2) it may teach that such banishment of ill-will is a matter of common prudence, in order that a man may get on well in his social relations (this in addition to the truth already stated in vv. ²¹₂₁, ²⁴₂₄ that the putting away of hatred was also a Divine command to men).‡ Either interpretation contains truth, and has a general bearing upon the subject here under discussion in the Sermon.

The second illustration which Jesus uses, vv. ²⁷₂₇, ²⁸₂₈, for inculcating true righteousness in human relations is the Seventh Commandment (Ex 20¹⁴, Dt 5¹⁸). This statute forbade the violation of the marriage union. It was supplemented by the Tenth Commandment (Ex 20¹⁷, Dt 5²¹), which forbade a man to desire another's wife. The two commands together went far towards preserving the peace and purity of the home. Jesus, however, set His own teaching in sharp contrast with even this high teaching of the Seventh Commandment, forbidding a man to look with lustful eyes upon a woman. His demand exceeds that of the OT in two respects: (1) it insists not only upon abstinence from the act, but upon the repression of all wrong thought and desire (in this going much deeper than even the Tenth Commandment); (2) it forbids impure thoughts and desires on the part of any one. For while *γυναικα* and *ἐμοιχεύσας* (v. ²⁸₂₈) might be taken in a limited sense as referring only to those who are married, it is inconceivable that Jesus could have given a different standard for the unmarried; and it is altogether probable that, in setting out the principle and ideal of social purity, He had in mind the whole society in which this principle and ideal must be realized. A narrow interpretation, which would limit His teaching exclusively to what would be wrong for a married man to do or think, would be contrary to Jesus' method and intention. Social purity is an equal obligation of men and women, of married and unmarried. And Jesus clearly had in mind to establish by this teaching the absolute necessity for the Kingdom of pure social thought and conduct on the part of every member.§

* Jesus in speaking to Jews appealed, no doubt often (cf. Mt 6⁵ 17 7¹³ 10⁴¹ 18¹⁷), to their reverence for the temple with its sacrificial system, and to their many religious ideas and customs. In doing so He did not signify that He shared all these ideas and practices with them. Jesus is not reported by the Gospels as ever offering a sacrifice or otherwise taking part in the customary temple worship (cf. Mt 12⁷); He went to the temple, but only to teach. Had the contrary been the case, the First Gospel could hardly have failed to tell of it, because this Gospel is interested to show how close Jesus brought Himself to the Jews of His day.

† They are regarded as compiled material by Neander, Witten, Feine, Godet, H. Holtzmann, Wendt, B. Weiss, Bacon; while all these scholars except Godet and Wendt regard vv. ²³₂₃, ²⁴₂₄ as also extraneous to the Sermon.

‡ For the former view, Jerome, Calvin, Luther, Bengel, and others; for the latter view, Chrysostom, Tholuck, Achelis, H. Holtzmann, B. Weiss, and others.

§ Jesus is not here attempting to define the relative sinfulness of lust and the performance of lust; it would be a perverse and false inference that the former is as bad as the latter, for the lustful look does not produce the fearful consequences which follow the lustful act. What Jesus means is, that the entertaining of impure thought and desire is in itself a heinous sin, quite as bad as men commonly supposed adultery itself to be.

The logical relation of vv.^{29, 30} to the two preceding verses is not close, which has led some scholars to regard them as extraneous matter in this discourse. There are parallel sayings in Mt 18¹⁰, Mk 9^{42, 47}, but in both these places also the passage seems to be only partially relevant. The words are figurative and hyperbolic. Jesus means to say with great emphasis that no effort and no sacrifice* are to be considered too great for a man in his struggle to master his lower nature and to secure the supremacy of his higher, better self. Until a man brings his body into subjection to his spirit, he fails both individually and socially of what God requires of him (cf. 1 Co 6¹²⁻²⁰, Gal 5¹⁸⁻²⁴).

The teaching concerning divorce, contained in vv.^{31, 32}, appears also in connexion with a specific historical occasion in Mt 19³⁻⁹=Mk 10¹⁻¹², while the Lukan parallel 16¹⁸ is entirely unconnected. Not a few modern scholars have come to regard the later Matthean setting as the original one, explaining 5^{31, 32} as an importation into the Sermon for the purpose of bringing Jesus' teaching about divorce into immediate connexion with His general ethical discourse, and also to place side by side what He taught concerning the closely related subjects of adultery and divorce.† This seems the more probable view, but the teaching is the same whether given in the Sermon on the Mount or under some other circumstances. Divorce was a subject of discussion in Jesus' day. The two rabbinical schools headed by Shammai and Hillel, interpreting Dt 24^{1, 2},‡ promulgated different opinions concerning the proper grounds of divorce: the former school was more strict, allowing divorce only in case of adultery and other serious moral offences; the latter school allowed divorce on almost any pretext which the husband might indicate. Remarriage after divorce was considered proper by both schools.§ It was therefore a matter of lively interest what attitude towards divorce would be assumed by the new Teacher, who was independent of both Hillel and Shammai, and had had no rabbinical training. The Pharisees undertook to discover Jesus' position by their question: 'Is it lawful for a man to put away his wife?' (so Mk 10², while Mt 19³ adds 'for every cause'). Jesus in reply (Mk 10³⁻⁴) first directs their attention (if Mark's order is to be followed instead of Matthew's) to the OT teaching on the subject contained in Dt 24^{1, 2}, where divorce and remarriage are allowed for good cause, the divorce being testified by a formal document. But then He goes on to show (Mk 10⁵⁻⁹) that this permission of divorce was only a concession to a low moral stage of the people, that the Divine ideal of marriage as revealed in Gn 2^{23, 24} was an inseparable union of man and wife, both spiritually and physically.|| This ideal

conception of marriage Jesus now solemnly reaffirms and promulgates as His own teaching.

According to Mk 10¹⁰⁻¹² (cf. Mt 19⁸⁻¹²) Jesus subsequently spoke further on the subject in private to His disciples, forbidding remarriage after divorce. This would be a corollary of His previous statement, for separation might not prevent ultimate realization of the marriage ideal between the husband and the wife, while remarriage would effectually prevent such a realization. Much uncertainty, however, exists as to just what Jesus said about remarriage.* The parallel passages to Mk 10¹⁰⁻¹², which appear in Mt 5³² 19⁹, Lk 16¹⁸, are in serious disagreement, and there is also difficulty in determining the best textual reading in some places. These variations indicate an agitation of the subject of divorce among the primitive Christians, and an attempt to formulate Jesus' ideal of marriage into practical rules of conduct for specific cases. The words of Jesus on remarriage, so variously reported, reflect the different views on the subject which were current among the Christians while our Gospels were in process of formation.

The fact seems to be, that Jesus in His teaching concerning marriage is dealing with the principle and the ideal of marriage, rather than enacting legal statutes in regard to it. The whole treatment of His words as marriage legislation, which began with His disciples and has continued to the present day, is a mistake, and has led to confusion, hardship, contradiction, and strife. Jesus here, as always, was setting forth the will of God for men in revealing the purpose and the Divine conception of the institution of marriage. He therefore establishes the ideal of marriage as a perfect, permanent union in body and spirit, and enjoins

* In Mt 5³² 19⁹ there is a striking addition to the words of Jesus as recorded in Mk 10¹¹, Lk 16¹⁸; cf. also 1 Co 7¹⁰ 11. This exceptive phrase *παρρηγοῦ λόγου σωτηρίας* or *μη ἐνί σωτηρίᾳ* is taken to mean that in the case of adultery Jesus explicitly permitted the divorce and remarriage of the innocent party. But this Matthean addition falls under suspicion for four reasons: (1) the Matthean account 19³⁻⁹, with which 5^{31, 32} is probably to be associated, is distinctly secondary and divergent from that of Mk 10¹⁻¹²; (2) this exceptive phrase is significantly absent from the accounts in Mark, Luke, and Paul; (3) the exception is of a statutory nature, while Jesus is establishing the principle and the ideal of marriage; (4) in accordance with Jesus' general teaching, adultery is not *in itself* a sufficient ground for divorce. Consequently, the opinion is becoming strongly supported that these words of the Matthew passages are a mollifying interpretation put upon Jesus' teaching by a generation or group of Christians who took His words as a new marriage legislation, and regarded the statute as intolerably severe (so Bleek, de Wette, Schneckenburger, Bruce, Heinrich, H. Weiss, H. Holtzmann, Wendt, Schmiedel, Bacon). In this case Mark and Luke unite in preserving Jesus' actual words, which laid down a principle and not a statute, leaving the application of this principle, as of others, to be worked out according to the possibilities of the circumstances in any given instance (cf. Mal 2¹⁴⁻¹⁶). Similarly Bacon (*Sermon on the Mount*, pp. 117, 177 f.). Other scholars hold that the exceptive phrase in Matthew is an interpolation, but only states explicitly what was already implied as true in the nature of the case, that the act of adultery actually destroys the marriage union and is the divorce, instead of being merely a proper ground of divorce (so Meyer, Tholuck, E. Haupt, B. Weiss). But adultery cannot be *in itself* a proper ground for divorce on Gospel principles. In a case of adultery, divorce might be necessary if the offending party persisted in this evil conduct, fully regardless of all moral sense and duty. Suppose, however, that after the wrong had been done, the guilty party became truly repentant, and resolved upon a right life henceforth? The Gospel requires mercy rather than justice, love rather than revenge; forgiveness, patience, and long-suffering. The prophet Hosea, in his trying marriage relation, had discovered the Divine principle involved in such cases, and had recognized that in dealing lovingly and forgivingly with a wayward wife he was following God's own method with His wayward children; cf. also Jer 3¹⁻¹⁸. Jesus most impressively taught that love, gentleness, and forgiveness were to characterize the true Christian, even in a case of adultery; for He said to the adulteress: 'Neither do I condemn thee; go, sin no more.' Such teaching seemed to the early Church quite too lenient, so that this incident with its teaching failed to find a place in the Gospels until the 2nd cent., and then not a suitable one. Jesus' treatment of this woman has been lost sight of in the interpretation of His words concerning divorce. The hard spirit of vengeance has ruled men's thoughts rather than the forgiving spirit of love.

* The words are not to be understood literally, as though Jesus enjoined the mutilation of the body. Lust would not be removed by the destruction of the physical eye or hand. Nor do the eye and hand stand for specific kinds of evil desire. These concrete figurative utterances, as so frequently in Jesus' teaching, have only a general purpose to fix and impress one idea of moral duty.

† So Bleek, Olshausen, Köstlin, Godet, Feine, Ibbeken, H. Holtzmann. That the words belong to the Sermon is held by Meyer, Achelis, B. Weiss, Wendt, Bacon, and many others.

‡ In Dt 24^{1, 2} we read: 'When a man taketh a wife, and marrieth her, then it shall be, if she find no favour in his eyes, because he hath found some unseemly thing in her, that he shall write her a bill of divorcement, and give it in her hand, and send her out of his house. And when she is departed out of his house, she may go and be another man's wife.'

§ On the Jewish marriage laws and practice see Josephus, *Ant.* iv. viii. 23; *Vita*, § 76. Also cf. Wünsche, *Erläuterung der Evangelien*, pp. 52-57; Edersheim, *Life and Times of Jesus the Messiah*, i. 352-354, ii. 332-334; Tholuck, *Bergrede*, pp. 227-234 [Eng. tr. pp. 217-221]; and art. MARRIAGE in vol. iii.

|| Tholuck, *Bergrede*, p. 239 [Eng. tr. p. 225], thus states the biblical idea of marriage: 'Marriage is a Divine institution, having for its aim to bring man and woman to an indissoluble unity of body and spirit, that they may thus mutually complement each other, and lay the foundation of a family.'

all the married to strive for the attainment of this ideal. He did not enter into the casuistry of the matter, but fixed the principle. How far in actual ecclesiastic or civic legislation, at any given period or place, the ideal can be practically formulated and demanded, He left for the decision of those upon whom the administration of such matters devolved. Marriage and divorce regulations, upon which the welfare of society so largely depends, must embody the Divine ideal to the fullest extent made possible by the stage of spiritual, moral, and social progress concerned. And Christian people must never fail to apply to themselves this Divine marriage ideal; however low the current conception of marriage may be, or whatever laxity the civic laws may permit, the disciples of Christ can never conduct themselves according to any standard but that set by Him. Not that they must regard His teaching as statutory and divorce as never permissible; but that the act of divorce would be a confession of complete failure to attain His ideal, so that the highest degree of effort, patience, endurance, and self-sacrifice should be used in order to accomplish the permanence and the perfection of a marriage union when undertaken. In addition, Christian people must uphold Jesus' marriage ideal in the world, striving by every means to secure its increasing recognition and realization in society at large. For only in these ways can the Kingdom of God fully come.

The next subject dealt with in the Sermon is the use of Oaths (Mt 5³³⁻³⁷). The oath or vow was a frequent type of expression in all antiquity, and its use has diminished little with the passing of centuries. In its origin the oath was a solemn religious act, in which God—or some object sacred to Him or through Him—was invoked as a witness of the truth of an utterance or the sincerity of a promise, and as an avenger of falsehood and of non-fulfilment of the promise. The use of the oath and vow is recognized and approved in the OT (cf. Ex 22¹¹, Dt 6¹⁸ 10²⁰, Ps 63¹¹, Is 45²³, Jer 4², and He 6¹²⁻¹⁸), and the commands concerning them look towards the preservation of their religious character and solemn function. This was the intent of the Third Commandment, 'Thou shalt not take the name of the Lord thy God in vain' (Ex 20⁷, Dt 5¹¹), in which all misuse of the oath is forbidden, as where an oath is taken thoughtlessly or maliciously, or to cover falsehood.* In the same tenor are Lv 19¹² 'Ye shall not swear by my name falsely, so that thou profane the name of thy God,' and Nu 30² 'When a man voweth a vow unto the Lord, or sweareth an oath to bind his soul with a bond, he shall not break his word; he shall do according to all that proceedeth out of his mouth.'† The form of Jesus' expression in Mt 5³³ takes up the substance, though not the exact form, of these OT teachings. The Jews of Jesus' day made most extravagant use of the oath, both in frequency and in variety; some oaths were regarded as binding and some as not binding, the difference of form being purely technical.‡

Christ denounced this casuistry as perverse in the extreme (Mt 23¹⁶⁻²²). And in this passage of the Sermon He has the intention of sweeping away the whole system of oaths as resting upon a false theory, namely, that a man might use two qualities of statement: one with the oath, which pledged him to truth or fulfilment; and one without the oath, which required neither truth nor fulfilment. As against this double-dealing and authorization

of falsehood, Jesus demands that a man shall speak only the truth, and implies that an oath is not only unnecessary, but harmful. This interpretation of Mt 5³³⁻³⁷ is that of the early Fathers and of the majority of modern commentators.* We find the same teaching, with close similarity of words, in Ja 5¹² 'But above all things, my brethren, swear not, neither by the heaven, nor by the earth, nor by any other oath: but let your yea be yea, and your nay, nay; that ye fall not under judgment.' That Jesus submitted to the high priest's oath at His trial (Mt 26^{63, 64}), as a matter of the moment's necessity, is in no way against this interpretation.† Jesus forbids oaths not as statutory legislation, so that the taking of an oath is sinful; but in principle, on the ground that a man is accountable to God for every utterance (Mt 12³⁴⁻³⁷). He sets forth the ideal of truthfulness which is to be striven for and ultimately accomplished. A Christian can have no need of an oath. If in the present stage of civilization oaths are still necessary for civic purposes, then Christians must seek to establish a higher standard of honesty in speech, according to which a man's simple word will be the best possible guarantee of the truth and performance of what he says.

e. *Unselfishness and Forgiveness.*—Mt 5³⁸⁻⁴² = Lk 6^{29, 30}. The OT Law did, in fact, provide that punishment should be in degree and kind, 'an eye for an eye, and a tooth for a tooth'; thus we read in Ex 21²³⁻²⁵ 'Thou shalt give life for life, eye for eye, tooth for tooth, hand for hand, foot for foot, burning for burning, wound for wound, stripe for stripe'; as also Lv 24¹⁷⁻²¹, Dt 19¹⁶⁻²¹.‡ This *lex talionis* was understood to apply to all relations of men. And not only that, for God Himself was believed to be retributive in His punishment, so that when men could not themselves execute the just penalty God could be appealed to for visiting retribution upon one's enemies; cf. Dt 23⁶⁻⁷ 25¹⁷⁻¹⁹, Ps 35¹⁻⁸ 41¹⁰, 11 58⁸⁻¹¹ 68^{1, 2} 69²²⁻²⁸ 78³⁰, 11, 80-86 109⁶⁻¹⁵, Jer 17¹⁸ 18²³, La 3⁶⁴⁻⁶⁶. This primitive conception and type of justice was probably required, at least in principle, by the conditions of the earliest civilization to which it ministered. When the modes of punishment subsequently changed, and penalties were executed no longer in kind but in some suitable equivalent, it still remained true that the punishment was meant to be retributive and equal to the crime. It is only in modern times that there has come in a new conception of punishment, according to which society is to be protected, not by avenging the wrong in kind or degree, but by reforming the evil-doer. This higher type of justice, based upon the principle of forbearance and helpfulness, also found recognition in Israel. The deeply spiritual saw that God's action was in love, mercy, and forgiveness, and they plead for a like principle of treatment among men; so Lv 19¹⁸ 'Thou shalt not take vengeance, nor bear any grudge against the children of thy people'; Dt 32³⁵ 'Vengeance is mine, and recompense,' i.e. God's; Pr 20²³ 'Say not, I will recompense evil: wait on the Lord, and he shall save thee'; cf.

* So Justin, Irenaeus, Clement Alex., Origen, Jerome, Augustine; of our own day, Meyer, Achelis, Bruce, B. Weiss, H. Weiss, and others; see esp. Wendt, *Lehre Jesu*, II, 210-218 [Eng. tr. I, 269-273]. For the view that Jesus did not forbid all oaths, but only their misuse, thereby simply re-establishing the OT teaching, may be cited Luther, Calvin, Bengel, Stier, Ewald, Keim, Tholuck. H. Holtzmann holds that Mt 5³³⁻³⁷ is intended to forbid all oaths, but attributes this tone to the Essenic tendencies of the First Evangelist rather than to Jesus, whose purpose was only to rebuke the profusion and casuistry of the Pharisaic practice.

† St. Paul's use of the oath, 2 Co 1³ 11¹¹, Ro 1⁹, Gal 1²⁰, 1 Th 5²⁵, and elsewhere, is simply a continuation of the OT and Jewish custom in its best use; the primitive Christians in this, as in many other respects, failed to rise at once to the appreciation and attainment of Jesus' ideal.

‡ Similarly the Hammurabi Code (c. 2250 B.C.), Nos. 196, 200.

* On the interpretation of the Third Commandment, see Coffin, *Journal of Bib. Lit.* 1900, pp. 166-183; art. DECALOGUE in vol. I. † See, further, Lv 54, Nu 30¹⁻¹⁶, Dt 23²¹⁻²³, Jg 11²⁶⁻²⁹, Jer 7⁹, Eek 17¹⁸, Zec 5⁴ 5¹⁷, Mal 3⁵.

‡ See Wünsche, *Bedeutung der Evangelien*, pp. 67-80, 288-292; Ederheim, *Life and Times of Jesus the Messiah*, II, 17-21.

also 2 K 6²¹⁻²², La 37²⁷⁻²⁸. But the love of retaliation, the zeal for executing vengeance, and the passion for seeing strict justice done without delay, held the field in both OT and NT times. And consequently, when Jesus came, He found little of the true spirit and service of brotherhood.

Against this false and hateful temper of men Jesus set His principle of unselfishness and forgiveness, following out the higher conception presented in the OT, and requiring that by this principle all men shall determine all their conduct towards one another. In order to make His meaning more explicit and clear, Jesus used four concrete illustrations (Mt 5³⁹⁻⁴²), in them suggesting what kind of conduct would result from living by this principle. The illustrations, of course, are figurative, and are to be interpreted not literally but in their main idea.* A man is not to be thinking constantly of his own *rights*, as though the chief aim of his life was to avenge injustices and slights towards himself (v.³⁹); he must be willing to endure wrongs, to sacrifice his feelings and his possessions, in order to avoid trouble with others (v.⁴⁰); he must be ready to labour freely and unselfishly for the good of others, without expecting recompense (v.⁴¹); he is not to be of a grasping, penurious disposition—rather he is to assist others in every reasonable way (v.⁴²).†

In this principle of forgiving love and unselfish service lies the essence of Jesus' ethical teaching;‡ it has been well called 'the secret of Jesus.'§

* In Jn 15^{22, 23} it can be seen that Jesus did not have in mind literal non-resistance, since He did not Himself practise it. That certain individuals (most recently Tolstoi) and sects (Anabaptists, Mennonites, Quakers) have taken these sayings literally, as statutes to be obeyed, is not to the credit either of their knowledge of the teaching of Jesus or of their own common-sense. Such literalism is the perversion of Jesus' method and intent, and is one of the worst enemies of the Gospel, for it holds up the teaching of Jesus to the ridicule of all sane, thinking men.

† In v.³⁹ the *ὅτι ἀντιτάξαι* cannot be the Evil One (as thought by Chrysostom and Theophylact), for Jesus would have him for ever resisted; it might be regarded as a neuter noun, referring to evil in general (so Augustine, Luther, Calvin, Ewald, Achelis, Kübel); but probably the evil man is meant who offers the indignities and demands described; cf. *ἀντιτάξαι* in v.⁴⁰ and Lk 6^{29, 30} (so H. Holtzmann, Nösgen, B. Weiss). The *ἀντιτάξαι* of Mt 5³⁹ is altered in Lk 6²⁹ to simply *ἐν ὑμῶν*, since the first blow would naturally be given by the right hand upon the left cheek. In v.⁴⁰ *πρόθυμος* means to bring a legal action against one (cf. 1 Co 6¹), in order to secure property of some kind from him. The *χίτων* (*hithon*) was the common Oriental under-garment worn next the body, while the *ἱμάτιον* (*himatyon*, *hithon*) was the more costly and elegant tunic or over-garment (cf. art. DRESS); that is, if a man attempts to get from you by law a little property, give him much in order to avoid quarrel and litigation with him. In the Luke parallel (6²⁹) the idea of a lawsuit is replaced by that of a personal assault, in which case the outer garment would first be taken, after which the inner garment was to be offered. In v.⁴¹ the *ἀπρόσκοπον* (cf. B. Weiss, *Meyer-Komm.* *ii. d. Mattheum*, in loc.) refers to official impressment for temporary service, a common practice in that day (Mt 27³²); Jesus uses it as a figure to teach that men must assist others by generously given and willing service. Luke does not have this verse, perhaps because it was liable to be misunderstood as literally referring to legal requisitions instead of figuratively to all social relations. In v.⁴² is added a fourth illustration which, because it is somewhat loosely joined to the preceding, and out of deference to the number 8, has been regarded by some scholars (Ewald, H. Holtzmann, Köstlin, Wittichen) as a remaining fragment of a separate section of this discourse, treating of the interpretation of the Eighth Commandment; they would therefore insert between v.⁴¹ and v.⁴² something like this, drawn from Ex 20¹⁵, Dt 5¹⁹ 24¹⁸⁻¹⁹ *ἀκούοντες, ὅτι ἰσχυρὸν ἐστὶν κλέψαι, ἀντιτάξαι δὲ τὸ ἱμάτιον τῷ ποταμῷ ἢ τῷ λίθῳ ὑπὲρ τοῦ ἀδελφοῦ*, etc. This explanation of v.⁴² has not, however, found general acceptance, being specifically rejected by Tholuck, Meyer, Feine, B. Weiss, and others; Luke has the saying in the same connexion as Matthew, and it joins well enough, logically, to vv.³⁹⁻⁴¹. The verse does not refer, at least directly, to the lending of money without requiring the payment of interest (so Feine, on the basis of Ex 22²⁵⁻²⁷, Lv 25³⁷, Dt 15⁷⁻⁸, against Tholuck, B. Weiss).

‡ See esp. Harnack, *Das Wesen des Christentums*, 1901, pp. 45-47 (Eng. tr. pp. 70-74).

§ Matt. Arnold, *Literature and Dogma*, p. 181f. See also Mt 26⁴⁵, Mk 9³⁷, Lk 9⁵⁴⁻⁵⁵, and cf. Is 506 531-32. St. Paul also teaches with great emphasis the same forgiving and self-sacrificing principle of life (Ro 12¹⁷⁻²¹, 1 Co 6¹⁻⁴, 1 Th 5¹⁵; cf. also 1 P 3⁹).

this principle God acts towards men, and on this principle men must act towards one another. Jesus not only taught this standard of life, but He realized it in His ministry and in His death, thereby becoming the perfect example of human love and service. These are the qualities which make true brotherhood. One cannot for a moment suppose that Jesus, in setting forth this principle as the supreme guide in men's dealings with one another, had the intention of overthrowing the civic laws which society requires for its preservation and welfare; any such interpretation would reduce His sayings to absurdity. What He purposed was to make men recognize the wretchedness of a standard of conduct which rests upon the ideas of revenge and retaliation, of for ever insisting upon one's rights and one's dignity, of working only for one's self and never for others, of getting as much and giving as little as possible. Civic laws and private practice must accept this teaching of Jesus and embody it, not necessarily in the same way, but to the same end.*

* Similarly Bacon, *Sermon on the Mount*, pp. 109-114: 'The Sermon is not legislative, as our First Evangelist seems to regard it, but prophetic. It does not enact, but interprets. It does not lay down rules, but opens up principles. . . . Matthew, as we have seen, is quite absorbed in the relation of the new Torah to the old. So much so that he fails to appreciate that his material is not really a series of new enactments, but in reality, just as Luke perceives, a simple application to the situation of that one principle which Jesus elsewhere enunciates more briefly; and not then as enacting something new, but as explaining the old (Mt 23²³⁻²⁴).' Mt 5²¹⁻⁴⁸ gives 'illustrations of the one principle which Jesus saw in "all the Law and the Prophets," and saw as well in all nature and history, that the divine calling is to ministering love and service—that and that alone.' Thayer, *Journal of Bibl. Lit.* 1900, p. 149: 'Jesus is not intent on giving precepts, but would lay emphasis on principles. The distinction between the two is most important. A precept is a direction respecting a given action; it is definite, precise, specific, fitting and belonging to particular cases. A principle, on the other hand, is comprehensive and fundamental; it prescribes, not particular actions, but a course of conduct. . . . A precept bids him do, a principle trains him to be; and so begets that inwardness and continuity which are essential to character.' B. Weiss, *Meyer-Komm.* *ii. d. Mattheum*, in loc.: 'Jesus explains that His will, as He would have it fulfilled in the Kingdom of God, demands the forbearing, self-forgetful love which renounces all standing on one's rights and desire for retaliation. Jesus illustrates the general principle by concrete examples, which are not to be understood as literal commands to be obeyed, but as setting forth a general standard according to the main idea contained in them.' Tholuck, *Bergrede*, p. 291 (Eng. tr. pp. 269, 270): 'The commands in vv.³⁹⁻⁴² are to be regarded as only concrete illustrations of the state of mind and heart required. . . . It is only the spirit of revenge that our Lord condemns, and therefore it is not inconsistent with His command to seek the protection of the law.' Burton and Mathews, *Constructive Studies in the Life of Christ*, p. 105: 'Some have undertaken to apply such sayings as "Resist not him that is evil," and "Give to him that asketh of thee," literally as fixed rules. But this is utterly to misinterpret Jesus. This whole discourse is a criticism of the Pharisees for making morality consist in a literal keeping of the rules of the OT. It is impossible to suppose that it simply imposes a new set of rules. Others, feeling that a literal obedience to these rules is impossible, if not also harmful, give up all attempt to obey the teachings of this discourse. Both are wrong. [Jesus teaches here] the principle, which we ought always to strive to follow. The single precepts are intended to correct the selfishness and narrowness that Jesus saw about Him, and to point out some of the ways in which the principle may be applied. They, too, are to be obeyed, always in spirit, and in letter when such an obedience is consistent with the principle. If a man would follow Jesus, he must not resist an enemy in a spirit of revenge; nor should he refuse to give to a beggar from a selfish motive. If he resist or withhold, he must do so because love, regard for the highest well-being of society in general, requires it.' Plummer, *Comm. on Luke*, p. 135: 'The four precepts here given (5³⁹⁻⁴²) are startling. It is impossible for either governments or individuals to keep them. A State which endeavoured to shape its policy in exact accordance with them would soon cease to exist; and if individuals acted in strict obedience to them, society would be reduced to anarchy. Violence, robbery, and shameless exaction would be supreme. The inference is that they are not precepts, but illustrations of principles. They are in the form of rules; but as they cannot be kept as rules, we are compelled to look beyond the letter to the spirit which they embody. If Christ had given precepts which could be kept literally, we might easily have rested content with observing the letter, and have never penetrated to the spirit. What is the spirit? Among other things, this: that resistance of evil and refusal to part with our property must never be a personal matter; so far as we are concerned

f. Universal Love.—Mt 5⁴³⁻⁴⁸ = Lk 6^{27, 28, 32-35}. When Jesus begins this sixth paragraph illustrative of His statements in Mt 5¹⁷⁻²⁰ with the words 'Ye have heard that it was said, Thou shalt love thy neighbour and hate thine enemy,' He is not quoting precisely any OT or extra-biblical utterance on record (cf. Sir 18²⁰). The clause 'Thou shalt love thy neighbour' is found in Lv 19¹⁸ 'Thou shalt not take vengeance, nor bear any grudge against the children of thy people, but thou shalt love thy neighbour as thyself.' But the further clause, 'and hate thine enemy,' while not appearing in that form, is really implied in the words 'the children of thy people,' which fixes a national limitation upon the teaching in the Leviticus passage. There was on the part of the Hebrews a profound contempt and disregard of other nationalities (cf. Dt 23³⁻⁶ 25¹⁷⁻¹⁹, the Book of Jonah, esp. 3¹⁰⁻⁴¹¹). So that the phrase 'hate thine enemy' justly characterized the prevailing OT conception of social duty (in spite of occasional efforts towards a larger idea, Ex 23⁴⁻⁹), the 'enemy' signifying any foreigner who did not enter into Hebrew practices, and the 'hatred' signifying their superior disdain for other peoples. The same hatred towards all Gentiles was felt by the stricter Jews of Jesus' day; and the Pharisaic pride and exclusiveness went so far as to include in the sphere of their hatred the lower classes among the Jews themselves who did not satisfactorily observe the Law (Jn 7²⁹ 'This multitude which knoweth not the law are accursed').

When Jesus sets over against this national bigo-

we must be willing to suffer still more and to surrender still more. It is right to withstand and even to punish those who injure us; but in order to correct them and to protect society, not because of any personal animus. It is right also to withhold our possessions from those who without good reason ask for them; but in order to check idleness and effrontery, not because we are too fond of our possessions to part with them. So far as our personal feeling goes, we ought to be ready to offer the other cheek, and to give without desire of recovery whatever is demanded or taken from us. Love knows no limits but those which love itself imposes. When love resists or refuses, it is because compliance would be a violation of love, not because it would involve loss or suffering.' Gore, *Sermon on the Mount*, p. 103 f.: 'We may truly say that the Sermon gives us a social law for Christians. That is true in this sense: the Sermon gives us principles of action which every Christian must apply and reapply in his social conduct. But just because it embodies motives and principles and does not give legal enactments, it must appeal in the first instance to the individual, to his heart and conscience; and it is only as the character thus formed must set itself to remodel social life on a fresh basis, that the Sermon can become a social law for Christians. You cannot take any one of its prescriptions and apply it as a social law at once. You cannot take the maxim, "If a man smite thee on the one cheek, turn to him the other also," or, "If a man take away thy coat, let him have thy cloak also," and make it obligatory on Christians as a rule of external conduct, without upsetting the whole basis of society, and without ignoring a contrary maxim which our Lord gives us in another connexion. But each of the maxims can be taken to the heart and conscience of the individual, to become a principle of each man's own character and conduct, and then to reappear, retranslated into social action, according to the wisdom of the time, or the wisdom of the man, or the wisdom of the Church.'

It is difficult to understand how Dr. Sanday (art. JESUS CHRIST, vol. ii, p. 621) can say: 'The ethical ideal of Christianity is the ideal of a Church. It does not follow that it is also the ideal of the State. If we are to say the truth, we must admit that parts of it would become impracticable if they were transferred from the individual standing alone to governments or individuals representing society.' A similar view was advocated by the Bishop of Peterborough in the *Fortnightly Review*, Jan. 1890. This misconception of Jesus' teaching seems to arise out of a confusion of principles with precepts. Social ethics and individual ethics cannot rest upon different principles, but the principles of ethics will call for different out-workings in concrete cases of their application—and this will be as true for individuals as for society. The people acting collectively through their governing officials (the State) are required to act according to precisely the same ethical standard as when they are acting individually; namely, they are bound to obey the principles of forgiving kindness to all (Mt 5²¹⁻²⁴), of moral purity (5²⁷), of protection of marriage (5³¹), of honesty in speech (5³³⁻³⁷), of an absence of the revengeful spirit (5³⁹), of long-suffering (5⁴⁰), of helpfulness (5⁴¹), of generosity (5⁴²), and of an all-embracing love (5⁴³⁻⁴⁸). Can any one think that the State is not bound so to act?

try and caste spirit His own teaching, Mt 5⁴⁴ 'Love your enemies, and pray for them that persecute you,' the term 'enemies' is to be understood in the most comprehensive and general sense of all who do not feel and act lovingly towards one. It no longer means 'foreigners,' for Jesus has removed all national barriers, making all men brethren (cf. Ac 17²⁶). To the primitive Christians the outstanding class of 'enemies' were those referred to by Jesus as their persecutors for the cause of Christ, as also in Mt 5¹⁰⁻¹². Jesus wishes to establish the principle of a universal love which would unite all men in a complete human brotherhood.* Every man is to love every other man, and to serve him so far as it lies in his power, with reasonable regard to all his duties. Barriers, castes, classes, distinctions of all kinds are removed, so that love and service are to be all-inclusive. When the scribe propounded to Jesus the question, 'Who is my neighbour?' He replied with the parable of the Good Samaritan (Lk 10²⁵⁻³⁷), in which He set forth clearly and impressively that the 'neighbour' whom one is to love 'as himself' is any one and every one. And this love which Jesus enjoins is not to be of the self-seeking kind which is common in the world. There may be no real love, He says, in the exchanges of attention and courtesy which men are accustomed to make with one another, for it may proceed on a commercial, *quid pro quo* basis. The Gospel demands a different kind of relation between men which is not self-seeking, does not ask how much will be given in return, is bestowed freely without thought of recompense. And here appears the close logical relation between these verses and vv. 28-42, for vv. 28-48 carry forward to complete expression the thought which underlies the previous words.†

This kind of love, all-embracing, unremitting, realizing itself in both feeling and conduct, has its origin and perfect manifestation in God,‡ who cares for all men, however they treat Him. He sets the example of universal love and service, which Jesus reveals in His words and deeds. And men by following this example in their relations to one another become the 'sons' of God (Mt 5⁴⁴), because in essential respects they feel and act like Him. The sonship thus spoken of is a moral sonship, which is attained by choosing to be and do what is right, rather than a genetic sonship, which is inherent because God has made men in His own

* For the Biblical teaching concerning love, see esp. art. LOVE in vol. iii.

† Lk 6^{27, 28, 32-35} has a different order of the contents from that of Mt 5⁴³⁻⁴⁸; if the Matthean material were arranged in the same order, the verses would stand: (43) 44 (32-42) 46, 47 45, 48; and Lk 6^{34-35a} is an addition or expansion for which Matthew has no parallel. It is not easy to determine which order is the more likely to have been original. The striking differences in the wording of the passages, however, indicate beyond a doubt that Luke's account is secondary, with much verbal modification: thus in vv. 27, 28 expansions appear; in v. 32 *χάρις* is found instead of *μετὸς* as in Mt 5⁴⁶, a manifest dropping of a Jewish for a Gentile or universal term (though Luke has *μετὸς* at 6³⁵); in the same and following verses, and for the same reason, Luke twice has *ἀμαρτωλοί*, once instead of *οἱ τῶν ἀνθρώπων*, once instead of *οἱ ἰσχυροί*; in v. 33 Luke has *ἀγαθὰ τῶν ἁγίων* instead of Matthew's *ἀποδόσεις*, a Jewish custom; in v. 35 Luke has *ὁ πατήρ ὑμῶν* instead of Matthew's clearly more original *ὁ πατήρ ὑμῶν τοῦ ἐν οὐρανῷ*; in the same verse Luke reduces the fine Jewish words about God's making the sun rise and the rain fall to a commonplace Gentile phrase, *ὁ θεὸς ἵστανται τοὺς ἡλίου ἀναστῆναι καὶ τοὺς βροχίους*; in v. 36 Luke changes the imperative future form *ἵστασθε*, common in the LXX through the influence of the Hebrew, and occasionally found in the NT (e.g. Mt 5⁴³ 6²²⁻²⁷), to a better Greek form, the imperative *ἵστασθαι*; he has also the less Jewish and less lofty *ἐκτιμῶντες* instead of Matthew's significant *τίμιμοι*; and again he has only *ὁ πατήρ ὑμῶν* instead of Matthew's *ὁ πατήρ ὑμῶν ὁ οὐράνιος*. These numerous and important variations in the two accounts of these verses leave no room for doubt that Matthew's form is much nearer to the historical words spoken by Jesus, and that the Third Gospel contains material which had undergone wide verbal divergence, partly perhaps in Luke's own hands, but mainly in the earlier Gentile transmission.

‡ So in the Johannine writings frequently, Jn 3¹⁶, 1 Jn 4^{10, 19} cf. also Ro 5⁸.

image (Gn 1²⁶).^{*} Jesus therefore commands men to be perfect in love as God is perfect in love,† setting before them an absolute ideal of social goodness; not that the ideal is at once attainable, but that towards its realization every man—and all men together—must strive, and in God's providence this striving will ultimately achieve success.

g. *Religious Worship*.—Mt 6¹⁻¹⁸ (no parallel in Lk).‡ The connexion of these verses with the historical Sermon cannot well be doubted; they follow in logical consecution upon the material contained in Mt 5³⁻⁴⁸, illustrating the true righteousness still further and on another side. The ideal life which was characterized in vv. 3-12, enjoined in vv. 13-20, and illustrated with regard to character and service in vv. 21-48, is further illustrated in these verses with regard to religious worship. Almsgiving, prayer, and fasting were, in the estimation of the Jews, three of the chief elements of religion, and received a disproportionate attention; while the three performances, really so different in importance, were regarded as about equally necessary and useful.§ In v. 1, which forms an introduction

^{*} On this sonship see Wendt, *Lehre Jesu*, ii. 145 f. In using the term 'Father' for expressing most completely His conception of God, Jesus thinks of the *family* as most characteristic of the relation between God and men. In the family the sons may be either true or false to their relation to their father; if they love, honour, and obey him they realize their sonship; they are sons indeed; if they disrespect him, disgrace him, and disregard his will they are not sons in the moral sense, for they repudiate their sonship. But the actual genetic sonship is none the less a fact, even if the sons will not acknowledge and exalt it. So in the relation of men to God; they do not in reality become His sons any more than He becomes their Father; this mutual essential relation exists from the first, for all men are His sons, and He is the Father of all. But the NT use of the term 'son' is generally a moral one, and those only are designated 'sons' who honour and realize their sonship. This does not deny the genetic, spiritual sonship, however, which the NT also teaches.

† The words of Jesus, 'ye shall be perfect,' can have only the imperative force, as in Lk 6⁴⁰ (so Meyer, H. Holtzmann, H. Weiss, H. Weiss, Wendt, Blass, and nearly all); cf. Burton, *Moods and Tenses in NT Greek*, § 67. The whole v. 48 is made up from OT language; e.g. Lv 19¹⁸ (LXX) reads, ἀγαπᾷς τὸν πλησίον σου ὡς σεαυτὸν; Mt 22³⁹ reads, ἀγαπᾷς τὸν πλησίον σου ὡς σεαυτὸν; Mt 22³⁹ reads, ἀγαπᾷς τὸν πλησίον σου ὡς σεαυτὸν. But the thought of these similar OT passages, as their contexts show, is of levitical purity and national separateness, and it is therefore superficial as compared with the deep meaning which Jesus puts into the words. In Mt 5⁴⁸ we have the closing verse of the short section vv. 43-48 concerning universal love (so Achelis, Bruce, Heinrich, H. Holtzmann, Tholuck, B. Weiss), not a general summary conclusion of the whole section vv. 21-48 (so Burton, Ibbeken, H. Weiss). The τελειος refers only to perfection in love, not to the whole series of attributes which constitute the perfection of God in the theological sense, or to the comprehensive idea of human perfection. This love which Jesus establishes as the principle of the ideal life, to be felt and acted upon by every man towards every other man, cannot be understood as condoning the sins or imperfections in the character and service of others, but insists upon viewing men not as they are but as they may be and should be, and upon rendering them every assistance of sympathy, counsel, and help towards the attainment of the Divine ideal. It is thus that God has dealt with men, and we are to do likewise for one another.

‡ The account of the Sermon in Luke does not contain this section, probably for the same reason that no parallel appears for Mt 5¹⁷⁻²⁷, namely, because these passages are so saturated with Jewish phraseology, ideas, and customs as to be difficult of understanding for Gentile readers (so Feine, Wendt). Here also, as there, it is more likely that Luke's sources did not contain these sections than that Luke himself excised them.

§ The giving of alms was held to be a primary duty and a means of salvation, as seen already in the Apocrypha, To 47-11 128 10 148-12, Sir 41.2 710, cf. also Ps 41, 1587 10, Dn 4²⁷; there are also many striking Rabbinic sayings concerning the merit of almsgiving (see art. ALMSGIVING in vol. I.; Weber, *Jüdische Theologie*, pp. 285-288; Wünsche, *Erläuterung der Evangelien*, in Mt 6¹⁻⁴). The Greek word in use for the alms is ληψισύννη (the motive employed by metonymy for the thing), as here in v. 3, representing, perhaps, ἡμεῖς; since this Heb. word meant primarily 'righteousness,' it came about that δικαιοσύνη might also have this special meaning, but that is not the sense in which δικ. is used here in v. 1 (the textual variant at this point, ληψισύννη, is improbable on both external and internal evidence). Prayer was offered by the Jews thrice daily, at 9 A.M., at 12 noon, and at 3 P.M. (cf. Ac 3¹), and on three days in the week the people went to the synagogue for prayer. Liturgical forms of prayer were in use (cf. Lk 11², and Mishna, tractate Berakhoth), and they were recited at the proper time wherever one might be. Fasting was prescribed by the OT for the Day of Atonement

to the group, Jesus gives the key to the interpretation of the whole: * He does not pronounce against the acts themselves, but against the spirit and purpose which too often animated the doing of them. Religious worship, such as almsgiving (which the Jews rightly considered an act of worship), prayer and fasting, must never be performed ostentatiously, with the intent of securing a reputation for piety. It was mainly the proud, hypocritical Pharisees who were guilty of such motives in their worship; but the multitude of common people to whom Jesus was now speaking had been brought up to believe implicitly in the teaching and practice of the Pharisees, and were therefore in great danger of being corrupted by the Pharisaic example of ostentation, worldliness, and deceit.

Jesus will therefore warn them against these specific errors of their religious leaders, and in contrast exhibit the character of true religious worship. The three acts of almsgiving (vv. 2-4), prayer (vv. 5-7), and fasting (vv. 16-18) are treated in a parallel way, the same thing being said of each in almost the same language. When they give money in the synagogues, or upon other occasions, for charitable objects, it is to be contributed solely for the benefit of others, with no purpose of obtaining a reputation of generosity for themselves (cf. Ac 5¹⁻¹¹). Against almsgiving in itself He does not speak, but only of the motive behind it. The giving of money to assist others is, in fact, an act of worship to God, and a necessary element of all true righteousnesses. But such giving must be quietly done, without providing or even wishing that others may know of the fact or the amount, in order that one may receive credit therefor.† So also when men pray, as pray they must, their prayers are to be a genuine communing with God, instead of being designed to win the praise of men for a superior piety.‡ To counterfeit true spiritual communion with God is an intolerable profanation of religion. Jesus, of course, has no thought of forbidding prayer in public, but He will have only sincere prayers made, whether in public or private. And if they fast, as they were accustomed to do regularly and often, they are to observe the fast as a simple humiliation before God, not forced upon others for the purpose of gaining credit for exceptional devoutness.§ On another occasion

(Lv 16²³⁻³⁴), and was practised on other occasions also (Ex 34²⁸, 1 S 76, 2 S 12¹⁶, Jer 36⁹, Dn 10³). The prophets sometimes spoke against it (Is 58³⁻⁸, Jer 14¹², Zec 7⁹), but it was a prevailing usage throughout the Hebrew history, cf. Jth 6⁸, To 12⁸. In the NT also the Pharisee is represented as boasting in his prayer, 'I fast twice in the week' (Lk 18¹²), and the frequent fasts are mentioned in Mt 9¹⁴ (cf. art. FASTING in vol. I.). It is noticeable that Jesus has not joined with these three outstanding acts of Jewish worship the observance of the Sabbath, which stood in somewhat the same prominence; but elsewhere He dealt with that subject also (Mk 2²⁴⁻²⁸), and on a similar principle.

* δικαιοσύνη is to be understood here in a comprehensive sense; it is a repetition of the δικ. of v. 20, now to be illustrated in acts of religious worship, and embraces alike almsgiving, prayer, and fasting.

† In v. 2 εὐλασίᾳ is a figurative term signifying ostentation. ὑποκριταί refers to the Pharisees; they were hypocrites because they wore a mask of piety over their selfish lives; cf. also Mt 23⁵⁻⁷. συναγωγαί, ὀμαι indicate that almsgiving was a part of the regular synagogue services, but that alms were also given upon the streets to those in need. The αὐτὸν λέγει ὑμῖν puts a special emphasis upon the fact that this almsgiving, when done out of vanity, had no real merit; cf. Lk 6²⁴. In v. 4 the phrase, 'let not thy left hand know what thy right hand doeth,' is quite surely a current Semitic proverb to express secrecy.

‡ In v. 5 ἐστὶς is an imperative future, as in Mt 5⁴⁸; the parallel verb in v. 2 is an imperative subjunctive, and in v. 6 an imperative, the meaning being quite the same in each. The γωνίαι τῶν πλατείων were the four corners of street intersections, which were chosen as the most conspicuous place for the ostentatious prayers. ἵστῶτες indicates that prayers were customarily offered in a standing posture. The ταμίειον, or, more frequently in the NT, ὑστέρων, was the upper room of an Oriental house used for guests or for retirement to pray; see Ac 14¹⁴ 20⁷ 20⁸. With the language of v. 6 compare 2 K 4³³, Is 26²⁰.

§ In v. 16 σκευρωτοί and ἀφαιροῦσιν τὰ πρόσωπα refer to neglect of the customary care for the head, the unwashed face and

Jesus removed all obligation from His followers to observe the Pharisaic system of fasts, or to practise fasting except as it was the personal and spontaneous expression of inner feeling (cf. Mk 2¹⁸⁻²³). Here He teaches that when one fasts it must be a genuinely religious performance, free from all ostentation and selfish motives.

It is true, Jesus says, that those who turn these acts of religious worship to selfish account do secure their object; 'they have their reward' in the false reputation for generosity and piety which for a time they can win. But they cannot win God's approval, or secure any spiritual blessings. These things, which alone are worth while, belong only to those whose worship is sincere, who give and pray and fast with pure unselfish motives, for the good they can do their fellow-men and for their own spiritual growth. And the principle which Jesus here sets forth for these three acts of religious worship is to apply to every kind of religious observance. Sacred things are never to be turned to worldly account; everything we do in the name of religion, and for the sake of religion, must be untarnished by self-seeking ends and unholy purposes.*

h. The Lord's Prayer.—Mt 6⁷⁻¹³ = Lk 11¹⁻⁴. No words of Jesus which have come down to us are of greater significance or usefulness to mankind than this Prayer, which He taught His disciples, indicating as it does the true foundation, the true spirit, and the true substance of all prayer, prayer being our communion with God. A consideration of the Lord's Prayer will involve the following points: (1) the historical occasion on which the Prayer was given; (2) the original form of the Prayer as taught by Jesus; (3) the genetic relations of this Prayer to the OT, to Jewish prayers, and to the life of Christ; (4) the analysis and interpretation of its contents; (5) the right use of the Prayer.

(1) There is no portion of the Sermon as given by Matthew (chs. 5-7) which is so obviously an addition to the historical discourse as the section 6⁷⁻¹³ containing the Lord's Prayer. That these verses are extraneous matter, introduced here by the process of compilation, is now maintained by many scholars.† This fact appears in several ways: (a) Lk 11¹ explicitly states that Jesus gave the Prayer to His disciples in response to an expressed wish on their part for a form of prayer, such as John the Baptist had given his disciples (the Jews were accustomed to many liturgical prayers). This statement, while it might be a mere literary setting of the Third Gospel, is probably a historical datum; and if historical, it points to another occasion than the Sermon for the presentation of the Prayer. (b) The precise time when the Prayer was given is not fixed by Luke, but it is assigned in a general way to the Pereaean period, after the close of the Galilean ministry. This is perhaps too late a position, since it was the

example of John the Baptist's disciples which led Jesus' disciples to ask Him for a prayer; but this influence of John's upon Jesus' disciples is more likely to have been exercised before John's death, which came during Jesus' work in Galilee (Mk 6¹⁴⁻²⁹). If, then, the Lord's Prayer was given earlier than the Sermon, it would not have been given again as new teaching in that discourse; and if later, then it can stand in the Sermon only as a result of subsequent compilation. What seems to have happened is, that the original occasion of the giving of the Prayer was remembered (Lk 11¹), but the exact time at which it was given was forgotten; consequently each Evangelist, or his source, introduced the Prayer into his narrative where it was deemed suitable. (c) The Prayer, where it stands in the Sermon, clearly interrupts the movement of the discourse, and destroys the unity of the section into which it has been inserted. This is true not only of the Prayer, vv. 9-13, but also of the two verses preceding, vv. 7, 8, and of the two verses following, vv. 14, 15. The whole passage, vv. 7-15, does not pertain directly to the subject which Jesus is presenting in vv. 1-6, 16-18, namely, the sin of ostentation and hypocrisy in acts of religious worship; and it mars the symmetry of Jesus' three illustrations about almsgiving, vv. 2-4; prayer, vv. 5-8; and fasting, vv. 16-18. Nevertheless, it is quite intelligible how these verses 7-15 were brought into this connexion by the compiling process. The Sermon was one of Jesus' most important discourses, and during the Apostolic age it was everywhere in use as a practical digest of His teaching. As the Sermon already contained some instruction about prayer, and the teaching on the same subject in vv. 7-15 was separated from its historical position, it came easily into association with vv. 5, 6, where—although it was an extraneous element—it added to the completeness of the prayer instruction.

(2) It is in the highest degree improbable that the Lord's Prayer was given on two separate occasions—once in the Sermon in the form which Matthew reports, and again under other circumstances and in a different form as reported by Luke.* This would have been unnecessary; but still more, each of the two Gospels supposes that it reports the one and only giving of the Prayer. On the theory of repetition, why did Jesus present the Prayer in two forms so very different from each other? Having once given it in the fuller, smoother form of Mt 6⁹⁻¹³, why should He subsequently repeat it in the shorter, cruder form of Lk 11²⁻⁴? The reason for the postulation of two deliveries of the Lord's Prayer is the unwillingness of certain scholars to admit that Jesus' words could be so variantly transmitted (see the two Greek forms of the Prayer quoted in parallel columns on p. 5). Certainly it is not to be thought that Luke, with the Matthean form of the Prayer before him, deliberately cut it down and changed it to the form contained in his Gospel; or that Matthew, with the Lukan form of the Prayer before him, deliberately enlarged and altered it into the form which the First Gospel presents. But the two forms may well be the respective results of two independent lines and processes of transmission. The Prayer as given by Jesus in Aramaic was briefly worded, as we may assume from the nature of the language and the Jewish custom, as well as from the original Hebrew 'Ten Words' and the Beatitudes. It is therefore not unlikely that the form of the Prayer given by Matthew is somewhat longer than the historical Aramaic form, for the purpose of producing a more perfect Greek

dishevelled hair being an Oriental sign of grief and abasement, cf. 2 S 12²⁰, Is 61³, Dn 10³, 1 Mac 3⁴⁷; that this is what is meant is seen in v. 17c, where Jesus bids them give no external sign of their fasting.

* No one would seriously attempt to put these commands of Jesus into practice as precepts to be literally obeyed, so that all charity should be unorganized, and all prayers be absolutely private. Here, again, as in ch. 5, Jesus is dealing with principles only, and His illustrations are to be considered as illuminating the principles rather than as fixing statutes for literal observance.

† So Calvin, Strauss, Neander, Schleiermacher, Bleek, de Wette, Olshausen, Ewald, Ebrard, Meyer, Hanne, Godet, Kamphausen, Page, Feine, Sieffert, Bruce, Chase, Kubel, Weissöcker, Wendt, H. Holtzmann, Bartlet, Heinrici, B. Weiss, Baljon, Nestle, Bacon. The Matthean position of the Prayer is regarded as historical by Tholuck, Keil, Morison, Broadus, Achelis, Steinmeyer, H. Weiss, Nögen, Plummer, Grawert, it being the opinion of most of them that the Lukan position is also historical, and therefore that the Prayer was given on two separate occasions by Jesus. Tholuck is undecided whether to prefer Matthew's position for the Prayer, or to hold that it was repeated.

* Yet this is maintained by Achelis, *Bergpredigt*, p. 297. Chase, *Lord's Prayer in the Early Church* (1891), p. 11, and by some others. Against this view, see Page, *Expositor*, 3rd ser. vol. vii. p. 433 ff.

translation. But in the main the differences which appear in the accounts of Matthew and Luke are due to the influences of independent translation from the Aramaic, and of handing down in practical Church use through fifty years of time. Neither account can be supposed to furnish a literal equivalent of the Prayer precisely as worded by Christ for His disciples.* Consequently it becomes a matter of importance to discover which of the two Gospel reports contains the more exact reproduction of the historical Prayer. The Church, with striking unanimity, from the 1st cent. to the present, has testified to the greater fidelity, dignity, and usableness of the recension in Mt 6⁹⁻¹³; and this choice, as respects both quantity and quality, has been confirmed by the great majority of scholars.†

In order to consider in detail the differences which exist between the two accounts of the Lord's Prayer, it is necessary to make the comparison on the basis of the modern critical texts of the NT, such as Tischendorf's eighth edition and Westcott and Hort's text (with which the R^V closely agrees). One notices first the exclusion of the doxology to the Prayer contained in the TR at Mt 6¹³ (and familiar to us through the AV): *οτι σου εστιν η βασιλεια και η δυναμις και η δόξα εις τους αιωνας. αμήν*. This ending of the Prayer is not given in Luke, and the external evidence against its genuineness in Matthew is conclusive; so that its authenticity is no longer supposed.‡ It grew up gradually in the 2nd cent. as a product of the Jewish custom of doxologies and responses, continued in the public services of the Christian Church; see esp. 1 Ch 29¹¹⁻¹³. The earliest mention of the liturgical use of the Prayer is in the *Teaching of the Twelve Apostles*, viii. 3, where the repetition of it three times daily is enjoined; and there is abundant Patristic evidence that this liturgical use rapidly increased. Readily, therefore, this doxology, which came to be used always at the close of the Prayer, found its way into the later exemplars of the NT text; and the fact that it appears in conjunction with Mt 6⁹⁻¹³ instead of Lk 11²⁻⁴ shows that it was the Matthaean form of the Prayer which the early Church adopted for its liturgy. The doxology is found in many of the secondary uncials, but is absent from NBD, the earlier versions, and the Patristic witnesses of the 2nd and 3rd cents. generally. Again, in numerous secondary and late witnesses of the text the fragmentary Lukan account of the Prayer is filled out and modified by the introduction of some or all of the elements peculiar to the Matthaean account; but these are manifest assimilations, and therefore have no textual standing in the Third Gospel.

Taking Mt 6⁹⁻¹³ and Lk 11²⁻⁴ thus according to the best Greek text, it appears that, after the address which is common to both, the Lukan account

has five petitions, while the Matthaean account has six (or seven). The five parallel petitions are: (1) Hallowed be Thy name, (2) Thy Kingdom come, (3) Give us our daily bread, (4) Forgive us our debts (sins), and (5) Bring us not into temptation. To these Matthew adds, between (2) and (3), 'Thy will be done, as in heaven, so on earth,' which is clearly a new petition, and after (5) he adds, 'but deliver us from evil,' which may be a separate petition, but is more likely a fuller, reverse wording of the 'bring us not into temptation.'* Are these two additional clauses in Matthew authentic portions of the Lord's Prayer? The only denial of their authenticity has come from the few modern scholars who hold to the relative originality of the Lukan account here and elsewhere as against the longer Matthaean account, which they think was expanded and supplemented in transmission.† But Matthew's third petition, 'Thy will be done, as in heaven, so on earth,' brings into the Prayer one of Jesus' essential ideas and constant phrases (cf. Mt 7²¹ 12⁵⁰ 26^{39, 42}, Jn 4³⁴ 6³⁸); it is necessary to the literary structure of the Prayer, since it forms the third member of the first triplet of petitions; and while in a general way the same thought is expressed in the clause 'Thy kingdom come,' the Prayer needs this more definite statement of how the kingdom must be realized, what men must do to make the Kingdom come. It is not difficult to see why this petition was excluded from the Lukan form of the Prayer: the source from which Luke drew his account had passed through a Gentile line of transmission, in the course of which a large part of the characteristically Jewish element in the Gospel story was eliminated, as a detriment to the spread of the Gospel among the Gentiles. Its omission is therefore parallel to the omission of Mt 5¹⁷⁻³⁷, and much other material, from the Third Gospel.‡ With regard to Matthew's other addition to the Lord's Prayer, the enlargement of the sixth petition by conjoining the phrase 'but deliver us from evil,' there is less argument for its authenticity; but its absence from Luke is readily explained in the manner just described, it is a characteristic Jewish conception entirely suitable to Jesus' thought and expression, and it fits in with the literary structure of the second triplet of petitions, since without it the sixth petition would not correspond in structure with the other two.

The phenomena of the parallelism in the wording of the several clauses which Matthew and Luke have in common are striking. The thought and the language of the two accounts agree precisely in the first, second, and sixth petitions (except that in the sixth Luke does not have the phrase *ἀλλὰ ῥῶσαι ἡμᾶς ἀπὸ τοῦ πονηροῦ*).§ The third petition Luke

* Augustine (*Enchirid.* 116) regarded this phrase as a separate petition, making seven in all, and this became the standard Roman Catholic interpretation: it was adopted also by Luther, and is continued by Lutheran commentators. Among modern scholars there are many who accept this—some on traditional grounds (Kubel, Nösgen, H. Weiss), others on critical grounds (Bleek, Hilgenfeld, Ibbeken, Chase, v. d. Goltz). That the petitions are but six in number was held by Origen and Chrysostom, was adopted by Calvin, and has had the support in recent years of Tholuck (apparently), Bengel, Olshausen, Keim, Kuinöl, Meyer, Achelis, Feine, Hatch, Plummer, B. Weiss, Bruce, Hort, Nestle, and others.

† So Bleek, Kamphausen, H. Holtzmann, Wendt, Bacon.

‡ Feine, *Jahrb. f. Protest. Theol.* 1885, thinks that Luke omitted the third petition because he considered that its idea was already contained in the first and second petitions, so that it was simply redundant. This is also the view of Kamphausen, *Das Gebet des Herrn*, p. 67. H. Holtzmann, *Hand-Comm. u. d. Synoptiker*, in loc., regards Luke's five petitions as original, designed to be counted on the fingers of one hand. O. Holtzmann, *Leben Jesu* (1901), p. 203, also maintains that the short form of Luke is original.

§ The presence of this phrase in the text of Lk 11⁴ in ACD and some other witnesses is to be explained as the result of a process of text assimilation with the Matthaean reading; it does not appear in NBL, the more important versions, or the earlier Patristic writings. Similar cases are the insertion in Lk 11² of

* It has been sufficiently argued above, under i. 3, that the entire phenomena of the primitive transmission of the Gospel material require us to recognize extensive verbal variation and occasional thought modification, such as appear in these parallel reports, throughout the narratives of the four Evangelists. There is a striking similarity between the Matthaean and Lukan accounts of the Beatitudes and their two accounts of the Lord's Prayer, and judgments arrived at concerning the features and merits of the one pair will be found to hold in general for the other pair also; the chief differences between the two forms of the Beatitudes and the two forms of the Lord's Prayer are due to similar causes operating on both.

† So Tholuck, Meyer, Feine, Bruce, H. Weiss, Plummer, B. Weiss, and many others; those also who think that Jesus gave the Prayer in two forms hold, almost without exception, that the form in Matthew is to be preferred. The modern scholars who regard the Lukan report as the more authentic (Bleek, Kamphausen, H. Holtzmann, Wendt, Bacon), seem to follow too rigid and exclusive a theory of literary criticism.

‡ See Westcott and Hort, *New Testament in Greek*, vol. ii. Appendix; Souvener, *Introd. to the Criticism of the New Testament* 4, vol. ii. pp. 323-325; Chase, *Lord's Prayer in the Early Church*, pp. 168-176.

does not have. In the remaining two petitions, the fourth and fifth, we find approximately the same ideas and words, but with some variation: thus the *δὸς ἡμῖν σήμερον* of Mt 6¹¹ is paralleled in Lk 11³ by *δίδου ἡμῖν τὸ καθ' ἡμέραν*, the latter being an attempt to generalize and simplify the former; the *τὰ ὀφειλήματα* of Mt 6¹² is paralleled in Lk 11⁴ by *τὰς ἀμαρτίας*, the latter being the substitution of an easy, well-known word for one full of significance but less common—that this substitution took place can be inferred from the *τῷ ὀφείλοντι* in the adjoined clause; and in the same petition the *ὡς καὶ* of Mt 6¹² is paralleled in Lk 11⁴ by *καὶ γάρ*, which also is an obvious attempt to remove the possibility of a false *quid pro quo* interpretation. Very interesting also is the difference in the two accounts of the address of the Prayer; Lk 11² gives only one word, *Πάτερ*, while Mt 6⁹ gives *Πάτερ ἡμῶν ὁ ἐν τοῖς οὐρανοῖς*. It is, of course, possible that the Lukan report is correct, but it certainly seems too familiar and abrupt for this solemn, lofty prayer; while Matthew's two attributives seem logical and important. The *ἡμῶν* indicates that the Prayer is a universal one for all who will pray to God. The *ὁ ἐν τοῖς οὐρανοῖς* is an OT conception (cf. Ps 2⁴ 115⁵) which Jesus used (see passages below), because it was a customary Jewish expression full of religious meaning.* Its usual, though not entire, absence from Luke is best explained as due to the process already described by which the characteristic Jewish element was largely eliminated from the sources of the Third Gospel. In all these parallel passages, therefore, where Matthew and Luke give different readings for the clauses of the Prayer, the report of Matthew commends itself as possessed of a greater authenticity.† This confirms by historical tests the strong preference of the Church for the longer form of the Prayer as given in the First Gospel, a preference which rested primarily on spiritual and practical tests.

(3) When Jesus would condense His teaching into seven concise phrases (the address is an essential part of the Prayer), containing in Aramaic not fifty words, it became necessary for Him to embody His chief ideas about God and men in comprehensive phrases whose significance was already well understood by His followers. To introduce new phrases and new conceptions would have been to confuse those whom He wished to instruct. Consequently, the language and the ideas of the Lord's Prayer are closely related to the OT, where essential truth about God, and about the duty of men towards Him and towards one another, had in many respects been reached. Jesus' general teaching to His disciples previous to the giving of this Prayer had made known to them what He would have them understand by these OT conceptions and phrases.

Naturally, we find in Jewish prayers of a time contemporaneous with Jesus some phrases which are similar to those in the Lord's Prayer. Such parallels have been pointed out for the address and first two petitions; for the remaining four clauses there are no real parallels, although there are expressions with a certain similarity.‡ Some

of these Jewish prayer-formulas are subsequent in origin to the 1st cent. A.D., and may well have been influenced by the Christian Prayer. But there is no reason why Jewish prayers of Jesus' own time should not have contained some of the essential religious ideas which Jesus reaffirms, and in language which the OT had already made sacred. Such parallelisms furnish no proper basis for an attack upon the originality and authority of Jesus. His work was not to make a clean sweep of all existing religious conceptions and phraseology, as though the world had never had any vision of God, or truth, or goodness, or right; on the contrary, He came to show that the OT revelation was, in its best thought and teaching, a true, Divine revelation, which He would exalt and perfect (Mt 5¹⁷, cf. He 1¹⁻²). Jesus was not 'original' in the sense that He created a wholly new fabric of religious ideas, or introduced a wholly new set of religious terms; that kind of originality was made impossible by the fact that God was already in His world. Jesus' originality—and the term is not misapplied—consisted in His Divine ability to separate the true from the false, the permanent from the transient, the perfect from the imperfect; and then to carry forward the whole circle of ideas and practices to their ideal expression. The work of an artist is not to manufacture his paints, but to produce with them a perfect picture. Jesus' mission was to clarify and to perfect religious truth, to show the unity and perspective of its many elements, and to transform humanity by revealing the nature, the beauty, and the necessity of the ideal life.

One observes also with interest how the Lord's Prayer embodies the experiences of Jesus in His own personal and official life. His teaching grows out of and expresses His own religious perceptions and realizations, so that there is a vital unity, an instructive correspondence, between this Prayer and His experience.* He finds God to be His Father and their Father, the common Father of all, to whom prayer is to be addressed. He lives and works that God may be revered, that His Kingdom may come, and that His will may be perfectly done by men. He has experienced the truth that God cares for the physical needs of men, and it is their privilege to trust Him for these things. He knows and teaches that men are sinful, needing God's forgiveness; they also must show a forgiving spirit towards one another. He has Himself passed through severe temptations, praying for deliverance from them (cf. Mk 14³⁸⁻³⁹, Mt 4¹⁻¹¹).† In giving this ideal Prayer to His disciples, Jesus does not necessarily imply that His experience is in no respect different from theirs, e.g. that there is no uniqueness in His relation to God, or in His character and career as regards sin. But He does mean that He has shared humanity with them, has lived through its experiences, has found the way to attain the human ideal, and will declare to them in His words and in Himself the secret of the true life.

(4) An analysis of the Lord's Prayer, accepting the Matthean form as practically authentic, discloses a well-considered literary structure: there are seven clauses in all, the first containing the address, followed by two groups of petitions, three in each. Regard, therefore, is had to the sacred

Matthew's *γεννηθέντα* τὸ ἐκ τῆς σαρκὸς σου ὡς ἐν οὐρανῷ καὶ ἐστὶν ἡ γῆ (so M^{ACD} against BL, versions, and quotations), and *ἡμῶν ὁ ἐν τοῖς οὐρανοῖς* (so A^{OD} against MBL, versions, and quotations). Modern text-critical authorities are agreed that these passages are interpolations in the Lukan text.

* Compare the later Jewish prayer-formula, *יְיָ אֱלֹהֵינוּ יְיָ אֱלֹהֵינוּ*; see Achelis, *Berppredigt*, p. 229; Lightfoot, *Hor. Heb.* p. 299.

† See Page, *Expositor*, 3rd ser. vol. vii. pp. 439-440; Plummer, art. LORD'S PRAYER in vol. iii.

‡ On this point see the older works of Möller, Augusti, Weinstein, Lightfoot, and Schöttgen; also, Achelis, *Berppredigt*, p. 228f.; E. Weiss, *Meyer-Komm. d. d. Mattheum*, p. 138;

Plummer, art. LORD'S PRAYER in vol. iii.; Nestle, art. 'Lord's Prayer' in *Enycl. Bibl.* iii. 232f.; Taylor, *Sayings of the Jewish Fathers* 2 (1900), pp. 124-130; Dalman, *Worte Jesu*, i. 299-306; v. d. Goltz, *Das Gebet in der ältesten Christenheit* (1901), pp. 40-42.

* See v. d. Goltz, op. cit. pp. 1-53; Burton, 'The Personal Religion of Jesus' in *Biblical World*, vol. xiv. (1899), pp. 394-403.

† Chase, *Lord's Prayer in the Early Church* (1901), p. 104f. notes, but exaggerates, the relation of the Lord's Prayer to the personal experiences of Jesus.

numbers 3 and 7, for the purpose of moulding perfectly the literary form of the Prayer.* The first group of petitions pertains to God—'Thy name,' 'Thy kingdom,' 'Thy will.' They express the most profound and comprehensive aspiration of men, that God may be all in all. Only when this is the supreme desire, can one offer the three petitions of the second group, which pertain to the needs of the individual life—'our daily bread,' 'our debts,' 'deliverance from temptation.' The several clauses would have been, in the original Aramaic, shorter and more nearly uniform in length than appears in a Greek translation. One cannot be certain whether the 'as in heaven, so on earth,' which follows the third petition, pertains to that alone, or equally to all the three petitions of the group.†

The address of the Prayer (Πάτερ ἡμῶν ὁ ἐν τοῖς οὐρανοῖς) introduces the term 'Father,' which was Jesus' prevailing and characteristic designation for God. It signified God's supremacy, authority, and power, but at the same time His love, patience, and care for men. The OT also has the term, but in the national sense, denoting God's relation to His covenant people; later there grew up the individual consciousness, and God came to be thought of as a personal Father to the worshipper.‡ Jesus was accustomed to use this title for God in various ways: § often without any limiting attributive except the article, often also with a limiting 'my' or 'your'; but it is only in this passage, Mt 6⁹, that Jesus is reported to have used the attributive 'our.' One might therefore infer that this 'our' is an unauthentic liturgical addition; but this inference is neither necessary nor satisfactory. 'Our Father' is a significant address, indicating at once the ground and the motive of prayer to Him, as well as the brotherhood of men under a common Father; the 'our' contributes an important element, therefore, to the address, and the occasion of its use is great enough to call for a special expression. It may be that the phrase 'Our Father' was oftener upon Jesus' lips than our Gospel records now show; the widening gulf which the disciples fixed between their ascended Lord and themselves might tend to the disuse of phrases which indicated that 'it behoved him in all things-

* It is not to be said that the artistic literary structure of the Prayer is unworthy of Jesus, and must therefore be attributed to the Evangelist. On the contrary, Jesus designedly presented much of His teaching in metre and rhythm (see above, ii. 1). His marvellous literary power was exercised not for art's sake, but to make art serve the highest well-being of men; for ideal thought cannot fulfil its whole mission until it is ideally expressed. On the logical relation of the petitions, see Plummer, art. LORD'S PRAYER in vol. iii.

† Tholuck, *Bergpredig* 5, p. 350 (Eng. tr. p. 323), notes that there are three elements which make up the address clause of the Prayer, and three elements which make up the doxology that came to be used at its close.

‡ For the national sense of Dt 1³¹ 8³ 32⁶, Ps 68⁵ 89²⁶ 103¹³, Is 1⁹ 63¹⁶ 64⁸, Jer 34¹⁹, Hos 11¹, Mal 1⁶ 2¹⁰; for the individual sense, Wis 2⁶ 14³, Sir 23¹ 4, To 13⁴, 3 Mac 6³ 8.

§ In the Gospel of Matthew the term 'Father' is frequent, and is generally accompanied by either 'my' or 'your' ('thy') in about equal proportion. The term occurs rarely in the Gospel of Mark. In the Gospel of Luke, also, there are relatively few instances of it. But the Fourth Gospel has it abundantly in the discourse sections, often with 'my,' but in the main only with the article, 'the Father.' A comparison of the occurrence of the term in parallel Synoptic passages raises the question as to how much confidence is to be placed upon the precise attributive reported in connexion with the title, or upon the occurrence of the title itself: thus in the group Mt 26²⁹=Mk 14³⁶=Lk 22⁴² we find 'O my Father,' 'Abba, Father' (the Aramaic word with its translation), and 'Father,' respectively; in Mt 5⁴⁵=Lk 6³⁵, Mt 10²⁹=Lk 12⁶, Mt 10³³=Lk 12⁹, the First Gospel has 'Father,' while the Third Gospel has 'Most High' and 'God'; in Mt 12⁵⁰=Mk 3³⁵=Lk 8²¹ the First Gospel has 'my Father which is in heaven,' while the Second and Third Gospels have simply 'God'; in Mt 23⁹=Mk 10⁴⁰ the Second Gospel strikingly lacks the words 'of my Father.' It seems probable that Jesus constantly used the title 'Father,' as the First and Fourth Gospels record; but that it had been largely suppressed or altered in the sources of the Second and Third Gospels, again for the reason that it was a characteristically Jewish designation.

to be made like unto his brethren' (He 2¹⁷). The second attributive to the Πάτερ in the clause of address, 'who art in heaven,' is a truly OT and Jewish phrase, which Jesus quite surely adopted and employed.* It expresses the transcendent position and character of God. In the pre-scientific age it was natural to assign God to a particular locality; the distant sky above the heads of men was logically chosen. But this local conception gradually retired before a growing sense of God's spiritual nature and omnipresence. With Jesus the phrase was a useful one (and we still find it so) to denote the separateness of God from men, His supermundane attributes, His absolute power and authority, His infinite character and qualities. Since the phrase meant these important things to the Jewish people of His day, and it was desirable that they should be in the mind of him who would pray to God, Jesus might well attach these words to His title of address in His model Prayer.†

The first petition (ἀγιασθήτω τὸ ὄνομά σου)‡ expresses the devout wish of the worshipper in view of what, according to the address of the Prayer, he conceives God to be, namely, that God may be fully recognized, honoured, and revered by all. The English word 'hallow' is no longer in common use; it meant to 'treat as holy,' to revere. Thus it was a proper translation of ἀγιαζεῖν (Lat. *sanctificare*), which, together with δοξάζειν, was employed in the LXX to render the Hebrew forms קדשׁ and כבוד. Calvin, Kamphausen, and some others have understood that 'the name' in this petition was to be taken in the sense of the Third Commandment, which forbade the misuse of, and disrespect to, the title of God (so also Mt 5²³⁻²⁷). This interpretation is true as far as it goes, but it is too restricted for so comprehensive a prayer as this. Rather, 'the name' is to be understood here in the Oriental sense, as a periphrasis for the Person Himself, as though it were said, 'May God receive due reverence.' To the Hebrew 'the name' stood for what the individual was who bore the name. God's name designated Him as He had made Himself known to men.¶ Therefore the petition prays that God may be perfectly acknowledged by all men, so that all that He is and does may receive due honour, and that men may commit themselves to Him as their Father (cf. Ro 14¹¹, Eph 3¹⁴⁻¹⁹).

The second petition (ἐλθέτω ἡ βασιλεία σου)¶ ex-

* This is shown by the frequent occurrence of the phrase in the First Gospel, e.g. Mt 5¹⁶ 45 48 61 14 26 32 71 21 16 23 33 129³⁰ 15¹³ 16¹⁷ 18¹⁰ 14 12 35 23⁹; cf. also Mk 11²⁵ 36 Lk 11¹³; its almost total absence from the Second and Third Gospels is another feature of the universalization of this material. For Jewish usage see *Aboth* v. 30; *Sotâ* ix. 15; *Yomâ* viii. 9; and Dalman, *Worte Jesu*, i. 150-159, 299-306. Wendt, *Lehre Jesu*, i. 62 f., can hardly be right in holding that this phrase is an addition in the Matthew passages, not to be attributed to Jesus.

† Whether the Prayer was originally given in Aramaic or Hebrew has been discussed, but without a certain conclusion. Chase is sure it was in Aramaic; see, further, Taylor, *Sayings of the Jewish Fathers* 2 (1897), p. 176 f.

‡ Compare the parallel clause in the Jewish synagogal prayer *Kaddish*: 'Magnificetur et sanctificetur nomen eius magnum in mundo' (Maimonides translation); see Achelis, *Bergpredigt*, p. 238 f.

§ See Ex 20⁸, Lv 21⁸ 22³², Nu 20¹³, Dt 32⁵¹, Is 29²³, Ezk 36²³; and in the NT, 1 P 3¹⁵.

¶ See Ps 51¹ 91⁰, Pr 18¹⁰. So the peculiar phrase (still in religious use) 'for his name's sake,' Ps 23³ 25¹¹ 31³ 79⁹; cf. Achelis, *Bergpredigt*, pp. 240-243.

¶ Compare here, also, the *Kaddish* parallel: 'Regnare faciat regnum suum.' Marcion, in his Lukan form of the Lord's Prayer, read as the second petition, not what we have here, but *δοξάζειν τὸ ὄνομα σου*, or another form of the same, *δοξάζειν τὸ ὄνομα σου* *καὶ τὸν πᾶν χρόνον*. The same thought in a more expanded form was known, as a feature of Luke's text, to Gregory of Nyssa and Maximus the Confessor; thus: *ἐλθέτω τὸ ὄνομα σου* *καὶ ἡ ἐκκλησία σου καὶ ὁ κόσμος σου* (cf. Westcott and Hort, *New Testament in Greek*, vol. ii. Appx.; Nestle, in *Encycl. Bibl.* iii. 2318). This petition for the Holy Spirit cannot be authentic in this connexion, for it has small attestation, is not suitable to the context, and is obviously a drastic substitution to bring into the Prayer a specific request for the Holy

presses the wonderful Messianic Hope of the Hebrews; it was in substance the prayer which for centuries Israel had addressed to God.* Jesus bade them continue this prayer for the coming of the Kingdom of God, but taught them the true conception of what that Kingdom was, and how it was to be accomplished. The Kingdom of God was Jesus' constant and all-inclusive term to denote the individual and social good which would come to men when they would trust themselves to God's guidance and conform themselves to His ideal (Mt 6³³=Lk 12³¹). In Jesus' conception the coming of the Kingdom was a process, a development through successive stages with a final consummation (Mk 4²⁶⁻³²). He established the Kingdom among men (Lk 17²⁰⁻²¹), His followers were to carry it forward (Mt 28^{19, 20}), and in due time He would bring about its complete realization (Mt 24. 25).† Our prayer, therefore, must be that God in His wisdom, power, and love may hasten the growth among men of righteousness, mercy, and peace; that the principles of the Gospel may prevail in individuals and in society as a whole, that humanity may become transformed into the likeness of Him who revealed to them the Divine ideal of God for His children.

The third petition (γενήθῃ τὸ θέλημά σου, ὡς ἐν ὁρατῷ καὶ ἐν ἑρῇ) was needed in the Prayer to guard the second petition against misinterpretation. It had become a prevalent misconception that the coming of God's Kingdom depended after all upon Himself, and that when He should choose to do so He could by His omnipotence bring that Kingdom into complete existence; so men had importuned God to become loving and forgiving towards them, and to grant to them the blessings which out of dissatisfaction or neglect He was withholding from them. Jesus makes that idea impossible when He gives this third petition, teaching that God's will must be absolutely done by all.‡ To do God's will, to accomplish His work, was the one purpose of Jesus' own life (Mt 26³⁸⁻⁴², Jn 4³⁴ 6³⁸ 12²⁷ 17), and He enjoined it upon all as the one comprehensive human obligation (Mt 7²¹, Jn 7¹⁷). Men must therefore co-operate with God in the realization of the Kingdom by making themselves, with God's help, what they should be, and by bringing in the true brotherhood of universal love and service.

The fourth petition § pertains to the physical Spirit which Jesus had included only by implication. The prominence given to the Holy Spirit in the Apostolic age has left its impress upon the Lukan account of Jesus' words; cf. Mt 7¹¹=Lk 11¹³, Mt 11²⁵=Lk 10²¹, also Mt 10²⁰=Lk 12¹².

* See art. MESSIAH in vol. iii.; *Encycl. Bibl.*, art. 'Messiah'; also Goodspeed, *Israel's Messianic Hope* (1900).

† See art. KINGDOM OF GOD in vol. ii.; also Wendt, *Lehre Jesu*, ii. 293-325. The verbal form *ἐλθέτω* does not favour the idea that the coming of the Kingdom is continuous; which part of the verb was used in the original Aramaic can only be matter of conjecture—one would suppose a jussive imperfect, and this would have presented no difficulty. At any rate, this petition must be interpreted in the light of Jesus' entire teaching concerning the Kingdom. The Greek *arist* here may be due to the idea held by all Christians in the Apostolic age, that the return of Christ was imminent, and that with His return He would bring the catastrophic consummation; this passage would then be one of a number in the Gospels which received an eschatological colouring in transmission, on account of the failure of the disciples to take completely Jesus' view of the nature and coming of the Kingdom.

‡ The conception that God's will is already perfectly done in heaven, by the angelic host, is at the same time an assurance and a model for the full realization of His will on earth among men. The angels are frequently mentioned both in the OT (Ps 91¹¹ 103²⁰) and in the NT (Mt 10¹⁰ 24³⁶ 26⁵³, Mk 6³⁸ 12²⁵ 13³⁷⁻³⁸, Lk 12⁸ 9 15¹⁰ 16⁸, Jn 15¹, He 14-14 12²² 23); on the Jewish angelology see art. ANGEL in vol. i.; *Encycl. Bibl.*, art. 'Angel'; also Ederstein, *Life and Times of Jesus the Messiah*, vol. ii. Appx.; Wendt, *Lehre Jesu*, ii. pp. 121-122.

§ Mt 6¹¹ τὸ ἄρτον ἡμῶν τὸν ἑπόμενον δίδου ἡμῖν τὸν ἄρτον ἡμῶν; Lk 11³ τὸν ἄρτον ἡμῶν τὸν ἑπόμενον δίδου ἡμῖν τὸν ἄρτον ἡμῶν. It is striking that the strange word *ἐπόμενον*, which is found nowhere in all Greek literature outside of this passage (so Origen, *de Orat.* 27), should appear in both of these widely divergent accounts of the Lord's Prayer. The fact can be explained only by the

needs of men, upon which the spiritual life is dependent during this earthly stage of existence.* The conditions under which we live are created by God, He has full knowledge of them (Mt 6³ 28-32), and He stands ready to supply what is necessary to human well-being (Mt 5⁴ 6³³ 7¹¹). This providential bestowal comes, of course, not as a pure gratuity, but as a return for the honest, energetic labour of men. The 'bread' which is asked for in this Prayer is meant in the wider sense as referring to all necessary food; and by implication it certainly includes all those things which are essential to physical welfare. The petition contemplates only a simple, frugal life, enjoining trustfulness and contentment therein. In other words, the idea of the Prayer is that men are to ask God confidently for what they need; but only for what they really need, and only as they need it. The disciples of Jesus are to live trustfully in the present and for the present, without anxious concern as to the future (Mt 6³⁴). About this general interpretation of the fourth petition there can be no question. A difficulty exists, however, as to the precise force of *ἐπιούσιον*; since it is a *hapazlegomenon*, we cannot determine its usage from other contexts; the Greek word most like it is *περιούσιος*, which appears first in the LXX. Recent scholars are largely in agreement that the word is derived somewhat irregularly from *ἐπι+εἶναι* in a fem. ptep. form, signifying 'being unto,' 'pertaining to'; so that the prayer would be, 'Give us to-day the bread which pertains (to this day),' i.e. just so much as is needed for to-day to meet one's physical requirements (cf. Ja 2^{15, 16}).†

hypothesis that these two Greek forms of the Prayer must have had a literary relation to one another in some stage of their transmission.

* Taylor, *Sayings of the Jewish Fathers* 2, p. 125, thinks that this petition contains an allusion to the giving of the manna, Ex 16⁴; cf. Ps 78²⁴, Wis 16²⁷, Jn 6³².

† So Achelis, *Bergpredigt*, pp. 265-271; H. Holtzmann, *Hand-Comm.* u. d. *Synoptiker*, p. 116; Kamphausen, *Das Gebet des Herrn*, p. 97 ff.; Leo Meyer in Kuhn's *Zeitschr. f. vergleich. Sprachforschung*, vii. 401 ff. (though he afterwards withdrew this opinion, in *Nachrichten d. kgl. Gesellschaft der Wissenschaften zu Göttingen*, 1886, p. 245 ff.); Tholuck, *Bergpredigt*, pp. 375-385 (Eng. tr. 341-353); B. Weiss, *Meyer-Komm.* u. d. *Matt.* *evang.*, p. 135 f.; Wendt, *Lehre Jesu*, ii. 239 f.; Taylor, *op. cit.* pp. 125-127, 178-186, 190 f.; as also Ewald, Nosgen, Bassett, and many others. A list of the older literature upon the subject may be seen in Tholuck, *loc. cit.* Other interpretations of the passage are: (1) that the derivation of *ἐπιούσιον* is from *ἐπι+the noun σῖσις*, which in philosophical usage signified 'subsistence,' 'existence'; therefore the petition would read, 'Give us to-day our bread for subsistence,' i.e. that bread which serves to maintain our physical existence. So Crenier, *Bibl.-Theol. Wörterbuch*, in *loc.*; also Origen, Chrysostom, Theophylact, Maldonatus, Bleek, Keil, Kuinol, Kubel. This conception, however, seems forced, and too technically philosophical; nor is there any certain parallel instance of such a usage of *σῖσις*. It differs from the view adopted above in stating the end of the giving instead of the measure, for what purpose the bread is asked rather than the quantity of bread asked for. (2) That the derivation of *ἐπιούσιον* is from *ἐπι+εἶναι*, and that with it is understood in sense a *σῖσις* (cf. Ac 16¹¹ *σῖσιν*, 23¹¹, Pr 27¹ LXX); it then means 'the coming day,' and the petition says, 'Give us to-day our bread for to-morrow.' So Lightfoot, *Fresh Revision of English N.T.* 3 (1891), Appx. I.; Schmiedel in Winer's *Grammatik d. NTlichen Sprachidioms* 8 (1894), pp. 180-188; also Grotius, Wetstein, Bengel, Fritzsche, Winer, Gore, Bruce, Meyer, Marshall, O. Holtzmann, and RVm. The difficulty with this temporal interpretation of *ἐπιούσιον* is that it contradicts the very idea of the petition as intended by Jesus: instead of having men pray for to-morrow's food, He would have them pray for to-day and trust for to-morrow. No other meaning can be derived from the passage Mt 6¹¹⁻¹², ending with the words, 'Be not therefore anxious for the morrow; for the morrow will be anxious for itself. Sufficient unto the day is the evil thereof.' This temporal interpretation also throws an incongruous meaning into the Lukan form of the prayer, 'Give us every day the bread for the next day'; that would be a mechanical kind of Providence. (3) That the 'bread' for which this petition asks is to be understood spiritually, at least in its primary reference. This was the favourite interpretation among the Fathers of the early Christian centuries; it arose easily from the figurative use of 'bread' in Jn 6⁴⁸⁻⁵⁸, and was suitable to the allegorical mode of the time. Augustine held the 'bread' to refer to three things, in an ascending scale of significance: (a) physically, actual food; (b) intellectually, the word of Christ; (c) spiritually, the Lord's Supper. For the

As *περισσότερον* means 'beyond what is necessary,' so *ἐπιούσιον* means 'exactly what is necessary.' This is the conception of supply which we find in Pr 30⁹ 'Feed me with the food that is needful for me.' There are similar Targumic and Talmudic expressions. The wording of the petition as given by Matthew is a specific request for a single occasion, understanding that the Prayer will be repeated as frequently as need arises, presumably each day; * while Luke's wording presents a general request for a constant supply: it would seem clear that the Matthean form is of greater authenticity.

The fifth petition † concerns the present religious status of the man in relation to God. The worshipper is to measure himself against the Divine ideal of the highest, fullest self-development, and of complete love and service to God and one's fellow-men. He is to observe how far he has failed to meet the obligations placed upon him by God, and why he has failed to meet them. When a man has made this inventory of his physical, moral, and spiritual status, with a sincere repentance for all his transgressions and shortcomings, and with a supreme purpose to achieve the Divine ideal for men, he is ready to ask God's forgiveness in the words of this petition. Holding that God's

spiritual meaning also stood Tertullian, Cyprian, Cyril of Jerusalem, Athanasius, Ambrose, and Jerome; and in modern times Delitzsch, Olshausen, Stier, McClellan. (4) That the *ἐπιούσιον* has a temporal signification referring merely to the day of the prayer. So the RV, 'Give us this day our daily bread,' and this is the wording in common use in Christendom to-day, made so by the popular translations of the Bible. It is redundant in expression, and its only merit is simplicity; for it lacks the profound meaning which inheres in the *ἐπιούσιον* as interpreted in the text above. Lately this view has been again defended by Nestle (*ZNTW*, 1900, pp. 250-252; *Encycl. Bibl.* iii. 2819f.) on the basis of the reading *ἐπιούσιον* (=continual), which is found in Syr cur at Mt 6¹¹ and Lk 11³, and in Syr sin at Lk 11³, the Matthean section being wanting; also in the Syriac *Acts of Thomas* (ed. Wright, p. 313). This *ἐπιούσιον* is said to be the regular Syriac word for the translation of the Heb. *יומיו*; and Nestle has learned that a Jewish translation of the First Gospel into Hebrew, made in the 16th cent., rendered the *ἐπιούσιον* by *יומיו*. He supposes, therefore, that the Greek *ἐπιούσιον* in the Lord's Prayer represents an original *יומיו* *יומיו*, and says that the translation 'our daily bread' is the best English translation of the Greek text. The difficulty with this interpretation is twofold: (a) it gives a purely tautological rendering, which is unlikely to have been original; (b) it altogether fails to account for the presence in the Greek text of this strange word *ἐπιούσιον*, which seems to have been created to express an intricate thought for which no current Greek word was suitable; but if the thought was so simple as 'continual' or 'daily,' there were several common expressions at hand to use (e.g. the *ἐν παντί* *ἐπιούσιον* of Lk 11³ 18⁷), and the LXX had already employed such (cf. Ex 5¹⁸ 16⁸, Nu 4¹⁶, Ps 67²⁰, Dn 15¹ Mac 6²⁷ 8¹⁵); while the early Syriac reading may well be nothing more than a simplification of a difficult expression whose exact meaning had not been clearly conveyed by the *ἐπιούσιον*, and which in the circle of the translator was no longer understood. Chase, *Lord's Prayer in the Early Church* (1891), pp. 44-53, holds that the original form of the petition was, 'Give us our (or, the) bread of the day,' and suggests that the newly coined word *ἐπιούσιον* was later interpolated to meet liturgical exigencies in connexion with the use of the Lord's Prayer in the evening. With this reading the Prayer could be used in the morning, and would ask bread for that same day; or it could be used at night, and would ask bread for the morrow; however, the *ἐπιούσιον* so replaced did not in fact disappear, but remained in the text as a confusing redundancy. Chase's view is accepted by v. d. Goltz, *Das Gebet in der ältesten Christenheit* (1901), p. 49f.

* B. Weiss, *op. cit.* p. 136, holds that the *ἐπιούσιον* in the Matthean form of the petition is a subsequent addition, bearing witness to the fact that the Prayer was assigned to daily use in the early Christian liturgy. That the Prayer was used daily, or oftener, in the earlier part of the 2nd cent., is established by the *Teaching of the Twelve Apostles* (viii. 3), and other witnesses; but it does not follow that the *ἐπιούσιον* of Mt 6¹¹ is merely a product of that practice. There is no inherent reason why Jesus should not Himself have given the corresponding Aramaic word in this connexion. The Prayer was given to the disciples for regular use, because they wished some set form of prayer to recite in the common liturgical manner of the Jews (cf. Lk 11¹). The 'day' was a natural and convenient period of time (cf. Mt 6³⁴) for the repetition of the Prayer. Why should not Jesus have arranged the wording on that basis?

† Mt 6¹¹ *καὶ δός ἡμῖν τὸ ἐπιούσιον ἡμῶν, ὅς καὶ ἡμεῖς ἀφάρμοστοι τοῖς ἐπιούσιον ἡμῶν.* Lk 11³ *καὶ δός ἡμῖν τὰς ἀμαρτίας ἡμῶν, καὶ ὅπως ἂν τοῖς ἀφάρμοστοι παρὰ ἐπιούσιον ἡμῶν.*

will is the only law of life, and that His Kingdom is the only end of life, the worshipper needs God's forgiveness for his spiritual comfort and inspiration, in order that he may start anew each day towards the achievement of the ideal. It is in this fundamental and comprehensive sense that the term *ἐπιούσιον* is figuratively employed in this petition, including everything that we should be and do towards God, our fellow-men, and ourselves.* The second clause contains an explicit condition of this Prayer, that men must feel and exercise the same spirit of forgiveness towards one another which they wish God to show towards themselves. Jesus places these words in the petition, in order that men may be face to face with this condition whenever they pray to God for their own forgiveness. This principle of love as the basis of all human and Divine relations is a constant teaching of Jesus, and furnishes the key to the Sermon on the Mount, cf. esp. Mt 5⁷. 22. 43-48; it is also most impressively set forth in the teaching and parable of Mt 18²¹⁻³⁵. In the Lord's Prayer as recorded by Matthew this idea is further strengthened by the two added verses, 6^{14, 15}, with which Mk 11²⁵ may be compared.† It is not to be understood that the *ὡς καὶ* which introduces Matthew's second clause signifies a *quid pro quo* kind of forgiveness on God's part, as though God forgave men only in a measure proportionate to their own forgiveness. The words might have this force (as in Mt 20¹⁴, Rev 18⁶), but it is not the only meaning for them (cf. Mt 18³³). Such a commercial idea is inconsistent with the method of God as abundantly shown in Jesus' teaching. God is in amount more loving and forgiving than men can be, but He requires that men also shall be loving and forgiving.‡

The sixth petition,§ which closes the Lord's Prayer, provides for the moral and spiritual welfare of the individual in the future. As the fifth petition sought forgiveness for past failures to do God's will, so the sixth petition seeks His protection from future failures. The worshipper, conscious of his own weakness, puts his dependence upon God. He prays for deliverance from those situations in life where he will be liable to yield

* In classical Greek, *ἐπιούσιον* was used generally of financial debts, and it was probably to avoid this ambiguity that Lk 11⁴ reads *ἀμαρτίας* instead (originally Luke's account must have had *ἐπιούσιον* like Matthew's, as is seen by the *ἐπιούσιον* in the second clause; so Chase, *Lord's Prayer in the Early Church* (1891), p. 55, and Page, *Expositor*, 3rd ser. vol. vii. p. 437). But *ἐπιούσιον* (and its kindred forms) is a frequent NT word for moral and spiritual obligation (Lk 17¹⁰, Jn 13¹⁴, Ro 15¹⁻⁷, Gal 5⁸), although used also in the money sense (Mt 13⁹⁸, Lk 7⁴¹ 10⁵, Ph 1⁸). Luke's *ἀμαρτίας* lacks the Aramaic colour, the strength and the comprehensiveness of the *ἐπιούσιον*. In the EV also the word 'debts' gives a deeper meaning when rightly understood than the word 'sins,' since the latter term tends in popular usage to signify only positive, flagrant wickedness. And still less satisfactory is the word 'trespasses,' given currency in this petition by the Episcopal Prayer-Book (apparently from Tindale (? by reading 'trespasses' from v. 14c into v. 12)); for it is not a proper translation of either *ἐπιούσιον* or *ἀμαρτίας*, and is the most limited in its scope of the three English words.

† Mt 6^{14, 15} has apparently found its way into the Sermon through its previous connexion with the Lord's Prayer. Whether it had its place historically in that connexion is uncertain. Mk 11²⁵ has a different setting for the passage, but one due to topical association rather than to original position. There is nothing unlikely in the hypothesis that Jesus, after giving the Prayer, spoke in explanation of it, and that this fragment was a part thereof. In these two verses, as in Mk 11²⁵, *παρεστώμενα* is used instead of *ἐπιούσιον* or *ἀμαρτίας*.

‡ Luke's variant, *καὶ γὰρ*, is distinctly intended to remove the possible misinterpretation that God forgives a man just to the extent that the man forgives others. But the Matthean wording gives evidence of being a closer translation from the Aramaic. Another instance of Lukan modification is his *ἀφάρμοστοι* in this clause instead of Matthew's *ἀφάρμοστοι*, to give the petition a general character instead of the specific import of the original Prayer. It was noted that in the fourth petition changes were made for the same purpose, Luke having *δίδω* instead of *δός*, and *ἐν παντί* *ἐπιούσιον* instead of *ἐπιούσιον*.

§ Mt 6¹³ *καὶ μὴ ἐσθραφίσθης ἡμεῖς ἐκ παραπλάνης, ἀλλὰ ὅπως ἂν ἀπο τοῦ πονηροῦ.* Lk 11^{4b} *καὶ μὴ ἐσθραφίσθης ἡμεῖς ἐκ παραπλάνης.* The first clause is the same in both accounts, while the second clause does not appear in Luke (see above).

to wrong or false influences. But inasmuch as men must undergo trials, and in them work out their own character and service, Jesus gives to this petition a second clause, which provides against necessary trials by asking for strength to come through them safely. We may then paraphrase the sixth petition of the Prayer in this way: 'Spare us as much as possible from all trials in which there is danger that we shall fail to do Thy will; but, so far as we must meet trials, give us the strength necessary to withstand the temptations to evil which are involved in them.*' It thus becomes clear that the second clause of the petition, 'but deliver us from evil,' is not a separate, seventh petition, but an essential element in the sixth, pertaining to those trials from which God cannot and should not deliver us. In them we pray Him to preserve us from falling. The 'evil' which is meant is, of course, moral and spiritual transgression or failure of doing God's will; and the context therefore makes it improbable that the *τὸ ἁγίου* should have been intended to refer concretely to the devil in person.† The term *πειρασμός* is used with a wide range in the NT, having both a neutral meaning (=trial) and a bad meaning (=malicious temptation).‡ Only in the former, neutral sense can God be spoken of as 'tempting' men, i.e. bringing them into situations which test their character and thus promote their growth. Such trials involve a possible lapse into evil, and must

* Jesus' Gethsemane experience illuminates the words of this petition (cf. Mt 26:36-46, esp. v. 39). The Saviour is here face to face with the bitterest trial of His life; the attitude of the Jewish nation towards Him has come to be that of fixed and final rejection; the chosen people are ready to repudiate their Messiah with a violent death, and so to fail of fulfilling their Divine mission to the world (cf. Mt 23:37-39). Jesus in the garden feels that He cannot endure this; He is in agony that God should seem to allow it, and prays that He may be spared this trial—that there may be some other outcome of the situation; nevertheless, He has no other desire than that God's will should be done. The prayer of Jesus was answered not by a removal of the trial, but by a Divine reassurance, and an impartation of strength for its endurance (cf. Lk 22:42, which gives an essentially correct idea, even if textually uncertain). One may also compare St. Paul's experience when he three times prayed for the removal of his 'thorn in the flesh'; God's reply to him was, 'My grace is sufficient for thee; for power is made perfect in weakness' (2 Co 12:9-10; cf. also 1 Co 10:12).

† The objection to taking the *τὸ ἁγίου* as a masculine (with Tertullian, Cyprian, Origen, Chrysostom, Theophylact, Calvin, Erasmus, Bengel, Meyer, Olshausen, Ebrard, Fritzsche, Hanne, Gore, H. Holtzmann, Lightfoot, Thayer, Plummer, Chase, v. d. Goltz, Nestle, and the RV) does not lie in the fact that the phrase could not be so used, for there are a number of clear NT cases where *ὁ πειρασμός* refers concretely to the devil (cf. Mt 13:19, 33, Eph 6:16, 1 Jn 2:13, 3:12, 5:18); nor in the meaning of the collocation *πειρασμός καὶ ὁ ὄχιος*, which is used of both persons (Ro 15:31) and things (2 Ti 4:18); nor in an avoidance by Jesus of the current Jewish conception and terminology regarding the personal devil (cf. Mt 4:10, 12:27, 13:33, Lk 10:18, Jn 8:44), for, so far as we can discover, He did not give any new teaching on this point (cf. Wendt, *Lehre Jesu*, II, 121-126). The objection lies rather in the thought of the petition itself, which cannot be, 'Bring us not into trial, but deliver us from the devil,' since this destroys all connexion between the two clauses, though the *καὶ* demands a connexion; nor, 'Bring us not into the temptation of the devil, but deliver us from the devil,' which is improbable tautology. So that some ancient and many modern scholars interpret the *τὸ ἁγίου* as a neuter (Augustine, Luther, Stier, Ewald, Keil, Nösgen, Tholuck, Alford, Burgon, Cook, McClellan, Achelis, Ibbeken, B. Weiss, Taylor, and others). This neuter use of *τὸ ἁγίου* to denote all moral and spiritual evil may be seen in Mt 5:37, Lk 6:45, Jn 17:15, Ro 12:21, 2 Th 3:3, 1 Jn 5:19 (the RV is probably wrong in translating most of these as masculines); cf. also 2 Ti 4:18. On *πειρασμός* see Cremer, *Bibl.-Theol. Wörterbuch*, in loc.; Achelis, *Bergpredigt*, pp. 286-289; letters in the *Guardian* by Lightfoot (Sept. 7, 14, 21) and Cook (May 21, Nov. 28) (Lightfoot's letters appear in *Fresh Revision of the English N.T.*, 1891, Appx. II.); Chase, *Lord's Prayer in the Early Church* (1891), pp. 85-167; Hatch, *Essays in Biblical Greek* (1889), pp. 77-82. Taylor, *Sayings of the Jewish Fathers* (1897), pp. 37, 64, 128-180, 147-150, 191 f., takes the *τὸ ἁγίου* as referring to the *ἡγία* ὄχιος, man's evil nature (Gn 8:21 'the imagination of man's heart is evil from his youth,' cf. Ja 1:19-20); see also Porter, 'The Yeger Ha-ra,' in *Yale Biblical and Semitic Studies* (1901), pp. 98-150.

‡ On the NT usage of *πειρασμός*, see Cremer, *Bibl.-Theol. Wörterbuch*, in loc.; Tholuck, *Bergpredigt*, pp. 394-401 [Eng. tr. pp. 357-362]; Achelis, *Bergpredigt*, pp. 280-284; Mayor, *Comm. on James*, 1892, pp. 175-183.

cause anxiety and apprehension; so that men may well fear them and pray for deliverance from them. Jesus said to His disciples, 'Watch and pray, that ye enter not into temptation: the spirit indeed is willing, but the flesh is weak' (Mk 14:38, cf. Ja 1:12). But, since God brings these trials for the individual's good, He will never allow the tried person to fall into evil if he will commit himself wholly to God's guidance and care through the experience (cf. 1 Co 10:13, He 2:18, 4:15, Ja 1:2-4, 12, 1 P 1:6).

(5) The Lord's Prayer is thus seen to be an epitome of Jesus' teaching; it contains the essential ideas of God and human duty, expressed in the briefest, simplest, and most impressive words. The vital truths of the Gospel are presented in such a way that any and every man can grasp them, and can see them in their right perspective and relations.* Since the Prayer was intended for universal use, its meaning must be readily intelligible to all; it must be not intricate, but simple of interpretation. And the Lord's Prayer is adapted to every kind of Christian use. It is designed for repetition as it stands, both in private and in public devotions. It is also a pattern prayer, after which all prayer to God should be modelled. Here we learn what things are to be prayed for, how God's glory, Kingdom, and will take precedence of the individual's affairs, and in what spirit all prayer is to be made. The religious practice of Jesus' day too often regarded the virtue of a prayer as consisting in its recital, and measured its value by its length or repetition (cf. Ac 19:4). The Gospel of Matthew (6:14) has preserved in connexion with the Lord's Prayer some words of Jesus which were directed against this abuse. Since God knows what things are necessary for men, He does not need to be informed of them; and since He is a loving Father who cares for His children, He does not have to be importuned to give His blessings. These facts do not make prayer useless; on the contrary, real prayer is possible only on the basis of them. God never wished the empty repetition of prayer formulae, which is a waste of time and strength; and it was an entire misconception of Him that He had to be coaxed into goodwill towards men, or solicited to supply their needs. Prayer, in Jesus' conception, is the loving, obedient and trustful communion of men with their Heavenly Father. It brings men comfort, joy, and peace; it reassures and strengthens them in all their labours and experiences; it brings them to know only God's will in their lives, and to seek only its full realization. As we learn to know God in the words and face of Christ, we pray more instead of less; prayer becomes a privilege instead of a duty. Indeed, to the true Christian, prayer is the atmosphere in which he lives. Instead of occasional periods or moments of prayer, the whole life becomes a prayer, so that we walk and talk with God. Into this perfect communion with God the Lord's Prayer leads us, voicing all our aspirations and petitions, when we come to appreciate its full significance.†

* Similarly Harnack, *Das Wesen des Christentums*, 1901, p. 42 [Eng. tr. p. 65]: 'There is nothing in the Gospels that tells us more certainly what the Gospel is, and what sort of disposition and temper it produces, than the Lord's Prayer. With this Prayer we ought also to confront all those who disparage the Gospel as an ascetic or ecstatic or sociological pronouncement. It shows the Gospel to be the Fatherhood of God applied to the whole of life; to be an inner union with God's will and God's Kingdom, and a joyous certainty of the possession of eternal blessings and protection from evil.'

i. *Devotion to the Kingdom.*—Mt 6¹⁰⁻³⁴ (cf. Lk 12^{23, 34} 11³⁴⁻³⁶ 16¹³ 12²²⁻³¹). Nearly all of those scholars who regard the Sermon in the First Gospel as a composite production in whole or in part, look upon this section as extraneous to the original discourse, being brought in here from some other historical connexion.* Two arguments against its present position are offered: (a) the subject-matter of the section is thought by many to be remote from the theme of Mt 5^{17-6¹⁸}; and (b) this material is found scattered in the Gospel of Luke, none of it appearing in his parallel discourse (6²⁰⁻⁴⁶). To the first argument it may be replied (see above, ii. 3) that the theme of the Sermon does not lie in Mt 5¹⁷⁻²⁰, but is more general, pertaining to the true nature and duty of righteousness. So that Mt 5^{17-6¹⁸}, while containing the longest section of the reported discourse, is by no means to be regarded as the only original matter in Matthew's account. There is an abrupt transition, to be sure, between Mt 6¹⁸ and 6¹⁹; but this abruptness may be due to the fact that we have only extracts or a digest of the historical Sermon. Moreover, the teaching contained in Mt 6¹⁹⁻³⁴ would seem to be germane—indeed essential—to a setting forth of the true righteousness; the ideal life must be free from material aims, divided efforts, and distracting anxieties. The second argument presents a greater difficulty, for Luke's arrangement of this material in other connexions must be explained. Concerning this it may be said that the Lukan Sermon had received severe treatment in transmission, as already frequently noted; perhaps the exclusion of this section was a part of that process. Also, that the position assigned to this material in the Third Gospel is surely not historical; it appears in the so-called 'Perean section,' but such teaching as this belonged in all probability to the Galilean ministry. Further, the Lukan settings of these verses show either no contextual relations, or only literary ones; they are not associated with specific, distinct events. Therefore, while the question must be counted an open one whether Mt 6¹⁰⁻³⁴ belonged to the historical Sermon, good reasons are at hand for treating the section as original in this connexion.

The passage has a real unity of thought, to the effect that there is but one aim in life. This aim is the complete realization of the Kingdom of God, in which every man attains that character and performs that service which God requires. The idea thus finds its general statement in Mt 6³³ 'Seek ye first his kingdom, and his righteousness; and all these things shall be added unto you.'†

Also, the Patristic treatment of the Prayer by Tertullian (*de Oratione*), Cyprian (*de Oratione Dominica*), and Origen (*τὰς Εὐχὰς*).

* So Feine, Godet, H. Holtzmann, B. Weiss, Wendt, Heinrici, Bacon, and others. Its Matthean position is defended by Tholuck, Meyer, Keil, Morison, Broadus, Steinmeyer, H. Weiss, Nösgen, Grawert. Achelis regards the section as original here, with the exception of vv. 20, 21, 24; and other partition theories are offered.

† Mt 6³³ ζητεῖτε δὲ πρῶτον τὴν βασιλείαν καὶ τὴν δικαιοσύνην αὐτοῦ, καὶ ταῦτα πάντα προστεθήσονται ὑμῖν. Lk 12³¹ πλὴν ζητεῖτε τὴν βασιλείαν αὐτοῦ, καὶ ταῦτα προστεθήσονται ὑμῖν. There is much textual variation as respects the wording of the Matthean verse. It is difficult to determine the precise original form of this saying of Jesus. Bruce thinks it was simply 'Seek ye his kingdom,' all else in the present Greek forms being expansion for purposes of interpretation; but it seems probable that the second clause was also given, as bringing the saying more closely into relation with its context. The *καὶ* which introduces the Lukan form is an idiosyncrasy of the Third Gospel (cf. Lk 6^{34, 35} et al.). Matthew's *πάντα*, in the second clause, is likely to have been an expansion. The *πρῶτον* of Matthew may belong to the original saying. On this supposition it cannot be understood to mean that there are two things to be sought for, one before the other; it is to be interpreted, not numerically, but qualitatively—there is just one thing to live for, the King-

dom; and the necessities of physical existence should be trusted to God's providence. The *πρῶτον* has then disappeared from the Lukan form, perhaps because of its ambiguity and consequent danger of being misunderstood. Whether the historical saying had 'the kingdom,' or 'his kingdom,' or 'the kingdom of God,' all of which are attested, can only be matter of conjecture, and is unimportant. Lastly, Luke does not have the *τὴν δικαιοσύνην* which is given in this saying by Matthew (whose *αὐτοῦ* probably limits also the *βασιλείαν* as in RV). Perhaps it was dropped from the Lukan sources because it was a technical Jewish term; it has been noted above that *δικαιοσύνη* does not appear in Luke's Sermon, and in his Gospel only at 17². Or, its presence in Mt 6³³ may be due to an expansion of the original saying, making a closer verbal connexion of the verse with the Sermon in Matthew (cf. 5^{6, 10, 20} 6¹). This would be a probable explanation of its presence on the theory that Mt 6¹⁰⁻³⁴ has been imported into the Sermon in the course of transmission. But the *τὴν δικαιοσύνην* may also be original in this saying. If so, the 'righteousness' referred to is that actual perfect character and conduct on the part of men with which this whole discourse is concerned (so Tholuck, Achelis, B. Weiss); not a righteousness which God imparts to the believer (Meyer, Ibbeken), nor the righteousness of faith according to the Pauline forensic sense. It is thus the righteousness which God requires, that complete conformity to His will which brings in the consummated Kingdom of God.

* According to the teaching of vv. 19-21,† a man is not to devote himself to an accumulation of wealth for its own sake, or for selfish use. His time is not to be occupied with transient labours, social trivialities, vain displays, and empty talk. 'To lay up treasure in heaven' is to be and to do those things which are pleasing to God, to live nobly, purely, and helpfully. Jesus condemned in the strongest language the kind of life which seeks, first of all, for the gratification of greed and selfish ambition. When a certain man asked Jesus to assist him in securing some property, he rebuked him, and said to His hearers, 'Take heed, and keep yourselves from all covetousness; for a man's life consisteth not in the abundance of the things which he possesseth.' And He gave the significant parable of the Rich Fool, who must leave all his wealth at his death, adding, 'So is he that layeth up treasure for himself, and is not rich toward God' (Lk 12¹³⁻²¹). To make material things the chief end of life is to reverse the true relation of body and spirit. Immortal spirit is the permanent, ultimate thing for which our lives are to be lived. The possession or the accumulation of wealth is not forbidden by Jesus (see above, ii. 4a), but He insists that wealth is a means, never an end; and that wealth must be conscientiously used for the highest good, or it becomes a curse to its owner (cf. Mk 10¹⁷⁻²², Lk 16¹⁻⁹).‡ The right Christian attitude is not a despising of riches, but a true valuation and employment of them for human well-being. The ascetic life, the frivolous life, the indolent life, are

dom; and the necessities of physical existence should be trusted to God's providence. The *πρῶτον* has then disappeared from the Lukan form, perhaps because of its ambiguity and consequent danger of being misunderstood. Whether the historical saying had 'the kingdom,' or 'his kingdom,' or 'the kingdom of God,' all of which are attested, can only be matter of conjecture, and is unimportant. Lastly, Luke does not have the *τὴν δικαιοσύνην* which is given in this saying by Matthew (whose *αὐτοῦ* probably limits also the *βασιλείαν* as in RV). Perhaps it was dropped from the Lukan sources because it was a technical Jewish term; it has been noted above that *δικαιοσύνη* does not appear in Luke's Sermon, and in his Gospel only at 17². Or, its presence in Mt 6³³ may be due to an expansion of the original saying, making a closer verbal connexion of the verse with the Sermon in Matthew (cf. 5^{6, 10, 20} 6¹). This would be a probable explanation of its presence on the theory that Mt 6¹⁰⁻³⁴ has been imported into the Sermon in the course of transmission. But the *τὴν δικαιοσύνην* may also be original in this saying. If so, the 'righteousness' referred to is that actual perfect character and conduct on the part of men with which this whole discourse is concerned (so Tholuck, Achelis, B. Weiss); not a righteousness which God imparts to the believer (Meyer, Ibbeken), nor the righteousness of faith according to the Pauline forensic sense. It is thus the righteousness which God requires, that complete conformity to His will which brings in the consummated Kingdom of God.

* Feine thinks that vv. 22-24 are interpolated into this passage from another connexion; Achelis thinks the same of vv. 20, 21, 34, and B. Weiss of v. 22². These are possible views, but there is not much to substantiate them. Matthew's setting for these verses is as good as Luke's, or even better.

† Lk 12³¹ has the same thought, but the wording is characteristically different—the 'Sell that ye have and give alms' is a feature of the Third Gospel's exaltation of poverty, as in the Beatitudes and Woes (6²⁰⁻²⁶). It is striking that the two accounts are in almost exact agreement on the essential utterance, 'Where your treasure is, there will your heart be also.' So Paul in Col 3².

‡ See Wendt, *Lehre Jesu*, ii. 163-168.

all alike wrong; no less wrong than the life of worldly pride and ambition. Poverty is not righteousness, nor is it even meritorious; men must be provident and self-supporting. The accumulation of material goods, when not carried on by dishonesty, oppression, or disregard of others' needs and rights, may minister to the highest welfare of one's fellow-men.

Still more specifically does Jesus say, in vv. 22-24,* that the Kingdom must be an exclusive aim. Using the physical eye, which illuminates the body, as a figure (cf. Ps 119¹⁸, Mk 8¹⁸, Lk 24²¹), He says that the spiritual discernment must be kept clear in order that one may not go astray from the path of highest duty. A divided aim, which endeavours to combine spiritual and material interests, is impossible; one cannot strive for spiritual goods part of the time, and for earthly goods the other part. Special moments of lofty aspiration, of unselfishness, of generosity, come to almost every one; but in Jesus' thought these things will become habitual and supreme in the true Christian. Everything must be made subordinate and contributory to the attainment of righteousness and the realization of the Kingdom.

But what of our material needs—food, clothing, and shelter, means and opportunities for mental and spiritual growth? Must not life be largely a struggle for these earthly, transient things? To this fundamental problem of human existence Jesus gives an explicit answer in vv. 25-34.† It is that God knows these needs of men, and wills to provide for them (v. 32¹); men should depend upon and trust Him for those things necessary to life. If the Heavenly Father cares for the birds and the flowers, He will certainly care for His higher human creatures. Men, therefore, must not be anxious about these things; they must live trustingly for to-day, leaving to-morrow to God (v. 34). And so in the Lord's Prayer He taught them to pray, 'Give us this day the bread suited to our need.' Here again Jesus is setting forth a principle of life, not laying down a precept to be literally applied. No one could suppose Him to advocate a purely hand-to-mouth existence, like that of the animals; the higher well-being of the individual or the race could not be accomplished by such a manner of living. Common-sense supplies the interpretation that Jesus contemplates labour, prudence, and forethought for necessary

material things; in general God provides, not the things themselves without effort on men's part, but the way by which with effort men can secure what they need. And it is no life of ease and luxury to which God calls us, but a working, frugal life. What Jesus wishes is that in it we should be free from the distraction and anxiety which come to those who will not put themselves wholly into God's hands and trust Him for everything. Each day as it comes is to be dealt with in the present, leaving the future with God: if we do our best to-day, God will take care of to-morrow (cf. Ro 8²⁸). Why should it not be so? God has a great purpose in the world, which men are to help Him to accomplish; assuredly, He will care for and assist those who accept their task and sincerely strive to perform it.

j. *The Treatment of Others.*—Mt. 7¹⁻¹²=Lk 6³¹⁻⁴² (cf. Lk 11¹⁻¹³). The main idea of this passage lies in vv. 1-6, 12 (vv. 5, 7-11 belonged originally to other connexions), and pertains to the right attitude and conduct towards our fellow-men. The verses, therefore, form a fourth section in Jesus' exposition of the true righteousness, co-ordinate with sections 5²¹⁻⁴⁸ 6¹⁻¹⁸ 6¹⁹⁻³⁴. Their teaching is twofold: men are not to be of a censorious disposition towards one another (vv. 1-6), and they are to show the same respect, kindness, and helpfulness to others which they themselves would like to receive (v. 12). The two teachings contained in vv. 6, 7-11 are also of interest and importance, but they interrupt the sequence of thought in the Sermon. It is the view of many scholars that the 'Golden Rule' in v. 12 follows logically upon vv. 1-6, and not only finishes this section, but in a way forms a closing utterance for the body of the discourse from 5²¹ onward, 7¹²⁻²⁷ being in the nature of a hortatory conclusion.*

Mt 7¹⁻⁶ finds its parallel in Lk 6³⁷⁻⁴², the two accounts showing the usual amount of similarity and variation.† While the Lukan context gives a somewhat different aspect to the teaching, the substance is the same. Jesus is here setting forth an essential principle of all true righteousness, on the recognition and practice of which depends the realization of the individual and social ideal. This principle requires that men shall not be critical, fault-finding, and flaw-picking in thought or conduct towards one another. The only right attitude is a full, penitent recognition of one's own weak-

* The Lukan parallels 1134-36 1618 again have the same thought as the Matthean passage, but with much variation; except that in the verse about the 'two masters' there is a remarkable verbal agreement. The word 'mammon' is a transliteration from the Aramaic מַמְּוֹן, and signifies here the riches which have become an idol to be worshipped and served.

† Lk 12²²⁻³¹ furnishes a parallel for Mt 6²⁵⁻³³, but not for v. 34, which is found only here in the Gospels; there are good reasons for thinking that this verse belonged originally to the connexion in which it here appears. The phenomena of the parallel passages are as usual: striking likeness in certain clauses, but many important additions, omissions, and variations. Luke's account has obviously undergone adaptation for Gentile use, as seen in his 'ravens' where Matthew has 'the birds of the heaven,' 'God' and 'Father' where Matthew has 'heavenly Father,' 'nations of the world' where Matthew has 'nations'; and instead of Matthew's 'Be not anxious saying, What shall we eat?' Luke's account reads, 'Seek not what ye shall eat . . . neither be ye of doubtful mind.' The word *ἀνέμενα* in Mt 6²⁷ is capable of two different interpretations, and commentators are divided between them. The RV translates, 'Which of you by being anxious (i.e. by giving the matter intense, anxious thought) can add one cubit to his stature?' Since this is the clear meaning of the word where it is found elsewhere in this Gospel, Lk 22²⁸ 19⁸, it has been so understood here by the Vulgate, Chrysostom, Augustine, Luther, Calvin, Bengel, Fritzsche, and others. But the cubit was 18 inches or more, which makes this interpretation seem highly improbable, as a very small amount in proportion to the whole is intended in this context. The word may mean 'age' (RVm); and it was not uncommon to think of life in terms of linear measure (cf. Ps 89⁵ 'Behold, thou hast made my days as handbreadths'; also Jn 9²¹, 22, He 11¹¹). So that this is the meaning understood by Bleek, Tholuck, Meyer, Achelis, Feine, H. Weiss, Ibbeken, Thayer, B. Weiss, and most modern scholars.

* So Neander, Meyer, Kuinöl, Feine, H. Weiss, H. Holtzmann, B. Weiss, and others. Tholuck and Achelis regard v. 12 as extraneous material in the Sermon, holding that it was probably the closing epitome of some other discourse; similarly Godet. But in Luke also the verse is given in the Sermon, which—together with the fact that logically it is entirely suitable thereto—makes a strong presumptive case that this was its historical connexion. The position in the Sermon which the verse has received in Luke (6³¹, as though it stood at Mt 5⁴² instead of 7¹²) is preferred by Bleek, Wendt, and Bacon, but such a displacement in the Matthean account is not likely.

† In Mt 7^{1-2a}=Lk 6³⁷ we find a similar difference to that in Mt 6¹²=Lk 11⁴, the Lukan form avoiding the measure for measure idea which can be read into the Matthean words; although both accounts strikingly agree in reporting the statement, 'With what measure ye mete, it shall be measured unto you' (Mt 7^{2b}=Lk 6^{38b}, cf. also Mk 4²⁴), a mode of treatment which can be predicated of God only in a qualitative sense, not quantitatively. Lk 6³⁷ is in an expanded form, containing three clauses in synonymous parallelism, for the purpose of emphasis: Mt 7^{1-2a} produces the emphasis, but in a somewhat different way. But Lk 6^{38a} is surely an extraneous element in the Lukan account, an authentic and valuable teaching of Jesus regarding generosity coming from some other occasion than the Sermon. The figurative illustration of the particle in the eye, Mt 7³⁻⁵=Lk 6⁴¹, is given in almost complete verbal agreement by the two reports (see them quoted above, under l. 3). Foreign also to the Sermon is Lk 6⁴²⁻⁴⁰. The first verse has its parallel in Mt 16¹⁴, which is probably its true context, referring to the Pharisees; the second verse has a partial parallel in Mt 10²⁴ (cf. Jn 13¹⁵), and seems logically related there, but the saying may also have been spoken at some other time more in the Lukan form. With this teaching of Jesus about judgement may be compared Hillel's saying, 'Judge not thy neighbour until thou comest into his place.'

nesses, limitations, failures, and transgressions, such as will keep a man humble, make him sympathetic for others, ready to overlook their faults, and to see their virtues. The duty of the Christian is to measure himself against the standard which Christ has set, and to judge himself severely with respect to his shortcomings, instead of making his own religious ideas and practices the criterion by which he judges and condemns others. A man is a 'hypocrite' (v.⁵) when, professing a desire to increase goodness in the world, he assumes a censorious attitude towards the faults of others rather than undertakes the improvement of himself first. In the background of this teaching stands the proud, self-righteous Pharisee, with his odious contempt for all who were less punctilious than himself (cf. Mt 23⁴, 28¹, 27¹, Lk 18⁹⁻¹⁴, Jn 7⁴⁷⁻⁴⁹). Jesus does not mean, of course, that the character and conduct of men should never be matter of criticism by their fellows; this would be to remove one of the most important aids to uprightness in practical experience. In the affairs of life it often becomes necessary for us to judge others, both privately and publicly. Jesus recognizes this fact when He says also in this same discourse, 'By their fruits ye shall know them' (7¹⁶, cf. Mt 18¹⁵⁻¹⁷). But the teaching, 'Judge not that ye be not judged,' pertains to that unloving, critical attitude of mind and heart which picks out and magnifies the faults, failures, and inconsistencies of others. This is not the spirit of human brotherhood, and the man who has it cannot himself anticipate a loving, forgiving treatment of himself by God.* It is not that God deals with men on a *quid pro quo* basis—that is not to be understood here any more than in the fifth petition of the Lord's Prayer (see above). But the man who does not come to love his fellow-men, and to treat them accordingly, can have no place in a heavenly Kingdom where love is supreme, and where ultimately it will be perfectly realized.

Mt 7⁶ presents a saying which is found only in this Gospel, and which stands in the Sermon only as a result of the compiling process.† It enjoins prudence and good judgment in the dissemination of the Gospel. Truth is sacred, and it must be carefully dealt with. There are wrong times as well as right times for trying to assist others religiously. The Gospel is to be offered only to the receptive, under suitable circumstances, else it will receive rebuff and indignity at unappreciative hands. The dogs and the swine, in the East the most despised of animals (cf. Mt 15²⁶, Lk 15¹⁶, Ph 3², 2 P 2²²), are used here to typify those men, whether Gentiles or Jews, who are devoted wholly to material things, and are indifferent to the higher spiritual realm for which God created them. The parallelism in this verse is for no other purpose than to make the teaching impressive, a literary method of which the Sermon contains numerous instances.

* It was thought by Augustine, Fritzsche, Kuinöl, and de Wette, that the return judgment of which this passage speaks is rendered by *ἀποδοῦναι*, i.e. other men will judge you and measure back to you exactly as you judge and measure. This, however, can hardly be the meaning; it rather refers to the judgment of God upon men, both in the future Day of Judgment and in His present treatment of them; so the modern commentators generally.

† So Neander, Bleek, Tholuck (?), Kuinöl, Godet, Achelis, Feine, Wendt, B. Weiss, Bacon, and others. It is the view of Kostlin, Feine, Hilgenfeld, and H. Holtzmann, that this verse as it now appears is Judaized; to make it a polemic against the heathen (cf. above on Mt 6¹⁸⁻¹⁹); reference is made to the *Teaching of the Twelve Apostles*, ix. 6, which reads, 'But let no one eat or drink of your Eucharist except those who have been baptized into the name of the Lord. This was what the Lord referred to when He said "Give not that which is holy unto the dogs." ' Ibbeken thinks the verse refers to the use by Christians of heathen tribunals, as in 1 Co 6¹⁻⁴. Neither of these views is required to explain this teaching which has an excellent general sense and import.

In Mt 7¹¹=Lk 11⁹⁻¹³ we have another section extraneous to the historical discourse, whose presence here seems fortuitous, since it stands in no topical association with its context.* The teaching herein contained is that God is ready and willing to give all His blessings to men, since He is a loving Father who provides—better than any human parent†—for His children. Men, therefore, are to feel free to pray to Him for all things. The thought is similar to that set forth in Mt 6²⁵⁻³⁴; but there the attention was fixed upon the physical necessities, while here the thought is of all kinds of blessings, spiritual not less than material. The injunction to pray is thrice repeated, 'ask—seek—knock,' without difference of meaning in the several clauses, in order to produce great emphasis. Jesus promises absolutely that our prayers shall be answered by God; the obvious and necessary conditions can be easily supplied from His other teaching. Thus, all prayer must be made with the intent and in the spirit of the Lord's Prayer (Mt 6⁹⁻¹³), for the sole purpose of the Kingdom (Mt 6³³), and with full submission to God's will (Mt 26³⁹, 42). Our petitions must permit God to answer them in the way which He knows to be best, and our trust in His wisdom, power, and love must be complete.

Mt 7¹²=Lk 6³¹, as already noted, closes this section of the Sermon, and in some sense constitutes the capstone of the whole discourse. The *ὅτι* which introduces the verse (mistakenly dropped from N^oL) seems to mark this general relation. Matthew gives the saying in a fuller, more rounded form than Luke,‡ and adds the clause, 'for this is the law and the prophets.'§ The idea contained

* So Achelis, Feine, Godet, B. Weiss, Wendt, Bacon, and others. Futile efforts have been made by Chrysostom, Augustine, Luther, Stier, and Tholuck to find a logical relation of these verses to the verses which precede them. Feine, Weizsacker, H. Holtzmann, and B. Weiss think that Luke has the original setting for the paragraph, which may be true; but it is also possible that in both Gospels this material is detached. In Luke, at any rate, it has received a topical association. A comparison of the two accounts shows practical identity of the first two verses in each: the second two verses in each account vary, but have the same thought; and Luke adds a third clause about the 'egg and the scorpion' (v.¹²), perhaps to balance the threefold 'ask, seek, knock.' The last verse of each account (Mt 7¹²=Lk 11¹³) is quite the same, with two significant exceptions: (a) instead of Matthew's *ἀγαπᾷ* Luke has *ἀντιμισθία*, which Tholuck, Achelis, and even Steinmeyer regard as a gloss, due to the prominence which the Holy Spirit, as the personification of all good things, attained in primitive Christian thought; (b) instead of Matthew's *ὁ πατήρ ἡμῶν ὁ ἐν οὐρανοῖς*, Luke has *ὁ πατήρ ὁ ἐν οὐρανοῖς*, a peculiar expression of which various explanations are given; see Feine, *Jahrb. f. Protest. Theol.* 1885, p. 74; Achelis, *Bergpredigt*, p. 388; H. Holtzmann, *Hand-Comm. u. d. Synoptiker*, p. 125. The Lukan reading as it stands cannot be original. Some text-witnesses delete the second *ὁ*, but this is only a makeshift. Perhaps the *ὁ ἐν οὐρανοῖς* came in under the influence of the *ἀντιμισθία*, to indicate the place from which the Spirit was given; and then, subsequently, the *ὁ ἐν οὐρανοῖς* was imperfectly turned to account in connexion with the *ὁ πατήρ*.

† The phrase, 'if ye then, being evil' (*κακοὶ*), contrasts men, in their imperfect, selfish, and sinful lives, with God, who is perfect in love and holiness. The argument is a *minore ad majus*: if limited love provides some good things, how much more will absolute love provide?

‡ Mt 7¹² *ταῦτα πάντα ὅτι ἂν θέλητε ἵνα ποιῶσιν ὑμεῖς οἱ ἀνθρώποι, αὐτοὶ καὶ ὑμεῖς ποιῶτε αὐτοῖς. οὕτως γὰρ ἔστιν ὁ νόμος καὶ οἱ προφῆται.* Lk 6³¹ καὶ καθὼς θέλητε ἵνα ποιῶσιν ὑμεῖς οἱ ἀνθρώποι, ποιεῖτε αὐτοῖς ἰσχυροί. It would be difficult to explain these two divergent forms as coming from a common Greek original; perhaps they represent two lines of transmission, arising from two different translations into Greek of the same brief Aramaic utterance. It is noticeable that in this verse, as in the Beatitudes, the Lord's Prayer, and other portions of the discourse, Matthew gives the sayings of Jesus in a fuller, finer literary form, which in every instance has commended itself to the Christian Church as the better expression of Jesus' thought and spirit.

§ Luke's source did not contain this clause, perhaps for the usual reason that it was too Jewish. The case is the same in Lk 10²³⁻²⁴=Mt 23³³⁻³⁴=Mk 12²⁸⁻³¹, where Matthew's clause, 'On these two commandments hangeth the whole law and the prophets,' is entirely absent from Luke's account, and in Mark's account is differently worded, 'There is none other commandment greater than these.' It is not unlikely, therefore, that in this passage, as in many others, the more Jewish First Gospel

impressively set forth at the close of the whole discourse by the parable of the Two House-builders (Mt 7²⁴⁻²⁷ = Lk 6⁴⁷⁻⁴⁹).^{*} That this piece belongs to the Sermon, and forms its remarkable conclusion (as the *οὗ* in v. ²⁴ suggests), can be considered certain. The parable follows logically upon v. ²¹, enlarging and enforcing the teaching therein. It is a saying of tremendous strength. The life which Jesus has depicted in the Sermon as the ideal life is wonderfully beautiful, inspiring, and attractive to every sincere soul. But men were likely to recognize and to reverence this ideal without achieving it, since that is the earnest and arduous labour of a lifetime. Hence Jesus meets them with the solemn affirmation that the duty of actually doing what He teaches is imperative; that it shall be of no avail for them to have listened to His words, if they do not straightway go and live the life which as God's will He has described to them.

5. THE RELATION OF THE SERMON ON THE MOUNT TO JESUS' TEACHING AS A WHOLE.—The teaching contained in the Sermon on the Mount was given in the middle portion of Jesus' Galilean ministry, when enthusiastic multitudes were hearing Him and many followers attended Him. It was in this period that He gave the general teaching about the Kingdom of God—what it consisted in, what it brought to men, what it required of men, what relation He Himself sustained to it, and what its future was to be. The Sermon is an epitome of this general teaching, condensing the whole into a brief statement and exposition of the ideal of life, given for the practical purpose of a simple guide to right thought and conduct. It showed the multitude what He as a teacher of religion had to present as truth and duty, with which they could readily contrast their own and the current ideals.

Jesus confined His teaching entirely to the religious-ethical field; and in this field He dealt with essential truths, facts, and principles rather than with the speculative mysteries of the universe or with the casuistry of ethics. Consequently, He taught again and again the same things, to different persons, under different circumstances, and in different ways and lights. A close organic relation unites all Jesus' teachings, each involving the other, and all together illuminating the path of human existence. The Gospel was so brief and simple that it had not to be committed to writing like the philosophy and the ethics of the schools. Common men could comprehend and communicate Jesus' teaching. His was a universal message which all could grasp; it presented an ideal to which all could aspire and attain.

As has been abundantly seen, the Sermon on the Mount sets forth Jesus' conception of what men should be and do as members of the Kingdom which He came to establish in the world (not as a new movement entirely, but as giving higher content and greater impulse to a movement which God had inaugurated with the very creation of the human race). The true righteousness is determined by God; as He is the source of all life, so it is He who determines what that life shall be. Ethical obligations rest therefore upon religious truths. The ideal of a man's life is to be derived from God, and for its realization he is responsible to God. The aim of man's life is to achieve that personal character and service which fulfil the true manhood, after the pattern of Christ, and to advance as far as possible the real brotherhood of

^{*} See the text of both passages quoted above under i. 3. The Lukan form of the parable is conspicuously secondary in character; the Jewish phraseology is largely removed, and the description is generalized so as to be adapted to any locality. Matthew, on the other hand, gives a faithful picture of the conditions of house-building in the wadis of Galilee. Again, also, the literary superiority belongs to the First Gospel.

all men as sons of the one common Heavenly Father. The Kingdom of God in its Divine aspect is the purpose, love, and power of God which determine and accomplish this ideal condition; in its human collective aspect it is the company of those who have earnestly set about the realization, in themselves and among men, of this Divine ideal. So that Jesus can sum up all duty, individual and social, in the one injunction to 'Seek supremely the kingdom of God, and the righteousness which he wills' (Mt 6³³, Lk 12³¹; cf. Mt 22³⁴⁻⁴⁰). And this righteousness is primarily an internal characteristic; it is apprehended *within* the man. The religious-ethical ideal which God implants in every human heart must be heeded by each man, and his life must become conformed to it. Created by God in His own image, men must attain to God-likeness; and this attainment is, first of all, the recognition of and obedience to the ideal of life which God furnishes in the soul, moved and guided by the teaching and example of Jesus. Those persons will achieve perfect self-realization who enter into complete communion with God, hearing His voice, and doing His will as revealed within themselves and in and through Christ.

The absolute assurance of Jesus that He can reveal the will of God to men, and that this is His mission in the world, is a guarantee of the trustworthiness of His teaching. If the Sermon on the Mount contains few explicit statements concerning the person of Christ such as abound in the Fourth Gospel, it is none the less true that the implications of the discourse are equally high. The Divine personality, knowledge, and authority of Jesus are the foundation on which the discourse rests. The passages, Mt 5^{11, 17} 7²¹⁻²³, only state what all the teaching involves, that He who speaks these words is 'the Son of God' in the highest sense, sustaining to Him a unique relation, and rendering to men a unique service. The value of the Sermon cannot therefore be overestimated, and the historical study or critical treatment of this material should never dominate or obscure the fact that this teaching is a Divine revelation of the will of God for men which is forthwith to be accomplished upon the earth.

LITERATURE.—For the quotations from, and allusions to, the Sermon on the Mount in the extra-canonical Christian literature of the first three centuries, see esp. Resch, *Aussercanonische Paralleltexte z. d. Evangelien*, Teil 1 (1895), pp. 62-114; Teil 2 (1895), pp. 62-106. For ideas and expressions akin to those of the Sermon on the Mount in Rabbinic literature, see Weber, *Jüdische Theologie* (1897); Wünsche, *Neue Beiträge z. Erläuterung d. Evangelien aus Talmud u. Midrasch* (1878); Dalman, *Die Worte Jesu*, Bd. 1 (1898) [Eng. tr. 1902].

From the Patristic period the only specific separate treatment of the Sermon on the Mount is by Augustine, *de Sermonibus Domini in Monte* (Op., ed. Bened. vol. iii.) [Eng. tr. in 'Nicene and Post-Nicene Fathers', pp. 63]; it is an important work of interpretation, containing much that is of permanent value. Elsewhere in his writings Augustine dealt further with the Sermon, presenting in some respects different views. Trench collected all this material and prepared a digest of it, which he published under the title, *Exposition of the Sermon on the Mount, drawn from the Writings of St. Augustine* (3rd ed. rev. 1899). Useful also are the interpretations of Origen, *Comm. on Matthew* (Op., ed. Lommatsch, vols. iii. iv.); Jerome, *Comm. on Matthew* (Op., ed. Vallarsi, vol. vii.); Chrysostom, *Homilies on Matthew* (Op., ed. Montfaucou, vol. vii.); Hilarius Pictaviensis, *Comm. on Matthew* (Op., ed. Oberthür, vol. vii.); the work of the Auctor *Operis Imperfecti*, and the very brief matter in the *Comm. on the Four Gospels* by Theophylact and Euthymius Zigabenus.

From the Reformation period the important interpretation by Luther is first to be named, *Comm. on Matthew* (Works, ed. Walch, vol. vii.); and after him, Calvin in his *Harmony of Matthew, Mark, and Luke* (Works, ed. 1835-1838, vols. i. ii.). The three Roman Catholic works of most value are the *Comm. on the Four Gospels* by Maldonatus, Jansenius, and Cornelius a Lapide. The extensive but unimportant post-Reformation literature can be seen in full in Tholuck, *Die Bergpredigt Christi*, pp. 30-40 [Eng. tr. pp. 41-49].

The Modern period has provided many works upon the Sermon on the Mount, some of them of great value. The standard work upon the subject for the past seventy years has been that of Tholuck, *Die Bergpredigt Christi* (1st ed. 1833; 5th

ed. Gotha, 1872, pp. 494 [Eng. tr. from 4th Germ. ed., Edinburgh, 1860, pp. 443], and this still remains the most valuable volume on the Sermon, although a portion of the contents is now antiquated. Next in extent and importance is the equally elaborate work of Achelis, *Die Bergpredigt* (Bielefeld, 1875, pp. 492). Other works of scientific character, but smaller dimensions, are: Feine, 'Die Texte der Bergpredigt bei Matthäus u. bei Lukas,' in *Jahrbucher für Protestantische Theologie*, 1885, pp. 1-85; Steinmeyer, *Die Rede des Herrn auf dem Berge* (Berlin, 1885, pp. 156); Ibbeken, *Die Bergpredigt Jesus* (2nd ed., Einbeck, 1890, pp. 216); Hugo Weiss (Rom. Cath.), *Die Bergpredigt Christi* (Freiburg, 1892, pp. 111); Grawert, *Die Bergpredigt nach Matthäus* (Marburg, 1900, pp. 77); Heinrich, *Die Bergpredigt, quellenkritisch untersucht* (Leipzig, 1900, pp. 81), and a second part dealing with the interpretation is promised; Bacon, *Sermon on the Mount* (New York, 1902, pp. 258).—Homiletic treatments of the Sermon are numerous in German, French, and English. An anonymous work, *Die Bergpredigt* (Gutersloh, 1881, pp. 48); Grulich, *Die Bergpredigt des Herrn Jesu Christi* (Meissen, 1886, pp. 148); Harnisch, *Die Bergpredigt des Herrn* (Breslau, 1901, pp. 35); Kaiser, *Die Bergpredigt des Herrn* (Leipzig, 1901), pp. 521; Monneron, *Le Sermon sur la Montagne* (Lausanne, 1889, pp. 412); J. B. Bousset, *Le Sermon sur la Montagne* (Paris, 1900, pp. 150 [Eng. tr., New York, 1900, pp. 144]). The best English work is by C. Gore, *The Sermon on the Mount* (London, 1896, pp. 218); it contains much, however, that is only of local ecclesiastical interest; further, W. B. Carpenter, *The Great Charter of Christ* (London, 1895, pp. 300). Of special importance are the works of B. Weiss, *Meyer-Kommentar über das Matthäusevangelium* (Göttingen, 1898), and of H. Holtzmann, *Hand-Commentar über die Synoptiker* (3rd ed., Freiburg, 1900); other commentaries upon Matthew (Meyer, Morison, Keil, Broadus, Kubel, Bruce, et al.), Luke (Godet, Plummer), and both Matthew and Luke (Bengel, Bleek, Olshausen, Ewald, Fritzsche, Kuinol, Nösgen, et al.) are of varying usefulness.

Literature upon special portions and aspects of the Sermon has been cited in the footnotes. C. W. VOTAW.

The Advent of Christ falls within the penultimate period of that era of Israelitish history which begins with the Return of the Jews from Babylon (B.C. 538) and ends with the Fall of Jerusalem (A.D. 70). From both an external and an internal point of view, this era marks a far-reaching transformation of the conditions of Jewish life. At the outset, Judæa, which was not quite the same in extent as the ancient kingdom of Judah, forms a small province of the Persian, and afterwards of the Greek Empire. The population, at first scanty and poor, gradually increases, and, under the orderly arrangements of the Law, attains to a certain measure of prosperity. But internal party-strife consumes its strength, and, under Antiochus Epiphanes, reaches such a height that this Seleucid monarch, in the pride of his Greek culture, but with political shortsightedness, forms the resolution of entirely rooting out the proper Jewish religion. This period of extreme danger is unexpectedly followed by a brilliant revival of the Jewish State, which recalls the flourishing period of pre-exilic history, and which struck the people themselves in this light. The nation shakes itself free from the foreign yoke, and the Hasmonean princes not only become high priests, but finally assume the title of 'king.' This glory, however, is of short duration, and the Jewish people are rudely awakened from their dream. The internal dissensions that followed the death of queen Alexandra, hasten the intervention of the Romans, and lead to the conquest of Jerusalem by Pompey (B.C. 63). The Romans do not, however, destroy the Jewish State, but allow it to continue under a variety of changing forms, until at last the perpetual discontent of the Jews leads to the outbreak of the desperate war for freedom,

which issued in the destruction of the State and the Temple.

From the spiritual point of view, this period marks the development of *Judaism* in opposition to the national life and the religion of the pre-exilic period. The deeper foundation of this is found in the remarkable recasting which the Jewish spirit underwent during the Exile. Nowhere else in the history of mankind is there an instance of a people being transformed in so wonderful and radical a fashion as the Jews in the course of their captivity in Babylon. They left Babylon a body whose true life lay not in the actual state of things, but in future expectations and in a world of cultus-notions created out of recollections of the past. To the actual world they sought to accommodate themselves upon certain abstract principles, and, when this attempt failed, they withdrew entirely into that spiritual world which was constructed wholly according to those dogmatic principles. They found their support in the Messianic expectation, for the sake of which they submitted to the burdensome prescriptions of the Law, which were intended to shield them from the heathen impurity of the world, and thereby render them worthy to hail the advent of the Messianic glory. Yet it is not to be overlooked, in this connexion, that the noblest spirits in the Jewish community, especially during the earlier periods of the post-exilic era, filled those outward forms with a rich inward content. There still survived in them the pure prophetic spirit, and the ideas created by men like Jeremiah and Deutero-Isaiah; nay, the writings which emanated from this period, such as the Psalms and the Book of Job, touch us almost more nearly than the writings of those prophets, because the ideas contained in them have found simpler expression and are less closely bound up with the historical form. But the conditions under which the Jews lived seldom permitted a lengthened enjoyment of this contemplative life. Not only were they disturbed in their rest by contact with the heathen world, but even amongst themselves there were men of a different disposition, whose recollections turned rather to their pre-exilic forefathers, and who, with a stronger sense of actualities, plunged vigorously into the relations of life, and sought to help themselves. Between them and the 'quiet in the land' there grew up an ever-increasing opposition, which may be regarded as the moving factor in the post-exilic history. Through these conflicts with opposition without and within, not only was the stricter Judaism disturbed, but it was driven also to the discussion of the great religious problems and to new developments. The fruits of these spiritual struggles may be seen in the entirely new conception of the state of man after death and in the transformation of the Messianic hope, which in the Apocalyptic literature seeks to free itself from national limitations and takes a start in the direction of universalism. It may be safely concluded that, in this movement, contact with foreign forms of thought was not without importance—primarily contact with Parsism, secondarily with the Greek world.

I. DISTRIBUTION OF THE JEWISH POPULATION IN THE HOLY LAND.—Leaving out of account meanwhile those Israelites who were scattered in various lands, the Jewish population was at first confined to *Judæa* proper, from which the Israelites derived their now universally current appellation (Gr. *Ἰουδαῖοι*, Germ. 'Juden,' Eng. 'Jews'). The land taken possession of by the returning exiles was considerably smaller in the southern direction than in pre-exilic times. Whereas formerly Beersheba was regarded as the southern limit, the part of Judæa that lay to the south had

been taken possession of during the Exile by the Edomites, and the post-exilic community was at first far too weak to drive back the intruders.* The boundary between this New-Edom and Judæa was formed in the 2nd cent. B.C. by the town of Beth-zur, and this was, in all probability, approximately the division between the respective territories also at an earlier period. According to Neh 6², the original N.W. boundary appears to have been the Plain of Ono (*biḳ'ath 'Onō*, probably the modern *Keḡr-ānā*). But at a later period the Samaritans, who lived at constant feud with the Jews, must have got possession of three places inhabited by Jews, namely Lydda, Ramathaim, and Apherema (1 Mac 11²⁴). In the Maccabæan period, however, Judæa underwent considerable expansion. The three places just named were taken from the Samaritans and restored to the Jews as early as the time of Jonathan. Afterwards the boundary was extended still farther to the north, for, according to Josephus (*BJ* III. iii. 5; *Ant.* XIV. iii. 4), the N. boundary of Judæa ran by Borkaos (prob. the modern *Berkit*) in the hill-country and Koreā (now *Kurduva*) in the Jordan Valley. The country in the south inhabited by the Edomites, which now bore the name *Idumæa*, was conquered by John Hyrcanus. As it was originally Israelitish land, the inhabitants were compelled to adopt the Law and submit to circumcision. Accordingly, from that time onwards (in conformity with the prescription of Dt 23²), they were regarded as Jews, although they continue to be called Idumæans. That they also regarded themselves as genuine Jews is evident, for instance, from the words attributed to them by Josephus (*BJ* IV. iv. 4, *τῶν παρπλων ἱερῶν . . . τῆς κοινῆς παρπδος*), but of course their foreign origin could not be wholly forgotten.† On the other hand, in the cities on the Mediterranean coast, which had only transitory periods of subjection to the Jews, the population was preponderatingly heathen, although considerable Jewish minorities existed in them. Only in Joppa (*Jaffa*) were the Jews in the majority, this city having continued after the death of Herod to be united with Judæa. During the war for freedom it played, accordingly, a prominent part, and had to be twice captured by the Romans (*Jos. Ant.* VII. xi. 4; *BJ* II. xviii. 10, III. ix. 2).

To the north of Judæa lay *Samaria*, which stretched as far as the Plain of Jezreel. The population of this district sprang partly from the ancient Israelites, but had received a strong intermixture through the heathen peoples who were settled here by the Assyrian conquerors (cf. 2 K 17²⁴). In course of time these heathen elements were absorbed by the Israelitish remnants, but the ill-will shown by the Samaritans towards the returning Jews kept the latter from ever forgetting the impure origin of their northern neighbours. Matters came to an open breach when the Samaritans built a temple of their own upon Mt. Gerizim, and thus renounced all connexion with the community at Jerusalem. It is true that they, equally with the Jews, acknowledged the Law, but the breach remained irreparable, and the Samaritans continued excluded from the further development of Judaism. The contempt of the Jews which found vent in the nickname 'Cuthæans' (*Jos. Ant.* IX. xiv. 3, XI. iv. 4, and in the Talmud), and which finds very sharp expression on the part even of the otherwise mild Ben Sira

(Sir 50²⁸. 'Two nations my soul abhorreth, and the third is no people: the inhabitants of Seir and Philistia, and the foolish nation that dwelleth in Sichem'), was repaid by the Samaritans with bitter hate. This manifested itself at times in the form of attacks upon the pilgrims journeying to Jerusalem, who, in consequence, frequently preferred to take the long roundabout way by the east of the Jordan (Lk 9⁵³, Mk 10¹; *Jos. Ant.* XX. vi. 1). The destruction of the Gerizim temple by John Hyrcanus made no change in these relations, but rather embittered the feelings of the Samaritans still more.

As to *Galilee*, we learn from 1 Mac 5 that in the course of the post-exilic period Jews had settled in it, but that during the first half of the 2nd cent. B.C. these were still so few that they could not hold their own against the heathen population, and were consequently brought by Simon to Jerusalem. It was not until the time of Aristobulus I., as Schürer (*GJV* i. 275 f.) was the first to prove, that this portion of the land and its inhabitants, regarding whose nationality we have unfortunately no more precise information, were compelled on the same ground as the Idumæans to adopt the Law (*Jos. Ant.* XIII. xi. 3). It is extremely probable, however, that there were further settlements of Jews of purer birth in these fertile districts, so that they became more completely Judaized. It is characteristic in this respect that Judith (8¹⁹) speaks of 'our fathers,' i.e. the ancient Israelites. At the time of Christ the land of Galilee was essentially Jewish, and had its Pharisees and scribes (Lk 7³⁶, Mt 8¹⁹), as well as its synagogues (Mt 12⁹, Lk 4¹⁶ 7⁵). The designation 'half-Jews' is never applied to the Galileans as it is to the Idumæans.* It may be added that the Judaizing of Galilee embraced only the southern portion of it, for Kedesh, lying to the west of Lake Hūleh, marked the boundary between the land inhabited by Jews and the territory of the Tyrians.†

A similar condition of things prevailed also in the country to the east of the Jordan. Here, too, there had been numerous settlements of Jews, who, however, were so hard pressed by the heathen that Judas Maccabæus brought them to Jerusalem (1 Mac 5⁴⁵). But at a later period the middle portion of the trans-Jordanic tract was conquered by Alexander Jannæus, and the Law imposed upon its inhabitants for the same reason as in the case of the Idumæans (cf. *Jos. Ant.* XIII. xv. 4). As the boundaries of *Peræa* (עֲרֵי פְּרָעָה), the district inhabited by the Jews, Josephus gives: Pella on the north, Philadelphia on the east, and Machærus on the south. Considerable tracts, however, of the trans-Jordanic country belonged to the Hellenistic cities, which were specially numerous here, and in which the Jews constituted only a minority. Also in the northern portion (Batanaea, Gaulanitis, Auranitis, and Trachonitis) the population was half-heathen half-Jewish (*Jos. BJ* III. iii. 5 f.). But the Jewish element was strengthened by the Babylonian Jews whom Herod transplanted here in order to combat the plague of robbers (*Jos. Ant.* XVII. ii. 13).

The task which, since the time of Ezra, had been assigned to strict Jews—the task of maintaining a complete isolation from the heathen world—was thus an extremely difficult one; for not only were they surrounded on all sides by the heathen, but Hellenistic cities intruded as *enclaves* in the midst of the Jewish country itself. Moreover,

* On Neh 11²⁸ cf. now, above all, E. Meyer, *Entstehung des Judentums*, 106 f., 114 ff.

† Josephus says of Herod that, as an Idumæan, he was only half a Jew (*Ant.* XIV. xii. 2). On the other hand, when Agrippa I. once felt hurt by the epithet 'foreigner' in Dt 17¹⁵, the people, whom he had gained over by his friendly offices, cried out, 'Thou art our brother' (*Meg. Sotā* vii. 8).

* Quite remarkable is the severe judgment on Galilee attributed to Johanan b. Zaccai (*Jerus. Shabbath* 15d): 'Galilee, Galilee, thou hatest the Law, therefore thou shalt yet find employment among robbers.'

† Cf. Buhl, *GAP* 72.

the rapid development of commerce brought the Jews into close contact with foreigners, while, finally, the foreign rule naturally introduced many non-Jewish elements into the land. The attractive influence which Greek culture exercised over the Jews is shown by the history of events immediately preceding the Maccabæan era; and even the Hasmonæans who originally came forward to oppose the ethnicing of the Jews, were afterwards increasingly attracted by Hellenism, so that Aristobulus I. actually received the surname of Φιλάλην ('friend of the Greeks'). Herod the Great, too, in spite of his essentially barbarian nature, sought to pose as a patron of Greek culture, surrounded himself with Greek orators and writers, had his sons educated at Rome, and made his appearance as a pure Greek in the Hellenistic cities that were subject to him. Nay, even in Jerusalem, to the scandal of the Jews, he caused theatres, circuses, and other Greek buildings to be erected. The same course was pursued by his successors. Tiberias, for instance, was a city with a perfectly pronounced Greek stamp, which may account for the fact that Jesus never visited it. The maintaining of Jewish uniqueness unimpaired was, we repeat, a very difficult task; much more difficult in Palestine than for the Jews of the Diaspora, who found themselves in unequivocal opposition to their environment.

ii. **LANGUAGES.**—The language of the Jews who returned to Palestine from Babylon was *Old Hebrew*. But even during the Persian domination *Aramaic*, which was then the language of commerce and diplomacy, began to force its way among the Jews as with the neighbouring peoples. The earliest traces of this are found in the extracts in the Book of Ezra drawn from an Aramaic historical writing. The Book of Daniel, composed in the 2nd cent. B.C., is written partly in Aramaic. At the time of Christ the ordinary speech of the people had come to be Aramaic, as is evident not only from the New Testament, but from various cultus terms used by Josephus, and from statements contained in the older Jewish literature. The necessary consequence of this change was the custom of having the passages of Scripture which were read in the synagogue followed by an Aramaic translation—a custom which the Mishna presupposes as an ancient inheritance. The Aramaic spoken by the Jews was a dialect of the Western Aramaic, the pronunciation of which, moreover, differed somewhat in different parts of the country, varying again amongst the Samaritans as compared with the Jews.*

The Old Hebrew language yielded, however, only gradually to the Aramaic idiom, and, before it disappeared, it developed a final species, the so-called *New Hebrew*. Even after men had begun to write in Aramaic, Hebrew writings were still composed; e.g. the Book of Chronicles (c. 300 B.C.), the Book of Sirach (not long after 200), various Psalms belonging to the Maccabean period, and the Book of Ecclesiastes. The Hasmonean rulers, who above all laboured for a national reawakening, favoured the ancient speech, as the Hebrew legends on their coins show; and the First Book of Maccabees was unquestionably written in Hebrew. But the last remark applies also to the Psalms of Solomon, which emanated from the middle of the last century B.C., and to the Apocalypses of Baruch and Ezra, composed after the Fall of Jerusalem. Later still, Hebrew continued to be for long the language of teachers of the Law, so that the Mishna (2nd cent. A.D.) is composed in New Hebrew. It was only after the date last named that Hebrew ceased to be a living

* Cf. Mt 2673; Dalman, *Grammatik des jüd.-pal. Aramaisch*, 43 ff., *Die Worte Jesu*, i. 64.

language, and subsequently played the same rôle as Latin did in the Middle Ages. See, further, Driver, *LOT*⁶ 503 ff.

Along with the idioms just discussed, we have to take into account, for NT times, also the Greek language. The factors we noticed as favouring the introduction of Greek culture paved the way also for the language of Greece. The clearest evidence of this is afforded by the very numerous Greek words adopted into the languages of the Jews. A few of these are found even in the Book of Daniel, notably such as are names of musical instruments (Driver, *l.c.* 501). In all probability פָּנָא of Ca 3⁹ must also be considered Greek (= *φανα*), and perhaps we should assign to the same category some other terms in the Song of Songs (*l.c.* 449 n.). In the Book of Ecclesiastes, again, we have Heb. renderings of Gr. forms of expression, such as מַשָּׁה = *εἰς ἑρπύρεω*, שָׁפָה = *ὁφ' ἡλίφ*, etc. In the post-Biblical literature we encounter a large number of Greek loan-words, especially in the domain of political administration, or of commerce, or of public institutions.* It is characteristic, further, that, whereas on some of the later coins of the Hasmoneans we find Hebrew legends side by side with the Greek, the coins of the Herod family bear only Greek inscriptions. It may be held as certain that every Jew who made any claim to higher culture, and therefore in particular every one who was brought into contact with the court, understood and spoke Greek. Traders also must be assumed to have had a certain acquaintance with this tongue. And those Jews who lived in the immediate vicinity of districts where Greek was spoken would doubtless acquire the habit from their youth of using the Greek as well as the Aramaic language. But how far it was customary elsewhere to learn Greek, and how far the knowledge of this language had penetrated among the general body of the people, cannot be determined with certainty. According to *Šōtā* ix. 14, during the war with *Quintus* [so read instead of 'with *Titus*'] in 115-117, it was forbidden that any one should teach his son Greek. From this we may infer that until then this had been a usual practice even within strict circles. It was also an important circumstance that Jerusalem, upon the occasion of the great festivals, was the rallying-point not only of the Palestinian Jews, but of those whose homes were in all other lands. Only a very small proportion of the latter can have been acquainted with Hebrew or Aramaic. And at times some of these, instead of returning to their homes, would settle in Jerusalem. It may also be supposed that the choice of the Alexandrian Jew, *Boethus*, to be high priest would draw a number of Alexandrians to Jerusalem (cf. *Jos. Ant.* xv. ix. 3). Special synagogues were built at Jerusalem for the use of those foreigners who did not understand the language of the country (*Ac* 6⁹; *Tos. Megilla* iii. 6). Proselytes also would come from other lands to settle in Jerusalem. In this way some knowledge of Greek may be presumed to have been diffused in Judæa as well. In *Jn* 12^{20f.} we hear of Greeks (*Ἕλληνες*, i.e. either Jews of the Diaspora [?] or proselytes) who asked Philip to introduce them to Jesus—a circumstance which implies that this disciple at least understood Greek. That the same was the case with Jesus Himself cannot be

* As examples may be cited: אפרחא *aparcha*, בולא *boula*, סנהדרין *sanhedrin*, קסטרופינר *kastropiner*, ריובורג *rivoburg*, אפריסל *aprisel*, אקטאשוס *aktaschus*, ימיה *jumia*, קארטלאב *kartlab*, פניקן *paniken*, בליז *balizis*, דיקטור *diktator*. Less numerous are the Latin loan-words, the majority of which, moreover, came in through the Greek: e.g. דיקומבי *decumbant*, היסקיפלינא *disciplina*. Cf. S. Krauss, *Griechische und Lateinische Lehnwörter im Talmud, Midrasch und Targum*, 1-2 (1898-90).

proved with complete certainty from His conversations with Pilate, for the services of an interpreter may have been utilized, although this is not expressly mentioned in the narrative. We may compare the occasion when Josephus (*BJ* v. ix. 2) represents Titus as delivering an address to the people of Jerusalem, although we learn afterwards (*vi. ii. 5*) that on such occasions he availed himself of the help of Josephus as interpreter. From the last cited passage it is evident, at all events, that the mass of the people in the Jewish capital did not understand Greek.*

iii. **POLITICAL CONSTITUTION.**—The Greek rule, under which the Jews were brought by Alexander the Great, did not in general press very heavily upon subject peoples, who were left in the enjoyment of no small measure of self-government. The foreign domination confined itself mainly to the taxation of the provinces. So high, however, were these taxes at times, and such was the rapacity of some of those entrusted with the collecting of them, that there was scope here for oppression enough. In the Ptolemaic period Josephus (*Ant.* xii. iv. 3) tells us that the imposts were farmed out to the highest bidder, who could then claim military aid in recovering them. In the Seleucid period, on the other hand, the taxes were collected by officers of the king (1 Mac 1²⁹). The internal administration, however, was in the hands of the native authorities, which meant for the Jews that henceforward, as before, they were governed by the high priest and the council associated with him (*γενοῦντα*, *Jos. Ant.* xii. iii. 3).† This council was originally an assembly of the heads of families (*Neh* 5¹⁷); but, after the high priest obtained the right of presiding over it, it came to be composed increasingly of members of the temple aristocracy (see art. **SANHEDRIN** in vol. iv.). The succession of legitimate high priests (the 'anointed' of *Dn* 9^{23f.}) was violently interrupted under Antiochus Epiphanes. But after the Hasmonæans by their valour and address had raised the Jewish people to the rank of a Power that had to be reckoned with politically, the Syrian king nominated Jonathan high priest, and thus ruler of the nation of the Jews. The grateful people afterwards handed over this dignity to the last of the Maccabæe brothers as a hereditary prerogative: he was to take charge of the sanctuary, appoint the officials, etc., and in his name all instruments were to be executed (1 Mac 14⁴⁵). Through the conquests which the Hasmonæans succeeded in making, the sphere of authority of the high priests (or, as they soon came to call themselves, kings) and of the Sanhedrin was materially enlarged. An important epoch for the internal administration was the reign of queen Alexandra, under whom the Pharisees succeeded in gaining a footing in the Sanhedrin and an influence upon the legislation.

The independence of the country was brought to a sudden end by the conquests of Pompey. The Jews were henceforward under the Roman domination. The extent of the land was materially diminished by Pompey's withdrawing the numerous Hellenistic cities from Jewish rule. On the other hand, he left to Hyrcanus, as high priest, a certain measure of political authority, so that the conditions were practically the same as those that

existed immediately before the war for freedom. But in the year 57 B.C. Gabinius deprived Hyrcanus of all political rule by dividing the whole country into five districts, whose principal cities stood in direct subordination to the Romans (*Jos. Ant.* xiv. v. 4; *BJ* i. viii. 5). Cæsar, however, in 47 restored to Hyrcanus his former power and gave him the title of 'ethnarch.' But the real ruler was not the weak Hyrcanus, but the crafty Idumæan Antipater, who was made Procurator of Judæa, and who succeeded in having his sons Phasael and Herod appointed *strategoi* of Jerusalem and Galilee. After the death of Antipater (B.C. 43), Antony named the two brothers 'tetrarchs,' a step whereby Hyrcanus was once more deprived of all secular power and became merely an ecclesiastical prince. The attack made by the Hasmonæan Antigonus, with the aid of the Parthians, cost Hyrcanus and Phasael their offices, but Herod escaped to Rome, where he was nominated king of the Jews. It was not until the year 37 that he succeeded in conquering his kingdom, but from that date onwards he reigned undisturbed till his death. His position was that of a *rex socius*. Such a king was entrusted with rule only personally: after his death it was left open to the Emperor to decide as to the future lot of the particular country. For this reason Herod required the permission of the Emperor to put his own son to death. Nor could a *rex socius* wage war on his own initiative or conclude treaties, and, if the Romans were engaged in war, he had to furnish auxiliary troops. His right to coin money was restricted, and included only coins of small value. Otherwise he was an independent ruler, levied the various imposts of the country, was the supreme judge within his own land, and could execute capital sentences. Alongside of Herod there was still the Sanhedrin, but its authority was now, of course, very limited. The high priest was its president, but the setting up of an independent kingly authority had practically stripped this office of all significance. The high priests were appointed and deposed by Herod in the most arbitrary fashion—a course of procedure quite contrary to the Law, which intended this office to be held for life and to be hereditary.

After the death of Herod, his kingdom was divided into three portions. Philip received, with the rank of tetrarch, the northern trans-Jordanic territory, over which he ruled till his death, in A.D. 37. Herod Antipas, likewise as tetrarch, had Galilee and Peræa assigned to him, but was deposed in 37. Archelaus had been destined to rule as tetrarch over Judæa and Samaria, but as early as the year 6 the Emperor deprived him of his land, which he united more closely with the Roman Empire. It was, however, subject only indirectly to the Imperial legate in Syria, having a governor of its own, a Roman Procurator (*ἐπίτροπος, ἡγεμὼν*) chosen from the knightly body, who attended to the administration except when any very special necessity called for the action of the legate. The Procurator resided at Cæsarea on the seacoast; but on the occasion of the great festivals, when the mood of the people was always most turbulent, he came to Jerusalem, where he took up his residence in the former palace of Herod on the west side of the city. The largest Roman garrison was stationed at Cæsarea; but smaller bodies of troops were quartered in various towns throughout the land—amongst others in Jerusalem, where they had their barracks in the temple citadel of Antonia. The troops consisted entirely of non-Jews, the Jewish population being, it would appear, exempt from military service. The taxes were now assigned to the Imperia.

* Cf. Schürer, *GJV* II. 18 ff., 63 ff.; Zahn, *Einleit. ins NT*, I. 1-61; Delitzsch, *Saat auf Hoffnung*, 1874, p. 185 ff.; Kautzsch, *Gramm. des bibl. Aram.* 4 ff.; Neubauer, *Studia Biblica*, Oxford, 1885, p. 39 ff.; Dalman, *Gramm. des jüd.-pal. Aram.* 344 ff.; *Die Worte Jesu*, I. 1 ff., 63 ff.; Büchler, *Die Priester und der Kultus*, 1895, p. 61 ff.; A. Meyer, *Jesu Muttersprache*, 1898; T. K. Abbott, *Essays chiefly on the Original Texts of the Old and New Testament*, 1891, p. 129 ff.

† Büchler (*Die Tobiden und Oniaden*, 1899) and H. Winckler (*Orient. Litg.* iii. 87 ff.) maintain that the pre-Maccabæan high priests had no political power; but their arguments are artificial and not convincing.

* Cf. Schürer, *GJV* I. 460.

fiscus, and were levied by the Procurator, the highest financial official, who in this work availed himself of the aid of the various *communes*. The duties, on the other hand, were farmed out at a fixed sum to private officials (*publicani*).^{*} Both these 'publicans' and their subordinates were often of Jewish extraction (cf. e.g. Lk 19¹²); on account of the inordinate greed and dishonesty that frequently characterized them, they were greatly hated and despised ('publicans and sinners,' Mt 9¹⁰. *et al.*). The taxation was probably connected with the division of the country into eleven toparchies, each with its capital. The Roman taxation of Judaea after the deposition of Archelaus led also in the year 7 to the visit of the legate Quirinius, for the purpose of having the inhabitants assessed.[†] Finally, the Procurator was the highest judicial authority in the land, and had to attend to all important lawsuits; in particular, no capital sentence could be executed without being confirmed by him. In such cases he had sometimes associated with him a council made up of Romans (*συμβούλιον*, Ac 25¹²). In other respects the country enjoyed the right of self-government, which was exercised, as formerly, by the high priest and the Sanhedrin. Josephus (*Ant.* xx. 10) puts the matter very well when he says that the Jews, after they had had a monarchical, had now again an aristocratic constitution. But one essential and characteristic change was that the high priest was now appointed by the Roman Procurator. This condition of things underwent no interruption except when Agrippa I., under the title of king, gathered the whole land for a short time (41-44) under his sway. During this period the same arrangements were followed as under Herod the Great; the high priest, for instance, being appointed by the king. After Agrippa's death, not only Judaea, but the whole country of the Jews (with the exception of the districts to the east of the Jordan and in the north, which were assigned to Agrippa II.), came directly under the Roman sway. The constitution was now quite the same as in Judaea prior to Agrippa I., except that the Romans handed over the right of nominating the high priest first to Herod of Chalcis (44-48) and then to Agrippa II. The regular order of things came to an end with the outbreak of the final war for freedom. The land was divided into various districts, each under a ruler invested with dictatorial authority. But this organization gave way before the advance of the Romans. The last high priest, Phannias, was chosen by lot by the Zealots. He was a man of humble extraction, who had lived all his life in the country, so that he understood nothing of the office (*Jos. BJ* iv. iii. 8). After the Fall of Jerusalem, the relative independence of the Jews was gone for ever. The high priests disappeared along with the temple, and the Sanhedrin along with them. Henceforward the cohesion of the Jews was dependent solely upon those spiritual factors which lent such invincible strength to the Jews of the Diaspora and had been the real life-principle even of the Palestinian Jews—the Law and the Messianic hope.

From the foregoing sketch it will be evident that the whole of the properly Jewish administration throughout the period in question was concentrated in the high priest and the Sanhedrin (*γερονσία*, later *συνέδριον*, hence מנהל). The sway exercised by these authorities underwent change, however, in the course of time. It reached its culminating point under the Hasmonæans, when the high priest had become the ruler of an independent

State. It was weakest under Herod, who left little room for other authorities beside him (cf. *Jos. Ant.* xiv. ix. 4). Those periods during which the Jews were under foreign rulers marked the normal stage of the power of these institutions. Originally, the jurisdiction of the high priest and the Sanhedrin extended only to Judaea. It was otherwise when the Hasmonæans enlarged the boundaries of the country, and it continued to be so during the following periods. But upon the partition of the land after the death of Herod, Judaea became once more the sphere of jurisdiction, the Samaritans being, of course, subject only to the Romans and not to the Jews, while in the other parts of the country the tetrarchs were the judicial heads (cf. *Jos. Ant.* xviii. iv. 6, and the expression ἐν τῇ ἡγεμονίᾳ καὶ βασιλείᾳ in Mt 10¹⁸).

As to the functions of the *Sanhedrin*, there are a number of allusions which enable us to form a pretty clear conception. In conjunction with the high priest it was the representative of the nation to foreign nations and princes (*1 Mac* 12²² 12²⁶ 13³⁸). It decided on measures for the fortification and defence of the land (*1 Mac* 12²⁵; *Jos. BJ* iv. iv. 3; cf. *Jth* 4⁸). It granted dispensation in the matter of the sacred dues (*Jth* 11¹⁴), and made arrangements for the organization of the *personnel* of the temple (*Jos. Ant.* xx. ix. 6). But, above all, it was the supreme court of justice, all important cases being brought before it, and the decision lying with it when the inferior courts were not agreed (cf. Mt 5²², Ac 4¹⁵ 5²¹ 6¹² 22³⁰, and the story of the Passion). In the earlier period no sentence of death could be carried out without the approval of the Sanhedrin (*Jos. Ant.* xiv. v. 3); but Herod, in order to make the Sanhedrin more pliable to his will, caused a number of its members to be put to death (*ib.* xiv. v. 4); and when at a later period he appealed to this court, his action would appear to have been more *pro forma* (*ib.* xv. vi. 2). Under the direct rule of the Romans, the Sanhedrin lost, as was noted above, the right of condemning to death (*Jn* 18³¹; cf. *Jos. Ant.* xx. ix. 1, and *Jerus. Sanhedrin* i. 1). As long as the Jewish State subsisted, the head of the Sanhedrin was the high priest. This is clear from the concurrent testimonies of the NT and Josephus. The statements of the Talmud on this subject are based upon later theories, and cannot be brought either in whole or in part into harmony with the reality. Thus the high priest had, at all times, a certain juridical and also political authority in addition to the functions he exercised in connexion with the cultus. Even in later times the members of the Sanhedrin were chosen by preference from the leading priestly families, a special fondness being shown for those who had held the office of high priest. But, as has already been said, the Pharisees succeeded, under queen Alexandra, in making their way into the Sanhedrin, and in maintaining their position there, a minority though they were, in the times that followed.

iv. SOCIAL CONDITIONS.—The principal occupation of the Jews in the time of Christ, as in the earlier periods, was *agriculture*, with which cattle-breeding was generally combined. The Letter of Aristæus (107 ff.) properly emphasizes the fact that in Palestine the right relation was established between town and country, the land being fertile, yet in need of diligent culture, and thus requiring a dense population settled upon it, so that the great cities did not flourish here, as elsewhere, at the expense of the country population. 'The land,' says the author, 'is thickly planted with olives, covered with fields of grain and leguminous plants, rich in wine and honey; the other fruits and the dates cannot be numbered, while cattle of

^{*} Cf. Schürer, *GVF* 3 ii. 181 f.

[†] *Jos. Ant.* xviii. i. 1. On Lk 21-5 cf., above all, Schurer, *La. I.* 559 ff.

all kinds are there in abundance, as well as rich pasture land for them.' Especially fruitful was Galilee, where Jesus spent most of His life, and from which He borrowed the numerous country scenes that we encounter in His parables. A great many people found employment on the larger estates, there being numerous servants, maids, and officials of all kinds attached to the service of a single house (cf. Lk 12⁴² 16').* *Fishing* was a leading occupation in Galilee, being prosecuted in the teeming waters of the Lake of Gennesareth. We find allusions to this both in the Gospel narratives and in the words of Jesus (Mt 13⁴⁷, Lk 5¹⁰; cf. also the reference in Mt 7⁹ to bread and *fish*, corresponding to bread and *flesh* elsewhere). After the Jews, under the Hasmonæans, gained access to the sea, they began to prosecute fishing in it as well. A variety of preparations were made from the fish that were caught, and these again played their part as articles of commerce.† See, further, art. *FISHING* in vol. ii. *Hunting* is said in the Talmud to have been prosecuted by some for a livelihood; the abundance of game in Palestine is shown by the history of Herod, who was an enthusiastic sportsman.‡

An important source of income in post-exilic times was that derived from the work of the different *artisans*. Of the industry of some (builders, engravers, smiths, potters) we have a graphic picture in Sir 38; that of others is illustrated by the Talmudic writings.§ Ben Sirā recognizes their importance (without them is no city built, and if they sojourn in a strange land, they need not hunger), but he considers them excluded from all higher spheres of activity, such, for instance, as the public service (v. 33⁷). The later scribes held a sounder opinion on this subject, many of them, indeed, supporting themselves by manual labour.||

Commerce took a great stride in the Greek period. Particularly after the Jews came into possession of Joppa and other seaport towns, they began to imitate zealously the example of their brethren of the Diaspora, and to take their share in the trade of the world. Palestine was favourably situated in this respect. Ancient caravan roads led through Galilee and Samaria to the coast, where the wares were shipped; Arab caravans brought the treasures of S. Arabia to the southern part of the land, from which they could in like manner be exported to the West. See, further, art. *ROADS AND TRAVEL* (IN OT), below, p. 369 f. The products of the fertile land, such as oil, grain, wine, flax, formed articles of export, which were exchanged for the products of Egypt and the Mediterranean lands. The Jews began to undertake long journeys by sea in order to enter into commercial relations with foreigners (Ps 107²³, Pr 7¹², Sir 43²⁴). In Palestine there were both merchant princes and petty traders (Sir 26²⁹). The connexion between home-born and foreign Jews led also to a commencement being made in Palestine with those financial transactions for which the Jews of the Diaspora had developed such a turn, having found in Babylon an excellent training school.¶ Since such a condition of things was quite unknown to the traditional Law, and its enact-

ments were felt to be hampering, Hillel devised the so-called '*prosbolic*-rule,' whereby the legal prescription as to the cancelling of all debts every seven years was practically annulled (see, on this and on the Deuteronomic regulations as to the remission or suspension of debts, Driver, *Deut.* 178 ff.). The method of taking security was regulated very precisely, as the Talmudic writings show (cf. the Lexicons, s.v. אבטחיתא). There were forms in which the names had merely to be inserted. According to Josephus (*BJ* II. xvii. 6), the bonds signed by debtors were kept in the public archives. As to the estimation in which mercantile occupations were held, Ben Sirā speaks as disparagingly as he does of artisans. But at a later period things were otherwise, and both priests and teachers of the Law engaged in trade. For instance, Josephus (*Ant.* XX. ix. 2) tells us that the high priest Ananias was a great man of business; cf. Tos. *Tērūmōth*, where we read of the shop of a priest. We may also recall in this connexion the parables which Jesus borrows from commercial life (e.g. Mt 13⁴⁴). The Essenes alone abjured on principle all contact with trade. See, further, art. *TRADE* in vol. iv. The increasing intercourse for trade purposes led, moreover, to other branches of industry. Thus *inns* sprang up along the much frequented roads, where the hosts had their charges for attending to travellers (cf. Lk 10³⁴). The '*publicans*' also, to whom the taxes were farmed out by the Romans or the native princes, were indebted to the growing commercial intercourse for their livelihood and for the wealth which they so often acquired.

How far the civil officials—the military do not come into consideration for reasons indicated above—received payment cannot be made out with certainty. In many cases their office may be assumed to have been an honorary one. This would be the case, for instance, with the elders of the community, the judges, the members of the Sanhedrin, etc. But, upon the generally accepted principle that the labourer is worthy of his hire,* it may probably be inferred that, if not the rulers of the synagogue and the collectors of alms (גבאי צדקה), yet at least the synagogue attendants (חזני הכנסת) had a salary. The same would probably hold good of the numerous officials attached to the court, who would be paid by the king. When we pass to the case of the priests and temple officials, we have precise information to go upon. The incomes of these were very considerable, and they increased with the increasing population and the growing wealth. The Levites were entitled to a tenth of the whole produce of the land, and had then to hand over a tenth of this to the priests (Nu 18²⁴). Other dues besides, of all kinds and in some instances very considerable in amount, fell to the priests. In peaceful times all this was exactly regulated; for what Josephus (*Ant.* XX. viii. 8) relates of the high priests, that they sent their servants to the threshing-floors to seize the portion of the grain due to the priests, belongs to the latest period in the history of the Jewish State, when all legal relations were dissolved. Admittance to the priesthood or to the Levitical body was open to none but those who belonged to the tribe of Levi, and the members of the privileged caste watched over their prerogative with the utmost vigilance. Not only the priests in Palestine, but even the members of priestly families who lived in foreign lands, drew up exact genealogies whose correctness was examined at Jerusalem (Jos. *Vita*, I; c. *Apion*. i. 7). In the matter of the revenues, however, account had to be taken merely of the priests who

§ Delitzsch, *Handwerkerleben zur Zeit Jesu*, 1875; Rieger, *Versuch einer Technologie und Terminologie der Handwerke in der Mischna*, 1894.

¶ The characteristic saying of Simon b. Zoma, that when he looked on the crowd of humanity he felt impelled to thank God because He had formed them all to serve Him (i.e. to execute all His purposes), has reference not to the favoured body of the Wise, but to the division of labour amongst men (Jerus. *Berakoth* 13a).

¶ It is very significant that To 11⁸ represents Achiacharus as 'purveyor' (ἀγοραστής) of a foreign king.

* Mt 10¹⁰, 1 Co 9⁷. A man engaged to accompany one on a journey received, according to To 6¹⁸, not only travelling expenses but wages, and a present after the journey was ended.

lived in the Holy Land, who were divided into twenty-four classes, of which each had to officiate for a single week, but as a rule only twice a year. Quite a number of priests lived constantly in Jerusalem, but there were also some who had their home in other towns of Judaea, or even in Galilee. According to the calculations, somewhat doubtful, indeed, of Büchler (*Die Priester und der Kultus im letzten Jahrzehnte des Jerus. Tempels*, 48 ff.), the total number of priests in the last days of Jewish history amounted to about 20,000, of whom some 5000 lived in Jerusalem.

Of payment of teachers there is no mention. According to *Shabbath* i. 3, it was the synagogue attendants that gave elementary instruction to children on the Sabbath. These would receive at most a salary for attending to their duties in general. In any case, the teachers of the Law and the scribes did not live by their work of teaching; on the contrary, if they were without means, they pursued some handicraft, or even engaged in trade, in order to gain a livelihood.—That physicians received a fee when their services were over is plain from such passages as Sir 38⁴, and Midrash 'Ekhā on La 1⁸.

The class of free citizens included also the day-labourers, who owned no land, and had no fixed employment, but hired out their labour daily (cf. the picturesque description in the parable of Mt 20¹²). When, not long before the outbreak of the war for freedom, the temple was at last finished, Josephus (*Ant.* XX. ix. 7) tells us that more than 18,000 labourers were thrown out of work, that it was resolved to utilize the treasure of the temple in order to procure employment for them, and that they received their wages even if they had wrought only a single hour. See also art. WAGES, below, p. 358.

Quite different was the standing of the slaves proper, who enjoyed no personal freedom. Even Jews might fall into this condition, if, for instance, they could not pay their debts (cf. Mt 18²⁵), or had been guilty of theft. The Law, however, contained a series of enactments (see full discussion of these in Driver, *Deut.* 181 ff.) by which the slavery of a Jew had a time limit imposed upon it. By means of the combining method of exegesis, this period was shortened still more, namely when the year of Jubilee happened to fall within the six years' period of service.* But, as the year of Jubilee was not really observed, this enactment could have no practical consequence. On the other hand, the later teachers of the Law laid it down that a Jewish girl was to serve as a slave only till she reached the age of puberty.† It may further be assumed that, as the prosperity of the people increased, such cases would always be more rare, and that poor Jews would be saved from this fate by the ready benevolence of the people, coupled with the organized methods for the relief of the poor (the third tenth every three years, and the collecting of alms in the synagogues). The majority of slaves were, accordingly, without doubt, foreigners acquired by purchase.‡ See, further, art. SERVANT in vol. iv.

When we compare the condition of the Jews immediately after the Exile with that which prevailed in the time of Christ, a very important difference, as was above remarked, presents itself. Instead of the small, poverty-stricken population of Nehemiah's day, we see a numerous people, which with energy and industry can turn to good account the many sources of wealth that abound

in their land. In spite of their longing for Messianic times, in spite of the unreality of their world of ideas, they displayed in real life much adroitness and a remarkable turn for business, so that their position had come to be one of great material well-being. The clearest evidence of their extraordinary energy is afforded by the circumstance that, although they were very heavily burdened with taxes, they were not reduced to poverty, but on the contrary continued to increase in wealth. The dues they had to pay were partly sacred and partly secular. The former were based upon the enactments of the Priests' Code (esp. Lv 2³ 6¹⁶⁻¹⁸ [Heb. 9-11] 7³²⁻³⁴, Nu 18²⁸⁻²⁹), with which certain prescriptions from Deuteronomy (14²²⁻²⁹ 18⁴⁻⁵)* were combined. The principal due was the Levites' tenth of all the produce of the soil, in the paying of which the most painful exactness was shown by strict Jews (cf. Mt 23²³). But before the tithing of the produce of the soil there was a twofold due deducted: the first-fruits of the 'seven kinds' (see Schürer, *GJV*³ ii. 249), viz. barley, wheat, grapes, figs, pomegranates, olives, and honey; and the *tērūmā*, which was not exactly measured, but was understood to be the fiftieth part (see Schürer, l.c. 249 f.) of all the fruit of field and tree. From the products which were then tithed there was taken (in addition to the tenth part paid to the priestly tribe) a second tenth,† which, however, was destined, along with the tenth of cattle (Lv 27³²), for sacrificial feasts. But every three years a third tenth (the *עֲשֵׂרֵי הָעָנִי*, the 'poor-tithe,' according to the Rabb. interpretation of Dt 14²⁹; but see Driver, l.c. 170 n.) was deducted for the benefit of the poor. Further, the firstlings of all animals that might be offered in sacrifice were claimed as a due, while a sum of money had to be paid for firstborn children and the firstlings of unclean animals (Nu 18¹⁶⁻¹⁷); not to speak of a firstlings' cake (the *hallā*) of coarse flour (Nu 15²⁰, cf. Ro 11¹⁶), and a part of the wool at the first shearing (Dt 18⁴). Lastly, there were various occasional offerings that required to be brought. The annual temple poll-tax (Ex 30¹⁴, Mt 17²⁴), on the other hand, was not high (half a shekel for every adult male), and could not be felt except by the very poorest. See more fully, on the subject of this paragraph, Schürer, *GJV*³ ii. 243-262 [*HJP* II. i. 230-254].

In addition to these very considerable dues,‡ there were the secular taxes. After the Jews were freed from the Greek domination, which, from a financial point of view, was very burdensome, requiring a third part of grain and half the produce of fruit trees to be paid, the taxes passed to the Hasmoneans.§ When Herod afterwards became king, he obtained command of all the secular taxes of the country. According to Josephus (*Ant.* XV. ix. 1), these consisted mainly in the rendering of a certain proportion of the produce of the land, besides which the king levied a market toll on all that was sold in Jerusalem (*ib.* XVII. viii. 4). Herod's whole revenue, according to *Ant.* XVII. xi. 4 (with which, indeed, *BJ* II. vi. 3 does not agree), amounted to more than 900 talents (=£369,000) a year. The Jews complained bitterly of the amount of the taxes laid

* On the irreconcilable conflict between these codes in certain particulars, see Driver, *Deut.* 169 f., 218 ff.

† Following the Rabb. interpretation of Dt 14²²⁻²⁷, which held the tithe here prescribed to be distinct from, and in addition to, the tithe of Nu 18²¹⁻²⁸; but see Driver, l.c. 169 f.; Schürer, l.c. 246; and art. TITHES in vol. iv. p. 730.

‡ In the Sabbatical years all dues based upon the produce of the soil would of course be dispensed with (cf. Jos. *Ant.* XVII. xi. 6).

§ Regarding their system of taxing we know nothing except the few details contained in Josephus (*Ant.* XVII. x. 6; cf. Schürer, *GJV*³ I. 345). The people felt the taxation of Herod to be heavy in comparison with what had gone before (Jos. *ib.* XVII. xi. 2).

* Jos. *Ant.* iv. viii. 28; cf. Saalschütz, *Mosaisches Recht*, 718.

† Saalschütz, l.c. 817.

‡ With these foreign slaves they had generally, according to the Talmud, a great deal of trouble; cf. Zadok Kahn, *L'esclavage selon la Bible et le Talmud*, 1867, p. 173 f. For an earlier period, cf. Sir 33²⁴.

upon them, and alleged that it was only by bribing the king himself and his tax-collectors that it was possible to save oneself from injustice (*Ant.* XVII. xi. 2, cf. viii. 4). But of course we are not to lend too much credit to these complaints, especially as we learn that, after the great famine, Herod voluntarily granted the people remission of a third of the taxes (*Ant.* xv. x. 4). Herod's successors no doubt organized the matter of taxation upon the same lines as himself. Herod Antipas, who derived from his territories an annual revenue of 200 talents, had customs officials stationed on the frontiers (*Mt* 9⁹), to levy duties on imports and possibly also on exports. Agrippa, too, who for a short time had the whole land under his sway, would probably utilize the system of his predecessor. But during his reign not only was the market toll at Jerusalem abolished (see below), but the king, who was anxious to gain the affections of the Jews, remitted also the duty upon the houses of the capital (*Ant.* XIX. vi. 3). During the period that intervened between the deposition of Archelaus and the accession of Agrippa I., Judaea,* and, after Agrippa's death, the whole country, was taxed by the Romans, and the revenues passed into the Imperial *fiscus* (cf. *Mt* 22²¹). The taxes proper were levied by the Procurator, the commercial imposts were farmed out to private officials. The taxes consisted partly of a proportion of the produce of the soil, which was paid either in kind or in money, but they included also a poll-tax, which was levied even on women and slaves.† Vitellius remitted to the Jews the market toll that had to be paid at Jerusalem (*Ant.* XVIII. iv. 3); but in spite of this the taxes were very high, and were felt by the people to be extremely oppressive (*Tac. Ann.* ii. 42).

Taking all these dues together, we see that the material resources of this little nation were drawn upon to an extraordinary degree, and that none but a very energetic and temperately living people could have borne such burdens, and upon the whole even prospered under them. From the social point of view, the Jews must be reckoned among the more fortunate nations. As long as the foreign yoke was not too heavy and their religious susceptibilities were not offended, there prevailed amongst them a considerable degree of contentment and a healthy enjoyment of life (*Sir* 14^{11, 14}), which at times might rise to hearty rejoicing, as we see, for instance, in the Song of Songs and the noisy celebration of the Feast of Tabernacles. No doubt there were social extremes, the one of wealth and luxury, the other of grinding poverty (cf. the parable of Dives and Lazarus), but the majority belonged to neither of these classes, and in peaceful times led a temperate and generally contented life.

v. PARTIES.—If the Jewish people was thus free from sharp social contrasts, there were opposing elements of another kind amongst them, which consumed their strength in the most dangerous fashion, and whose conflicts are the moving factors of the whole post-exilic history, until at last they brought about the destruction of the nation. The essential principle of this opposition is of a religious character, social and political principles play only a subordinate rôle in it.

What in pre-exilic times had been the wealthy secular nobility, became after the Exile the temple aristocracy: a privileged class to which a number of quite diverse circumstances gave a marked superiority. We have seen how, in consequence of the growing prosperity of the nation, the priests

necessarily came into the possession of great wealth. At the same time the condition of things involved the passing of the relics of independence which were left to the Jews, into the hands of the high priest and his priestly coadjutors. In this way they were brought to interest themselves in actual politics, and thus were gradually forced into opposition to the strict party, whose ideal was complete political passivity and a confident expectation of Divine intervention. There were thus developed opposite religious principles, which by constant friction were always brought into sharper contrast. The 'pious' could not avoid looking upon their opponents with the same eyes as those with which the prophets had regarded the secular nobility of their day. The rich aristocracy were thought of as the ungodly, who believed not in God's help but in political devices often of a desperate nature; they were the unrighteous, who used their wealth and their influence with foreign nations to inflict all kinds of damage upon their opponents, the strict party. At the same time it would be a serious misunderstanding to reduce this opposition to a mechanical system, and to suppose, for instance, that all the priests belonged to the broader party. That there were even high priests who sympathized with the stricter tendency is sufficiently proved by the instance of Simon the Just, whose memory is still glorified in the later Pharisaic literature; and among the ordinary priests there were many who belonged to the 'pious.' Jewish history shows also that, among the priests who politically occupied the standpoint of the secular school, there were earnest men who were prepared to lose their life rather than neglect the duties assigned to them in connexion with the cultus (*Jos. Ant.* xiv. iv. 3). It would be equally wrong to suppose that the strict party represented an opposition to the temple cultus because this was in the hands of the temple aristocracy. That it was not so may be shown from the way in which Ben Sira, who himself belonged to the stricter school, exhorts his readers to honour the priests and to pay them their appointed dues (*Sir* 7^{20ff.}). The correct view is simply that in the ranks of the temple aristocracy there was a party prepared to sacrifice the sacred uniqueness of Israel for the sake of worldly advantages, and that this disposition was so strongly developed that its representatives could not but appear to the strict school in the light of apostates.

The name under which in later times the adherents of the secular party meet us is *Sadducees*, properly members of the Jerusalem priesthood (from *Zadok*, 1 K 1⁸, Ezk 40⁴⁶). In opposition to them the *Pharisees* stand for the most uncompromising representatives of the stricter tendency. The name means properly 'those who separate themselves,' who keep at a distance from the ordinary unclean life and from all unclean persons (in contrast to the *'am hā-'āreḥ*, the common people, who were indifferent in matters of Levitical purity, etc.).

It was the elevation of the Maccabees that was responsible for the above-described opposition becoming a chronic malady. The Maccabees were originally allies of the stricter school, but, after they attained to the supreme power, they slipped over to the views of the temple aristocracy and thus came into conflict with the Pharisees. Above all, it was repugnant to the strict party that the Hasmonæans should confuse and corrupt the Messianic hopes. It is evident from the so-called First Book of Maccabees that the adherents of the Hasmonæan princes believed that these hopes had found a fulfilment in the persons of the latter. After they had conquered the whole land and assumed the royal title, it did indeed look as if

* The Samaritans, who also came under the Roman sway, were relieved, according to *Ant.* xvii. xi. 4, of a third of the taxes, because they had taken no part in the revolt.

† Cf., further, Schürer, *GJP* I. 511.

the old Davidic kingdom had been raised up once more. The condemnation of this desecration of the Davidic throne and the sacred hopes meets us in the Psalms of Solomon (17^{4a}) and in a passage in the Book of Enoch (chs. 94 ff.); cf. also Assump. Mos. 6^{4a}. The overthrow of the Maccabæan house cleared the air. The Sadducees were completely subjected under Herod, and had lost all influence. Under the Roman domination, the high priest, and with him the Sadducees, regained greater political importance (see above, p. 48), but they no longer played the principal part. When the war for freedom broke out, they sought at first to stifle the movement, and then, when they failed in this, to guide it. But the waves now ran so high that they quickly swept away this time-worn and enfeebled party. See, further, art. SADDUCEES in vol. iv.

The development of *Pharisaism* was very materially shaped by the Maccabæan period. Opposition to the Hasmonæans brought out its one-sided tendencies to the full, especially when, under Alexander Jannæus, things went so far as a civil war, in which the Pharisees were at first victorious, but afterwards beaten and cruelly punished. But it was a momentous circumstance that immediately thereafter, under queen Alexandra, they gained political power. They forced their way into the Sanhedrin, carried a number of their laws, and thus tasted the sweets of rule. Thereby their less estimable qualities were developed, and there arose among them those Pharisees with whom we make acquaintance in the Gospels. With them the external flourished at the expense of the internal; beneath their numerous religious exercises, such as fasting, ablations, prayer, almsgiving, there was often concealed an impure, ambitious, haughty disposition, whose end and aim was to lord it over the crowd. Their renunciation of all interest in foreign politics was abundantly compensated by the influence they exercised over the people—an influence to which even the Sadducees had to bend (Jos. Ant. XVIII. i. 4). It may be added that it is not only the New Testament that describes the Pharisees in this way. The Assumption of Moses contains a passage (7^{3a}) of precisely similar import, which also refers without doubt to the Pharisees.* Of course there were exceptions among them, as we learn even from the New Testament; and the Psalms of Solomon, which emanated from Pharisaic circles, still contain much of the pure and noble piety which we encounter in the canonical Psalms. See, further, art. PHARISEES in vol. iii.

While the sharp opposition between the Sadducees and the Pharisees receded somewhat after the overthrow of the Hasmonæans, there grew up within Pharisaism itself opposing influences, which were destined to be still more dangerous to the life of the people. Although the Pharisees otherwise were identified with the quiet and passive waiting for the time of the Messiah, the enrolment of the Jewish people by Quirinius (see above, p. 49*) gave birth to a new party, which in other respects agreed with the Pharisees, but regarded the struggle for freedom and the casting-off of the Roman yoke as a sacred duty. The founders of this party of *Zealots* (ἱσχυροὶ) were a man of Galilee, named Judas, and a Pharisee, Sadduk (cf. Jos. Ant. XVIII. i. 4). From the ranks of these patriots there came, during the last decades before the war for freedom, the utterly ruthless *Sicarii*, who, armed with a short dagger (*sica*), mingled with the crowd, especially on the great feast days, and selected their victims alike from among foreigners

and from their fellow-countrymen (Jos. Ant. XX. viii. 10; BJ II. xvii. 6, etc.; Ac 21³⁸). Against wild offshoots like these the more sober-minded of the Pharisees came forward, and were thus at times led to go hand in hand with the Sadducees.

The theological points of difference between the Sadducees and the Pharisees, upon which Josephus lays so much stress, are merely particular illustrations of the above-described deeper contrasts. The spiritual development which had taken place in the stricter circles since the time of Antiochus Epiphanes, and the new conceptions which had been thus reached, were not shared by the Sadducees, who held conservatively to ancient tradition. Hence they rejected and ridiculed the doctrine of a resurrection—a circumstance from which we may infer that they did not accept the Book of Daniel.* In general, the present possessed more significance for them than the hope of Israel, which was the life-principle of the stricter party. Similar was the state of things with their rejection of the belief in spirits and angels. In the circles of the 'pious' there had also been a very pronounced development of the notions regarding these, which had its roots, indeed, in the earlier OT writings, but yet was so peculiarly influenced, partly by foreign conceptions, that strict conservatives were bound to reject it, especially if, like the Sadducees, they had positivist tendencies. When the Sadducees, again, laid stress upon the freedom of the will, this was connected with their political leanings as above described: in their polemic they would have in view not only the passivity of the 'pious,' but also the growing disposition to transfer the real sphere of history to the angel-world, and to convert history into a conflict between good and evil spirits, of which human history was only a reflexion. As to legal enactments, the Sadducees held strictly to the Law, and rejected the oral Torah of the Pharisees. It is, no doubt, also in this connexion that the controverted points mentioned in the Jewish literature come in, but these give no clear picture of the root-principle of the opposition.

The third, 'philosophical,' party, mentioned by Josephus generally along with the Pharisees and the Sadducees, namely the *Essenes*, belonged to an entirely different world. This was a small ascetic sect, permeated with mysticism, and holding some extremely strange notions, the origin of which is still an unsolved problem. From a social point of view, the community of goods was the most characteristic feature of their organization. They employed themselves in agriculture and various handicrafts, but would have absolutely nothing to do with commerce. At least the majority of them renounced marriage. They acknowledged the temple, and sent votive gifts to it, but rejected entirely animal sacrifice. They held the Law in very high esteem. They believed in the immortality of the soul, but did not teach the resurrection of the body, because they regarded connexion with the body as a species of bondage for the soul. The doctrine of angels played a great part in their system. Among their many peculiar customs, those which express a veneration for the sun are the most notable, because they show most clearly that we cannot completely account for this sect from Judaism itself. What is genuinely Jewish in their opinions and customs comes nearest to Pharisaism, but the differences are too great for Essenism to be set down as a degenerate offshoot from it. This small, peaceful body never probably had very much weight. See, further, art. ESSENES in vol. i.

* The authority followed by Josephus in Ant. XVII. ii. 4 knows of the Pharisees as οἱ τῶν τοῦ νόμου καὶ βλαστῶν ἱσχυροὶ.

* Cf. Mt 22³⁴. On the question to what extent the Sadducees recognized the Torah alone as Holy Scripture, as several of the Church Fathers assert, see Schürer, *GVV* 2 ii. 411 ff.

vi. EDUCATION AND CULTURE.—Regarding the education of Jewish children we have only scanty information. According to the Bab. Talmud (*Babā bathrā*, 21a), Joshua b. Gamaliel (probably the high priest who held office A.D. 63-65) appointed teachers for boys in every province and every city, and children were brought to these when they were six or seven years of age. According to *Shabbath* i. 3, the synagogue attendant (*hazzān*) was required on Sabbath to teach children to read. Josephus (*c. Apion*, i. 12) and Philo (ed. Mangey, ii. 577) speak as if it was customary for the Jews, even as children, to learn the Law. But this can refer only to the circle of the scribes and the educated classes, and not to the mass of the people. For if children learned in the boys' school to read the Law, and if this accomplishment was general, it would have been superfluous to have the Hebrew text translated into Aramaic at the synagogue service (see above, p. 47*). The latter custom was manifestly due to the circumstance that the common people no longer understood Hebrew. When, therefore, Jesus, the carpenter's son (Mt 13³⁵), was able to read and expound the Bible text (Lk 4^{16a}), this would naturally strike the people as something unusual and excite their wonder. But it is impossible to decide with certainty how large the circles were that possessed rolls of the Law (1 Mac 1^{34c}). As little are we informed as to the number that were able to write, although it is evident that the growth of commerce and the increasing pursuit of a business life must have contributed largely to the spread of this accomplishment (Lk 16^b). There is no mention of any regular instruction of girls, a branch of education which was not enjoined in the Law.*

The higher education consisted in the stricter circles of a deeper study of the Law, especially the special enactments that had been orally transmitted. The student selected some eminent legal expert as his teacher. Thus, for instance, the two famous exegetes Judas and Matthias were very popular teachers of youth at the time of Herod the Great (Jos. *Ant.* XVII. vi. 2); the disciples of Hillel and Shammai formed two well-defined schools of interpreters of the Law. St. Paul studied at Jerusalem under Gamaliel (Ac 22³), etc. After his course of instruction was complete, the disciple was reckoned among the Wise (חכמים), as opposed to the unlearned (דיוטין), i.e. the Gr. *idiotēs*.† Yet the detailed statements contained in the Talmudic writings as to the instruction in these higher schools (בתי המדרש), and as to the organization of teachers and pupils, are not to be transferred *simpliciter* to the time of Christ, for without doubt the conditions subsequent to the destruction of the State must have influenced the development of things.‡

But there were other circles in which the higher education had a somewhat different character, inclining more towards the worldly culture of the time, as was the case in great measure with the Hellenistic Jews. As a matter of course, it was the nobility and the courtiers that favoured this culture. A good example of such an education presents itself in the person of Josephus, a scion of the leading temple aristocracy, related on his mother's side to the Hasmonæan royal family. According to his own account (*Vita*, 2 f.), he commenced even as a child to read the Law, and speedily made such progress that, when a boy of fourteen, he used to be consulted by the leading

priests on points of interpretation of the Law. At the age of sixteen he began to study carefully the tenets and maxims of the three sects—the Sadducees, the Pharisees, and the Essenes; nay, he even lived for three years with a rigid ascetic in the desert, in order to put also this conception of life to the proof. When nineteen years old he decided to cast in his lot with the Pharisaic party, but he studied, further, the Greek language and literature. He had such a command of Greek that in his twenty-sixth year he was able to travel to Rome, where he obtained access to the Empress, who treated him with great consideration. He tells us, however, regarding his attainments in Greek, that, while he had made a thorough study of the language, his Jewish usages had hampered him in acquiring an exact pronunciation of it. 'It is not our way to accord any great appreciation to those who have learned many languages . . . for this is an accomplishment of which slaves are as capable as freemen. But those alone are regarded as wise who thoroughly understand the laws, and can expound the Holy Scriptures' (*Ant.* XX. xii. 2). That Josephus had difficulty, further, in the use of Greek in writing, is evident from the circumstance that, in preparing his history of the Jewish war, he availed himself of the help of colleagues who were proficient in Greek (*c. Apion*, i. 9). But he not only devoted himself to the study of the language, but, as his writings show, had read a very considerable number of Greek authors, besides being acquainted in some measure with Greek philosophy. Here, then, we see how, in the case of a Palestinian Jew of good family, a strictly Jewish education might be combined with a Hellenizing tendency.*

As to the ordinary stage of culture among the Jews, this was in general conditioned by their acknowledged dependence upon the Holy Scriptures. Here lay hidden all the treasures of wisdom for those who knew how to dig them up. While the Hellenistic Jews were under the influence of Greek philosophy, and made frequent attempts to discover in the Scriptures the ideas of foreign wisdom, the native exegesis was based essentially upon the text itself, whose many secrets it was sought to penetrate by an acuteness which displayed itself in the form of ingenious combinations of passages of Scripture. Nothing had any value whose presence could not be demonstrated in the Law and in the Scriptures. And yet the world of ideas in which these men moved was not so completely uninfluenced by foreign culture as they themselves may have imagined. Several centuries of contact with Parsism had not passed without leaving clear traces.† As little were the Palestinian Jews able to shut themselves off from the influence of the Greek spirit, by whose effects they were everywhere surrounded, and whose traces may be largely observed in the Palestinian Midrash.‡ Yet all this worked quietly and unconsciously, and did not lead to any essential transformation of the Palestinian culture.

As far as a knowledge of *history* was concerned, there was naturally a disposition to abide by the information contained in the Bible; whereas there were only broken reminiscences of the events of the post-Biblical period. In this respect, indeed,

* Later Jews deduced from the word 'sons' in Dt 11¹⁹ that the Law did not require the instruction of daughters (Bacher, *Die Agada der Tannaiten*, ii. 372).

† On the other hand, the phrase עַם הָאֶרֶץ 'people of the land' is used in opposition to *Pharisees*, who were not all scribes.

‡ Cf. Weber, *Jüd. Theologie* 2, 1897, p. 125 ff.

* On the other hand, when Rabbi Ishmael was asked whether it was allowable to learn Greek wisdom along with the Law, he replied (in allusion to the words 'by day and by night,' Jos 1⁸, Ps 1² etc.): 'Only if thou canst find a time which is neither day nor night' (Bacher, *Die Agada der Tannaiten*, i. 262).

† Cf. E. Stave, *Ueber den Einfluss des Parsismus auf das Judentum*, 1898; also the art. ZOROASTRIANISM by J. H. Moulton in vol. iv. The Babylonian influence contended for, especially by Gunkel, is still somewhat problematical, and its extent is in any case not yet demonstrated.

‡ Cf. Freudenthal, *Hellenistische Studien*, 1875, p. 66 ff.; Siegfried, *Philo von Alexandrien*, 283 ff.

a man like Josephus forms an exception, but he is likewise an exception among his Palestinian fellow-countrymen, and his great work on the history of Israel was intended not for Jews but for the rest of the world.*

Of an acquaintance with *natural science* we can scarcely speak. The Book of Enoch, it is true, occupies itself in detail with cosmological and astronomical secrets, and shows, amidst a multitude of fantastic notions, a knowledge of the twelve signs of the zodiac, the regular phases of the moon, the solar and lunar years, perhaps the 8-year cycle of the Greeks, the four intercalary days, and it contains also some geographical allusions (chs. 72 ff.). But this must be viewed as peculiar to a few writers, and not as the standard of the prevailing culture. At all events, in a letter of R. Gamaliel II. † the intercalating of 30 days into the current year is justified on the ground that the lambs are still small, and the crops not yet ripe. On the 30th day of each month the Sanhedrin met, and, if it was then announced to it that the moon-crescent was visible, the day was marked as holy, so that the preceding month had only 29 days counted to it. If the day was cloudy, the new moon was not reckoned to commence till the following day. ‡ Geographical knowledge was enlarged by the journeys of Jewish merchants, but yet was in general superficial and vague.§

Medicine was upon a primitive basis. The mild and sensible Ben Sira exhorts his readers not to despise the physician's help, since the Lord has created medicines out of the earth, which the apothecary knows how to mix and the physician how to apply (Sir 38^{int.}). The healing powers of the various hot springs of Palestine had been discovered, and they were largely taken advantage of (Jos. *Vita*, 16; *Ant.* XVII. vi. 5). But the conception of diseases was still essentially a purely religious, or, in most instances, a superstitious one, so that in the treatment of them all kinds of magical methods took a prominent place. In general, the belief in magic played no mean rôle amongst the Jews, although it was forbidden in the Law. This was a sphere in which the Law was powerless to control the notions of men. || See art. *MAGIC* in vol. iii.

It was only in the sphere of *religion* that the standard of popular education was high, and it was regarded as extremely important to see that this should be so. While the cultus was essentially the concern of the priests, there had been for long established all over the land synagogues, where religious instruction was attended to and the people acquired an acquaintance with the holy Scriptures (Ac 15²¹). The synagogue building (συναγωγή or προσευχή) contained a press where the sacred writings were kept, and an elevated place where the reader stood. The service was introduced by repeating the passages Dt 6⁴⁻⁹. II. 13-21, Nu 15⁴⁷⁻⁴⁸; then came a prayer spoken by a member of the congregation, to the accompaniment of the 'Amen' and other responses by the people. This was followed by the lesson from the Law, which was read by several members, preferably priests or Levites, and translated into Aramaic, verse by verse, by an interpreter (פרקי). Next

came the reading of a section from the Prophets, which was translated in the same way (Lk 4¹⁷, Ac 13¹⁵). To this reading there was attached a sermon, during the delivery of which the speaker was accustomed to sit, whereas the readers stood (Lk 4^{30ff.}). The service closed with the benediction (Nu 6^{22ff.}), which was pronounced by a priest. The principal service was that of Sabbath forenoon, but there were less elaborate services also on Sabbath afternoon and on some week days. Lastly, Divine service was celebrated on all feast days. In this way those of the people who felt that they formed a community had abundant opportunity given them of making acquaintance with the Scriptures and of receiving instruction and edification. It is worthy of note how in this matter there is a retrocession of any privileged class, the service being of quite a democratical character. Even if a preference was given to priests in the reading of the Scriptures, this function could be discharged by others as well, while the delivery of the address was open to any member of the congregation, or any qualified visitor who happened to be present (see art. *SYNAGOGUE*, vol. iv. p. 641^b).

The above account of things applies, properly speaking, only to the men. But if we would have a complete picture of the stage of culture among the Jews, we must face the question of how it stood with the women. There is a want of historical data here, but certain characteristic features come out. For instance, we learn from Josephus (*Ant.* XVII. ii. 4) that the Pharisees exercised great influence over women, a circumstance which proves that the latter felt an interest in party questions and themselves took sides. Thus even queen Alexandra allowed herself, contrary to all the traditions of the Hasmonæans, to be guided by the Pharisees. The Gospels show us how deep was the religious interest on the part of women, and how receptive they were to the teaching of Jesus. On the other hand, evidence of the slender culture of women is afforded by the circumstance that it was they especially that devoted themselves to magical arts, so that even women of noble birth were at times accused of sorcery.*

vii. *ART AND LITERATURE.*—With the Jews the first place among the fine arts is held by *music*, because this had entered into the service of religion. The temple musicians formed a guild, in which the technique and the understanding of the numerous technical expressions were hereditary, not being communicated to outsiders—a circumstance which explains why these expressions, when they occur in the Psalms, especially in their titles, were unintelligible to the Greek translators of the LXX.† The members of this guild, who were not at first (Ezr 10²³, Neh 7¹⁻⁷²) reckoned among the Levites, had been by the time of the Chronicler (1 Ch 6³³⁻⁴⁷) included in this class of temple officials, and shortly before the destruction of the State they obtained, by the aid of Agrippa II., the right of wearing the same linen garments as the priests—an innovation which, according to Josephus (*Ant.* XX. ix. 6), contributed to bring about the punishment of the people. The pieces that were sung were the Psalms of the Old Testament. The whole of these were not, indeed, adapted to this purpose (e.g. Ps 119), but in the case of a large proportion of them there is ancient testimony to their liturgical use. The Psalms were sung by the official singers, the people struck in only with certain responses. The singing was accompanied by harps, zithers, flutes, and cymbals, although, unfortunately, we are not informed as to the exact form of procedure either with the singing or the instrumental accompaniment

* How inconsiderable were the historical recollections in the Rabbinical literature is shown in Dérémbourg's *Essai sur l'histoire, etc. de la Palestine*, 1867.

† To be found in Dalman's *Aramäische Dialektproben*, 1896, p. 8.

‡ It was not until about 200 years after the destruction of Jerusalem that the Jews began to fix the new moon on astronomical grounds. See Biehlm, *HWB* II. 1094, and cf. art. *New Moon* in vol. III. p. 522^b, and *TW* in vol. IV. p. 764^a.

† Cf. Jacob in *ZATW* XVI. (1896) 171.

The trumpets blown by the priests would not belong to the orchestra proper, but would serve simply to mark fixed points in the service. How early the liturgical system was developed may be inferred partly from the statements of the Chronicler and partly from the very graphic description in Sir 50. But the Psalms were sung also outside the temple, especially at the Paschal meal in private houses (Mt 26³⁰). Alongside of this sacred music there was also a secular species, which was used especially to accompany the popular dance (Mt 11¹⁷). The Israelites, in fact, had always been a music-loving people, with whom this exercise was resorted to on all occasions either of rejoicing or of mourning. The height to which popular poetry had risen among them is evident above all from the Song of Songs, which points back to the songs sung at wedding celebrations.

On the other hand, the *plastic arts* were completely forbidden to the Jews, in so far at least as they had to do with the representation of any living creature. When Pilate on one occasion, forgetting the consideration for Jewish scruples usually shown by the Procurators, caused standards emblazoned with pictures of the Emperor to be brought to Jerusalem, the popular feeling was so violently excited that after a while he ordered the offensive emblems to be removed (Jos. *Ant.* XVIII. iii. 1). The golden eagle which Herod had placed over one of the gates of the temple was an abomination to strict Jews, and a number of fanatics, upon the occasion of a false report of the king's death, tore it down—an act for which they were themselves punished with death (*ib.* XVII. vi. 2). Those of high rank, indeed, set themselves above the strict custom in such matters. The Hasmonæan queen Alexandra caused portraits of her children, Aristobulus and Mariamne, to be painted and sent to Antony (*ib.* xv. ii. 6). Agrippa I. had statues made of his daughters (*Ant.* XIX. xix. 1). In the non-Jewish cities both Herod and his successors played the part in general of decided patrons of Greek art. In Cæsarea on the coast, and in other towns, they caused temples and theatres to be erected. Nay, Jerusalem itself did not escape, for Herod had a theatre and a hippodrome constructed in it, to the great offence of the strict Jews. The same course was pursued by Herod Antipas at Tiberias, which assumed quite the stamp of a Greek city (see above, p. 47*). The Jews thus made acquaintance with Greek architecture mainly as an element in heathen civilization, and on this account the splendid pile of temple buildings at Jerusalem was not an unmixed source of joy to the strict party. That there were some Jews, however, who availed themselves of this art is shown by the sepulchral monuments in the Kidron valley, one of which, according to the inscription, belonged to a priestly family.

The Jewish literature that has come down to us from this period, with the single exception of the historical works of Josephus,* is composed in the interest of religion. Shortly before the Maccabæan era, the Book of Sirach, a collection of rules of conduct and *Hokhma* teachings, was written. From the Maccabæe period itself we have the Book of Daniel, some of the canonical Psalms, and probably also the Book of Ecclesiastes, the beast-visions in the Book of Enoch (chs. 83-90), the First Book of Maccabees (c. 100 B.C.), the strongly anti-Hasmonæan passage Enoch 91-105, while the Psalms of Solomon belong to the time of the overthrow of the Hasmonæans. The rest of the Book of Enoch is also possibly all pre-Christian. The Assumption of Moses appears to have been

* The historical work of Josephus' contemporary, Justus of Tiberias, is lost.

composed shortly after the death of Herod the Great. On the other hand, neither of the two extremely important Apocalypses of Baruch and Ezra was composed till after the destruction of the Jewish State—that of Ezra under Domitian (A.D. 81-96), that of Baruch apparently somewhat earlier. There are, further, the legends of Tobit and Judith, the Book of Jubilees (a midrashic recension of Genesis), and the Martyrdom of Isaiah, which cannot be dated with certainty, but all belong to the period under consideration.

As regards the estimation in which this literature was held at the time, some writings, namely Daniel, Ecclesiastes, and the 'Maccabæan' Psalms, were received into the Canon of the Pharisees, which afterwards became the only authoritative one. The Book of Sirach was not, indeed, canonized, but enjoyed high esteem, and is not infrequently cited by the Talmudic teachers, so that even the original Hebrew text of this work survived, and has recently been recovered in large part. See art. SIRACH in vol. iv. The Psalms of Solomon emanated, beyond doubt, from the heart of the Pharisaic circle, and so frequently remind us of the canonical Psalms that it is a matter of surprise that their original text has completely disappeared. The rest of this literature, on the other hand, was afterwards disavowed by Palestinian Judaism, and hence we make acquaintance with it only in translations which circulated in Hellenistic circles. It is difficult on this account to say how these writings, above all the apocalyptic portions of them, were regarded at the time by the proper representatives of Judaism. The Apocalypse of Ezra itself claims to be a work of mystery to be read only by the initiated.* And the same is true, no doubt, in part of the other Apocalypses, with their many secrets.† On the other hand, they not only obtained currency among the Hellenistic Jews, but their world of thought comes in contact on the one side with the New Testament, and on the other, in spite of essential differences, with the late Jewish literature, in such an unmistakable fashion as to show that they must have been widely read. Even if it should be held that these coincidences are due, not to direct use of these writings, but to a common world of thought, with which the people were familiar and on which the literature in question also shows its dependence, our view of the then existing Judaism would have to be modified all the same; for then we should have to employ for its reconstruction not only the characteristic features of the official Torah study, in conjunction with the survival of the pure and inward spirit of the OT in some circles, but also the mystical sphere of ideas, with its descriptions of the world beyond and its numerous attempts to burst the barrier created by the national limitations of Judaism. Here we have a difficult task, but one that is of extreme importance for the correct appreciation of Christianity, and for the accomplishment of which the necessary preparations have only been commenced.‡

viii. THE JEWS OF THE DIASPORA.—As long as the existence of the post-exilic Jewish State in Palestine continued, the Jewish communities of the Diaspora were thrown into the shade by it. Nevertheless, developments and transformations took place amongst these, which were of the greatest significance both for Judaism itself and

* 2 Es 128¹⁷. 'Write all this in a book, and put it in a secret place, and teach the wise of thy people, of whom thou art sure that they are able to comprehend and keep these secrets.'

† The Assumption of Moses appears to have originated in Zealot circles.

‡ Cf., among others, Dalman, *Worte Jesu*, 1898 [Eng. tr. 1902]; Wellhausen, *Skizzen und Vorarbeiten*, vi. 225 ff.; Baldensperger, *Das Judentum als Vorstufe des Christentums*, 1900.

for Christianity. At the time of Christ there were Jewish communities in every considerable town of the world. Originally, the Jews had been forcibly transported to foreign lands: by the Assyrians and Babylonians to the Euphrates districts, by Artaxerxes Ochus to Hyrcania, etc.; or they had taken their flight abroad from fear of their enemies: so, for instance, those Jews who fled to Egypt after the murder of Gedaliah (2 K 25²⁶, Jer 41¹⁷). But afterwards they migrated, in ever-increasing numbers, to various countries and settled there, partly, it may be, because they were dissatisfied with the conditions at home, partly because great material advantages were offered them in foreign parts. The chief centres were the Euphrates districts, Syria, and Egypt; * but there were also many Jews settled in the other Mediterranean lands, and it may be presumed that in NT times there was a large Jewish community in Rome. Of all the cities inhabited by Jews the most important was Alexandria, for here they were not only so numerous that two of the five districts of the city were called 'the Jewish,' but they came into contact here especially with the Hellenistic world of thought, and allowed themselves to be strongly influenced by it.

An essential factor in the life of the Jews of the Diaspora was the free exercise of their religion, which was allowed them in the time of the *Diadochi* and under the Roman domination. Things went best with them in places where they lived as an independent body with State recognition, whereas, in those lands or cities where they simply enjoyed equal rights of citizenship with others, they readily came into collision and conflict with the heathen population. Amongst their privileges must be reckoned also the possession of a jurisdiction and a coinage of their own. The latter in particular was of importance, for thus alone were they in a position to pay the poll-tax to Jerusalem. On other points the constitution and organization of Jewish communities differed in different countries.

The religious instruction of the Jews of the Diaspora was based, like that at home, upon the regular service of the synagogue, there being one or more synagogues wherever Jews were settled. In Hellenistic circles the Septuagint played the same part as the Hebrew text in the mother country, being without doubt used in the reading of the Scriptures, as acquaintance with Hebrew must have been rare on the part of Jews living abroad. See, further, art. DIASPORA in the present volume, p. 91 ff.

The Jewish-Hellenistic literature, owing not only to its being written in the Greek language, but to its being more or less interpenetrated with the Greek spirit, and its use of the Greek literary forms, has a different stamp from the Palestinian. Leaving out of account the Alexandrian expansions of some books of the OT, we may classify this literature under the three heads of History, Poetry, and Philosophy.

A number of writers treated the ancient Jewish history in a modernizing fashion, in order thereby to claim for it the interest of the foreign world of readers. In addition to some fragments, of which those of Eupolemus, owing to their peculiar syncretism, are the most notable, we have to mention here especially the *Antiquities* of Josephus, a work which for the reasons mentioned above must be assigned to the Hellenistic rather than to the Palestinian literature. Other authors made the immediate past the subject of their narratives. Thus the so-called Second Book of Maccabees is an extract from the extensive work of Jason of

Cyrene on the Maccabean rising. The most valuable of these writings is Josephus' account (*BJ*) of the great revolt of the Jews against the Romans, to which are attached certain portions of his autobiography. An ill-natured attack upon the Jews led Josephus, further, to compose an apologetic work (c. *Apion.*), having for its aim to exhibit the high antiquity of Judaism. To the class of literary forgeries belongs the so-called Letter of Aristaeas, in which a Jewish author makes a heathen relate the story of the origin of the Septuagint. The same is the case with a 'tendency' recension of a work on the Jews by Hecataeus, the reviser of which put forth his composition under the name of the Greek historian.

As regards the employment of *poetry*, we have, first of all, the remarkable attempts to transfer the forms of the epos and the drama to the realm of Jewish history. There are, for instance, fragments of an epic presentation of the history of Jerusalem by a Philo, and a drama by an Ezekiel, whose subject is the Exodus. To the same category belong also the verses put by Jewish poets into the mouth of the ancient oracle-giving Sibyls, and which mark the apocalyptic tendency that was so prominent in Palestinian, but less so in Hellenistic, circles. See below, p. 66 ff.

Most important of all are the writings which are more or less influenced by Greek *philosophy*. The only independent Jewish thinker is Philo, who plays no unimportant rôle in the history of philosophy. The others assume an eclectic attitude towards the various Greek schools, and aim only at bringing their ideas into harmony with those of Judaism, several of them seeking at the same time to justify their dependence on Greek thinkers by maintaining that the latter originally borrowed from the Mosaic Law. The principal expedient to which these authors resort in order to harmonize the heterogeneous elements, is the allegorical interpretation of the Law and the Jewish history.* To this category belong the writings of Aristobolus (2nd cent. B.C.), of which only fragments are extant; the Stoicizing work on the authority of reason (the so-called Fourth Book of Maccabees); and the writings of Philo. A transition to this species of literature is exhibited by the Book of the Wisdom of Solomon, which, in spite of Gr. influence, still reminds us strongly of the Pal. *Hokhma* literature. Cf., further, art. WISDOM in vol. iv., and PHILO, below, p. 197 ff.

LITERATURE (in addition to works on the history of Israel or of the Jews).—Schneckenburger, *Vorlesungen über neutest. Zeitgeschichte*, 1862; Hausrath, *Neutest. FRANTS BUHL.

TALMUD.—The *Talmud* (תלמוד), meaning a 'teaching,' an 'inference,' or a 'doctrine,' is a term commonly applied to a collection of works embodying the Oral Law—תורה שבעל פה, lit. 'the Torah by mouth'—handed down to the Jews by way of Tradition, in contradistinction to the Written Law—תורה שבכתב, lit. 'the Torah in writing.' The origin of this Tradition is unknown: the common view of the mediaeval authorities, claiming the same Mosaic authorship and high antiquity for it as for the Scriptures, is uncritical. But, as it is closely connected with the history and development of the

* Philo estimates the number of Jews in Egypt at about a million (ed. Mangey, II. 523).

* An interesting attempt to demonstrate the reasonableness of the laws about food is found in the Letter of Aristaeas, 142 ff.

hermeneutics of the Scriptures, its commencement may safely be dated back to the exilic period in which was first established the institution of the Synagogue, whose main function consisted in teaching and interpreting the word of God. The Hebrew term for 'interpretation' is *Midrāsh* (מדרש, cf. 2 Ch 13²⁹); and this term, like the Rab. term *Kabbālā* (קבלה, matter received by way of Tradition), which includes the Prophets and the Hagio-graphia, may likewise, perhaps, be applied to certain portions of the canonical writings, e.g. Chronicles. The prominent feature of the *Midrāsh*, however, as an instrument for enlarging upon and expanding the word of the Scriptures, is best discernible in the ancient Rab. productions, which, in spite of some hyperbolic expressions, provoked by heat of controversy, never seriously aspired to the dignity of Scripture. As a consequence, they for the most part properly kept apart text and interpretation, and thus clearly showed the process of expansion. The results gained by this method varied in their character with the nature of the Scripture passages, according as they were legal and ritual, or spiritual and homiletical. The former classes are comprised under the name *Halākāh* (הלכה), signifying guidance, a rule of practice, a legal decision; and the term extends also to the usages, customs (*Minhagim* מנהגים), ordinances (*Teknōth* תקנות), and decrees (*Gezerōth* גזירות), for which there is little or no authority in the Scriptures. The latter (spiritual and homiletical) are classified under the term *Haggādā* (הגדה, אגדה),* meaning a tale, a narrative, an explanation, a homily; and the term includes also the gnomic lore of the Rabbis, as well as stories and legends bearing upon the lives of post-biblical Jewish saints. Such topics as astronomy and astrology, medicine and magic, theosophy and mysticism, and similar subjects, falling mostly under the heading of folk-lore, pass as a rule also under the name of *Haggādā*.

The schools active in this work of the interpretation and expansion of the Scriptures extend over many centuries, and are known under various designations, each designation marking in succession a different period.

i. The *Sōphērīm* (סופרים), 'Scribes,' commencing with Ezra and going down to the Maccabæan period (450-100). Scarcely anything is known of their literary activity; the term 'Words of the *Sōphērīm*' (דברי סופרים) is used indifferently by the Rabbis of *Halākhoth* dating from various ages, and implying in most cases not the authorship of, but the authority for, certain given statements. Less vague are the Rab. references to the 'Men of the Great Assembly' (אנשי כנסת הגדולה) and 'their Remnant' (שאריתם), thought by some scholars to be identical with the *Sōphērīm*, or at least to have formed the executive of the latter.† To these are attributed not only certain sayings, suggestive, among other things, of their teaching activity (as 'Raise many disciples,' M.

Abōth i. 1), but also many ordinances and decrees, the most important of which are those bearing upon the arrangement and the completion of the Canon of the OT, the reading of the Law on certain days of the week, the fixing of the daily prayers (probably in six benedictions now embodied in the so-called Eighteen Benedictions, שמונה עשרה), and the introduction of the saying of grace after meals. The custom of pouring libations of water at the Feast of Tabernacles, and going in procession round the altar with branches of willow trees, declared by some Rabbis to have been introduced by the prophets, as well as the so-called 'Laws unto Moses from Mount Sinai' (amounting to the number of forty-three, more than a third of which refer to the preparation of the phylacteries), may also have dated from those *sophistic* times, remoteness of assigned date pointing, as a rule, to the pre-Maccabæan period.‡

ii. The *Zugōth* (זוגות; Gr. ζυγόν), 'Pairs,' a name given to the leading teachers that flourished between the Maccabæan and the Herodian period (c. 150-30). Five such 'Pairs' are recorded in the Rab. literature, extending over 5 generations, and succeeding each other in the following order: 1. Jose b. Joezer of Zereda and Jose b. Johanan of Jerusalem; 2. Joshua b. Perahya and Nittai of Arbela; 3. Jehuda b. Tabbai and Shim'on b. Shetaḥ; 4. Shemaya and Abtalyon; 5. Hillel and Shammai.† According to tradition each 'Pair' represents the heads of the Sanhedrin of their age, the one whose name occurs first in the list serving in the capacity of *Nasi* (נשיא), 'Prince or President' of the Sanhedrin, the other in that of *Ab Beth Din* (אב בית דין), 'Father of the House of Judgment,' or 'Vice-President.' This tradition is contested by many modern scholars as incompatible with the statements of Josephus and of the New Testament, according to which the high priest for the time being was *ex officio* the president of the Sanhedrin. But, whatever their particular function and title were, the existence of the 'Pairs' as the heads of a religious corporation to which the large bulk of the nation belonged, and which thus formed an important factor in the development of the Oral Law, cannot well be doubted.‡ To them are attributed not only various *Haggadic* sayings (M. *Abōth* i. 4-15), but also *Halakic* statements as well as certain ordinances and decrees. It was under the first 'Pair' (also called '*Eshkolōth*' אשכולות, [?] identical with the Gr. σχολή), a title that disappears with them) that, according to the testimony of the Rabbis, the first difference of opinion regarding the performance of certain religious practices occurred between the sages. The *Halākhoth* attributed to Jose b. Joezer, the first named of this 'Pair,' as well as the ordinances and decrees ascribed to him and to his colleague of the first 'Pair,' were apparently composed in his age, the language of the *Halākhoth* (Aramaic [M.

* See Baehar in *JQR* iv. 406 ff.

† See Weiss, *Dor Dor W'Dorshav*, i. p. 54; Kuenen in his essay, 'Über die Manner der grossen Synagoge' (occupying pp. 125-160 of the *Gesammelte Abhandlungen zur Biblischen Wissenschaft von A. Kuenen*, Freiburg and Leipzig, 1894), contests the existence of such an assembly (cf. also art. *SYNAGOGUE* [THE GEMARA] in vol. iv., and the literature cited at the end of that article); whilst D. Hoffmann (*Magazin für die Wissenschaft des Judentums*, x. 45 ff.) and S. Kraus (*JQR* x. 347 ff.) try to refute his argument. On the whole, the present writer is inclined to admit that there is an element of truth in this tradition regarding the Great Assembly. The Judaism which emerges suddenly after this nebulous period is essentially a product of the Synagogue. It is hard to see how it could ever have thriven under the care of the historical priests or the cosmopolitan *Sōphēr* of the moderns; and such a Synagogue would most naturally have developed under the auspices of an authority which acted in conformity with the spirit of the ordinances, decrees, and teachings attributed by the Rabbis to the men of the Great Assembly.

* See Weiss, *ib.* p. 66. The high priest Simon the Just (probably Simon i., c. 300 B.C.) is supposed to have belonged to this Remnant, but the saying recorded in his name is really *sophistic* in its character: 'On three things the world is stayed: on the Torah, and on the Worship, and on the bestowal of Kindnesses' (M. *Abōth* i. 2). Of his successor (2nd in the *sophistic* line), whose name Antigonus of Sokho shows already a marked Hellenistic influence, only the following saying is known: 'Be not as slaves that minister to the lord with a view to receive reward, but be as slaves that minister to the master without a view to receive reward' (M. *Abōth* i. 3). This saying, which has a certain Stoic savour about it, is supposed to have given rise to two heretical sects.

† See C. Taylor, *Sayings of the Jewish Fathers*, p. 14, note 9, for the chronology.

‡ For literature on this point, see Schürer, *GJV* ii. p. 188 ff. Of special importance are Kuenen, *l.c.* pp. 49-51; Hoffmann, *Die Präsidentur im Synedrium Mag.* v. 1878, pp. 94-99; and Jelski, *Die innere Einrichtung des grossen Synedrium*, etc. Wellhausen's *Die Phariseer und Sadduceer* must be taken with great caution, as his command of the Rabbinic sources is imperfect.

'*Eddyoth viii. 4*) and the subject of the ordinances and decrees (Levitical purity) being both signs of antiquity. Shim'on b. Shetah of the third 'Pair' is credited with having introduced several important reforms in various religious departments, whilst Shema'ya and 'Abtalyon were called the 'Great Ones of the Generation' and the 'Great Interpreters' (גדולי הדור). The most important 'Pair,' however, are Hillel (the Elder) and Shammai (the Elder), in whose names more *Halakhóth* are recorded than of any other 'Pair'; they were also the founders of two great schools (*Beth Shammai*, *Beth Hillel*, בית שמאי, בית הלל, 'the House or School of Shammai' and 'the House of Hillel') which continued the work of their masters for some generations. Hillel, a native of Babylon and (according to tradition) a descendant of the house of David, was particularly famous for his meekness and humble-mindedness. Among other things he is reported to have said, 'Be of the disciples of Aaron, loving peace and pursuing peace, loving thy fellow-creatures, and drawing them near to the Torah' (M. 'Abóth i. 12); whilst he also taught to a heathen, seeking admission into Judaism, 'What is hateful to thyself do not to thy fellow-man; this is the whole Torah, the rest is only commentary' (*Shabbath 30b*). Shammai's saying was, 'Make thy Torah a fixed thing, say little and do much, and receive every man with a cheerful countenance' (M. 'Abóth i. 15); but he was not particularly famous for his gentle temper. The most marked feature about these two leaders is their activity as interpreters of the Law and their application of the results of this interpretation to practice. Thus Shammai presses the words *אין ריבה* ('until it be subdued,' Dt 20²⁰) to mean that the act of subduing a hostile place must not be interrupted even on account of any religious consideration, and thus he permits the continuing of a battle even on Sabbath (*Shabbath 19a*). Hillel, by subjecting the term *בביתו* ('in its season,' Nu 9²) to the interpretative 'rule of analogy,' inferred from it the *Halakhá* that the duty of sacrificing the Paschal lamb overrules all consideration of Sabbath, when the 14th of Nisan falls on the 7th day of the week (*Pesáhtim 66a*)*. Indeed it was Hillel who first framed the Rules of Interpretation, seven in number (Introduction to the *Tóráth Kóhánim*), and which developed later into thirteen and more.

iii. The *Tannaim* (תנאים), 'Teachers,' the name given to the authorities living during the first two centuries of the Christian era (c. 10-200), commencing with the schools of Shammai and Hillel and terminating with R. Jehuda the Patriarch, a great-grandson of Hillel. The period of the *Tannaim*, most of whom bear the title *Rabbi* (רבי 'my Master,' but losing later its pronominal signification) or (more rarely) *Rabban* (רבן 'Master'), may conveniently be divided into four successive generations, the principal men of which are—

First Generation (10-80).—The 'schools of Shammai and Hillel,' comprising many teachers whose names have not come down to us. The underlying principle dividing these schools on many important points is not known; but on the whole the school of Shammai may perhaps be characterized as staunch conservatives in their adherence to Tradition, who allowed little room for the play of interpretation, and were as a rule very rigorous in their decisions; whilst the school of Hillel, already described by the old Rabbis as 'pleasing and meek,' were more inclined to compromise in their teaching, greatly given to the developing of the *Midrash*, and in general less severe in their *Halakic* dicta. The most important of those

known by name are Rabban Gamaliel the Elder, and Rabban Johanan b. Zakkai, both of the school of Hillel. Gamaliel, a son (some say a grandson) of Hillel, is known for various reforms introduced by him, as well as for the part he took in the trial of the Apostle Paul (Ac 5³⁴⁻³⁹); whilst Johanan was equally famous as one of the leaders of the peace party in the war against the Romans (66-70), and as the founder of the Academy of Jamnia, which became the centre of Jewish life and thought after the destruction of the temple.

Second Generation (90-130).—Rabban Gamaliel II., President of the Academy of Jamnia after the death of R. Johanan [having been rather autocratic in the treatment of his colleagues he was removed from his office for a time, but soon after restored to it]; R. 'Eliezer b. Jakób I., who was considered a great authority in traditions regarding the structure and the arrangement of the service in the temple; R. 'Eliezer b. Hyrkanos, a brother-in-law of R. Gamaliel, and the head of a school in Lydda [though a disciple of R. Johanan b. Zakkai, of the school of Hillel, he cherished Shammaitic principles, which fact brought him into collision with the majority of his colleagues, and subsequently led to his excommunication]; R. Jehoshua b. Hananya, likewise a disciple of R. Johanan b. Zakkai, but unlike his colleague, R. 'Eliezer, with whom he had many controversies, of a humble and submissive disposition; R. 'Eliezer b. 'Azarya, who derived his pedigree from Ezra the Scribe, and who obtained the office of President of the Academy of Jamnia when R. Gamaliel was deposed. To the younger teachers of this generation belong R. Tarphon, of the school of Shammai (?), who had attended the service in the temple; R. Jose of Galilee, who had controversies with R. Tarphon and other *Tannaim*; R. Ishmael b. 'Elisha, best known for his thirteen Rules of Interpretation (see above). Together with other members of the Sanhedrin he emigrated from Jamnia to Usha, where he founded a school called after his name, to which various *Midrashim* are attributed. R. 'Akiba b. Joseph, a disciple of several older teachers of this generation, was master of most of the distinguished Rabbis of the next generation, and not less famous for his skill in systematizing the content of tradition than for his ingenious methods of interpretation, which enabled him to find a basis for all the enactments of the Oral Law in the Scriptures. This fact, together with the circumstance of his patriotic zeal and his martyr death in the Hadrianic persecutions (c. 130), made him the most famous of the *Tannaim*. To this generation belong also the older disciples of R. 'Akiba—Shim'on b. 'Azai and Shim'on b. Zoma—best known for their moralizing sayings and mystical tendencies (in the direction of a Jewish gnosis) which they shared with their master, but from which, unlike the latter, they did not escape without injury. 'The one gazed (into the chambers of heaven) and died, and the other gazed and was not in his mind.' Their contemporary 'Elisha b. 'Abuyah, also called 'Aher (the Other One), was less happy than these, for he 'gazed' and 'cut the branches,' that is, became an apostate.

Third Generation (130-160).—The disciples of R. Ishmael, of whom only two are known by their names (R. Josiah and R. Jonathan), whilst the others are usually quoted as 'the Tanna of the school' of R. Ishmael. The younger disciples of R. 'Akiba are R. Meir, who continued the systematizing labours of his master, and is thus supposed to have laid the foundation of a Mishna; R. Jehuda b. 'Ilai, who is called 'the first of the Speakers'; R. Shim'on b. Yohai, of whom R. 'Akiba said, 'Be satisfied that I and thy Maker

* For the historical and theological significance of this method of interpretation, see Ohlswol, *Das letzte Passamahl Christi und der Tag seines Todes* (St. Petersburg, 1892), p. 20 ff.

know thy powers'; R. Nehemiah, to whom, as to the two last-mentioned Rabbis, various *Tannaitic* compilations are attributed; R. Eleazar b. Shammai, round whom the greatest number of disciples gathered, and R. Jose b. Halaphta, to whom the book *Seder 'Olam* (סדר עולם), containing a chronology of events and personages in the Bible, is attributed. Abba Shaul, compiler of a Mishna, and the Patriarch R. Shim'on II. b. Gamaliel II., are also included in the third generation.

Fourth Generation (160-220).—R. Nathan Hababhi, who emigrated from Babylon to Palestine, and there held under the last-mentioned Patriarch an office in the Sanhedrin the nature of which is not quite known; Symmachos, the disciple of R. Meir, and a great authority in matters of civil law; and various other *Tannaim*, sons and disciples of the authorities of the preceding generation. The most important among them is the Patriarch R. Jehuda Hannasi, also called *Rabbenu hakkadosh* (רבי הקדוש), 'Our Master, the Saint,' but more frequently *Rabbi*, 'the Master,' without adding his name. He was the son of the Patriarch R. Shim'on II., and the disciple of II. Shim'on b. Yoḥai, and of R. Eleazar b. Shammai; he presided over the Sanhedrin, which during this generation was, as it would seem, a migratory body, shifting from place to place, from Usha to Beth-shearim, and thence to Sepphoris and Tiberias. This R. Jehuda is said to have maintained friendly relations with the Roman authorities of Palestine at that period. This fact, as well as the circumstances of his noble birth, great wealth, official position, saintly character, and his mastery of the contents of the Oral Law, gave him an authority over his contemporaries never enjoyed by any other *Tanna*, and gathered round him a band of distinguished disciples and colleagues which rendered possible his work as compiler and codifier of the Mishna.*

The literary productions of all these generations of *Tannaim*, as well as of their predecessors the 'Pairs' and the *Ṣophérim*, both in *Halakhā* and in *Haggadā*, are, as far as they have been preserved, embodied in the following collections.

The *Mishna* מִשְׁנָה (from מִשָּׁנָה, meaning a 'teaching,' a 'repetition,' is a designation most appropriate for a work generally looked upon as the main depository of the contents of the Oral Law, which (in contradistinction to קְרָאָה, reading matter, or the Scriptures) could be acquired only by means of constant repetition. This work, compiled (apart from some later additions) by R. Jehuda the Patriarch, is divided into 6 Orders (סִדְרֵי=סִדְרֵי), each of which contains several *Massikhiṭh* (מַסְקִיחֵי, sing. מַסְקִיחַ) (Aram. מַסְקִיחַ), derived from מָסַךְ, meaning 'to weave'; cf. the Latin *textus*), or 'texts' (but more commonly called 'tractates'), whilst each tractate is divided into *Peraḳim* (פְּרָקִים, sing. פְּרָק), 'joints' or 'sections,' each of which, in its turn, consists of so many *Halakhōth* (in the sense of paragraphs). The number of the tractates is 63 (or, in another enumeration, 60), bearing the following titles, which are suggestive more or less of their varied contents, though extraneous

* Some authorities number five generations of *Tannaim*. For the purpose of brevity, we have accepted the plan of those who have condensed them into four. For the same reason, we have confined ourselves to the most important *Tannaim*, omitting many who deserve mention. Compare H. Strack's excellent monograph *Einführung in den Talmud*,² p. 76 ff., and his bibliography appended to each *Tanna*. The references there given include those to Bacher's works, which are the most important contributions to the subject in any language other than Hebrew.

† St. const. מִשְׁנָה. The Patristic *ḡenesis* (see references in Schürer, l.c. I. p. 88, n. 1) speaks for מִשְׁנָה (second to the Torah), st. const. מִשְׁנָה. Both explanations are represented in Rab. literature. Cf. *Arush Completum*, s.v. מִשְׁנָה.

matter that is in no way indicated by the title is everywhere introduced:—

I. Zē'ām, זְעֵאָם, 'Seeds.'

1. *Bērākhoth*, בְּרָכוֹת, 'Benedictions,' treating of laws and regulations relating to the liturgy. 9 chapters.
2. *Pē'ā*, פֶּאָה, 'Corner,' treating of the laws relating to the corner of the field and the forgotten sheaves, etc., to be left for the poor (Lv 19⁹, Dt 24¹⁹⁻²¹). 8 chapters.
3. *Dammai*, דָּמַי (also דָּמַי) the 'Doubtful,' respecting corn and other productions of the earth, of which it is doubtful whether the prescribed tithes had been paid. 7 chapters.
4. *Kū'ayin*, כִּיָּאִין, 'Mixtures,' i.e. mixtures of seeds, animals, and materials for cloth, prohibited by the Scriptures (Lv 19¹⁹, Dt 22⁹⁻¹¹). 9 chapters.
5. *Shēb'it*, שְׁבִיעִית, the 'Sabbatical year' (Ex 23¹¹, Lv 25¹, Dt 15¹). 10 chapters.
6. *Tērūmōth*, תְּרומות, 'Heave-Offerings,' for the priest (Nu 18²⁸ and Dt 18³). 5 chapters.
7. *Mā'aserōth*, מַעֲשֵׂרוֹת, 'Tithes' (Nu 18²¹). 5 chapters.
8. *Mā'aser Shēnī*, מַעֲשֵׂר שֵׁנִי, 'Second Tithe' (Dt 14²²). 5 chapters.
9. *Hallā*, הָלָה, the 'Dough,' a portion thereof to be given to the priest (Nu 15¹⁹). 4 chapters.
10. *Orlā*, עֲרֵלָה, 'Uncircumcised,' fruits of the tree during the first three years (Lv 19²³). 3 chapters.
11. *Bikkūrtin*, בִּקְעֵרִים, 'First Fruits,' brought to the temple (Dt 26¹, Ex 23¹⁹). 3 chapters.

II. Mō'ēd, מוֹעֵד, 'Season.'

1. *Shabbath*, שַׁבָּת, 'Sabbath,' laws relating to it, mainly prohibitions of work (Ex 20¹⁰ etc.). 24 chapters.
2. *Erubin*, עֲרֻבֵין, 'Amalgamations' or ideal combinations of localities with the purpose of extending the Sabbath boundary, as well as laws as to the Sabbath day's journey. 10 chapters.
3. *Pēsūhim*, פֶּסָחִים, 'Passovers,' laws relating to them (Ex 12¹, Lv 23⁴, Nu 9¹). 10 chapters.
4. *Shēkēlīm*, שֶׁקֶלִים, 'Shekels,' collected for the temple (Ex 30¹², Neh 10³⁴), and the various objects for which they were spent; including lists of the higher officials of the temple. 8 chapters.
5. *Yōmā*, יוֹמָא, 'The Day' (also *Yōm Hakkippūrtin*, יוֹם הַכִּפּוּרִים, 'The day of Atonement'), treating of the service in the temple on that day, and of the laws relating to fasting (Lv 16¹). 8 chapters.
6. *Sukkā*, סֻכָּה, 'Booth' or 'Tabernacle,' respecting the laws on dwelling in booths for seven days, and other observances during this feast (Lv 23³⁴, Nu 29¹²). 8 chapters.
7. *Bē'ā*, בֵּיצָה, 'Egg' (so called after the first words with which the tractate begins, but also termed *Yōm Ṭōl*, יוֹם טוֹב, 'Feast'), enumerating the different kinds of work permitted or prohibited on festivals (Ex 12¹⁶). 5 chapters.
8. *Rōsh Hashahānā*, רֹאשׁ הַשָּׁנָה, 'New Year,' dealing with questions relating to the calendar, but chiefly with the laws to be observed on the first of the 7th month (*Tishri*), the civil New Year of the Jews (see Lv 23³⁴, Nu 29¹). 4 chapters.
9. *Tā'ānth*, תַּעֲנִית, 'Fast,' respecting the laws observed and the order of the liturgy on such days. 4 chapters.
10. *Megillā*, מִגִּלָּה, 'Roll' of Esther, relating to the laws to be observed on the feast of *Purim*. 4 chapters.
11. *Mō'ēd Kāṭon*, מוֹעֵד קָטָן, 'Minor Feast' (also called מִסְקִין, the first word of the tractate), i.e. the laws relating to the days intervening between the first and last days of the feast of Passover and that of Tabernacles. 4 chapters.
12. *Hagḡagā*, חֲגִיגָה, 'Feast-Offering,' treating of the duty of pilgrimage to Jerusalem and the sort of sacrifices to be brought on such occasions (see Ex 23¹⁷ and Dt 16¹⁶), as well as of laws regarding the degrees of defilement (against which the pilgrims are cautioned). 3 chapters.

III. Nāshim, נָשִׁים, 'Women.'

1. *Yēbāmōth*, יֵבָמוֹת, 'Levirate Marriages' (Dt 25⁵), and the forbidden degrees in marriage (Lv 18, etc.). 16 chapters.
2. *Kēthubōth*, קְתוּבוֹת, 'Marriage Deeds and Marriage Settlements' (see Ex 22¹⁶). 18 chapters.
3. *Nēdārīm*, נֶדָרִים, 'Vows,' and their annulment (Nu 30⁹). 11 chapters.
4. *Nāzir*, נָזִיר, 'Nazirite' (Nu 6²). 9 chapters.
5. *Ṣotā*, סוֹטָה, 'The Suspected Woman' (Nu 5¹²). 9 chapters.
6. *Gittin*, גִּטִּין, 'Letters of Divorce' (Dt 24¹). 9 chapters.
7. *Ḳiddušīn*, קִידּוּשִׁין, 'Betrothals.' 4 chapters.

IV. Nēziḡin, נִזְקִין, 'Damages.'

- 1-3. *Bābā Ḳammā*, בָּבָא קָמָא, 'First Gate'; *Bābā Mē'ēl*, בָּבָא מְעֵיל, 'Second Gate'; *Bābā Ḳṭanā*, בָּבָא קְטָנָא, 'Third Gate'.

מִשְׁנֵת שְׁנֵי בָתֵּי, 'Second Gate'; *Bābā Bathrā*, בְּתֵרָא 'Last Gate.' These formed in ancient times only one tractate, bearing the same title as the whole order, סֵפֶר בְּתֵרָא 'Tractate of Damages,' divided into three sections, each section consisting of 10 chapters. These three treat of (1) damages and injuries caused by man and beasts for which he is responsible (see Ex 21:18, 22:3^a); (2) of laws concerning lost property, trusts, the prohibition of usury and similar matters, duties towards hired labourers, etc. (see Ex 22:25, 23:4, Lv 19:13, 25:14, 36, Dt 23:20 and 24:14); (3) laws relating to the different ways of taking possession of various kinds of property, the right of pre-emption, definition of certain terms used in contracts and oral transactions, order of inheritance (see Nu 27:6^a), etc.

4. 5. *Sanhedrin*, סֵפֶר הַדִּין (10 chapters), and *Makkōth*, מַכּוֹת 'Stripes' (8 chapters), also forming in ancient times one tractate. The former treats of the constitution of the various courts of justice and their modes of procedure, the examination of witnesses, and the four kinds of capital punishment for grave crimes, as well as of the punishment consisting in being excluded from eternal life, etc. etc. The latter deals with offences for which the infliction of 39 stripes is prescribed (Dt 25:2^a), with false witnesses (Dt 19:16^a), and the laws relating to the cities of refuge (Nu 35:10^a, Dt 19:22^a).

6. *Shebhō'oth*, שְׁבוּעָה 'Oaths,' taken in private or administered by the court (Lv 5:1, 4). 6 chapters.

7. *Ḥagigōth*, עֵדוּת 'Evidences,' containing a collection of laws and decisions gathered from the statements made by distinguished authorities. 8 chapters.

8. *Ḍaboth Zārā*, עֲבוּרָה זָרָה 'Idolatry,' regarding the treatment of idols and their worshippers (Dt 4:25^a). 5 chapters.

9. *Ḍaboth*, אָבוֹת 'Fathers' (of Jewish tradition), containing mostly ethical sayings and maxims of the *Tannaim*. 5 chapters.

10. *Hōrāyōth*, הוֹרָוֹת 'Decisions' (wrong ones) given by the authorities, treating of the sacrifices to be brought if the public acted in accordance with such erroneous teachings (Lv 4:15^a). 3 chapters.

V. קֹדֶשִׁים, קִדְּשִׁים 'Sacred' things.

1. *Zēbāhīm*, זְבָחִים 'Sacrifices' (also called קִדְּשִׁים and קִדְּשִׁינִי), treating of the laws relating to the various modes of offerings, the sprinkling of the blood, the burning of the fat pieces or of whole animals, etc. (Lv 1:1^a). 12 chapters.

2. *Mēnāḥōth*, מִנְחָה 'Meat-offerings,' including also the laws regarding libations (Lv 2:5^a etc., Nu 15:4^a). 12 chapters.

3. *Hullīn*, חֲלִילִין (also חֲלִילִינִי) 'Things Secular,' regarding the mode of killing animals and birds for ordinary use, as well as the various diseases disqualifying them from being eaten, and many other dietary laws. 12 chapters.

4. *Bēkhōrōth*, בְּכוֹרִית 'Firstborn,' of men and animals (Ex 13:12^a etc.), including also the laws regarding the tithes of animals (Lv 27:26, 32^a). 9 chapters.

5. *Ḍarkhūn*, עֲרֵכִין 'Valuations,' of persons and things dedicated to the temple (Lv 27:2^a), also including some laws relating to the year of Jubilee (Lv 25:12^a). 9 chapters.

6. *Tēmārā*, תְּמָרָה 'Change,' the laws bearing on cases of substituting a secular animal for one already dedicated to the altar (Lv 27:9, 34). 7 chapters.

7. *Kēriṭhōth*, קְרִיטוֹת 'Excisions,' treating of sins subject to the punishment of 'the soul being cut off' (Gn 17:14, Ex 12:15 etc. etc.). 6 chapters.

8. *Mē'ālā*, מַעֲלָה 'Trespass,' treating of sacrilege committed by secularizing things belonging to the temple or to the altar (Lv 5:15^a). 8 chapters.

9. *Tāmīd*, תָּמִיד 'Continual' sacrifice, describing the temple service in connexion with this daily sacrifice (Ex 29:38^a, Nu 28:3^a). 7 chapters.

10. *Middōth*, מִדּוֹת 'Measurements,' of the temple, describing its courts, halls, chambers, and gates, etc. etc. 5 chapters.

11. *Kinnūm*, קִנּוּם 'Nests,' of birds, or pairs of doves brought as sacrifice by the poor (Lv 1:14^a, 5:7^a). 3 chapters.

VI. טְהָרָאוֹת, טְהוֹרֹת 'Purifications.'

1. *Kēlīm*, כְּלִיִּם 'Vessels,' furniture, garments, and all kinds of utensils subject to Levitical impurity (Lv 11-2). 30 chapters.

2. *Ḍōhōrōth*, דָּוָהוֹת 'Tents' and habitations as conductors of Levitical impurity (Nu 19:14^a). 18 chapters.

3. *Negā'īm*, נֶגְעִים 'Leprosy,' in all its various degrees (Lv 13-14). 14 chapters.

4. *Pārā*, פָּרָה 'Red Heifer,' the use made of its ashes for the purpose of purification (Nu 19:2^a). 12 chapters.

5. *Tōhārōth*, טְהוֹרֹת 'Purifications,' used euphemistically for מִטְמָא 'defilements' of all sorts and their various degrees. 10 chapters.

6. *Mē'āwō'oth*, מַעְיָוֹת 'Wells' and cisterns to be used as means of ritual purification (Lv 15:11, 12 etc. etc.). 10 chapters.

7. *Niddā*, נִדָּה 'Menstruous,' the Levitical impurity attaching to women under certain physical conditions (Lv 15:19^a). 10 chapters.

8. *Makhaḥlīm*, מַכְחִלִּים 'Preparers,' respecting the conditions under which certain articles became (by coming in contact with liquids) prepared for eventual defilement (Lv 11:37^a). 6 chapters.

9. *Zābīm*, זָבִים 'Persons afflicted with running issues,' the impurity arising thereof (Lv 15:2^a). 5 chapters.

10. *Tēbūl Yōm*, יוֹם טְבוּל 'Immersed during the day,' i.e. the condition of a person who had taken the ritual bath prescribed but has still to wait for sunset to be considered as quite pure (see Lv 22:7). 4 chapters.

11. *Yādāyīm*, יָדַיִם 'Hands,' respecting the ritual impurity attaching to them (according to the Oral Law), and the mode of cleansing them by pouring water over them. 4 chapters.

12. *Ṭēpāl*, טְעָלִין 'Stalks,' how far they are considered a part of the fruit so as to convey impurity when touched by anything unclean. 3 chapters.

The idiom in which the Mishna is compiled is the New Hebrew, interspersed with occasional Greek and Latin words; its diction is fluent and easy when not disfigured, as all works coming to us from antiquity are, by interpolations and textual corruptions. The date of its compilation may be fixed about A.D. 220. This was undertaken and accomplished by R. Jehuda the Patriarch, not with the purpose of providing the nation with a legal code, but with the intention of furnishing them with a sort of thesaurus, incorporating such portions of the traditional lore as he considered most important. Hence the ground for his including in the work the opinions of the minority (e.g. of the school of Shammai), which only in a few exceptional cases were accepted as a norm for practice. A preliminary acquaintance with the contents of the Scriptures bearing upon the topic expounded by tradition is always assumed; so that, e.g., the tractate *Ṣulḥā* commences: 'A booth (the interior of which is) higher than 20 cubits is disqualified,' thus premising the duty of living in booths for seven days according to Lv 23:42. In many cases even a knowledge of the institutions established by the Oral Law is presupposed. Hence such a statement as that with which the Mishna commences: 'When do they begin to read the *Shēma*' in the evening (i.e. the 3 paragraphs in the Scriptures, Dt 6:4-9, 11:13-21, and Nu 15:37-41, the first paragraph of which begins with the word *Shēma* שְׁמָע)? From the time the priests (in the case of defilement) come back (from their ritual baths) to eat their heave-offering' (i.e. after sunset, see Lv 22:7). The duty or the custom of daily reading the *Shēma* is thus assumed as something generally known though not mentioned in the Scriptures.

The works after which R. Jehuda modelled his compilation and the sources upon which he drew were probably the older Mishna collections, the first composition of which was, as there is good reason to believe, begun by the first successors of Shammai and Hillel, then compiled by R. Akiba, and continued by his disciple R. Meir, who enriched it by additions of the later *Tannaim*. This Mishna became the groundwork of that of R. Jehuda, apart from various other collections of a similar kind (e.g. the Mishna of Abba Shaul), which were equally known to the compiler and utilized by him.* The strata of these older compositions are still in many places discernible, either by their style and phraseology or by the nature of their contents. An instance of the former is the passage illustrating the prohibition against transporting things on Sabbath from a space belonging to a private individual to that constituting a part

* For this 'higher criticism' of the Mishna, see Dr. Lewy, 'Über einige Fragmente aus der M. des Abba Saul' in *Zweiter Bericht über die Hochschule für die W. d. J. in Berlin*, 1876, and Dr. D. H. Hoffmann, *Die erste Mishna* (Berlin, 1882).

of the public property. This commences *שבת קמ"א* (M. *Shabbath* i. 1), instead of *הוא* 'he', through which the Scripture expression *אז* 'then' (Ex 16¹⁸) is still visible, and thus points to a time when the *Halakhā* was still in its early stage, forming a sort of paraphrase of Scripture, not a set of abstract laws. As an instance of the latter, it is sufficient to refer here to the historical description of the procession in which the sacrifice of the first-fruits was brought to the temple (Ex. 23¹⁹), concerning which we read in M. *Bikkūrtim* iii. 4: 'The pipe was playing before them (the pilgrims) until they arrived at the temple mountain, when even Agrippa the king would take the basket (containing the first-fruits) on his shoulders, stepping forward till he reached the courts; then the Levites spoke in song (chanted), "I will extol thee, O Lord, for thou hast lifted me up"' (Ps 30²). The mention of Agrippa (probably Agrippa I., c. 40) points to a contemporary document, since a Rabbi of a later period would, for the sake of emphasis, have named some biblical potentate (e.g. Solomon), not a mere Herodian prince.* This is only a specimen of many other portions of the Mishna, which contain lengthy descriptions of the sacrificial service on certain occasions, or give accounts of the architecture of the temple, its administration (including lists of the names of the higher officials), and its economy; whilst others furnish us with records of actual transactions of the Sanhedrin, the procedure of the courts, and the various methods of execution. All these bear the stamp of their own age, and testify to the early date of their composition.

The question whether R. Jehuda, besides compiling, actually wrote down the Mishna, is still a controverted point amongst modern scholars, as it was nearly a thousand years ago between the Franco-German and the Spanish authorities. The balance of evidence is still about equal on each side. Three things, however, seem to be certain. First, there existed a law or custom, dating from ancient times, prohibiting the writing down of the contents of Tradition, though the Scripture support for this custom (Bab. Talm. *Tēmarā* 14b and parallel passages) was not advanced till a comparatively late period (end of the 2nd cent.). Ample evidence of this fact is afforded by the traditional term, 'Torah by mouth,' as well as the various mnemotechnical aids to be found in the Mishna (e.g. *Megilla* i. 4-11, *בין* 'אין) and the homage paid to those who invented them (see Jerus. *Shēkalim* 48c, regarding the grouping of *Halakhōth* in numbers, and *Aboth d' R. Nathan* 18, respecting R. 'Akiba's arranging of the Torah in links). Second, the prohibition did not extend to books of a *Haggadic* character (*פסוקי דשירה*), of which we know that they both circulated among, and were read by, the Rabbis. Under *Haggadā* was included also the gnomic literature—as, for instance, the Wisdom of Ben Sira, which both the *Tannaim* and the *Amoraim*, as well as the authorities of a later period, the *Geonim* (e.g. R. Saadya), knew in the Hebrew original, and were constantly quoting, and of which fragments covering nearly two-thirds of the book have now been found after a disappearance of nearly 700 years. Third, the prohibition was often disregarded, even in cases of *Halakhā*, as in the case of the *Megillath Ta'anith* (*מגילת תענית*), containing a list of certain days in the year on which no fast could be declared, or the *Megillath Šanmāntin* (*מגילת שמעון*), 'the Roll of Spices,' treating of the preparation of the incense (Ex 30³⁴) in the tabernacle and the temple (Jerus. *Shēkalim* 49a).

Owing to the great authority of R. Jehuda the

* See Hoffmann, *l.c.* p. 15; but cf. also A. Büchler, *Die Priester und der Cultus in den letzten Jahrzehnten des Jerusalemlischen Tempels* (Wien, 1896), p. 10.

Patriarch, his compilation became the *Mishna* *משינה* *משינה*, a sort of canonical collection of the teachings of the *Tannaim*, forming the text-book of the students of the Oral Law, round which centred all the comments, discussions, and the additional matter produced by the succeeding generations. The other collections, likewise confined to the teachings of the *Tannaim*, but composed in schools not presided over by the Patriarch, pass under the name either of *Mishna* *משינה* *משינה* (*Mishna* *Halakānā* 'more frequently the Aram. *Bārāithā*), 'the external Mishna,' or *Tosephthā* (*תוספתא*), 'addition' (to the Mishna). No treatise representing the 'external Mishna' has come down to us, but many hundreds of quotations from such external Mishnas are scattered over the two Talmuds, mostly introduced by such phrases as *קרינו* 'our Masters taught', or *תני* 'it is taught', or *תנא* and *תנא* 'he taught'. But we possess a work, bearing the name *Tosephthā*, corresponding with the arrangement of the Mishna, and dealing with the same subjects. It shows marks of different ages; and, whilst it embodies portions coming from collections preceding our Mishna, it presupposes the knowledge of the latter, whilst in some places it even affords comments and explanations taken from the *Genara* and recast in the New Hebrew style of the Mishna. It is thus safe to assume that the date of its final redaction falls in the later age of the *Amoraim*, though its composition may have been initiated by R. Hīya and R. Hoshaya the disciples of R. Jehuda, to whom tradition attributes such a work undertaken in imitation of the *Tosephthā* of R. Nehemia, who is credited with having collected 'additions' to the Mishna of R. 'Akiba. To this class of works also belong the so-called Minor Tractates bearing the following titles:—*Aboth d' R. Nathan* (*אבות דר' נתן*), a sort of *Tosephthā* and *Midrash* to the tractate *Aboth*, existing in two recensions; * *Maṣseketh Šophērim* (*מסכת שופרים*), † 'Scribes,' dealing with the laws relating to the writing of the Scriptures. The text is in a bad condition, the interpolations and additions (on the Jewish liturgy, etc.) almost obliterating the original plan of the work, and it should be studied in connexion with the tractates *Šepher Tōrā*, *Mēzūzā* (laws relating to the writing of certain verses from the Scriptures and to fixing them on the door-posts, see Dt 6⁹), and *Tephillin* (Phylacteries), edited by Kirchheim; *Maṣseketh Šemāhōth* (*מסכת שמות*), ‡ 'Joys', a euphemistic title for laws and customs connected with mourning—of which we have also a shorter recension ed. by C. M. Horwitz under the title *שמות שמחה* ('Tractate Joys, the Minor'); *Maṣseketh Kallā* (*מסכת קטל* 'Bride'), laws of chastity to be observed in conjugal life; *Maṣseketh Derekh 'Erez* (*מסכת דרך ארץ*), 'Manners' and behaviour of the different classes of society on various occasions. The tractate exists in two recensions, a longer (*רבה*) and a shorter one (*קטנה*). The latter, dealing almost exclusively with the rules of life prescribed for the 'disciples of the wise,' is of a very spiritual nature. Lastly, we have to note here the other tractates ed. by Kirchheim, including, besides those mentioned above, the tractates dealing with the laws relating to *Zizith* (*ציצית*), 'Fringes' (Nu 15³⁸); *Abādīm* (*עבדים*), 'Slaves'; *Kuthim* (*כוזרים*), 'Samaritans'; and *Gērīm* (*גרים*), 'Proselytes.'

The works recorded thus far, though containing occasional hermeneutical elements, convey, owing to their scantiness and the long intervals at which they occur, but a faint idea of the interpretatory

* See S. Schechter's introduction to his edition of *Aboth d' R. Nathan*, Vienna, 1878.

† See Dr. Joel Müller's introduction to his edition of the *Maṣseketh Šofrim*.

‡ See N. Brüll, 'Die Talmudischen Tractate über Trauer um Verstorbene' (*Jahrbuch der Jud. Litt.* pp. 1-57).

work of the *Tannaim*. For this we must turn to the earlier *Midrash*, which has come down to us in the following works:—the *Mekhillā* (מְכִילָה), 'Measure' on a portion of Exodus; the *Siphre* (סִפְרֵי), 'the Books' on portions of Numbers and the whole of Deuteronomy, both *Midrashim* emanating from the school of Ishmael; and the *Siphra* (סִפְרָא) or *Tôrath Kohanim* (תּוֹרַת כֹּהֲנִים), 'The Book' or 'The Law of the Priests' on Leviticus, a product of the school of R. 'Akiba. Besides these fairly complete works we also possess fragments of a *Mekhillā* of R. Shimon b. Yohai on Exodus, and of a small *Siphra* (סִפְרָא) on Numbers, both originating in the school of R. 'Akiba; and of a *Mekhillā* on Deuteronomy, coming from the school of R. Ishmael.* The exegetical system of the Rabbis, forming the basis of the *Midrash*, grew with the rise of the new schools, the seven hermeneutical rules of Hillel having been developed by R. Ishmael into thirteen, and expanded (particularly as regards their application in the department of *Haggādā*) by R. Eliezer, the son of R. Jose of Galilee, into thirty-two or thirty-three rules; whilst rules of interpretation of other distinguished Rabbis are also mentioned. The practical object of the *Midrash* was the deduction of new *Halakhōth* from the Scriptures, or the finding of a 'support' (מְשָׁרָא) for the old ones. It is very difficult to determine in which cases the *Midrash* preceded the *Halakhā*, and in which the *Halakhā* preceded the *Midrash*, but it may be safely assumed that in most cases where the interpretation of the Rabbis is forced and far-fetched the *Halakhā* was first handed down by tradition as an ancient usage or custom, and the Biblical 'support' was invoked only to give it the weight of Scripture authority. Here are one or two instances, which, given in the language of the Rabbis, may convey some idea of the vivid style of the *Midrash*—

'R. Ishmael, R. 'Eliezer b. 'Azarya, and R. 'Akiba were walking on the high-road, and Levi Hassadar and R. Ishmael the son of R. 'Eliezer b. 'Azarya were walking behind them. And then the following question was put before them, "Whence is it to be inferred that danger of life 'removes' the Sabbath?" . . . R. Jose of Galilee answered, "It is written, BUT (כִּי) my Sabbaths ye shall keep (Ex 31¹³); the (limiting particle) כִּי teaches, there are Sabbaths which thou keepest, others which thou 'removest' (the latter in cases of danger of life)." R. Shimon b. Manasya says, "Behold Scripture says, And ye shall keep the Sabbaths, for it is holy unto YOU (ib. v. 14), the Sabbath is given to you (with stress on the word אַתָּה) to desecrate in case of need, but thou art not given to the Sabbath" (*Mekhillā*, ad loc.). Other Rabbis base this *Halakhā* on the logical principle of *à fortiori* (מִלְּפָנֵי), one of the hermeneutical rules of Hillel, but none disputes the *Halakhā* in itself, which had evidently the authority of ages. Another instance is the interpretation of Ex 21²⁴ (cf. Lv 24²⁰): 'Eye for eye, that is, money (amounting to the value of the eye). Thou sayest money, perhaps it means the real eye (i.e. that his eye should be blinded in retaliation for the organ which he has destroyed). R. Eliezer said, "It is written, And he that killeth a beast he shall restore, and he that killeth a man shall be put to death (Lv 24²¹). The Scripture has thus put together damages caused to a man and those caused to a beast. As the latter may be atoned for by paying (the damages), so can also the former (except in cases of murder) be punished with money"'

* See on these *Midrashim*: I. H. Weiss's Introduction to his edition of the *Sifra* (Vienna, 1862); M. Friedmann's Introduction to his edition of the *Mekhillā* (Vienna, 1870); Dr. Lewy, *Ein Wort über die 'Mekhillā des R. Simon'* (Breslau, 1889); and Dr. D. Hoffmann, *Zur Einleitung in die halachischen Midraschim* (Berlin, 1886-87).

(*Siphra* Lev. ad loc.; *Mekhillā* ad loc.; *Bābā Kammā*, 83b). This argument, called שְׁוֵי (analogy of matter), is in direct opposition to the literal sense of the Scriptures, which implies the *just talionis* in unmistakable terms; but it was only meant to lend some biblical sanction to a *Halakhā* that had been a controverted point between the Sadducees and the Pharisees for centuries before. It is different, when we read, for instance, with regard to the law, *And the land shall keep Sabbath to the Lord* (Lv 25³): 'One might think that it is also forbidden to dig pits, canals, and caves (this being a disturbance of the land) in the sabbatical year, therefore we have an inference to say, *Thou shalt neither sow thy field nor prune thy vineyard* (ib. v. 4), proving that it is only work connected with vineyard and field that is forbidden.' In instances like this, where the interpretation has nothing forced or strange about it, it would not be risky to assume that the *Halakhā* was the outcome of the *Midrash*. But it is not such mere practical questions that have produced the vast *Midrash* literature. A great portion of it is simple commentary, though sometimes reproduced in that vivid dialogic style which makes it appear *Midrash*-like. E.g. *And ye shall take a bunch of hyssop and shall dip it in the blood that is* (Ex 12²²), on which the *Mekhillā* (ad loc.) has the following comment: 'The Scriptures tell us that he carves out a hole on the side of the threshold over which he kills (the passover lamb); for כִּי means simply the threshold, as it is said, *In their setting of their thresholds by my threshold* (עַל אֶתְרֵי עַמִּי עֲזָבָה 43⁸, cf. LXX and Vulg.; This is the opinion of R. Ishmael. R. 'Akiba says כִּי means nothing else but a vessel, as it is said, *the bowls* (כַּדִּים), *the snuffers*, *the basins*' (1 K 7⁵⁰, cf. Aram. versions and commentaries). Another example may be taken from the expression יְיָנוּ from the holy things of the children of Israel (Lv 22³) on which the *Siphra* comments: 'יְיָנוּ (a noun, derived from יָנַיִם) means nothing else but separation. And so he says *which separateth himself from me* (יָנַיִם Ezk 14⁷), and he says again, *They separated backwards* (יָנַיִם Is 14). Such instances of mere שְׁוֵי (simple meaning) could be cited by hundreds, and it is not impossible that many more were omitted by the scribes, who considered such renderings of words and definitions of terms as universally known through the medium of the various versions, and hence not sufficiently important to be copied.* In the *Haggadic* portions of the *Midrash* the elements of simple exegesis are less prominent—a fact which is easily explained by their subjective character. Sometimes the interpreter or preacher is so deeply convinced of the truth of the lesson he has to teach that he feels no compunction in interweaving it with biblical texts, and putting it into the mouth of a biblical hero. Thus we read in the *Siphra* with reference to Lv 9⁶ *This is the thing which the Lord commands ye shall do*: 'Moses said unto Israel, *Do remove the evil desire* (רָעָה) from your hearts. Be all in awe and of one counsel to worship before the Omnipresent. As he is the Sole One in the world, so shall your service be single-hearted, as it is said, *Circumcise the foreskin of your heart, for the Lord your God is the God of gods and the Lord of lords* (Dt 10^{16, 17}), and then the glory of the Lord shall appear unto you (Lv 9⁶). The thought expressed in this interpretation is that the manifestation of the Divine glory is the reward for the fulfilment of a commandment, and is sure to occur whenever Israel accomplishes the laws of the Torah in true devotion and single-heartedness of spirit. Occasion-

* See Friedmann's Introduction to the *Mekhillā*, p. lxxvi, and Dr. L. Dobschütz' brochure, *Die einfache Bibelauslegung des Tannaim* (Breslau, 1893).

ally the preacher in his enthusiasm leaves the text altogether and rushes off into a sort of hymn, as, for instance (Ex 15¹), *I will praise God*, on which the *Mekhilta* (*ad loc.*):—‘I will give praise to God that he is mighty . . . that he is wealthy . . . that he is wise . . . that he is merciful . . . that he is a judge . . . that he is faithful.’ Each attribute is followed by a proof from Scripture, and the whole is a paraphrase of 1 Ch 29^{11, 12}. The constant citing of parallel passages by way of illustration is a main feature of the *Midrash*, e.g. *Siphre* on Nu 15²⁰ ‘*And ye shall not seek after your own heart and your own eyes*’ (עצמך): By this latter is meant adultery, as it is said, *And Samson said to his father, Get her for me, for she is pleasing to my eyes*’ (עצמי Jg 14³). Again, Dt 6⁵ ‘*And thou shalt love the Lord thy God with all thy heart and all thy soul*,’ where the *Siphre* adds by way of comment: ‘Even if he should take away thy soul. And so he (the Psalmist, 44²⁰), *Yea, for thy sake are we killed all the day long*.’ The great exegetical principle was, ‘The words of the Torah are poor (or deficient) in one place but rich in another, as it is said, *She is like the merchant's ship; she bringeth her food from afar*’ (Pr 31¹⁴; Jerus. Talm. *Rōsh Hashshānā* 58d).

iv. The *‘Amoraim* אמוראים ‘Speakers,’ ‘Interpreters’; a designation commonly applied to the authorities who flourished 220–500, and whose main activity consisted in expounding the Mishna. The seats of learning were no longer confined to Palestine, great schools having arisen, as in the time of the *Tannaim*, in various places in Babylonia, destined even to overshadow the former. The Babylonian teachers (who received ordination) bear as a rule the title *Rab* (רב) in contradistinction to their Palestinian brethren who were called *Rabbi* (רבי). The most important among the *‘Amoraim* are the following:—

First Generation (220–280).—(a) *Palestine*: R. Jannai, of whom we have a saying in the Mishna; R. Hiya and R. Hoshaya Rabba, the supposed compilers of the *Tosephta* (see above); R. Joshua b. Levi, the subject of many legends, to whom various mystical treatises (descriptions of paradise and hell, etc.) are attributed; R. Johanan (b. Nappaha) of Sepphoris and Tiberias, disciple of R. Judah and the most prominent teacher in Palestine during the 3rd cent., and his brother-in-law R. Shim’on b. Lakish. (b) *Babylon*: Abba Arikha (‘Long Abba’), commonly cited by his title Rab. He ‘went up’ (from Babylon) to Palestine together with his uncle R. Hiya (mentioned above) to study under R. Jehuda, and on his return founded at Sura the school over which he presided; Samuel שמעון (the astronomer), a relative of Rab, and, like him, a disciple of R. Judah (though he did not receive ordination from him). He became head of the school in Nehardea.

Second Generation (280–300).—(a) *Palestine*: R. Eleazar b. Pedath, R. Simlai, R. Aṣṣi (also Iṣṣi and R. Ammi) (also Immi), and R. ‘Abuha. The first four emigrated to Palestine from Babylon; whilst R. ‘Abuha, who was a native of Palestine, taught in Caesarea, where he often had controversies with Christian teachers. The famous *Haggadist* R. Samuel b. Nahmani also belongs to this generation. (b) *Babylon*: R. Huna (Sura), R. Jehuda (b. Jeheškel), founder of the school of Pumbeditha; R. Hišda, R. Shesheth, founder of a school in Shilhi. All these were disciples of Rab and Samuel, or of one of them.

Third Generation (320–370).—This period marks the decay of the schools in Palestine, a consequence of the religious persecutions inaugurated under the reign of Constantine. (a) *Palestine*: Jeremiah, R. Jona, and R. Joṣé. (b) *Babylon*: Rabbah (רבה) b. Nahmani (Pumbeditha), famous for his dialectical

skill and called ‘the mountain-mover’; his colleague R. Joseph, a great authority on Targum, whose wide acquaintance with all branches of the Law brought him the title of ‘Sinai’; their pupils ‘Abayi and Raba (רבה), both famous for the ingenious methods exemplified in their controversies scattered all over the Bab. Talmud; R. Papa, founder of a school in Nares.

Fourth Generation (375–427).—(a) *Palestine*: R. Shammuel (b. Jose b. R. Bun); (b) *Babylon*: R. Ashi (Sura); R. Kahana II. (Pumbeditha), and Amemar (Nehardea). The former is credited with having begun the compilation of the Bab. Talmud.

Fifth Generation (427–500).—*Babylon*: Mar bar R. Ashi; Rubbina (contraction of Rab Abina (Sura)), and R. Tosphaa (Pumbeditha). The two latter were greatly instrumental in accomplishing the work commenced by R. Ashi, finishing the compilation of the Bab. Talmud, and reducing it to writing.

The literary productions of these two schools are largely embodied in the two Talmuds bearing the title of their native countries: (A) *Palestinian Talmud* called the Talmud of Jerusalem, תלמוד ירושלמי, which is also more correctly called (since there were no schools in Jerusalem after the destruction of the temple) תלמוד דבני ישראל, ‘the Talmud of (the children of) the Land of Israel,’ ‘the Talmud (or the *Gemara*) of (the people of) the West.’ (B) *The Babylonian Talmud* תלמוד בבלי, which (though only occurring once) was also known under the title of תלמוד דבני ארץ ישראל, ‘the Talmud of the people of the East.’* The main object of the Talmuds is the interpretation of the Mishna, tracing its sources, giving its reasons, explaining obscure passages, as well as real or seeming contradictions, by the aid of parallel passages in the ‘external Mishnas,’ and illustrating its matter and expanding its contents (especially in the branches of civil law) by giving such cases as life and altered circumstances were constantly furnishing. It is perhaps in this latter quality that the text of the Talmud proper as distinguished from the Mishna is called *Gemārā* גמרא, meaning, according to some authorities, ‘Supplement’ or Complement to the Mishna.† The Talmuds differ in various minor respects. Thus, the non-Hebrew portions of the Jerus. Talmud are composed in the West Aram. dialect, whilst those of the Bab. Talmud are written in an East Aram. idiom, closely related to the Syr. and still more akin to the Mandaic language. The style of the Jerus. Talmud is more concise, its discussions less diffuse, than those of the Bab. Talmud. The former is altogether free from the casuistic and lengthy discourses on imaginary cases which form a special feature of the productions of the Eastern Rabbis. It should, however, be remarked that, so far as dialect and diction are concerned, the Bab. Talmud is not always uniform, there being various tractates, such as *Nedarim*, *Nazir*, *Temura* *Mēlā*, and *Kerithoth*, which betray certain grammatical forms and peculiarities of style, reminding us in some places of the diction of the Talmud of Jerusalem. Apart from the main object as described, the text of the Mishna serves sometimes (particularly in the Bab. Talmud) as a mere peg on which to fasten matter having hardly any connexion with the contents of the latter. E.g.

* See JQR ix. 120.

† Neither the Jerus. nor the Bab. Talm. extends over all the 60 (or 63) tractates of the Mishna. The Jerus. Talm. has *Gemārā* to the first four orders of the Mishna and to three chapters in the tractate *Niddā* in the sixth order; but in the second order there is missing the *Gemārā* to the last four chapters of the tractate *Shabbath*, to the third chapter of the tractate *Makkoth*, and in the fourth order to the tractates ‘*Aboth* and ‘*Eduyyoth*. The Bab. Talm. has *Gemārā* as follows: in the first order to tractate *Bērākhoth* only; in the second order, tractate *Shabbath* is omitted; in the fourth order, tractates ‘*Aboth* and ‘*Eduyyoth* are omitted; in the fifth order, tractates *Middoth* and *Kinuth* are omitted; in the sixth order, *Gemārā* to tractate *Niddā* alone.

the lines in Mishna tractate *Gittin*, 'that the laws regarding the *אנדפוי* (a name under which certain leaders of the Zealot bands were known) did not apply to the land of Judaea,' are followed in the Bab. Talmud by a legendary account of the wars preceding the destruction of the second temple, and various incidents connected with it, extending over more than 5 folio pages (55b-58a). Again in the tractate *Bābā Bathrā*, the accidental remark in the Mishna, that a volume (or roll) containing the Scriptures inherited by two or more brothers must not be divided among them by cutting it up into its constituent books even when the parties agree to this, provokes in the *Gēmārā* (of the Bab. Talmud) a discussion relating to the arrangement of the Canon of the OT, its rise, and the dates at which the various books included in it were composed, accompanied by a long discourse on the particular nature of the Book of Job, the character and date of its hero, together with a few remarks on other biblical personages, which covers nearly 8 folio pages (13b-17a). This process of inserting matter but slightly connected with the text is at times carried further by adding to the inserted matter other topics having a similar slight connexion with it. As an instance of this process we may regard the following. Mishna *Bērākhoth*, ch. ix. 1, runs, 'He who sees a place in which miracles were performed for the sake of Israel says, Praised be he who wrought miracles for our fathers in this place.' By way of illustration the *Gēmārā* (Bab. Talm. *ib.* 54a) cites an 'external Mishna' in which it is taught that 'He who sees the crossings of the Red Sea (i.e. the place at which the Jews crossed the Red Sea, Ex 14²²), or the crossings of the Jordan (Jos 3¹⁴), . . . is bound to give thanks and praise to the Omnipresent' (*Makām*). The last words suggest a quotation of R. Jehuda in the name of Rab, adding to the number of those who are under the obligation to give thanks, also the four cases enumerated in Ps 107 (people returning from a sea voyage, coming back from a journey through the desert, recovering from a serious illness, or released from prison, 54b). This statement is followed by several other sayings (54b, 55a) which have no other connexion with the preceding matter than identity of authorship, all being cited in the name of Rab. One of these citations is to the effect that for three things man should in particular pray to God (who alone can grant them): 'a good king, a good year, and a good dream' (55b); but the last word again suggests a new train of thought on the subject of dreams, their interpretation and fulfilment, which forms the theme of the next 6 folio pages (55a-57b). Owing to these sudden and violent changes from subject to subject, the style of the Talmud becomes very uncertain and rather rambling; * but, on the other hand, it is this very circumstance that keeps the 'sea of the Talmud' in constant motion, relieving it from the monotony and tedious repetition so peculiar to the majority of theological works dating from those early ages. Indeed, owing to this facility for dragging in whatever interested the compilers or the scribes, the Talmud almost loses the character of a work of divinity, and assumes more the character of an encyclopædia, reproducing the knowledge of the Rabbis during the first five centuries on all possible subjects, whether secular or religious. This is, as already indicated, particularly the case with the Bab. Talmud, the *Haggādā* of which is very discursive and rich in all sorts of folk-lore. It must, however, be borne in mind that the authorities in whose names the strangest stories

are sometimes communicated are often Rabbis from Palestine, whose sayings and statements were as much studied and discussed in the East as they were in the West.

v. The *Šaborai* שָׁבוּרַי 'Explainers' or 'Mediators' (upon the words of their predecessors), whose activity is supposed to have extended over the whole of the 6th century. The most important among them are Rabbah Jose (Pumbeditha) and R. 'Alai (of Be Hathim), who flourished about the beginning of the 6th cent., and probably shared largely in the compilation work of the last of the *Amoraim*; and R. Giza (Sura) and R. Simona (Pumbeditha), who belonged to the middle of the same century. The activity of the *Šaborai*, about whose lives we know little, consisted mainly in commenting upon the Talmud by means of explanatory speeches, and contributing to it some additional controversies marked by peculiarity of style and by absence of the names of those engaged in the dialogue, as well as by insertion of final decisions upon the differing opinions of their predecessors.* The school of the *Šaborai* is peculiar to Babylon, there being no corresponding class of teachers in Palestine. Nor is there any reliable tradition, regarding the compilation of the Jerus. Talmud, by whom it was accomplished, and when it was undertaken. Maimonides' statement, that R. Johanan composed the Jerus. Talmud, can, since this work contains quantities of matter dating from a much later period, mean only that by the aid of the schools he founded, this Rabbi was largely instrumental in giving rise to a work embodying the teachings of the later Western authorities. But in consequence of religious persecutions and political disturbances the decay of the schools set in too early to permit even such comparative completeness and finish as are to be found in the Bab. Talmud, which is itself far from perfection in this respect. Indeed the abruptness of the discussions of the Pal. Talmud, the frequent absence of formulæ introducing quotations or marking the beginning of the treatment of a fresh subject or the conclusion of an old one, as well as the meagreness of its matter where the analogy of the Bab. Talmud would suggest the greatest fullness, and the fact that it has no *Gēmārā* at all on the 5th order (sacrifices), which is so strongly represented in the Bab. Talmud,†—all these circumstances convey the impression that the Jerus. Talmud was never submitted to a real conscious compilation with the object of presenting posterity with a completed work. What was reduced to writing does not give us a work carried out after a preconcerted plan, but rather represents a series of jottings answering to the needs of the various individual writers, and largely intended to strengthen the memory. And thus lacking the authority enjoyed by the Mishna and the Bab. Talmud, which were the products of the great centres of learning, the Jerus. Talmud was, for a long time at least, not elevated to the rank of a national work, and it is therefore easy to understand how such portions of it as had not much bearing upon actual practice were permitted to disappear. Altogether, the people of Palestine were, as an old Rabbi said, 'sick with oppression,'

* On all these points see N. Brüll's essay, 'Die Entstehungsgeschichte des bab. T. als Schriftwerkes'; and Weiss, as above, vol. iii. p. 208ff., and vol. iv. p. 1ff.

† The question whether the Jerus. Talmud ever had *Gēmārā* to the fifth order is best discussed in the *Hehalutz* . . . by Oelsh H. Schorr, who on excellent grounds maintains that such a *Gēmārā* must have existed. But it must be stated that hitherto, not even in the Cairo collections, which have restored to us so many lost works, has a single line turned up to confirm Schorr's hypothesis. About the peculiarities of the fourth order, see I. Lewy, *Interpretation des 1. Abschnittes des paläst. Talmud-Traktats Nesikin* (Breslau, 1895), p. 20; but compare also the references to the other authorities there given. This essay is the best piece of work yet done on the redaction of the Jerus. Talmud.

* It is this discursiveness which makes a proper translation of the Talmud almost impossible: see M. Friedmann's brochure, *דבר על אודות תלמוד*, Vienna, 1895 (Heb.)

and had no time to spare for the niceties of the *Halākha*, 'and did not listen to the words of Talmud (in the narrower sense of discussing the legal portions of it) and the Mishna.' The deeper was their devotion to the *Haggādā*, which gave them 'words of blessing and consolation.' This will account for the copiousness of the *Haggadic* literature, which reached its highest development during the period of the *Amoraim*. This literature is embodied in the *Midrashim* to various books of the OT as well as in certain independent *Haggadic* treatises, the contents of which, though possibly compiled at a later age, are made up of the homilies and moralizing exhortations given in the names of the same Palestinian Rabbis who figure as authorities in the two Talmuds. They, however, form a literature by themselves, never having served as sources or factors of the Talmud, though they are sometimes useful as parallel passages to the *Haggadic* portions of the latter. They thus do not fall within the scope of this article. It is, however, only fair to warn the theologian that though he may dispense, e.g., with the *Pesikṭā* (collection of homilies mainly based on the *Haphtārōth*) or the *Midrash Shir Hashirim* (allegoric interpretations of the Song of Songs) in his study of the Talmud, he cannot do so safely in his study of the Rabbi, whose performance of his prophetic office is seen to best advantage in such moralizing works as those of which the *Haggadic* pieces just mentioned are a fair specimen.

LITERATURE (omitting mostly such books as have already been referred to in the notes).—**EDITIONS**: There are very few critical editions of the ancient Rabbinical literature, though new reprints are constantly appearing. The following, however, deserve special notice:—*Mishna*, Naples, 1492, ed. pr.; *Mishna* . . . *Latinitate donavit* . . . J. Surenhusius, Amstelod., 1698; *The Mishna*, edited from a unique MS, by W. H. Lowe, Cambridge, 1893; *Mishnayoth: Hebraischer Text mit Punctuation, Deutscher Übersetzung*, von A. Samter, Berlin, 1887 (not yet finished). Most editions have, as a rule, the commentaries of 'Obadya di Bertinoro and of Yom Tob Lipman Heller (ר' יצחק ור' יום טוב), or the commentary of Maimonides (not as frequently as the two former). As useful editions for students, the tractates edited by Strack may be recommended. *Topephta*, edited by Zuckerman (after MSS), Pasewalk, 1880. *Jerus. Talmud*, Venice, 1523, ed. pr.; Krotoschin, 1866, and Zitomir, 1860-67. This last edition has several commentaries. Of single tractates there have appeared, among others, *Bérākōth*, *Pe'ra*, and *Dēmā't*, with the commentary *Ahabat Zion*, by Z. Frankel, and a part of *Babā Kammā* with a commentary by I. Levy. *Bab. Talmud*, Venice, 1520, with the commentaries of R. Solomon b. Isaac, and the *Glosses* of the Franco-German Rabbis called *Tosaphoth* (Additions). The last and best edition of the Talmud is that which appeared in Wilna, 1880-98, 25 vols. *The Variae lectiones in Mishnam et in Talmud Babylonicum*, by Raph. Rabinowicz, consisting of 16 vols., and extending over a large part of the Bab. Talmud, is a most important work for the critical study of the Talmud. Also to be consulted is the work *המשניות השם* קונטרס, Königsberg, 1860, restoring the words and passages omitted or corrupted by the censors. Of single tractates we have only to notice here the *Tract. Makkoth*, ed. Friedmann, Wien, 1888.*

Einleitung in den Talmud, Leipzig, 1894; M. Mielziner, *Introduction to the Talmud*, Cincinnati, 1894; Schurer, *GJV*, i. § 8 E, Leipzig, 1890 (Germ.). For popular accounts see E. Deutsch, *The Talmud*, Philadelphia, 1896; A. Darmesteter, *The Talmud*, Philadelphia, 1897.

DICTIONARIES AND GRAMMARS: Nathan b. Yehiel (of the 11th cent.), *ספר הענין*, 1480, ed. pr. This work was last edited or rather incorporated in the *Aruch Completum* . . . *auctore Nathane filio Jechielis* . . . *correctit explevit critice Alex. Kohut*, 8 vols., Wien, 1878-92; Joh. Buxtorf, *Lexicon Chaldaicum Talmudicum et Rabbinicum*, Basel, 1640; Jacob Levy, *Neuhebraisches und chaldaisches Wörterbuch über die Talmudim und Midraschim*, Leipzig, 1876; M. Jastrow, *Dictionary of the Targumim, the Talmud Babli and Jerushalmi*, London and New York, 1896; Sam. Krauss, *Griechische und lateinische Lehnwörter im Talmud, Midrasch, und Targum* . . . Berlin, 1898; W. Bacher, *Die älteste Terminologie der jüdischen Schriftauslegung: Ein Wörterbuch der bibelzeitlichen Kunstsprache der Tannaiten*, Leipzig, 1899; H. L. Strack and C. Siegfried, *Lehrbuch der Neuhebräischen Sprache* . . . Karlsruhe and Leipzig, 1884; A. Geiger, *Lehr- und Lesebuch der Sprache der Mishnah*, Breslau, 1845 (Germ.); I. H. Weiss, *שפת השם*, Wien, 1865 (Heb.); G. Dalman, *Grammatik des Jüdisch-Palastinischen Aramaisch*, Leipzig, 1894 (Germ.); S. D. Luzzatto, *Elementi grammaticali del . . . dialetto Talmudico Babilonense*, Padua, 1865 (Ital.), of which a Germ. tr. was prepared by M. S. Kruger, and was published in Breslau, 1878; Levias, *Grammar of the Bab. Talm.*, Cincinnati, 1900.

The attempts towards translating the Talmud are many and various. A full account of them will be found in Dr. Erich Bischoff's *Kritische Geschichte der Talmud-Übersetzungen aller Zeiten und Zungen*, Frankfurt-a.-M. 1899 (Germ.). The present writer can, however, recommend only the following books: On the Mishna see above. On *Minor tractates: Masechet Sopherim*, by J. Müller, Leipzig, 1878; *Derech Erez Sutta*, by A. Jaworsky, Königsberg, 1885. *Jerus. Talm.*: A. Wünsche, *Der jerusalemische Talmud in seinen haggadischen Bestandtheilen ins Deutsche übertragen*, Zurich, 1880. *Bab. Talm.*: A Translation of the treatise *Chagigah*, by A. W. Streane, 1891; *Tractate Baba Mezia mit deutscher Übersetzung* . . . by A. Samter, Berlin, 1876; *Der Bab. Talmud in seinen Haggadischen Bestandtheilen wortgetreu übersetzt*, by Wünsche, 1888. The student would do well to consult always, when reading a *Haggadic* text, the following standard works by W. Bacher: *Die Agada der Babylonischen Amoräer*, Strassburg, 1879; *Die Agada der Tannaiten*, Strassburg, 1884; *Die Agada der Palästinschen Amoräer*, Strassburg, 1892.

S. SCHRECHTER.

SIBYLLINE ORACLES.—The collection of Jewish and Christian poems which pass under the name of the Sibyl covers in its time of production a period of many centuries, reaching back into at least the 2nd cent. B.C., and coming down (when its latest developments are included) far into the Middle Ages. When we take further into account that, even in its first Jewish and Christian forms, Sibyllism was merely an attempt to transplant a feature of literature that was centuries old, and already effete in the pagan world, it will be seen that it constitutes a very important element in historical theology, and one which has had every influence upon the mind of man that could be secured for it by the exercise of authority (operating through the State as in Roman life, or through great names as in the case of the Christian Church), supported as that authority was by the natural love of the secret and mysterious which characterizes the major part of men in all periods of human history.

The original Sibyl is very nearly the equivalent of 'prophetess' in the Gr. and Rom. world; the derivation of her name from an assumed combination of *Σίβη* (for *Θεός*) and *βουλή* (in a form *βυλλά*) goes back to Varro (cf. *Lact. Div. Inst.* i. 6); and, although it may be (and probably is) invalid philologically, it is sufficient evidence of the character assigned to the persons known as Sibyls, who had the knowledge (as it was supposed) of the Divine will in the fatalistic sense, and were in the habit of recording the fiats of that Divine will in various oracular and prophetic ways. Accordingly, they could be consulted, either in some special *antrum* or grotto, or through an inspection of such prophecies as they had committed to writing. Now, according to the ancients, there were a number of such Sibyls, known sometimes by actual names, and sometimes by the places where they prophesied, as the Chaldean,

* A good bibliographical account of the various reprints of the Bab. Talmud is to be found in Rabinowicz's *מאמר על התלמוד*, München, 1877, whilst a short list of the various MSS in the different libraries is given by Strack in his *Einleitung*, p. 70 ff. It should, however, be noted that the last 20 years have brought to light many Talmudical pieces, not known to any bibliographer. They are still awaiting description. Mr. Elkan N. Adler's library (London) is especially rich in early prints not known to Rabinowicz; whilst the Cambridge collections, both in the possession of the University Library and in that of Mrs. Lewis and Mrs. Gibson (now in Westminster College), contain many MSS fragments of the Bab. and Pal. Talmuds of the highest critical value.

Erythraean, Delphic, etc. But for practical purposes the one that exercised the commanding influence over the Christian Church to which we have alluded above is the Cumæan Sibyl. It is necessary to bear in mind that this commanding influence is merely a case of survival from the Roman State religion. And the question for the student of the Sib. Oracles as we have them extant, is as to the extent of the survival. It can be tested under the heads of (1) the language, (2) the form, (3) the matter of the ancient and the more modern oracles.

The Rom. tradition affirmed that these oracles had originally been offered by a certain Sibyl to a certain Roman king (say Tarquinius Superbus), but at an excessive price; the price being refused, she departed and destroyed a certain part of her books, and returned to offer the remainder at the original price; and, after this process had been repeated a certain number of times, the king was sufficiently interested to buy the remainder, which thus became in the Roman government a State deposit of information concerning the future, placed under the control of the augurs or *virī quindecimvīrales*, and to be consulted in time of exigency.

There is no need to spend time in criticising the details of such a story, which is merely an attempt to find a venerable origin for a Roman practice; for it is certain that the Roman government had such books of Sib. oracles, which they from time to time augmented or retrenched by various editorial processes. What is important to remember is—(i.) that these oracles were for the most part, perhaps wholly, in Greek; (ii.) that they were in hexameter verse, probably with the literary devices of alphabetic and acrostic writing; (iii.) that they were concerned *inter alia* with the fortunes of the world at large and of the empire, the ages of the universe, and the collapse and rejuvenescence thereof. The first of these points, and, in part, the second, may best be illustrated by references to an actual oracle which has come down to us, preserved by Phlegon, *de Mirabil.* c. 10, apparently from a Roman writer, Sextus Carninius, and dated in the year A.V.C. 629 (= B.C. 124). It relates to the birth of a hermaphrodite, which the oracle alludes to in the words—

καὶ τοὶ ποτὲ φημι γυναῖκα
Ἀνδρόγυνον τέξεσθαι ἔχοντά περ ἄρσενά πάντα
Νηπίαχαι θ' ὅσα θηλύτერαι φαίνουσι γυναῖκες.

Obviously, the oracle was made to suit the portent, and it was composed in hexameters. At this time, then, we know the method of formation of the oracles, and that the collection was subject to accretion or modification. They were written, as all later oracles and books of oracles, in the religious metre and language of Homer. Moreover, on examination it will be found that the oracle is acrostic, and apparently based upon an earlier acrostic which has been used, which was itself metrical. The books were therefore treated as *sortes* by the augurs, but handled with freedom in secret so as to adjust the prophecies to the needs of the time. That they contained some scheme of the ages of the world and of the ἀποκατάστασις πάντων, is clear from Virgil's

‘Ultima Cumæi venit iam carminis ætas;
Magnus ab integro sæclorum nascitur ordo.’
(*Ecl.* iv. 4),

and a number of similar considerations.

All of these features are abundantly illustrated in the Jewish and Christian Sib. books. It was necessary that they should be if the world was to swallow the literary deception that was being practised upon it.

It must not be supposed that such a gigantic and long-continued fraud could have been carried on without meeting with criticism from a people as acute and polished as the Greeks. While it is certain that almost all the Fathers of the Church were firm believers in the inspiration of the Sibyls (for we need not doubt the honesty of Justin and Clement, of Tertullian, of Lactantius, and a host of others, though it is equally clear that the deceived must have been near of kin to the deceivers), it was not possible that such keen wits as Lucian and Celsus should come under the spell. They saw at once that the Christians were making oracles to suit their own propaganda, and were quick to proclaim the fact; and Lucian, in particular, himself turned Sibyllist in order to tell in mock heroics the fortunes of Peregrinus and of Alexander of Abonoteichos. This extant criticism and ridicule must have been widely extended. We can trace from the successive Sibyllists themselves the objections which they had to meet. One, of necessity, was the dependence of the Sibyl upon Homer, for Sibyllism is closely related to Centoism, and borrows lines and expressions freely from Homer. It was necessary, therefore, for the assumed Sibyl to explain that the borrowing was really on the side of that thief Homer. Accordingly, the Sibyl herself attacks the supposed later poet in the following lines—

καὶ τὴν ψευδογράφον πρέσβυν βροτὸς ἔσται αὐτὴς
ψευδόπατρις· οὕτως δὲ φάος ἐν ὀφθίῳ ἔστιν

... ἐπέων γὰρ ἐμῶν μέτρων τε κρατῆσει.
(*Orac. Sib.* iii. 419 ff.);

and this judgment is endorsed by Tatian, who in his tract *Against the Greeks*, § 41, maintains the superior date of the Sibyl to Homer. A closer examination, however, of the oracles reveals that Homer is not the only writer pilfered; there is a constant coincidence with fragments of Orphic hymns, which would certainly be much more pronounced if we were not limited in our comparison to the few fragments that have been conserved of this branch of literature. Now, it is worth noticing that Clement of Alexandria (the best read of all the early Fathers in the matter of Greek literature) expressly declares that the Sibyl is earlier than *Orpheus*; while, to quote another author of nearly the same date, Tertullian will have it that the Sibyl is older than *all other literature* (cf. *Tert. adv. Nationes*, ii. 12). It is clear from these testimonies that there had been from the first a critical dispute over the antiquity of the supposed Sibylline verses; at all events, the anti-Homeric strain in the Sibyl which we have quoted above occurs in verses which Alexandre assigns to the time of Antoninus Pius, and the writers who endorse the sentiment belong very nearly to the same period. And before this time there must have been an active Sibylline propaganda carried on by the early Christians, most of whom were deceived and some of them deceivers.

Something of a similar kind to this contest between Homer and the Sibyl and Orpheus and the Sibyl for priority, appears to have taken place at a later date in regard to Virgil. We have already pointed out that the acquaintance of Virgil with Sibylline oracles may be assumed. It does not follow that these oracles have anything to do with the extant collection; rather they seem to be the Roman collection, which Virgil must have known by report, and perhaps by actual study of published or unpublished portions. Now it has been shown by Dechent (*Ueber das erste, zweite und elfte Buch der Sib. Weissagungen*, 1873) that the eleventh book of the Oracles has coincidences of language with Virgil. The Sibyl describes, for example,

the flight of Æneas from Troy in ll. 144 ff., which begin—

ἔρξει δ' ἄκ' γενεῆς τε καὶ αἵματος Ἀσπαράκω
παῖς κλυτὸς ἥρώων, κρατερὸς τε καὶ ἀλκιμὸς ἀνὴρ,

which may be compared with

'Romulus, Assaraci quem sanguinis Ilia mater
Educet' (Virg. *Æn.* vi. 779).

After describing the person and fortunes of Æneas, the writer proceeds to explain that her verses will be stolen by a later poet, much in the same language as we noted in Bk. iii. for Homer—

καὶ τις πρῆσβυς ἀνὴρ σοφὸς ἔσεται αὐτὸς ἀοιδὸς

τοῖσιν ἐμοῖσι λόγοις μέτροις ἐπέεσσιν κρατήσας
αὐτὸς γάρ, πρῶτιστος ἐμὰς βίβλους ἀναπλώσει
καὶ κρύψει μετὰ ταῦτα.

But here we must, in view of the coincidences in language between the Sibyl and the *Æneid*, understand Virgil and not Homer as the supposed thief. Obviously, the Sibyllist, who is so anxious to be prior to Virgil, must have written a good while after Virgil, as is also shown by the reference to Virgil as hiding the oracles. Alexandre refers this part of the oracles to the year A.D. 267; and it is interesting to observe that, not long after that date, the emperor Constantine in his oration to the Nicene Fathers invokes the authority of the Sibyl, and suggests the dependence of Virgil upon her writings, quoting Virgil for convenience in a Greek rendering. It is reasonable, therefore, to suppose that the question of relative priority between Virgil and the Sibyl belongs to this period of time.

It is to be noted, however, that the earliest of all the books of oracles does not seem to have encountered any such hostile reception. Parts of what is now edited as the third book, ll. 97-294, 491-fin., are assigned by Alexandre to the year 166 B.C. It is not decided whether the production of these verses was due to some active inquiry which was being made at the time after extant oracles, which search might easily have led to the fabrication of them by some learned Alexandrian Jew, or whether it is only one more example, to be added to many belonging to this time, of the transference of the text of the LXX into Gr. verse. Whatever may be the reason, it is certain that the versified story of the destruction of the tower of Babel, with the poetic expansion that it was accomplished by the agency of mighty winds, was accepted as a fresh historical authority by contemporaries (Abydenus, Polyhistor, and, following them, Josephus), and as confirming the accuracy of the biblical record from which it is derived, by Clement of Alexandria and Eusebius. So that it does not appear that the earliest Jewish portions of the Sibylline books provoked the same hostility as those which are later and definitely Christian. They appear to have met with an unquestioning acceptance.

It will be convenient to set down here the dates which have been assigned to the extant books. Our first scheme is that of Alexandre, whose *Excursus ad Sibyllinos Libros* is the storehouse of material for all who wish to have a thorough knowledge of the subject. According to him—

- Bk. iii. ll. 97-294 and 480-fin. is a Jewish work, written in Egypt in the year 166 or 165 B.C.
- Bk. iv., the oldest of the Christian Sibyllines, was written in Asia in the 1st cent. A.D. under Titus or Domitian.
- The Prooimium to the collection (a fragment preserved by Theophilus of Antioch) and Bk. viii. ll. 217-429, are probably by the same Christian hand, and written in the beginning of the 2nd cent. under Trajan or Hadrian.
- Bk. viii. ll. 1-217, written by a Christian of a millenarian type, in Egypt in the reign of Antoninus Pius.
- Bk. iii. ll. 295-488 and Bk. v. are Judæo-Christian, and were written in Egypt in the reign of Antoninus Pius.
- Bks. vi. and vii. are Christian (heretical), and written in the reign of Alexander Severus, about A.D. 234.

Bk. viii. ll. 430-fin., by Christian hands in the middle of the 3rd cent.

Bks. i. ii. and iii. ll. 1-96, by Christian hands, in Asia in the middle of the 3rd cent.

Bks. xi. xii. xiii. xiv., Judæo-Christian, written in Egypt about the year 267 A.D.

With this scheme of Alexandre may be compared that propounded by Ewald. According to Ewald (*Abhandlung über Entstehung Inhalt und Werth der Sib. Bücher*, Göttingen, 1858) we have—

Bk. iii. ll. 97-828, about B.C. 124.

Bk. iv., about A.D. 80.

Bk. v. ll. 52-530, about A.D. 80.

Bks. v. ll. 1-51, vi. vii., in A.D. 138.

Bk. viii. ll. 1-300, about A.D. 211.

[Bk. viii. ll. 361-500, Ewald declares to be non-Sibylline.]

Bks. i. ii. iii. ll. 1-96, about A.D. 300.

Bks. xi. xii. xiii. xiv., much later: Ewald imagines references to the emperor Odenatus and to the rise of Islam!

Further discussions of dates of the whole or parts of the different books may be found in Friedlieb, *Orac. Sibyll.* (Leipzig, 1852), or Bleek (*Theol. Zeitschrift*, Berlin, 1819), or Dechent (see above). The different judgments arrived at by these writers would probably be rectified by a closer study of the whole body of Sibylline literature. So far, the best guide is Alexandre, whose *Excursus* is a monument of patiently accumulated facts.

EDITIONS OF THE SIBYLLINE ORACLES.—The first published portion of the Sibyllines was the famous acrostic, *Ἰερὸς Χριστός, Θεὸς υἱός, Σωτήρ*, which was printed by Aldus. The first ed. was due to Xystus Betuleus (Sixtus Birken) at Basel in 1545. It contained the first eight books. The second (Lat.) ed. was issued from the same printing-house (John Oporinus) in the following year. The third (Gr.-Lat.) appeared at Basel in 1555. The fourth ed. (that of Opsopæus = Koch) appeared at Paris in 1599, three years after the death of the editor. In 1817 the collection was expanded by Cardinal Mai's discovery of the Books xi.-xiv., which were printed first in his *Scriptorum vet. nova collectio*, vol. iii. pt. 8. Of more modern ed. the ones in common use are those of Friedlieb (Leipzig, 1852), Alexandre (Paris, 1860), and Rzsch. Of these, the last, published at Prague in 1891, is by far the best for the text; it contains no excursus, but has a brief critical preface, and a most valuable appendix exhibiting the dependence of the Sibyllines on Homer, Hesiod, the Orphic hymns, etc. With the text of Rzsch and the excursus of Alexandre, the student can find out almost all that is known of the Sibyllines. It is necessary to add a final caution with regard to the quotation of the books. There is a fluctuation in their numbering on the part of the editors, due to the imperfection of the series. The last four books, for example, are numbered ix. x. xi. and xii. by Friedlieb.

[Since the writing of the foregoing article, Geffcken's tract, entitled *Komposition und Entstehungszeit der Oracula Sibyllina*, has appeared, to which the student is referred for the latest view of the subject.] J. RENDEL HARRIS.

SAMARITAN PENTATEUCH.—I. HISTORICAL CONNEXION BETWEEN THE SAMARITANS AND THE PENTATEUCH.—The Samaritans are a mixed race, sprung from the remnants of the ten tribes which lost their independence in B.C. 722, and from the foreign colonists who were settled by the Assyrian kings in Central Palestine. Hence the question arises whether the Pentateuch was already known to the subjects of the Kingdom of the Ten Tribes. It might be supposed that this question must be answered in the negative, for the single reason that the Jahweh cultus introduced by Jeroboam I. (1 K 12²⁸) deviated to so large an extent from the Law. This argument, however, is not absolutely decisive, for even the kingdom of Judah, e.g. under Ahaz (2 K 16³) and Manasseh (21²⁷), witnessed frequent and serious departures from the legitimate religion. But there is at least one valid ground for the conclusion that the Pentateuch was first accepted by the Samaritans after the Exile. Why was their request to be allowed to take part in the building of the second temple (Ezr 4¹⁴) refused by the heads of the Jerusalem community (v. 3)? Very probably because the Jews were aware that the Samaritans did not as yet possess the Law-book. It is hard to suppose that, otherwise, they would have been met with this refusal. Further, one who, like the present writer, regards the modern criticism of the Pentateuch as essentially correct, has a second decisive reason for adopting the above view. Or does the very existence of the Samaritan Pentateuch present an obstacle to the

conclusion at which most representatives of modern Pentateuchal criticism have arrived, namely, that the sources of the Pentateuch were united by Ezra into the one stream which we see in our Pentateuch? At the present day there is scarcely any longer a single writer who would claim that the Samaritan Pentateuch supplies any argument against the critical position. No such claim is made, for instance, by C. F. Keil in his *Einleitung in d. AT*, 1873, § 204, or by Ed. Rupprecht in *Des Rätsels Lösung*, II. i. (1896) p. 196 f., or by the Roman Catholic Fr. Kaulen in his *Einleitung in die Heilige Schrift*, 1892, § 194.

How long after Ezra's time it was when the Samaritans accepted the Pentateuch is uncertain. They may have already done so at the time that Nehemiah, upon the occasion of his second visit to Jerusalem (B.C. 433), expelled the son of Joiada, the high priest, who had married a daughter of the Samaritan prince Sanballat (Neh 13²⁸). For there was hostility between the Jews and the Samaritans even at a much later period, although the latter had adopted the Law. But the view that appears to be most probable is that the above-mentioned son of the high priest induced the Samaritans both to accept the Pentateuch and to build a temple of their own upon Mt. Gerizim. It is well known that Josephus (*Ant.* XI. viii. 2) relates how Manasseh, son of the high priest Ιαδδούς, and son-in-law of the Samaritan prince Σαναβαλλάρης, fled to the Samaritans in the time of the Persian king Darius Codomannus. But here, in all probability, we have simply a chronological error, for later writers were weak in their knowledge of the chronology of the post-exilic period. For instance, in To 1¹⁸⁻²¹ the years 701-681 are compressed into πενήκοντα or τεσσαράκοντα ἔτη (Fritzschke, *Libri apocryphi*, pp. 110, 113), and in *Seder 'olam rabba* 30 it is said that the rule of the Persians after the building of the second temple lasted only 34 years (see, further, art. by the present writer in *Expos. Times*, x. [1899] p. 257). Nor are there wanting in the post-Biblical tradition indications pointing to the fact that it was near the time of Ezra that the Samaritans accepted the Pentateuch. For instance, in Bab. Talm. (*Sanhed.* 21b) we read: 'The Torah was originally revealed in the Hebrew character and in the holy [i.e. Hebrew] language, the second time in the Assyrian character and in the Aramaic language, and Israel chose the Assyrian character and the holy language, whereas it gave over the Hebrew character and the Aramaic language to the Ἰδιῶται.*' This second revelation of the Law which is here presupposed, has in view the activity which, according to other passages of the tradition, Ezra displayed with reference to the Pentateuch. For instance, in Bab. Talm. (*Sukka* 20a) it is said: 'The Torah was forgotten by the Israelites until Ezra came from Babylon and restored it' (other passages are translated in König's *Einleit. in d. AT*, p. 241 f.). Nor is there anything inexplicable in the circumstance that the Samaritans, about the year B.C. 433, accepted no part of the OT but the Pentateuch, for even the Jews exalted the Torah above the other parts of the OT. The Mishna enacts in *Megilla* iii. 1: 'If one sells books (i.e. parts of the OT other than the Pentateuch), he may take a Torah in exchange; but if one sells a Torah he may not take other books in exchange' (many further testimonies to this later appreciation of the Torah above the rest of the OT will be found in König's *Einleit.* p. 455 f.).

Later notices of the actual existence of the Samaritan Pentateuch are found in the Talmud (cf. Zach. Frankel, *Ueber den*

*The view of L. Blau, expressed in his programme 'Zur Einleitung in die heil. Schrift', 1894, p. 74, that the term Ἰδιῶται here does not refer to the Samaritans, will not hold its ground.

Einfluss der palästiniſchen Exegese auf die alexandr. Hermeneutik, p. 243), in Origen (whose *Hexapla* reads on the margin of Nu 13¹ ἡ καὶ αὐτὴ ἐν τοῖς Σαμαρείταις ἱσταντοὺς μεταβάλλουσιν), and in Jerome (*Prologus galatensis*: 'Samaritani Pentateuchum totidem literis scriptum, figuris tantum et apicibus discrepantes'). But about the year A.D. 1600 not even a scholar like Scaliger (*De emendatione temporum*, lib. 7) was aware whether there were copies of the Samaritan Pentateuch in existence in the East. At last, in the year 1616 Pietro della Valle purchased a complete manuscript of this Pentateuch from the Samaritans at Damascus. Between the years 1620 and 1630 Ussher collected in the East six copies of it. Since then many codices of this work have been collated; cf. de Rossi, *Variae lectiones VT*, 1784-88, vol. I. p. CLV f.; Rosen, *ZDMG*, 1864, p. 582 ff.; Abr. Harkavy, *Katalog der Samaritan. Pentateuchcodices in St. Petersburg*, 1874. The Samaritan Pentateuch was first printed, under the superintendence of Joh. Morinus, in the Paris Polyglott (1645). A second impression appeared in the London Polyglott (1657). It was published, transcribed in the square character, by Blayney at Oxford in 1790. Its peculiarities are also set forth in a separate column of Kennicott's *Vetus Test. heb. cum variis lectionibus* (Oxonii, 1770-80), and in H. Petermann's extremely interesting work, *Veruch einer hebraischen Formenlehre nach der Aussprache der heutigen Samaritaner*, 1868, pp. 219-326. In the latter will be found also a transcription of the whole of the Book of Genesis, as Amram, the then high priest of the Samaritan community at Nablus, dictated it to Petermann (pp. 161-218).

ii. COMPARISON BETWEEN THE SAMARITAN-HEBREW AND THE JEWISH-HEBREW PENTATEUCH.—(a) *The character of the MSS., and the method of dividing the text.*—The Samaritan manuscripts, like the majority of the Jewish ones, are of parchment or paper; the Samaritans likewise preferred the roll form for use in Divine worship. The Samaritan MSS want the vowel signs and the accents, which are employed in the Jewish Pentateuch. In lieu of these they exhibit the following signs: a point separates each word from the next; two points, similar to the colon in modern languages, mark off smaller and larger paragraphs (Kohn, *Zur Sprache, Litt., u. Dogmatik d. Samaritaner*, p. 1 f.). The whole Pentateuch is divided by the Samaritans into sections which they call קָזִין (*qazin*). Of these they reckon in the Pentateuch 966 (Hupfeld, *ZDMG*, 1867, p. 20), while the Jews are accustomed to count in the Torah 379 close and 290 open *parashas* (cf. König, *Einleit.* p. 463).

(b) *Linguistic differences.* The vowel letters are much more frequently employed in the Samaritan than in the MT. Even *shewa* is many times indicated by ו or י: for instance, אִינִי, a form which the MT first exhibits in 2 Ch 3¹⁸, is written by the Samaritan in Dt 28²⁸, or יִינִי is read for יָנִי in Dt 31⁴. The orthography which the MT favours, especially in the earlier parts of the OT, agrees still oftener with that found on the Jewish coins. But the Samaritan Pentateuch thus reflects the latest stage of development reached by Hebrew orthography within the OT, and in a great many instances goes even beyond this. In the matter of *pronouns*, the unusual forms are regularly changed into the usual ones. For instance, הוּ, which in the Pentateuch (Gn 21² etc.) stands for the later הֵן 195 times, and which is altered in the MT only in the margin, is replaced by הֵן in the Samaritan in the text. The form הוּ, which is permitted in the MT, is changed in the Samaritan into הֵן (Gn 42¹¹, Ex 16⁷, Nu 32²³). As to the conjugation of *verbs*, the lightened form of the imperfect, the so-called *jussive*, is almost always changed into the ordinary form: קָצַץ (Gn 32¹) is replaced by יָקַץ (read by the high priest Amram as *uyeshov*); קָץ (41³) by יָקַץ (*yere'i*); וָקַץ (31¹⁰ 41²²) by וָקַץ (*were'i*).—In the declension of *nouns*, the endings in -ו and -ת, which, in spite of J. Barth (*ZDMG*, 1899, p. 598), are to be considered relics of the old case-endings, are almost uniformly dropped: קָרַן appears as קָרַן in Gn 1²⁴ (נוּ in Nu 23¹⁸ 24¹⁸ is left unaltered); נִבְרָא as נִבְרָא (*genuwat*) in Gn 31³⁰; and אִיכָה as אִיכָה in Ex 15¹⁶. In the construction of nouns, many of the marks are obliterated which point to a *nomen generis* being of common gender: e.g. נֶעַר 'young

maiden' (Gn 24¹⁴, 16, 26, 55, 57 34³, 12, Dt 22¹⁵⁻²⁵ [except v.¹⁷]), which the Massoretes altered *only in the margin*, is changed into נָרָה (*nāra*) in the text of the Samaritan (cf. Gesenius, *de Pentateuchi Samaritani origine*, etc. p. 28 ff.). The solitary occurrence of ק which the present writer (*Lehrgeb.* ii. 293) has been able to discover before the article in the Pentateuch is קָקַעַר of Gn 6³⁰, and this disappears in the חַמַּת (*min d'oph*) of the Samaritan. — In the *lexical* sphere, the following differences are worthy of note: לִיר 'beget' is replaced by the form that became usual in later times, הוֹלִיר, in Gn 10⁹ and 22². The verb בָּהַ, which is used in Ex 21²⁸, 29, 31, 32, 36 of the 'pushing' of an ox, is replaced by the more familiar verb הָבַה 'strike'. — Differences of a *syntactical* or *stylistic* kind are the following: the sentence הָלֵבִן בָּהָה שָׁמָּה לְיָדִי (MT of Gn 17¹⁷ 'shall a child be born to one who is a hundred years old?') LXX *el tō ēkatoratarei yevh-cera ubōs*; is in perfect agreement with the Hebrew linguistic usage as this appears in Gn 4²⁸ etc. But the Samaritan has missed this construction, and substituted the easier *alben marat shena ulēd* (אֵלֵבִין, 'shall I at the age of a hundred years beget a child?'). In the MT of Gn 7² the formula אֵלֵבִין אֵלֵבִין appears alongside of the synonymous pair of words אֵלֵבִין אֵלֵבִין (v.²). This variety of expression disappears in the Samaritan, which uses the latter formula in *both* verses. The asyndetic כִּי (Gn 1¹¹), אֵל (3¹⁰), הַבְּרִיָּה (6⁴), הַבְּרִיָּה (v.⁴), are changed into עַתְּ etc., and greater clearness is thus obtained. — Under the same heading may be ranged certain phenomena of *dirction*, due to the Aramaic dialect, which afterwards became naturalized among the Samaritans. For instance, we find דִּירָם (Gn 8⁴), נִבְרָהִים (7¹⁹), חֲבִיר 'wine' (Dt 32¹⁴). The gutturals are thus very frequently interchanged, because to the Samaritan copyist, accustomed to the Aramaic dialect, they had lost their distinctive phonetic values. To the same cause are due such forms as that of the pronoun אִמִּי (Gn 12¹¹, 13 24⁴⁷, 60) and אִמִּי (31⁶), or of נִחְמִי (for נִחְמִי, Gn 18¹⁵), the infinitive לִאֲכֹלֵה (for לִאֲכֹלֵה, 9¹⁰), etc. (cf. Gesenius, *L.c.* p. 53 ff.).

(c) *Material* differences: (a) many passages are altered or supplemented from parallel passages. For instance, לֹא אֵשֶׁת of Gn 18²⁰ is replaced in the Samaritan by לֹא אֵשֶׁת *lā ashit*, after vv. 22, 31². The servant of Moses is called in the MT sometimes הֶעֱזָר (Nu 13¹⁶, Dt 32⁴), and sometimes הֶעֱזָרָה (Ex 17¹², 13, 24³ etc.), but the Samaritan writes the latter form even in the three passages in which the change of *Hoshea* into *Jehoshua* is recorded, so that we read in Nu 13¹⁶ 'and Moses called Jehoshua, the son of Nun, Jehoshua'. Again, in Gn 11¹¹⁻²⁶ the formula is regularly added, 'and all the years of . . . were . . . years, and he died,' which is derived from the parallel genealogy (5⁵). In 17¹⁴ 'on the eighth day' is read in harmony with the parallel passage. After 30³⁰ we find a long addition, which is borrowed from 31¹². Specially striking is the following series of passages: Ex 6⁹ (cf. 14¹²) 7¹² (cf. vv. 10-12) 7²² (cf. vv. 28-29) 8¹⁹ (cf. vv. 16-19) 9⁵, 10 10³ 11⁸ (cf. 4²¹) 18³⁰ (cf. Dt 1⁹⁻¹³) 20¹⁷ (cf. Dt 27², 5-7) 20²¹ (cf. Dt 5²⁶, 28 18¹⁸⁻²² 5²⁷) 30²¹, Nu 4¹⁴ 10¹⁰ 12¹⁶ 13²³ 20¹³ 21¹¹, 20 27²³ 31³⁰, Dt 2⁷ 5¹⁶ 10⁷. The remarkable circumstance about all these passages is that in every instance where it is recorded that Moses said or did something, this is always preceded by a statement in so many words that it was a Divine command that he should act so, and, wherever a Divine command is recorded, this is repeated in the same terms when we are told that Moses fulfilled it. This is a carrying to the extreme of that pleonastic form of expression which may be observed also in certain portions of the Jewish-Hebrew Pentateuch (cf. König, *Stilistik*, etc. pp. 169, 172, 176). That the above passages

in the Samaritan Pentateuch are of secondary origin is sufficiently evident from the circumstance that its text there has not the support of a single ancient witness. — (8) There are differences due to a religious or other like interest. The statement in Gn 2² 'וַיִּבְרָא אֱלֹהִים בָּיִם הַשְּׁמַיִם' 'and God declared all his work finished' (see König, *Syntax*, § 95b) on the *seventh* day was not understood, and so the seventh was changed into the *sixth* day (Sam. *beyōm eshshishshi*). The number 430 years, during which the Hebrews sojourned in Egypt, according to the MT of Ex 12⁴⁰, appeared to be too large, and hence the expression נִבְרָהִים 'in the land of Canaan' was inserted before the words 'in the land of Egypt.' (By the way, the MT of Ex 12⁴⁰ is shown by Ezk 4⁶ to have been the text in existence at the time of the prophet, for the 390+40 years of Ezk 4⁶ are nothing else than a reflexion of the 430 years of the Egyptian bondage of Israel). Again, the plural predicate with which אֱלֹהִים 'God' is coupled in Gn 20¹³ 31³⁵ and Ex 22³, is changed into a singular, in order to avoid the appearance of polytheism (Kohn, *de Samaritano Pentateucho*, p. 22). — Another group is formed by the following passages. — The statement in Ex 24¹² 'and they beheld (sc. God),' is replaced by 'and they cleaved to (God),' the idea being that the Deity must have been strictly invisible. The conception of God was thus transcendentalized. In obedience to the same motive, so-called intermediary beings are introduced between God and man, אֱלֹהִים ('God') being replaced by מַלְאֲכֵי אֱלֹהִים ('an angel of God') in Nu 22²⁰ 23¹, and יְהוָה by מַלְאֲכֵי יְהוָה in vv. 5, 10. Conversely, הַמַּלְאֲכִי ('the angel') is once, Gn 48¹⁶, changed into הַמֶּלֶךְ ('the king'), in order to avoid attributing to the angel what God Himself had accomplished, namely, the deliverance of Jacob. The Samaritans showed themselves in other instances as well very jealous for the character of God. From this motive they changed the words 'take all the heads of the people and hang them up' (Nu 25⁴) into 'command that they slay the men who attached themselves to Baal-peor,' the command as it runs in the MT appearing to involve an injustice on the part of God. To the same category belongs the substitution of 'hero (גיבור) of war' for 'man (אִישׁ) of war,' as a designation of God in Ex 15³. — Yet another group of differences have for their aim the securing of the aesthetic purity of the Law. The Samaritans, for instance, have not only taken into the text those marginal readings which the Jewish Massoretes adopted for aesthetic reasons (Dt 28³⁰), but have replaced the term כְּסֵפִי 'his secrets' (25¹¹) by בָּשָׂר 'his flesh.' — Finally, it was upon national grounds that the name יְבָל ('Ebal') was exchanged for גֵּרִיזִים (Gerizim) in Dt 27⁴. It has been shown, notably by Verschuur (in No. iii. of his *Dissertationes philologicae-exegeticae*, 1773), that the context demands the building of the altar nowhere but upon Mt. Ebal. God is presented especially as witness to the oath and as avenger of any breach of it (29¹², 14, 19), and accordingly we look both for the building of the altar as a symbol of the Divine presence, and for the offering of sacrifice by the people, upon *that* mountain from which the curse was proclaimed (27¹²). After the Samaritans, moved probably by 27¹² where Gerizim is named as the mount of blessing, had built their temple upon this mountain to the south of Shechem, they would be led naturally enough to introduce the name Gerizim in v. 4. The Jews, on the other hand, had no interest to substitute the name 'Ebal' for the name Gerizim, for the point that concerned them was not whether Gerizim or 'Ebal was to have the preference, but whether the hegemony belonged to Gerizim or to Zion (Jn 4²⁰).

In view of all these differences between the

Jewish-Hebrew and the Samaritan-Hebrew Pentateuch, there can be no doubt that what the Samaritans possess is a *later* form of the Pentateuch. Whether we look at the groups dealing with linguistic differences or at those connected with the subject-matter, the indications point to a *late* period. A sufficient evidence of this is supplied by the Jewish *marginal* readings which are taken by the Samaritans into the *text* itself, but the same conclusion follows equally from the theological peculiarities of the Samaritan Pentateuch which have been mentioned above. For the same transcendentalizing of the conception of God is met with also in the later writings of the Jews: e.g. the statement 'and God was grieved' (Gn 6⁶) is replaced in the Targum of Onkelos by 'and He commanded by His *חַסְדָּא* (*word*) to destroy their energies according to His will.'

iii. RELATION OF THE SAMARITAN PENTATEUCH TO THE HELLENISTIC (i.e. THE SEPTUAGINT).—(a) Both these forms of the Pentateuch agree in many details of form. For instance, both, differing in this from the MT, have an 'and' before 'tree' in Gn 1¹ (MT $\pi\gamma$, Sam. *weg*, LXX $\kappa\alpha\iota \epsilon\delta\upsilon\lambda\omicron\nu$). The case is the same in 3¹⁸ ($\alpha\lambda\iota\sigma\tau\alpha\kappa\alpha\iota$ *wel a'ishshar*, $\kappa\alpha\iota \tau\eta \gamma\omega\upsilon\alpha\kappa\iota$), 6⁴ ($\omega\alpha\eta\eta\phi\iota\lambda\epsilon\mu$ *wannephilem*, $\alpha\delta \epsilon \gamma\gamma\alpha\upsilon\tau\epsilon\varsigma$), and 6^{15, 16}. Again, both have in common some considerable deviations from the MT. In Gn 2² the LXX, like the Samaritan, has replaced 'on the seventh day' by 'on the sixth day' ($\tau\eta \eta\mu\epsilon\rho\alpha \tau\eta \epsilon\kappa\tau\eta$). Instead of the strange order 'earth and heaven' which the MT exhibits in Gn 2^{4b}, the other two forms of the Pentateuch have the more usual succession of the two words (*shanēm wuarez*, $\tau\omicron\nu\nu \sigma\upsilon\beta\alpha\rho\iota\nu \kappa\alpha\iota \tau\eta\nu \gamma\eta\nu$). Both supplement the words of Cain in 4⁸ by 'let us go into the field' (*nelaka aishshari*, $\epsilon\delta\epsilon\lambda\theta\omega\mu\epsilon\iota\varsigma \epsilon\iota\varsigma \tau\omicron \pi\epsilon\delta\iota\omicron\nu$). Both interpolate into the MT of Ex 12⁴⁰ the words 'in the land of Canaan,' but, while the Samaritan has this addition *before*, the LXX has it *after*, the words 'in the land of Egypt.' Finally, the Samaritan and the LXX agree in some of the expansions of the MT which are derived from parallel passages. For instance, in Gn 1¹⁴ there is the addition 'to give light upon the earth' (*la'ir al auwez*, $\epsilon\iota\varsigma \phi\alpha\delta\iota\nu \epsilon\omega\iota \tau\eta\varsigma \gamma\eta\varsigma$), and in 11⁸ 'and the tower' (*wit ammegdal*, $\kappa\alpha\iota \tau\omicron\nu\nu \pi\epsilon\gamma\iota\nu\omicron\nu$) is added.

(b) Differences between the Samaritan and the LXX. As regards the use of 'and,' the LXX agrees with the MT in Gn 6⁹ (וְהָיָה הָאָדָם, *dhikaos tēleios*, against Sam. *zādēlē utamem*). The LXX prefers asyndesis in τὸν Σήμ, τὸν Χάμ, τὸν 'Ιάφεθ, as against the syndesis of the MT ('Shem, Ham, and Japheth') and the polysyndesis of the Samaritan (*it Shem wit Am wit Yepheth*). In 2²⁵ the Samaritan and the δ 'Ādām of the LXX agree, but the Samaritan has the anarthrous אָדָם (*adam*), whereas in 3²⁰ the article is wanting alike in the Samaritan (*adam*) and the LXX ('Ādām). In 3³ the MT and the LXX have the simple expression 'the tree,' but the Samaritan reads 'this tree' (דִּזְעַזְע). The LXX has different numbers from the Samaritan in the genealogies of Gn 5⁵⁸ and 11¹⁰⁸. Finally, in the sphere of religion, the Samaritan Pentateuch has retained the Divine name Jahweh in its *text*, only that the Samaritans read for it *Shema* (Petersmann, l.c. p. 162), which means 'the name' κατ' ἐξοχήν. This use of the expression 'the name' has the foundation already laid for it in Lv 24¹¹, and makes its appearance for the first time in the Mishna in the words 'Let him offer a short prayer, saying, Help, O name (שֵׁם), thy people the remnant of Israel' (*Bērākhoth* iv. 4). The Greek Jew has already replaced in his *text* the most holy name Ἰαχβὴ (Jahweh) by the expression 'the LORD' (ὁ κύριος) which the Hebrew Jews placed in the *margin*. But, on the other hand, the Greek Jew has retained the term 'God' in Nu 22²⁰ and 23⁴ (ὁ θεός), whereas

the Samaritan has introduced the expression 'angel of God,' thus raising the Deity above any intercourse with man.

iv. SOURCE OF THE PECULIARITIES OF THE SAMARITAN PENTATEUCH. — Four principal suggestions have been made to account for these peculiarities.

(a) May not the features in which the Samaritan and the Greek Pentateuch agree with one another, and differ from the Jewish-Hebrew Pentateuch, be traced directly to certain views and aims of later scribism? This is not only possible, but is even positively favoured by the circumstances of the translation of the Samaritan and the Greek to the Jewish Pentateuch: it is a mixture of agreement and difference. Let us look at two examples. The later scribes held that אָדָם in Gn 2nd is not the *nomen appellativum*, 'man,' but the proper name 'Adam.' This common opinion, however, found expression in various ways. The Hebrew-Jewish Masoretes pronounced, in 220 317 21 *q. adam*, i.e. without the article, because this was possible in these three passages without alteration of the *text*, which in the other two passages (225 320) would have had to be altered to get rid of the article. The Greek Jw likewise retains the article in 225 (Γ' Ἀδάμ) and drops it only in 320. But the Samaritan in both these passages has introduced the anarthrous word אָדָם (*adam*) into the text. Again, the view that the 430 years of Ex 12th included Israel's sojourn in Canaan and Egypt, finds expression in *different* ways in the Samaritan and in the LXX.

(b) It is more likely that the readings wherein the Samaritan and the LXX agree (in Abbr. Gering, *Urschrift u. Uebersetzungen*, p. 98, 2, d. Wette-Schrader, *Einleit.* p. 98, 1, Katke, *Einleit.* p. 100). There are traces, of course, of Jewish-Hebrew MSS whose text deviates in some points from the MT. For instance, the tract *Sopherim* (vi. 4) relates that 'Three books were found in the forecourt (בית המדרש) : in one was found written \aleph eleven times, and in two \aleph eleven times, and the two were declared to be right, and the one was left out of account.' That is to say, a manuscript was discovered in the forecourt of the temple in which the personal pronoun of the 3rd pers. sing. was expressed by \aleph not only in the well-known 196 passages, but also in the other eleven passages of the Pentateuch, where that pronoun occurs. Yet this is but a weak support for the view that at one time a Jewish-Hebrew MS of the Pentateuch contained the peculiarities wherein the Samaritan and the LXX differ from the MT. Or may it be supposed that a Jewish-Hebrew MS of this kind took its rise amongst the Hellenistic Jews in Egypt? (Riehm, *Einleit.* ii. 446). At all events, the accounts we have of the origin of the LXX know nothing of Egyptian MSS of the Heb. Pentateuch which formed the basis of the Greek translation.

(b). Or are we to hold that the Samaritan Pentateuch was subsequently corrected from the Greek? (Ed. Boll, *Die atteste. Citate im NT*, p. 171). This view cannot be set down as absolutely impossible, but it raises new and difficult questions. Was there once a Greek Pentateuch, which was simply copied by the Samaritans? There is no evidence for this, nor is it likely that the Samaritans would have adopted a text of the Greek Pentateuch, which they would have had to correct by the LXX used by the Samaritans for correcting their Pentateuch; why did they adopt only a portion of the peculiarities of the LXX?

and likely adopted only after the second century, while the LXXA (d) text is much more difficult to arise. We assume that it was a Samaritan-Hewre codex (Eichhorn, *Einleit.* II, 641f.) or a Samaritan-Greek codex (Kohn, *Samaritanische Studien*, p. 38 ff.) that was translated at Alexandria. For, in the first place, tradition knows nothing of this. Secondly, it is not in the least likely that as early as the 3rd cent. n.c., when the so-called Septuagint version of the Pentateuch originated, so many Samaritans had adopted the Greek language that a Greek translation of the Pentateuch would have been executed for their use. It is true there are 43 Greek passages which are marked by Origen as *Σαμαριτικόν* (Field, *Origenis Hexaplorum quæ supersunt*, p. lxxciff.). It is also certain that these passages are relics of a complete Greek translation of the Pentateuch (Kohn, 'Das Samaritikon' in *Monatschrift f. Gesch. u. Landesk. u. Völk. Judenthums*, 1894, pp. 1-7, and 1895, pp. 1-7, and 1896, pp. 1-7, and 1897, pp. 1-7, and 1898, pp. 1-7, and 1899, pp. 1-7, and 1900, pp. 1-7, and 1901, pp. 1-7, and 1902, pp. 1-7, and 1903, pp. 1-7, and 1904, pp. 1-7, and 1905, pp. 1-7, and 1906, pp. 1-7, and 1907, pp. 1-7, and 1908, pp. 1-7, and 1909, pp. 1-7, and 1910, pp. 1-7, and 1911, pp. 1-7, and 1912, pp. 1-7, and 1913, pp. 1-7, and 1914, pp. 1-7, and 1915, pp. 1-7, and 1916, pp. 1-7, and 1917, pp. 1-7, and 1918, pp. 1-7, and 1919, pp. 1-7, and 1920, pp. 1-7, and 1921, pp. 1-7, and 1922, pp. 1-7, and 1923, pp. 1-7, and 1924, pp. 1-7, and 1925, pp. 1-7, and 1926, pp. 1-7, and 1927, pp. 1-7, and 1928, pp. 1-7, and 1929, pp. 1-7, and 1930, pp. 1-7, and 1931, pp. 1-7, and 1932, pp. 1-7, and 1933, pp. 1-7, and 1934, pp. 1-7, and 1935, pp. 1-7, and 1936, pp. 1-7, and 1937, pp. 1-7, and 1938, pp. 1-7, and 1939, pp. 1-7, and 1940, pp. 1-7, and 1941, pp. 1-7, and 1942, pp. 1-7, and 1943, pp. 1-7, and 1944, pp. 1-7, and 1945, pp. 1-7, and 1946, pp. 1-7, and 1947, pp. 1-7, and 1948, pp. 1-7, and 1949, pp. 1-7, and 1950, pp. 1-7, and 1951, pp. 1-7, and 1952, pp. 1-7, and 1953, pp. 1-7, and 1954, pp. 1-7, and 1955, pp. 1-7, and 1956, pp. 1-7, and 1957, pp. 1-7, and 1958, pp. 1-7, and 1959, pp. 1-7, and 1960, pp. 1-7, and 1961, pp. 1-7, and 1962, pp. 1-7, and 1963, pp. 1-7, and 1964, pp. 1-7, and 1965, pp. 1-7, and 1966, pp. 1-7, and 1967, pp. 1-7, and 1968, pp. 1-7, and 1969, pp. 1-7, and 1970, pp. 1-7, and 1971, pp. 1-7, and 1972, pp. 1-7, and 1973, pp. 1-7, and 1974, pp. 1-7, and 1975, pp. 1-7, and 1976, pp. 1-7, and 1977, pp. 1-7, and 1978, pp. 1-7, and 1979, pp. 1-7, and 1980, pp. 1-7, and 1981, pp. 1-7, and 1982, pp. 1-7, and 1983, pp. 1-7, and 1984, pp. 1-7, and 1985, pp. 1-7, and 1986, pp. 1-7, and 1987, pp. 1-7, and 1988, pp. 1-7, and 1989, pp. 1-7, and 1990, pp. 1-7, and 1991, pp. 1-7, and 1992, pp. 1-7, and 1993, pp. 1-7, and 1994, pp. 1-7, and 1995, pp. 1-7, and 1996, pp. 1-7, and 1997, pp. 1-7, and 1998, pp. 1-7, and 1999, pp. 1-7, and 2000, pp. 1-7, and 2001, pp. 1-7, and 2002, pp. 1-7, and 2003, pp. 1-7, and 2004, pp. 1-7, and 2005, pp. 1-7, and 2006, pp. 1-7, and 2007, pp. 1-7, and 2008, pp. 1-7, and 2009, pp. 1-7, and 2010, pp. 1-7, and 2011, pp. 1-7, and 2012, pp. 1-7, and 2013, pp. 1-7, and 2014, pp. 1-7, and 2015, pp. 1-7, and 2016, pp. 1-7, and 2017, pp. 1-7, and 2018, pp. 1-7, and 2019, pp. 1-7, and 2020, pp. 1-7, and 2021, pp. 1-7, and 2022, pp. 1-7, and 2023, pp. 1-7, and 2024, pp. 1-7, and 2025, pp. 1-7, and 2026, pp. 1-7, and 2027, pp. 1-7, and 2028, pp. 1-7, and 2029, pp. 1-7, and 2030, pp. 1-7, and 2031, pp. 1-7, and 2032, pp. 1-7, and 2033, pp. 1-7, and 2034, pp. 1-7, and 2035, pp. 1-7, and 2036, pp. 1-7, and 2037, pp. 1-7, and 2038, pp. 1-7, and 2039, pp. 1-7, and 2040, pp. 1-7, and 2041, pp. 1-7, and 2042, pp. 1-7, and 2043, pp. 1-7, and 2044, pp. 1-7, and 2045, pp. 1-7, and 2046, pp. 1-7, and 2047, pp. 1-7, and 2048, pp. 1-7, and 2049, pp. 1-7, and 2050, pp. 1-7, and 2051, pp. 1-7, and 2052, pp. 1-7, and 2053, pp. 1-7, and 2054, pp. 1-7, and 2055, pp. 1-7, and 2056, pp. 1-7, and 2057, pp. 1-7, and 2058, pp. 1-7, and 2059, pp. 1-7, and 2060, pp. 1-7, and 2061, pp. 1-7, and 2062, pp. 1-7, and 2063, pp. 1-7, and 2064, pp. 1-7, and 2065, pp. 1-7, and 2066, pp. 1-7, and 2067, pp. 1-7, and 2068, pp. 1-7, and 2069, pp. 1-7, and 2070, pp. 1-7, and 2071, pp. 1-7, and 2072, pp. 1-7, and 2073, pp. 1-7, and 2074, pp. 1-7, and 2075, pp. 1-7, and 2076, pp. 1-7, and 2077, pp. 1-7, and 2078, pp. 1-7, and 2079, pp. 1-7, and 2080, pp. 1-7, and 2081, pp. 1-7, and 2082, pp. 1-7, and 2083, pp. 1-7, and 2084, pp. 1-7, and 2085, pp. 1-7, and 2086, pp. 1-7, and 2087, pp. 1-7, and 2088, pp. 1-7, and 2089, pp. 1-7, and 2090, pp. 1-7, and 2091, pp. 1-7, and 2092, pp. 1-7, and 2093, pp. 1-7, and 2094, pp. 1-7, and 2095, pp. 1-7, and 2096, pp. 1-7, and 2097, pp. 1-7, and 2098, pp. 1-7, and 2099, pp. 1-7, and 2100, pp. 1-7, and 2101, pp. 1-7, and 2102, pp. 1-7, and 2103, pp. 1-7, and 2104, pp. 1-7, and 2105, pp. 1-7, and 2106, pp. 1-7, and 2107, pp. 1-7, and 2108, pp. 1-7, and 2109, pp. 1-7, and 2110, pp. 1-7, and 2111, pp. 1-7, and 2112, pp. 1-7, and 2113, pp. 1-7, and 2114, pp. 1-7, and 2115, pp. 1-7, and 2116, pp. 1-7, and 2117, pp. 1-7, and 2118, pp. 1-7, and 2119, pp. 1-7, and 2120, pp. 1-7, and 2121, pp. 1-7, and 2122, pp. 1-7, and 2123, pp. 1-7, and 2124, pp. 1-7, and 2125, pp. 1-7, and 2126, pp. 1-7, and 2127, pp. 1-7, and 2128, pp. 1-7, and 2129, pp. 1-7, and 2130, pp. 1-7, and 2131, pp. 1-7, and 2132, pp. 1-7, and 2133, pp. 1-7, and 2134, pp. 1-7, and 2135, pp. 1-7, and 2136, pp. 1-7, and 2137, pp. 1-7, and 2138, pp. 1-7, and 2139, pp. 1-7, and 2140, pp. 1-7, and 2141, pp. 1-7, and 2142, pp. 1-7, and 2143, pp. 1-7, and 2144, pp. 1-7, and 2145, pp. 1-7, and 2146, pp. 1-7, and 2147, pp. 1-7, and 2148, pp. 1-7, and 2149, pp. 1-7, and 2150, pp. 1-7, and 2151, pp. 1-7, and 2152, pp. 1-7, and 2153, pp. 1-7, and 2154, pp. 1-7, and 2155, pp. 1-7, and 2156, pp. 1-7, and 2157, pp. 1-7, and 2158, pp. 1-7, and 2159, pp. 1-7, and 2160, pp. 1-7, and 2161, pp. 1-7, and 2162, pp. 1-7, and 2163, pp. 1-7, and 2164, pp. 1-7, and 2165, pp. 1-7, and

When all these considerations are taken into account, the first of the views enumerated above remains the most probable, namely, that the greater part of the differences which show themselves between the MT and the Samaritan Pentateuch, grew up through the influence of later currents of thought, just as is the case with the majority of the differences between the MT and the LXX.

We see the influence of later hermeneutics and theology continuing to work in another form which the Pentateuch assumed among the Samaritans, and which must not be confused with the Samaritan

Pentateuch hitherto spoken of. When the W. Aramaic dialect had inundated also Central Palestine, the Samaritan-Hebrew Pentateuch was translated into this new country dialect of the Samaritans. Thus originated the Samaritan Pentateuch-Targum, which, according to the tradition of the Samaritans, dates from the 1st cent. B.C., and is attributed to a priest, Nathanael, but which is more correctly derived, with Kautzsch (*PRE*³ xiii. p. 350), from the 2nd cent. A.D. This translation was first printed in the Paris (1645) and London (1657) Polyglotts, and the text given there was transcribed in the square character by Brüll (*Das Samaritanische Targum*, 1873-75). After fresh comparison with many MSS, it was published by H. Petermann under the very misleading title *Pentateuchus Samaritanus* (1872-91). The Oxford *Fragments of a Samaritan Targum*, published by Nutt in 1874, have also been used by Petermann in restoring the text of Leviticus and Numbers, as well as the St. Petersburg Fragments published by Kohn in 1876, which are made use of in the 5th part, which embraces Deuteronomy. 'But there are more variants than appear in Petermann-Vollers,' says P. Kahle in his *Textkritische und lexikalische Bemerkungen zum samaritan. Pentateuchtargum* (1898), pp. 8, 11, etc. On the character of this Targum the reader may now compare, above all, the thoroughgoing article of Kohn in *ZDMG*, 1893, pp. 626-97. Kahle (*l.c.* p. 8) remarks that in the Targum 'the Hebrew-Samaritan text is rendered slavishly, word for word.' Yet the transcendentalizing of the Divine and the glorification of Moses show themselves in a still higher degree here than in the Sam. Pentateuch itself.

After the Mohammedan conquest of Palestine (A.D. 637), when Arabic was becoming more and more the medium of intercourse employed by the Samaritans, Abu Sa'id in the 11th cent. translated the Pentateuch into Arabic. (The books of Genesis, Exodus, and Leviticus in this translation have been edited by A. Kuenen, 1851-54). The so-called Barberini Triglott, a MS which was deposited in the Barberini Library at Rome, exhibits in three columns the Samaritan-Hebrew text, the Samaritan-Aramaic, and the Samaritan-Arabic versions.

ED. KÖNIG.

RACES OF THE OLD TESTAMENT.—*Scope and Definition.*—It is essential to the proper treatment of a subject to determine first of all its scope. In the broad sense of the term, the races of the OT include all the peoples that are mentioned within that promiscuous compilation representing a large number of distinctive works and embracing the remains of a literature which covers a period of almost one thousand years of intellectual activity. The character of this literature, as thus defined, makes it natural that the geographical horizon of the OT writers should be practically coextensive with the then existing ethnological knowledge. By actual contact the Hebrews are brought into relationship with the entire group of nations settled around the Mediterranean, as well as with many inland groups to the north, east, south, and south-west of the land which became the home of the Hebrews *par excellence*. The early traditions and the legendary accounts of periods and personages lying beyond the confines of trustworthy knowledge, increase this number by many races of which little more than the names have been preserved. To give an exhaustive account, therefore, of the races of the OT would involve writing a treatise on ancient ethnology.

On the other hand, as ordinarily understood, the races of the OT include primarily those peoples only which stand in close contiguity to the central group in the scene of OT history—the Hebrews themselves; and here, again, a

further twofold division suggests itself, viz. between those which belong to the more immediate ethnic group of which the Hebrews form a part, and those which lie outside of these limits. Confining ourselves in the main to a discussion of the theme in the narrower sense, it will meet our purposes best to treat it under these two aspects.

i. **THE HEBREWS AND SEMITES.**—The group historically known as the Hebrews, and forming the confederation of tribes to which the name Bēnē Israel is given in the OT, forms part of a larger group known as the SEMITES. By virtue of this relationship, and in consequence of the geographical distribution of the other branches of the Semites, it is to the Semitic family that the races most prominently mentioned in the OT belong. The term Semite is used both in an ethnological and in a linguistic sense. As originally employed by J. G. Eichhorn* at the close of the 18th century, it embraced the peoples grouped in Gn 10 as the 'sons of Shem.' Since, however, it has been ascertained that the peoples thus grouped do not belong to one race or even to allied races, the ethnological application of the term has been modified to designate a race distinguished by the following features: dolichocephalic skulls; curly and abundant hair; slightly wavy or straight strong beard, the colour predominantly black; prominent nose, straight or aquiline; oval face.†

It must, however, be borne in mind that the pure type is comparatively rare. At an exceedingly remote period the mixture of Semites with Hamites and Aryans began, so that except in the less accessible regions of central Arabia it is doubtful whether pure Semites exist at all. So pronounced has this mixture been that some investigators regard the Semites as the product of two races—a blonde and a dark race; but the introduction of such a division is confusing. The mixture has not been with one race but with many races, and hence it is but natural that a variety of types should have been produced. The preponderating type, however, being dark, it is legitimate to conclude that the latter represents the original stock, and that the 'blonde' Semites furnish the proof precisely of that admixture which we know from other sources actually took place.

Where the original home of the Semites lay is a matter of dispute, and will probably never be settled to the satisfaction of all scholars. The drift of scholarly opinion, after vacillating between southern Babylonia, the eastern confines of Africa, southern Arabia, and the interior of the Arabian peninsula, is now in favour of the latter region.‡ It is, at all events, in central Arabia that the purest Semitic type is still found, and, so far as known, it was invariably from the interior of Arabia that the Semitic hordes poured forth to the north-east and north-west and south to establish cultured States or to assimilate the culture which they already found existing.

It is in this way that we may account for the greatest of Semitic States—that of BABYLONIA and ASSYRIA in the Euphrates Valley and along the banks of the Tigris. The course of culture in Mesopotamia is from south to north, and this fact is in itself an important indication that the Semites who took possession of Babylonia came

* *Hist.-Kritische Einleit. in das AT* (Leipzig, 1780), p. 45.

† See, e.g., Brinton, *Races and Peoples* (New York, 1890), p. 134.

‡ For recent discussions of the various theories, see Nöldeke, *Die semitischen Sprachen* (Leipzig, 1887), and his article 'Semitic Languages' in *Encyc. Brit.*⁹; also Brinton and Jastrow, *The Cradle of the Semites* (Philadelphia, 1891), where further references will be found; and more recently G. A. Barton, *A Sketch of Semitic Origins* (New York, 1902), ch. I.

from a district lying to the south of Babylonia. The Babylonians and Assyrians thus form a distinct branch of the Semites, though at the same time furnishing an illustration of the admixture with other races upon which we have dwelt. The Euphrates Valley appears to have been from time immemorial a gathering-place of various nations, and, in passing, it may be noted that the Biblical legend of the confusion of tongues (Gn 11), which significantly takes place in Babylonia, appears to be based upon a dim recollection of this circumstance. So far as present indications go, the Semites upon coming to the Euphrates Valley already found a culture in existence which, however, they so thoroughly assimilated, and on which at the same time they impressed the stamp of their peculiar personality to such an extent, as to make it substantially a Semitic product. Indeed, the presence of this earlier culture was probably the attraction which led to the Semitic invasion from the interior of Arabia, just as at a later date the Semitic civilization of the Euphrates attracted other Semitic hordes towards making a northern movement from this same region. It is among these hordes, pouring out of the steppes of Arabia, and proceeding in the direction of the Euphrates Valley, that we are to seek for the ancestors of the Hebrews.

The sociological process which began thousands of years ago is still going on at the present time, where nomadic groups, attracted by the opportunities of spoil, continue to skirt the regions of culture in the East, with the result that a certain proportion of them are permanently gained for the cause of civilization, and settle in culture centres.* The Biblical tradition which goes back to settlements on the Euphrates—Ur and Harran (Gn 11²⁸⁻³¹)—finds an explanation in such a movement. Forming part of a nomadic invasion, the Hebrews were among those who, allured by the attractions of Babylonian culture, made settlements of a more permanent character along the Euphrates, first at Ur and later farther north at Harran. That, however, these settlements did not involve casting aside nomadic habits altogether, is shown by the Biblical tradition which records a movement of Hebrews from Ur to Harran and thence by the northern route into Palestine. The presence of an Eliezer clan of Damascus in close affiliation with Abraham (Gn 15²) and his band, points to a temporary settlement at Damascus on the route to the west. Once on the west of the Jordan, the Hebrews continue their semi-nomadic habits for several centuries, and it is not until the 11th cent. that this stage in their career is definitely closed.

These movements of the Hebrews, as recorded in a blurred, and yet for that reason not altogether unhistorical tradition, suggest, as already pointed out, the manner in which southern Mesopotamia became a thoroughly Semitic State, the invading Semites absorbing the old culture (whatever that was, and whatsoever its origin may have been), and giving a new direction to the further intellectual, social, and religious development of the Euphrates Valley. This parallel also indicates—what is more important for our purposes—a common origin for the Semites who obtained possession of Babylonia and those who, after moving up and down the western outskirts of Babylonia, entered Palestine. The testimony of language bears out this supposition, for the relationship between Hebrew and Babylonian is such as to warrant our concluding in favour of the descent of the two peoples from one common branch to which the name 'Aramean' may be given.

It is both interesting and significant to find that

* See Lady Anne Blunt, *The Bedouin Tribes of the Euphrates* (London, 1879), especially chs. xxiii. and xxiv.

tradition preserves the appropriateness of this designation. On a solemn occasion, when the Hebrew, appearing before Jahweh, is to recall his past, a formula is introduced in which he refers to his ancestor as 'a stray' (רָמָה) Aramean' (Dt 26⁵).

1. The ARAMEAN branch of the Semites thus assumes large dimensions. Besides the Babylonians and Assyrians and Hebrews, it includes the Semites who settled in Syria as well as the groups of Moabites and Ammonites settled on the east side of the Jordan, while the Phoenicians settled on the Mediterranean coast constitute another Aramean division or offshoot. Of the relationship existing between Hebrews and Babylonians we have already spoken. When the early contact in the Euphrates district began, of which Biblical tradition preserves a faint recollection, it is impossible to say; nor must it be supposed that the Hebrews at the time of their forward movement from interior Arabia were sharply differentiated from the promiscuous groups of Semites who participated in the movement.

By virtue of the relationship existing between Hebrew and the various Aramaic dialects, particularly between Hebrew and Aramaic in its oldest form,* we are justified in thus placing the group subsequently distinguished as a conglomeration of clans, from which the Hebrews trace their descent, in the same category with that large and somewhat indefinite branch of Semites which we have already designated as Aramean. While the relationship between Hebrews and Babylonian-Assyrians was never entirely broken off, political or commercial associations being maintained with but short interruptions between Mesopotamia and Palestine from the time of the permanent settlement of the Hebrews to the west of the Jordan, down to the destruction of the two Hebrew kingdoms in the 8th and 6th cents. respectively, this relationship was not so close as that which was maintained between the Hebrews on the one hand, and the Moabites, Ammonites, Edomites, Ishmaelites (or Arabs), Phoenicians, and other subdivisions of the great Aramean branch, on the other. Among the races occurring in the OT, it is these which occupy the most prominent place in Hebrew history. It seems desirable, therefore, to dwell upon them in greater detail.

The tradition recorded in Gn 19³⁰⁻³⁸ which ascribes the origin of the MOABITES and AMMONITES to an act of incest committed by Lot with his two daughters, simply reflects the hostility between these two nations and the Hebrews. To throw discredit upon an opponent's ancestry is a favourite method in Arabic poetry of expressing one's contempt and inveterate hatred. More significant, as pointing to the close bond between these three groups, is the circumstance that Abraham and Lot are represented as uncle and nephew. Interpreted historically, this relationship points to a clan or group of clans exercising supremacy over another group or sending forth this group as an offshoot. The character of the Abraham-Lot cycle of stories points to the latter contingency. The separation of Lot from Abraham (Gn 13) is decisive in this respect. It is the form in which tradition records the recollection that one group is an offshoot of a larger one. The quarrel between Abraham's 'men' and the followers of Lot is the common occurrence among nomads. They separate into little groups, and, as these groups grow, rivalry ensues, leading to further separation. We are therefore justified in concluding that Moabites and Ammonites were at one time not differentiated from the Hebrews, or rather that all three belonged to a single group, whatever the

Pentateuch hitherto spoken of. When the W. Aramaic dialect had inundated also Central Palestine, the Samaritan-Hebrew Pentateuch was translated into this new country dialect of the Samaritans. Thus originated the Samaritan Pentateuch-Targum, which, according to the tradition of the Samaritans, dates from the 1st cent. B.C., and is attributed to a priest, Nathanael, but which is more correctly derived, with Kautzsch (*PRE*² xiii. p. 350), from the 2nd cent. A.D. This translation was first printed in the Paris (1645) and London (1657) Polyglotts, and the text given there was transcribed in the square character by Brüll (*Das Samaritanische Targum*, 1873-75). After fresh comparison with many MSS, it was published by H. Petermann under the very misleading title *Pentateuchus Samaritanus* (1872-91). The Oxford *Fragments of a Samaritan Targum*, published by Nutt in 1874, have also been used by Petermann in restoring the text of Leviticus and Numbers, as well as the St. Petersburg Fragments published by Kohn in 1876, which are made use of in the 5th part, which embraces Deuteronomy. 'But there are more variants than appear in Petermann-Vollers,' says P. Kahle in his *Textkritische und lexikalische Bemerkungen zum samaritan. Pentateuchtargum* (1898), pp. 8, 11, etc. On the character of this Targum the reader may now compare, above all, the thoroughgoing article of Kohn in *ZDMG*, 1893, pp. 626-97. Kahle (*l.c.* p. 8) remarks that in the Targum 'the Hebrew-Samaritan text is rendered slavishly, word for word.' Yet the transcendentalizing of the Divine and the glorification of Moses show themselves in a still higher degree here than in the Sam. Pentateuch itself.

After the Mohammedan conquest of Palestine (A.D. 637), when Arabic was becoming more and more the medium of intercourse employed by the Samaritans, Abu Sa'id in the 11th cent. translated the Pentateuch into Arabic. (The books of Genesis, Exodus, and Leviticus in this translation have been edited by A. Kuenen, 1851-54). The so-called Barberini Triglott, a MS which was deposited in the Barberini Library at Rome, exhibits in three columns the Samaritan-Hebrew text, the Samaritan-Aramaic, and the Samaritan-Arabic versions.

ED. KÖNIG.

RACES OF THE OLD TESTAMENT.—*Scope and Definition.*—It is essential to the proper treatment of a subject to determine first of all its scope. In the broad sense of the term, the races of the OT include all the peoples that are mentioned within that promiscuous compilation representing a large number of distinctive works and embracing the remains of a literature which covers a period of almost one thousand years of intellectual activity. The character of this literature, as thus defined, makes it natural that the geographical horizon of the OT writers should be practically coextensive with the then existing ethnological knowledge. By actual contact the Hebrews are brought into relationship with the entire group of nations settled around the Mediterranean, as well as with many inland groups to the north, east, south, and south-west of the land which became the home of the Hebrews *par excellence*. The early traditions and the legendary accounts of periods and personages lying beyond the confines of trustworthy knowledge, increase this number by many races of which little more than the names have been preserved. To give an exhaustive account, therefore, of the races of the OT would involve writing a treatise on ancient ethnology.

On the other hand, as ordinarily understood, the races of the OT include primarily those peoples only which stand in close contiguity to the central group in the scene of OT history—the Hebrews themselves; and here, again, a

further twofold division suggests itself, viz. between those which belong to the more immediate ethnic group of which the Hebrews form a part, and those which lie outside of these limits. Confining ourselves in the main to a discussion of the theme in the narrower sense, it will meet our purposes best to treat it under these two aspects.

i. THE HEBREWS AND SEMITES.—The group historically known as the Hebrews, and forming the confederation of tribes to which the name Bēnē Israel is given in the OT, forms part of a larger group known as the SEMITES. By virtue of this relationship, and in consequence of the geographical distribution of the other branches of the Semites, it is to the Semitic family that the races most prominently mentioned in the OT belong. The term Semite is used both in an ethnological and in a linguistic sense. As originally employed by J. G. Eichhorn* at the close of the 18th century, it embraced the peoples grouped in Gn 10 as the 'sons of Shem.' Since, however, it has been ascertained that the peoples thus grouped do not belong to one race or even to allied races, the ethnological application of the term has been modified to designate a race distinguished by the following features: dolichocephalic skulls; curly and abundant hair; slightly wavy or straight strong beard, the colour predominantly black; prominent nose, straight or aquiline; oval face.†

It must, however, be borne in mind that the pure type is comparatively rare. At an exceedingly remote period the mixture of Semites with Hamites and Aryans began, so that except in the less accessible regions of central Arabia it is doubtful whether pure Semites exist at all. So pronounced has this mixture been that some investigators regard the Semites as the product of two races—a blonde and a dark race; but the introduction of such a division is confusing. The mixture has not been with one race but with many races, and hence it is but natural that a variety of types should have been produced. The preponderating type, however, being dark, it is legitimate to conclude that the latter represents the original stock, and that the 'blonde' Semites furnish the proof precisely of that admixture which we know from other sources actually took place.

Where the original home of the Semites lay is a matter of dispute, and will probably never be settled to the satisfaction of all scholars. The drift of scholarly opinion, after vacillating between southern Babylonia, the eastern confines of Africa, southern Arabia, and the interior of the Arabian peninsula, is now in favour of the latter region.‡ It is, at all events, in central Arabia that the purest Semitic type is still found, and, so far as known, it was invariably from the interior of Arabia that the Semitic hordes poured forth to the north-east and north-west and south to establish cultured States or to assimilate the culture which they already found existing.

It is in this way that we may account for the greatest of Semitic States—that of BABYLONIA and ASSYRIA in the Euphrates Valley and along the banks of the Tigris. The course of culture in Mesopotamia is from south to north, and this fact is in itself an important indication that the Semites who took possession of Babylonia came

* *Hist.-Kritische Einleit. in das AT* (Leipzig, 1780), p. 45.

† See, e.g., Brinton, *Races and Peoples* (New York, 1890), p. 134.

‡ For recent discussions of the various theories, see Nöldeke, *Die semitischen Sprachen* (Leipzig, 1877), and his article 'Semitic Languages' in *Encyc. Brit.*⁹; also Brinton and Jastrow, *The Cradle of the Semites* (Philadelphia, 1891), where further references will be found; and more recently G. A. Barton, *A Sketch of Semitic Origins* (New York, 1902), ch. I.

from a district lying to the south of Babylonia. The Babylonians and Assyrians thus form a distinct branch of the Semites, though at the same time furnishing an illustration of the admixture with other races upon which we have dwelt. The Euphrates Valley appears to have been from time immemorial a gathering-place of various nations, and, in passing, it may be noted that the Biblical legend of the confusion of tongues (Gn 11), which significantly takes place in Babylonia, appears to be based upon a dim recollection of this circumstance. So far as present indications go, the Semites upon coming to the Euphrates Valley already found a culture in existence which, however, they so thoroughly assimilated, and on which at the same time they impressed the stamp of their peculiar personality to such an extent, as to make it substantially a Semitic product. Indeed, the presence of this earlier culture was probably the attraction which led to the Semitic invasion from the interior of Arabia, just as at a later date the Semitic civilization of the Euphrates attracted other Semitic hordes towards making a northern movement from this same region. It is among these hordes, pouring out of the steppes of Arabia, and proceeding in the direction of the Euphrates Valley, that we are to seek for the ancestors of the Hebrews.

The sociological process which began thousands of years ago is still going on at the present time, where nomadic groups, attracted by the opportunities of spoil, continue to skirt the regions of culture in the East, with the result that a certain proportion of them are permanently gained for the cause of civilization, and settle in culture centres.* The Biblical tradition which goes back to settlements on the Euphrates—Ur and Harran (Gn 11²⁰⁻³¹)—finds an explanation in such a movement. Forming part of a nomadic invasion, the Hebrews were among those who, allured by the attractions of Babylonian culture, made settlements of a more permanent character along the Euphrates, first at Ur and later farther north at Harran. That, however, these settlements did not involve casting aside nomadic habits altogether, is shown by the Biblical tradition which records a movement of Hebrews from Ur to Harran and thence by the northern route into Palestine. The presence of an Eliezer clan of Damascus in close affiliation with Abraham (Gn 15²) and his band, points to a temporary settlement at Damascus on the route to the west. Once on the west of the Jordan, the Hebrews continue their semi-nomadic habits for several centuries, and it is not until the 11th cent. that this stage in their career is definitely closed.

These movements of the Hebrews, as recorded in a blurred, and yet for that reason not altogether unhistorical tradition, suggest, as already pointed out, the manner in which southern Mesopotamia became a thoroughly Semitic State, the invading Semites absorbing the old culture (whatever that was, and whatsoever its origin may have been), and giving a new direction to the further intellectual, social, and religious development of the Euphrates Valley. This parallel also indicates—what is more important for our purposes—a common origin for the Semites who obtained possession of Babylonia and those who, after moving up and down the western outskirts of Babylonia, entered Palestine. The testimony of language bears out this supposition, for the relationship between Hebrew and Babylonian is such as to warrant our concluding in favour of the descent of the two peoples from one common branch to which the name 'Aramæan' may be given.

It is both interesting and significant to find that

* See Lady Anne Blunt, *The Bedouin Tribes of the Euphrates* (London, 1879), especially chs. xxiii. and xxiv.

tradition preserves the appropriateness of this designation. On a solemn occasion, when the Hebrew, appearing before Jahweh, is to recall his past, a formula is introduced in which he refers to his ancestor as 'a stray' (רָמָה) Aramæan' (Dt 26⁵).

1. The ARAMÆAN branch of the Semites thus assumes large dimensions. Besides the Babylonians and Assyrians and Hebrews, it includes the Semites who settled in Syria as well as the groups of Moabites and Ammonites settled on the east side of the Jordan, while the Phœnicians settled on the Mediterranean coast constitute another Aramæan division or offshoot. Of the relationship existing between Hebrews and Babylonians we have already spoken. When the early contact in the Euphrates district began, of which Biblical tradition preserves a faint recollection, it is impossible to say; nor must it be supposed that the Hebrews at the time of their forward movement from interior Arabia were sharply differentiated from the promiscuous groups of Semites who participated in the movement.

By virtue of the relationship existing between Hebrew and the various Aramaic dialects, particularly between Hebrew and Aramaic in its oldest form,* we are justified in thus placing the group subsequently distinguished as a conglomeration of clans, from which the Hebrews trace their descent, in the same category with that large and somewhat indefinite branch of Semites which we have already designated as Aramæan. While the relationship between Hebrews and Babylonian-Assyrians was never entirely broken off, political or commercial associations being maintained with but short interruptions between Mesopotamia and Palestine from the time of the permanent settlement of the Hebrews to the west of the Jordan, down to the destruction of the two Hebrew kingdoms in the 8th and 6th cents. respectively, this relationship was not so close as that which was maintained between the Hebrews on the one hand, and the Moabites, Ammonites, Edomites, Ishmaelites (or Arabs), Phœnicians, and other subdivisions of the great Aramæan branch, on the other. Among the races occurring in the OT, it is these which occupy the most prominent place in Hebrew history. It seems desirable, therefore, to dwell upon them in greater detail.

The tradition recorded in Gn 19²⁰⁻³⁸ which ascribes the origin of the MOABITES and AMMONITES to an act of incest committed by Lot with his two daughters, simply reflects the hostility between these two nations and the Hebrews. To throw discredit upon an opponent's ancestry is a favourite method in Arabic poetry of expressing one's contempt and inveterate hatred. More significant, as pointing to the close bond between these three groups, is the circumstance that Abraham and Lot are represented as uncle and nephew. Interpreted historically, this relationship points to a clan or group of clans exercising supremacy over another group or sending forth this group as an offshoot. The character of the Abraham-Lot cycle of stories points to the latter contingency. The separation of Lot from Abraham (Gn 13) is decisive in this respect. It is the form in which tradition records the recollection that one group is an offshoot of a larger one. The quarrel between Abraham's 'men' and the followers of Lot is the common occurrence among nomads. They separate into little groups, and, as these groups grow, rivalry ensues, leading to further separation. We are therefore justified in concluding that Moabites and Ammonites were at one time not differentiated from the Hebrews, or rather that all three belonged to a single group, whatever the

* e.g. the inscriptions of Teima (c. 6th cent. B.C.) and the inscriptions of Zinjirli (8th cent. B.C.).

name of that group may have been. That there were other clans or tribes arising from that general group is quite certain, and, as this body of Aramæan tribes moved northwards from the Euphrates Valley and settled to the east and west of the Jordan, they were joined on the road by others. It is not necessary for all the members of the group to have come into Palestine at one time. On the contrary, it is more likely that, owing to circumstances beyond our knowledge, it was a series of waves of emigration that led Aramæan groups away from the Euphrates and by a devious northern route towards lands farther to the west. The Hebrews, Moabites, and Ammonites were carried along by these waves; and, whatever the order in which they came, the motives leading them to the west were the same in all. Language again comes to our aid in confirming this theory of the intimate bond uniting Hebrews to Moabites and Ammonites. The Moabite Stone (see vol. iii. p. 404 ff.), found in 1868 at Dibon, the capital of Moab, and recording the deeds of Mesha, king of Moab (c. 850 B.C.), proves that Hebrew and Moabitish differ from one another as much as and no more than the dialect of northern Germany differs from the speech of southern Germany, while the proper names of Ammonitish rulers and gods in the OT, in default of Ammonite records which have not yet been found, indicate that Hebrew and Ammonitish stood in the same close relationship to one another. That the political relations continued to be hostile from the first differentiation of the three groups, is the natural outcome of conditions which still characterize the districts once occupied by the Moabites and Ammonites.

The case is somewhat different with the EDOMITES. The fact that they do not enter upon the scene until after the Hebrews had crossed the Jordan is significant. The process of differentiation had progressed sufficiently to single out of the Aramæan branch the Hebrews as a distinct subdivision. If tradition is to be trusted, the continuation of this same process which led to the separation of the Abraham and Lot clans, further divided the Hebrews into two subdivisions, one represented by Isaac—Jacob—Israel, the other by Ishmael—Esau—Edom. The double line of tradition, however, complicates the situation considerably. Ishmael and Isaac as 'sons' of Abraham are paralleled by Esau and Jacob as 'sons' of Isaac. To conclude that the Abrahamitic group first separated into two subdivisions, Isaac and Ishmael, and that subsequently another differentiation took place between Esau and Jacob as branches of the Isaac group, seems tempting; but this simple solution of the problem encounters some obstacles. The ISHMAELITES, according to Biblical tradition, are identified with the large body of tribes in central northern Arabia, and the Arabs themselves have accepted this tradition; but the unequal proportion between the two, the Hebrews representing a well-defined group of comparatively small extent, while the Ishmaelites assume the dimensions of a branch of the Semites as extensive and as undefined as the 'Aramæans,' raises the suspicion that the Biblical tradition in this instance is not of popular origin, or at all events not wholly popular, but due to a 'learned' theory which attempted to account for the close racial and the no less close linguistic affinities between Hebrews and Arabs. The theory is naturally interpreted in the OT with due allowance for national pride, so that, while Ishmael is conceded to be the older son of Abraham (Gn 16¹⁵), Isaac is the favourite one (22²). While, again, the tradition is forced to make the concession to historical fact in predicting for Ishmael a large progeny (Gn 16¹⁰⁻¹⁷), and otherwise admitting Elohim's partiality for Ishmael (e.g. 17¹⁸),—witness

the act of circumcision which admits him into the covenant with Elohim (17²³⁻²⁴), and Ishmael's miraculous deliverance (21¹³⁻²⁰),—the general aim of the tradition is to play off Isaac against Ishmael. This is consciously done, and in a manner quite different from the naive way in which in other instances popular tradition is given a literary form. If in addition it be borne in mind that, in the actual history of the Hebrews, Ishmaelites play no part, it seems plausible to conclude that the Ishmaelitic current in the OT tradition is not of popular origin. The Ishmaelites do not dwell in Palestine or in the immediately adjacent districts, and popular tradition takes no interest in groups of peoples with which it has nothing to do. At most, Ishmael's being driven away from the domain set aside for Isaac may recall a settlement in Palestine prior to the advent of the Hebrews; but even this element of historical sediment in the tradition is doubtful, and it seems more plausible to assume that the separation of Isaac and Ishmael is a 'doublet' suggested either by Lot's separation from Abraham or Jacob's separation from Esau, the story itself being introduced to account for the ethnic relationship between Hebrews and Arabs. As such it has its value and, in a certain sense of the word, its justification.

2. The ARABS represent the second great branch into which the Semites may be divided, and as further subdivisions of this branch we may distinguish (1) the Arabs of central and northern Arabia; (2) the Arabs of southern Arabia; (3) the offshoot of the latter in Africa—notably in Abyssinia; (4) the offshoots in modern times of the Arabs of northern and central Arabia in (a) Egypt and the N. African coast, (b) Palestine and Syria, (c) India and the Malay Archipelago.

So far as the OT is concerned, we are interested only in the first two subdivisions. The culture of the Arab branch of the Semites begins in the south—in southern Arabia and in Abyssinia. Which of these is the original and which the offshoot is a question which a number of years ago could have been answered without hesitation in favour of the former, but which now is an open one. During the past two decades, inscriptions have been found in Yemen and in Abyssinia revealing the existence of several important kingdoms in southern Arabia, and indicating both here and on the opposite African coast a noteworthy degree of culture, the age of which is at least fifteen hundred years before our era, and which may turn out to be considerably older.

If the theory which places the home of the Semites in central Arabia be accepted, the probabilities are that, corresponding to a northern movement, there was a tendency for certain groups of Semites to spread towards the south; and if the culture in the south was actually established by them in this way, it would also be natural to suppose that this culture was carried by emigrants from Yemen to Abyssinia. However that may be, the language of southern Arabia, known as Himyaritic,—subdivided into a number of dialects,—and that of Abyssinia, known as Ethiopic, prove a close connexion between the groups inhabiting this district. It is interesting to note that southern Arabia and Abyssinia are mentioned in the famous description of the rivers of Paradise (Gn 2¹¹⁻¹³); for, whatever the origin of the name *Havilah* is, there is little doubt that some district of Arabia is meant,* while the land of *Cush* is, to the writer of Gn 2, Ethiopia.

The historical relations between Hebrews and the Arabs of southern Arabia appear to have been entirely of a commercial character, and these

* Glaeser, *Skizze der Geschichte und Geographie Arabiens* (Berlin, 1890), li. 323-326.

seem to have been confined to the short period of political glory which tradition associates with the reign of Solomon. This commercial intercourse between southern Arabia and Palestine gave rise to the 'Midrashic' tale of the queen of Sheba's visit to Solomon (1 K 10¹⁻¹⁰), to which the Arabs have added as supplement Solomon's visit to Yemen.* The Arabs have also retained the recollection of the twofold division of the branch, and, in the genealogical lists prepared with such infinite care by the genealogists, one branch—the northern—is traced back to Adnan, and the other—the southern—to Kahtan.

The Ethiopians were well known to the Hebrews, and the prophets are fond of introducing allusions to them into their orations (e.g. Is 18¹, Jer 46⁹, Ezk 29¹⁰ 30⁴ etc., Nah 3⁹, Zeph 3¹⁰), although *Cush* does not always stand for Ethiopia.

Coming back to the tradition in Genesis which divides the Hebrews after Isaac into two divisions—Jacob-Israel and Esau-Edom—there can scarcely be any doubt that we have here again a case of a popular tradition and perfectly reliable, in so far as it points to a common origin for the Hebrews and the Edomites. While the Moabites and the Ammonites remained east of the Jordan and the Hebrews moved to the west, the Edomites eventually established themselves to the south and south-east of the Hebrews; though, retaining their nomadic habits of life and nomadic fierceness of manner, they frequently made incursions into the territory of their neighbours. The form of the Biblical tradition would also indicate that the Edomites formed part of the 'Aramaean' emigration that entered the lands to the east of the Jordan in a series of migratory waves, coming by the northern route from the Euphrates district. Jacob and Esau are represented as twin sons of the Isaac and Rebekah clans. The marriage between Isaac and Rebekah, interpreted historically, means that a branch of the Abrahamitic group formed an alliance with another group which, in continuation of the western movement that brought Abraham and Lot to the west, prompted other Aramaean groups to follow the example. Rebekah coming from 'Aram-naharaim' to join the Hebrew group is a proof for the theory above maintained, that the stream of 'Aramaean' emigration to the west continued steadily for an indefinite period, and perhaps never ceased entirely. Alliances between small groups are common among the nomads to this day; but the result is generally that after a time a separation again takes place, not necessarily between the same groups, but in the next generation or two, by which time the growth of the united group has been such as to engender rivalries among the members.

In the case of Jacob and Esau there is another reason for the separation, and one of no small historical moment. It was natural that some at least of the Aramaean hordes, attracted to the Euphrates district by the culture existing there, should have been influenced by the example of this culture to take a forward step in civilization. We may safely set down Babylonian culture as an important factor in bringing about the division of the Semitic nomads into two classes—those of the fiercer grade retaining their nomadic habits unchanged, dependent upon hunting and plunder for their sustenance; and the higher grade, softer in manner, wandering about, followed by their flocks, and continuing nomadic habits chiefly for the sake of the latter and because of the necessity of seeking proper pasturage at the various seasons of the year. Those groups of the Aramaean branch

which became differentiated as Hebrews, Moabites, and Ammonites, attain the higher grade at the time of their entrance into western lands or shortly thereafter, while the Edomites represent a subdivision which either relapses into the fiercer state—a not uncommon experience—or was, for some reason or other, prevented from taking the step forwards which eventually leads to the agricultural stage, and with this the complete laying aside of nomadic habits. Jacob, described as 'a tent dweller' (Gn 25²⁷), represents the nomad on the road to culture, and is contrasted with Esau the hunter—the Bedawi proper* (ib.). A hint of impending change in social conditions is already furnished by the tradition associated with Abraham and Isaac of digging wells (Gn 26¹⁴⁻³²) for the needs of the extensive herds of sheep and cattle which they acquired (v. 14). This being the case, it is not easy to account for the close association of the two groups, Jacob and Esau, representing such different levels of culture, and why there should be, in the case of one of the subdivisions of the Hebrew group, a reversion to the ruder nomadic type. Such, however, is evidently the case, and the Edomites, tracing back their descent to the Esau clan, represent a branch of the Hebrews that remained in a lower stage of culture, while the other steadily advanced till the agricultural stage was reached. The bond between the Israelites and the Edomites appears to have been much closer than that between the Hebrews and any other subdivisions. The rivalry, too, appears to have been keener. There is not merely hatred between Jacob and Esau, but the former adroitly dispossesses the latter, drives him away from his inheritance back almost to the desert, where he takes up much the same sort of life as that led by the Semites before coming into touch with culture at all. Still, the recollection that Israel and Edom are brothers is preserved in the popular mind in quite a different manner from that in which Ishmael and Isaac are so spoken of. A late psalmist (Ps 137⁷) still denounces the treachery of Edom at the time of the downfall of the Southern kingdom as particularly reprehensible, because, as a brother, he should have come to the rescue instead of helping to the downfall of Judah. It lies, of course, outside the province of this article to consider the details of the relationship between Israel and Edom. For our purpose it is sufficient to specify in this general way the relationship existing between the Hebrews and the various subdivisions of the Aramaean and Arabic branches of Semites.

Two other branches of the Arabic group which appear prominently among the races of the OT are the Amalekites and the Midianites. The tradition recorded in Gn 36¹² traces the AMALEKITES back to Esau. Like the Edomites, they represent the fiercer type of the Bedawin. Their first encounter with the Hebrews takes place during the period when the latter themselves are still in the nomadic stage. The rivalry between the two must have been bitter indeed, since the hatred of the Hebrews towards the Amalekites not only survives to a late period, but is inculcated in the Pentateuch as a religious duty (Dt 25¹⁷⁻¹⁹). While originally the name of an Arab tribe settled around Kadesh, the term seems to have come to be applied to roaming bands of marauders in general. It is in this way probably that we are to account for the presence of Amalekites not only at Rephidim (Ex 17⁸⁻¹⁶), but as far north as Mt. Ephraim (Jg 12¹⁵, cf. 5¹⁴). Indeed the Hebrews are molested by Amalekites as late as the days of Saul (1 S 15¹⁻⁹), and it was left for David to drive them

* Well, *Biblische Legenden der Muselmänner* (Frankfurt, 1845), pp. 245-275.

* The Arabic word *bedawi* signifies the 'one outside,' and is therefore the equivalent of the Hebrew phrase 'man of the field' (Gn 25²⁷).

finally back to their desert haunts (1 S 30¹⁻²⁰). The Kenites and Kenizzites settled around Hebron are set down as branches of the Amalekites who joined the federation of the Benê Israel, and this defection must have intensified the hatred of the Amalekites for Israel, and led to atrocities and barbarous treatment of captives on the part of the Amalekites, the recollection of which survived among the Hebrews to a late day.

The application of the name *Amalek* to Bedawin in general finds a parallel in the still more indefinite manner in which the term *Midian* is used by some OT writers. That the MIDIANITES also belong to the Arabic group of Semites is sufficiently shown by their settlement around Mt. Sinai, where we first find them (Ex 2¹⁴⁻¹⁷) described as shepherds. They were evidently regarded as already, in the days of Moses, belonging to the milder class of Bedawin—the nomad on the road to culture; and yet subsequently, in the period of the Judges, the Midianites are in alliance with the Amalekites (Jg 6³). In genuine Bedawin fashion they pounce down upon the Hebrews, who had now become agriculturists, and rob them of their flocks and belongings. At this time they are scarcely to be distinguished from the Amalekites; and the two groups become synonymous with the marauding bands of Bedawin, belonging in reality to a vast number of different tribes who constantly threaten the existence of the cultured States of Palestine.

3. There is still one branch of the Semites to be considered which receives prominent mention among the races of the OT—the PHŒNICIANS. If we were to be guided by the testimony of language alone, the settlers along the northern Mediterranean coast certainly belong to the same branch as Hebrews, Moabites, Ammonites, and Edomites; but the totally different social conditions prevailing in Phœnicia, and the unique rôle played by the Phœnicians in history as merchants and seamen, suggest that another factor is at work here. The theory has been advanced and met with considerable favour, that the Phœnicians were not the original settlers of the coastland of Syria, but came there from their homes, which were originally on the southern coast of Asia Minor, or, as some are inclined to believe, at the mouth of the Persian Gulf. There is, however, not sufficient material to settle so delicate a problem. There is no indication that the population along the Syrian coast represents a mixture of Semites with other races, and our knowledge of Phœnician antiquities is too meagre—and what there is does not reach far enough back—to enable us to specify the historical relationship existing between the Phœnicians and other subdivisions of the Aramæan branch. As long as no evidence to the contrary is forthcoming, we must continue to place the Phœnicians in the same category with Hebrews, Moabites, etc.; and, assuming that they formed part of the general movement of 'Aramæan' groups from Arabia, they became differentiated after settling along the coastland, where they may already have found a seafaring population, whom they gradually dispossessed, just as the Hebrews upon entering Palestine found the country settled by a population whom they in turn drove out.

The relationship between Hebrews and Phœnicians was, again, chiefly commercial, just as between Hebrews and Yemenites. Commercial intercourse led to political alliances; and at one time, in consequence of such an alliance,—in the days of Ahab,—there was danger of the Phœnician cult becoming a serious rival to the national Jahweh worship.

The Phœnicians lead us to consider another group, which entered into far closer relations with the Hebrews than almost any other, and which,

among the races of the OT, occupies a peculiarly prominent and significant place—the CANAANITES. The OT usage of 'Canaan' is not consistent, being sometimes employed to include all of Palestine proper, Phœnicia, and even lands to the east of the Jordan, and at times restricted to Palestine. It is therefore not easy to determine the precise extent of Canaanitish settlements. From the fact that 'Canaanite' comes to be synonymous with the merchant of Phœnicia (Is 23⁸, Ezk 17⁴, Pr 31²⁴), we may certainly conclude that the Phœnicians were regarded as Canaanites, and the further use of the term as a designation of the pre-Israelitish inhabitants of Palestine is an indication of a close relationship between some sections at least of those peoples whom the Hebrews dispossessed and the Phœnicians. But at this point certainty ends. The Canaanite is frequently introduced in the OT in connexion with a number of other groups—the Amorites, Hittites, Perizzites, Hivvites, and Jebusites (*e.g.* Ex 34¹¹), to which elsewhere the Girgashites are added (*e.g.* Gn 15^{20, 21} *). It is quite clear from the way in which these peoples are grouped,—sometimes five being mentioned, sometimes seven, at times only two—Canaanite and Perizzite (*e.g.* Gn 13⁷ 34²⁰),—that they were no longer sharply differentiated in the minds of the writers. Taken together, they constitute the inhabitants of Palestine whom the Hebrews encountered when they attempted to conquer the country; but the survival of the term 'Canaan' as the name for the district, and 'Canaanite' as a general designation for the earlier inhabitants, points to Canaanites as forming the most powerful, and probably also the most prominent, part of the population. It may well be that some of those mentioned in the above conglomeration—notably the Perizzites and Girgashites—were merely subdivisions of the Canaanites that for a time acquired an independent position, but afterwards were again absorbed into the general body of Canaanites. At all events, it is plausible to assume that the interior of Palestine was occupied for an indefinite period, prior to the advent of the Hebrews, by groups of Semites more or less closely related to one another of which the Canaanites became the most prominent.

These Canaanites belonging to the same branches as the Semitic settlers in Phœnicia, the question of their origin is involved in the problem as to the origin of the Phœnicians. Adopting again the general theory above advanced, we may assume a movement similar to that which brought the Hebrews to Palestine to have taken place at a much earlier date. What Hebrew tradition assigns to the days of Abraham appears, then, to have been only a repetition of much earlier events. The Phœnicians and the Palestinian Canaanites would thus represent a subdivision of the Aramæan branch that moved along the Euphrates, and finally passed over by the northern route towards western lands, some settling along the coast and others pushing into the interior.

In the course of time these groups took a step forwards in culture, and became agriculturists. Their villages developed into towns, while those groups living on the coast were lured to seafaring careers.

It was the Canaanites—to use the general name—whom the Hebrews, upon entering Palestine, found in possession, and the wars with them continued for many generations, until finally the Hebrews obtained the upper hand. This contact with the Canaanites forms a most important factor in Hebrew history. By that power of attraction which the higher culture possesses for those of an inferior grade, the Hebrews were

* 'Rephaim' in this verse is an explanatory gloss.

prompted to make the attempt to secure for themselves the towns and cultivated lands to the west of the Jordan. The success of their efforts is followed by the permanent abandonment of nomadic habits, and instead of sheep raisers they become and remain for subsequent centuries tillers of the soil. From a religious point of view, the contact with the Canaanites was also fraught, with important consequences. The national deity, Jahweh, originally associated with the sojourn of the people in the wilderness,—the nomadic period of their existence,—becomes the protecting deity of the fields, and the people do not hesitate to call Jahweh by the name which the Canaanites applied to their field deities—Baal. For a time the amalgamation of the Jahweh and the Canaanitish Baal cult seemed imminent, when a 'national' reaction takes place, and, under the lead of jealous Jahweh-worshippers, the attempt is made to drive the Baal priests with the Baal rites out of the country, just as the worshippers of Baal had been forced out of their possessions. For all that, Jahweh absorbs some of the traits of Baal, and it is not until several centuries later—when Jahweh Himself was on the point of becoming a deity singled out from all others by the ethical character attributed to Him—that the last traces of the old Canaanitish cults also disappear.

How far back the arrival of the Canaanites in Palestine is to be dated is a question which cannot be answered with any degree of certainty. It is safe to assume an interval of several centuries between this event and the movement of Hebrew tribes from the Euphrates Valley towards western lands. The earliest occurrence of the name is in the Tel el-Amarna tablets, dating from c. 1400 B.C., in which we find the name Canaan under the form *Kinnah*, but limited in its application to the seacoast, and more properly the northern seacoast, i.e. Phœnicia. But, at whatever date we fix the entrance of the Canaanites, even they do not appear to have been the first Semitic group that settled in Palestine. Of the groups mentioned so frequently with the Canaanites in the OT—the Perizzites, Hittites, Hivvites, Amorites, Girgashites, and Jebusites—we know unfortunately very little, with the exception of the Hittites and the Amorites. The Perizzites and the Girgashites, it has been pointed out, may have been subdivisions of Canaanites, and yet from the way in which, in two places (Gn 13³⁴), Canaanites and Perizzites are put side by side as comprising all Palestine, one might be tempted to conclude that the Perizzites represented an independent group, which was at one time coequal in importance with the Canaanites. It seems even more certain that the Jebusites and Hivvites had no direct connexion with the Canaanites. Taking this in connexion with the circumstance that in the Tel el-Amarna tablets the term Canaan does not include Palestine proper, it is more than probable that some of the groups mentioned with the Canaanites represent still other settlers. In a notable passage (Gn 15¹⁹) three additional groups—Kenites, Kenizzites, and Kadmonites—are spoken of as occupying the territory later claimed by the Hebrews. That these groups are Semitic is sufficiently indicated by their names, the last mentioned of which, the 'Easterners,' still contains a trace of the district whence they came.

At this period of the Hebrew conquest of Palestine we no longer hear of these groups. They appear ere this to have been driven to the south by the all-powerful Canaanites, and subsequently to the west by the Hebrews. It is quite natural that the traditions regarding these earlier movements should be dimmed. There was no reason why the Hebrews or the Hebrew writers should have been

sufficiently interested to preserve any distinct recollection. Their relations were primarily with the Canaanites. The importance of the latter in the eyes of the Hebrews is revealed in the earlier form of the story of the distribution of mankind as furnished in Gn 9²⁵⁻²⁷, which makes Canaan, Shem, and Japheth the progenitors of the human race; and, on the other hand, the hatred of these rivals of the Hebrews crops out in this same chapter which connects Canaan with Ham—the 'accursed' son of Noah (v. 25).

ii. RACES OF DOUBTFUL ORIGIN.—A peculiar position is occupied by the Amorites and the Hittites. The AMORITES are found throughout northern Palestine as early at least as the 12th century B.C., when we encounter the name *Amurru* (or *Amurra*) in cuneiform inscriptions. So prominent do they become that they furnish to the Babylonian and Assyrian chroniclers the name for the entire district of northern and southern Palestine, and there are indications that the Hebrews, too, at one time gave to the term Amorite an extensive application. In the so-called Elohistic document, 'land of the Amorite' is used in this way.* These Amorites must accordingly have turned to the south, and, indeed, when the Hebrews entered Palestine, they found their way blocked by a large powerful kingdom on the east of the Jordan (see AMORITES in vol. i.). The remarkable statement of Ezekiel (16⁴⁻⁹), that the 'mother' of Jerusalem was a Hittite, and the 'father' an Amorite, points also to the early presence of Amorites on the west of Jordan. To assume, however, that 'Canaanites' and 'Amorites' are synonymous terms representing one and the same population, is not justified. In the Tel el-Amarna tablets the 'Amurru' land is frequently mentioned and always designates the interior of Palestine, though more particularly the northern section; but the name may be carried back still farther. In Babylonian legal documents of the period, c. 2300 B.C., a town Amurru occurs, situated in Babylonia. If we are to conclude from this that the Amorites also came from the Euphrates Valley, we should have still another instance of the movement which brought such various groups of Semites to the west. A more important conclusion that appears to be warranted, is that the Amorites would thus turn out to be settlers in Palestine earlier than the Canaanites, and that the latter represent the group which finally obtains the ascendancy and retains it until the appearance of the Hebrews. That with the conquest of the land by the Canaanites, the Amorites do not disappear, any more than the Hivvites, Jebusites, and other groups, is quite natural, seeing that when the Hebrews conquered the Canaanites the old inhabitants were dispossessed, but, by the express testimony of OT writers, not driven out (Ex 23^{29, 30}, Jg 1^{21, 27-30}).

The question has been raised, notably by Sayce (*Races of the Old Testament*, p. 110), whether the Amorites and other groups of the pre-Israelitish inhabitants were Semites. Much stress has been laid upon the representation of Amorites on Egyptian monuments where they are depicted with yellow skin, blue eyes, red eyebrows and beard, and light but also black hair (W. M. Flinders Petrie, *Racial Types from Egypt*, London, 1887). The Egyptian artists, however, were not always consistent in their drawings, and more particularly in their colourings, as Sayce himself is forced to admit (l.c. 113, 114). Too much importance, therefore, must not be attached to the colouring of the racial types on the Egyptian monuments. Anxiety to produce a pleasing or startling effect was a factor which interfered

* See Steinthal, *Zeits. f. Völkerpsychologie*, 12, 267, and Ed. Meyer, *ZATW* i. 122.

seriously with ethnographical accuracy. But, apart from the colouring, there are no such decided distinctions between Amorites and Judeans on Egyptian monuments as to warrant the supposition that the two belonged to different races or even to different branches of the Semites; and to account for this, as Sayce would have us do, by assuming that up to comparatively so late a period as the days of Rehoboam the population of southern Judaea was still largely Amoritic (*l.c.* p. 112), is simply building a further argument upon a mere supposition. The term Amorite, moreover, has a Semitic sound and appearance, and until better evidence to the contrary is forthcoming we may group them with the same race as the later settlers of Palestine. The Amorites were a warlike people, living in walled towns. The recollection of their prowess survived to a late date, and they became to subsequent generations the giants of olden days. It has become customary in consequence to identify the Amorites with the ANAKIM, REPHAIM, EMIM, and ZAMZUMMIM, or to regard these as so many subdivisions of the Amorites. It is true that the Rephaim and Anakim are occasionally spoken of in the OT as though they were identical with Amorites, but this is due to the fact that 'Rephaim' and 'Anakim' (cf. *e.g.* Dt 21¹¹, 20 31¹¹, 13) are used as generic terms for a powerful race, and no longer as specific designations of any particular group. This, however, does not imply that there were no groups known as Rephaim and Anakim respectively, but that they belong to such a remote past as to become mere names to later generations; and since strength and gigantic stature are invariably ascribed by a later generation to remote ancestors,—in part, no doubt, justifiably ascribed,—we may only conclude from the way in which these terms are used that no definite traditions about these groups have survived. As for Emim and Zamzummin (possibly identical with the Zuzim of Gn 14⁹), they are merely the names of the ancient population of Moab and Ammon respectively (Dt 21¹¹ and 20). While it is no longer possible to specify the extent of the territory of the Rephaim and Anakim, so much appears tolerably certain that these groups, with the Emim and Zamzummin, constitute the oldest inhabitants of Palestine and the district to the east of the Jordan known to us—preceding the Amorites but afterwards commingled through the faintness of tradition with Amorites, just as Amorites in time are not sharply distinguished from Canaanites, and just as the groups Hivvites, Perizzites, etc., come to be viewed in some strata of tradition as subdivisions of Canaanites.

If we are to seek for a non-Semitic race in Palestine at all, we must go back beyond the Amorites to the nebulous Rephaim, Anakim, Emim, and Zamzummin. There are some reasons for actually supposing the pre-Amoritic settlers to have been of a different race, which was gradually subdued by the Amorites both to the east and west of Jordan but the thesis is one which in the present state of our knowledge cannot be proved with certainty, though the fact of the existence of an early non-Semitic population in certain portions of Palestine has now been established by ethnological evidence (see Alex. Macalister in *PEFS*, Oct. 1902, pp. 353–356).

With even greater assurance than in the case of the Amorites, has it been maintained that the HITTITES belong to a non-Semitic race. The problem in this instance is even more complicated, in consequence of the vague and indefinite usage of the term. We find a group of Hittites in the south around Hebron carried back by tradition to the days of Abraham (Gn 23⁵, 7, 10 etc.). These Hittites are also in alliance with Edomites, and in the days of David we encounter Hittites in his army (2 S 11,

cf. 1 S 26⁸). The Egyptian and Assyrian monuments, however, reveal the existence of Hittite settlements in the north along the Orontes as early as the 15th cent. B.C., and these gave the mighty Assyrian rulers a great deal of trouble before they were finally subdued towards the end of the 8th century. The term appears to include a variety of groups which extend northward and westward of the Amorites to the southern and western crests of Asia Minor as well as far into the interior. These northern Hittites do not seem to have anything more in common with those of the south than the name. How this is to be accounted for is an unsolved problem. While the northern Hittites have left numerous monuments containing sculptures and inscriptions, those in the south do not appear to have even reached the stage of culture which produces art and literature. From the Egyptian monuments we catch glimpses of the Hittite physiognomy, and, to judge from these, the Hittites were not a Semitic race; and yet too much stress must not be laid upon these representations. Certainly, we have no sound reason for supposing those of the south to belong to any other race than the Semites. The rather close relations between them and the Hebrews and the Edomites would point to ethnic affinity; and if there is any connexion between the Hittites of the south and those of the north, we may at most assume that the latter became mixed with the non-Semitic population without losing Semitic traits altogether.

iii. NON-SEMITIC AND MIXED RACES.—1. But, while a doubt thus remains as to the ethnic character of the Hittites, there is no question as to the non-Semitic character of a group with which the Hebrews from a certain period came into close though always hostile contact—the PHILISTINES. There is no reason to question the tradition which makes them come from CAPHTOR (Am 9⁷, Dt 2³, Jer 47⁴); and, while the problems connected with the identification of Caphtor have not been entirely solved, still all the indications point towards Crete, and scholars are now pretty generally agreed in regarding the Philistines as pirates belonging to some branch of the Aryan stock, who, attracted perhaps, as were the Hebrews, by the fertile lands of Palestine, forced their way into the Canaanitish settlements, and succeeded in obtaining the supremacy in the entire 'Shephelah,' where they established a number of petty kingdoms. Almost immediately after they entered Palestine, hostilities between Hebrews and Philistines began, and, long after the Canaanites were subdued, the Hebrews still had to contend against the armies of the Philistines. In the days of David their opposition was broken, and, though after the death of Solomon they regained their independence, it was but a shadow of the old power that remained. The interference of Assyria in Palestinian affairs dispelled even this shadow.

We have thus passed in rapid review the large variety of groups in Palestine and adjacent districts with which the Hebrews came into political or commercial contact, and who occupy a more or less prominent place among the races of the OT.

2. Passing beyond the narrower bounds, and yet not leaving Semitic settlements altogether, we have first to deal with the EGYPTIANS. Like Babylonia, Egypt, by virtue of its flourishing culture, proved an attractive magnet which drew the nomads of the Sinai peninsula and adjacent districts to frequent sallies against the outlying Egyptian cities, and, as in the case of the Aramæan advances along the banks of the Euphrates, the higher culture prompted groups now and then to a forward step which led to the partial abandonment of the life commensurate with the Bedawin stage of culture. Egypt, accessible both from the north and

the south, on several occasions fell a prey to invaders who managed to obtain control of the political fortunes of the country. The monuments at Beni Hassan depict most graphically an invasion of foreigners, who are none other than the Semites, entering Egypt, and, as we learn from various sources, gradually becoming powerful factions in certain of the Egyptian districts. The Hyksos dynasty is an illustration of the power which foreigners managed to obtain in Egypt; and whoever may be intended by the Pharaoh under whom Joseph, according to Biblical tradition, rose to eminence, his presence marks the success of one of the Semitic invasions of Egypt. The groups that primarily came to Egypt naturally belonged to the Arabic branch of the Semites, but these were not infrequently joined by those coming from southern and central Palestine, who formed part of the Aramæan movement from the Euphrates Valley towards the west. The higher class of nomads, who were prompted to change their location with a view to securing pasturage for their flocks, would find themselves specially attracted to Egypt in those periods, not infrequent in Palestine, when the insufficiency of rain during the wintry season is sure to be followed by a drought and scarcity of food. It was such an occurrence that led some of the tribes which afterwards formed the confederation of the Israelites to pass down to Egypt, and their numbers, as appears from the form of the narrative in Exodus, were from time to time reinforced by others. In that sense we are to interpret the story which tells of Simeon and Benjamin being kept in Egypt as hostages before the others joined them there, which means simply that certain tribes reached Egypt earlier than others. The narrative in Genesis (46⁸⁻²⁷) makes all the 'twelve' tribes proceed to Egypt, but we can hardly expect a reliable tradition on such a question of detail. So accustomed are the writers of a later age to regard the federation of the twelve tribes as a unit, that they project this union into the remote past, though without historical warrant for doing so. The OT writers, viewing history from the point of view of later theorists, cannot conceive of less than twelve tribes at any time, and suppose that necessarily these tribes clung to one another. We are permitted to assume that certain Hebrew groups left their Palestinian settlements to seek better pastures in Egypt, but to go further and bring all twelve tribes into the district of the Nile is unhistorical, for the sufficient reason that the federation did not exist at this time except in the mind of the OT narrator, who is so fond of genealogies, and attaches such importance to them that he is inclined to place, in a remote past, facts and factors which really belong to a much later age. It is not surprising, in view of the location of Egypt, thus open to invasion from two sides, that its population was of a mixed character. If one may judge from the language of Egypt, the substratum of which has now been ascertained to be Semitic,* the basis of the population is likewise Semitic; but both language and people are largely mixed with 'Hamitic' elements, more particularly Libyan. This element in the course of time appears to obtain the mastery, despite the frequent Semitic immigrations into Egypt, and to such an extent indeed that both the people and the language retain but few Semitic traits.

3. Of the BABYLONIANS we have already had occasion to speak. In the Euphrates Valley, likewise, a mixture of races appears to have taken place at a remote period; but here the situation is just the reverse of what we have found in Egypt, inasmuch as it is the Semitic element which obtains the

supremacy to such an extent as to give to the Babylonian culture, from the earliest period revealed to us by historical inscriptions, a purely Semitic character. But the Egyptians and Babylonians (and subsequently the Assyrians) agree in this respect, that their relations to the Hebrews continue, with but few interruptions, throughout the period of the political existence of the latter. Before the counter movement of Hebrew tribes and other Semitic groups* from Egypt back to the Arabian peninsula takes place, Egyptian rulers enter into close relationship with Palestine, Phœnicia, and Syria. The Tel el-Amarna tablets, so frequently mentioned in the course of this article, are the evidence of this uninterrupted intercourse in the 15th cent. before our era. The establishment of a Hebrew confederacy in Palestine exposes the Hebrews to constant danger of being absorbed either by the rulers of the Nile or by the ambitious lords of the Euphrates Valley and the Tigris. The political history of the two Hebrew kingdoms is largely taken up with the endeavour to steer clear of this danger—an endeavour that ends in failure.

iv. THE TENTH CHAPTER OF GENESIS.—The races hitherto discussed are the ones which play a part in the historical events unfolded in the OT narratives, but they are far from exhausting the races whose existence is recorded in the pages of the OT. The geographical horizon of the OT is remarkable for its wide extent, and indeed there are but few races—e.g. the Chinese and Japanese—which are left out of account in the famous *tenth chapter of Genesis*, which forms our principal source for a survey of the races of the OT in the wider sense, as including all those *known* to the Hebrews, or, more correctly speaking, to Hebrew writers, whether these races had anything to do with Hebrew history or not. The chapter itself in its present form is the result of considerable editing, involving more particularly the dovetailing of two documents, one of which is commonly assigned by modern scholars to the Jahwistic history, the other to the Priestly Code. The composition of the former of these documents is placed in the 9th cent., the latter shortly after the end of the exilic period; but how much earlier the traditions are, and the knowledge upon which the chapter is based, it is quite impossible to say. Apart from some additions in the list of the descendants of Shem, the chapter may be viewed as representing the geographical knowledge of a group of Hebrew writers in the 8th and 7th cent. B.C. The absence of any direct reference to *Persia* is an indication that even the post-exilic compiler took as his point of view conditions existing previous to his own day. In forming an estimate of the chapter, it should, however, be borne in mind that the traditions embodied therein are of a scholastic and not a popular character, and that, while there are no substantial reasons for assuming that the writers had before them geographical lists written in cuneiform or Egyptian characters from which they transcribed their data, the grouping of the races and nations of the world is distinctly the work of Hebrew schoolmen who are guided by learned and not by popular tradition. This is manifest already in Gn 9, the closing verses of which beginning with v.¹⁸ should be studied in connexion with ch. 10.

The three groups into which the human race is divided do not represent a popular point of view. A people's geographical horizon—its *tout le monde*—is limited by its political and social interests. The three sons of Noah in the popular form of the tradition are not the broad subdivisions of mankind, but three subdivisions within the groups in which the Hebrews were more particu-

* See Erman's article in *ZDMG* xlii. pp. 93-129, and Hommel in the *Beiträge zur Assyriologie*, ii. 342-353.

* Ex 12³⁸ speaks of the 'mixed multitude' which left Egypt at the same time as the Hebrews.

larly interested: (a) Shem, by which the Hebrews themselves are meant; (b) Canaan, the predecessors and hated rivals of the Hebrews in Palestine; (c) Japheth, originally designating probably the people of Phœnicia,* with perhaps the adjacent island of Cyprus. These are the three sons of Noah in the original form of the famous blessing and curse (Gn 9²⁵⁻²⁸). In the scholastic recasting of the popular tradition, the three sons of Noah become the progenitors of the human race. SHEM is taken as an extensive term to include a group of peoples who were regarded as ethnically close to the Hebrews, JAPHETH is similarly extended to embrace a large group of races to the north of the Hebrews, while Canaan is replaced by HAM, who is viewed as the progenitor of the group of races to the south of Israel as well as of others who were particularly hostile to the Hebrews. Interpreted in this way, it is manifest that we must not seek for a purely scientific division of the races known to the OT writers, but one in which science is linked to national prejudices and preferences. With these preliminary remarks we may pass to an analysis of this remarkable document, so far as scholarship has succeeded in interpreting it. The suggestion has already been thrown out that the grouping of peoples in the chapter in question is *geographical* rather than ethnic or linguistic, though it may at once be added that the geographical principle is not consistently carried out. The clearest section is that referring to the sons of Japheth (vv. 2-5), the core of which belongs to the post-exilic writers.

1. The *Japhethites* represent groups and races lying to the north of Palestine. Of the 'sons' of Japheth, namely, Gomer, Magog, Madai, Javan, Tubal, Meshech, and Tiras, the majority have been identified. GOMER is the equivalent of the Gimirrai frequently referred to in the inscriptions of Assyrian kings, and represents a promiscuous group of peoples who, forced across the Black Sea by Scythian hordes pressing upon them, settled in Cappadocia. In the early part of the 7th cent. we find these Gimirrai in conflict with Assyria and Lydia, and shortly after the middle of that century they are driven still farther to the east. MADAI is Media, JAVAN represents the Ionians, while TUBAL and MESHECH are found in juxtaposition in the Assyrian inscriptions under the forms Tabal and Muski; and the location of these groups may with certainty be fixed in central Asia Minor. There remain only Magog and Tiras. Outside of the occurrence of MAGOG here (and in 1 Ch 1⁸, which is copied from Gn 10²) the name is found twice in Ezekiel (38³ and 39⁶). In the former of these passages it is a gloss to Gog, indicating the identity of Gog and Magog in the mind of the annotator; while in the second passage the LXX has 'Gog,' which the Hebrew text also exhibits in Ezk 38^{14, 16, 18} and 39¹. In view of this, it seems reasonable to suppose that Magog is a slip for Gog, the M being superinduced perhaps by the M of the following Madai. The error, once introduced, was carried over into Ezekiel, once as a variant, and in the second case as an actual reading instead of Gog. From the passages in Ezekiel the views connected with Gog may be clearly deduced. The name is a collective one, for a whole series of peoples coming from the north, and threatening at one time, during the 7th cent., to engulf the Semitic world much as the Goths and Vandals threatened the Roman empire. The danger was averted, but so great was the terror inspired by the northern hordes that Gog survived to a late period as the symbol of wickedness and evil power—a pre-Christian Antichrist. The identification of TIRAS is not certain. The view

* The expression 'dwelling in the tents of Shem' (927) points to a land adjacent to Palestine.

of Ed. Meyer (*Gesch. d. Alterthums*, i. p. 260), which associates Tiras with the Turusha, a sea faring nation mentioned in the Egyptian inscriptions of the 13th cent., and whom the Greeks reckon to the Pelasgians, has been generally accepted; but recently W. Max Müller (*Orient. Lit.-Zeitung*, 15th Aug. 1900, col. 200) prefers to regard Tiras as a doublet—a variant of Tarshish mentioned in v.⁴, and to identify both with Turs, i.e. the land of the Tyrsenians or Italy.

As subdivisions of Gomer, there are mentioned Ashkenaz, Riphath, and Togarmah. The passage in Jer 51⁷, where ASHKENAZ is placed in juxtaposition with Minni and Ararat, is conclusive for placing the Ashkenazites in western Armenia, while the occurrence of a personage Ascanios as a leader of the Phrygians and Mysians in the *Iliad* (ii. 862 and xiii. 79) has, together with some other evidence (see ASHKENAZ in vol. i.), led some scholars to fix upon the Phrygians as the group more particularly denoted. For the location of RIPHATH there are no certain data, while TOGARMAH appears to be some part of Armenia, whence horses and mules were exported to the markets of Tyre (Ezk 38⁹).

As of Gomer, so of Ionia, a number of subdivisions are noted—Elishah, Tarshish, Kittim, and Dodanim. It has become customary to identify ELISHAH with Hellas; but since W. Max Müller has shown satisfactorily that Alashia, occurring in the Tel el-Amarna tablets, is the ancient name for Cyprus, it seems natural to connect Elishah with this term (*Or. Lit.-Zeit.*, 15th Aug. 1900, col. 288). TARSHISH has commonly been identified with the Phœnician colony Tartessus in southern Spain; KITTIM with Cyprus, in view of the town Citium; and DODANIM, for which the LXX as well as the parallel passage (1 Ch 1⁷) has 'Rodanim,' with Rhodes. There are, however, serious objections against all these identifications. One can hardly suppose that a writer would jump in this wild fashion from Hellas to Spain, then back to Cyprus, and then on to Rhodes. The very frequent references to Tarshish—no fewer than twenty-five times in the OT—make it certain that an intelligent reader knew where to look for it. But while there was one Tarshish, whose location was well known, which probably lay in Spain, it does not follow that 'Tarshish' in all passages refers to this place. There is significance in the juxtaposition with Pul (probably an error for Put, or Punt) and Lydia in Is 66¹⁹. This suggests another Tarshish adjacent to Asia Minor; and, while in many if not most of the passages the location in Spain suits the context, in Gn 10 and in some other instances we do not appear to be justified in going so far to the west. Whether Kittim is really the city of Citium in Cyprus has been questioned by both Winckler and Müller (see *Or. Lit.-Zeit.*, 15th Aug. 1900, *ib.*). If Dodanim is really a corrupt reading for Rodanim, the identification with Rhodes may be admitted, but we cannot be certain that the LXX reading and the one in 1 Chron. do not represent an intentional change with a view of suggesting this identification. All therefore that can be said with regard to Elishah, Tarshish, Kittim, and Dodanim is that we must probably seek for them among the larger islands of the Mediterranean and Aegean Sea—preferably among those adjacent to the southern and western coasts of Asia Minor. On this assumption we can understand the reference in v.⁸ to the 'islands of the nations,' which appears to be a convenient manner of designating the minor islands of this region. The groupings of these four names is based on a tradition which regards the people meant as offshoots of Ionia on the Asia Minor coast. It does not, of course, follow that 'the sons of Japheth' represent necessarily subdivisions of the Aryan race. As already pointed out, the

writer of Gn 10 has but vague notions regarding racial affinities of nations, whereas his geographical views are quite clear and definite. Still it so happens that Asia Minor, from the western coast far into the interior, was at an early date the seat of Aryan settlements, and in the 7th cent. the greater portion of the population belonged in all probability to the Aryan group of races.

2. The 'sons of Ham,' as the second division, embrace the races of the south, so far as known to the Hebrews, CUSH being Ethiopia, MIZRAIM the equivalent of Egypt, while the evidence which identifies PUT with Libya—so already Josephus—is still the most satisfactory available. At the same time, it would appear from the passage in Is 66¹⁹ (above referred to) as well as from other evidence (see Winckler, *Alt. Forschungen*, i. p. 513, note), that there was another country, Put, situated near Lydia, and designating probably some island or group of islands in the Aegean Sea. In most of the passages in the prophetic books in which Put is mentioned, it is this region and not the Put of Gn 10⁶ which is meant. The introduction of CANAAN at this point and the grouping with the 'Hamites' is not to be taken as an indication that in the mind of the writer the Canaanites came from the south. The mention is due to the hostility which existed between the Hebrews and Canaanites, and which prompted the writer, in obedience to popular prejudices, to place the Canaanites with the 'accursed' race. The same spirit is responsible for the insertion (vv. 8-11), which places the *Babylonians* and *Assyrians*—whose ultimate control of Palestine was already imminent at the time when the section was written—also with the sons of the 'accursed' son of Noah, though it is possible that the confusion of Cush = Ethiopia with the *Cossæans* (a people to the north-east of Babylonia), may have been a factor also in bringing about this result. As offshoots of Cush, there are mentioned Sheba, Havilah, Sabtah, Raamah, Sabteca, and as offshoots of Raamah again, Sheba and Dedan. Of these seven districts, Havilah and Sheba and Dedan can be fixed with sufficient definiteness to form starting-points for the general determination of the rest. HAVILAH is certainly some district in Arabia—probably on the western coast.—SHEBA is a portion of southern Arabia, while DEDAN, to judge from the juxtaposition with Tema in central Arabia (Jer 25²³, Ezk 25¹³), must be sought in the interior of Arabia, extending considerably towards the north. The remaining names appear likewise to have been designations for other portions of the Arabian peninsula, more particularly the western and south-western sections. Unless we assume that the tradition is utterly without foundation, we must perforce conclude that Cushites settled in large numbers on the western coast of Arabia from the southern extremity to a point considerably north. Similarly, in the subdivisions of Egypt (vv. 13-14) the certainty that the LEHABIM are Libyans, and that PATHROS is Upper Egypt, justifies the conclusion that the NAPHTUHIM and CASLUHIM are to be sought in northern Africa, even though the precise identification is still doubtful. The introduction of the *Philistines* in v. 14 is, without much question, a gloss which has been inserted into the text at the wrong place. It would come appropriately after the mention of the CAPHTORIM,—i.e. probably Cretans (see above),—and the gloss itself, which connects the Philistines with Caphtor, rests upon the traditions embodied in such passages as Dt 2³, Jer 47⁴, Am 9⁷. There, again, the bitter hostility between the Hebrews and the Philistines appears to have been the factor which prompted the association of the Canaanites and Philistines with the descendants of Hamites.

EXTRA VOL.—6

As offshoots of the Canaanites a large number of groups are mentioned, most of which are known to us from the actual relations existing at one time or the other between them and the Hebrews. Such are the Jebusites, Amorites, Gergashites, and Hittites, while the situation of Zidon, Simyra, Hamath, and Arvad is perfectly definite. The other groups, ARKITES and SINITES, therefore belong to this same region between the Phœnician coast and eastern Syria. How unimportant, in the mind of the writer, ethnological affinity is may be judged from the introduction of the HITTITES in the form of a gloss in v. 15 and as an offshoot of Canaan. Whatever and wherever the Hittites were, they certainly were not closely allied to Canaanites. The name itself designates, as already intimated, a promiscuous group of peoples whose settlements at one time covered a good portion of the interior of Asia Minor, whose culture and general character have little in common with Canaanites. The importance of the Hittite settlements in Syria adjacent to the territory covered by Canaanitish groups has led to the mention of Heth, by the side of Zidon, as an offshoot of Canaan. It thus appears that the second group—the Hamites—represents a greater mixture of totally distinct races than we encountered in the case of the Japhethites. Hamites, Semites, Aryans, and Turanians are thrown together without any scruples.

3. The remainder of the chapter, vv. 21-22, is taken up with the favoured group—the *Shemites*. It is evident from a superficial survey of the list that it cannot originally have belonged to the preceding enrolment of nations. One and the same writer would not have placed Assyria with Cushites (v. 11), and a few verses later on made Assyria an offshoot of Shem (v. 22). Nor is it conceivable that in one part of a document the Lydians should have been placed with Egypt (v. 18) and in another with Aram (v. 22). Again (vv. 28, 29), we encounter Sheba and Havilah among the sons of Shem, whereas in v. 7 they are grouped with Cushites. Quite peculiar to this third section of the chapter is also the long genealogical chain—Arpachshad, Shelah, Eber, Peleg, and Joktan,—whereas, in the case of the Japhethites and Hamites, at most a double chain is furnished. The longer chain, in the case of the Shemites, suggests a relationship between this section of the tenth chapter and such a chain as is found in the eleventh chapter. Here as a matter of fact we have the 'doublet' of our section, for vv. 10-26 present a genealogical table of Shemites introduced as a preface to the narrative of Abraham. Comparing these two lists, it will be found that the Shemites in the narrower sense consist of two branches which meet in the series Arpachshad, Shelah, Eber. With the latter the division begins, the Abrahamic group tracing descent to PELEG, one of the sons of Eber, while the other branch starts with another son, JOQTAN. In Gn 10²¹⁻²⁹ the subdivisions of Joktan are given, and the section thus complements the genealogical chain of the Pelegites in the 11th chapter. There is no difficulty in determining the region where the writer places these two branches of Shemites, or, more strictly speaking, Eberites. The descendants of Peleg are represented by the Aramæan settlements along the Euphrates with the gradual extension of these groups into the district to both sides of the Jordan, while the Joktanites represent those who passed on to the south and west of Arabia. The situation of Sheba and Havilah has already been referred to. HAZARMAVETH is identical with Hadramaut along the southern coast; and HADORAM, UZAL, OBAL, and the rest must likewise be sought in the region of Yemen. Only in the case of the mysterious OPHIR is it possible

that the writer intends to have us take a leap over to the African coast (see Peters, *Das Land Ophir*, 1902, who has made out a strong case for locating Ophir in the district near the Zambesi river in southern Africa). Roughly speaking, the twofold division of the Shemites corresponds to the customary division of Arabia into Yemen and Sham (or Syria), the 'right' and the 'left' land, or, as it was mistranslated by Latin writers, Arabia *Felix* and Arabia *Infelix*. Gn 10²¹, where Shem is referred to as the 'father' of all 'the sons of Eber,' reveals the real sentiment underlying the genealogical lists of vv. 24-25 and 11:10-25. The two branches—the Pelegites and Joktanites—comprise those groups which, in his opinion, are genuine Shemites, the only Shemites worth speaking of according to his view, though perhaps not the only ones he knew of. The inclusion of south Arabian tribes is rather significant, and strengthens the thesis maintained at the beginning of this article, which makes central Arabia the starting-point for Semitic emigration in two directions. However this may be, it would appear that a later writer, not satisfied with this narrow scope given to the Shemites, saw fit to add as separate subdivisions Elam, Assyria, Lud, and Aram, embracing what he considered the *Mesopotamian branch* of the Shemites, Elam being to the east of Mesopotamia, Assyria the general term for Mesopotamia itself, Aram the designation for the district to the west of Assyria, while LUD (following upon Arpachshad) is one of the puzzles in the chapter. The identification with Lydia is out of the question. That it may be some textual error—*we-Lud* being superinduced by the *Arpachshad yalad* of v. 24—is not impossible. If, however, the reading be accepted as correct, the most natural suggestion would be to place Lud to the north or north-east of Mesopotamia. The attempts to identify ARPACHSHAD have hitherto failed. Even Cheyne's proposal (ZATW xvii. (1897) 190) to separate the term into two words, ארפ (Arap = Arapelia) and כשד (Kashed = Chaldæa), which is the most plausible of the many suggestions offered, does not commend itself; and it would appear, indeed, that Arpachshad is no more a district than Sheba, Eber, or Peleg, but in reality only the name preserved by tradition of some ancient group to which the Eberites traced their descent. If this be so, the name is out of place in v. 22, and has either been introduced by the writer, whose chief aim it was to add Elam, Assyria, and Aram as a Mesopotamian branch of Shemites to the south Arabian and Syriac-Palestinian branches, or has in reality been brought in by an error, ארפכשד ילד (v. 22) being a 'doublet' of ארפכשד ילד (v. 23). At all events, it appears to be clear that Elam, Assyria, and Aram represent a third Shemitic branch added by some writer to the original twofold division. Of the subdivisions of Aram—Uz, Hul, Gether, and Mash—Uz, though not definitely marked off, is the region of Hauran, extending, however, considerably to the south; MASH (for which 1 Ch 1¹⁷ has *Meshech*) may be identical with the Mons Masius between Armenia and Mesopotamia, while HUL and GETHER are altogether obscure, and it would be idle to hazard any conjectures at present.

The addition of Aram narrows still further the scope of the Pelegites, who are thus practically confined to the groups of Hebrews in Palestine and their neighbours directly to the east of the Jordan. The omission of Babylonia in this addition of a Mesopotamian branch is an index to the age of the writer who added it. Not, indeed, that we are to conclude that he belongs to the period when the supremacy of Assyria over the south was so undisputed as to justify the application of 'Assyria' to the northern and southern Mesopotamian dis-

tricts, for, as a matter of fact, the distinction between Babylonia and Assyria was at all times maintained. The omission is intentional, and similarly the inclusion of Elam among the descendants of Noah's favourite son is also dwelt upon with intent. There can be little doubt that *Elam* is merely another designation for Persia in the mind of the writer. The reign of Cyrus, with whom brighter times for the Judean exiles set in, was a sufficient reason for glorifying Persia at the expense of Babylonia. The writer was willing to permit the hated Babylon to be founded by a descendant of Ham, but Persia belongs to the favoured race; and Assyria, which for more than a century had been merely a name without substance, could also be magnanimously included, since consistency demanded that the country adjacent to Persia should belong to the same group. The writer, however, takes his revenge upon Babylonia, ignoring the name entirely and substituting that of her own hated rival Assyria. We are therefore brought down to the end of the Exile for the addition of the Mesopotamian branch of the sons of Shem. Once more we observe that ethnic affinity is an unimportant factor in the grouping—geographical proximity counts first, and natural preferences and dislikes second. Still, in the case of the 'sons of Shem' as in that of the Japhethites, it so happens that all those enumerated go together ethnically. With the exception of the *Elamites*, who are Aryans, the members of all three branches of Shemites are also to be grouped as subdivisions of a single race, only that it must be borne in mind that not all the subdivisions are enumerated; and that some which unquestionably belong here, e.g. the Canaanites with their numerous branches, are to be found in the Hamitic division, while some of those in the Japhethite group, not yet definitely identified, may likewise turn out to be members of the Shemitic race. See also following article.

In this survey, necessarily defective, of the important tenth chapter of Genesis, the chief aim has been to present the view taken of the races of the ancient world by a Hebrew writer, or, more exactly, by Hebrew writers. Two features stand out prominently in this view—firstly, the breadth of the writers' horizon; secondly, their indifference to the ethnic relationships among the peoples grouped together. The main factors in determining this group are, again, two—(1) geographical affinity, and (2) natural dislikes. It is the combination of these two factors that leads to many of the inconsistencies in the grouping that we have noted. The writers are not merely interested in those races with which the Hebrews have come in contact, but extend their view to those which stand outside of this limit, and yet they do not pass farther than Elam and Armenia in the east; the western limits are the islands of the Mediterranean adjacent to the southern and western coasts of Asia Minor; they take in all of northern Africa, and embrace Arabia from the extreme south up to the mountains of Syria. The aim of the writers being to include all mankind, the limitations of the chapter fairly represent the bounds of historical knowledge at the time of composition. The races of the OT in the larger sense, and as revealed by this chapter, cover the civilized States grouped around the Mediterranean, the Red Sea, and the Persian Gulf, together with the less cultured races and tribes of this district. While the tenth chapter of Genesis occupies a unique place in the OT by virtue of the large number of races and peoples enumerated, yet the prophets furnish the proof that the knowledge evidenced by this chapter was not exceptional. A trait of the great prophets is their fondness for including in their view many other nations besides the people whom they addressed.

The Book of Amos opens (chs. 1-2) with a series of denunciations of a variety of districts: Damascus, Gaza, Tyre, Edom, Ammon, Moab being introduced as a means of heightening the dramatic effect when Judah and Israel are reached. Isaiah (chs. 13-23), Jeremiah (46-51), and Ezekiel (21-32 and 38, 39) similarly have a series of 'oracles' directed against nations near to and remote from the Hebrews, and in addition to this they incidentally introduce many others by way of illustration to their arguments. So, e.g., Ezk 38 is a miniature reproduction of Gn 10. The prophet enumerates in the course of his oration Gog, Meshech, Tubal (v.²), Persia, Ethiopia (Cush), Put (v.⁴), Gomer, Togarmah (v.⁶), Sheba, Dedan, Tarshish (v.¹³). Elsewhere (ch. 27) we encounter Tyre (v.³), Zidon, Arvad (v.⁸), Persia, Lud, and Put (v.¹⁰), Javan, Tubal, Meshech, Togarmah, Dedan, Aram (vv. 10-16), Arabia, Sheba, Raamah, Eden, Assyria (vv. 22-28). Through these references, the explanation of the races mentioned in Gn 10 is considerably advanced, though new problems are also presented by the mention of nations not otherwise known. So in the two chapters of Ezekiel under consideration we encounter for the first time Persia, Arabia, and also Eden.* The omission of Persia in the Genesis list (though referred to probably in the supplemental mention of Elam) has already been commented upon. In the case of ARABIA, it is the name rather than the race that is new; while EDEN—corresponding, perhaps, to *Bit-Aduni* in cuneiform literature and occurring with HARAN and CANNEH (probably an error for Calneh)—is covered in Genesis by Assyria and Babylonia.

More important, however, than the variation in nomenclature and the additions, to be gathered from the prophetic orations, to the ethnological phases of the OT, is the circumstance that the prophets in question should have an acquaintance with so many races. The prophets would not have referred to these many nations had they not been certain of being understood by the people to whom they address themselves. From this point of view, the prophetic books reveal the existence of an international intercourse in ancient times on a much larger scale than is ordinarily supposed. The tenth chapter of Genesis is an illustration of this general acquaintance with the races of a considerable section of the ancient world; and while the list rests in part on a theoretical basis, and is prepared for a scholastic purpose, yet it cannot be doubted, in view of the evidence furnished by the prophetic books, that a majority of the peoples there mentioned are races with which, either politically or commercially, the Hebrews came into direct contact.

In this way the treatment of the races of the OT resolves itself, after all, into a consideration mainly of those associated with the Hebrews. While, therefore, the distinction made at the beginning of this article may be maintained [(a) the subdivisions of the Semitic race and of the pre-Israelitish inhabitants of Palestine, (b) the non-Semitic and mixed races with whom the contact was less constant and in many cases less close where it did exist], the races introduced from the purely theoretical point of view form a comparatively small minority. To be sure, the underlying principle of the chief source for the larger view of OT ethnology which divides the whole of mankind into three divisions is deprived by modern ethnological investigation of its scientific value. The races enumerated under each one of these divisions do not, as we have seen, necessarily form a homogeneous

group. The distribution being controlled largely by the geographical factor, it was not to be expected that this should be the case, quite apart from the fact that an ancient writer could hardly be expected to have the ethnological attainments required for such a method of grouping. As a conspectus, however, of races known to the Hebrews, largely through contact and in part through learned tradition, the tenth chapter of Genesis not only retains its intrinsic value, but serves as an indispensable aid in supplementing the ethnological material, furnished incidentally by the narrative which follows the remarkable history of the Hebrews, from the early time of the departure of the first group from the Euphrates Valley through the nomadic period, with its frequent changes of residence, on to the conquest of Palestine and the growth of the federation of Hebrew tribes into a nation in the full sense of the word, with a distinct political organization, down to the political decline and fall of this people, which survived in a strange way even the loss of national independence.

MORRIS JASTROW, JR.

SEMITES.—The term *Semite* (*Shemite*), forming the adjective *Semitic* (*Shemitic*), is derived from the patriarch Shem, who in the Bk. of Genesis is named as the ancestor of most of the peoples known to ethnologists and now popularly designated as 'Semites.' The account of Shem and his descendants in Gn 10 is partly genealogical and partly geographical, and does not exactly correspond to a scientific classification. Hence we take the family tree of Genesis as the starting-point of our inquiry rather than as an exhaustive summary. None the less, any description or discussion of the Semites as a whole must have chiefly a biblical interest, and that for two main reasons. In the first place, the actors in and makers of Bible history were Semites, who did their deeds and said their say within the Semitic realm. Further, the truth of God, as it is revealed in the Bible, was not merely conveyed to the world through an outward Semitic channel; it was moulded in Semitic minds, coloured by the genius of Semitic speech, and put to the proof for the education of the world in Semitic hearts and lives. It is perhaps enough in this connexion to remind the reader that Moses, David, Elijah, Amos, Hosea, Isaiah, Jeremiah, St John, St. Paul, and the Son of Man Himself, were Semites. The religious and moral significance of the race thus indicated may be further illustrated by citing the fact that Tiglath-pileser, Nebuchadnezzar, and Hannibal are the only Semites of the

* Gebel, Damascus, and Helbon also occur in ch. 27, but as names merely of cities, and need not therefore be taken into consideration. So Zidon (27⁹) is covered by Canaan and by Tyre in Gn 10.

pre-Christian time whose names stand for world-moving achievements outside the realm of religion and morals.

The principal list of the descendants of Shem appears in Gn 10²¹⁻³⁰. This whole table proceeds from one source, J, except that, according to the critics, v.²³, which gives a list of the sons of Shem, belongs to P. These immediate descendants are Elam, Asshur, Arpachshad, Lud, and Aram. Of these names the third and fourth are unfortunately obscure, and it would be unprofitable to discuss here the various explanations that have been offered. *Lud* is generally supposed to stand for Lydia; but the reason for such an enormous interval of separation from the other Semitic peoples is far to seek. Possibly this brief word (לוד) very early underwent some change, and does not represent the original. It is almost certain that this is the case with *Arpachshad*, since the latter half of the word is the stem of *Kasdim* (but see p. 82*), the Heb. word for *Chaldeans*, who lived in Lower Babylonia. The whole word, thus assumed to be modified in MT, would naturally stand for a portion of the territory to the N.W. of the Persian Gulf.* The first in the list, *Elam*, though historically non-Semitic, must have had many Semitic immigrants. *Asshur* is the well-known people and country of Assyria. The last named of the sons of Shem is *Aram*, that is, the Aramæans. The sons of Aram are next enumerated (v.²³). Thereafter the interest is concentrated upon the progeny of Arpachshad. His grandson is *Eber*, who is not only the ancestor of the Hebrews, as is fully detailed by P in ch. 11, but also of the Arabs (10²⁸⁻³⁰). We may now attempt a present-day view of the descendants of Shem, referring to any of the lists of Genesis as occasion demands, and thus working back from the known facts of modern research instead of attempting to work downward from the indistinct hints of tradition.

I. CLASSIFICATION OF THE SEMITES.—The surest token of racial affinity is ordinarily the possession of a common language or of closely related idioms. It is not an infallible test; for it may happen that through inherent weakness or stress of fortune a tribe or a nation may be absorbed by another, and lose its own form of speech. On the other hand, it very rarely happens that a race predominant in numbers or political influence loses its language and adopts that of an inferior or degenerating race. Hence, while even the exclusive use, by a large community, of a given language or dialect does not necessarily indicate that the race is unmixed, it may be reasonably held that the predominating racial element in that community originally spoke the current language. Again, as regards the degrees of relationship between kindred peoples, it should be remembered that the most valid kind of linguistic evidence is that afforded by the common possession of grammatical or structural elements, and of terms for the most fundamental ideas and the most indispensable or rudimentary arts and appliances of life. These simple and elementary working principles are far-reaching in their application, and will need to be taken into account in all that is said, either as to the original Semitic race and its language, or as to any of the derivative races and their languages or dialects.

On the evidence of language and of historical

* Some such people seems necessary here, since Arpachshad is indicated as the ancestor of Aramæans and Arabs alike, and the region in question is their natural dividing-point. Moreover, it was peopled also by Semites from the earliest known period. Confirmation of this view is afforded by the fact that, according to v.²⁵, Peleg, 'in whose days the earth was divided,' was a descendant of Arpachshad, while the reference to the dividing of the earth points to Babylonia as the place of his residence, according to 11³², which is also the production of J.

distribution combined, these peoples are made to fall into two great divisions, the *Northern* and the *Southern* Semites. Roughly speaking, the Southern branch of the family had its permanent and proper home in the peninsula of Arabia; while the Northern division was included in the region bounded on the N. by the modern Kurdistan, on the W. by the Mediterranean, and on the E. by modern Persia. We have, however, except from linguistic induction, no indication of a time when either the Northern or the Southern division formed by itself a homogeneous whole, much less of the presumptive earlier stage when all Semites together were comprised in a single community. On the contrary, our earliest archæological evidence reveals to us these regions as occupied by several families or groups more or less nearly related. Thus, while Arabia has long been known as the home of a single people, though of many tribes, speaking a common language, the earlier record is of peoples speaking and writing distinct though closely related languages. Similarly, the Northern division, as far back as we can see through the mists of antiquity, is found to be made up of distinct families. A tentative comprehensive grouping may be made as follows:—

SOUTHERN SEMITES	(Northern Arabians.
	Sabæans.
	(Abyssinians).
NORTHERN SEMITES	(Babylonians and Assyrians.
	Aramæans.
	Canaanites.
	(Hebrews).

The above classification would describe the distribution of the Semites as a race during that period of ancient history when they were the ruling power of the world, roughly speaking from B.C. 2000 to B.C. 500. It should be added that the hypothesis of a Southern branch is surer than that of a distinct Northern group, and that some scholars (as Hommel and Zimmern) prefer to assume an East-Semitic division—Assyro-Babylonian, and a West-Semitic—Aramæan, Canaanite, Arabo-Abyssinian. It is, indeed, so difficult to unify the Assyrian, the Aramaic, and the Canaanitic languages, that if we were to use linguistic data alone, it would, for working purposes, be allowable to assume these four separate units: Assyro-Babylonian, Aramæan, Canaanite, and Arabo-Abyssinian.

(A) SOUTHERN SEMITES.—(a) *Northern Arabians*.—The term 'Arab,' which at present connotes the only survivors on any large scale of the Semitic races, was originally of very restricted significance. Ancient usage confines it to a comparatively small district in the north of the peninsula E. of Palestine, extending sometimes over the centre of the Syro-Arabian desert. In this sense the word is used in the Assyrian inscriptions, in OT (e.g. 2 Ch 17¹¹ 21¹⁶ 22¹ 26⁷, Is 13²⁰ 21¹³, Jer 3² 25²⁴, Neh 2¹⁹, Ezk 27²¹), as well as in the lately discovered Minæan inscriptions. It was not till shortly before the Christian era that it was enlarged so far as to include the whole of the peninsula.* Besides the 'Arabs,' there were several other important ancient communities in N. Arabia. Most of these are embraced under the names of the descendants of Keturah ('the incense-bearer'), and of Ishmael, in Gn 25 and 1 Ch 1²⁸⁻³². We may cite as of historical fame Midian, the northern Sheba (cf. Job 1¹⁵), Dedan, Asshur (Gn 25^{2, 18}), Nebaioth, Kedar, Dumah, Massa (cf. Pr 30¹ 31¹), Tema, and Jetur. The general distinction between Keturah and Ishmael is that the latter stretched farther to the

* This extension came about largely through the fact that the original 'Arabs' were the most important tribe living in the neighbourhood of the Greek and Roman possessions in Syria and Mesopotamia. The classical writers use the name not only in the narrower but also in the wider sense, e.g. Herod. iii. 107.

east and south. According to Gn 25¹⁸, the tents of Ishmael were pitched as far east as Havilah on the south-west border of Babylonia (Gn 2¹¹). In the west, however, their several routes intersected and their pasture-grounds were contiguous. Dumah (Is 21¹³) and Massa, Ishmaelites, lay in the path of the Keturites, Midian, Dedan, and Asshur. But these by no means exhaust the category of N. Arabians. We must fairly include those of the 'Edomites' who are historically and locally Arabs. Thus not only Teman but Amalek is reckoned to Edom in Gn 36¹¹⁻¹⁸. Furthermore, towards the east side of the desert is the great tribe or country of Mash, which with Uz, the home of Job in the west, is allotted to the Arameans in Gn 10²³, though, according to Gn 36²⁸, the latter is given to the Horite Edomites. The explanation of the anomaly comes from the important fact that the Arameans, who, as a rule, did not wander in ancient times far from the valley of the Euphrates, stretched out in certain regions favourable to pasturage, to mix and mingle with the more purely nomadic tribes of the desert.

(b) *Šabæans*.—We call the ancient inhabitants of S.W. Arabia Šabæans, because this people created the most powerful and extensive kingdom of all that region. Many other tribes, however, sometimes their subjects, also flourished. Among these were the Katabanians, directly north of Aden, and the Himyarites to the east. The latter were so important that scholars formerly called the ancient S.W. Arabians generally by their name. Recent researches, however, which have disclosed elaborate architectural remains, and brought to Europe hundreds of inscriptions, the work of Šabæans, more than confirm the ancient fame of Šheba, and vindicate its claim, not only to a wide commerce and a productive soil, but to an influential empire as well.* A branch of the same people formed a less known nation, whose recently found inscriptions have suddenly brought it into great prominence—the Minaeans. The proper home of this people was the west coast of Arabia between Yemen and Mecca. That they were not identical with the Šabæans proper is abundantly proved. Their language is, in fact, a distinct dialect of the S. Arabian or 'Šabæan.' Their inscriptions are found over a very wide range of the west country, from the heart of Yemen itself to the very borders of Palestine. Their abundance, as well as the contents of some of them, show that both regions alike were then subject to them. That was, however, before the rise of the Šabæan power, and therefore long before the Christian era. They are possibly alluded to in 1 Ch 4¹, 2 Ch 26⁷, where the word employed (צִיִּי) reminds us of the original name *Ma'in*. See, further, art. SHEBA in vol. iv.

(c) *Abyssinians*.—This term is more appropriate than the current 'Ethiopians,' since that is the proper designation of the people of the Nile Valley above the First Cataract, in other words the biblical Cushites. That is to say, the Ethiopians are an African race, while the Abyssinians are fundamentally Semitic. At a very early date, far earlier than is generally supposed, a migration from S.W. Arabia, of a people closely akin to the Šabæans and Minaeans, was made over the narrow sea to the cooler and healthier region of the Abyss. highlands. Here they developed a community which long remained uninfluenced by African elements, and cherished close relations with the Arabian mother-land. Its principal seat was Aksum, the centre of a powerful monarchy, which

at length, in the 4th cent. A.D., conquered, and for a time held, Yemen and W. Arabia.* The Abyssinians have long since ceased to be a pure Semitic race or to speak a pure Semitic idiom; though 'Ethiopic,' as their language is called, is still their sacred tongue; and the Semitic type is still unmistakable in a large section of the population.

The attempt thus made to bring the Southern Semites under distinct groupings is only approximately successful. Besides the tribes already enumerated, many others are found, particularly in the S.E. and E. of Arabia, which, though Semites, have at least no permanent historical association with any of the groups. Very interesting, however, is the tabulation in Gn 10²³⁻³⁰, which brings the most prominent of these remaining communities under one category. Thus, among the sons of Joktan son of Eber, we find, along with Ḥazarmaveth, the modern Ḥadramaut, or the coastland east of Yemen, also Šheba and, to our surprise, OPHIR and ḤAVILAH. Unfortunately, the remaining nine tribes or localities cannot as yet be absolutely identified. But inasmuch as Ophir is almost certainly to be found on the E. coast of Arabia, and Havilah S.W. of Babylonia (but see above, p. 81^a), the presumption is that they represent families intermediate between these remotely separated districts. In brief, the summation seems to point to a close connexion between the N.E., E., S., and S.W. inhabitants of ancient Arabia. Furthermore, the brotherhood of Joktan and Eber, the father of Peleg and grandson of Arpachshad, points to a tradition of kinship between the ancient Babylonians and the remotest S. Arabians. These are matters deserving serious attention.

(B) *THE NORTHERN SEMITES*.—Of far more importance to the Bible student than the Arabians and Abyssinians is the Northern branch of the Semitic family. Fortunately, it is also not very difficult to indicate the several divisions of the Northern Semites, and their local distribution. Taking them up in the order of their primary settlements from east to west, we have first to do with those dwelling by the lower waters of the Euphrates and Tigris.

(a) *Babylonians and Assyrians*.—In that region which Gn 2 describes as the cradle of the human race, lived a people whose history, traced not simply in their language, but also in their architectural remains, and even in their literary monuments, goes back to a period far beyond any other known to men. We call this people summarily *Babylonian*, from the name of the great historical capital. But Babylon or Babel did not come into prominence till about B.C. 2250. We have to regard the whole surrounding country as having been, for centuries and even millenniums before that era, divided up among a number of city-States, having a longer or shorter history of narrower or wider dominion. These communities we have also to consider essentially Semitic. The hypothesis of a so-called 'Sumerian' civilization and 'Sumerian' language, preceding the rise of the Semites, is in its current form the result of hasty and superficial theorizing, and the present writer is convinced that it will have to be essentially modified. As neighbours to the Semites, and more or less mingling with them from time to time, were a foreign people, probably more than one people, who contributed some important elements to their mythology and civic life, with corresponding terms to their language. Who they were and whence

* Its ancient capital was Ma'rib, though San'a, three days' journey to the west, was a city of greater renown, and is the present capital of Yemen. Thus the Šabæan kingdom long comprised the whole of Tihāma, the S.W. coastland of Arabia. It also extended itself far both to the east and north.

* That they were separated from the Minaeans and Šabæans at a very remote period is proved by the fact that their language, though more akin to the Šabæan than is the Arabic, is yet quite distinct from the former, whose written characters it borrowed, while it is also much less closely related to the Šabæan than is the Minaean dialect.

they came cannot as yet be said. Possibly they were of a race akin to the Elamites across the Tigris, or to the Kassites of the highlands to the north of Elam. The name 'Sumerian' as applied to them is, in any case, a misnomer; and the supposed Sumerian language is possibly only the Semitic Babylonian, or 'Assyrian,' written according to a system developed alongside of the popular syllabic from the original ideographic, and preserving the essential features of the latter. There are, it is true, many phenomena of this peculiar idiom which such an hypothesis does not explain. On the other hand, no one has yet succeeded in constructing a reasonable or consistent grammar of the supposed language, though good material is abundant. Until this is done, the Semite has a right of possession, precarious though it may be. Many invasions of Babylonian territory were made by non-Semitic peoples from the most ancient times, especially Elamites and Kassites, but the language, the religion, both State and popular, and the civilization as a whole, remained always essentially Semitic down to the time of Cyrus and the Persians. Distinctive of the Babylonians, although adopted by other people, was their mode of writing in wedge-like characters, which, however, is far from representing the original ideographs. Distinctive of them especially were their culture, their inventive genius, their intellectual enterprise and love of knowledge. They were thus not only prominent among the Semites, but were also the most influential of all the peoples of antiquity, except the Hebrews, Greeks, and Romans. Indeed, when we consider their early development among the races of men, and the indirect influence of their genuine ideas, we may regard them fairly enough as the primary intellectual movers of the world.

The *Assyrians* were of the same race as the Babylonians, and in all probability an offshoot from them. The name is derived from the city of *Ashur*, which was founded at an unknown early date on the west of the Tigris just above its confluence with the Lower Zab, which formed the normal southern boundary of the kingdom of Assyria. The Assyrians used the Bab. language in its purity. Indeed we usually call this language 'Assyrian,' because it was principally from the monuments of Assyria, and not from those of Babylonia, that our knowledge of it was first obtained, towards the middle of the 19th century. Unlike Babylonia, which contained many large cities, Assyria proper had but few, the principal being Nineveh and the surrounding fortresses. The Assyrians had virtually the same institutions as the Babylonians, with many of the same deities, and the same modes of worship. They were inferior to them in intellectual enterprise and culture, but superior in the military art, and in capacity for organization. They would appear, moreover, to have suffered less from the irruptions of outsiders, and therefore to have preserved, on the whole, a more purely Semitic racial type. It should be remarked, however, that the biblical lists make out the Assyrians and a portion of the Babylonians to have been of Cushite descent (Gn 10⁸⁻¹²), perhaps in view of the mixture of races that had gone on in Babylonia (but cf. also p. 81*). According to the same account (v.¹¹), Assyria was settled from Babylonia. See, further, artt. ASSYRIA and BABYLONIA in vol. i.

(b) *The Aramaeans*.—The second great division of the Northern Semites, the biblical 'Aram,' had as its proper home a much larger range of country than any of the others. Within historical times the Aramaeans had their settlements at various points on both sides of the Lower Tigris, to the west of the Lower Euphrates, in Mesopotamia, and

in Syria south as far as Palestine. Indeed it is impossible to say with certainty what was their original centre. They seem to have been equally at home herding cattle for the markets of Babylon, driving caravans along the Euphrates, or holding bazaars in the crowded cities of Harran and Damascus. A partial explanation of their ubiquity and versatility is found in their genius for trade and commerce. They were *par excellence* the travellers and negotiators of the ancient East. What the Phœnicians achieved by sea, they with almost equal enterprise and persistence attained on the land. To them was largely due the commercial and intellectual interchange between Babylonia and Assyria on the one hand, and the western States, particularly Phœnicia, on the other. They had their trading posts even in Asia Minor, through which the Greek cities appear to have obtained much of their knowledge of letters and the liberal arts.

It is possible to make certain restrictions of the general fact of the wide extension of the Aramaeans. Until the 12th cent. B.C. they are not found in large settlements west of the Euphrates, though doubtless many isolated expeditions had from time to time crossed the River. They appeared in great numbers, with huge herds of cattle, upon the grazing grounds within reach of the Bab. cities. They also formed numerous settlements on the upper middle course of the Euphrates, especially on the left bank, and between that river and the Chabor. Here was Mesopotamia proper, the Aram-naharaim (or 'Aram of the two Rivers') of OT. Here also was Harran, a city of enormous antiquity, held in historical times principally by Aramaeans. After the fall of the Hittite dominion in Syria, Aram. immigration either went on apace, and Carhemish, Arpad, Aleppo, Hamath, Zobah, and, last and greatest of all, Damascus, were colonized and enriched by them. In the time of David (c. 1000 B.C.) they are found firmly planted in Syria (2 S 8). From the 10th to the 8th cent. B.C. decisive importance attached to the rôle of the 'Aramaeans of Damascus' (the 'Syrians' of EV). But their westward career did not end with the political decay of Damascus. By the 3rd cent. B.C. Palestine, which politically had become in succession Babylonian, Egyptian, Assyrian, Neo-Babylonian, Persian, and Greek, spoke popularly an Aram. idiom. After the rise of Christianity and the complete destruction of the Jewish State, the Jewish church perpetuated one dialect of Aramaic and the Christian Semites another. The Euphrates was the general dividing-line between W. and E. Aramaic, just as it had for many centuries parted the two main divisions into which the Aram. race had fallen. The vitality of Aramaism is attested by the fact that, while the popular dialects of Syria and Mesopotamia soon yielded to Arabic after the establishment of Islam in the 7th cent. A.D., Syriac, the principal E. Aramaic dialect, flourished as a literary language till the 13th cent., long after all traces of Aram. political influence had completely disappeared. See, further, art. ARAM in vol. I.

(c) *Canaanites*.—For want of a better term, we give this name to the pre-Hebrew inhabitants of Palestine and Phœnicia, with their descendants. We class them as Semitic by reason of their language, their civil institutions, and their religion, all of which reveal the purest type of Semitism. It is true that the Phœnicians of the coastland differed surprisingly from the inhabitants of the interior in their pursuits and mental habits. But common to both are 'the language of Canaan' (Is 19²⁸), and analogous forms of Baal worship. As to their place of departure from the common camping-ground of the Semites we are

again left to the widest sort of inference.* Of interest is the question as to the direction from which the Canaanites came into their historical abiding-place. The answer is: from the north or east; for if they had come from the south they would have spoken Arabic, or some dialect of South Semitic nearly akin to Arabic. That they were not the primitive inhabitants of Palestine is clear from the Bible statements as well as other evidence. We may for convenience call the earlier residents 'Amorites,' a people whose antiquity may be inferred from the name 'Land of the Amorites,' given to the country in the remotest times by the Babylonians. The Amorites were possibly not Semitic. The most significant fact about them is that there is no indication that they ever occupied the lower coastland, though they had settlements on both sides of the Jordan. They survived as a community longest in the east, where they were finally absorbed by Moabites, Ammonites, and the invading Hebrews.

The most striking feature of the civic and social life of the Canaanites was their residence in small city-States, independent of each other, and only confederated, if at all, under stress of common danger. This tendency to mutual repulsion was exhibited even among the Phœn. cities, which, however, partly on account of their foreign colonizing experience, became more disposed towards voluntary federation. The pursuits of the two branches of the Canaanites were not more dissimilar than their fortunes. While those of the interior remained isolated, exclusive, and comparatively uncultured, those of the coastland became the most cosmopolitan, and, in a material sense, the most directly serviceable to mankind of all their race. While the one did not survive for more than a generation or two the Heb. occupation of Canaan, the other, in the political world yet not of it, utilizing and subsidizing the great world-powers in the form of tribute-giving, following their own way to opulence and commercial supremacy, survived not only the Heb. monarchy, but the Assyrian, the Bab., the Pers., and even the Macedonian empire, succumbing at last to the Roman alone.

It may be added that the various tribes mentioned in the Hexateuch as inhabiting Palestine are in all probability merely local subdivisions of the Canaanites, and not co-ordinate independent races. An exception is made of the HITTITES by those who hold them to have been immigrants from Syria, where they preceded the Arameans. It is a matter of surprise that in Gn 10 the Canaanites, as well as the people of Middle Babylonia, are associated with the people of Upper and Lower Egypt (Cush and Mizraim). The explanation, probably, is that the Egyptians are partly of Semitic origin, and that there existed in Palestine, as well as in Babylonia, from very remote times, a population supposed to be akin to the Egyptians, with whom the later inhabitants mingled. The PHILISTINES were probably a non-Semitic people, possibly from the island of Crete, whose settlement in Palestine was made not earlier than the 14th or 13th cent. B.C.

(d) *The Hebrews.*—By this name we have to understand, not Israel alone, but all the Hebraic peoples, including as well the Edomites proper, the Moabites and Ammonites, whom the traditions of Israel with good reason claim as kindred. Their larger affiliations are not easy to make out. At least Israel and Moab spoke 'Hebrew.' But this was the language of Canaan; and they may have

* As to their places of settlement on the west coastland it is noteworthy that the Phœn. maritime cities extend to the north of Lebanon, while the Canaanites of the interior are not found to a certainty anywhere except south of that mountain range. The opportunities of trading by sea perhaps account for this local divergence.

acquired it by immigration, just as the Edomites learned Arabic. Our best guide is the biblical record, according to which Abraham, their common ancestor, of the line of Arpachshad, Eber, and Peleg, came from Ur of the Chaldees, in the west of the Lower Euphrates. This implies Bab. kinship. But as belonging to a family of shepherds he was likely to have Aram. associations, since Arameans abounded in all the neighbouring pasture-grounds. It is in accordance with this hypothesis that we find him sojourning in Harran, the great Aram. settlement in Mesopotamia. His kindred there were always reckoned as Arameans; and the immediate ancestor of the Israelites, though born and reared in Canaan, is called a 'stray Aramean' (Dt 26⁹). But none of the Semites show such a racial admixture as do the children of Israel. Primarily of Bab. affinity, their association with the Babylonians is attested by the common traditions of these two most highly endowed branches of the Semitic race. The residence in Egypt did not add any new elements to the already acquired Aramean. Nor does it seem probable that all of the Hebrews of Canaan joined in the migration to Egypt with the family of Jacob. But both before and after the permanent settlement in Canaan large accessions were made of Arab. derivation (Kenites and others), while we have also to take account of the absorption of much of the Can. population after the conquest. It was therefore not till shortly before the founding of the monarchy that the people of Israel assumed that fixity of racial type popularly known as 'Hebrew.' What kept the community together through endless vicissitudes of fortune, what still gives Israel even now a bond of spiritual unity, is not purity of race, but steadfastness of faith in J', the old-time God of Israel. At the same time it is manifest that, so far as descent is concerned, the Hebrews must be taken only secondarily as one of the divisions of the Northern Semites.

ii. HISTORY OF THE SEMITES.—It appears, therefore, that we have to reckon with four primary branches of the Semitic stock: Arabians (and Sabæans) in the south; Babylonians, Arameans, Canaanites in the north. From the Southern branch the Abyssinians are a secondary offshoot; from the Northern, the Hebrews. When we seek for the original home of this oldest of civilized races we are pointed to a region in N. Arabia, probably not far from the Lower Euphrates. The Semitic civilization is essentially of nomadic origin. N. Arabia is the geographical centre of the race. It is much more likely to have peopled the surrounding highlands than to have been peopled from them. The Arabic language is upon the whole nearest the primitive Sem. speech, as it is by far the oldest and purest of all living tongues, and its speakers in Arabia belong to the oldest and purest of races. Again, the Egypt. language has an important Sem. admixture; and it must have been from Arabia that this element was derived. We assume that the Northern Semites—Babylonians, Arameans, Canaanites—lived long together apart from the Arabs, who tended always to the centre of the desert.*

The order of divergence seems to have been as follows:—The ancestors of all the Semites remained in their desert home for an indefinitely long period before the decisive separation took place. Very early, however, apparently even before the Sem. language was fully developed, a section of the tribes leavened the N. African population

* The first of all the Semites to form fixed settlements were the Babylonians. Since the 'Hebrew' language shows on the whole closer phonetic relations with the 'Assyrian' than does the Aramaic, it follows that the speakers of the former, or the Canaanites, must have lived longer together with the speakers of the latter, or the Babylonians, than did the Arameans.

with a strong and persistent Sem. element. It is not yet certain whether the transit was made across the Isthmus or over the lower entrance of the Red Sea. Recent discoveries of remains of primitive Egyptians in Upper Egypt seem to point to the latter route. Possibly there was a very early movement of Semites along E. and S. Arabia, from which came the African migration. This must have preceded the Sabeian development. Next, the tribes representing the Northern Semites moved northwards, not yet attaining to fixed settlements, or at least not to life in cities. From these the Aramæans branched off as northern nomads. The ancestors of the Babylonians and Canaanites still held together for a time, while yet civic life and government were unknown. Next came the settlement of the Babylonians between the Lower Euphrates and Tigris, where they found an inferior alien population, which they subdued or absorbed. The Canaanites, parting from them, moved westward across the wilderness till they reached the highlands of Palestine and the sea. The Phoen. tradition that the fathers of the family came from the shores of the Persian Gulf, may perhaps be an authentic reminiscence of this memorable movement. It was not till many ages later that the Hebraic clans made a similar and still more fateful migration to the Land of Promise. A long residence of all the Arabian tribes upon the oases of the central desert preceded the departure of the S. Arabians and their gradual occupation of the coast of the Red Sea and the Ocean. Still another interval elapsed before a migration took place over the sea to Abyssinia.

Some faint conception of the antiquity of the Sem. race may be gained from a consideration of its oldest literary monuments. We now have access to specimens of the language of the Babylonians as it was written between 5000 and 4000 B.C. It there presents an aspect differing not at all from that which it exhibits over three millenniums later. That is to say, it is a language showing signs of advanced phonetic degeneration, separated by a decisive stage of phonological and structural change from the Heb., still more from the Aram., and more again by an enormous interval from the South Sem. dialects. How many thousands of years we have thus to add to what we may call the historical period, as above indicated, cannot be said. Backward beyond that period we have still to take into account the ages that intervened between the Sem. migration into Africa and the separation of the South and the North.

For biblical study the history of the *Southern Semites* is of comparatively little significance. The interests of the OT centre in Palestine; and it was not till long after the Christian era that the life and thought of our race were affected by any decisive movement from the south. The Arabs played no part in the world's history till the time of Islam. But it would be a mistake to exclude, on that account, Arabia entirely from our historical survey. In the first place, S. Arabia was in the earliest known times a region of much greater importance than it was during the later period of Israel's history. It would appear that wide stretches of grazing land were occupied by great tribal confederations, some of which at certain periods at least assumed the dignity of kingdoms. In very remote times also the mineral productions of gold and precious stones were more abundant and valuable than they are now. The Bab. inscriptions bear testimony that in the fourth millennium B.C. the liveliest intercourse was maintained, and that by overland routes, between Babylonia and E. and W. Arabia,—and it would even appear that Arabs at one time obtained control of Babylonia. On the other hand, Gn 14 mentions

what was apparently no exceptional instance of an expedition from Babylonia in the 23rd cent. B.C. to the peninsula of Sinai. In the next place, we learn from the recently discovered Minæan inscriptions that this people had established a flourishing trade and even a kingdom of their own on the west coast of Arabia before the rise of the kindred kingdom of Sheba, that is to say, before the time of Solomon, and that with the aid of writing they had attained to a fairly high degree of civilization. Lastly, it must be remembered that many Hebrews resided for a whole generation in Arabia, that thence its population was perpetually recruited, and that the biblical literature makes great account of the wisdom, piety, and patriarchal simplicity of various tribes of the Arabian borderland.

Outwardly considered, the Bible story of the career of Israel is an episode in the history of the *Northern Semitic* communities. That history begins with the first Sem. settlements in Babylonia. Here agriculture was first practised with large and rich results. Thereupon followed trade by river, sea, and land in days when Zidon and Tyre were still untenanted rocks, and the fertilizing waters of the Nile still flowed to the sea through an uncultivated waste. Cities one after another were built, cities famous in tradition and history, each the centre of a little kingdom, each with its own patron deity, its own temple and priesthood, and its own priest-king, such as were Akkad, and Sippar, and Nippur, and Erech. In these days—perhaps as early as 6000 years B.C.—Ur of the Chaldees and the no less renowned Eridu were unknown, ancient as they are; for the waters of the Persian Gulf then rolled over their future sites.

The next stage was that in which individual cities began to extend their dominion widely and to form little empires of their own. One city after another thus arose to power, until there came to be a few independent kingdoms instead of many. These, however, could not all survive in the rivalries and ambitions of that time and country, and so there came to be two dominant centres, the one in Northern and the other in Southern Babylonia. About B.C. 4000 we find Akkad in the north aiming at dominion, not only over Southern Babylonia, but over the most productive regions of Arabia and Syria, as far as the Mediterranean. This, however, we have reason to believe, was not the first great 'empire.' It is only the first that is fairly well known as yet. The centre of authority was also sometimes in the south, where, among the monarchies of B.C. 3000 and onwards, Ur of the Chaldees occupies a prominent place. The term of this alternating dominion lasted very long. In the 23rd cent. B.C. the rule was broken by an invasion of the Elamites, of whose subsequent domination Gn 14 gives a partial record. Not long thereafter the city of Babylon came to the front, and was made the capital of a united Babylonia, a position which was never abdicated till the close of the Sem. régime. But foreign rule was not at an end. After a lengthy period of native control, Kassites from the eastern highlands broke in upon Babylonia and held sovereign sway from the 18th to the 13th century. This is the period of the political decadence of Babylonia, due not merely to the domination of a foreign dynasty, but to the rivalry of a kindred nationality. For the result of the gradual rise of Assyria was that Babylonia played no world-moving rôle till its revival under the Chaldean dynasty at the close of the 7th century B.C.

The early history of Assyria is obscure. Beginning very early with the growth of the city of Asshur, it gradually extended northward, mainly

on the east of the Tigris, till it touched on the mountains of Kurdistan. The kingdom proper was never very large, but the race had a genius for war, and more capacity for government than any of the other ancient Semites. Its steadily cherished purpose was to secure the dominion in W. Asia already claimed by Babylonia, and to enlarge it till it should embrace the world. It took many centuries to reach the summit of power; but the idea was at length in a measure realized. By far the most important incident in this process of Assyrian extension was the prolonged and bitter strife with Babylonia, ending in the total subjugation of that venerable empire.

Bible students are concerned primarily with the people of Revelation, and secondarily with the actors in the events that prepared the way for that people and determined their providential destiny. From these points of view we are able to look at the history of the N. Semites as one great connected series of events co-operating towards the making and the discipline of Israel. In this 'increasing purpose' each one of the great divisions of the N. Semites played an important part. The home of Israel was to be in the West-land, more particularly in Palestine. This region from the remotest known times was of special interest to the inhabitants of the East. Thither came from the East the Can. immigrants. Thither followed them in course of time the slower-moving Aramaeans. Thither came the Hebrews themselves, also from the further East, as to a land of promise. Thither, before and after the earliest and latest of these permanent emigrants, came the all-dominating Babylonians, for conquest and still more for exploration and for self-enrichment. Normally, until the 16th cent. B.C., the whole of the West-land was under the sway of Babylonia. And when its political control was relinquished, its intellectual influence remained, so that near the close of the 15th cent. the Bab. language and its cuneiform writing were the international means of communication between the remotest regions. Even letters from Mesopotamia, Syria, Phœnicia, and Palestine, not to speak of Assyria and Babylonia itself, were written therein to the court of Egypt, 300 miles up the Nile. This state of things at length passed away, because Babylonia and Assyria spent their force upon one another, and thus both alike lost their hold upon the West.

It was in this period, which we may fairly call exceptional in the history of ancient W. Asia, that the opportunity for independent action came to the peoples of the western coastland. It was then also that the Egyptians, who in their whole history never successfully interposed in Asia, except when the Babylonians or Assyrians were enfeebled or quiescent, essayed to conquer Palestine and Syria. It was in this period, too, that the Hittites arose to power in Northern and Central Syria, and contended long and bitterly for supremacy with the invaders from over the Isthmus. Within the same limits of time, Israel, emerging from the obscurity and shame of Egypt, began to play its rôle in Palestine. Then was enacted the earlier half of its unique history, including its conquest and absorption of one branch of the Canaanite race, and its 'brotherly covenant' (Am 1st) with the other, and culminating in its greatest external power and splendour under David and Solomon. Then also were formed the settlements in Syria of the Aramaeans, which became so fateful for Israel in its 'hundred years' war' in its cruel suffering, and its moral and spiritual chastening after its own internal dismemberment.

But the Bab. idea of Western dominion, inherited

by Assyria, was at length realized. Assyria was the first of Sem. nations to learn how to govern as well as to subdue the territory of its rivals. After intermittent attempts at conquests, progress westward was surely made and maintained from the 9th cent. onwards till the middle of the 7th. The Aramaeans were crushed; and Israel, repressed for a time, arose again to prosperity under Jeroboam II. and Uzziah. But its 'day' also came at last. N. Israel was obliterated and added to the realm of Assyria, while Judah was made an Assyrian vassal. Till near the close of the 7th cent. B.C. Assyria remained the undisputed mistress of W. Asia, not simply controlling the other Sem. communities, but making most of them an administrative portion of her own empire. Thus it came to pass that the individuality of the various communities was gradually destroyed, that one was distinguished from the other less by racial connexion than by traditional usages and spoken language. Ethnical terms were generalized, so that Western seafaring men and merchants came to be known as 'Phœnicians' or 'Canaanites,' inland traders and travellers as 'Aramaeans,' and at a later date also learned men and astrologers as 'Chaldeans.' The general revolution of which this phraseology is a symptom was immensely accelerated by the irruptions of northern barbarians. Kimmerians, and Scythians, which took place during the later years of the Assyrian dominion. The same influx of foreigners hastened the fall of Assyria, which was in any case inevitable, on account of the impossibility of holding together for ever a multitude of petty communities by centralized force alone.

But when Nineveh fell, in B.C. 607, its ruin was utilized by new exponents of the ancient Bab. spirit, the Chaldeans from the shores of the Persian Gulf. Combined with them, and foremost in the attack upon Nineveh, were the Aryan Medes—a people new to dominion, but the precursors of a movement which was to put an end to the rôle of the N. Semites. In the partition which followed the conquest, the Chaldeans retained the proper Sem. domain, while the Medes claimed the highlands to the east and north. The régime of the Chaldeans was stern and strenuous, though not so cruel as that of the Assyrians. Egypt, which had been subdued and then given up by the later Assyrian empire, made a futile attempt, during the brief interregnum, to occupy Syria and Palestine. It was thrust out by Nebuchadnezzar the Chaldean. Egypt itself was in due time visited and disciplined within its own domain. The kingdom of Judah, removed from Egypt, control, was put under bond to the Chaldeans. Repeated revolts brought about at last the destruction of Jerusalem and the kingdom, and the exile of the people.

But internal decline effected a decay of the Chaldean empire almost as swift as that of the Assyrian. A round seventy years limited its duration. Its destruction also was accelerated by an Aryan power. Cyrus the Persian, beginning his career as the head of a little province of Media, had become lord of the vast Median dominion, the conqueror of Lydia, and the ruler of a territory stretching from the Indus to the Ægean Sea. Babylon fell to him in the summer of 539, and with its transfer into Aryan hands the political sway of the N. Semites was for ever ended.

The rule of Cyrus was tolerant and humane. Under it the principle of delegated power, unknown to the Semitic rulers, was put in force. Under the comparatively genial sway of the Persians, many of the old Sem. communities, Bab., Aram., Can. (Phœn.), and Heb., continued to exist, and some of them to flourish. The Aram. people, in small communities, survived in greatest

numbers, and taught their language to most of the old N. Semitic realm. But Jerusalem and Tyre were long the most outstanding representatives of the Sem. genius. Surviving longest as centres of influence, they recalled to the world the ancient power of the Sem. mind and spirit. The one handed over to Europe the method as well as the example of a world-wide commerce. The other, in the more potent and more enduring realm of religion, continued to verify and to publish the essential truth about God and man and duty.

It was, above all, in this region of thought and feeling that the Semites did their work for humanity. In their front we place the community of *Israel*, with all its feebleness and insignificance. It was under the vassalage to Assyria and Babylonia that the prophets and poets of Israel uttered those words which form the most precious legacy of all ancient time. And it was after the national life had been finally extinguished that the ancient Church abjured false gods for ever, and first realized the idea of local and individual worship apart from the central sanctuary. Thus was prepared the way for that final epoch, when He who was not only a Semite and a Hebrew but the Son of Man, did away with ritual, priesthood, and caste, and erected His temple in the heart of humanity. Thus a greater service was done for the world by the most potent of the forces of Semitism under political disability and decline, than any which had been wrought by the mightiest of Semitic empires in the days of their power and pride.

iii. CHARACTERISTICS OF THE SEMITES.—It has been stated above that the Sem. civilization is essentially of nomadic origin. We may go further, and assert that the character of the people was vitally affected by their early habitual mode of life. Probably no race in the world's history has had such a prolonged experience of tribalism as a preparation for its wider active career among the nations. The general sketch already given of the early history of the Semites may give some indication of the conditions of their life in those distant ages. The inland Arabs of the present day present the nearest surviving analogy, changed though the type has been from the ancient prototype. A better representation, though still far from adequate, is afforded by the picture which the Arabian historians and poets have drawn of the manners and pursuits of their countrymen in the centuries before Islam: the migrations of their tribes, their alliances, their feuds, their forays and raids, their revenges, their stormy passions, their loves and hates, their swift growth and decline, their superstitions, their monotonous activity, their impulsive energy. But the correct estimate, as nearly as it may be reached, can be gained only by the use of the imagination, trained in the inductions of prehistoric archaeology. By a process of reduction and elimination we may arrive at an approximate view of primitive Semitic society.

We must not imagine the Semites shortly before their separation as one large community swayed by a common leader, obeying common laws, and inspired by common memories. We have rather to think of a multitude of small communities, some of them scarcely more than parasitic unorganized hordes, speaking various closely related dialects, constantly intermingling with and modifying one another, and ranging over a vast extent of wilderness land. Hunting still engrossed the attention of many of the tribesmen, though immense herds of cattle were the property of others. They had learned something of the practical uses of metals, especially of copper and iron, besides gold, silver, and several precious stones. The various tools and weapons essential to the business of hunters and shepherds are also represented by

words common to the several derivative languages. They were close observers of animals, wild and domesticated, and of various species of plants. They would even appear to have employed some rude form of writing, though none which was later developed into a general system. Their common vocabulary is naturally deficient in legal terms; for their only law was usage and prescription, and their only court that of the family or tribal chiefs. On the other hand, the religious habit and consciousness had found copious expression.

The reciprocal antagonism of a multitude of tribes, so long maintained in spite of frequent alliances and absorptions, and guarded by the tribal badges of social and religious usage, had its most marked result in the permanent political character of the later Sem. communities. Mutual repulsion, even between the States most closely allied by blood or common interest, was universal, and was scarcely ever overcome, even after prolonged forcible amalgamation. City-kingsdoms became the rule in all fixed settlements—an institution which was essentially tribal chieftdom made permanent and hereditary. This type of government was scarcely modified, even in the most highly organized States; there intervened no real substantial authority between the king and any of his subjects. Even Israel, which exceptionally began its settled career as a tribal confederation, reverted inevitably to the normal Sem. type of government. After the establishment of the kingdom, Israel was reduced to 'Ephraim,' and Samaria became the synonym of either, while Jerusalem ere long became the virtual surrogate of Judah.

Of absolutely immeasurable importance to the world were the intellectual and moral character and temper of the ancient Semites. Long-continued intense activity, within a wide yet monotonous and secluded territory, was the habit of this unique people. Such a habit of necessity produces men eager, impulsive, and intense, but narrow and unimaginative. Such were the prehistoric Semites, and such the Semites of history. Religious, for the most part, rather than moral; patient, resolute, enduring, brave, serious; faithful to friends, implacable towards foes,—they have borne the stamp of tribalism all through their history. With little breadth of imagination, or range of invention, or intellectual or moral sympathy, they have given to literature scarcely anything dramatic or epic. But their ardour and passion, their religious and patriotic fervour, have inspired a lyrical poetry unequalled or unsurpassed. Intensely subjective, they have little spontaneous interest in experimental science and the pictorial arts. Incapable of wide speculation, they have had no genuine philosophy of their own; but, wholly practical in their views and modes of life, they have attained to the highest eminence in gnomic wisdom. Their faculty of surviving in strange conditions and surroundings, and of arousing themselves from chronic inactivity to almost superhuman daring and enterprise, seems to be the manifestation of a reserve power potentially acquired through ages of undaunted persistence under hard conditions. Not looking far around them, they have at times seen all the farther beyond and above them. And when it has been given them to see straight and clear, they have beheld 'unspeakable things, which it is not possible for a man to utter.' But they are apt to see only one thing at a time, and so in their judgments of men and things they are exclusive, partial, and extreme. When they perceive the principal part of a thing, it is conceived of and described as standing for the whole. In their mental pictures there is but little combining of elements, or shading or perspective. In their

vocabulary there are few qualifying or restrictive terms. In their view of the universe they refer everything to direct supernatural agency. Hence they leave little scope to the individual human will, and a circumscribed choice of action to themselves. They know of but two types of government, the one a development of the other: the patriarchal and the absolute monarchical. They follow but few occupations, and their work is divided among hereditary guilds. For the like fundamental reason, they are quite limited in their view of human merits and allotments; men are to them either absolutely good or absolutely bad; and their destiny is to be either beatific or hopelessly wretched. With such mental and moral qualities, they have been, according to the light which they have seen and the course to which they have been driven, the most beneficent or the most noxious of our species. There are two consummate forms and modes of Sem. faith and practice—Judaism and Mohammedanism. The one, with all its inevitable limitations, was incomparably the greatest gift of God to the world in ancient times. The other, in spite of the truth which it has appropriated, is one of the greatest evils of the world's later days, one of the most perverse and malignant, one of the most perplexing and disheartening.

LITERATURE.—On possible relations between the Semites and other races, see Benfey, *Verh. d. ägypt. Sprache z. semit. Sprachstamm* (1844); Friedr. Delitzsch, *Indogerm.-Semit. Wurzelverwandtschaft* (1879); McCurdy, *Aryo-Semitic Speech* (1881); Brugsch, *Hierogl.-denot. Wörterb.* (1867), Introduction. On the question of the original seat of the Semites and their classification, essays have been written by von Kremer, Guidi, and Hommel in favour of the theory of a migration from the N.E.; by Sprenger, Schrader, and de Goeje approving of the view that Arabia was the starting-place. See the summation in favour of the latter hypothesis in Wright, *Compar. Gramm. of Sem. Languages* (1890), p. 5 ff.; and comp. Noldeke, art. 'Semitic Languages,' in *Encyc. Brit.* Hommel's latest classification, as based on language, may be found in *AHT* (1897). The genus and character of the Semites are discussed in Hommel, *Die semit. Völker und Sprachen* (1883), p. 21 ff., where the views of Renan, Ewald, Chwolson, Graui, and Sprenger are also cited and criticised. On the religion of the Semites, see W. R. Smith, *RS*; Baudissin, *Studien zur sem. Religionsgeschichte*; and Baethgen, *Beiträge z. sem. Religionsgeschichte*. For the history of the Semites, see Max Duncker, *Hist. of Antiquity* (tr. from the German [1879], vols. I.-III.); Meyer, *Gesch. des Alterthums* (1884), vol. I.; Maspero, *Hist. anc. des peuples de l'Orient*; Lenormant, *Hist. anc. de l'Orient*; G. Rawlinson, *The Five Great Monarchies of the Ancient Eastern World*; Sayce, *The Ancient Empires of the East*; McCurdy, *H.P.M.* See also artt. *ASSYRIA* and *BABYLONIA* in vol. I. and in the *Encyc. Bibl.*, and the Literature there referred to; and add on the Sumerian question, Weissbach, *Die sumer. Frage* (1898).

DIASPORA.—

Introduction.

- I. Extent of the Diaspora: in (1) the Euphrates districts; (2) Syria; (3) Arabia; (4) Asia Minor; (5) Egypt; (6) Cyrenaica; (7) North Africa; (8) Macedonia and Greece; (9) Rome; (10) the rest of Italy, and Spain, Gaul, Germany.
- II. Organization of the communities: certain features common to them everywhere; differences as to (1) the name of the community, (2) the officials. Constitution of the Jewish communities akin to that of the Greek communes.
- III. Toleration and recognition by the State authorities. Three forms of political existence: (1) as a colony of foreigners (*αποικία*); (2) as private societies or 'unions'; (3) as more or less independent corporations alongside the communal bodies. Toleration of the Jewish cultus a main essential. Right of administering their own funds, and jurisdiction over their own members. The question of military service. The cult of the Emperor; advantage of the Jews in this matter over the Christians. Varying attitude of different Emperors towards the Jews.
- IV. Rights of citizenship, and social standing. Citizenship possessed by the Jews especially in recently founded cities like Alexandria and Antioch, or in those whose constitution had been reorganized like the cities of Western Asia Minor. In such instances the Jews formed a *colony* by themselves. Many Jews enjoyed even Roman citizenship. Social standing of the Jews. The offices of *alabarch* and 'head physician.'
- V. Religious and intellectual life. Danger of syncretism and philosophic indifference. The Synagogue a safeguard. The Greek language used in the Synagogue

services. The temple at Leontopolis. Payment of dues to the temple at Jerusalem. Pilgrimages to the festivals. Greek influences. Pedagogic part played by the Diaspora in relation to Christianity.

Literature.

Amongst the causes that contributed to the rapid spread of Christianity during the Apostolic and post-Apostolic periods, one of the most important was the circumstance that Judaism was already dispersed as a powerful force throughout the whole extent of the Roman Empire, nay even beyond it. Everywhere the preachers of the gospel found Jewish communities, which furnished them with the starting-point for their proclamation of the advent of the Messiah. And, even if their success was not very marked within the pale of the communities themselves, it must be assumed to have been all the greater in the circles of 'God-fearing' Gentiles, who in many places had attached themselves as an appendage to the community of Jews. Through these circles being won over by the Jewish propaganda to a worship that was monotheistic and determined by ethical interests, the soil was loosened for the seed of the gospel to be scattered on it.

The enormous extent of the Jewish Diaspora in comparison with the petty mother country presents an enigma to historical inquiry which it is unable to solve with certainty. In any case, various factors must have co-operated to bring about the result in question. In the time of the Assyrians and the Chaldeans forcible deportations to the Euphrates districts took place, and a process of the same kind was repeated even in the Persian period, under Artaxerxes Ochus. At the beginning of the Greek period the rulers sought, in the interests of the consolidation of their dominions, to effect the greatest possible intermixture of populations, and with a view to this they incited and favoured general migrations, by guaranteeing certain privileges and by other means. Pressure from above and the prospect of gain, in particular the interests of trade, combined to produce an ebbing and flowing of the peoples scattered over the wide dominions of the Diadochi. It is to this period that we ought presumably to assign a large proportion of those Jewish migrations, whose occurrence we can only infer from their results in the Roman period. But all this is hardly sufficient to account fully for the fact before us. Is it possible that the small community, which under Ezra and Nehemiah organized itself around Jerusalem, and which even about the year B.C. 200 had not spread beyond the territory of Judæa (in the narrower sense), should have produced merely by natural increase the many thousands, nay millions, who at the latest in the 1st cent. A.D. are found scattered over the whole world? This is highly improbable. We are thus compelled to suppose that it was not only to migration and natural reproduction, but also to numerous conversions during the Greek period, that Judaism owed its wide diffusion over the whole world, and the great number of adherents whose existence we can prove in general with complete certainty, although we cannot give the actual figures.

In the present article we shall describe (1) the extent of the dispersion of the Jews; (2) the organization of the communities; (3) the measure in which they enjoyed toleration and recognition by the State; (4) the share of the Jews in citizenship; (5) their religious and intellectual life in general.

I. EXTENT OF THE DIASPORA.—We have general testimony to the wide dispersion of the Jewish people, commencing with the middle of the 2nd cent. B.C. In the Third Book of the *Sibylline Oracles*, composed probably about B.C. 140, it is said that 'every land and every sea is filled with

them' (*Orac. Sibyll.* iii. 271, *πᾶσα δὲ γαῖα σέθεν Ἀλφειοῦ καὶ πᾶσα θάλασσα*). In the time of Sulla we are told by Strabo that the Jewish people had already 'come into every city; and one cannot readily find any place in the world which has not received this tribe and been taken possession of by it' (*ap. Jos. Ant.* xiv. vii. 2). According to Josephus, there is 'no people in the world without a fragment of us' (*BJ* ii. xvi. 4 [Niese, § 398]: *οὐ γὰρ ἔστιν ἐπὶ τῆς οἰκουμένης δῆμος ὃ μὴ μοῖραν ἡμετέραν ἔχων*). The fullest details are found in the survey given by Philo in the letter of Agrippa to Caligula (*Legatio ad Gaium*, § 36 [ed. Mangey, ii. 587]): 'Jerusalem is the metropolis not only of Judaea, but of most countries. This is owing to the colonies which on suitable occasions she has sent to the neighbouring lands of Egypt, Phoenicia, Syria, Coele-Syria; to the remoter Pamphylia, Cilicia, most parts of Asia, as far as Bithynia; and to the farthest corners of Pontus, as well as to Europe, Thessaly, Boeotia, Macedonia, Aetolia, Attica, Argos, Corinth, to the most and the fairest parts of the Peloponnesus. And not only is the mainland covered with Jewish settlements, but also the principal islands: Eubœa, Cyprus, Crete. I leave unnamed the lands beyond the Euphrates, for, with the exception of a small portion, all this district, including Babylon and the satrapies that embrace the fertile territory lying around, has Jewish inhabitants.' We are not able to test the correctness of this testimony in every detail. But the more our knowledge is enlarged by new discoveries, the more do we find the accuracy of the above description established. Coming now to particulars, the following are the most important testimonies:—

1. **THE EUPHRATES DISTRICTS.**—The earliest Diaspora of the Jews is that found in these regions (Assyria, Media, Babylonia). Large masses were deported by the Assyrians from the kingdom of the Ten Tribes, and by the Chaldeans from the kingdom of Judah. The Assyrians settled those whom they had carried away 'in Halah and in Habor by the river of Gozan, and in the cities of the Medes' (2 K 17⁹ 18¹¹), i.e. in the northern part of the region watered by the Euphrates, to the west of Nineveh (see the articles on the various localities just named). The Chaldeans brought their captives to the region of Babylon. It is true that large companies of the Judahites and Benjamites who had been carried to Babylon, afterwards returned to their native land and founded a new community there. But there was no such thing as a complete return of the Babylonian exiles. Still less was this the case with the members of the Ten Tribes deported by the Assyrians. Practically, the whole of these remained in foreign parts. This is not only implied in the biblical narrative, which knows nothing of a return on their part, but is expressly testified to by later writers (*Jos. Ant.* xi. v. 2: *αἱ δὲ δέκα φυλαὶ πέραν εἰσὶν Εὐφράτου ἕως δεῦρο, μυριάδες ἀπείροι καὶ ἀριθμῷ γνωστὴν μὴ δύνασθαι*; cf. 4 Ezr 13³⁶⁻⁴⁷; Origen, *Epist. ad Africanum*, § 14; Commodian, *Carmen Apologet.* 936-939). As late as the time of R. Akiba, the Rabbis continued to dispute whether the Ten Tribes would ever return or not (*Mishna, Sanhedrin*, x. 3 *fn.*; tradition vacillates regarding the authorities who supported the different views [see Bacher, *Die Agada der Tannaiten*, i. 143 f.]).

A fresh deportation was carried out by Artaxerxes Ochus, who about the year B.C. 350 transported Jewish prisoners to *Hyrkania* (*Euseb. Chron.*, ed. Schoene, ii. 112, ad ann. Abr. 1657; Orosius, iii. 7), probably because they had taken part in the revolt of the Phoenicians against the Persian sway.

All these Israelites who lived in the Euphrates districts maintained communication with the mother country, and, as the centuries ran their course, took their share in its religious development. Instead of being absorbed by the surrounding heathenism (as one would naturally have expected), they rather advanced in the direction of proper, strict, legal Judaism. And to such an extent did their numbers increase that in the Roman period they were counted by millions; and thus, even from a political point of view, constituted a power with which the Romans had to reckon, seeing that their settlements lay on the border of [down to the time of Trajan chiefly out-side] the sphere of Roman authority. P. Petronius, the legate of Syria, considered it dangerous in the year A.D. 40 to provoke them to a hostile disposition towards Rome (*Philo, Legatio ad Gaium*, § 31 [ed. Mangey, ii. 578]). Trajan in his advance against the Parthians was exposed to a real danger by the revolt of the Mesopotamian Jews which threatened his rear. It is not probable that these millions (*μυριάδες ἀπείροι*) of Jewish inhabitants were simply descendants of the former exiles. We must rather think of a successful propaganda among the surrounding heathen. This propaganda, too, must have been directed from Judaea, for the population of which we are speaking was Jewish in the sense of Pharisaism, as is evident from the forms of activity displayed by its religious life (pilgrimages to the feasts, sending of dues to the temple, etc.; see, on this, below). The main stock, however, was certainly composed of the ancient exiles, for in the Roman period we find the Jewish population most thickly settled in the very spots to which the Assyrians and the Chaldeans once transported their prisoners. Josephus names, as their two principal cities, Nehardea (*Νέαρδα, Νάαρδα*) and Nisibis (*Ant.* xviii. ix. 1 and 9 *fn.*). The former of these was in Babylonia; the latter on the Mygdonius, a tributary of the Chaboras (Habor), in the centre of the localities named in 2 K 17⁹ 18¹¹. Around Nehardea were thus grouped the descendants of the tribes of Judah and Benjamin; around Nisibis, the descendants of the Ten Tribes.

It may be further mentioned that, in the time of Tiberius, two brothers, Asinaeus and Anileus, founded in the neighbourhood of Nehardea a robber State, which, owing to the weakness of the Parthian monarchy, maintained its existence for several decades (*Jos. Ant.* xviii. ix.).—In the time of Claudius the royal house of Adiabene (Izates, his mother Helena, and his brother Monobazus) adopted the Jewish faith, and proved its attachment by keeping up intimate relations with Jerusalem, by establishing various foundations there, and by taking part with the Jews in their great war with the Romans under Nero and Vespasian (*Jos. Ant.* xx. ii.-iv.; *BJ* ii. xix. 2, iv. ix. 11, v. ii. 2, iii. 3, iv. 2, vi. 1, vi. 3, 4).

2. **SYRIA.**—This is characterized by Josephus as the country which, on account of its proximity to Palestine, had the largest percentage of Jewish inhabitants, these being specially numerous in the capital, Antioch (*BJ* viii. iii. 3: *τὸ γὰρ Ἰουδαίων γένος πολὺ μὲν κατὰ πᾶσαν τὴν οἰκουμένην παρέσπαρται τοῖς ἐπιχωρίοις, πλεῖστον δὲ τῇ Συρίᾳ κατὰ τὴν γειννασίαν ἀναμιγνύμενον ἑξαίρετως ἐπὶ τῇ Ἀντιοχείᾳ ἢ πολὺ διὰ τὸ τῇ πόλει μέγεθος*). At Antioch the Jews enjoyed the rights of citizenship, they had a splendid synagogue, and carried on a zealous and successful propaganda among the heathen population (*Jos. l.c.*). It is true that by all this they drew upon themselves the hatred of the pagan inhabitants. Regarding the state of things in most of the other towns of Syria we know nothing very definite. But Philo states that there are

'great numbers of Jews in every city of Asia and Syria' (*Legatio ad Gaium*, § 33 [ed. Mangey, ii. 582]: 'Ἰουδαῖοι καθ' ἐκάστην πόλιν εἰσι πανπληθεῖς Ἀσίας τε καὶ Συρίας'). For Damascus exact figures are given by Josephus, who, however, contradicts himself on this point. In one passage he states that, at the outbreak of the great war in the year A.D. 68, there were 10,500 [so Niese's text of *BJ* II. xx. 2; according to another reading, 10,000] Jews massacred at Damascus. In another passage (*BJ* VII. viii. 7 [Niese, § 368]) he gives, instead of this number, '18,000, with women and children.' According to the first cited passage (*BJ* II. xx. 2), the women of Damascus were almost all devoted to the Jewish religion (τὰς γυναῖκας ἀπάσας πλὴν ὀλίγων ὑπηγμένας τῇ Ἰουδαικῇ θρησκείᾳ).

3. *SOUTH ARABIA*.—At what date Judaism reached this quarter is unknown, but it was strongly diffused there from the 4th cent. A.D. at the latest. When, under Constantius, attempts were made to extend Christianity in that quarter, these had to contend with Jewish opposition (*Philostorgius*, iii. iv.). At the beginning of the 6th cent. a Jewish king reigned there. Owing to his persecution of the Christians, he was dethroned by the Christian king of Abyssinia (see Fell, 'Die Christenverfolgung in Sudarabien,' etc., in *ZDMG* xxxv. [1881] 1-74. Against Halévy, who argued that the king in question was not a Jew but an Arian, see Duchesne in *REJ* xx. [1890] 220-224).

4. *ASIA MINOR*.—Here we have numerous testimonies, and are able to demonstrate the presence of Jews in almost every quarter. They were most thickly settled in Phrygia and Lydia, and we know further how they came there. Antiochus the Great transplanted two thousand Jewish families from Mesopotamia and Babylonia to Lydia and Phrygia, because he considered them more loyal subjects than the Lydians and Phrygians, who were inclined to revolt (*Jos. Ant.* XII. iii. 4). While these Babylonian Jews peopled the inland provinces of Asia Minor, others were attracted by trade interests to the towns on the coast. An indirect evidence of the early appearance of the Jews in Asia Minor may be discovered also in 1 Mac 15²⁵⁻²⁴. According to this passage, the Romans in the year B.C. 139 simultaneously despatched to a number of kings a letter in identical terms, charging them to refrain from showing any hostility towards the Jews. From this it may be inferred that Jews were already to be found in all the places there named. Of States and cities in Asia Minor the following are mentioned: the kingdoms of Pergamum and Cappadocia; the district of Caria, with the cities of Myndos, Halicarnassus, and Cnidos; Pamphylia, with the city of Side; Lycia, with the city of Phaselis; and, finally, Sampsame, i.e. the Samsum of later Arab geographers, or Amisus in Pontus, to the east of Sinope. These various districts and cities were in the year B.C. 139 politically independent, and are therefore named separately beside the great kingdoms of Pergamum and Cappadocia.

As showing the great numbers and the prosperity of the Jews of Asia Minor about the middle of the 1st cent. B.C., we have, on the one hand, the numerous acts in their favour during the closing years (B.C. 50-40) of the Roman Republic (collected by Josephus in *Ant.* XIV. x.); and, on the other hand, the remarkable passage in Cicero, *pro Flacco*, 28, in which he gives precise details as to the circumstances under which quantities of Jewish money, intended to be sent from Asia Minor to Jerusalem, were confiscated by the governor Flaccus (B.C. 62-61). The whole passage reads thus: 'Quum aurum Judæorum nomine quotannis ex Italia et ex omnibus provinciis Hierosolyma exportari soleret, Flaccus sanxit

edicto ne ex Asia exportari liceret. . . . Ubi ergo crimen est? quoniam quidem furtum nusquam reprehendis, edictum probas, judicatum fateris, quæsitum et prolatum palam non negas, actum esse per viros primarios res ipsa declarat: *Apameæ* manifesto deprehensum, ante pedes pretoris in foro expensum esse auri pondo centum paullo minus per Sex. Cæsium, equitem Romanum, castissimum hominem atque integerrimum; *Laodiceæ* viginti pondo paullo amplius per hunc L. Peducaum, judicem nostrum; *Adramyttii* per Cn. Domitium, legatum; *Pergami* non multum.' If we add to these general testimonies other special ones, particularly those of the inscriptions, we obtain for the Jews in Asia Minor the following data (commencing with the N.W.):—

a. *Adramyttium* and *Pergamum*: the above testimony of Cicero.

b. *Phœcea*: an inscription (*REJ* xii. [1886] 236-242 = *Bulletin de corresp. hellén.* x. [1886] 327-335): Τάτιον Στράτωνος τοῦ Ἐνπένδωνος τὸν οἶκον καὶ τὸν περίβολον τοῦ ὑπαίθρου κατασκευάσασα ἐκ τῶν ἰδίων ἐχαρίσατο τοῖς Ἰουδαίοις. Ἡ συναγωγὴ ἐτίμησεν τὸν Ἰουδαίων Τάτιον Σ[τράτ]ωνος τοῦ Ἐνπένδωνος χρυσῷ στεφάνῳ καὶ προεδρίᾳ.

c. *Magnesia* on Mt. Sipylus: a Jewish tomb-inscription (*REJ* x. [1885] 76).

d. *Smirna*: an inscription from the time of Hadrian, with a list of those who had made presents to the city, among them *οἱ ποτὲ Ἰουδαῖοι*. (*CIG* 3148). The Jews played a prominent part in connexion with the death of Polycarp (*Martyr. Polyc.* 12-13, 17-18; *Vita Polycarpi auctore Pionio*, ed. Duchesne, 1881; cf. also Reinach, *REJ* xi. 235-238). There is, further, this inscription from the 3rd cent. A.D. (*REJ* vii. [1883] 161-166): 'Ρουφεῖρα Ἰουδαία ἀρχισυνάγωγος κατεσκεύασεν τὸ ἐνσῶριον τοῖς ἀπελευθέροις καὶ θέρμασι μηδενὸς ἄλλον ἐξουσίαν ἔχοντος θάψαι τινά, εἰ δέ τις τολμήσει, δώσει τῷ ἱερωτάτῳ ταμίῳ δηνάρια ἅφ καὶ τῷ ἔθνει τῶν Ἰουδαίων δηνάρια ἅ. Ταύτης τῆς ἐπιγραφῆς τὸ ἀντίγραφον ἀποκεῖται εἰς τὸ ἀρχεῖον.

e. *Sardis*: three official documents quoted by Josephus—1. A despatch of L. Antonius to the authorities of Sardis (B.C. 50, 49), permitting the Jews to refer their disputes for decision to their own tribunals, even when they are Roman citizens (*Ant.* XIV. x. 17). 2. A popular resolution of the city of Sardis, guaranteeing to the Jews the undisturbed exercise of their religion (*Ant.* XIV. x. 24). 3. A despatch of C. Norbanus Placcus, from the time of Augustus, to the authorities of Sardis, reminding them afresh of the religious freedom of the Jews (*Ant.* XVI. vi. 6).

f. *Hypaepa*, to the south of Sardis: an inscription of c. 200 A.D., containing only the two words Ἰουδαίων νεωτέρων (*REJ* x. 74 f.).

g. *Ephesus*: the granting of the city franchise to the Jews, probably as early as the reorganizing of the city constitution by Antiochus II. Theos (B.C. 261-246). Numerous official documents are quoted by Josephus, particularly those dating from the years B.C. 49-42, according to which the Jews living in Ephesus were exempted from military service even when they possessed the Roman citizenship (*Ant.* XIV. x. 11-13, 16, 19, 25. During the years named the Roman citizens in Asia Minor were called out for military service). Under Augustus the authorities of Ephesus were repeatedly reminded that the Jews were not to be interfered with in sending the sacred money to Jerusalem (Philo, *Legatio ad Gaium*, § 40; *Jos. Ant.* XVI. vi. 4, 7). Their synagogue is mentioned in Ac 18¹⁹⁻²⁰ 19². In a late tomb-inscription we meet with a Jewish ἀρχίατρος (*Ancient Greek Inscriptions in the British Museum*, iii. 2, No. 677). The 'head physicians' were appointed by the city, and enjoyed immunity from all burdens.

h. Tralles: incidental mention in a despatch from the Laodiceans (Jos. *Ant.* XIV. x. 20).

i. Caria: see, in general, 1 Mac 15²³, and cf. also the above remarks.

j. Miletus: a despatch of the proconsul to the city authorities, bearing on the religious freedom of the Jews (*Ant.* XIV. x. 21).

k. Jasus, to the south of Miletus: an inscription from the middle of the 2nd cent. B.C., according to which one Νικίας Ἰδασος Ἱεροσολυμίτης gave a money contribution in support of the festival of the *Dionysia* (Le Bas et Waddington, *Inscr.* iii. No. 294 = *REJ* x. 76). It is not impossible that Jason, the father of this Niketas, is to be identified with the high priest of this name who lived in the Maccabean period. Support of heathen festivals by Jews was not unknown at that time even in Palestine.

l. Myndos: a tomb-inscription from the beginning of the Byzantine period (*REJ* xlii. 1-4).

m. Halicarnassus: a popular resolution regarding the religious freedom of the Jews (Jos. *Ant.* XIV. x. 23).

n. Phrygia: see Ramsay, *Cities and Bishoprics of Phrygia*, vol. i. pt. ii. (1897) pp. 667-676.

o. Laodicea: see Cicero, *pro Flacco*, 28; also a despatch of the authorities to the proconsul C. Rabirius, in which they disclaim any intention of interfering with the religious freedom of the Jews (*Ant.* XIV. x. 20).

p. Hierapolis: three Jewish inscriptions published in *Jahrbuch des deutschen archäol. Instituts*, ivth Ergänzungsheft (= *Alterthümer von Hierapolis*, herausg. von Humann, Chichorius, Judeich, Winter), 1898. We give extracts, showing the most important points—1. No. 69 a tomb-inscription, closing with the threat of a penalty: *εἰ δὲ μή, ἀποτελεῖται τῷ λαῷ τῶν (sic) Ἰουδαίων προστεῖλαι οὐδὲν ἀνθρώπων χεῖρα*. 2. No. 212 a tomb-inscription ending thus: *εἰ δὲ ἐν ἑτέροις κηδεύσει, δώσει τῇ κατοικίᾳ τῶν ἐν Ἱερὰπιδεῖ κατοικοῦντων Ἰουδαίων προστελεῖν (δηνάρια) (.) καὶ τῷ ἐκζητήσαντι (δηνάρια) (δισχιλίας). ἀντίγραφον ἀπετέθη ἐν τῷ ἀρχίῳ τῶν Ἰουδαίων*. 3. No. 342 (= Ramsay, *Cities and Bishoprics of Phrygia*, i. 545) tomb-inscription of a certain Publius Aelius Glykon, who bequeathed to the managing body of the guild of purple-dyers (τῇ σεμνοτάτῃ προεδρίᾳ τῶν πορφυροβάφων) a capital fund, the interest of which was to be applied yearly, *ἐν τῇ ἐορτῇ τῶν ἀθύρων*, to the decorating of his tomb. He bequeathed likewise to the directorate of another guild (τῷ συνεδρίῳ τῶν καιροδατιστῶν) a sum to be applied to the same purpose, *ἐν τῇ ἐορτῇ πεντηκάστῃς*. The whole of the members of these guilds must, accordingly, have been, if not exactly Jews, at least well disposed to Judaism (cf. Ramsay, *Expositor* of Feb. 1902, pp. 98-100).

q. Apamea: Cicero, *pro Flacco*, 28 (see above); also a tomb-inscription (*op. Ramsay, Cities and Bishoprics of Phrygia*, i. 538) ending thus: *εἰ δὲ τις ἐπιτηδεύει, τὸν νόμον οἶδεν τῶν Εἰουδαίων*. The 'law of the Jews' cannot here be the Mosaic law, but a legal ordinance, recognized by the State, imposing a penalty on any harm done to Jewish tombs. The strength of Jewish influence at Apamea can be gauged from the circumstance that at the beginning of the 3rd cent. A.D. coins were struck by the city authorities (!) having upon them figures of Noah and his wife descending from the ark, and bearing the legend ΝΩΕ (fullest description of these coins in Madden, *Numismatic Chronicle*, 1866, pp. 173-219, pl. vi.; cf. also the Catalogue of the Collection Waddington in the *Revue Numismatique*, 1898, p. 397 f., Nos. 5723, 5730, 5731). Apamea thus claimed to be the spot where Noah's ark was stranded. This claim, which is known also from other sources, is connected in some way with the name of the city, Ἀπάμεια Κιβωτός, for

κιβωτός is the biblical term for the ark of Noah. It may have been just this appellation of the city that led to the localizing of the Noah-legend. That this localizing is to be traced to Jewish influence, has been shown especially by Babelon ('La tradition phrygienne du déluge' in *Revue de l'histoire des religions*, xxiii. [1891] 174-183). Not only the Noah- but also the Enoch-legend reached Phrygia by means of the Jews; for the Phrygian Ἀννακός or Νάννακος, who lived over 300 years, and after whose death the great Flood came, is certainly no other than the biblical Enoch (he is called Ἀννακός by Stephanus Byzant. s.v. Ἰκόνιον; but Νάννακος by Zenobius, *Proverb.* vi. 10, and Suidas, *Lex.* s.v. Νάννακος).

r. Akmonia: an inscription in honour of a number of synagogue officials who had restored 'the synagogue built by Julia Severa' (τὸν κατασκευασθέντα οἶκον ὑπὸ Ἰουλίας Σευήρας . . . ἐπισκεύασαν, see Ramsay, *Revue des études anciennes*, iii. [1901] 272 [an earlier copy in *Cities and Bishoprics of Phrygia*, i. 649 f.]). It closes thus: *οὐστίας καὶ ἡ συναγωγὴ ἐτέλειμεν ὅλῳ ἐπιχρίσῳ διὰ τε τὴν ἐνδρετον αὐτῶν [βίβλων καὶ τὴν πρὸς τὴν συναγωγὴν εὐνοίαν τε καὶ σπουδὴν]*. This inscription shows us to what influence Judaism had attained in the highest circles of society; for the Julia Severa who is named as the builder of the synagogue is known to us from coins and inscriptions (Ramsay, *Cities and Bishoprics of Phrygia*, i. 637, 647) as a noble lady of Akmonia in the time of Nero (*Prosopographia imperii Romani*, iii. 224 f., s.v. 'Serenius'; also coins in the Collection Waddington, *Revue Numismatique*, 1898, p. 384, Nos. 5488, 5490, 5494). Since she was at the same time high priestess of the cult of the Emperor, she cannot indeed have been a Jewess.

s. Antioch of Pisidia: a Jewish synagogue mentioned in Ac 13⁴.

t. Lyria and the city of *Phaselis*: see 1 Mac 15²³, with the above remarks on that passage.

u. Korykos in Lycia: a tomb-inscription of late date (*REJ* x. 76).

v. Tlos in Lycia: a tomb-inscription from somewhere about the end of the 1st cent. A.D. (*Ermanus Vindobonensis*, 1893, pp. 99-102). According to it, the ἡρώων (sepulchral monument) was erected by a certain Ptolemaeus for himself and his son Ptolemaeus ὑπὲρ ἀρχοντείας τελευμένης παρ' ἡμεῖν Ἰουδαίους, ὥστε αὐτὸ εἶναι πάντων τῶν Ἰουδαίων καὶ μηδένα ἐξὸν εἶναι ἕτερον τεθῆναι ἐν αὐτῷ. *εἰάν τις εὐφραδὴς τινὰ πύθων ὀφειλέσει* Ἰλῶων τῷ δήμῳ [the conclusion is wanting].

w. Pamphylia and the city of *Side*: see 1 Mac 15²³ and the general testimony of Philo (see above, p. 92ⁿ), also Ac 21⁹.

x. Cilicia: see likewise Philo, *l.c.* Since, according to Ac 6⁹, Cilician Jews lived in Jerusalem in somewhat large numbers, the Diaspora in Cilicia must have been very considerable. Tarsus, the capital of Cilicia, was, as is well known, the birth-place of the Apostle Paul (Ac 9¹¹ 21²⁹ 22³). One Ἰουδας υἱος Ἰωσή Ταρσεὺς is mentioned on a tomb-inscription of Jope (Euting, *Sitzungsberichte der Berliner Akademie*, 1885, p. 686). In the 4th cent. A.D. the Jewish patriarch caused the dues to be collected 'in every city of Cilicia' from the resident Jews (Epiphanius, *Haer.* xxx. 11: ἀπὸ ἐκάστης πόλεως τῆς Κιλικίας τὰ ἐπιδέκτα καὶ τὰς ἀπαρχὰς παρὰ τῶν ἐν τῇ ἐπαρχίᾳ Ἰουδαίων εἰσέπραπεν).

y. Korykos in Cilicia: a Jewish sarcophagus with inscription (*Denkschriften der Wiener Akademie*, Phil.-Hist. Classe, Bd. xlv. [1896] p. 68).

z. Iconium in Lycaonia: a Jewish synagogue mentioned in Ac 14¹; on inscriptions there, cf. art. GALATIA in vol. ii. p. 88^b.

aa. Galatia: testimonies here very scanty, for there are none in Jos. *Ant.* XVI. vi. 2 (the closing remark that the edict of Augustus in favour of the

Jews was to be set up at *Ancyra* is based upon a false reading: the MSS have ἀγγυρη). A tomb-inscription from Galatia will be found in *Bulletin de corresp. hellén.* vii. 24 (= *REJ* x. 77). The inscription *CIG* 4129 was found in the neighbourhood of Dorylaeum, not therefore in Galatia. Cf., in general, art. GALATIA in vol. ii. p. 85^b.

bb. *Cappadocia*: 1 Mac 15²² (despatch from the Romans to king Ariarathes) is sufficient to justify the assumption that Jews were settled there. Cf. also Ac 2⁹; Mishna, *Kethuboth*, xiii. 11; Neubauer, *Géog. du Talmud*, pp. 317-319; tomb-inscriptions of Cappadocian Jews at Jope, in *PEFSt.* 1893, p. 290, and 1900, pp. 118, 122. In the Jerusalem Talmud we meet with three Jewish scholars from Cappadocia (R. Judan, R. Jannai, R. Samuel); see Krauss, *Griech. und lat. Lehnwörter im Talmud*, ii. [1899] 558; Bacher, *Die Agada der paläst. Amoräer*, iii. [1899] 106, 749.

cc. *Bithynia* and *Pontus*: the general testimony of Philo (*Legatio ad Gaium*, § 36, ἀρχὴ Βιθυνίας καὶ τῶν τοῦ Πόντου μυθῶν); a Bithynian tomb-inscription of late date (*REJ* xxvi. 167-171). On Sampsame (1 Mac 15²³) = *Amisus* in Pontus, see above, p. 93^a. From Pontus came both the Aquilas, the companion of St. Paul (Ac 18²), and the author of a Gr. translation of the Old Testament. Cf. also Ac 2⁹.

dd. *Pantikapæum* in the Crimea: two inscriptions of great interest (Latyshev, *Inscriptions antiques oræ septentrionalis Ponti Euxini*, ii., Nos. 52, 53 [better texts here than in *CIG* 2114^b, 2114^b]), one of which is dated from the year A.D. 81. Both contain deeds relating to the manumission of slaves of Jewish owners. At the close it is noted that the Jewish community 'took part in superintending' this legal instrument, i.e. shared the responsibility for its correct execution (συνεπιτροπεύουσιν δὲ καὶ τῆς συναγωγῆς τῶν Ἰουδαίων). Thus even in that remote region there was in the 1st cent. A.D. an organized Jewish community.

5. *EGYPT*.—If even in Syria and Asia Minor the Jewish population was a numerous one, this was pre-eminently the case in Egypt. Here, moreover, the Jews came to play an important part in the history of civilization: for, thanks to their favourable social position, they were able to adopt in large measure the Greek culture, and thus became the principal representatives of the Jewish-Greek form of thought. The emigration of larger masses of Jews to Egypt must undoubtedly be held to have first taken place in the Greek period. But sporadic migrations or even forcible transplantings happened earlier than this. Soon after the destruction of Jerusalem by Nebuchadrezzar (B.C. 586), a large company of Jews, from fear of the Chaldeans, and in spite of the protests of the prophet Jeremiah, took their departure to Egypt (Jer 42. 43; for the motive see Jer 41). They settled in various parts, at Migdol, Tahpanhes, Noph, and Pathros (Jer 44¹). But we do not know whether their descendants maintained their existence here as Jews.

—Pseudo-Aristeas speaks of two transplantings of Jewish settlers to Egypt prior to the time of Ptolemy Lagi: one in the time of the Persians, and one much earlier, under Psammetichus, who in his expedition to Ethiopia is said to have had even Jewish soldiers in his army (*Aristeæ Epist.*, ed. Wendland, § 13: ἦδη μὲν καὶ πρότερον ἱκανῶν εἰσεληλυθόντων σὺν τῷ Πέρσῃ καὶ πρὸ τούτων ἐτέρων συμμαχιῶν ἐξαπεσταλμένων πρὸς τὸν τῶν Αἰθίοπων βασιλέα μάχεσθαι σὺν Ψαμμητίχῳ. The king last named is probably Psammetichus II. [B.C. 594-589], who undertook a campaign against Ethiopia. That amongst others there were Semitic mercenaries in his army, we know from the inscriptions of Abu-Sinbel [on which cf. the Literature cited in Pauly-Wissowa's *RE*, art. 'Abu-Sinbel']. The Jewish migration to Egypt in the time of the Persians is

not regarded by pseudo-Aristeas as a voluntary one; cf. § 35, ed. Wendland). See also 'Additional Note' at end of this article.

Whether as early as the time of Alexander the Great any considerable number of Jews migrated to Egypt, we know not. But we may trust the statement of Josephus, that, at the founding of Alexandria by the monarch just named, Jewish settlers were from the first incorporated among the citizens (*BJ* II. xviii. 7, c. *Apion*. ii. 4). Confirmation of this is supplied by the decree of the emperor Claudius (*ap. Jos. Ant.* XIX. v. 2), according to which the Jews in Alexandria were settled there from the very first (τοῖς πρώτοις εὐθὺς καιροῖς) along with the Alexandrians. Larger masses appear to have first come to Egypt under Ptolemy Lagi. According to pseudo-Hecataeus, we are to think in this instance of voluntary migrations (*Jos. c. Apion*. i. 22 [Niese, § 194]: οὐκ ὀλίγοι δὲ καὶ μετὰ τὸν Ἀλεξάνδρου θάνατον εἰς Αἴγυπτον καὶ Φοινίκην μετέστησαν διὰ τὴν ἐν Συρίᾳ στάσιν, cf. § 186). According to pseudo-Aristeas, on the other hand, Ptolemy Lagi transplanted Jewish prisoners in large numbers to Egypt. The details of his narrative belong, indeed, to the realm of romance. Ptolemy, we are told, carried captive to Egypt 100,000 Jews. Of these he armed 30,000 able-bodied men, whom he employed to do garrison duty in the fortresses of the country (§ 13: ἀφ' ὧν ὡσεὶ τρεῖς μυριάδας καθοπλίσας ἀνδρῶν ἐκλεκτῶν εἰς τὴν χώραν κατώκισεν ἐν τοῖς φρουρίοις). The old men, the children, and the women, he is said to have handed over as slaves to his soldiers, on demand, as compensation for their services (*Aristeæ Epist.*, ed. Wendland, §§ 12-14, cf. 35-36). Afterwards Ptolemy Philadelphus is stated to have procured the freedom of all these Jewish slaves by paying to the owners twenty drachmæ per slave (§§ 15-27, 37). Since Josephus, in relating the same narrative (*c. Apion*. ii. 4 [Niese, §§ 44-47], *Ant.* XII. i.), simply reproduces the account of pseudo-Aristeas [in the first cited passage this is self-apparent, and in the other at least probable], the latter is our only witness. But, in spite of the romantic character of the narrative in question, this much at least is credible, that Ptolemy Lagi brought Jewish prisoners to Egypt and set them to garrison duty in the fortresses. For the fact that Ptolemy Lagi took Jerusalem by storm is unimpeachably vouched for by Agatharchides (*Jos. c. Apion*. i. 22 [Niese, §§ 209-211], *Ant.* XII. i.; cf. Appian, *Syr.* 50). And the employment of Jews for garrison work in strongholds is confirmed by the circumstance that at a still later period we hear of a 'Jews' camp' (Ἰουδαίων στρατόπεδον, *castra Judæorum*) in various places (see further, on this, below).

At Alexandria, in the time of the Diadochi, a special quarter, separated from the rest of the city, was assigned to the Jews, 'in order that they might be able to live a purer life by mixing less with foreigners' (*Jos. BJ* II. xviii. 7; from *c. Apion*. ii. 4 it might appear as if this quarter had already been assigned to the Jews by Alexander the Great, but, according to the manifestly more exact account in *BJ* II. xviii. 7, this was first done by the Diadochi; cf. also Strabo *ap. Jos. Ant.* XIV. vii. 2). This Jewish quarter stretched along the harbourless strand in the neighbourhood of the royal palace (*c. Apion*. ii. 4 [Niese, § 33]: πρὸς ἀλμυρὸν θάλασσαν, § 36 πρὸς τοῖς βασιλικαῖς), to the east, therefore, of the promontory of Lochias on the north-east of the city. The separation came afterwards, indeed, not to be strictly maintained, for Philo tells us that not a few Jews had their dwelling-places scattered about in the other quarters of the city. But even in Philo's time two of the five city-divisions were called 'the Jewish,' because they were predominantly inhabited by Jews (Philo,

in *Flaccum*, § 8 [ed. Mangey, ii. 525]). We learn from this that the Jews constituted something like two-fifths of the population of Alexandria. According to Josephus, the fourth city-division was inhabited by Jews (*BJ* II. xviii. 8: τὰ καλούμενα Δέλτα, the city-divisions being named after the first five letters of the alphabet).

The total number of Jews in Egypt is reckoned by Philo in his own time at about a million (in *Flaccum*, § 6 [ed. Mangey, ii. 523]). He remarks in this connexion that they had their dwellings 'as far as the borders of Ethiopia' (μέχρι τῶν ὁρίων Αἰθιοπίας). This general statement is confirmed by many special testimonies, of which the following are the most important:—

a. *Lower Egypt*. To the east of the Delta, in the nome of Heliopolis (and near to Leontopolis, which must not, however, be confounded with the better known Leontopolis situated much farther to the north), lay the Jewish temple (formerly a temple of Bubastis), which owed its origin to the Jewish high priest Onias in the time of Ptolemy Philometor (*Jos. Ant.* XIII. iii. 2: ἐν Δερότων πόλει τοῦ Ἡλιοπολίτου; see more fully, regarding this temple, below, p. 107^b). The region was known as ἡ Ὀρίων χώρα (*Ant.* XIV. viii. 1, *BJ* I. ix. 4). With this we should probably connect the 'vicus Judæorum' mentioned in the *Itinerarium Antonini* (ed. Parthey et Pinder, p. 75). But the 'castra Judæorum' mentioned in the *Notitia Dignitatum Orientis* (ed. Böcking, i. 69) is presumably different, although also situated in the same neighbourhood. At the spot where, according to the statement of distances given in the *Itiner. Anton.*, the 'vicus Judæorum' should be sought, there is still a *Tell el-Jehudiyeh*, in proximity to which a temple of Bubastis had once stood. Another *Tell el-Jehudiyeh*, which, according to Naville, has 'quite the appearance of a fortress,' lies farther south (see Naville, *Seventh Memoir of the Egypt. Explor. Fund*, London, 1890). We should probably identify the first named *Tell el-Jehudiyeh* [not, as Naville, the more southern one] with the building of Onias, and the other with the 'castra Judæorum.' While these places lay to the east of the Delta, Josephus in his account of Cæsar mentions an Ἰουδαίων στρατοπέδον, which, from the context of the narrative, must have lain to the west of it (*Ant.* XIV. viii. 2, *BJ* I. ix. 4). It cannot therefore be the same as the 'castra Judæorum' mentioned in the *Notitia Dignitatum*. The existence of various 'Jews' camps' is readily intelligible in the light of the statements quoted above from pseudo-Aristeas. Likewise in the Delta, in its southern portion, lies Athribis, where, according to an inscription of the Ptolemaic period found there, a certain Ptolemæus, son of Epikydes, chief of the police, acting in conjunction with the resident Jews, built a synagogue to the most high God (Πτολεμαῖος Ἐπικύδου ὁ ἐπιστάτης τῶν φυλακῶν καὶ οἱ ἐν Ἀθρίβει Ἰουδαῖοι τὴν προσευχὴν θεῷ ὑψίστῳ, *REJ* xvii. 235-238 = *Bulletin de corresp. hellén.* xiii. 178-182).

b. *Middle Egypt*. The more recent papyrus 'finds' have furnished information regarding the early settlement of Jews in Middle Egypt. According to a document of the 3rd cent. B.C. discovered in the nome of Arsinoë (the modern Fayum), there had to be paid for the possession of slaves in the village of Psenyris a duty εἰς τὰ ἀποδοχία της κωμης παρα των Ιουδαιων και των Ελληνων (*The Flinders Petrie Papyri*, ed. by Mahaffy, pt. i. 1891, p. 43). In another, belonging to the same region and dating from 238-237 B.C., we meet with a [παρεπ]ιδημος ος και συριστι Ιουδας [καλεῖται] (*op. cit.* pt. ii. 1893, p. 23). Towards the end of the 2nd cent. B.C. a προσευχὴ Ἰουδαίων is mentioned at Arsinoë (*Tebtunis Papyri*, ed. by Grenfell, Hunt, and Smyly, pt. i. 1902, No. 86). At Oxyrhynchus, south of Arsinoë,

documents have been found of the Roman Imperial period, in which a 'Jews' lane' (αμφοδὸς Ἰουδαϊκή) is mentioned (*The Oxyrhynchus Papyri*, ed. by Grenfell and Hunt, pt. i. 1898, No. 100; pt. ii. 1899, No. 335).

c. *Upper Egypt*. Here there were Jews settled as early as the time of Jeremiah, for the Pathros of Jer 44¹ is Upper Egypt. A great many tax-receipts from the 2nd cent. B.C., written upon clay tablets (*ostraca*), have been found in the neighbourhood of Thebes. Among the names of the tax-collectors who grant such discharges there are many which are undoubtedly Jewish: e.g. Ἰωσηπὸς Ἀβδίου, Ἰωσηπιὸς, Σαμβαταῖος Ἀβιγλου, Σαμβαθαῖος Σολλουμῖος, Σίμων Ἰαζαρου, Σίμων Ἀβιγλου (see the collection in Wilcken, *Griechische Ostraka*, vol. i. 1899, p. 523 f.). A papyrus emanating from the same time and place contains a fragment of a letter, from which we learn that a Jew, named Δανουβλος, had failed of his engagement to make delivery of a horse (Grenfell, *An Alexandrian Erotic Fragment*, 1896, p. 75). On tax-receipts of the time of Trajan we repeatedly encounter the name of one Ἀντωνῖος Μαλχαῖος who had charge of the harbour dues (?; ὁρμφοδουλὰς) at Syene, on the southern border of Upper Egypt (Wilcken, *Griechische Ostraka*, ii. Nos. 302-304, cf. i. p. 273). As general evidence of the diffusion of the Jews 'as far as the borders of Ethiopia,' we have the above cited testimony of Philo. The great extent of their numbers in the Thebaid is best shown by the circumstance that in the time of Trajan they rose in arms here, as in the rest of Egypt, against the non-Jewish inhabitants (Euseb. *Chron.*, ed. Schoene, ii. 164 f.).*

6. *CYRENAICA*.—Here too the Jewish Diaspora was present in force. Even Ptolemy Lagi is said to have sent Jewish colonists thither (*Jos. c. Apion.* ii. 4 [Niese, § 44]). The Roman despatch of l Mac 15² presupposes the presence of Jewish inhabitants in Cyrene. According to Strabo, the population of the latter city in the time of Sulla fell into four classes: citizens, farmers, *metoikoi*, Jews (Strabo *ap. Jos. Ant.* XIV. vii. 2: τέτταρες δ' ἦσαν ἐν τῇ πόλει τῶν Κυρηναίων, ἡ τε τῶν πολιτῶν καὶ ἡ τῶν γεωργῶν, τρίτη δ' ἡ τῶν μετοίκων, τετάρτη δ' ἡ τῶν Ἰουδαίων). At that time the Jews already played a prominent part in the disturbances which Lucullus, on the occasion of his incidental presence, had to allay (Strabo, *l.c.*). A Jewish πολιτεύμα in the city of Berenike in Cyrenaica is brought to our knowledge by a lengthy inscription (*CIG* 5361; see more fully, below § ii.). Augustus and Agrippa took measures in favour of the Jews of Cyrene (*Jos. Ant.* XVI. vi. 1, 5). We have a number of testimonies in the NT to the presence of Jews in Cyrenaica: Mt 27³², Mk 15²¹, Lk 23²⁶ (Simon the Cyrenian); Ac 2¹⁰ (Cyrenians present at Jerusalem at the Feast of Pentecost); 6⁹ (a synagogue of the Cyrenians at Jerusalem); 11²⁰ (Cyrenians come from Jerusalem to Antioch); 13¹ (Lucius of Cyrene a prominent member of the church at Antioch). In the time of Vespasian the Jewish *sicarii* also found adherents among their co-religionists in Cyrene (*Jos. BJ* VIII. xi.; *Vita*, 76). The great rising of the Jews in Cyrenaica in the time of Trajan was marked by terrible violence (Dio Cass. lxxviii. 32; Euseb. *HE* iv. 2).

7. *NORTH AFRICA*.—Here we can demonstrate the presence of Jews, during the Roman period,

* The diffusion of Semites throughout Egypt in the earlier Ptolemaic period is witnessed to also by a papyrus probably of the year B.C. 240-239, in which a *major-domo* makes a return of the personnel of his house for taxation purposes. He enumerates amongst others the γυναικὶ μισθὸν λαζαῖς: Πανυρεβαλ, Ιαβ Κρατῖος, Σινταλῖς, Ματαρβαλ (Wilcken, *Griechische Ostraka*, i. 436, and also the correction on p. 823). But the Semites here named may be Phœnicians or Philistines equally well with Jews. For Phœnician inscriptions in Egypt, see *CIS* i. Nos. 97-113; *Répertoire d'épigraphie égyptique*, i. 1901, Nos. 1-4.

from the border of Cyrenaica to the extreme west (cf., especially, Monceaux, 'Les colonies juives dans l'Afrique Romaine' in *REJ* xlv. [1902] 1-28). We do not know when or how they came there. But, as the neighbouring Cyrenaica was largely settled by Jews as early as the Ptolemaic period, the colonization of Africa will also have begun then, at least that of proconsular Africa, and later that of Numidia and Mauretania.

a. *Proconsular Africa*. At Carthage there has been discovered an extensive Jewish cemetery, containing more than 100 vaults, each with from 15 to 17 *loculi*. Its Jewish character is shown by the frequent portrayal of the seven-branched candlestick (see Delattre, *Gamart ou la nécropole juive de Carthage*, Lyon, 1895; for Latin inscriptions from this cemetery, see *CIL* viii. Suppl. Nos. 14097-14114). The work *adv. Judeos*, attributed to Tertullian, presupposes the presence of Jews in Carthage. At Hammâm-Lif, not far from Carthage, the foundations of a synagogue of the Roman period have been discovered, upon the mosaic floor of which there are Jewish inscriptions in the Latin language (Renan, *Revue archéol.*, trois. Série, i. [1883] 157-163, iii. [1884] 273-275, plates vii-xi; Kaufmann, *REJ* xiii. [1886] 45-61; Reinach, *ib.* 217-223; *CIL* viii. Suppl. No. 12457). At Oea in Tripolis the Christian bishop in the time of Augustine consulted the Jews there about a passage in Jerome's new translation of the Bible (Augustine, *Epist.* lxxi. 3, 5). On the Peutinger Table there is mention of a place in the same neighbourhood, called 'Judaorum Augusti.'

b. *Numidia*. The presence of Jews at Hippo is evident from Augustine, *Serm.* xcvi. 4. At Cirta there are Latin inscriptions (*CIL* viii. Nos. 7150, 7155, 7530 [cf. Add. p. 965], 7710).

c. *Mauretania*. At Sitifis there are Latin inscriptions (*CIL* viii. Nos. 8423, 8499). At Tipasa there was a Jewish synagogue, at Caesarea the house of a Jewish 'ruler of the synagogue' is mentioned (see the evidence from processes against martyrs in Monceaux, *REJ* xlv. 8). Even in the extreme west of Mauretania, at Volubilis, a Hebrew inscription, probably of the Roman period, has been found (Berger, *Bulletin archéol. du comité des travaux historiques*, 1892, pp. 64-66, pl. xiii).

8. *MACEDONIA AND GREECE*.—The most important testimony is that of Philo, or of the letter of Agrippa to Caligula which he quotes (see above, p. 92). Thessaly, Boeotia, Macedonia, Aetolia, Attica, Argos, Corinth, and, finally, τὰ πλείστα καὶ ἄριστα Πελοποννήσου, are named by him as countries where Jews dwell. If we compare this general statement with the meagre special testimonies that are available, we see how full of *lacunae* our information is. Interesting dates are furnished by two manumission-deeds from Delphi. In the one a certain Atisidas gives their liberty to three Jewish female slaves (σώματα γυναικεία τρία αἰς ὀνόματα Ἀντιγόνα τὸ γένος Ἰουδαίων καὶ τὰς θυγατέρας αὐτῶν Θεοδώραν καὶ Δωροθέαν); in the other the subject of manumission is described as σώμα ἀνδρείον ἢ δοῦμα Ἰουδαῖος τὸ γένος Ἰουδαίων (*Sammlung der griechischen Dialekt-Inschriften*, herausg. von Collitz, Bd. ii. Heft 3-5 [1892-1896], Nos. 1722, 2029). Since these documents belong to the first half of the 2nd cent. B.C., we have to do in all probability with prisoners of war of the Maccabean period who had been sold into slavery in Greece. From 1 Mac 15²³ it is evident that at the same date there were Jews also in Sparta and Sicyon. In the time of St. Paul there were Jewish synagogues at Philippi, Thessalonica, Berea, Athens, Corinth (Ac 16²², 17¹⁻¹⁰, 17¹⁸⁻¹⁹). For Jewish-Greek inscriptions at Athens, see *CIAttic*. iii. 2, Nos. 3545, 3546, 3547; at Patrae, *CIG* 9896; in Laconia and Thessalonica, *REJ* x. 77 f.; at Mantinea, *REJ* xxxiv. 148.

EXTRA VOL.—7

In the great islands of Euboea, Cyprus, and Crete the Jews were very numerous. All three are named by Philo in the letter of Agrippa (see above). For Cyprus, cf. also 1 Mac 15²², Ac 4³⁶ 11²⁰ 13⁴⁶; Jos. *Ant.* XIII. x. 4. In the time of Trajan the Jews in Cyprus massacred thousands of the non-Jewish population and devastated the capital, Salamis. For this they were completely rooted out of the island (Dio Cass. lxxviii. 32; Euseb. *Chron.*, ed. Schoene, ii. 164 f.). For Crete, cf. 1 Mac 15²² (Gortyna); Jos. *Ant.* xviii. xii. 1, *BJ* II. vii. 1, *Vita*, 76.

Of the other islands there is mention in 1 Mac 15²² of Delos, Samos, Cos, and Rhodes. The three last named were off the coast of Caria. The settlement of Jews in them would thus be connected with their settlement in Caria. At Cos, as early as the time of Mithridates, we hear of great sums of Jewish money being carried off by that monarch (Jos. *Ant.* XIV. vii. 2: τὰ τῶν Ἰουδαίων ὀκτακῶσα τάλαντα). Rhodes was in the first half of the 1st cent. B.C. the home of two prominent authors who wrote against the Jews, viz. Posidonius and Apollonius Molon (both combated by Josephus in his work *c. Apion.*). In the time of Tiberius a grammarian named Diogenes lived there, whose habit it was to hold disputations only on the Sabbath day (Sueton. *Tiber.* 32). Delos, owing to its political and commercial importance during the Greek period, was a meeting-point for Oriental traders. That Jews with a Greek education were settled there about B.C. 100 at the latest, is shown by two Greek inscriptions emanating from the island of Rheneia (the burying-place of the inhabitants of Delos). The two inscriptions in question are of an imprecatory order, invoking Divine vengeance on the unknown murderers of two maidens. The prayers are unquestionably Jewish; the inscriptions are shown by the character of the writing to be not later than the end of the 2nd or the beginning of the 1st cent. B.C. (cf., on these interesting inscriptions, Deissmann, *Philologus*, lxi. [1902] 252-265). Acts in favour of the Jews of Delos, belonging to the time of Caesar, are quoted by Josephus in *Ant.* XIV. x. 8 and 14. We have evidence, further, of the presence of Jews at Paros (Jos. *Ant.* XIV. x. 8), Melos (*Ant.* xvii. xii. 1; *BJ* II. vii. 1), and Aegina (*CIG* 9894).

9. *ROME*.—When we pass to Italy, we find that Rome in particular was the home of a Jewish community which could be counted by thousands. According to Valerius Maximus (i. iii. 2), Jews were expelled from Rome by the praetor Hispalus as early as the year B.C. 139, in consequence of their attempts at proselytizing (the passage, which has not survived in the original, reads thus, as extracted by Nepotianus: 'Judeos quoque, qui Romanis tradere sacra sua conati erant, idem Hispalus urbe exterminavit'; or, as given by Paris: 'Idem Judaeos, qui Sabazi Jovis cultu Romanos inficere mores conati erant, repetere domos suas coegit' [Sabazius is a Phrygian divinity; there is here manifestly a confusion with Σαβαώθ = Heb. שָׁבָא; *Zēbā'ēth*]). Since, according to 1 Mac 14²⁴ 15¹³⁻²⁴, at that very time (B.C. 140-139) a Jewish embassy was sent to Rome by the high priest Simon, it would appear as if the propaganda referred to had been the work of parties in the train of this embassy (not the work of the members themselves).

The earliest witness to the existence of a Jewish colony in Italy (i.e. probably in Rome) is Cicero, *pro Flacco*, 28, from whom we learn that already in the time of Flaccus (i.e. B.C. 62-61) Italy was one of the places from which Jewish money was wont to be sent to Jerusalem. It was just then that the Jewish community at Rome received a

large reinforcement through those of their countrymen whom Pompey brought there as prisoners of war (B.C. 61). The latter were sold as slaves, but were soon afterwards set at liberty, as they proved an awkward possession to their masters (Philo, *Legatio ad Gaium*, § 23 [ed. Mangey, ii. 568]). There were many Jews in the audience when Cicero delivered his speech in defence of Flaccus, in the year B.C. 59 (Cicero, *l.c.*). On the death of Cæsar, their great protector, a multitude of Jews continued their lamentations for whole nights beside his funeral pyre (Sueton. *Cæsar*, 84). In the time of Augustus the Jews were already counted by thousands; we are told that a Jewish deputation, which came to Rome after the death of Herod, was joined on its arrival by 8000 Jews (Jos. *Ant.* xvii. xi. 1; *BJ* II. vi. 1). By the time of Tiberius repressive measures had begun. A resolution of the Senate was passed in the year A.D. 19, whereby all the Jews in Rome capable of bearing arms were deported to Sardinia to perform military service there, while the rest were banished from the city (Jos. *Ant.* xviii. iii. 5; Sueton. *Tiber.* 36; Tac. *Annal.* ii. 85; the last named speaks of banishment from Italy). This measure was inspired mainly by Sejanus; after the fall of the latter, in A.D. 31, Tiberius once more adopted a friendly policy towards the Jews (Philo, *Legatio ad Gaium*, § 24 [ed. Mangey, ii. 569]). We may therefore suppose that he granted them permission to return to the city. In any case, they had once more gathered in Rome at the time of Claudius, for he, too, made an attempt to expel them from the city. Suetonius tells us that this step was taken owing to the violent tumults 'impulsore Chresto' [i.e. occasioned by the preaching of Christ]. But the edict of banishment, issued probably in the year 49, was not enforced, but restricted simply to a prohibiting of any assembling on the part of the Jews (a decree of expulsion is spoken of in Ac 18² and by Sueton. *Claud.* 25; but, according to Dio Cass. lx. 6, Claudius, owing to the difficulty of carrying it into effect, contented himself with withdrawing from the Jews the right of assembly [ἐκέλευσε μὴ συναθροίσθαι]. The year 49 is given as the date by Orosius [vii. vi. 15], who appeals, incorrectly indeed, to Josephus). Since the prohibition of assembling was equivalent to a prohibition of worship, the existence of the Jews in Rome was seriously endangered. But they succeeded, we know not how, in surviving even this crisis as well as many later ones, for, as Dio Cassius (xxxvii. 17) sums up their history, 'though often oppressed, they always exhibited the most vigorous power of growth.' Educated Roman society looked down on them with contempt. The satirists, Horace, Persius, Martial, Juvenal, made them the butt of their wit (cf. Hausrath, *Neuest. Zeitgeschichte*², iii. 383-392). Yet they constituted a factor of no little importance in public life. Even at the Imperial court they entered into manifold relations, whether as slaves or as officials of higher rank. The Jewish societies of the *Ἀγιογερῆσται* and the *Ἀγιοπράνται* (see, on these, below, § ii.) were in all probability societies formed of placemen of Augustus and Agrippa. The empress Livia had a Jewish slave, Akme (Jos. *Ant.* xvii. v. 7; *BJ* I. xxxii. 6, xxxiii. 7). The emperor Claudius had friendly relations with Alexander (*var. lect.* Lysimachus), the Jewish alabarch of Alexandria, who had served his mother Antonia as minister of finance (Jos. *Ant.* xix. v. 1). At the court of Nero we find a Jewish actor, Alityrus (Jos. *Vita*, 3). Poppæa herself is spoken of as *θεοσεβής*, and she was always ready to lend her aid in obtaining a favourable response from the emperor to petitions brought to him by Jews (Jos. *Ant.* xx. viii. 11; *Vita*, 3).

The dwellings of the Jews were situated at first

and predominantly in the division of the city across the Tiber, which they occupied entirely in the time of Augustus (Philo, *Legatio ad Gaium*, § 23 [ed. Mangey, ii. 568]: τὴν πέραν τοῦ Τιβέρεως ποταμοῦ μεγίστην τῆς Ῥώμης ἀποτομήν, ἣν οὐκ ἔργον εἰ κατεχομένην καὶ οἰκουμένην πρὸς Ἰουδαίων). But at a later period they spread into other divisions of the city as well. We find them in the Campus Martius and in the very midst of the Roman business world, namely, in the Subura (see below, § ii.). Juvenal makes the jocular assertion that the sacred grove of Egeria before the Porta Capena was let to Jews and swarmed with Jewish beggars (*Sat.* iii. 12-16). As to the internal organization of the communities and the stage of culture they had reached, we derive information from the numerous tomb-inscriptions, composed for the most part in bad Greek but also in Latin, which have been found in the subterranean burying-places before the gates of Rome. These belong to somewhere between the 2nd and 4th cent. A.D. The Greek tomb-inscriptions known up to about fifty years ago are collected in *CIG* iv. Nos. 9901-9926. They emanate probably for the most part from a cemetery before the Porta Portuensis which was discovered in 1602, but whose site is now unknown. Rich materials were supplied by the cemetery discovered some forty years ago in the Vigna Randanini on the Via Appia (cf. Garrucci, *Cimitero degli antichi Ebrei scoperto recentemente in Vigna Randanini*, Roma, 1862; also the same author's *Dissertazioni archeologiche di vario argomento*, vol. ii. Roma, 1865, pp. 150-192). Since then some other cemeteries have been discovered, but these do not contain many inscriptions. Five inscriptions from a cemetery in Porto are given, from communications of de Rossi, by Derenbourg in *Mélanges Renier*, 1887, pp. 437-441. For some Latin ones, see *CIL* vi. Nos. 29756-29763. A complete collection of all the Jewish-Greek and Latin tomb-inscriptions at Rome known down to 1896 is given by Vogelstein-Rieger in *Geschichte der Juden in Rom*, i. [1896] 459-483. See also Berliner, *Geschichte der Juden in Rom*, i. [1893].

10. *THE REST OF ITALY, AND SPAIN, GAUL, GERMANY.*—The presence of Jews in these localities is not for the most part demonstrable before the period of the later empire. Relative antiquity belongs to the Jewish community at Puteoli (Dikæarchia), the principal port for the trade between Italy and the East. In addition to Phœnicians and other Orientals we meet here with Jews as well, at the latest about the beginning of the Christian era (Jos. *Ant.* xvii. xii. 1; *BJ* II. vii. 1). But even in a petty town like Pompeii their presence is demonstrable at the date of the destruction of the place, A.D. 79. The names 'Sodoma' and 'Gomora' are scratched on the wall of a house; and not only 'Maria,' which might be the feminine of Marius, but 'Martha,' occurs. The following also are found on earthen vessels: 'mur[ia] cast[a],' and 'gar[um] cast[um] or cast[imoniale],' with which cf. Pliny, *HN* xxxi. 95 (Man, *Pompeii in Leben und Kunst*, 1900, p. 15 f.).

In the period of the later empire the Jews were specially numerous in *Southern Italy* (see Neubauer, 'The Early Settlement of the Jews in Southern Italy' in *JQR* iv. [1892] 606-625). In Apulia and Calabria during the 4th cent. there were many places where the communal offices could not be properly filled, because the Jewish inhabitants declined to accept them (see the decree of the emperors Arcadius and Honorius [A.D. 398] in *Codex Theodosianus*, xii. i. 158). At Venosa (Venusia in Apulia, the birthplace of Horace) a Jewish catacomb has been discovered, with numerous inscriptions in Greek, Latin, and Hebrew, belonging to somewhere about the 6th cent. A.D.

(Ascoli, *Iscrizioni inedite o mal note greche latine ebraiche di antichi sepolcri giudaici del Napolitano*, Torino, 1880; *CIL* ix. Nos. 6195-6241). During this later period we meet with Jews also at Tarentum, Capua, and Naples, as well as in all the principal towns (Syracuse, Palermo, Messina, Agrigentum) of Sicily.—They do not appear to have been quite so thickly settled in *Northern Italy*. Yet we find them here too in most of the larger towns (Ravenna, Aquileia, Bologna, Brescia, Milan, Genoa).

For the other provinces of the West, *Spain, Gaul, Germany*, the testimonies likewise commence about the 4th cent. A.D. As it does not fall within the scope of the present article to examine all these in detail, we would refer the reader to Friedländer, *Darstellungen aus der Sittengeschichte Roms*, iii. [1871] 511 f.; the same author's *de Iudaeorum Coloniae*, Königsberg, 1876; and, above all, Th. Reinach, art. 'Judei' in Daremberg-Saglio's *Dictionnaire des Antiquités grecques et romaines*.

ii. ORGANIZATION OF THE COMMUNITIES.—Everywhere where Jews lived together in any number, they organized themselves into societies, with a view to maintaining their uniqueness, safeguarding their interests, and practising their worship. It is certain that this organization was not everywhere the same. Differences in regard to the possession of political rights, differences in the degree of authority they were allowed to exercise, differences in the stage of culture in the various places where Jews lived, brought with them differences also in the internal organization. Where they formed an imposing political power, the constitution was different from what it was in instances where they formed only petty, modest, private societies. Nevertheless, there are certain common features that run through almost the whole body of the immense Jewish Diaspora. We can prove both these points from a variety of examples, although in many instances we are unable to pursue the details.

We know practically nothing about the constitution of the Jewish communities in the *Euphrates districts* in pre-Talmudic times. Our survey must thus confine itself to the communities within the sphere of the Roman sway.

At *Alexandria* the Jews, owing to their large numbers and their political influence, found themselves in a peculiarly favourable situation. Although they possessed the rights of citizens (see below, § iv.), they constituted a State within a State. Not only had they their own residential quarters, as mentioned above, but they formed an almost independent community, with a kind of monarchical head. Their constitution is thus described by Strabo (*ap. Jos. Ant.* XIV. vii. 2): 'But there is also an ethnarch at their head, who rules the people and dispenses justice, and sees that obligations are fulfilled and statutes observed, like the archon of an independent State' (*καθίσταται δὲ καὶ ἐθνάρχης αὐτῶν, ὃς διοικεῖ τὸ ἔθνος καὶ διατετῆ κτίσεις καὶ συμβολαίων ἐπιμελεῖται καὶ προσταγμάτων, ὡς ἂν πολιτείας ἀρχὸν αὐτοτελοῦς*). The maintaining of this independence was materially facilitated during the Imperial period by the circumstance that, from the last of the Ptolemies down to Septimius Severus, Alexandria, unlike nearly all Hellenistic towns, had no city Senate (Spartian, *Severus*, 17; Dio Cassius, li. 17). In the time of Augustus a certain modification of the condition of things appears to have taken place. It is, indeed, noted in the decree of the emperor Claudius (*ap. Jos. Ant.* XIX. v. 2) that even Augustus, after the death of the ethnarch who held office during the administration of Aquila [10-11 A.D., see *Ephemeris Epigraphica*, vii. 448

(= *CIL* iii. Suppl. No. 12046)], 'did not prevent the appointment of ethnarchs' (*καὶ καθ' ὃν καιρὸν Ἀκύλας ἦν ἐν Ἀλεξανδρίᾳ, τελευτήσαντος τοῦ τῶν Ἰουδαίων ἐθνάρχου, τὸν Σεβαστὸν μὴ κεκαλυκέναι ἐθνάρχας γίγνεσθαι*). But the whole object of Claudius in this decree is to insist that even under Augustus the political rights and the religious freedom of the Jews in Alexandria had not been diminished. This is not at all irreconcilable with a certain modification of the internal constitution. But we are expressly told by Philo that such a modification was introduced by Augustus. His statement is to the effect that, when the Jewish *genarch* died, Magius Maximus, who was on the point of undertaking for the second time the office of administrator of Egypt, received instructions from Augustus that a *gerusia* was to be appointed to manage the affairs of the Jews (*in Flaccum*, § 10 [ed. Mangey, ii. 527 f.]: *τῆς ἡμετέρας γερονσίας, ἣν ὁ σωτὴρ καὶ ἐνεργέτης Σεβαστὸς ἐπιμελήσασθαι τῶν Ἰουδαίων εἴλετο, μετὰ τὴν τοῦ γενάρχου τελευτήν, διὰ τῶν πρὸς Μάγιον Μάξιμον ἐντολῶν, μέλλοντα πάλιν ἐν Ἀιγύπτῳ καὶ τῆς χώρας ἐπιτροπεύειν* [the traditional *Μάγιον* of the MSS is incorrect, the name was *Magius* Maximus, see *CIL* ix. No. 1125]). Accordingly, we may probably suppose that the difference between this later and the earlier organization consisted in the substitution of a *gerusia* for the monarchical authority of the ethnarch, or in the setting up of a *gerusia* side by side with him. In favour of the latter supposition it can be urged that the decree of Claudius appears to presuppose the continued existence of ethnarchs even after the interposition of Augustus. At the same time, it is also possible that Claudius only means to say in general that the Jews still continued to have their own superiors (*ἐθνάρχαι*). The *γερονσία* and the *ἀρχοντες* at its head are further mentioned by Philo several times in the same context (§ 10 [ed. Mangey, ii. 528]: *τῶν ἀπὸ τῆς γερονσίας τρεῖς ἄνδρες; ἢ. μεταπεμφαμένοι πρότερον τοὺς ἡμετέρους ἀρχοντας; ἢ. p. 528 f. τοὺς ἀρχοντας, τὴν γερονσίαν; ἢ. p. 534 τῶν μὲν ἀρχόντων*). Josephus mentions the *πρωτεύοντες τῆς γερονσίας* (*BJ* vii. x. 1). According to the principal passage of Philo (§ 10 [ed. Mangey, ii. 527 f.]), Flaccus caused thirty-eight members of the *gerusia* to be dragged into the theatre and scourged there. The whole number was, accordingly, greater than this; it may have been seventy, after the model of the Sanhedrin at Jerusalem. In any case the *ἀρχοντες* were not the whole body of the *γερονσία*, but only its committee of management. This is clear not only from the statements of Philo, but from the standing usage of the Greek word.*—A widely diffused error is the identification of the Egyptian *alabarch* with the Jewish *ethnarch*. The first named office was a purely civil one, although, of course, it was repeatedly held by Jews of note (see below, § iv.).

* In the above account no regard is paid to a passage in the Letter of Aristaeus, which, if its terms were more precise, would supply us with information regarding the organization of the Alexandrian Jews about the year a.c. 200. The passage (*Aristaeus Epist.*, ed. Wendland, § 810) reads: *στάντες οἱ ἱερεῖς καὶ τῶν ἱερωνίων οἱ πρῶτοντες καὶ τῶν ἀπὸ τοῦ πολιτεύματος οἱ ἐπὶ τῇ γερουσίᾳ τοῦ πλήθους ἴσαν* (this, which is the text of our MSS, is reproduced exactly in Euseb. *Præp. Evang.* viii. v. 6; *Jos. Ant.* xii. ii. 18 [ed. Niese, § 108] gives a free summary of the contents of the passage). Since there is no sufficient reason for deleting the *ἐπὶ* before *τῇ γερουσίᾳ*, there are four classes mentioned: (1) the priests, (2) the elders of the interpreters, (3) the elders of the *πολιτεύματος* of the Jews, (4) the *ἀρχοντες* of the *γερονσία* (cf. the explanation of Wendland in *Festschrift für Joh. Vahlen*, 1900, p. 128). The last two classes answer to the *γερονσία* and the *ἀρχοντες* as organized by Augustus. It would thus appear as if the organization in those early times had been similar to what it again became subsequent to the time of Augustus, whereas in the intervening period it had more of a monarchical form. There is, indeed, nothing strange in a modification of the constitution having taken place more than once in the course of three centuries. But the statement of pseudo-Aristaeus is too vague to build certain conclusions upon.

When we take a survey of what we know otherwise about the constitution of the communities of the Diaspora, certain common features show themselves amidst many local differences.

1. One point in which a difference shows itself concerns the name for the community. In so far as the latter forms an independent political corporation, it is called *πολιτεῦμα*. This term, however, is found only in the case of Alexandria (*Aristae Epist.* § 310), and of Berenike in Cyrenaica. In the latter instance the word occurs in a decree set up by the Jewish community in honour of the Roman governor, M. Tittius (*CIG* 5361; see facsimile in Roschach's Catalogue of the Museum of Toulouse [where the inscription now is], *Musée de Toulouse, Catalogue des Antiquités*, 1865, No. 225): *ἔδοξε τοῖς ἀρχουσι καὶ τῷ πολιτεύματι τῶν ἐν Βερενίκῃ Ἰουδαίων*. The names of the *ἀρχοντες* who stood at the head of the *πολιτεῦμα* are given at the beginning of the decree; there are nine of them. (On the use of *πολιτεῦμα* in a similar sense, see Perdrizet, 'Le *πολιτεῦμα* des Cauniens à Sidon' in *Revue archéol.*, trois. Série, xxxv. [1899] 42-48; and Wendland, *Aristae Epist.*, Index, s.v.).

In most towns the Jews formed at first a colony of foreigners side by side with the body of citizens. This is the condition implied in the expressions *κατοικία* (inscription at Hierapolis: *δώσει τῇ κατοικίᾳ τῶν ἐν Ἱεραπόλει κατοικοῦντων Ἰουδαίων*; cf. Ramsay, *Excpositor*, Feb. 1902, p. 96 f.), *λαός* (inscription at Hierapolis: *ἀποστείλει τῷ λαῷ τῶν Ἰουδαίων*), *ἔθνος* (inscription at Smyrna: *δώσει τῷ ἔθνει τῶν Ἰουδαίων*).^{*} These various designations all express the fact that the Jews belonged to a foreign nation, and in Greek towns were counted non-citizens.

The commonest designation, however, especially in later times, is *συναγωγή*. In Greek usage this word occurs only in the sense of 'assembly', 'festal gathering'. Thus, for instance, c. 200 B.C., in the so-called Testament of Epikteta (*CIG* 2448 = *Inscriptiones Graecae insularum maris Aegaei*, fasc. iii. No. 330), the society which is to attend to the hero-cult instituted by Epikteta is called *τὸ κοινόν*, but the annual gathering of the society *συναγωγὰ* (col. iv. line 23 f. *τῶν δὲ συναγωγῶν . . . γίνεσθαι ἐμ' ἡμεῖς Δελφίνῃ ἐν τῷ μουσείῳ καθ' ἕκαστον ἔτος ἀμέρας τρεῖς*). But in Jewish usage *συναγωγή* stands for the community as a corporation (in the LXX it mostly represents *קָהָל*; see art. CONGREGATION in vol. i.). This term has the most general sense, and hence could be retained even when the Jews through Greek culture and participation in the rights of citizenship had become assimilated to the rest of the inhabitants. They then formed a 'society' for the protection of their religious interests. We can adduce instances of the use of *συναγωγή* in this sense from inscriptions in Asia as well as at Rome. So, for instance, in Asia: at Phokæa (*ἡ συναγωγή ἐπέμψεν τῶν Ἰουδαίων Τάτιον Στράτωνος*), Akmonia in Phrygia (*οὗς τινας καὶ ἡ συναγωγή ἐπέμψεν*), Pantikapæum (*συνεπιτροπεύουσης δὲ καὶ τῆς συναγωγῆς τῶν Ἰουδαίων*).

At Rome the Jews were not, as at Alexandria, organized as a single great corporation, such a thing being apparently not tolerated by the authorities. They had, on the contrary, to content themselves with the more modest position of a number of small private societies. Each society had its special name. The following names are preserved in the inscriptions: 1. *συναγωγή Αἰγυπτιαίων* (*CIG* 9902, 9903 = Fiorelli, *Catalogo del Museo Nazionale di Napoli: Iscrizioni latine*, Nos. 1956, 1960; *CIL* vi. No. 29757; *REJ* xlii. 4). 2. *συναγωγή Ἀγριππιαίων* (*CIG* 9907). 3. 'Synagoga Bolumni' (*CIL* vi. No. 29756). These three societies are named after prominent persons [Bolumnus is =

Volumnus], whether for the reason that the members were in the service of these men (cf. *Pl.* 4th *ol. ἐκ τῆς Καίσαρος οἰκίας*), or because the latter were the patrons of the societies. Since we meet with *Ἀγριππῆσιοι* as well as *Αἰγυπτῆσιοι* side by side, the reference is doubtless to the first Augustus and his friend Agrippa. The name assumed by the societies would be retained even after the death of their patrons. Other societies take their name from the quarter of the city of Rome in which their members lived, namely, — 4. The *Καμπήσιοι*, called after the Campus Martius (*CIG* 9905 [more correctly in Garrucci, *Dissertazioni*, ii. 188, No. 4]; also Garrucci, *l.c.* ii. 161, No. 10; *CIL* vi. No. 29756 'mater synagogarum Campi et Bolumni'). 5. The *Σιβουρήσιοι*, named from the Subura, one of the most frequented quarters in Rome, a centre of trade and business life (*CIG* 6447 = Fiorelli, *Catalogo*, No. 1954). The following additional synagogues are also known: — 6. A *συναγωγή Αἰβρέων*, presumably that of the Hebrew-speaking Jews (*CIG* 9909; *Mélanges Renier*, 1887, p. 439 = Kaibel, *Inscr. Gr. Sicil. et Ital.*, No. 945). 7. A *συναγωγή Ἑλαίας*, named after the symbol of the olive tree (*CIG* 9904; de Rossi, *Bullettino di archeol. crist.* v. p. 16). 8. At Porto a *συναγωγή τῶν Καρκαρησίων*, which derived its name from the occupation of its members, who were *calcarienses*, 'lime-burners' (*Mélanges Renier*, 440; and in *CIG* 9906 we should in all probability read not *Καρχησίων* but *Καλκαρησίων* [see Garrucci, *Cimitero*, 38 f.]).

An isolated occurrence of another designation for the Jewish corporation of a city has yet to be mentioned, namely, the '*Universitas Iudeorum qui in Antiochensium civitate constituti sunt*.' This is found in an Imperial statute of the year A.D. 213 (*Code Justin.* i. ix. 1).

2. A pretty extensive uniformity appears to have prevailed in the matter of the organization and titles of the officials of the community. Almost everywhere we have evidence that the managing committee bore the name *ἀρχοντες*. 1. For Alexandria we have to refer to the above-cited passages from Philo. 2. For Berenike in Cyrenaica see in like manner the above-mentioned inscription, according to which there were nine *ἀρχοντες* at the head of the Jewish *πολιτεῦμα*. 3. At Antioch a Jewish *ἀρχων* is incidentally mentioned by Josephus (*BJ* vii. iii. 3). 4. At Tlos in Lycia the office of Jewish archon (*ἀρχωντεία*) is referred to in an inscription (see above). 5. For North Africa we have the testimony of Tertullian, who names quite generally, amongst other Jewish offices, that of *ἀρχων* (*de Corona*, 9: 'Quis denique patriarches, quis prophetae, quis levites aut sacerdos aut archon, quis vel postea apostolus aut evangelizator aut episcopus invenitur coronatus?'). It is therefore extremely probable that the archon mentioned in a Latin inscription in Utica is a Jewish one (*CIL* viii. No. 1205, also Addenda, p. 931). 6. In Italy, too, the title appears to have been in general use. In a Homily for the birthday of St. John (printed among the works of Chrysostom in editions prior to that of Montfaucon, e.g. ed. Paris, t. ii, 1687), which takes account of the conditions of Italy in the time of the later empire, it is made a matter of reproach to the Jews that, in opposition to the law of God, they begin the year, not in spring but in the month of September: 'mensem Septembrem ipsum novum annum nuncupant, quo et mense magistratus sibi designant, quos Archontas vocant.' When we turn to the Jewish inscriptions of Italy we meet with the title at Capua (*CIL* x. No. 3905 'Alfius Juda arcon arcossynagogus'), at Porto near Rome (Kaibel, *Inscr. Gr. Sicil. et Ital.*, No. 949 *Κλαύδιος Ἰωσή ἀρχων*), and with special frequency at Rome itself (*CIG* 9906, 6447, 6337;

^{*} In the case of the inscriptions that have been already quoted in § 1. we give here only the references.

Garrucci, *Cimitero*, 35, 51, 61, 67, also the same author's *Dissertazioni*, ii. 158, No. 4, 164, Nos. 15, 16, 17, 18; de Rossi, *Bullettino*, v. 16).—At Rome each of the societies, it is certain, had its own archons. They were elected, according to the Homily just named, annually in the month of September. There might be re-election (δὲς ἀρχων, *CIG* 9910; Garrucci, *Cimitero*, 47); nay, it would appear as if an archon might be elected for life, for this is the probable meaning of the repeatedly recurring διὰ βίου (*CIL* x. No. 1893 'Ti. Claudius Philippus dia viu et gerasiarches'; *CIG* 9907 Ζώσιμος διὰ βίου συναγωγῆς Ἀρχιεπίσκοπος). Cf., in general, Wesseling, *De Iudaeorum archontibus ad inscriptionem Berenicensem*, 1738; Schürer, *Die Gemeindeverfassung der Juden in Rom in der Kaiserzeit nach den Inschriften dargestellt*, 1879.

It is only for Italy that the presence of the title γερουσιάρχης or γερουσιάρχων is demonstrable. The first of these forms is found in the tomb-inscriptions at Rome (*CIG* 9902 = Fiorelli, *Catalogo*, No. 1956; Garrucci, *Cimitero*, 51, 62, 69, *Dissertazioni*, ii. 183, No. 27) and in the neighbourhood of Naples (*CIL* x. No. 1893); the other occurs at Venosa (*CIL* ix. Nos. 6213, 6221). The title can have no other meaning than 'president of the gerusia.' We thus learn from it, what without this evidence might have been assumed, that the communities had not only ἀρχοντες but also a γερουσία. The fact that, in spite of this, the title πρεσβύτερος nowhere occurs in the numerous tomb-inscriptions at Rome, is instructive. The elders were not officials in the proper sense, they were the confidential advisers of the community. Hence πρεσβύτερος was not a title. It is not till a very late period that we find it so employed (e.g. at Venosa, and that even in the case of women, *CIL* ix. Nos. 6209, 6226, 6230, cf. also *Codex Theodosianus*, xvi. viii. 2, 13, 14).

The office of ἀρχισυνάγωγος (EV 'ruler of the synagogue') was quite generally established. We can prove its existence for all the leading spheres of the Jewish Diaspora. 1. Egypt (Hadrian's alleged letter to Servianus ap. Vopiscus, *Vita Sittarini*, 8). 2. Asia Minor: Antioch in Pisidia (Ac 13¹⁵), Cilicia (Epiphani. *Haer.* xxx. 11), Smyrna (inscription in *REJ* vii. 161 f.), Myndos in Caria (*REJ* xlii. 1-4), Akmonia in Phrygia (see above, p. 94, for inscription; in this instance an ἀρχισυνάγωγος διὰ βίου). 3. Greece: Corinth (Ac 18¹⁷), Ægina (*CIG* 9894). 4. Italy: Rome (*CIG* 9906; Garrucci, *Cimitero*, 67), Capua (*CIL* x. No. 3905), Venosa (*CIL* ix. Nos. 6201, 6205, 6232), Brescia (Kaibel, *Inscr. Gr. Sicil. et Ital.*, No. 2304). 5. Africa: Hannām-Lif near Carthage (inscription on the mosaic pavement of the synagogue), Caesarea in Mauretania (*Acta Marcianae*, iv. 1; *REJ* xlv. 8). 6. The Roman empire in general (*Codex Theodosianus*, xvi. viii. 4, 13, 14).

The duty of the ἀρχισυνάγωγος was to take charge of the public worship. Since there was no official preacher in Jewish communities, any qualified member of the congregation being permitted to read the Scripture lessons or deliver an address or lead in prayer, it was necessary to have an official to direct and watch over the exercise of this freedom by the members. This was the ἀρχισυνάγωγος (Heb. נָשִׁיט עֲבֵר). He had to fix on the reader of the lessons and the leader in prayer, and to invite competent persons to address the congregation (Ac 13¹⁵). To him fell the general duty of seeing that nothing unseemly took place in the synagogue (Lk 13¹⁴), and he had doubtless to take care also that the synagogue buildings were kept in proper repair. He belonged to the number of the ἀρχοντες of the community, but his office was a more special one than that of the ἀρχοντες in general; hence the two offices are

named side by side as distinct (*CIG* 9906; Garrucci, *Cimitero*, 67; *CIL* x. No. 3905; Ac 14² [according to the text of D: οἱ δὲ ἀρχισυνάγωγοι τῶν Ἰουδαίων καὶ οἱ ἀρχοντες τῆς συναγωγῆς]). Since we meet with a γερουσιάρχης side by side with the ἀρχισυνάγωγος in the tomb-inscriptions of Rome and Venosa, those two offices also are to be regarded as distinct. That is to say, the ἀρχισυνάγωγος was not, as such, at the same time the head and president of the γερουσία. It is quite possible, however, that outside Italy [it is only in this country that we hear of a γερουσιάρχης] both offices were united in one person.

Finally, we encounter pretty frequently in the inscriptions the titles *pater synagogae* and *mater synagogae*:—πατήρ συναγωγῆς (*CIG* 9904, 9905, 9908, 9909; Garrucci, *Cimitero*, 52, *Dissertazioni*, ii. 161, No. 10; *Mélanges Renier*, 440); 'pater synagogae' (*CIL* viii. No. 8499; *Codex Theodosianus*, xvi. viii. 4); πατήρ τῶν Ἑβραίων (*Mélanges Renier*, 439 = Kaibel, *Inscr. Gr. Sicil. et Ital.*, No. 945); πατήρ τοῦ στέματος (*CIG* 9897); πατήρ λαοῦ διὰ βίου (*REJ* xxxiv. 148); 'pater,' without any addition (Garrucci, *Dissertazioni*, ii. 164, No. 18; *CIL* ix. Nos. 6220, 6221); 'mater synagogae' (*CIL* v. No. 4411, vi. No. 29756). The very circumstance that the title is found in the feminine as well as the masculine form, makes it probable that it does not stand for a communal office, strictly so called. Nor are we to understand it of the patron of the community; it was simply a title of honour given to aged members who had deserved well of the community (cf. the statement of ages in *CIG* 9904 ἐτῶν ἑκατῶν (sic) δέκα, and *CIL* vi. No. 29756 'quæ bixit an. lxxxvi. menses vi.').

The employment of the terms ἀρχοντες and γερουσία shows that the constitution of the Jews in the Diaspora was based on the communal constitution of the Greek cities. There are other traces besides this of the strong influence exercised by this model upon the external arrangements of the Jewish communities. Like the Greek communes, the Jewish communities honoured deserving men and women by the bestowal of a wreath and of the *proedria*. Thus the community of Phokæa honoured a woman who had taken upon herself the cost of building the synagogue, χρυσῷ στεφάνῳ καὶ προεδρία (see above, § i.). The Jewish strategos Chelkias was likewise honoured with a golden wreath (*Archiv für Papyrussforschung*, i. [1900] 48-56; *REJ* xl. [1900] 50-54). The community of Berenike resolved regarding the Roman governor, who had shown himself friendly to the Jews, στεφανοῦν ὀνομαστὶ καθ' ἐκάστην σὺνδοχὴν καὶ ρουμηλίαν στεφάνῳ ἑλατῶ καὶ λευκῶ (CIG 5361). At Alexandria honorific decrees and gifts of this kind, including also such as related to the emperors, were exhibited in the vestibules of the synagogues (Philo, in *Flaccum*, § 7 [ed. Mangey, ii. 524]). Hence Philo complains that, when the synagogues were wrecked by the Alexandrian mob, 'even the shields and golden wreaths and steles and inscriptions in honour of the emperors' perished in the general destruction (*Legatio ad Gaium*, § 20 [ed. Mangey, ii. 565]: καὶ σωτῶ τὰς σὺνκαθαυεθελίας καὶ συμπερηθελίας τῶν αὐτοκρατόρων τιμὰς δοτιδων καὶ στεφάνων ἐπιχρῶσιν καὶ στήλων καὶ ἐπιγραφῶν).

The influence of Greek processes of law shows itself in the Jewish legal instruments affecting manumission of slaves, found at Pantikapeum (Latyschev, *Inscriptiones antiquae orae septentr. Ponti Euxini*, Nos. 52, 53).—In Asia Minor there was a widely recognized right to exact a money penalty for the unauthorized use of a grave. Hence in a multitude of tomb-inscriptions we find a warning against such an act, with a specification of the fine that would be incurred. Penal cautions of this kind, couched exactly in the terms usual in

other quarters, may be read also on Jewish tombs at Smyrna, Hierapolis in Phrygia, Tlos in Lycia, Korykos in Cilicia (see above, § 1.). The fines are to be paid either to the Imperial *fiscus* or to the Jewish community (τῷ ἔθνει τῶν Ἰουδαίων [at Smyrna], τῷ λαῷ τῶν Ἰουδαίων, τῇ κατακτῆ τῶν Ἰουδαίων [at Hierapolis]), or to both.—To Greek influence should probably be attributed also the bestowal of titles and honorary offices upon women. In Greek communes and societies we encounter women with such titles as *πρύτανις*, *στεφανηφόρος*, *γυμνασιάρχος*, *ἀγωνοθέτις*, *δεκάπρωτος*; so amongst the Jews we have *ἀρχισυνάγωγος* (at Smyrna [REJ vii. 161 ff.], and Myndos in Caria [REJ xlii. 1-4]), *πρεσβυτέρα*, and 'mater synagoga' (see above).

But, in spite of this extensive adoption of Greek forms, the influence of Greece upon the Jewish communities must not be exaggerated. Not only their religion, but even their civil law was retained by them as far as possible. Everywhere they laid the greatest stress upon justice being administered in the bosom of Jewish communities *κατὰ τοὺς πατρίους νόμους* (Jos. Ant. XIV. x. 17). And this jurisdiction of their own was to a large extent conceded to them by the heathen authorities.

iii. TOLERATION AND RECOGNITION BY THE STATE AUTHORITIES.—The framework of political rights into which the Jewish communities had to fit themselves, varied in different places and at different times. We may distinguish some three forms under which the communities in the Diaspora attained to a political existence; and all three have more or less numerous analogues.

1. The nearest analogy is that of the *settlements of foreigners*, especially Orientals, in the great trading cities of the Græco-Roman world. In all the great seaports of the Mediterranean, during the era of Hellenism we meet with Egyptian, Phœnician, Syrian traders, who not only carry on their business in passing, but are permanently settled there in greater or smaller numbers, and have formed themselves into close corporations for the defence of their common interests. They built their temples, maintained their religious service, and supported one another in their material interests. Settlements of this kind are known to us from inscriptions, particularly at Athens (Egyptians, *Κιτρίαι* from Cyprus, *Σιδωνίαι*), Delos (Tyrians, *Βερύτηναι*, Egyptians), Puteoli (Tyrians, *Βερύτηναι*). The members of the corporation lived in the city as strangers (non-citizens), but their society enjoyed toleration and recognition from the State authorities. To this class belonged, without any doubt, the oldest settlements of the Jews in many places. They formed a *κατοικία*, i.e. a colony of foreigners, separate from the political commune.

2. Another analogy is presented by the *private societies* which existed in enormous numbers and in a great variety of forms throughout the whole of the Græco-Roman world. Religious or commercial interests, or both together, led in ancient as in later times to the forming of a great many 'unions' (*βίαιαι*, *ἐταῖραι*, *collegia*), which had their own administration of funds, and exercised a certain discipline over their members. In looking after their own affairs they occupied an independent position in relation to the political commune similar to that of the colonies of foreigners just described, but were distinguished from them by the circumstance that (at least as a rule and for the most part) they consisted of natives, whether citizens and freedmen, or non-citizens and slaves. To this class belong most of the Jewish communities in later times. For the more the Jews became assimilated to their surroundings, the more they passed from the position of foreigners to that of homeborn, particularly in instances where they possessed the rights of citizenship. With all this, however, they appear as a rule to have retained a

certain position of isolation, for the amount of jurisdiction which, with the consent of the city authorities, they exercised within their own circle was, so far as we know, for the most part greater than was conceded to other religious or trades unions.*

3. A third analogue to the communities of the Jewish Diaspora is seen in the *corporations of Greeks and Romans in non-Greek or non-Roman countries*. The Greeks, in view of the wide diffusion of Hellenism, had less occasion for forming such corporations. These were much commoner where Romans were concerned. As the ruling nation, the Romans outside Italy everywhere laid claim to a unique position. They were subject neither to taxation by the communes nor to the jurisdiction of the city authorities, but formed independent bodies alongside of the communal societies of the particular cities in which they lived. Examples of this kind are to be met with in great numbers throughout the whole extent of the Roman Empire (Mommsen, *CIL* iii. Suppl. p. 1306, on No. 7240; Mitteis, *Reichsrecht und Volksrecht in den östlichen Provinzen des römischen Kaiserreichs*, 1891, pp. 143-158). It is with this entirely independent position which these associations held in or rather alongside the communes, that we may compare the position of the Jews in Alexandria and in the city of Cyrene as described by Strabo (ap. Jos. Ant. XIV. vii. 2). For here they were not subject, as would appear, to the rule of the communal authorities, but constituted an independent corporation side by side with the rest of the body of citizens. Their independence thus went beyond what was enjoyed by the first two classes above described.

A uniform presupposition in all these political regulations was *State toleration of the Jewish cultus*. This was enjoyed by the communes almost everywhere and at most periods of time. In the empires of the Ptolemies and the Seleucids the religious freedom of the Jews was a matter of course. But the early Ptolemies and Seleucids also conferred important political rights upon their Jewish subjects (see below, § iv.).† Antiochus the Great protected the cultus at Jerusalem by royal statutes (Jos. Ant. XII. iii. 3, 4). [The genuineness of these is, indeed, disputed (see Büchler, *Die Tobiaden und die Oniaden*, 1899, pp. 143-171; Willrich, *Judaica*, 1900, pp. 48 f., 58-60), but on what appear to the present writer insufficient grounds. The genuineness is held, amongst others, by Ed. Meyer, *Die Entstehung des Judenthums*, 1896, pp. 66, 68]. The persecution of the

* Mommsen (*Hist. Zeitschrift*, lxi. [1890] 421-426) has contended that it was only down to the fall of Jerusalem that the Jews were regarded as a people (*gens, ius*), and that after that event 'the place of the privileged nation was taken by the privileged confession.' That is to say, in the earlier period political privileges had been accorded to all who were Jews by birth, and to them alone, whereas in the later they belonged to all who professed the Jewish religion, and to them alone. But, in the opinion of the present writer, this is pushing an observation which is correct in itself to far too sharp a point, when an actual juristic formula is thus arrived at. Even during the period of the late empire the Jews were still in many instances regarded as a 'people' (the inscription of Smyrna τῷ ἔθνει τῶν Ἰουδαίων dates at the earliest from the 3rd cent. A.D., and even the inscriptions of Hierapolis must be placed subsequent to A.D. 70). And it was just the later emperors who sought to prevent the 'confession' from being extended beyond the circle of the Jewish nation; that is to say, they granted privileges only to the people, and not to the confession. Mommsen's view, however, will be found correct to this extent, that the Jews, as time went on, advanced more and more from the first of the above two classes to the second.

† Cf., on the friendly disposition of the early Ptolemies to the Jews, in general, Jos. c. Apion. ii. 4, 5.—A Ptolemy once actually granted the right of asylum to a Jewish *proseucha* (*CIL* iii. Suppl. No. 6583 Βασιλεὺς Πτολεμαῖος Εὐεργετὴς τῇ προσευχῇ ἑστῆκεν). The monarch referred to is probably Ptolemy III., for had it been Euergetes II. = Ptolemy VII., we should have expected his consort to be named along with him).

Jews by Antiochus Epiphanes was quite an exceptional phenomenon. Pre-eminent as a friend of the Jews was Ptolemy VI. (Philometor), who even permitted a Jewish temple to be built in Egypt (see below, § v.). The hostile attitude to the Jews assumed by Ptolemy VII. (Physcon) was due, not to their religious but their political partisanship (Jos. c. *Apion*, ii. 5).

The free exercise of their religion was expressly allowed to the Jews also by the Roman legislation, which safeguarded it from any attempts at suppression by the Greek communes. It was especially to Caesar and Augustus that the Jews were indebted for their formal recognition in the Roman Empire. A whole series of acts have been preserved for us by Josephus (*Ant.* XIV. x., XVI. vi.), partly resolutions of the Senate, partly edicts of Caesar and Augustus, partly those of Roman officials or of communal authorities of the same date. These all have the same purpose, namely, to secure for the Jews the free exercise of their religion and the maintenance of their privileges (cf., on these acts, especially the investigation of Mendelssohn in *Acta Societatis Phil. Lips.*, ed. Ritscheli, v. [1875] 87-288; also *Theol. Literaturzeitung*, 1876, cols. 390-396; Niese in *Hermes*, xi. [1876] 466-488). While Caesar prohibited in general all *collegia* except those that had existed from remote antiquity, the Jewish communities were expressly excluded from this prohibition (Jos. *Ant.* XIV. x. 8: καὶ γὰρ Γάιος Καῖσαρ ὁ ἡμέτερος στρατηγὸς καὶ ὑπατος ἐν τῷ διαταγματὶ κωλύων θιάσους συνάγεσθαι κατὰ πόλιν μόνους τούτους οὐκ ἐκάλυπεν οὔτε χρημάτων συνεισφέρειν οὔτε σύνδεσσαν ποιεῖν). We find, for instance, a Roman official appealing to this decree in warning the authorities of Paros not to interfere with the Jews in the practice of their religious observances (Jos. l.c.). It is likewise to the influence of Caesar that we should probably trace the four decrees quoted by Josephus, *Ant.* XIV. x. 20-24. The object, direct or indirect, of all of them is to guarantee to the Jews of Asia Minor (Laodicea, Miletus, Halicarnassus, Sardis) the unimpeded exercise of their religion. After Caesar's death, the two contending parties vied with one another in maintaining the privileges of the Jews. On the one hand, Dolabella, the partisan of Antony, who made himself master of Asia Minor in the year B.C. 43, confirmed to the Jews the exemption from military service and the religious freedom granted them by former governors (*Ant.* XIV. x. 11, 12). On the other hand, M. Junius Brutus, who in the spring of the year 42 was making wall-like preparations in Asia Minor against Antony and Octavianus, persuaded the Ephesians to adopt a resolution that the Jews were not to be interfered with in their observance of the Sabbath and their other religious practices (*Ant.* XIV. x. 25).

All this had the effect of bringing about a legal standing, in virtue of which Judaism was a '*religio licita*' throughout the whole of the Roman Empire (Tertull. *Apolog.* 21, 'insignissima religio, certe licita' [the expression, by the way, is not a technical one in Roman law, which speaks of '*collegia licita*']). That, amongst others, the Jews in the city of Rome enjoyed this legal standing, is specially testified by Philo for the time of Augustus (*Legatio ad Gaium*, § 23 [ed. Mangey, ii. 568 f.]). It is true, however, that down to the 2nd cent. A.D. foreign *sacra* could be practised only outside the 'pomerium.'

The State recognition of the Jewish communities is essentially connected with two important concessions: the right of administering their own funds, and jurisdiction over their own members. The former of these had a special importance, owing to the collecting and transmitting of the dues paid to the temple at Jerusalem. The

governor Flaccus, a contemporary of Cicero, had interfered with this (Cic. in *Flaccum*, 23; see the text of the passage quoted above, § i.). The communal authorities of Asia likewise appear, even after the edicts of Caesar's time and in spite of these, to have continued to act in a similar way. The decrees of the time of Augustus accordingly bear chiefly upon this point. As Augustus permitted the export of sums of money from Rome itself (Philo, *Legatio ad Gaium*, § 23 [ed. Mangey, ii. 568 f.]), it was impressed upon the communes of Asia Minor and Cyrene that in this matter they must put no obstacle in the way of the Jews (Jos. *Ant.* XVI. vi. 2-7; Philo, *Legatio ad Gaium*, § 40 [ed. Mangey, ii. 592]).

Of equal importance for the Jewish communities was the possession of a jurisdiction of their own. Since the Mosaic law has regard not only to the performance of the cultus but also to the relations of civil life, placing the latter under the control of a Divine law, it was intolerable to the Jewish conscience that Jews should be judged by any code of laws but their own. Wherever the Jews came they brought their own system of law with them, and executed justice, according to its standard, in the case of their fellow-members. It may be regarded as probable that the employment of their own code in civil processes was everywhere sanctioned by the State authorities, in so far, that is to say, as complaints of Jews against one another were concerned. Not only must this have self-evidently been the case at Alexandria, but it is witnessed to also for Asia Minor by a despatch of Lucius Antonius (governor of the Province of Asia, B.C. 50-49) to the authorities of Sardis (Jos. *Ant.* XIV. x. 17: 'Ιουδαῖοι πολῖται ἡμέτεροι προσελθόντες μοι ἐπέδειξαν αὐτοὺς σύνδορον ἔχειν ἰδίαν κατὰ τοὺς πατρίους νόμους ἀπ' ἀρχῆς καὶ τόπον ἰδίαν, ἐν ᾧ τὰ τε πράγματα καὶ τὰς πρὸς ἀλλήλους ἀντιλογίας κρίνουσιν' τοῦτο τε αἰτησάμενός τιν' ἐξῆρ ποιεῖν αὐτοῖς, τηρῆσαι καὶ ἐπιτρέψαι ἔκριναν). The terms of this despatch show that even those Jews who possessed the Roman citizenship (πολῖται ἡμέτεροι), and as Roman citizens could have sought redress before the *conventus civium Romanorum*, preferred to bring their disputes before the Jewish tribunal (*σύνδορος, conventus*) for decision. Even in the legislation of the later Imperial period, this Jewish jurisdiction continued to be recognized in civil cases (*Codez Theodosianus*, II. i. 10 [Decree of the emperors Arcadius and Honorius of the year 398]: 'Sane si qui per compromissum, ad similitudinem arbitrorum, apud Judæos vel patriarchas ex consensu partium in civili duntaxat negotio putaverint litigandum, sortiri eorum iudicium jure publico non vetentur: eorum etiam sententias provinciarum iudices exsequantur, tanquam ex sententia cognitoris arbitri fuerint attributi').

A jurisdiction of their own in criminal cases, in the complete sense of the expression, was certainly not conceded to the Jews in most places. On the other hand, not only do we meet with undoubted instances of the exercise of a correctional police authority (see Mommsen, *Zeitschrift für die Neutest. Wissenschaft*, ii. [1901] 88 f.), but this would even appear to have been permitted by the State authorities. It is from this point of view that we are to understand how Saul of Tarsus applied to the Sanhedrin at Jerusalem for full powers to punish Jewish Christians living outside Palestine (Ac 9: 22¹⁹ 26¹¹). He himself was afterwards as a Christian scourged five times by the Jews (2 Co 11²⁴); in these instances we are certainly to think, not of Palestinian but of foreign Jewish communities. At Corinth the proconsul Gallio leaves it to the Jews to proceed against St. Paul according to their own judgment, for he himself will not act as judge when an offence

against the Jewish religion is concerned (Ac 18¹²⁻¹⁶).

In addition to the freedom of initiative secured for the Jews in the instances we have just described, the Roman toleration paid a very large regard to their religious sensibilities. One chief difficulty concerned the question of *military service*. Such service was quite impossible for a Jew in a non-Jewish army, for on the Sabbath day he might neither bear arms nor march more than 2000 cubits. This question became a specially practical one when, on the outbreak of the civil war between Cæsar and Pompey in the year B.C. 49, the party of Pompey commenced the enrolment of troops on a large scale all over the East. In the Province of Asia alone the consul Lentulus raised two legions of Roman citizens (Cæsar, *Bell. Civ.* iii. 4). Amongst these were included the resident Jews who possessed the Roman citizenship. At their own request, however, Lentulus exempted them from military service, and gave his conscription agents everywhere instructions to the same effect (Jos. *Ant.* xiv. x. 13, 14, 16, 18, 19). Six years later (B.C. 43) Dolabella, with express appeal to the earlier edicts, confirmed the privilege of *ἀσπαρασία* to the same Jews (*Ant.* xiv. x. 11, 12). Further privileges enjoyed by the Jews were the following:—1. By a statute of Augustus they were exempted from citation before a court on the Sabbath day (*Ant.* xvi. vi. 2, 4). 2. If a public payment of money or delivery of corn fell on a Sabbath, the Jews were to receive their share on the following day (Philo, *Legatio ad Gaium*, § 23 [ed. Mangey, ii. 569]). 3. Instead of the oil furnished by the communes, the use of which was forbidden to the Jews, they received a money equivalent (Jos. *Ant.* xii. iii. 1).

The whole political standing above described was never in later times essentially and permanently altered. The measures taken by Tiberius against the Roman Jews affected only the city of Rome. The great question of the *cult of the Emperor*, which afterwards became the main occasion of the bloody persecutions of the Christians, led in the case of the Jews to a merely transitory and local persecution. Augustus and Tiberius were, indeed, gratified when the provincials voluntarily offered them divine honours after the Greek fashion, but they did not demand that this should be done. Caligula was the first to make such a demand universally. Since the Jews on account of their religion could not comply with it, a bloody persecution began at Alexandria, due at first to the anti-Jewish mob, but afterwards carried on by the governor himself. But Claudius hastened to issue an edict of toleration by which all the rights and privileges of the Jews were restored (Jos. *Ant.* xix. v. 2-3). No subsequent attempt was ever made to compel the Jews to take part in the cult of the Emperor. It came to be regarded as an ancient privilege that they were exempt from this. They had thus the advantage over the Christians in that their privileges had been long established before the cult of the Emperor became the State religion, and was demanded of subjects as a test of loyalty. While the Christians had to atone by bloody martyrdom for their refusal to sacrifice to the Emperor, no such demand was ever made upon the Jews.

It is true, indeed, that certain vacillations in their attitude to the Jews are found on the part of the Emperors. Claudius himself felt compelled to take measures against the Jews in the city of Rome. But these were local, and were not thoroughly carried out. The great war of Vespasian and the destruction of the temple at Jerusalem led, in the case of the Jews of the Diaspora, to the result that the former temple tax of two

drachmæ had now to be paid to the temple of Jupiter Capitolinus (Jos. *BJ* vii. vi. 6; Dio Cassius, lxi. 7). This must certainly have been repugnant to the feelings of the Jews. But their religious freedom was not otherwise interfered with by Vespasian. Their political rights were even expressly protected by him, for instance in Alexandria and Antioch (*Ant.* xii. iii. 1, *BJ* vii. v. 2). Domitian exacted the two drachmæ tax with the utmost rigour (Sueton. *Domit.* 12), and inflicted severe penalties on any Romans who passed over to Judaism (Dio Cass. lxxvii. 14). But the existing rights of the Jews were not annulled. Under Nerva a milder condition of things was inaugurated, in so far as he forbade any one to be accused for 'living in the Jewish manner' (Dio Cass. lxxviii. 1). By this order the 'calumnia fisci Judaici,' i.e. accusations laid by informers in the interests of the Jewish *fiscus*, was abolished (cf. coins inscribed 'calumnia fisci Judaici sublata').

A violent shock to the existing condition of things was given by the great Jewish revolts under Trajan and Hadrian. The latter was due, not wholly but partially, to Hadrian's *prohibition of circumcision* (Spartian, *Hadrian.* 14). This prohibition, so far as we can learn, was quite a general one, issued on grounds of humanity, and not specially directed against the Jews. But the carrying out of such a decree would have been tantamount to a destruction of real legal Judaism. Hadrian's immediate successor, Antoninus Pius, however, while he retained the prohibition in other instances, once more granted the Jews permission to circumcise their children (*Digest.* xlviii. 8, 11 pr.). Similarly, Septimius Severus forbade only the formal passing over to Judaism (Spartian, *Sept. Sev.* 17). Of Alexander Severus we are expressly told that he 'Judeis privilegia reservavit' (Lamprid. *Alex. Sev.* 22). The policy of the Christian Emperors was not always the same, but in general was directed towards preventing the spread of Judaism, without annulling its existing rights.

iv. RIGHTS OF CITIZENSHIP, AND SOCIAL STANDING.—It has already been remarked above that the Jews as a rule, at least in pre-Christian times, lived in Greek cities as *foreign settlers*, like the Egyptians, Phœnicians, or Syrians. That is to say, they were not *citizens*, and had no share in the management of municipal affairs. But there were not a few towns where they possessed the citizenship. This was the case especially in such cities as had been newly founded, or whose constitution had been reorganized during the Greek period. To the category of the recently founded belong pre-eminently the two capitals of the empires of the Ptolemies and the Seleucids, namely, Alexandria and Antioch.

At Alexandria the Jews, we are assured by Josephus, were placed by Alexander the Great on a footing of equality with the Macedonians from the very first founding of the city (c. *Apion.* ii. 4: *ἐς κατοικησιν δὲ αὐτοῖς ἔδωκεν τῶν Ἀλεξανδρῶν καὶ τῶν παρὰ τοῖς Μακεδόσι τιμῆς ἐπέτυχον . . . καὶ μέχρι νῦν αὐτῶν ἡ φυλὴ τὴν προσήγοραν ἔχειν Μακεδόνες*). In another passage Josephus asserts that Alexander, by way of rewarding them for their services against the Egyptians, gave them equal rights with the Hellenes, and that the Diadochi further permitted them to call themselves Macedonians (*BJ* ii. xviii. 7: *Ἀλεξανδρὸς . . . ἔδωκεν τὸ μετοικεῖν κατὰ τὴν πόλιν ἐξ ἰσοτιμίας* [var. *ἰσότητος*, probably a corruption of *ἰσομοιρίας*] *πρὸς τοὺς Ἕλληνας. διέμενεν δ' αὐτοῖς ἡ τιμὴ καὶ παρὰ τῶν διαδόχων, οἱ . . . καὶ χρηματίζον ἐπέτρεψαν Μακεδόνας*). In the decree of the emperor Claudius, quoted by Josephus (*Ant.* xix. v. 2), it is said that the Jews had been settled side by side with the Alexandrians from the first,

and that they had obtained equal political rights 'from the kings' (ἰσὺς πολιτείας παρὰ τῶν βασιλέων *τερευθῆτας*). These rights were expressly confirmed to them by Caesar. A brass pillar set up by the latter in Alexandria proclaimed that the Jews were Alexandrian citizens (*Ant.* XIV. x. 1, c. *Apion.* ii. 4). Philo likewise notes that the Jews had the legal standing of Ἀλεξανδρεῖς and not that of the Διόγυπτιοι (in *Flaccum*, § 10 [ed. Mangey, ii. 528]). The annulment of their rights during the persecution under Flaccus was merely temporary, for Claudius soon hastened to restore their ancient privileges (*Ant.* XIX. v. 2). Even after the great war of A.D. 70 the petition of the Alexandrians, that the Jews should be deprived of the citizenship, was not granted (*Ant.* XII. iii. 1).

A similar condition of things prevailed at *Antioch*. Here, too, from the founding of the city by Seleucus I. (Nikator), the Jews had received the same rights of citizenship as the Macedonians and Hellenes (*Ant.* XII. iii. 1: Σέλευκος ὁ Νικάτωρ ἐν αἷς ἔκτισεν πόλιν ἐν τῇ Ἀσίᾳ καὶ τῇ κάτω Συρίᾳ καὶ ἐν αὐτῇ τῇ μητροπόλει Ἀντιοχείᾳ πολιτείας αὐτοῖς ἤξισεν καὶ τοῖς ἐνοικισθεῖσιν ἱστούμοις ἀπέφηνεν Μακεδόσιν καὶ Ἑλλήσιν, ὡς τὴν πολιτείαν ταύτην ἐστὶ καὶ νῦν διαμένειν; and to a similar effect c. *Apion.* ii. 4 [Niese, § 39]). In this city also their privileges were set forth on brass tablets (*BJ* VII. v. 2 [Niese, § 110]). In one passage Josephus expresses himself as if these rights were first conferred upon them by the successors of Antiochus Epiphanes (*BJ* VII. iii. 3). But probably he is thinking of a restoration of their privileges after the period of persecution under Epiphanes. When in the time of Vespasian the Antiochenes begged that the Jews might be expelled from the city or deprived of their privileges, this petition was refused as in the case of the similar application of the Alexandrians (*BJ* VII. v. 2 [Niese, §§ 108-111], *Ant.* XII. iii. 1).

According to the above-cited passage (*Ant.* XII. iii. 1), Seleucus I. (Nikator) granted the rights of citizenship to the Jews, and placed them on a footing of equality with the Macedonians and Hellenes, not only at Antioch, but in all the cities founded by him in Asia and Syria. The number of these cities was very considerable (Appian, *Syr.* 57). Even if the statement of Josephus does not justify the conclusion that there were Jewish settlers in *all* of them, this must have been the case with no inconsiderable proportion.

In all the above instances equality of rights on the part of the Jews was based upon the recent foundation of the cities during the Greek period. In the older cities, if Jews came to settle, they could not obtain the citizenship. There was one contingency, however, which made this possible, namely, if the political constitution of the city came to be organized afresh. Such recastings of their constitution took place frequently at the commencement of the Greek period in the cities of Western Asia Minor. Alexander the Great himself overthrew the oligarchical governments that prevailed there, and replaced them by democratical constitutions (Arrian, i. xviii. 2). This was followed by a series of fluctuating forms in the troubled times of the Diadochi. The definite restoration of autonomy and democracy in the cities of the Ionian coast was essentially the work of Antiochus II. (Theos), B.C. 261-246 (Jos. *Ant.* XII. iii. 2: τῶν γὰρ Ἰωνίων κινήσαντες ἐπ' αὐτοὺς [*scil.* τοὺς Ἰουδαίους] καὶ δεόμενον τοῦ Ἀγρίππου, ἵνα τῆς πολιτείας, ἣν αὐτοῖς ἔδωκεν Ἀντίοχος ὁ Σελεύκου υἱὸς ὁ παρὰ τοῖς Ἑλλήσιν θεὸς λεγόμενος, μόναι μετέλθωσιν, κ.τ.λ.). This general testimony of Josephus, according to which Antiochus II. bestowed their *πολιτεία* on the Ionians, is confirmed by a number of special inscriptional testimonies. It is probable that at this time of the political re-

organization of the cities in Western Asia Minor the Jews amongst others received the rights of citizenship. It is wrong, indeed, to refer the αὐτοῖς in the above quotation to the Jews; it really stands for the Ionians. But the context of the passage makes it probable that at the same time with the Ionians the Jews also obtained the citizenship, and that in the time of Agrippa the non-Jewish inhabitants demanded the sole possession of this for themselves (so also Ramsay, *Expositor*, Feb. 1902, pp. 92-95). At all events, in the time of Josephus the Jews in *Ephesus* and in the rest of *Ionii* possessed the rights of citizens (c. *Apion.* ii. 4 [Niese, § 39]: οἱ ἐν Ἐφέσῳ καὶ κατὰ τὴν ἄλλην Ἰωνίαν τοῖς αὐθιγενέσι πολιταῖς ὁμωνυμοῦσιν, τοῖτο παρασχόντων αὐτοῖς τῶν διαδόχων). Incidentally we learn that they enjoyed the citizenship in Sardis also (*Ant.* XIV. x. 24), and even outside Asia Minor, at Cyrene (*ib.* XVI. vi. 1).

Wherever the Jews had the rights of citizenship, they must in their totality have formed a *φύλη* by themselves. For the citizens of Greek towns were divided into *φύλας*, which also practised their own special religious cults. On the latter ground it is inconceivable that an individual Jew, if he desired to remain a Jew at all and to adhere to his religion, could hold the citizenship in a Greek town (attention has been called to this point especially by Ramsay, *Expositor*, Jan. 1902, pp. 22-29). Only where a considerable number of Jews formed a *φύλη* of their own, on the same footing as the other *φύλας*, could they be citizens. If then St. Paul was a citizen of Tarsus (Ac 21³⁰), we must conclude that the Jews in general who were settled there possessed the citizenship. Ramsay (*l.c.* pp. 29-33) suggests that they may have obtained it on the occasion of the rearranging of the constitution of the city by Antiochus IV. about the year B.C. 170. This appears, however, very improbable in view of the hostility of Antiochus to the Jews.

Even when the Jews formed a *φύλη* of their own, they found themselves, as citizens of a Greek town, in a *self-contradictory position*. They had to take their part in municipal business. But this included, amongst other things, the care of the native religious cults, a duty towards which the Jews were compelled to maintain a uniformly passive relation. And this passivity was a constant ground of complaint on the part of their heathen fellow-citizens. If they desired to be citizens, they must also honour the gods of the city. Such was the demand made by the representatives of the Ionian cities when they brought their complaint against the Jews before Agrippa (*Ant.* XII. iii. 2: ἀξιούντων, εἰ συγγενεῖς εἰσὶν αὐτοῖς Ἰουδαῖοι, σέβεσθαι τοὺς αὐτῶν θεούς). The same view was taken everywhere in the Greek cities. Hence it is quite intelligible that the Jews should have been most exposed to the dislike, nay the hatred and persecution, of the heathen inhabitants just in those places where they possessed the citizenship. So it was, for instance, at Alexandria (*BJ* II. xviii. 7, persecution under Caligula), Antioch (*BJ* VII. iii. 3-4, v. 2), the cities of the Ionian coast (*Ant.* XII. iii. 2); and the same was the case at Caesarea in Palestine, where they had obtained, through Herod the Great, the *ισοπολιτεία* (*Ant.* XX. viii. 7, 9, *BJ* II. xiii. 7, xiv. 4-5, xviii. 1). Everywhere it was only the superior authority of the Roman *imperium* that protected them in the enjoyment of the privileges that were recognized as belonging to them.

In addition to the local franchise, not a few of the Jews of the Diaspora possessed also the *Roman citizenship*. At Rome many of them had the degree of citizenship enjoyed by freedmen (*libertini*), for a large proportion of the community was

made up of the descendants of those prisoners of war who were brought to Rome by Pompey and sold as slaves, but afterwards manumitted (Philo, *Legatio ad Gaium*, § 23 [ed. Mangey, ii. 568 f.]). This citizenship was, indeed, not a complete but a limited one (Mommson, *Römisches Staatsrecht*, iii. 1, 420-457).—In Asia many Jews would appear to have been possessed of Roman citizenship: so, for instance, at Ephesus (*Ant.* xiv. x. 13, 16, 19), Sardis (*ib.* 17), Delos (*ib.* 14), in general (*ib.* 18). Hence it is not surprising to find St. Paul also in possession of it (*Ac* 16^{37a}. 22²⁵⁻²⁹ 23²⁷). We are not, indeed, aware how the Jews attained to this rank.

The advantages which accompanied the possession of Roman citizenship were very considerable. The possessor was exempt from degrading punishments such as scourging (*Ac* 16^{37a}. 22^{25a}) and crucifixion. He had also the right not only to appeal to the Emperor against a judgment that had been pronounced, but to 'call upon' the Emperor at the very commencement of the process and at every stage of it, i.e. to demand that the examination should be conducted at Rome, and judgment given by the Emperor himself (*Ac* 25^{10a}. 21 26³²; cf. Mommson in *Ztschr. f. Neutest. Wissenschaft*, ii. [1901] 90-66). Of one important right the Jews made no use. While they were entitled as Roman citizens to bring civil processes before the special tribunals consisting of Roman citizens, which were found everywhere in the provinces, they preferred to have them decided by the courts belonging to their own communities (*Ant.* xiv. x. 17).

The social standing of the Jews must have varied greatly in different places. They appear to have been most favourably situated in Egypt, especially at Alexandria. Owing to their prosperity and culture they here played an important rôle in public life, and under some of the Ptolemies they even rose to high offices in the State. Ptolemy VI. (Philometor) and his consort Cleopatra 'entrusted their whole empire to Jews, and the commanders of the whole army were the Jews Onias and Dosithus' (*Jos. c. Apion.* ii. 5). Another Cleopatra, the daughter of the royal pair above named, likewise appointed two Jews, Chelkias and Ananias, to the chief command of her army in the war against her son Ptolemy Lathyrus (*Ant.* xiii. x. 4, xiii. 1-2).^{*} In an inscription at Athribis there is mention of a Ptolemy, ἐπιστάτης τῶν φυλακῶν (chief of police), who, in conjunction with the Jewish community, built the synagogue of the place (see above, p. 96^a). Although it does not necessarily follow from this that he was a Jew, the probability, in view of analogous cases, is in favour of such having been the case. The Ἀντωνίος Μαλχαῖος who in the time of Trajan held the ὀρμοφυλακία at Syene (see above, p. 96^b), may also have been a non-Jewish Semite, but ought in all probability to be regarded as a Jew. We may also remind the reader of the above (p. 96^b) mentioned Jewish tax-collectors in the Thebaid during the earlier Ptolemaic period.

During the Roman period several Jews of noble birth and wealth held the office of *alabarch*. So, for instance, Alexander, the brother of the philosopher Philo (*Jos. Ant.* xviii. vi. 3, viii. 1, xix. v. 1, xx. v. 2), and a certain Demetrius (xx. vii. 3). The view that the *alabarch* was the head of the

Jewish community is certainly wrong. He is in all probability identical with the ἀπαρχαρχης, whose office was that of chief superintendent of customs on the Arabian frontier, i.e. on the east side of the Nile. (A 'vectigal Arabarchiae per Ægyptum atque Augustamnican constitutum' is mentioned in the *Codex Justin.* iv. xli. 9; an inscription found at Koptos contains a tariff fixing 'how much is to be raised by those who farm the ἀποστέλλον (?) at Koptos under the arabarchy'; see the text of this inscription in *Bulletin de corresp. hellénique*, xx. [1896] 174-176; on the office of the *alabarch* in general, see the Literature in Schürer, *GVV*³ iii. 88 f., and add Wilcken, *Griechische Ostraka*, i. [1899] 347-351). Perhaps it is the office of the *alabarch* that is in view when Josephus says that the Romans 'continued (to the Jews of Alexandria) the position of trust given them by the kings, namely, the watching of the river' (*c. Apion.* ii. 5 *fin.*: 'maximam vero eis fidem olim a regibus datam conservaverunt, id est fluminis custodiam totiusque custodiam' [the last word is certainly corrupt]). The 'watching of the river' refers to watching it in the interests of levying customs. In any case the *alabarch* was not an official of the Jewish community, but a man who held a prominent place in civil life.—Tiberius Alexander, a son of the *alabarch* Alexander, even reached the highest grades of a Roman military career, although at the expense of renouncing his ancestral religion.

Outside Egypt the Jews do not appear to have anywhere gained so influential a footing. Yet instances are not wanting elsewhere of their rising to positions of prominence. In Jerusalem at the outbreak of the war of A.D. 66 there were Jews holding the rank of Roman knights (*Jos. BJ* ii. xiv. 9). At Ephesus and Venosa we meet in tomb-inscriptions with Jewish 'head physicians' (ἀρχίατροι; see *Ancient Greek Inscriptions in the British Museum*, iii. 2, No. 677; Ascoli, *Iscrizioni inedite o mal note*, 1880, No. 10). These were appointed by the city, and are thus to be regarded as municipal officials. In Italy the Jews from the time of Septimius Severus were admitted to the city offices (*Digest.* L. ii. 3: 'Eis qui Judaicam superstitionem sequuntur, divi Severus et Antoninus honores adipisci permiserunt').

v. RELIGIOUS AND INTELLECTUAL LIFE.—In spite of all its contact with Greek surroundings, the Jewish people preserved its religious uniqueness in a surprising fashion. The effects of the Maccabæan rising manifestly extended also to the Diaspora. As in the mother country at the time of Antiochus Epiphanes there was in aristocratic circles an inclination towards Hellenism even in religious matters, so in the city of Jasus in Caria we hear about the same time of a Νικήτας Ἰάσονος Ἱεροσολυμίτης who contributed money to support the festival of the *Dionysia* (see above, p. 94^a). But the Maccabæan rising removed the danger of a wholesale syncretistic amalgamation of Judaism with Hellenistic heathenism. Instances of this last phenomenon do, indeed, occur. The Jewish Hellenist Artapanus considered that he was glorifying Judaism by representing the patriarchs and Moses as not only the creators of all secular culture, but the founders of the Egyptian religious cults in the sense in which Artapanus himself understood these (see the fragments of his writings in Euseb. *Præp. Evang.* ix. 18, 23, 27). In the temple of Pan at Apollonopolis Magna in Upper Egypt two Jews recorded their thanks to 'the god' for an act of deliverance (*CIG* 4838^a). In a professed letter of Hadrian it is even said in general that in Egypt all the Jewish ἀρχισυνάγγοι are 'astrologers, haruspices, and quacks' (*Vopisc. Vita Saturnini*, c. 8, in the *Scriptores Historiæ Augustæ*: 'Nemo illic archisynagogus Judæorum, nemo Samarites,

^{*} Chelkias and Ananias were the sons of the high priest Onias iv., the founder of the temple of Leontopolis.—A Greek inscription, now in the Berlin Museum, contains a fragment of a decree in honour of a certain Chelkias or, as is more probable, his son. All that has survived of the name is the genitive Χαλκίου. The subject honoured was ὑπαρχηγός, and received as a mark of distinction a golden wreath (see Willrich, *Archiv für Papyrologie*, i. [1900] 48-50). It is possible, but not certain, that this Chelkias is identical with the one mentioned by Josephus.

nemo Christianorum presbyter non mathematicus, non haruspex, non aliptes'). Side by side with syncretistic mixture we find also philosophic indifference to the literal sense of the Law. There were Jews with an education in philosophy who, on the basis of the allegorical interpretation of Scripture, regarded the higher, philosophical, or ethical sense of the commandments as the only one of value, and neglected the observation of the literal sense (Philo, *de Migratione Abrahami*, § 16 [ed. Mangey, i. 450]: εἰσι γὰρ τινες οἱ τοῦ λόγου νόμους σύμβολα νοητῶν πραγμάτων ὑπολαμβάνοντες τὰ μὲν ἄγαν ἠκρίβωσαν, τὼν δὲ βαθέως ὠλεώρησαν). It may be also assumed in general that the observance of the Law on the part of Greek Judaism did not attain to the rigour and preciseness of the Pharisaic party in Palestine. Greek culture formed a heavy counter-weight to the latter. Nevertheless, the Judaism of the Diaspora asserted itself in the main along the same lines as in Palestine. Syncretistic movements and philosophic indifference never gained the upper hand. The leaders of the communities took care that even in the Diaspora the religious life was regulated by the standard of the Law of Moses. Any one who seriously broke off from the latter was expelled from the community. Even a philosopher like Philo complains of the depreciation and neglect of the literal sense mentioned by him in the above quotation. With all his skill in the allegorical interpretation, he yet maintained the binding character of the literal sense, nay he attempted to show that all commands, even those relating to ceremonial purity and to food, are based upon reason and nature.

One principal agency in maintaining the ancestral faith was found in the regular gatherings in the synagogue on the Sabbath. It is beyond question that these were held also in the Diaspora in every instance where a community had been organized. According to Philo, 'On the Sabbath day in all cities thousands of houses of instruction are opened, in which understanding and self-restraint and ability and justice and all virtues are taught' (*de Septenario*, § 6 [ed. Mangey, ii. 282]). The apostle Paul, in the course of his journeys in Asia Minor and Greece, found Jewish synagogues everywhere, e.g. at Antioch in Pisidia (Ac 13¹⁴), Iconium (14¹), Philippi (16²⁻³), Ephesus (18¹⁹⁻²⁰ 19⁸), Thessalonica (17¹), Berea (17¹⁹), Athens (17¹⁷), Corinth (18⁴ 7). In the larger cities there were more than one synagogue; at Alexandria there were a great many (Philo, *Legatio ad Gaium*, § 20 [ed. Mangey, ii. 565]: πολλὰ δὲ εἰσι καθ' ἑκάστην πόλιν τῆς πόλεως).

The language used in the synagogue service was undoubtedly as a rule Greek. The Church Fathers expressly testify that the Greek Bible was used in the synagogues (Justin, *Apol.* i. 31, *Dial. c. Tryph.* 72; Tertull. *Apol.* 18; Pseudo-Justin, *Cohort. ad Græc.* 13). The Old Testament is familiar to St. Paul in the LXX translation only. It is not therefore likely that the Hebrew and Greek texts were used both together. The prayers and the address were also, it may be regarded as certain, in Greek, for in every instance where this language prevailed the Jews adopted it as their mother tongue. This is shown above all by the tomb-inscriptions. The early period at which the language of the LXX began to exercise a commanding influence on liturgical forms, and especially on the language of prayer, has been recently shown by the above (p. 97^b) mentioned imprecatory inscriptions of the island of Rheneia near Delos. These should be dated, in the opinion of epigraphic experts, not later than about B.C. 100. They are couched quite in the style of the LXX (ἐπικαλούμαι καὶ ἐξῶ τὸν θεὸν τὸν ὕψιστον, τὸν κύριον τῶν πνευμάτων καὶ πάσης σαρκός . . . κύριε ὁ πάντα ἐφορῶν καὶ οἱ ἄγγελοι θεοῦ, ᾧ πᾶσα ψυχὴ ἐν τῇ σήμερον ἡμέρᾳ

ταπεινοῦται μεθ' ἱκεσίας). Even the Palestinian Rabbis could not avoid sanctioning the writing of the Scriptures in Greek and the uttering of prayers in the same language. The exceptions not covered by this permission are very trifling (*Megilla*, i. 8; *Sôta*, vii. 1, 2). For the ordinary prayers (*Shēma*, *Shēmōneh 'Esreh*, and blessing at meals) the employment of any language is expressly sanctioned.

No sacrificial cultus was legal, after the Deuteronomic reformation, outside Jerusalem. In spite of this, such a cultus was practised in Egypt for more than two centuries. The occasion of its establishment was the deposition of the ancient high priestly family during the general upheaval under Antiochus Epiphanes. The high priest's son, Onias, having no prospect of gaining his ancestral office at Jerusalem, came to Egypt in the time of Antiochus v. (Eupator) (B.C. 164-162). Here he received a cordial welcome from Ptolemy VI. (Philometor) and his consort Cleopatra. The king placed at his disposal an ancient ruined temple at Leontopolis in the nome of Heliopolis, which had formerly been a sanctuary of the ἄγρια Βούβαστις.* This was converted by Onias into a Jewish sanctuary, modelled after the temple at Jerusalem, but smaller and plainer, and with a number of deviations in details. Since there were already priests on the spot in sufficient numbers, a formal Jewish temple-cultus was established, which continued uninterrupted from that date (c. B.C. 160) until, after the destruction of Jerusalem, the temple of Leontopolis was also closed by the Romans in the year A.D. 73 (see, in general, Jos. *Ant.* xii. ix. 7, xiii. iii. 1-3, x. 4, xx. x. 3; *BJ* i. i. 1, vii. x. 2-4; *Orac. Sibyll.* v. 429-511). It is true that this cultus was never regarded by the teachers of the Law in Palestine as justifiable, and that the sacrifices offered in the Egyptian temple had only a very limited degree of validity attributed to them (Mishna, *M'nâḥoth*, xiii. 10). Nay, even the Egyptian Jews themselves were not satisfied with their own cultus, but kept up their connexion with Jerusalem. They performed the pilgrimages to that city like all other Jews (Philo, *de Providentia*, quoted in Euseb. *Præp. Evang.* viii. 14, 64, ed. Gaisford), and their priests, when they married, always had the genealogy of their wives veiled at Jerusalem (Jos. *c. Apion.* i. 7).

Amongst the most important obligations which the Law imposed upon the Jews was that of paying the manifold dues to the priests and to the temple at Jerusalem: firstfruits, heave-offering, tithe, firstlings, dues in connexion with baking and killing, offerings on divers occasions, and finally the two drachmæ tax. So far as a due levied on the products of the soil of the Holy Land was concerned (firstfruits, heave-offering, tithe), the Jews of the Diaspora were, as a matter of course, exempt. But there remained still enough of performances to which even a Jew living far from Jerusalem was bound, if he meant to be true to his religion. If the dues could not, owing to distance, be paid in kind, they had to

* Its situation is most precisely defined in Jos. *Ant.* xiii. iii. 2: τὸ ἐν Διονύσει πάλαι τοῦ Ἡλίουπολιν ἱερὸν συνετίθη . . . τροπικῶς γινόμενον διὰ τῆς ἀγρίας Βουβαστίως. In other passages Josephus says merely that the temple was situated 'in the nome of Heliopolis' (*Ant.* xii. ix. 7, xiii. x. 4, xx. x. 3; *BJ* i. i. 1, vii. x. 3). We have to do, then, not with the better-known Leontopolis, which formed a nome of its own, but with another, which was included in the nome of Heliopolis. The latter lay on the east side of the Delta. In this neighbourhood there are still two mounds, each bearing the name Tell el-Jehudiyyeh (see Naville, 'The Mound of the Jew and the City of Onias' in *Seventh Memoir of the Egypt. Explor. Fund.*, 1890). One of the two will be identical with the foundation of Onias. Naville fixes upon the one farthest south, on account of its being nearer to Heliopolis. The more northern one, however, seems to the present writer the likelier site, because there are evidences of the Bubastis cult at it. See also above, p. 98^a.

be converted into money. All these obligations were, so far as we know, punctiliously and zealously discharged by the far scattered Diaspora. The result of this was the accumulation of immense stores of wealth at the central sanctuary. Josephus (*Ant.* XIV. vii. 2) expressly accounts for these by pointing to the great extent of the Diaspora. Philo gives a detailed account of the collecting and delivery of the money (*de Monarchia*, ii. 3 [ed. Mangey, ii. 224]): 'The temple derives its revenue not merely from a few pieces of land, but from other and much more copious sources, which can never be destroyed. For so long as the human race endures, the temple's sources of revenue will also continue, since their permanence is bound up with that of the whole world. For it is prescribed that all Jews over twenty years of age shall pay annual dues. . . . But, as might be expected in the case of so numerous a people, the dues amount to an enormous sum. In almost every city there is a receiving office for the sacred funds, into which the dues are paid. And at fixed times men of noble birth are entrusted with the conveyance of the money to Jerusalem. The noblest are chosen in every city, in order that the hope of every Jew may be transmitted unimpaired. For the hope of the pious is based upon the regular payment of the dues.' In the Euphrates districts the principal treasuries were in the cities of Nisibis and Nehardea. In these the money was first collected and thence transmitted to Jerusalem at a fixed time, many thousands taking charge of its conveyance, in order to protect the sacred treasure from the plundering attacks of the Parthians (*Jos. Ant.* XVIII. ix. 1).

The transmission of such large sums to Jerusalem repeatedly gave rise to collisions with the Roman and municipal authorities. Flaccus, during his administration of the Province of Asia, prevented the money being sent, and municipal authorities were constantly inclined to do the same. But the Roman legislation subsequent to the time of Cæsar protected the religious liberty of the Jews in this as in other matters (see above, p. 103). After the destruction of the temple, the payment of sacred dues necessarily underwent transformation. The two drachmæ tax was converted into a Roman tax; other dues which depended upon the continued existence of the temple could not, in the nature of things, be paid any longer. But even under these circumstances the Jewish people, by voluntary self-taxation, continued to assert their unity. A new central authority, the Patriarchate, was created, to which at least a portion of the prescribed sacred dues was paid every year. The collecting of these was now accomplished by deputies of the Patriarchate, the so-called *apostoli*.

The principal means of maintaining an exchange of thought between the mother country and the Diaspora, and of furthering and maintaining a close fellowship between the two, was found in the frequent *festival pilgrimages* made by Jews from all parts of the world to Jerusalem. 'Many thousands from many thousand cities journeyed to the temple at every festival, some by land and some by sea, from east and west, from north and south' (Philo, *de Monarchia*, ii. 1 [ed. Mangey, ii. 223]). The number of Jews ordinarily present at Jerusalem at the feasts is reckoned by Josephus at 2,700,000, a number which, indeed, also includes the permanent population of Jerusalem (*BJ* vi. ix. 3).

While the Jews scattered all over the world thus held fast to the religion of their fathers, and that in the legal form it had received through the Restoration under Ezra, they had become in other respects *Greeks*. Greek culture asserted its supremacy in a decisive fashion here, as elsewhere. In

Asia Minor, Greece, Egypt, Cyrenaica, nay even at Rome, Greek was the mother tongue of the Jews. All the relics of writing that have come down to us from the Diaspora during the last centuries B.C. and the first centuries A.D. are in Greek. This is true especially of the tomb-inscriptions, whose evidence is of importance because they are concerned not only with the rich and noble, but with the poor and humble (see above, § i., for the most important materials under this head). These tomb-inscriptions are at the same time a faithful mirror of the stage of culture that prevailed in the communities. The Greek of the tomb-inscriptions at Rome is barbarous, and shows, what might otherwise have been supposed that the Jews here remained for the most part at a low social level. In other places the inscriptions of various kinds that have survived reveal a higher degree of culture.

It was in Egypt that the Jews most thoroughly assimilated the Greek culture. Here, as is shown by the case of Philo, they read the Greek poets and philosophers; Homer, Sophocles, and Euripides; Plato, Aristotle, and Zeno. All this could not, as a matter of course, be without far-reaching influence upon their whole intellectual life. Their conception of the world and of life, in spite of their adherence to legal Judaism, was powerfully influenced in its contents by Greek culture. The literature produced by Hellenistic, especially Alexandrian, Judaism is, in consequence, of an extremely varied character. It serves, on the one hand, religious ends, the defence and propagation of Judaism (Apologetics and Propaganda); and, on the other hand, it follows Greek models in History, Poetry, and Philosophy. So far as poetical art is concerned, it was indeed somewhat meagrely represented. The extant fragments of Greek dramas and Greek epics treating of biblical subjects can scarcely be said to be marked by any high poetic strain (see the fragments of a drama treating of the story of the Exodus from Egypt by the tragedian Ezekiel *ap. Euseb. Præp. Evang.* ix. 28, 29; and the fragments of an epic on the history of Jerusalem by the elder Philo *ap. Euseb. ib.* ix. 20, 24, 37). In philosophy, however, the Jews made very notable achievements. Greek philosophy had indeed advanced far on the way towards monotheism. It had also, as represented by many of its teachers, an ethical cast. Hence the Jews discovered here many elements which were capable of assimilation by them. These they adopted with remarkable powers of adaptation; and in this way, by combining the religious world-conception of the Old Testament with the philosophic world-conception of the Greeks, they created a new unique philosophy of religion which was as much Jewish as Greek. A clear picture of this is given us by the writings of the Alexandrian Philo, which have come down to us in great numbers.

The adoption of Greek culture enabled the Jews again for their part to exercise an influence on their heathen environments. From all that we know, they carried on a vigorous and successful propaganda. Those whom they gained over were either formally received into the communities by circumcision, or they attached themselves to them in a loose form 'as God-fearing' (*σεβόμενοι, φοβούμενοι τὸν θεόν*), forming a kind of appendage to the communities (see art. PROSELYTE in vol. iv.). This Jewish propaganda served in great measure as a preliminary to Christianity. In general the Jewish Diaspora, as was remarked at the beginning of the present article, paved the way along which the first preachers of the gospel went forth into the world, and in many ways laid the foundation of the rapid success of their preaching.

[Additional Note to § i. (5).—The early settlement of Jews in Alexandria is confirmed also by an inscription, discovered in 1902 in the neighbourhood of Alexandria, which reads thus: 'Τῶν βασιλέων Πτολεμαίου καὶ βασιλίσσης Βερενίκης ἀδελφῆς καὶ γυναικὸς καὶ τῶν τέκνων τὴν προσευχὴν ὁ Ἰουδαῖος' (see *REJ* xlv. [1902] p. 162). The inscription refers in all probability to Ptolemy III. Euergetes (247–222 B.C.).]

LITERATURE.—Remond, *Versuch einer Gesch. der Ausbreit. des Judenthums von Cyrus bis auf den nützlichen Untergang des Judenthums Staats*, Leipzig, 1789; Gieseler, *Lehrbuch der Kirchengeschichte*, Bd. i. Abth. 1 (4 Aufl. 1844), p. 53 ff.; Winer, *REJ*², art. 'Exil' (i. 357–360), and 'Zerstreuung' (ii. 727–730), also the articles on particular cities, e.g. 'Alexandria', 'Antiochia', 'Cyrene', 'Rom', etc.; J. G. Müller, art. 'Alexandrinische Juden' in Herzog's *RE*¹ i. [1854] 235–239; Reuss, art. 'Hellenisten', *ib.* i. v. 701–705, 2 v. 738–741; Lutterbeck, *Die Neuest. Lehrbegriffe*, i. [1852] 99–120; Frankel, 'Die Diaspora zur Zeit des zweiten Tempels' in *Monatsschr. für Gesch. und Wissensch. des Judenthums*, 1853, pp. 409–429, 449–463, also the same author's art. E. SCHÜRER.

RELIGION OF GREECE AND ASIA MINOR.—

Introduction.

A. PRIMITIVE ANATOLIAN AND PRE-HELLENIC RELIGION.

I. Sacred Stones and other Inanimate Objects: (1) stones, pillars, columns, etc.; (2) thrones; (3) weapons; (4) wooden posts.

II. Sacred Trees.

III. Sacred Animals: (1) animals as parts of the god; (2) the bull; (3) the goat; (4) the sheep; (5) the horse; (6) the swine; (7) the bee; (8) the sacredness of domesticated animals; (9) domesticated animals as sacrifice; (10) the lion, the stag; (11) the serpent; (12) sacredness of wild animals.

IV. Sacred Places: (1) mountains; (2) sacred caves and mountain glens; (3) sacred springs and lakes; (4) development of the sacred place into a religious centre or *Hieron*; (5) sacred places in the religion of Greece.

V. Relation of the original *autochthonic* religion to image-worship: (1) coexistence of the two kinds of worship; (2) votive images and representations of the Deity; (3) shrines (*naoi*).

VI. The Divine in human form and character: (1) the Great Mother; (2) the growth of mythology as the story of the Great Mother; (3) myths of the goddess and the god; (4) the birth and death of the Divine nature.

VII. Ritual and Ceremonial: (1) the origin of ritual; (2) the Mysteries; (3) nature of the Mysteries; (4) the character of the Phrygian and the Greek Mysteries; (5) the growth of ritual; (6) purification; (7) confession; (8) approaching the Deity; (9) priests; (10) *hieroi*.

VIII. Influence on Society and Life: (1) marriage; (2) *hierodouloi*; (3) women guards; (4) self-mutilation; (5) burial; (6) brotherhoods and guilds; (7) government and administration; (8) household *protégés*; (9) religious influences on social conditions.

IX. History and Chronology: (1) development of the Anatolian Religion in history; (2) local diversity in Anatolian Religion; (3) chronology.

B. THE HELLENIC RELIGION.

I. Early Greek Religion.

II. Greek Religion and Greek Law.

III. The Elements of Hellenic Religion.

IV. The Growth of Hellenic Religion: (1) continuity of development; (2) growth of mythology; (3) polytheism and the Hellenic unity; (4) formation of the Hellenic Pantheon; (5) the Hellenic Religion an ideal; (6)

theory of the Hellenic Pantheon; (7) moralization of the Hellenic gods; (8) the Daimones and the Divine in the physical world; (9) restrictions on the nature of the gods; (10) State gods and gods within the State; (11) extension of the worship of a god; (12) State recognition of the Pan-Hellenic Religion; (13) the Hellenic Religion a part of the City-State; (14) the Hellenic conception of piety.

V. The Hellenic classification of deities as Olympian and Chthonian: (1) Hellenism and the thought of death; (2) the Olympian and the Chthonian gods.

VI. The Religion of Apollo and the Delphic Oracle (L. R. F.).

C. LATER DEVELOPMENT OF RELIGION IN THE GREEK WORLD.

I. Religion in Literature and Philosophy.

II. The attitude of St. Paul to Greek Philosophy.

III. Degradation of the Hellenic Religion: (1) foreign influence; (2) susceptibility to foreign religious influence; (3) manner in which foreign religion entered Greece; (4) itinerant priests; (5) magic; (6) the worship of living men as deities.

IV. Religion of the Græco-Asiatic cities.

V. Decay and death of the Hellenic Religion.

Literature.

The religion of the Greek peoples and of the races which lay between Hellas and the strictly Oriental nations, in communication with both, influencing and influenced by both, is a subject which can hardly be omitted in a survey of the religions which came into immediate relation to Christianity in the earliest stage of its history; and yet it is a subject which at the present time is hardly susceptible of adequate treatment within narrow space. The antiquities of the most notable Hellenic cults have been much investigated, though not always in a very intelligent fashion or with a proper conception of the religious bearing of the details so carefully and laboriously collected. Hence the religious ideas and conceptions entertained by the various tribes of Greece, often differing widely from one another, have hardly been sufficiently observed and studied in their gradual evolution; and, in fact, evidence is so scanty in regard to most of them, that it is doubtful if the attempt could be successful.

If the religion of the strictly Greek tribes is still very obscure, much more is this the case with what may be called the half-Greek peoples* of Asia Minor. This is a subject still almost unstudied, or studied occasionally, in a haphazard way, partially, and as a sort of appendix to the religion of Greece proper. This way of entering on the study, under the bias and colouring influence of Greek prepossession, is, we believe, injurious, and has caused much misapprehension. One should rather begin the study of Greek religion from Asia Minor, both as being more primitive in many of its forms, and as having sent into Greece a series of religious waves which strongly affected that country. At a later period the Greek influence returned over Asia Minor, and overran it in a superficial way; but this new period in religion was broadly different, and easily distinguishable from the older and truly Anatolian period. It is necessary to begin afresh in that country, to collect and classify and value the religious facts, and on this basis to give an account of the religion of the peoples; but that is a great work, which is far too large for the narrow limits of an article. Probably the most useful way at present will be to state as simply and clearly as possible the views which the writer is disposed to hold, avoiding disputation and argument, and therefore making little reference to discrepant views, except where such reference is the shortest way of stating the subject clearly. This gives unavoidably an appearance of dogmatism, which the writer can only apologize for as the necessary result of the attempt to make the subject clear in small space: if the views of others were stated, either the article would become a confusing congeries of irreconcilable theories, or it would grow too large in estimating and discussing

* On the meaning which we attach to this term 'half-Greek,' see the following paragraph.

other views. It is also necessary to explain that the writer's views are founded on a far from complete survey of the facts, and are liable to correction, doubtless, in many details, if the opportunity should ever be granted him of writing a complete account of Anatolian religion; but the general principles are the result of more than twenty years of interest and occasional study, and are not likely to be much changed by further thought.*

The phrase 'half-Greek races' is not used in an ethnological sense in this article. It does not imply a mixture of Greek and non-Greek blood in any race. It is employed to indicate a gradual shading off of character, as one proceeds from Greece proper towards the East. The view which we take is that even the tribes of Greece proper were far from uniform in blood and stock. The Hellenic idea and civilization which those tribes evolved was far too many-sided to arise among a homogeneous nation: there were combined in its composition a great variety of characteristics contributed by various tribes of very diverse character, nursed and matured amid the peculiar circumstances of the seas and lands that touch and mingle in south-eastern Europe and Asia Minor. The lands that border on the Aegean Sea were pre-eminently the nursing-home of Hellenism, and the further we go from it the more faint and evanescent become the traces of the Greek spirit. Hellenism is only partially a racial fact; it denotes also a general type of intellectual and political development, of industrial education and artistic achievement.

The point of view from which we start may be stated in outline as follows. (1) The religion of the Anatolian race or races, in its origin, was to a considerable extent an idealized presentation of the actual life of the time, exhibiting a Divine model and authorization for the existing customs and institutions in family and society and the State as a whole.

(2) Their religion was the authority for the laws and rules on which rested their industry and agriculture and general well-being. Perhaps it originally taught those rules to a simple people, in which case the knowledge embodied in them probably belonged at one time to the priests alone. Certainly, the sanction for the rules was religious: the violation of them was punished by the Divine power through sickness, whether disease of any part of the body or the general indefinite fact of fever, which was considered to be a consuming of the body and strength by Divine fire.

(3) The Divine power was the ruler of the people, acting through its visible representatives, namely, the kings or priests: there is every probability that the king was the priest: the priest-kings or priest-dynasts are a most characteristic feature of Anatolia.

This is obviously the religion of a comparatively civilized people, not of a barbarous race. And it must be distinctly understood from the outset that we are not investigating the origin of the religious forms which are described in the following pages: we are attempting to understand clearly and state precisely the religious ideas of a population, possessing an ordered system of government of a peculiar and well-marked character, surrounded by many equipments and devices and implements of an artificial and developed character, practising both agriculture and a very highly developed

system of treating domesticated animals and adapting them to the benefit of mankind.

A question of extreme interest and importance is, how far any signs of progress and development can be observed in the religion which we are studying. It may be doubted whether there can be detected anything in the way of growth from within, of elevation of the religious idea and of the moral standard in the application of religion to life, such as is the most striking feature in the history of Hebrew religion. On the whole, the history is one of deterioration and degradation rather than one of elevation. Any improvement that does take place seems rather attributable to, and fully explained by, the meeting of different races with different religious ideas corresponding to their differing social and family organization; and is probably not caused by any mind working from within the religion, unfolding and vitalizing the germs of truth which it contained, and burning away the envelope and accretion of accidental idolatrous forms that clung to it. We use intentionally these last words, for it will appear that the fundamental and essential idea in the Anatolian religion is not strictly idolatrous, and that the development in polytheism and image-worship was gradual, and was external and accidental rather than natural and necessary.

A. PRIMITIVE ANATOLIAN AND PRE-HELLENIC RELIGION.—In treating this subject, reference must often be made to primitive Greek, or, as it may be called, Pelasgian worship (anticipating part B, §§ I, II), which illustrates the Anatolian religion so remarkably as to demonstrate that some intimate relation once existed between them. We must here simply assume the relationship without inquiring into its nature.

I. SACRED STONES AND OTHER INANIMATE OBJECTS.—As a preliminary, we may ask what traces of the worship of inanimate things can be observed in Asia Minor or Greece, and what is the idea involved in this worship? Many examples are known of such things being regarded with deep religious veneration.

(1) *Stones, Pillars, Columns, etc.*—A rude and shapeless stone, which had fallen from heaven (*διογενής*), doubtless a meteorite, existed originally at Pessinus, and was brought to Rome about B.C. 204; it is a type of many other similar stones at Orchomenos, Thespiae, Synnada, Adada, etc. Many of these stones had some approximate regularity of shape, sometimes perhaps accidental, in other cases distinctly due to human workmanship. Such were the conical or roughly pyramidal stones in the temples at Paphos (of Aphrodite), Perga (Artemis), Delphi (Apollo), etc.: obelisks, columns, and stones of a distinctly tetragonal shape are indicated in many other cases: above all other gods in Greece such stones or pillars were connected with Hermes, and called *Hermæa* or *Hermæi*.*

It admits of no doubt that many sacred stones had primarily a purpose in family life or social or political organization. Boundary stones or *termini* were erected by mutual agreement between disputants, and were consecrated by every religious sanction known at the time, by ceremonial, and by a curse on the violator or remover; and the belief indubitably was that the ceremonies of erection and consecration had caused Divine power and life to take up its abode in the stone: this Divine power demanded worship in recognition and propitiation, and was able and ready to punish neglect or violation. The *terminus* was valueless

* In the *Cities and Bishops of Phrygia*, i. and ii., the present writer was groping his way to the views now expressed in part A. A considerable portion of part B was written in 1879-81, and needed hardly any change to adapt it to the writer's present views. In view of recent theories it should be added that the view here advocated, as to the way in which pre-Hellenic religion developed into Hellenic, remains practically unchanged since 1881, but the name 'Pelasgian' was not used in that old sketch of the subject.

* *μῆδριν σφετέρας ἐν Ἐφῆσιν* (Polyenus, *Strat.* vi. 24); *Ἐρμῆας ἐν ἡ Μερωνίᾳ καὶ Μαγδαληνῇ ἐν τῇ Ἰνῷ* (Pausanias, viii. 34. 6). These *Hermæa* were columns, or heaps of stones, or single stones. A useful collection of ancient authorities will be found in Mr. M. W. de Vries's treatise, *de Graecorum diis non referentibus humanam speciem*, Leyden, 1900.

unless it was respected and inviolate: human need was urgent that it should be respected, but mere human power was unable to make it so: accordingly, the Divine power was invoked to supply the deficiency, and by proper rites was brought down and caused to dwell in the pillar or the stone. One of the ceremonies proper to the cult of such sacred stones was the pouring of oil on them; and in general a similar ceremonial to that described in § II was practised. Similarly, in a house any peculiarly important bearing member, a central pillar or roof-tree, was placed under Divine protection by invoking the Divine power to reside in it.

In all cases there is but one method and one principle. The more urgent man's need is, and the more important for his life and well-being any stone or erection is, the more does it become necessary to make the Divine power take up its abode in the stone. In other words, the stone becomes a *Beth-el*, or 'House of God'; the pillar embodies the god Hermes.

The subject in its bearing on early Greek religion has been admirably treated by Mr. A. J. Evans in an elaborate paper on 'Mycenean Tree and Pillar Cult' (*Journ. of Hell. Stud.* 1901, pp. 99-203), which will henceforth be regarded as fundamental in this department, though it will doubtless receive development and improvement and correction in details from both the author and others. The preceding remarks will show why the objection recently raised against Mr. Evans' theory in *Journ. of Hell. Stud.* 1901, pp. 268-275, cannot weigh with us: the objection is that many of his examples of 'sacred pillars' are obviously structural members, and need not therefore be considered to have any religious purpose: we, however, hold that the structural importance produced the sacred character of the 'pillar.' The sacredness of rude purposeless stones was perhaps due to 'false analogy,' that fruitful agency in thought, and should be regarded as not primitive, but cases of degradation.

Probably no one could doubt that the rude meteoric stone was worshipped because it had fallen from heaven, and was obviously and unmistakably a mark and sign and example of Divine activity and power. Similarly, it seems beyond doubt that the boundary stone, or the supporting member of the family home and roof, is made into a dwelling-place of Divine power, in order that human needs may be satisfied by Divine aid. The same principle of interpretation must be applied in many other cases where the stone was neither in itself an object useful to man, nor marked by its natural character and origin as Divine. It was often urgently necessary to protect a locality for the common use of men, and this was done in a similar way by setting up one or more sacred stones in it; but in such cases the sacred stone was an addition, and not an integral part of the structure or equipment.

In a town it was urgently required that the street, the common property and a necessary convenience for all, should be inviolate and properly kept and respected by the dwellers or passers-by. The common need was guaranteed by the sacred *Hermæi* or pillars, which were made the residence of Divine power by charming it into them through the proper rites; and misdemeanour in the street or encroachment on it was thus constituted a disrespect of the divinity, and punished by him.

In a more developed state of society, roads leading from city to city were probably put under Divine protection in a similar way; and the sacred stones were commonly made useful to human requirements by having distances engraved on them, thus becoming milestones.* But such stones

generally belonged to a more advanced stage of thought, when men refused to consider a stone the abode of Divine power. On the Roman Imperial roads they were dedicated to the Emperor, and thus placed under the guardianship of the Imperial god incarnate in human form on the earth. The god and the stone are in this stage separated in thought, but the stone remains sacred in a new way as the property of the god.

A meeting of three roads or streets, as an important point, was placed under the guardianship of the Divine power. When the anthropomorphic tendency had become strong, the Divine guardian of the triple crossing was represented as the goddess (under the name Hekate in Greece) with three faces, looking to the three ways (just as in Italy the god protecting the archway and the door was represented with two faces looking in the two directions). But before the anthropomorphic idea had gained full strength, there was doubtless some other way of symbolizing the Divine guardianship of the meeting of the ways; and the suggestion seems obvious that the symbol was the *triskeles*, three human legs and feet, diverging from a common centre, and typifying the walking of men along the three ways which radiated from the meeting-place (*compitum*). Little is known with regard to this form of cultus, except in Rome, where the feast of the *Compitalia* was an important part of the city-religion; but few will doubt that, as streets and roads became important, a cultus corresponding to the *Compitalia* developed in primitive Anatolia. In the coinage of Anatolia the *triskeles* is almost entirely confined to the cities least affected by Hellenic culture, in Pisidia, Isauria, and early or inner Lycia. Moreover, the epithets *τρίκλινος*, *τρεπάρχων*, applied to Hekate-Selene, are doubtless to be understood as applying to the goddess who guards the *trivium* or the *quadrivium*.*

It may therefore be reasonably maintained that in many other places, where we know only that in primitive thought a stone was regarded as sacred and made the object of worship in the Greek world, the fundamental character was the same. The stone was worshipped as home and symbol and proof of Divine power—a power able and ready to respond to human needs. See also below, (2), and § IV (1).

As Greek thought developed in the direction of anthropomorphism and polytheism, there arose an opinion that the old sacred stone was either a representation and image of a god, the rudest beginning of a statue, or an altar dedicated to the god. Such views seem not to be original and genuine religious conceptions, but merely philosophic interpretations by which more developed thought tried to bring primitive religious facts into conformity with itself. Thus the pillars, mentioned above, in streets and open places, which were originally called *agyiæi* or *agyeis*, were regarded as altars or representations of a Deity, sometimes Helios, sometimes Dionysos, but most commonly Apollo; and *Agyieus* was then usually regarded as an epithet of Apollo. The Greeks themselves hesitated whether to call the pillars altars or statues of Apollo, a sure proof that neither description was complete and true. The pillars or stones in open places and gymnasia, by roads, at boundaries, originally and commonly styled *Hermæi*, i.e. embodiments of Hermes, came to be regarded rather as statues of Hermes, and were developed accordingly in art, as we shall see in the ensuing paragraph.

The institution of sacred stones was modified by another influence. Art was engaged in the service

* Curtius, *Gesch. des griech. Wapenbau*.

* See *Hermes*, iv. p. 64; Ramsay, *Hist. Com. on Galatians* p. 219.

of the anthropomorphic tendency in religion, and wrought out ideal expression in human form of the various gods: the types of gods and goddesses were elaborated, and distinguished from one another, in the ruder stage to a considerable extent by symbols and equipments, but in the more developed and perfected stage by the varying artistic expression of the idealized conception of each deity as an individual character. Alongside of this rapid progress in the artistic presentation of different types of Divine character as different personal gods in human form, there was another line of development, through which the sacred pillars (which still continued to be erected in numbers during this more developed period) were made to assume more resemblance to the human form. The top of the pillar was carved into a bust, and parts of the body were indicated on the sides: such figures were commonly called *Hermæi*, and Greek art developed the type at a later time in various ways, making the busts portraits of real human persons. In all such cases art takes the view that the pillar is a rude statue of some deity or hero, and makes additions or modifications to bring out this character more clearly.

The epithet of meteoric stones, *διοπετρίης*, was sometimes transferred to certain very archaic statues, about which the legend grew that they had fallen from heaven: such was the case with the rude figure of barely human form in which Artemis of Ephesus was represented (Ac 19³⁸). The nature of those rude old idols will be more fully considered in § III (1) and § V (1).

(2) *Thrones*.—The ancients mention many stones in Greece which were said to derive their sacred character from having been the seat of deities or heroes (who in these cases may usually be regarded as deities degenerated in popular legend). Such were the Agelastos Petra at Eleusis (or at Athens) on which Demeter sat sorrowing for her lost Kora,* or, as another legend said, where Theseus sat before descending to Hades; the chair of Manto at Thebes, the stone of Telamon at Salamis, etc. The bed of Actæon at Platea and various other stones may be classed with these. The Omphalos at Delphi is often represented with Apollo sitting on it.

In Asia Minor there are examples of rocks cut to the rough form of a seat. The 'Throne of Pelops' in Sipylus beside Magnesia (Pausanias, v. 13. 7) is probably to be identified with the rock-cutting, forming a sort of broad seat, or platform with a back, on the highest point of an early rock citadel on the slope of Sipylus, about 4 or 5 miles east of Magnesia.

Dr. Reichel has elaborated these facts into a theory of Throne-worship: viz., that the Divine nature, not yet represented in personal human form, was symbolized by the throne or seat, which was regarded as an indication of its presence.

Some of Dr. Reichel's examples of Divine thrones rest on his own far-fetched and almost certainly erroneous explanations;† in other cases the recorded story about a Divine or heroic throne may be only a later popular explanation of an older religious fact, no longer understood. But whether that aspect of his theory is only pressed too far and applied to unsuitable cases, or whether it is wholly erroneous, there is, at any rate, another and a true side to his theory. He is right in his view that before the period of images and image-worship we must admit the existence of an imageless worship in the Ægean lands and Asia Minor generally: a Divine power invisible to man was approached

and adored; it was felt in the phenomena of the world, in the growth and life and productivity of nature; its presence and power were symbolized and envisaged to its worshippers in various ways, but the symbols were not considered as images or likenesses of that Divine nature, but rather as its home or residence, or as an effect and exemplification of its power. The statement of Nicol. Dam. *Synag. fr.* 19 (p. 148), and Stobæus, *Serm.* xlii. p. 292, that the Phrygians did not swear or exact from another an oath (by any god), probably has some reference to this belief in a Divine nature without images.* On this topic see further, § V (1).

Dr. Reichel has erred, as we believe, only in the direction in which he has developed a correct observation. It was not the seat or throne of the formless and invisible Divine nature that was in the beginning worshipped; for the very idea of a seat already involves the attribution of something like form and personality to the power which needs and uses a seat. The fundamental idea was that of the home and abode, or the origin of Divine power. Out of this springs all the symbolism and all the earlier phenomena of Anatolian religious observances. The sacred stone or the sacred tree is the home of the Divine nature: the cave among the wild mountains, the simple shrine, are easy developments of the same idea.†

(3) *Weapons*.—Other inanimate objects besides stones were made the object of worship. The Alani, a rude barbarian tribe south-east of the Black Sea, are said to have worshipped a naked sword, which they fixed for the occasion in the ground. This might be disregarded as a savage custom which had come in from Central Asia, were it not that one of the reliefs—among the most important, to judge from its size—portrayed on the walls of the *adytum* before the eyes of the initiated at Boghaz-Keui (Pteria probably), east of the Halys,‡ represents a gigantic sword stuck in the ground, with only the hilt and a small part of the blade protruding. The hilt in itself is evidently a symbol or representative of Divine power, composed of two pairs of animals, evidently lions, surmounted by a human head wearing the tall pointed hat characteristic of the supreme god. It is therefore not open to doubt that the custom of the Alani in the 4th cent. after Christ was the same as the ancient Anatolian custom. We see clearly that the sword was regarded not as a god in and for itself, but as a symbol of a vague pervading Divine power. That power resides mainly in the hilt, not in the blade, and is moulded not altogether unlike the human form, and yet differing essentially from it, full of the terror and strength of savage nature embodied in the four lions, but human-headed.

If some tribes worshipped the sword, others regarded the *battle-axe* as sacred. The difference obviously arises from difference of warlike custom: the weapon to which the tribe trusted especially in battle was esteemed by it the home of the Divine strength by which they conquered and hoped to conquer. In Caria and in Crete the axe appears as a Divine symbol. We may confidently assume that it was made the object of a special cult, like the Sword-god among the Alani. Though this is not exactly proved definitely by the evidence, yet the importance of the Carian name *Labrys* (*bipennis*, 'battle-axe') in Carian religion leaves little doubt on the point: Labranda was one of the chief centres of the worship of the Carian god, who was actually called *Labraundos*,§ and one of

* A similar stone and legend probably existed in Asia Minor; and a Christian form was given to it later; see *Journ. of Hell. Stud.* 1882, p. 349.

† See A. J. Evans in *Journ. of Hell. Stud.* 1901, p. 189; Fritze in *Rhein. Museum*, 1900, p. 588.

* The Pontic oath by Men Pharnakes (Strabo, p. 557) is later (cf. p. 128); but see Roemer, *Selene*, p. 122.

† On the shrine see § V (3); on the sacred cave, § IV (2).

‡ See Perrot, *Histoire de l'Art dans l'Antiquité*, iv. pp. 642, 647; Chantre, *Voyage en Cappadoce*, gives the latest account.

§ Hellersted as *Zeus Labraundos*.

the Kouretes in Carian mythology was Labrandos.* But, even more unmistakably than the sword, the axe was a symbol of a Divine power felt as lying behind it and expressing itself through it, and not as a power or a terror in itself. The god carrying the battle-axe on his shoulder is one of the most familiar and widely diffused symbols in east Lydian and west Phrygian coinage.†

We notice that the worship of the axe belongs to the Carians, a people who beyond doubt were an immigrant race; and we shall see among them some examples of divergence from the Anatolian type of religion (see § VI (2)). The worship of the axe must be regarded as also a divergence from that type; and, in accordance with the principle stated at the beginning of the article, this divergence is to be attributed to the character of the Carian race. In the same way the worship of the sword, though traceable in the religion of the central plateau in the earliest period known to us, is probably a development out of the original Anatolian type due to pressure from the east and north-east. The east Anatolian type of cultus is of a much more bellicose type than the central Anatolian (see § IX (2)), and the reason indubitably lies in the rough and warlike character of the tribes on that side, such as the Kardouchoi, modern Kurds, etc.

(4) *Wooden posts.*—A rude wooden post was sometimes worshipped in a way similar to the more common sacred stone. The Divinity at Samos was originally symbolized by a wooden plank; and in the more anthropomorphic development, when the Divinity had come to be thought of as the goddess Hera, this plank was called the earliest statue of her. Many other similar stumps of wood experienced the same development in anthropomorphic thought.

In origin some, and probably most, of those sacred stumps or planks were holy trees, decayed and dead; ‡ and they strictly fall under § II. But in other cases the original was a wooden pillar or column, the support of a chamber or house, and falls under the class described above, § I (1); this was clearly the case with the Dionysos Kadmos at Thebes, described by Pausanias, ix. 12. 4 (which de Visser, p. 88, has aptly illustrated from Diod. Sic. i. xxiii. 4).

II. SACRED TREES.—The worship of sacred trees is one of the most widely spread religious phenomena in the early Greek world. The ancient Homeric hymn to the Aphrodite of the Troad (264-272) mentions that the life of the mountain nymphs, who shall nurse the goddess's son, is associated with the life of the sacred trees, which man may not cut down; and that, when a tree withers and dies, the nymph dies with it. The oaks of Dodona were Divine, and the sound of the motion of their branches was the voice of the god declaring his will and revealing the future to men. The bay tree of Apollo, the olive of Athena, and many others, had doubtless the same origin. In later time the popular legend often attached itself to such trees, that they had been planted by some hero or Divine figure (so with two oaks at Heraclea in Pontus), or in some other fashion they were involved in his life-history (a frequent form being that the god or hero or heroine had been suspended from the tree).§

The worship of the tree was conducted on pre-

* The Carian local names *Laryma* and *Lôryma* (both bishoprics) may be connected (through an intermediate form *Laoryma*); also *Lôbrina*, a title of Cybele at Cynicus.

† See list in Head's *Catalogue of Coins Br. Mus.*: *Lydian*, p. cxviii.

‡ Examples in great number are alluded to by Maximus Tyrius, viii. 1 (de Visser, p. 88).

§ The oaks at Heraclea, Plin. *HN*, xvi. 89. On the whole subject Boetticher, *Baumkultus*, is fundamental; but Mannhardt and many other writers must be consulted.

cisely the same plan as that of the image in later times. It was clothed, crowned, adorned; * processions were made to it, sacrifices were burnt to it, and meat-offerings laid before it. People prayed to it and kissed it (Ov. *Met.* vii. 631). It was impious to go beneath it without the proper rites (Ov. *Fast.* iv. 749). It was wrong to pass it without some token of respect (Apul. *Flor.* 1). The fall of a holy tree was a very bad omen; and in Rome on such an occasion an *exauguratio* was performed, as there had originally been an *inauguratio* (Plin. *HN* xv. 20).

Dedication of the hair has always been the greatest sign of devotion to any deity; boys dedicated their hair on entering manhood, brides before marriage, married women at the birth of a child; and in Delos it was customary for boys and bridal couples to dedicate their hair under the olive tree that grew on the grave of Hyperoche and Laodice.

The sacred tree was the pledge of the presence and favour of the god, and on it therefore depended the prosperity of the family, tribe, or State which worshipped it. Such belief is seen in reference to the fig tree in the Roman forum, † or the olive in the Acropolis at Athens; and when the latter put forth a new shoot after the burning of the city by the Persians, the people knew that the safety of the city was assured. A piece of the sacred tree was a pledge of security to the Argo and to the fleet of Aeneas (*Æn.* ix. 92). The fate of Megara depended on an olive tree (Plin. *HN* xvi. 72).

The tree, then, was on earth the embodiment or the home of Divine life; and the life of man in some forms of belief was connected with a tree during his earthly existence and passed into it at his death. Like the gods, men are often said to be born from trees. Hesiod's third race of men were born from ash trees, and Meleager's life depended on a piece of wood. Ares was born from Hera and a plant (see below, § VI (2)). Talos and Adonis were born from trees. Most instructive are the cases in which the tree is said to have grown out of the hero's grave. Such was the plane tree on the tomb of Amycus in Bithynia: Amycus had opposed and fought with all strangers; and if any part of his tree was taken on board a ship, there ensued constant quarrelling, until his influence was got rid of by throwing away the bough. Here the tree is evidently the embodiment of the spirit of the dead person. There was generally a fountain beside the tree, as at Dodona and Aulis.

Moreover, transformation into a tree was equivalent to translation to the company of the gods; and the tree became then a sacred pledge for posterity, the prototype of the later hero-chapel. The plants and trees which grew on the grave were the life of the buried human being. Phemonoe, the first Pythia, foretold that from her dead body would spring herbs which would give to animals that ate them the power of showing the future by the state of their entrails. Thus she would live on with men. And, similarly, the plants on graves made a connexion between the deceased and this world: an Athenian law (Ael. *Var. Hist.* 5. 17) punished with death any one who cut a holm-oak growing in a sepulchral ground (*heroon*). From this sprung the later custom of planting gardens in cemeteries. Many passages in literature allude to the sympathy between the dead man and the trees or plants on his grave. On that of Proteusilaus grew plane trees, whose twigs pointed towards Troy, and whose leaves fell sooner than those of any tree around. ‡

The belief in holy trees has lasted, probably unbroken, in Anatolia through Christian times down

* Theocr. xviii. 45.

to the present day. In the *Acta* of St. Philæteus* a grove of tall cypress trees at a place in Mysia called Poketos, on the road from Nicæa and the Rhyndacus to Cyzicus, is mentioned as the chief seat of local pagan rites in the 4th cent.; the reference probably proves that the grove existed or was still remembered when the *Acta*, a late composition but embodying a real local tradition, took form. An inscription of Sandal (Satala in the Lydian *Katakekaumene*) mentions the punishment inflicted in the form of disease by the gods Sabazios and Anaitis Artemis on a man who had cut their trees; and the Mohammedans still believe that disease will afflict any one who cuts the trees on a neighbouring hillock.† Sacred trees were hung with garlands, just as at the present day rags and scraps of garments are tied by Mohammedans to sacred trees in many parts of Asia Minor, though this practice is not in accordance with the spirit or the rules of their religion.

The veneration of the sacred tree or grove evidently implies the idea that the tree is an embodiment of the Divine life and power, and that he who maltreats the tree injures the Divinity that lives in the tree. At the same time, the utilitarian element also entered here, for the belief protects and safeguards the interests of men, or their deep feelings of respect for the dead. The trees beside a village were useful to its population, or they were sentinels keeping watch over the grave of the dead. The worshippers of the Divine power ornament the tree in which that power is manifested with garlands, or with small representations of the power in some of its manifestations: and out of the latter custom, through growing religious degeneration, springs the legend that some hero (connected with, sometimes a mere impersonation of, the Divinity) has been suspended from the tree, as Marsyas from the plane near Celæne in Phrygia, or Helena from the plane at Sparta (Paus. iii. 19. 10; Theoc. 18, 43).

III. SACRED ANIMALS.—That various animals had some religious awe attached to them in early Greek and Anatolian religion is well known; but the nature and real meaning of this awe are far from certain. No branch of our subject is more obscure than this; and in none are so many wild and vague statements and such mixture of ideas current.

The question of sacred animals is always liable to be mixed up with the question of Totemism. There are, indubitably, certain facts in the religious ceremonial and symbolism of the Greek peoples which can be most easily and naturally explained as survivals of Totemism. But we cannot think that Totemism held any place in Greek or Anatolian religion as it presents itself to our study. Similarly, the black stone of the Kaaba in Mecca is an old fetish, the veneration of which has survived in Mohammedanism; but fetishism is not really an influence in, or part of, Mohammedanism. Many survivals of pagan rites and symbols are apparent in the developed Hebrew worship, but they did not touch its essence or affect its development except to be successively eliminated from it. Similarly, the survivals of Totemistic forms in the Greek world do not affect our study of its religion, though they are of extreme interest to the archaeological investigator. The religious ideas of the tribes and races, whose contact and intercourse produced the form of thought, religion, and civilization which we call Hellenism, were raised above the level of Totemism; and even the earliest Greek thought did not understand those survivals in a Totemistic way, but put a new, and historically incorrect, interpretation on them in popular legend.

Also, the form of religious thought in which the sacred animal was regarded and worshipped as being actually a god incarnate is not characteristic of Anatolia. The nearest approach to that idea is in the Ephesian religion of Artemis (7), where the goddess was the queen bee; but there is no proof that any actual bee was worshipped. The explanations of sacrificial rites as being cases in which celebrants kill and eat the sacred animal as the body of their god, are not admissible, except perhaps in some borrowed rites of external origin.

We may, with some confidence, lay down the general principle (which we shall find confirmed in several instances and contradicted in none), that the sacred animals of Anatolian religion are regarded in relation to a more generalized conception of the Divine power, which lies behind them and finds expression through them. Hence they are often represented in the rude symbolism of primitive Anatolian art as associated with, or employed in, the service of some deity or Divine figure, who is an embodiment of that higher Divine power.

(1) *Animals as parts of the god.*—The most typical appearance of animals in this way is as bearers or supporters or companions or components of gods. A god or goddess is often shown in rude Anatolian cult-representations as standing on an animal or bird: that is the case with a god, presumably Sardon or Baal-Tarz (Hellenized as *Zeus Tarsios*), represented on coins of Tarsus, with several deities on the religious sculptures in the *adytum* at Boghaz-Keui, and with various small works of art in bronze or on seals or in other forms. The Horseman-god described below, (5), perhaps belongs to this class.*

In other cases the figure of a god has a rough resemblance to the human form, but is composed of one or more animal forms, supporting a human head, or in an Egyptianizing type the head is that of a beast or bird, but the body is human (as in some figures at Boghaz-Keui, or the Black Demeter with the head of a horse at Phigalia in Arcadia).

To this class belong the representations of Cybele with her lions, or of Artemis with her stags. In those cases the earliest known types show the Deity with a form in which nothing is human except the head and perhaps the arms: the rest of the figure is a mere shapeless non-human mass or stump. The animals stand on each side of this central figure. In one case Cybele's lions rest their forepaws on her shoulders.† Greek art took these ancient native types and developed them freely, making the figures of the goddesses entirely human, giving beauty and dignity to them, seating Cybele on a throne with her symbols (*patera* and *tympanon*) in her hands, representing Artemis after the type of the Greek hunting goddess, and introducing some dramatic motive in their relation to the accompanying animals: the goddess plays with the animals or caresses one of them with her hand. Sometimes the lion reclines in Cybele's lap like a pet dog. See also § V (3).

In such representations it is clear that the original religious conception did not regard the Deity as of human form. There is sufficient resemblance to suggest at first sight the human form; but at the second glance the differences are seen to be very marked. The types arose, as we shall see, in the way of votive offerings. The worshipper offered to the Divine power some rude representation of itself, laying this on or near the stone, or

† *Journal of Hell. Studies*, 1894, p. 245 and plate.

hanging it from the tree, which was considered to be the home of the Divinity. The representation rudely embodied the vague, unformed conception entertained by the worshippers: the Divine power was not wholly unlike human, but it was different, and contained the strength and swiftness or the teeming productive power of various animals.

The conception of the *Satyr*, a half-human half-bestial form, belongs originally to Asia Minor, and was developed, first in Ionian, and then in general Greek art. The more strictly Greek conceptions of Thessalian Centaur and Arcadian Pan are fundamentally the same in character. The Satyr-type varies between human mixed with horse and human mixed with goat, while the Centaur is only of the first kind and Pan only of the second. Silenus is a similar idea, of Anatolian origin probably, but developed in art more on the human side. The idea in all these figures is that of rude, free, natural life, untrained, unfettered by conventions and ideas of merely human origin; this life of nature is the spontaneous expression of the Divine life, and comes nearer to the Divine nature than men can approach, but also it has a distinct human side, and can come more easily into relations with mankind than the Divine nature can. Men can by stealth catch and force to their will* the Satyr and Silenus, who are thus intermediaries between the Divine and the human. On the other hand, those figures are the companions and servants and associates of the god Dionysos, a deity of marked Anatolian character. In another respect they are a means of mediating between the Divine nature and mankind: 'they took them wives of all that they chose' (Gn 6⁴). Now the idea lies deep in the Anatolian religion, as we shall see, that man has come from God and goes back to him at death; and evidently this relation between Satyrs or Sileni and human women is one of the grotesque developments by degradation of that idea; see below on the serpent (11).

(2) The *bull* often appears in surroundings which show his religious significance: in one case he seems to be standing on an altar, as an object of worship to the human figures looking towards him.† The very frequent employment of a bull's head on sepulchral and other steles and on sarcophagi at a later period evidently originated in the sacred character of the animal, and had at first an apotropaic purpose (the Divine power protecting the grave), but became purely conventional and ornamental in the lapse of time. But even in the above-mentioned case, where the bull is the object of worship, a glance at the figure is sufficient to show that he is worshipped as a symbol: he represents and embodies the generative power of nature: there lies behind him the Divine power of growth and life, which he expresses: in this character he played a part in the Phrygian Mysteries.‡

(3) The *goat*, which is mentioned as sacred in the worship of Leto and Lairbenos,§ and doubtless generally, was associated with Dionysos, a deity of markedly Anatolian character. At Laodicea on the Lycus the goat appears as a companion of the god Aseis (identified with the Greek Zeus, and treated as an epithet of Zeus), who lays his hands on the horns of a goat standing beside him. In Greek art there is known a type showing Aphrodite riding on a goat, which may probably be an artistic development of an old schema showing a deity

standing on a goat. Such also is a late Anatolian type showing Men sitting or riding on a goat.

The goat and the ox are evidently the animals characteristic of a pastoral people on the great plains of central Asia Minor; and the fact that they were so useful must have helped to give them their sacred character. Countless herds of goats are still a feature of the great plains of the central plateau.

Like the bull, the sacred goat is doubtless to be understood as the male animal, the embodiment and representative of the productive Divine power regarded on the active side. The Divine nature, as we shall see, was regarded in Anatolia sometimes as complete and sexless, but more frequently as divided into two Divine beings, male and female; and in the latter case the life of nature is pictured in the cultus as the mutual relations of the Divine pair, the god and the goddess.

(4) The *sheep* was a third animal of great importance on the pasture-land of the plateau; and there is evidence that it was sacred. The sheep was worshipped by the Samians, and was closely connected with the worship of Hermes. Milchhöfer in *Archäolog. Zeitung*, 1883, p. 263, quotes examples of the occurrence of the ram as a figure on graves in Phrygia and Armenia.

The sacred sheep is to be understood as the ram. He stands in the same relation to Hermes as the goat does to Dionysos. It is a ram that appears on the Anatolian and Armenian tombs.

(5) The *horse* must be regarded as a sacred animal (as might be expected), on account of the widely-spread representations of the Horseman-god. No Divine figure is so common in the later hieratic art of Asia Minor as this deity. He occurs on the coins of many cities in Lydia and West Phrygia, and on rock reliefs as well as on votive steles in the Pisidian hill-country; these are almost all of the Roman period, but the type is certainly much older. In many cases the Horseman-god is a hero, i.e. the deified form of a dead man (regarded as identified with the god, § VIII (5)), and the type must in those cases be regarded as sepulchral. Hence the horse-head, which appears in many sepulchral reliefs in Attica, may be taken as a symbolic indication of the same type, the part standing for the whole. In those reliefs the deified dead is usually represented as a seated figure of heroic size, and the horse-head in an upper corner of the relief indicates in brief the type of the Horseman-god, which is another form of the dead man's new heroized nature. The horse was probably imported into Anatolia, and belongs to a later period than bull, sheep, and goat.

(6) The *swine*.—Most difficult and obscure are the questions connected with the swine. There is good evidence to show that the swine was sacred in the Anatolian religion. In Crete, which was in strong religious sympathy with Asia Minor, the swine was sacred, and played an important part in the Mysteries and the birth of Zeus. At the Eleusinian Mysteries, which were influenced both from Crete and from Asia Minor, the swine constituted the most efficacious and purificatory sacrifice; the Greek purification for murder or homicide involved the sacrifice of a swine, and the Lydian ceremony is said by Herodotus (i. 35) to have been identical with the Greek (which may be taken as proof that the rite was carried from Anatolia to Greece). In Lycia a swine is represented on the Harpy Tomb, under the chair on which sits the heroized or deified dead. Small pigs of terra-cotta or porcelain have been found in Lydian graves.* The older and general Phrygian custom had at least no horror of swine.†

* Xenophon, *Anab.* i. 2, and many other places.

† Ferriol, p. 668 f.; cf. p. 672.

‡ Ταύρος ἱερὸς καὶ ἄνθρωποι ταύρου ὀφείλουσι, 'the god-bull is father of the god-serpent, and the serpent of the bull,' was a formula of the Phrygian Mysteries (Clemens Alex. *Protrept.* ii.).

§ See Roscher's *Lexikon der gr. u. röm. Mythologie*, s.v. 'Lairbenos' (Drexler), and Ramsay, *Cities and Bish. of Phrygia*, i. p. 188 f. See also below, (8).

* Ramsay, *Hist. Geog. of Asia Minor*, p. 82.

† *Ib.* p. 82.

But this Anatolian custom was interfered with by a new influence, namely, the Semitic (or perhaps we ought to say simply the Jewish) and Egyptian abhorrence for the swine.* This ruled, at least in later time, at the Pontic Komana, where a swine might not be brought into the city, much less into the sacred precinct or temple of the goddess.

Here we are brought in view of two opposing and irreconcilable ideas; and our view is, in all such cases, that these contradictory ideas originate from different races (or, in the case of Jewish religion, from the influence of a new step in development). The attempt has been made to interpret the abhorrence and loathing of the swine as arising naturally out of the extreme awe and fear with which it was regarded on account of its high supernatural powers; but, on such a principle, anything can be evolved out of anything. There are two opposite conceptions of the swine.

According to the one, the swine is a sacred and purifying animal; it is in close relation with the Divine nature, and the human worshipper uses it to cleanse himself so that he may be fitted to come into relation with the Deity—sacrificed as the Eleusinian and Eteocretan prelude to initiation or marriage [identical rites, § VIII (1)]; not eaten except after sacrifice (see (8), (9), and Ath. 376).

According to the other conception, the swine must not be brought near the Deity nor permitted even to approach his neighbourhood, any one who has touched a swine is unclean, any one who habitually comes in contact with swine is a permanent outcast. We refuse to consider that these two opposing views have a common origin: they belong to two irreconcilable modes of thought. The abhorrence of the swine we explain on grounds of health: in a hot country the flesh of the swine is not wholesome, and in the development of thought and religion in Egypt and in Palestine this was observed and constituted into a religious law for the benefit of man.

It is said that the Egyptians once a year sacrificed a swine to the moon and Osiris, and ate its flesh; and in Is 66¹⁷ we hear of Jews who met secretly to eat the flesh of swine and mice as a religious rite. But these are natural examples of the persistence of the old religious facts in secret or on some exceptional occasion: the new and higher religious idea cannot wholly extirpate the ancient idea: the old superstition has a hold on the souls of men, and usually something is conceded to it. Only, the Hebrew prophets would concede nothing, but insisted on the absolute and utter abolition of the old superstition: that is one of the numberless points of distinction between Hebrew religion and all other ancient religions which competed with it.

The principle laid down in the preceding paragraph is one of great importance in our subject. In the religious history of the Greek tribes we observe numerous cases in which the religious idea of one tribe overpowers that of another when the two tribes come together. But a religious fact rarely, if ever, dies utterly: though the weaker, it produces some effect on the stronger, and one of the commonest effects was that a secret and mysterious performance of the submerged religious ritual was permitted at long intervals.† Thus human sacrifice seems to have been allowed to continue in rare acts of ritual, many centuries after the general feeling of the Greek tribes had condemned the idea of sacrificing a human being. Another way in which the submerged religion maintained itself was in the superstitions of the lowest and least educated classes, and in rites

which were rejected as magical and irreligious by the higher thought of the people.

The rules of impurity connected with the swine are also a subject of great difficulty; and here again the difficulty seems due to the interlacing and intermixture of different religious ideas, no one of which has made itself absolutely supreme. Thus, for example, the statement is sometimes made that the worshippers of the Lycian and Anatolian god Men Tyrannos abstained from swine's flesh; yet the swine was intimately connected with the Divine power in Lycia (as we have seen).

Out of these facts a very elaborate theory that men abstained from the sacred animal as being holy can be spun. But the abstaining from swine's flesh in the ritual of Men Tyrannos was merely a very brief temporary act of purificatory preparation, as is obvious from the context,* and did not amount to a permanent rule of avoidance, such as obtained in Egypt and Palestine. The rules of preparatory purification in the later period (our authority belongs to the time of the empire) were much influenced by analogy; and this case proves nothing as to the real and original theory ruling in the worship of Men Tyrannos.

The abstinence from swine's flesh, said to have been practised at Pessinus in Phrygia, was, perhaps, a much more serious and real fact. It would hardly have been mentioned by Pausanias had it been a mere act of brief occasional purification: he records it, evidently, as standing in marked contrast to the ordinary usage of Western Anatolia (of which he was a native, and whose people he had chiefly in view as his readers). The custom of Pessinus is to be explained as due to Semitic influence gradually spreading westwards over Asia Minor.

The sacred character of the swine in early Anatolian and Greek ritual was due, beyond all doubt, to its being considered as a symbol and representative of the Great Mother. It was the domesticated sow, with her teeming litters of young, that suggested its holy character. Thus the holiness was founded on similar grounds to that of the bull or cow and the sheep and the goat: the animals which were most useful to man were esteemed sacred, as the gifts of God. There can hardly be any doubt that the method of domesticating and caring for these animals was considered to have been revealed by the god, who continues to be their patron, and whose beneficent power towards man is manifested in them: see (8).

The *wild boar*, which is sometimes connected in mythology with the Divine nature, would derive his sacredness from a different cause, for he must be classed with the wild animals which are impersonations of the Divine strength and swiftness and might: see (10).

(7) *The bee*.—Most instructive of all in regard to the Divine nature is the bee. The bee was the sacred symbol at Ephesus, i.e. the bee was the type of the goddess. A large body of subordinate priestesses connected with her worship were called *melissai*, the working bees; and a body of officials (who were originally of priestly character)† were called *essenes*. Now there was a mistake, common in Greece, with regard to the sex of bees; the queen bee was thought to be a male, and called *essen* or *βασιλεύς*. But, when we look at the Ephesian cult, we find that it was founded on

* See Wiedemann, *Herodotus' Zweites Buch*, p. 85. Origen, *c. Cels.* v. 49, speaks of the Egyptian priests alone as refraining, which implies a relaxation of usage.

† See below, § VII (2).

* The authority is a pair of almost identical inscriptions frequently published: Dittenberger, *Sylloge*, No. 879, *CIA* iii. 78, 74; Foucart, *Assoc. Relig.* p. 219. The worshipper must purify himself *ἐν τῷ ἐνιδῶν καὶ χελπίαν καὶ γυναικίαν*, but the purification was a matter of a day, and after washing from head to foot the worshipper could enter the god's presence the same day: the eating of garlic and swine's flesh, like the third fact, is implied to be the habitual and ordinary way of life of the worshippers.

† See, e.g., Pausanias, viii. 12, 1.

a true knowledge. The goddess was the queen bee; and her image makes this plain. Her body has only the slightest resemblance to a human body, but has the outline of the body of a bee. What are ordinarily called *mammæ* on her body are not so, for no nipple is indicated: they really represent eggs, and the mass of the body is simply a great ovary or skin filled with ova. The goddess is literally indicated as the one great mother of all life in the community. The *essenes* are the male bees or drones, who do no work. The *melissai* are the female and working bees, in whom the sexual character is undeveloped (see § VI (3)). The resemblance between the constitution of the swarm or community of bees and that of the primitive Anatolian community, as described in § VIII (3), (7), is striking.

The resemblance is even more striking in respect of the life-history of the Mother-Goddess and of the queen bee; but this will be treated in § VI (3). Taking this in conjunction with the preceding remarks about the Divine power and life under the bee form, we see clearly that the place of the bee in the cultus implies such knowledge of its habits as would be impossible without careful observation and intelligent methods of treatment. This is merely one example of the wisdom and skill applied to the utilization and domestication of animals in the ancient Anatolian theocratic system. The arts of domestication were rooted in religion. The remarkable practice of self-mutilation as a religious act, characteristic of Phrygian worship (§ VIII (4)), seems clearly to have originated from the rule (divinely given, as was supposed) of mutilating in the same way oxen and other domesticated animals, and from the natural mutilation of the bee (§ VI (3)).

(8) *The sacredness attaching to domesticated animals.*—It is obvious that the sacred character of the animals which have hitherto been mentioned rests ultimately on their domestication and their usefulness to man. This suggests that some of the arts of domestication may have originated on the great Anatolian plateau, where the conditions are exceedingly favourable,* and where the existing traces show that a large population and great cities were found where now for many centuries only a very sparse sprinkling of nomads and a certain number of small villages have existed. That a high degree of skill was reached in the domestication of animals is also certain. Valuable breeds of animals were artificially produced by intelligent cross-breeding. Of these the Angora goat still survives; and the secret of its breeding is still carefully treasured and concealed.† That the secret of preserving the purity of the wool lies in breeding is pointed out elsewhere,‡ on the authority of practical experience; and the natural probability of this explanation (which has never been mentioned elsewhere) is admitted as obvious by some high authorities to whom it has been mentioned. But the breed of the Colossian sheep with its glossy violet fleece, and the glossy black-fleeced sheep of Laodicea, have entirely disappeared; and the reason is that those artificial breeds were through carelessness allowed to degenerate.§

(9) *Domesticated animals as sacrifice.*—No doubt need be entertained, though the fact cannot be definitely demonstrated by extant evidence, that the life of all domesticated animals was sacred. Their existence was so important to man that it

must be guaranteed and protected by the strongest religious sanctions. To slay the ox or the sheep or the goat or the swine was an act of impiety. Among the Phrygians it was a capital crime to slay an ox used in ploughing.*

Yet there can be equally little doubt both that the flesh of the animals was wanted as food and that they were needed as offerings in sacrifice. Here two religious laws come into collision with one another. A quaint and evidently very archaic ceremony, which was preserved among the people of Athens (a race characteristically autochthonous and Pelasgian), illustrates the way in which the difficulty was met. The ox for sacrifice was selected by a sort of chance, the one being taken which first came forward out of a herd to eat the corn scattered on the altar near which the animals were driven. The ox thus selected was slain for the sacrifice; but the ministers who slew it with axe and knife fled, and in their absence the weapons which had killed the sacred animal were tried and condemned, and punished for sacrilege by being thrown into the sea. The flesh of the ox was eaten; its skin was stuffed with straw, and the stuffed animal was harnessed to a plough.†

The character of the ceremony, as an expiation of the apparent crime of slaying the sacred animal, is clear. The god, in his kindness to man, has shown how the guilt may be avoided or diverted, and the flesh of the animal can be enjoyed by man without suffering the due penalty. The name of the sacrifice, *τὰ Βουφόνια*, 'the ceremonies connected with the slaying of the ox,'‡ makes the meaning of the whole clear. Probably, in the origin, the killing of an ox (not a common act in agricultural life), perhaps even the killing of any sacred animal, was always accompanied with that elaborate ceremonial, and made a religious act. The ox was induced to commit an act of impiety in eating the sacred barley and wheat on the altar; any guilt involved in slaying him was visited on the murdering weapon; and, finally, the pretence was gone through that the ox was still ready to be used for its ordinary agricultural work.

The attempt has been made to explain the *Bouphonia* as the slaying in the harvest season of the ox which represents the spirit of vegetation: the ox, as the Divine being who constitutes the life of the crop, is supposed to be slain at the harvest (as Lityerses in Phrygia was slain by the sickles of the reapers). This attempt is supported by an incorrect interpretation of the word *Bouphonia*, as 'the slaying of the ox.' The explanation is forced and unsatisfactory, and may be considered as an example of the extreme to which excellent scholars are sometimes led in trying to adapt a theory, which furnishes the correct explanation of many usages, to other usages which it does not suit.

A Phrygian inscription throws some light on this subject. The goat is there mentioned as sacred. A certain person confesses to have sinned because he had eaten the flesh of the goat, though the animal had not been offered as a sacrifice with the proper ceremonial: he atones for the sin, and acknowledges the justice of the penalty with which the god has visited him.§

* Nic. Damasc. in Dindorf, *Hist. Græc. Min.* i. p. 148.

† The accounts of the ceremony vary a little as regards details: see Mr. J. G. Frazer's *Golden Bough* 2, vol. ii. p. 294 f.

‡ This sense of the plural is typical and common: *Διὸς γενεῖς*, 'the circumstances connected with the birth of Zeus,' and so on. A false interpretation of the word *Bouphonia* is alluded to in the next paragraph.

§ See *Cities and Bishoprics of Phrygia*, i. pp. 138, 150. The present writer has there adopted an explanation suggested to him by Prof. Robertson Smith, which would take the crime to consist in eating goats' flesh at all. But it is more probable that the crime lay in eating it without first offering the animal in sacrifice. Either of the two different senses given to *ἀθύρμα* in the two explanations is grammatically possible.

* See art. on 'Geographical Conditions determining History and Religion' in the *Geographical Journal*, Sept. 1902, p. 272: see also below, (12).

† We cannot accept the view advocated by some distinguished German writers, that the Angora goat was introduced from Central Asia, and is a naturally distinct species.

‡ Ramsay, *Impressions of Turkey*, p. 272 ff.

§ *Impressions of Turkey*, loc. cit.

(10) The *lion*, which is so often associated with Cybele, is also found in art as the supporter on which a deity stands. Like the bull, and doubtless for the same reason, the lion was taken as a common ornament on tombstones—originally with a protective meaning, later as a mere conventional figure—especially in Phrygia and Pisidia.* Similarly, the *stag* was the regular accompaniment of Artemis, and appears carrying a deity on an early Anatolian seal.†

There can be no doubt that the sacredness of these two animals, the lion and the stag, springs from their being the most typical representatives of wild natural life in its strength and its swiftness. These two typical wild animals are connected intimately and characteristically with the Divine nature as female, i.e. with Cybele or Artemis. That side of the Divine nature bulked far more largely in old Anatolian religion than the male side.‡ The Great Goddess, the All-Mother, plays a much more characteristic and commanding part than the god, who is often pictured as her attendant, and as secondary to her. The life of nature is commonly represented as female. The spirits of the trees and mountains, the lakes and forests, are the Nymphs, described often as if they led a sexless, separate existence, though there are not wanting examples of the other conception, which brings them into association with the Satyrs or Sileni and makes the reproduction of the life of nature spring from the relations between the male and the female divinities.

Accordingly, it is a pair of lionesses, not of lions, that appear on the most ancient Phrygian Lion-Tombs and on the Gateway at Mycenæ. But the sex is not always emphasized; and artistic considerations probably contributed to determine the ultimate preference for lions and stags, so that these were regularly represented as companions even of the goddesses Cybele and Artemis: the mane and the horns made the male animals more picturesque and striking types.

But in none of these cases is there any universal rule of sex. If the male Divinity is symbolized by the ram or he-goat, there are certain to be some cases in which the female Divinity must be represented by the female animal in order to carry out the mythological tale or the cult-act. These less usual and less typical instances, which need not be quoted in detail, do not really interfere with the general rule of sex which has been stated.

(11) The *serpent*, however, was pre-eminently the sacred animal in Anatolian and Greek religion. It dwells in the bosom of the earth, the Great Mother. It appears and disappears in a mysterious way. In many Greek temples, and especially in the temple of Athena Polias on the Acropolis at Athens, a sacred serpent dwelt: it was fed by the priests, and considered to be a sort of embodiment or guarantee of the Divine presence in the temple. This idea, however, was below the religious level of the highest Greek literature, in which it does not make much appearance; but it played a great part in popular belief and superstition, as well as in actual ritual. Especially, a serpent with large cheeks, called *pareias*, which was believed to be friendly to man and hostile to dangerous serpents, was considered holy, and used in the ritual of the Mysteries. In the sacred drama enacted in the Mysteries the god in the

* For Phrygia, see *Journal of Hellenic Studies*, 1882, etc. For Pisidia, see Sterrett, *Wolfe Expedition*, pp. 91-93. The present writer has seen many other Pisidian or Isaurian examples. Rohde (*Psyche*, p. 679) thinks that the lion was used as denoting the fourth grade in Mithraic initiation, and Cumont (*Mém. relat. au Cult. de Mithras*, p. 178) inclines to agree with him. This cannot be correct. It leaves the sex out of account: see the two following paragraphs.

† Perrot, *op. cit.* iv. p. 772.

‡ See below, § VI.

form of a serpent became father of the god-bull by Kora or Persephone his daughter (see the quotation in note to § III (2)); and the initiated fondled a *pareias* serpent in imitation of this.* Hence the idea that human life is of Divine origin took the form, in regard to some special heroes, (e.g. Alexander the Great) that a serpent was their father.

The idea that the serpent is a representative of the Divine life appears in various forms: a serpent was intimately associated with, and almost the embodiment to human eyes of, Æsculapius or Asklepios, of Sabazios, of Zeus Meilichios, and in general of most heroic and dæmonic conceptions, and of the departed dead. Naturally, the animal, which often took up its residence in graves, was regarded by popular superstition as the embodied spirit of the dead; and, when a serpent took possession of any grave in this way, there was a general tendency to regard the person there buried as being peculiarly active and efficacious, i.e. as a hero.† The dead man, again, has become identified with the Divine nature; and the serpent therefore is peculiarly representative of the Divine nature in its Chthonian aspect, i.e. as connected with the world of death. The Agathos Daimon, a Chthonian power, associated with the earth and the riches of the earth, is represented by a serpent (sometimes with a human head). See B, § V.

The worship of the god-serpent at Hierapolis and Laodicea in the Lycus valley‡ has played some part in the formation of Christian legend: the sacred serpent is there called the Echidna, and is described as the powerful enemy of St. John and St. Philip.

The belief in the sacredness of the serpent was practically disregarded by the majority of Greeks in the classical period, and despised as a superstition unworthy of an educated person; but some peculiarly sacred serpents, such as that of Athena Polias, retained a hold on general opinion. Ælian mentions that, of all the Peloponnesian Greeks, only the Argives refrained from killing serpents.

(12) *Sacredness of wild animals*.—Obviously, there is not the slightest appearance that the sacredness of the above-mentioned wild animals in this early religion was founded on dread of their power, and anxiety to propitiate them. The facts as stated are absolutely opposed to that opinion. Moreover, in the region of Asia Minor which we take to be the centre and origin of its religious ideas, the great central plateau, wild animals can hardly have been a serious danger within historical times. The country is open, and there is such total absence of cover§ that beasts of prey cannot have existed in any numbers. The Austrian traveller Sarre quotes the statement of Von Moltke, that the great plains are the most perfectly level known in the world. As a rule, they are and have been for thousands of years so bare and, apart from human work and provision, so unproductive, that little wild life, and none of the greater savage animals, could be supported in them. In such a level country deer would be a difficult prey; and when human skill wrought out some irrigation, found water, where it was not accessible on the surface, by sinking very deep wells, and introduced great herds of domesticated animals, the wild beasts which were able to prey on sheep or oxen

* Σαβαζίου γὰρ μυστηρίων σύμβολον αὐτὸς μυρομήνης ὁ διὰ πόλιν θύει δράκονα δι' ἑστῆς αὐτοῦ, διηλεκμένον τοῦ πόλιν τὸν τελευτήσαντα (Clemens Alex. *Protrept.* ii. 16; cf. Arnobius, v. 21; Foucart, *Les Associations Religieuses*).

† Strictly, every dead man was a hero; but such ones were heroes *par excellence*.

‡ Ramsay, *Cities and Bishoprics of Phrygia*, i. pp. 51, 87.

§ The central plains were known as *Axylon*, the treeless region, two centuries before Christ, in the first glimpse of them that the records permit; and other considerations show that this state had existed for a long time previously.

or goats could shelter themselves only in the broken ground of the surrounding mountains,* and in some of the isolated mountain peaks of the plateau (for others of those plateau mountains are singularly bare and shelterless). Thus the greater beasts of prey must have been from a very remote period few, and regarded in practical life as an object of the chase and of sport to the rulers and the nobles (in whatever form nobles existed); and it is probable that this condition of things fostered the tendency to regard them as sacred by some sort of religious substitute for a game law.

Again, serpents are neither very numerous nor at all dangerous. Various quite harmless species occur in moderate abundance, and a few are said to be venomous, but death from the bite of a serpent is practically unknown in the country. Yet the scantiness of the population in recent centuries, and the small extent of agriculture, have given full opportunity for wild life to increase to its natural limits.

Accordingly, for a period of four thousand years or more, wild animals in the plateau must probably have derived their sacredness from other considerations than the terror and danger that they caused; and the evidence of religious facts is clear that the origin lay in their noble qualities of strength and swiftness, and in their association with the Divine nature living free in the wild and mountainous districts. See also above, (10).

IV. SACRED PLACES. — (1) *Mountains*. — If a stone could be holy, much more could a great rock or a mountain be regarded as the home or the embodiment of the Divine power.† Mount Argæus, the lofty mountain which towers above Cæsarea in Cappadocia to the height of nearly 13,000 feet, was regarded as a god or as an image of the god, and by it men took a solemn oath: on the coins of Cæsarea it is the regular type, taking the place which the image of a god occupies in most coins of Hellenic or Hellenized cities.‡ On coins of Prostantha in Pisidia, Mount Viaros is represented in a similar way, and it, too, was evidently regarded by the people who dwelt near it as the holy mountain. The identification proposed in the *Historical Geography of Asia Minor* (p. 407) for Mt. Viaros rests chiefly on a certain similarity in the situation of the lofty peak, which towers over Egerdir and the great lake called by the ancients Limnai, to Argæus rising out of the level Cappadocian plateau.

Then in general it is probable or certain that the Great God was adored on the tops of other mountains. An example from another Cappadocian hill is proved by an inscription found on the summit.§ The lofty mountain, now called Hassan Dag, 10,000 feet high, north-west from Tyana, seems to have borne the same name, *Argæus*, as the Cæsarean mountain; and in that case it probably had a similar sacred character. The Bithynians worshipped Zeus under the names of Papas ('father') and Attis|| on the tops of mountains.

In the rock-temple at Boghaz-Keui, one of the figures, evidently a personage of great importance on account of his size,¶ is represented as standing, or rather striding, with his feet on the summits of two mountains. The Divine nature rests on the mountains, and is at home on their summits, just as, in other representations on the walls of the same natural temple, several deities stand on

their own sacred animals.* Again, in that same rock-temple, several of the sacred animals stand with their feet placed on the top of high squared pedestals; and the so-called 'Niobe' on Mt. Sipylus, which is beyond doubt an image of the goddess Cybele, sits with her feet resting on two similar pedestals.† Those pedestals are probably to be interpreted as holy pillars (such as those at Gnosso in Crete, pictured in Mr. Evans' article, *Journal of Hellenic Studies*, 1901, p. 110). The present writer formerly interpreted them as mountains;‡ but in the art as practised at Boghaz-Keui the type of the sacred mountain was rounded in form and broken in outline, and it seems hardly permissible to suppose that two types so different were employed there simultaneously to indicate the same conception.

The truth may indeed probably be that the sacred stone when unshaped and rude derived its holiness, in some cases, from being regarded as representative of the sacred mountain, the part standing for the whole (just as the bull's head stands for the god-bull, § III (2)), or the miniature for the vast reality. The *omphalos*, on which Apollo sits or stands, would then be a sort of miniature of the mountain which is his Divine abode.

It seems, at any rate, beyond doubt that originally any great mountain, such as Mt. Argæus, was considered sacred, because on it there rested a vague formless Divine presence and power, whose might dominated the country round. This becomes all the more clear when one considers the sacred caves: see the following paragraph.

(2) *Sacred caves and mountain glens*. — Many sacred caves are known: as, for example, Steunos, the cave of Cybele, near Aizani, described by Mr. J. G. C. Anderson in *Annual of British Sch. Ath.*, 1897-8, p. 56; the cave of Leto or Cybele, beside Hierapolis, described in *Cities and Bishoprics of Phrygia*, i. p. 89; the cave of Zeus on Mt. Dictæ in Crete, recently excavated by Mr. Hogarth; etc. All these are caves in the mountains, lonely, far from cities, full of the impressiveness and religious awe of wild and majestic nature. Along with caves in the stricter sense we may class deep gorges and glens among the mountains, in which holy places of Anatolia were often situated. They are roofed with the sky, instead of with a covering of rock.

In those caves and gorges the Divine power was not worshipped in any visible embodiment. The human mind was impressed by the vague formless presence of the Divine nature in such solitary places, and went there to worship. So, in modern times, at the head of the deep romantic gorge of Ibriz, where the great springs of the river of Cybistra-Heraclea flow forth from the rock in surroundings of impressive grandeur, the rude peasants from the neighbouring village come and tie a rag to the tree by the great fountain; and, if you ask the reason why they do so, they reply in simple phrase, '*Dede var*,' which is the nearest approach their untrained thought and scanty words can make to expressing their sense of present Divine power.§ In ancient times men had the same thought, that the Divine power was clearly manifested for the benefit of man at Ibriz; and they expressed it similarly by votive offerings, as

* See above, § III: the figures are shown in Perrot, *Histoire*, iv. p. 637.

† *Journal of Hell. Stud.* 1882, p. 30.

‡ As quoted in the previous note.

* The present writer has there seen bears and boars often; panthers and leopards are reported to exist.

† *ἡ δὲ Καρανδάνου καὶ οὗτος καὶ ἡμεῖς καὶ ἡγάλας* (Max. Tyr. viii. 8); graves on hill-tops, Puchstein, *Reisen in Kl.* p. 223.

‡ The order of Hierocles and the established identification of surrounding cities place Prostantha somewhere there.

§ Ramses, in *Bull. Corresp. Hell.* 1883, p. 822.

¶ Surely Attis must mean 'king' or 'prince.'

¶ Perrot, *Histoire de l'Art*, iv. p. 639.

§ *Dede* doubtless means originally 'ancestor': it is the name applied to those heroized personages worshipped in the *Turbe* common all over the country: the *Turbe* always contains or is built above the grave of the *Dede*, who is sometimes a known historical figure, sometimes a mythical personage, sometimes one whose very name has been forgotten, and who is simply 'the *Dede*.' See below, § VIII (5).

we may be sure. But they expressed it also in more civilized and artistic ways; and above all other forms they expressed it in a great rock sculpture, showing the god presenting his gifts of corn and wine to the king of the land. The river makes this part of the dry Lycaonian plain into a garden; and the god has given the river, making it flow forth from his holy mountain at the head of that deep gorge, which is like a vast cave open to the sky. The king is dressed in gorgeous embroidered robes: the god wears a peasant's dress, for he is the impersonation of the toiling cultivator, who by patience and faith adapts nature to the benefit of man. Nowhere is the spirit of Anatolian religion expressed so unmistakably as at Ibriz. In the words in which St. Paul appealed to a simple audience of Lycaonians, the fountains of Ibriz are a witness to the Divine power, that it did good and gave men fruitful seasons, filling their hearts with food and gladness (Ac 14¹⁷). The speaker knew his audience, and caught the exact tone of religious feeling that sounded in their hearts.

The rock-temple at Boghaz-Keui, which has been so often mentioned above, was of this class. A mile away from the great city, up a gorge in the side of a rocky hill, two chambers with vertical walls cut in the rocks (the human hand having assisted the natural formation of the recesses), entirely open to the sky, and connected by a narrow passage, leading from one to the other, constitute the temple and place of worship.

To the same class belonged the great Cappadocian sanctuary of Komana, in a glen of the Anti-Taurus, where the river Sarus flows in its winding channel deep down among the lofty mountains. To the same class, too, belonged one of the holy places of Ephesus. Besides the familiar and famous home of the Ephesian Artemis, which lay out in the open plain near the city and close to the isolated holy hill near the middle of the Cayster valley, there was another seat of her worship in a glen among the mountains that bound the valley on the south. This more sequestered place retained its sanctity alongside of the more famous temple. The account given of it has been transformed by adaptation to the later Greek mythology of Artemis; and the true old Anatolian aspect can only be guessed at. But there the birth of the goddess had occurred: there an annual festival and assembly (*panegyris*) was celebrated: there were both an ancient temple with archaic images and a later temple with Greek statues: there an association of Kouretes, evidently a society meeting in the worship of the goddess,* called by an ancient Anatolian and Cretan name, had its centre and celebrated certain mystic rites. And when the religion of Ephesus had been changed to a Christian form, the city had not merely the Church of St. John beside the great temple in the plain and the church called Maria in the city (where the Council of A.D. 431 was held):† there was also a holy place of the Mother of God among the mountains on the south of the plain (to which the Greeks of the district continued to make an annual pilgrimage down to the present day, calling the place Panagia Kapulu, the Virgin of the Door).‡

(3) *Sacred springs and lakes*.—In the holy place of Ibriz we have found that the awe attaching to glens amid the mountains was inseparable from the similar religious emotion suggested by bountiful springs. In that thirsty country the most fertile soil without water is a desert; but if water is given

or brought it becomes a garden. A fountain, then, was the gift of God; and the modern name applied to such great springs, *Hudu-verdi* ('God hath given'), is probably a mere Turkish version of an ancient Anatolian expression. A fine spring* which rises in the undulating plain on the east side of Lake Caralis (Bey Sheher), and flows down to the lake, is overhung by a series of ancient sculptures of obviously religious character, which are carved on the side of a small chamber built at the edge of the springs, so that the water seems to run out from under the huge stones of which the nearest wall of the chamber is built.

The fountain was the gift of God. The belief is distinctly different from the Greek idea of the Naiad nymph who lives in and gives life to the spring; and yet the two ideas readily pass into one another. The Greek mind was filled with the sense of joy and life that the spring suggests; the spring was the life of a god; and the life of the spring in the Greek anthropomorphic imagination was pictured as a Divine maiden, human in form and character and emotions, but eternal and ever young. The Anatolian mind regarded the spring as Divine, because given by God, and at the same time it was conceived as the home and embodiment of Divine life, the proper object of worship, the mother of the life of the fields which derive their fertility from its waters, and ultimately, too, the mother of the heroes and men who are born beside it and fed from its produce. This last idea appears still in its earlier form in *Iliad*, ii. 865, where the Lydian chiefs are the sons 'to whom the Gygaean lake gave birth.' But from this it is an easy step to the Greek idea of the Naiad; and we see that the step has been taken in *Iliad*, vi. 22, where the Naiad nymphs in the Troad bear two noble sons to the hero ox-herd. The ultimate cause of sacredness, viz. purity and use to man, appears in the Italian prohibition of bathing in sacred springs or the sources of aqueducts (Plin. *Ep.* viii. 8. 20. 5; Tac. *Ann.* xiv. 22; Sen. *Ep.* 41).

When the spring was of hot or medicinal water, its beneficent qualities and God-given origin were equally or even more conspicuous. Many such springs are known to have been the scene of a special worship, and doubtless all were so. The Divine power was clearly seen in them.

(4) *Development of the sacred place into a religious centre or Hieron*.—Naturally, some of the sacred places became much more famous and important than others. The circumstances that produced such fame and importance belong to the history of each individual locality. It was the needs, the numbers, and the nature of the surrounding population that made some shrines greater than others. Holy places in very secluded situations could hardly become very important as religious centres, though devotees often visited them and made offerings. The great *Hiera* were usually connected with some centre of population, where the primitive form of theocratic government and the needs of the ritual (on which see § VIII (7) and § VII (9)) caused the growth of a large establishment, whose influence became recognized far beyond the immediate circle of its original worshippers. Such, for example, were the Pontic and the Cappadocian Komana, the Galatian Pessinus, the two *Hiera* of the Cappadocian Zeus at Venasa and at Tyana, the *Hieron* of the Milyadic Zeus or Sabazios, mentioned by Aelius Aristides (which is certainly the one that is described in considerable detail in the writer's *Cities and Bishoprics of Phrygia*, i. ch. ix., though the identification is not there mentioned), the *Hieron* of Leto and Lairbenos at Dionysopolis and Hierapolis (ib. ch. iv.), and many others.

* Eftatun Bunar, 'Plato's Spring': *Hist. Geogr. As. Min.* p. 20.

* See *Cities and Bishoprics of Phrygia*, i. p. 96 ff.; ii. pp. 359, 680 f.; below, § VIII (6).

† *ἡ ἐν τῇ ἐκκλησίᾳ τῇ καλουμένῃ Μαρίας*: see above, vol. i. p. 725.

‡ The Roman Catholics of Smyrna have taken up this place during the last ten years, calling it the house where the Virgin lived after St. John brought her to reside at Ephesus.

It is not the case, however, that those great *Hiera* were later in growth than the cities beside which or in which they were situated. In many cases it was the *Hieron* which caused the city to grow by attracting population. But a large population required a suitable home, and the town where people should dwell could in many cases not be situated exactly at the holy place, and must be placed at some distance. At Ephesus it is highly probable that the place among the mountains on the south of the valley where the goddess was believed to have been born, and where *Mysteria* were regularly performed, was the true old holy place; but the *Hieron* grew in the open valley, beside an isolated hill, which formed a convenient centre for the growing population.

(5) *Sacred places in the religion of Greece.*—It is obvious how entirely pre-Hellenic this religion was, so far as we have yet described it, and how entirely unlike it was to the religion that we are familiar with as Greek. Not a single feature which we regard as characteristically Hellenic is apparent in it. And yet, to everything that we have described, parallels can be cited from religious foundations in the strictly Greek lands. Behind Greek religion proper there lies, far away back, that old aniconic worship in mountain solitudes and mysterious caves, or on mountain tops, like that of Hera on Mount Ochia in Eubœa, or of Zeus on Mount Lycæus in Arcadia; and the most barbarous of the rude symbolic images of Anatolia, compounded of parts of animals, are not more absolutely un-Hellenic than the Arcadian horse-headed Demeter. That early religion of the Greek lands seems to have been the religion of the aboriginal race who elaborated the Mycenaean civilization of Crete and the Aegean Islands, and, above all, of the Argolic valley and other parts of the West Aegean coastland, the people whom Prof. W. Ridgeway would identify as Pelasgian. On this ancient foundation the religion of later and more artistic Greece was gradually built up: see below, B, § I.

V. RELATION OF THE ORIGINAL ANICONIC RELIGION TO IMAGE-WORSHIP. — (1) *Coeistence of the two kinds of worship.*—We have spoken of that primitive religion as aniconic, as reverencing the Divine nature without giving it any definite form; and yet we have been forced often to speak of the rude images in which that primitive conception of the Deity was expressed. The truth seems to be that the inconsistency, in which we find ourselves involved, lies in the religion from the beginning. Probably it was at no time absolutely aniconic and impersonal: doubtless there was always in the popular conceptions a deep-seated and unconquerable tendency to give form to the Divine nature, to regard it as envisaged in something like human or animal form. The anthropomorphic side alone was steadily developed in the growth of Hellenism. In the Anatolian religion the aniconic side and the barbaric bestial envisagement both continued strong and important, until they were forced into the background by the invasion of the formed and completed Hellenic civilization, with its philosophic scepticism about the old religion in theory and its anthropomorphic orthodoxy in practice. But even then those native characteristics were far from being extirpated. They persisted in the form of superstitious and secret mysterious rites, and, for the most part, even the educated tolerated them and accorded a moderate amount of recognition to them.

Again, even in the latest period, when image-worship was apparently universal, the old, vague, impersonal conception of the Divine nature was not extirpated, but remained still vigorous. No inconsistency was felt between the aniconic and the iconic personal idea. All the stages in this

long process of development could perfectly well exist at the same time. Two or three centuries after Christ, it is evident from many inscriptions that the popular mind often thought of and spoke about 'the God,' or 'the just God,' or 'the pious and just God,' as the vague, formless Divine power. The people were all acquainted with and revered both the purely human representations of the Greek religious art and the barbarous symbolic images of primitive Anatolian worship. But still their mind was also occupied with a mysterious power behind them.

Similarly, we must recognize that from the earliest stage the germs of image-worship and anthropomorphism were not wanting.

(2) *Votive images and representations of the Deity.*—The need for some outward and material representation of religious conceptions seems to have been felt especially in approaching the Divine nature with prayers and vows, and in making acknowledgment of and expiation for neglect or disobedience. The worshippers came to the holy place, cave or grove or mountain or spring or stone, and they desired to leave there either some token of their reverence or some reminder of their own person and their own needs, or perhaps both. In proof of their reverence they dedicated offerings, either the sacred emblems and symbols of the Divine power, e.g. axes to the god with the axe in the Dictæan cave of Crete, or representations of the home and nature of the Deity. The most characteristic of those representations were the shrines (*naoi*), on which see below, (3). Further, in evidence of their gratitude when they paid their vow, or of their penitence when they atoned for some neglect of the Divine will and power, they often left representations of themselves as they had been aided by the god, or of the part of the body in which they had suffered punishment, just as the modern peasant ties a rag from his clothing on a sacred tree beside the old sacred fountain.

(3) *Shrines (naoi).*—Most typical among the votive offerings of Anatolian religion are the shrines or *naoi*, which filled so large a place in the practical elaboration of Artemis-worship in Ephesus. The *naoi* of Artemis are described at some length in vol. i. p. 606. Here we have only to allude to the origin of this representation. We seem to find the oldest known form of the *naos* in the colossal figure of the so-called Niobe in Mt. Sipylus, which is indubitably an image of the goddess (whether Cybele or Artemis, two names of the one ultimate Divine nature), and which is probably the ancient statue of the Mother-Goddess described by Pausanias as the work of Broeteas. This image we take to be rather a votive representation than intended as a cultus-statue. Its conspicuous situation in a perpendicular rock at the top of a very steep slope seems to prove its votive character: it is a token of the piety of the dedicator, not an image set up to be the object of worship for others, though doubtless some cultus would be established here by the dedicator as part of his pious act.

Other very archaic examples of the same character are probably the Cybele between her lions at Arslan-Kaya,* and the little figure of the goddess on the outside of the wall of the Midas city.†

The thought which the dedicator desired to express was that of the Mother-Goddess in her sacred cave; he imagined her as of vaguely-human form, for she to whom man owes his birth cannot be wholly unlike the human form: he tried to give her the accompaniments and emblems suited to express her power or her chosen ritual, lions or *tympanon*. This primitive idea, worked on the

* *Journal of Hellenic Studies*, 1884, p. 245.

† *Ib.* 1882, p. 42.

rocks, was developed in numberless small votive works in terra-cotta or marble or silver; and many examples of those in the cheaper materials are found at most of the seats of Anatolian worship. See also vol. i. p. 606.

VI. THE DIVINE IN HUMAN FORM AND CHARACTER.—If various animals seemed suitable expressions or embodiments of the might of the Divine nature, the human analogy most of all affected the mind, and commended itself as proper to convey some idea of the Godhead. That the anthropomorphic tendency existed from the beginning alongside of other forms of expression which have been described, seems indubitable (just as the aniconic idea has been traced as surviving even in the most developed iconic period); and it has given rise to far the largest mass of myth.

(1) *The Great Mother*.—The characteristic which specially distinguishes the Anatolian religion is its conception of the Divine Being as the mother, not the father, of mankind. This feature runs through the social system and the history of the land. Strong traces of *Mutterrecht* have been observed and collected by several writers. Even in the Græco-Roman period, when those traces had almost disappeared from the cities owing to the spread of Greek manners, women magistrates are very frequently alluded to.

The life of man was conceived in that old religion as coming from the Great Mother: the heroes of the land were described as the sons of the goddess, and at death they returned to the mother who bore them. The god, the male element in the Divine nature, was conceived as a secondary figure to the Great Mother; he was recognized as only an incidental and subsidiary actor in the drama of nature and of life, while the permanent feature of the Divine nature is its motherhood, as the kindly protecting and teaching power. In later development, under the influence of external conditions and foreign immigration, more importance (especially in the exoteric cult) was attached to the god: see § VIII (7).

That conception of the Divine power was prompted and strengthened by the physical character of the land. The great plateau, where the religion had its ancient home, was separated from the sea by broad and lofty mountain walls (and it is on the sea that the sense of personality and individual initiative are most encouraged); and its character tends to discourage the sense of personal power, and to impress on the mind the insignificance of man, and his absolute dependence on the Divine power.* But the Divine was kind, lavish of good gifts in rain and useful winds and fountains of water and everything that was needed; but all those good things required skill and work and obedience to the divinely taught methods, in order to take advantage of them. Disobedience to the Divine commands meant ruin and unproductiveness. Obedience was the prime necessity. With patience and observance the children of the earth found that the Divine power was a protecting, watchful, and kind mother.

That character is permanently impressed on the history of the land and the people; not vigour and initiative, but receptivity and impressibility, swayed the spirit of the people, breathed through the atmosphere that surrounded them, and marks their fate throughout history;† and this spirit can be seen as a continuous force, barely perceptible at any moment, yet powerful in the long-run, acting on every new people, and subtly influencing

every new religion that came into the land. Thus, for example, the earliest trace of the high veneration of the Virgin Mary in the Christian religion is in a Phrygian inscription of the 2nd cent; and the earliest example of a holy place consecrated to the Mother of God as already almost a Divine personality is at Ephesus, where her home among the mountains* is probably as old as the Council of Ephesus, A.D. 431.

In regard to the nature of the Goddess-Mother, it is unnecessary to repeat what has been said in vol. i. p. 605 on the nature of Diana: that whole article may be assumed here.

(2) *The growth of mythology as the story of the life of the Great Mother*.—The Great Mother, evidently, was often imagined simply as the Divine guardian and protecting mother, without any distinctly sexual character being thought of. But her character as the mother could not be separated from the sexual idea in the popular mind; and, naturally, it is on this side that most of the mythology and dramatic action connected with the Divine story originates. The mystery of life, the succession of child to parent and of crop to seed, the growth of plant and tree and animal and man, lay deep in the minds of the primitive Anatolian people or peoples. They regarded all these phenomena as manifestations of the same ultimate Divine power. The custom of killing a human being in the field that his life may pass into the coming crop and make it grow well, is clearly implied in the legend of Lityerses at Celenæ. Similarly, the life of the tree is the life of the Dryad or Nymph. Each form can pass into the others, if the suitable situation occurs.

The life of nature begins anew every spring. This process is the life of the Great Mother: her child is born every year. Sometimes this birth was imagined as originating through her own innate power; she combined, as it were, the male and the female principle in herself. In Caria and in Cyprus this took the grotesque form that the supreme god was bisexual, and some repulsive legends were founded on this barbarous idea. These are probably not strictly Anatolian: they are distortions of the original thought, for a male deity imagined as endowed with some bisexual characteristics does not explain the continuance and perpetuation of the life of nature. They probably arose among immigrant peoples, like the Carians, whose national character substituted a god for a mother-goddess as the supreme conception of Divinity.

Certainly, that bisexual idea was on the whole rejected in the development of Anatolian religious symbolism; and little mythology was founded on it. More common is the idea that the Great Mother conceives through the influence of some flower or fruit, or in some other non-sexual way, as in the birth of Attis at Pessinus.† Not unrelated to this is the already mentioned idea that the god-serpent was the father of the Divine child.

But far more characteristic and widespread, and more simple and natural, is it to describe the Divine life more exactly according to the analogy of the natural world. The Divine nature is then imagined as divided between the two sexes; there is the god and the goddess, and the process of the Divine life evolves itself in the reciprocal action of the Divine pair and the birth of a new offspring: thus we find that the God-Father, the Goddess-Mother, and the Son (Dionysos, Sabazios, etc.) or the Daughter (Kora, etc.), are all assumed as essential to the drama of Divine life in numerous cults and myths.

While we cannot penetrate, in the dearth of

* See the art. on 'Geographical Conditions determining History and Religion in Asia Minor' in the *Geographical Journal*, Sept. 1902, where the subject is more fully treated.

† See the art. in the *Geographical Journal*, as in previous note.

* See above, § IV (2).

† Pausanias, vii. 17.

evidence, to the earliest forms of these sacred myths and of the cult usages with which they are connected, it seems only reasonable to suppose that they began in a simple and self-consistent form. The view which forces itself on us is that the drama of the Divine life was at first understood and presented to the worshippers in some single and definite form at a time, and not in a confused mixture of different forms. In this ancient ritual the goddess is generally the important and essential figure, while the god is an adjunct needed for the proper development of her life, who passes out of notice when he has fulfilled his part in the drama; and in many cases the union of the two is described as a crime against some law, or actually as an act of fraud or violence even of the most abominable character, which sometimes entails punishment even unto death.

(3) *Myths of the goddess and the god.*—Sometimes the union of the goddess and the god is pictured under the forms of agriculture, as of Demeter with Iasion 'in the thrice-ploughed fallow field.' Thus the goddess bears the Divine child; but Iasion is slain by the thunderbolt; for a life must be given in primitive ritual that the crop may acquire the power to grow. This cult myth (*τέπος λόγος*) is connected with the Samothracian Mysteries and with Crete, two ancient centres of the primitive population, which we may now call Pelasgian, using the same name that the Greeks used, though modern scholars long ridiculed it.

Most important and most instructive as to the nature of the Anatolian religion is the idea, described above in § III (7), that the Divine power and the Divine life are revealed in the nature of the bee. As we have seen, the form of the Ephesian goddess (a form not restricted to Ephesus, but widely prevalent in Lydian and Phrygian cities) is modelled far more closely on the shape of the bee than of the woman. Now, the life of the queen bee (as described in the *Encyclopædia Britannica**, whose account may be given more shortly in the following terms) is the best explanation of the Attis legend. As regards reproduction, the opinion was once maintained that the queen bee was in herself sufficient without any male bee, or that the male principle was conveyed to the queen without her coming into contact with a male. But it has been clearly proved that the queen comes into relation with a male bee while taking a flight in the air; and if she does not find a mate within three weeks of her birth the power of intercourse seems to become lost. In the intercourse the male is robbed of the organs concerned; and thus mutilated is left to perish on the ground. His existence seems to have no object apart from the queen bee, and he fulfils no other function and no other duty in life. This description applies with striking exactness to the relation between the Mother-Goddess and the god, who (as we have seen) exists merely to be her consort, and is quite an insignificant personage apart from his relation to her. We must here anticipate what is said in later sections as to the character and original importance of the Goddess-Mother, and as to the growth of the dignity of the god in historic development, in order to bring out the bee nature in her life-history. The god consorted with the goddess by stealth and violence: the goddess was angry at the outrage: she mutilated the assailant, or caused him to be mutilated (*exsecris virilibus semivirum tradidit*). Even the false but not unnatural opinions about the impregnation of the queen bee have obvious analogies in the myths about the Mother-Goddess.

The myths riot in variations on this ugly theme, and we need not allude to them, except in so far as they are necessary for understanding the facts.

The god, though mutilated, must still be living in perfect form, for the life of nature (whose annual bloom he represents) is renewed in perfection every year; and accordingly the myth sometimes tells that the penalty was inflicted vicariously, *ἀποστάσας ὁ Ζεὺς τοῦ κροῦ τοὺς διδύμους φέρων ἐν μέσσοις ἔριψε τοῖς κόλποις τῆς Διοῦς, τιμωρίαν ψευδῆ τῆς βίας ἀσυμπλοκῆς ἐκτινύων*, where there is an obvious reference to the treatment which the sacred instructions prescribe for domesticated animals.* Further, purely fanciful developments in Greek myth produced such tales as that the goddess was a lover of the god, and mutilated him in jealousy, or that the mutilation was intended to compel and enforce chastity. Such tales are absolutely opposed to the original Anatolian idea, which is intended to account for the fruitfulness and new life of nature. The subject offered a good opening for attack to the Christian polemical writers, Clemens Alexandrinus, Firmicus Maternus, Arnobius, etc.; and they are our best authorities. The accounts which they give, hideous as they are and concentrating attention only on the evils, must be accepted as correctly stating facts: it would have ruined their effect if they had not been recognized as true statement of facts. Moreover, they are corroborated in various details by pagan authorities; and as a whole they bear the unmistakable stamp of truth, but not the whole truth.

The myths in their older form, as distinguished from the fanciful variations, are obviously in the closest relation to the ritual: they are simply descriptions of the drama as represented in the sacred rites.

At other times the union of the two Divine natures is pictured after the animal world: Demeter as the mare meets the horse Zeus, Pasiphae became the cow, and so on. Popular and poetic imagination, which sported in the most licentious fashion with all those myths of the Divine unions, worked out this class of tales especially with the most diabolical and repulsive ingenuity; and it is in the degraded conception of the Divine nature implied in these abominable fantastic developments that the Christians who inveighed against the pagan religion found their most telling weapons. The mythology that grew around this subject would in itself make a large subject; but, though it possesses considerable interest as bearing on history and social customs, it has little value from a religious point of view.

These exaggerated and really distorted myths did not remain mere tales. They reacted on the ritual, which grew and elaborated itself and took in new elements in the lapse of time. But in this process of elaboration there was no real religious development, but simply degradation.

(4) *The birth and death of the Divine nature.*—The mystery of birth is matched by the mystery of death, and the one occupied the mind of the primitive Anatolian peoples as much as the other. Death was regarded and imagined by them under similar illustrative forms drawn from external nature; and the Divine nature, which is the model and prototype of all the activity of man, was seen living and dying in the life of trees and plants, of grass and corn. The recurring death of nature, the bright and beautiful luxuriance of spring cut off in its prime by the sun of summer, the joy and warmth of the summer alternating with the coldness and darkness of the long severe winter on the Anatolian plateau, the light of day transformed into the deadness of night, furnished a series of expressions of the same principle; and mythology and cult are full of them. In numberless local varieties the same truth is expressed: the young hero is slain in the pride of life and the joy of his

* See above, § III (74).

art: Marsyas the sweet rustic musician vies with the god, and is by the god hung up on the plane tree and flayed: Hylas is drowned in the fountain by the nymph who longs for him and takes him away to herself from the earth: the twelve children of Niobe are all slain by the wrath and arrows of the god: Achilles must die young, and his grave was shown at various seats of his worship, in Elis, in the Troad, on the south Russian coasts. The eternal contradiction repeats itself: the life of nature is slain, yet reappears: it is slain by the Divine power, yet it is in itself the embodiment of the Divine power: the god slays the god: on this, mythology plays in endless variations of the same tale.

With this obvious fact of the death of nature, its birth is equally obviously connected. The life of nature never ends: it dies only to be born, different and yet the same. Men mourn for the dead god, and immediately their mourning is turned to joy, for the god is reborn. The mourning over Adonis in the Phrygian worship of Cybele was succeeded by the *Hilaria*, as the lamentation for Adonis or 'Thammuz yearly wounded' in Syria was followed by the rejoicing over his rejuvenation.

With this subject the largest and the most valuable class of myths is connected; but the few examples which have been quoted above must suffice.

VII. RITUAL AND CEREMONIAL. — We have spoken of the growth of mythology before speaking of the ritual in which the Anatolian religious ideas sought to express themselves. This order must not be taken as implying the opinion that myth is, either logically or chronologically, prior to ritual. On the contrary, ritual comes first, and myth is secondary: myth grows around the rite, and explains it or justifies it or enlarges it to the popular mind. But myth begins from the very origin of ritual, and there was probably never a time when rite existed free from myth. The human mind must from the beginning describe and think about and imagine to itself the reason and nature of the religious rite; and its thought and fancy and description express themselves as myth. But the ritual has perished, while fragments of the mythology have been preserved; and it is through the myths, compared with some rare pieces of evidence about the rites, that we penetrate back to the ritual.

(1) *The origin of ritual.* — The ritual of the Anatolian religion is very imperfectly known. So far as we are able to discover, it is founded entirely on the idea that the Divine nature is the model according to which human life must be arranged. The god, or rather the Goddess-Mother, is the teacher, protector, corrector, and guide for an obedient family of children. What they ought to do is to imitate the Divine life and practise the divinely revealed methods. The ritual is the whole body of Divine teaching. The sacrifice, as the method whereby man can approach and seek help from Divine power, has been revealed by God; so the god was at the beginning the first priest, and the ritual is the repetition before successive generations of mankind of the original life of the Divine beings. The successive priests in the cultus were each of them representative for the time being of the god; each wore the dress and insignia, and even bore the name of the god.

In accordance with this principle various reliefs are to be explained, in which the representation is grouped in different zones: in the upper zone the Divine figures appear in their own proper circle of circumstances; in the lower zone the Divine figures appear as brought into relations with mankind, their worshippers, and, e.g., as teaching men the method of sacrifice and offering. One of the best

examples has been published by an old traveller, Wagener, in his *Inscr. rec. en Asie Mineure*, pl. i. It is still in existence, and will be republished in the proper chapter of the *Cities and Bishoprics of Phrygia*, iii.

According to our view, then, the Anatolian religious ritual was a representation or repetition of the stages and actions of the Divine life. The important stages in human life were embraced therein; and human individuals made their lives right and holy by performing their actions after the Divine plan.

This is a large subject. It is as wide as the life of the ancient Anatolian races, and in its full breadth it would have to include the progress of history and the march of conquerors and of immigration, for all those events affected and modified ritual. Here we touch on a few details only. Fortunately, circumstances favoured the preservation, throughout the dominance of paganism, of an important part of the primitive ritual under the form of *Mysteria* in many of its original seats, not merely in Anatolia, but also in Attica, Samothrace, etc. The primitive forms were not, indeed, kept pure, but were adulterated by many additions; but still they remained; and if we had a complete knowledge of the *Mysteria*, we could go far to recover the primitive forms. It is necessary here to treat together the Anatolian and the Greek *Mysteria*, anticipating part B.

(2) *The Mysteria.* — The ancient ritual of the Greek or Pelasgian tribes was overlaid but not destroyed by later religious forms of more 'Hellenic' character. In mythology this is expressed by tales of the conquest of the old deities by younger gods, Kronos or Saturn by Zeus or Jupiter, Marsyas by Apollo, etc. In such cases the old religion, though conquered, is not extirpated, but only submerged. It takes a long time, and much education, to eradicate a religion from the popular heart: the hearts of the educated and privileged classes are more easily changed. When the new religion stands on a distinctly higher platform than the old, or is of an uncompromising nature, the ancient beliefs persist in some such form as magic and witchcraft and rites proscribed as unhallowed and evil, and the older gods are stigmatized as devils: see B, §§ I, V; C, § III (5).

But in this case the new religion was not uncompromising, but singularly accommodating in type. Its spirit was polytheistic and eclectic in the highest degree. It had little objection to a pair or a score or a hundred of additional gods, old or new. Where laws existed in the Greek cities forbidding the introduction of 'new gods,' the intention was rather political than religious: the dread was lest anything should be introduced that would disturb the delicate equilibrium of Hellenic city-constitution, and especially anything that would prove self-assertive or bigoted, and would tend to subvert the established city religion, which formed an essential element of the city-constitution, and was to a great extent political in character: see B, § IV (14).

Accordingly, the old forms persisted in the form of *Mysteria*, sanctioned by the State as ancient and holy, yet distinctly regarded as a survival not quite in keeping with the true Hellenic religion. The old gods were still considered and revered as gods, admitted as members of the Hellenic Pantheon; and though Zeus was nominally the supreme god, yet in some ways the old gods whom he had dethroned were esteemed more holy and more efficacious than he. The name *Mysteria*, which was given to the ancient rites, was indicative of an element of secrecy, and a certain uncanny character, as of ideas which were not to be admitted as part of ordinary life.

What, then, were the Mysteries? In what lay their essential character? Before trying to answer this question we must point out that, though there is in the general view a distinct separation between Mysteries and the cults of the properly Hellenic gods, yet in practice and in detail they pass into one another, so that it is impossible in some cases to say what category certain rites fall under. But there is a general type characterizing all the cults called Mysteries; and, as we shall see, the great Mysteries were in Roman times developed so as to be even more strikingly similar to one another. The Mysteries of the Anatolian religion may be conveniently summed up under the name Phrygian Mysteries, as they are commonly called by the ancient writers; but they were celebrated far beyond the bounds of Phrygia. The name *Mysteria* was, doubtless, given to them in Asia Minor rather from their analogy to the *Mysteria* of Greece proper; and not because they were considered there so mystic and separate from ordinary religion as they were in Greece proper. In the cities of Asia Minor, however, the Greek or Hellenic views of religion became steadily more effective; and as those views grew stronger, the native religion was more and more felt to be of the nature of *Mysteria*.

(3) *Nature of the Mysteries.*—In the Anatolian religion, either originally or at some stage in its history (whether through contact with some other race or through some other educational influence), the idea of the recurring death and new birth of the natural world—regarded, of course, as the annual death and rebirth of the Divine life—was combined with the fact of the sequence of generations in human life. The same sequence must exist in the Divine nature, for the Divine nature is the counterpart and prototype of the human in all stages of its history. The Divine parents and the Divine child correspond to the human. The drama of this Divine life was set before the worshippers in the Mysteries.

But again in the Divine life, as we see it in the annual life of nature, the father is the son, the mother reappears as the daughter: it is never possible to draw any definite line of division between them: the Divine child replaces the parent, different and yet the same. If that is the case with the Divine, the same must be the case in human life. The stream of human life goes on continuously, changing yet permanent; and death is only a moment in the succession. Here the idea of immortality and a life of man wider than the limits of the material world is touched.

Obviously, an important aspect of religion is here introduced. Human life is regarded as permanent and everlasting, like the Divine life of nature; and the religion of the grave is the foundation of the entire religion [see also § VIII (5)]. That man when he dies becomes a god, was considered already in the 4th cent. B.C. to be part of the teaching conveyed in the Mysteries, as is shown in the curious metrical inscriptions engraved on plates of gold which have been found in graves of South Italy and Crete, and which belong to that and the following centuries. There the dedication is considered to be the result of initiation; but in the primitive religion, when all men were religious and the Mysteries were the religion of the whole people and not restricted to some chosen *mystæ*, the dead all went back to the god from whom they came. In a very ingenious paper, S. Reinach has discovered the mystic formula uttered by the initiated—'a kid I have fallen into the milk,' which conveyed in symbolic terms the same meaning as the words which the goddess of the world of death seems to have addressed to the initiated dead who came before her—'thou hast become a god instead of

a man,' or 'thou shalt be a god instead of a mortal.'*

It is certain that the pagan apologists, defending the established religion and attacking the Christian, found this philosophic meaning in the ritual of the Mysteries, in which that early religion still lived on. That this meaning was implicit in the ritual from the beginning seems fairly certain. That it was understood by some persons is probable, and that some development of the ritual was made at some time or times to give more emphasis to the meaning is also probable. Not merely people in general, but also some of the most educated among the Greeks, believed in the salutary effect of the Eleusinian Mysteries; and this salutary effect is expressly connected with the future world.† Advantages in the world of death (or of life) are said to be gained by those who are initiated; and those advantages are not the result of the mere ritual observance. The initiated are said to grow better; and salvation in the future life is said by Isocrates to be gained both by the initiated and by all who live a pious and just life (*Symm.* xii. 266).

But this effect of the Mysteries was not attained or helped by any formal instruction. It was dependent entirely on the intense interest and eager contemplation of the initiated, and the strong impression produced on their minds. The ceremonies at Eleusis took place at night, after a considerable period of preparation and purification: the purification consisted mainly in ritualistic acts, but not entirely so, for probably some stress was laid on the condition that the initiated must be pure in heart and not conscious of having committed any crime: they were, certainly, left to judge for themselves of their own moral purity, and the best ancient pagan conception of purity was consistent with habitual disregard of some of the elementary moral rules of the Christian and of the Hebrew religion. But the principle of moral purity was admitted, even though only in a very defective and poor form; and that was a great thing, at least in comparison with the general character of ancient paganism.

After this preparation, and when in a state of high expectancy, the initiated were admitted to see the drama of the Divine life: the words spoken in the drama were few, and concerned only with the action: the mystic objects were simple in character: the most holy and crowning act at Eleusis was the ear of corn mowed down silently. But there was a belief ready in the minds of the spectators that certain truths were enigmatically expressed in the action, though, as the ancient writers say, a philosophic training and a reverent religious frame of mind were required to comprehend them.‡

The details of the Mystic drama set before the worshippers cannot here be described. A very

* That the kid is here the mystic form of Dionysos, as the God-Son in the Divine nature, is generally recognized: see S. Reinach, *Rev. Arch.*, Sept. 1901, p. 205 (though we cannot go with him beyond what we have adopted from him in the text above). The Phrygian Zeus Galaktinos, or Galaktios, may be brought into comparison (*Histor. Geogr. As. Min.* p. 235, and A. Korte, *Beilage zum Vorlesungsverzeichnis*, Greifswald, 1902, p. 30): he is the god of the pastoral people of the great plains and the grassy hills of Phrygia.

brief description is given, in vol. iii. p. 467, of the ceremonial of the Eleusinian Mysteries; and in the last few paragraphs we have had those Mysteries chiefly in mind.

(4) *The character of the Phrygian and the Greek Mysteries.*—Probably there was not a wide difference even in the beginning, and still less in later times, between the Eleusinian and the Phrygian Mysteries as regards actual ritual: many ceremonies were probably common to both, and in both there was much that was disgusting and repulsive. Yet the Phrygian Mysteries are described as abominable and immoral by the older Greek writers, even by those who praise and admire the Eleusinian: the former were believed to ruin and degrade a Greek city, but the latter to save and ennoble it. The difference lay not simply in the fact that some repulsive ceremonies are quoted by the Christians as peculiar to the Phrygian Mysteries; for much of what remains in Clemens' description of the Eleusinian is equally detestable. The real superiority of the Eleusinian over the Phrygian Mysteries lay, first, in a certain difference of spirit, as the Greek sense of order and measure and art undoubtedly gave a harmony and artistic character to their version of the Oriental forms; and, secondly, in the fact that, as known in Greece proper, the Phrygian Mysteries were introduced by slaves and foreigners, and participated in by the superstitious and the ignorant: they were celebrated for money by strolling priests, and any one who paid a fee was initiated without preparation except some ritual acts: there was no solemnity in the surroundings, and no dignity in the ceremonial, but all was vulgar and sordid. A very few persons, also, might observe that the slight requirement of moral purity made at Eleusis had become a mere phrase in those street celebrations, and that advantages in the future world were promised in return for mere participation in those vulgar rites. But that observation was probably beyond the ordinary range of even the educated Greeks.

As regards the many disgusting details against which the Christian writers direct their polemic, the admirers of the Mysteries might defend them by arguing* that religion places us face to face with the actual facts of life, and that, when the mind is exalted and ennobled by intense religious feeling, it is able to contemplate with pure insight phenomena of nature and life in which the vulgar mind sees nothing but grossness. They would point out that the language of religion may be and ought to be plainer and more direct than the language of common life. These arguments are weighty; but one has only to read the undeniable accounts given by Clemens, Arnobius, etc., to see how insufficient they are to palliate the ugliness of the ritual.

In primitive thought the direct and simple expression of the facts of life would need no apology and no explanation. The feature of the Mysteries that needs and is incapable of apology is that, as known to us in later time, they are not simple and direct: they are elaborate and artificial products of diseased religion. They stand before us as the culmination of a long development; and the development has been a depravation, not an elevation, of a ritual which had at first been naïve and direct in its simple rudeness.

(5) *The growth of ritual.*—The process of growth in ritual went on in two ways.

(a) In the meeting of two different races their respective religions affected one another. Doubtless, the one generally swamped and submerged the other; but the apparent victor was not unaffected in the process. An indubitable example is seen

in the Lydian Katakakeaumene, otherwise called Mæonia. Here an old Mæonian or Lydian population was mixed with a body of colonists introduced by the Persian kings five centuries B.C.; and in the Roman inscriptions six or seven hundred years later the goddess is called Artemis Anaitis, the first name being her ordinary title in Lydian cities, and the second being Persian. In other Lydian cities, where the same mixture of population took place, the goddess is called Artemis Persike, in which the same religious mixture is even more clearly expressed. In cultus, obscure as that subject always is, it is certain that the fire-worship and Magian priests of the Persians were thus introduced into those Lydian cities.*

(b) There was often a conscious and deliberate elaboration of forms and ritual by the priesthood. This enlargement of the ceremonial was the result of an attempt to adapt the established religion to popular taste, and was accomplished chiefly by introducing rites that had proved fashionable. The Mysteries celebrated at different religious centres competed with one another in attractiveness, for there was much to gain from a great concourse of worshippers in any city. Hence all of them adapted to their own purposes elements which seemed to be effective in others; and thus a marked similarity of character between the rites of Eleusis, Samothrace, and Anatolia came to exist. Sometimes, at least, new priests were added along with the new ceremonies. These ceremonies were often derived from or influenced by the growth of mythology, and they seem (so far as the scanty evidence justifies an opinion) to have generally tended to obscure any healthy religious idea that lay in the ritual, and to have increased the ugly and repulsive element.

The older forms of religion are the simpler, but it is not probable that any form was ever absolutely simple. There is a certain tendency in human nature to mingle forms, and to see the Divine idea under several aspects. Just as in early literary expression metaphors are often mixed, so in primitive thought different envisagements of the Divine power arise simultaneously, and these pass into one another without the inconsistency being felt. Still, it is beyond question that, when we get any of these religious ideas at an early stage, it has a simpler form and embodies a single process, though the accompanying religious myth may express the process in a way that involves some inconsistency in details. This ancient form is markedly and unmistakably different from the elaborate and artificial ritual of later times.

Especially, the elaborate dramas of the later Mysteries, as played before the initiated in the Roman Imperial period, are obviously composed by a process of syncretism out of various inharmonious and inconsistent cults. In the story enacted in the Eleusinian Mysteries, as described by Clemens Alexandrinus, there are traces so obviously Phrygian, that many modern scholars have regarded his whole description as applying to the Phrygian Mysteries alone. But Clemens distinctly implies that he is describing the Eleusinian Mysteries, and he illustrates his description and his invective by quoting other details, saying that these are taken from the Phrygian Mysteries. The explanation of these facts, undoubtedly, must be that the later Eleusinian Mysteries had been influenced by the Phrygian Mysteries.

That details from various sources were united in those later Mysteries is shown by their composite character: there is not merely the fundamental element, the story of the Divine father and mother

* The following sentences are slightly modified from the writer's article 'Mysteries' in the *Encyclopædia Britannica*®.

* Pausanias, v. 27. 6, vii. 6. 6; the name Artemis Persike is found often on coins of Hierocæsares in Lydia. See also Head, *Catalogue of Coins, Brit. Mus.: Lydia*, pp. lviii-lxvi and 111 ff.

and the birth of the child: there are several such stories interlocked in one another: the god-bull, the god-ram, the god-serpent, appear in different details, and pass into each other in kaleidoscopic fashion. There is here an original germ and a series of successive additions due to the reception of new religious forms and ideas, which were incorporated in the growing ceremonial.

(6) *Purification*.—This subject has been alluded to in § III (6), where the later rules of ceremonial purity are mentioned. But there can be no doubt that certain practices of purification were prescribed in the original Anatolian ritual. The Greek purificatory rules for homicides were identical with the Lydian;* and, as the Lydian cannot be supposed to be derived from the Greek, we must here see an example of the influence which throughout ancient times was exerted by Anatolian religion on Greek. In these and in the preparation for the Mysteries the swine was the cleansing animal.

The ceremonial of purification after homicide carries the inquirer back to a very primitive stage. As the ritual was common to Greece and Lydia (and doubtless Phrygia also, as is probable though unattested), we may presume that the early Greek ideas connected with it are true of Anatolia also. Now, one of the rites of the Dionysiac festival *Anthesteria* was called 'the Cans' (*Xôes*), because every celebrant drank out of a separate can; and the myth explained that Demophon, son of Theseus, instituted the custom when Orestes came to Athens unpurified: wishing to receive him hospitably, yet not to let an impure person drink out of the same cup as the pure worshippers, the king ordered that every person should drink from his own can separately, and proposed a prize to the best drinker. Here the rite of competition and prize-giving to an individual victor is Hellenic, and belongs to the later development (B, § III). But other elements in the ceremony point to an early date; the chief rite was the marriage of the representative woman or queen among the people (the wife of the Archon Basileus) to the god; and the idea was also associated with this day that it was accursed, for the dead arose on it and must be propitiated. Here again the idea of connecting evil omen and a curse with the dead is Hellenic and late (see B, § V); but the association of the rising from the dead with the Divine marriage is primitive and original. Similarly, we may regard the horror against a homicide partaking of the common cup as a thoroughly primitive idea; he must be purified before taking part in that sacred ceremony of civilized man, the drinking of the common cup. But the application of this to the rite of 'the Cans' is late, and probably founded on a misconception. In the marriage of the risen god and the queen, as an annual rite to ensure wealth and increase to the land (which at that season, 12th February, was being prepared for the coming year's crop and harvest), the common cup was partaken of only by the bridal pair [see § VIII (1)]; and the people in general rejoice separately as individual spectators of the holy rite.

The distinction between the unity and close relationship implied by the ritualistic drinking from the common cup and the separateness implied by drinking from separate cups is a noteworthy feature; and explicit emphasis was probably placed on it in the ceremony; but the details are unknown. Similarly, in the Christian Sacrament the Saviour laid emphasis on the breaking and distribution from one loaf, in contrast to the use in ordinary Oriental meals of a loaf for each guest (see 1 Co 10¹⁶). See further, § VIII (1) and (6).

The most important fact for us in purification is that it implies some germs of a conception of

* Herod. i. 81.

sin which has to be atoned for before the worshipper may approach the Divine power. Breaking an oath and refusal to restore money entrusted to one's care entail impurity; and the Divine anger punishes any one who approaches the sanctuary without expiating such a crime. It is, however, true that impurity equally results from offence against purely ceremonial rules, and that the conception of sin and expiation which is revealed in the evidence on this subject is of a very humble kind; but there was at least a germ capable of higher development, though there is little or no sign that any development ever took place, except perhaps to some small extent through the contact with and resistance to Christianity.

Guilt and impurity entailed punishment. The punishment seems to have been inflicted in some cases independently of any disrespect to the Deity due to entering the holy place in a state of impurity. The sin results directly, and without the sinner entering the sanctuary, in punishment at the hand of the god or goddess, who therefore must sometimes have been conceived as on the watch to punish sin. Here again there is the germ of higher moral conceptions.

But the utilitarian element which is so clear in many features of the primitive Anatolian religion can be distinctly traced also in the rules of purification. The Goddess-Mother was the teacher and guide of her people from their birth till she received them back to her in death. The ablutions which she required from them were an excellent sanitary precaution; and if the whole system of purificatory rules were known to us, this side would probably be much more obvious and incontestable.

(7) *Confession*.—A remarkable and important fact in connexion with impurity and sin was that the process of expiation seems to have involved (whether obligatorily or voluntarily, we cannot be sure; but probably obligatorily) a public confession. Sense of guilt was brought home to the individual by some punishment, generally disease (fever, in which the unseen Divine fire consumes the strength and the life, was recognized as the most characteristic expression of Divine wrath). Thereupon the sinner confessed, acknowledged the power, and appeased the anger of the god or goddess, and was cured and forgiven. Finally, as a warning to others, the confession, the punishment, and the absolution were engraved often on a stele and deposited in the sanctuary.† See also below, C, § III (4).

(8) *Approaching the Deity*.—Apart from prescribed ritual, the worshipper came voluntarily to the god or goddess for three purposes: (a) to pray for good for himself or his family; this was called *εὐχή* in Greek, and the prayer was necessarily accompanied by giving, or by a promise to give, something in return to the Deity, if the desire was granted: thus *εὐχή* (in Latin, *votum*) involved both prayer and sacrifice or vow: it was a sort of bargain with the Divine power; (b) to imprecate evil on one's enemies (*ἀπά, κάρδα, ἐραπά*): this was really a variety of the former, for *ἀπά* strictly means 'prayer'; but in the development of Greek religion it was commonly and almost invariably addressed to the powers of the old régime, who had become mysterious, occult, and uncanny, and passed more and more into the sphere of magic. The vow in this case fell into disuse, for the occult powers were not gratified by public gifts, but by the mere recognition of their

* See papers on 'The Early Church and the Pagan Ritual' in the *Expository Times*, 1898-99 (vol. x.), especially p. 108 f.

† This is shown most clearly in the curses engraved on leaden tablets, in which the wrath of the Deity is invoked against any enemy or false friend; it is usually the Divine fire which is invoked to destroy the fever-struck wretch.

‡ On this subject see *op. cit.* in footnote * above.

efficaciousness: the mere approaching them in the proper ritual and method enabled the worshipper to call them into action on his side, and he could as it were compel them to act by addressing them by the proper formulae (which thus acquired a magic character); but some kind of sacrifice was an invariable part of the ritual.* (c) To invoke the Deity as a witness of what they were about to say or had said (*ἑρκος*). This, again, was strictly a variety of the previous class, for the *horkos* was simply an imprecation of evil on oneself in case one were speaking falsely. The person swears by the Deity whom he invokes as a witness, and who is his *horkos*; and, as the form was very ancient, the object sworn by might be an animal or a stone, as the primitive embodiment or home of Divine power: such was the old Cretan oath associated with the name of Rhadamanthus (though the Scholiast on Aristoph. *Av.* 520 speaks as if Rhadamanthus were the inventor of such milder forms of oath, as by the dog, the goose, the ram, etc.): such also was the sacred Latin oath, *per Jovem lapidem*. An oath, as being really a prayer to the Deity, was properly accompanied by a sacrifice.

In all such cases the prayer or oath is binding on the descendants or representatives of him who has invoked the Deity, and the consequences may fall on them even generations later. It was not uncommon to bring the children to the place where the oath was taken, and thus make them explicitly and publicly parties to the act and sharers in its consequences.

These voluntary and occasional acts, which persisted alongside of the stated ritual, were older than, and gave rise to, ritual. The asking of help from the god in difficulties or troubles was as old as the idea of a god; for in the Anatolian belief the god was the helper and teacher. The way in which he was efficaciously approached naturally came gradually to be stereotyped as ritual, and was regarded as revealed by the god, who was in this way his own first priest, and teacher of his own rites.

(9) *Priests*.—The original idea which gave rise to the Anatolian priesthood has become clear in the preceding investigation. The priest is the bearer of the Divine knowledge; he can teach men how to approach and propitiate the Divine power. This knowledge was originally taught by the Divine Being personally to men; in other words, the god is the first priest, performing as an example to his successors the due ceremonies. The idea of a Divine revelation, through which man becomes aware of the nature and will of God, is here present in a very crude and rude form; and it is hardly possible to distinguish how far this rudeness is the real primitive simplicity of a very early stage, when thought is hardly separated from the sensuous accompaniments through which it is suggested to men, and how far it may be imparted by degeneration, i.e. by the stereotyping of primitive sensuous forms, and the loss of the germ of thought implicated in those forms.

While the priest in this ancient stage of religion possesses the knowledge and imparts it to the worshippers, he is not considered to be necessary in himself. The worshipper, whether a private individual who approaches the Deity on behalf of himself and his family, or an official or magistrate who acts on behalf of the State or body which he represents, needs no intermediary between himself and the god. Provided he can perform fully and correctly his part in the transaction,† the Deity is satisfied and must respond. The priest or helper

is needed only to keep the worshipper right, to guard him against errors, and to help him to understand the way in which the Deity replies or conveys information; in other words, the helping priest merely acts as instructor, while the worshipper plays the part of priest-officiator, and performs the series of acts which the god himself originally did as an example to mankind who come after him.

In this stage there is not, in the strict sense, any priest or any sacerdotal order or caste, though naturally the Divine knowledge would tend to be handed down from father to son. Priests in the strictest sense begin only when a person permanently assumes the place of the god's representative, and plays the part of the god regularly in the ritual as it was rehearsed at the proper intervals before a body of worshippers. The priest in this fuller sense was connected with and helped the growth of an anthropomorphic conception of the Deity. He was the representative on earth of the god as the priestess was of the goddess; and the two played their parts year after year in the Divine drama, which constituted the most important part of the growing body of ritual.

The priest who represented the god wore his dress,* and in some cases, probably in most, assumed his name. In Pessinus, for example, the chief priest was called Atis, as is shown by inscriptions of the 2nd cent. B.C.; and undoubtedly this was simply the name of the god variously spelt Attis or Atys or Ates, and was assumed as an official title, implying that the office was *ιερόνυμος*, i.e. the bearer lost his individual name and assumed a hieratic name when he entered on office.

In Asia Minor the succession to the priesthood was, in all probability, hereditary (according to some principle of inheritance not as yet determined) in early times. Where the Greek element entered sufficiently strongly, this principle was usually altered; some more democratic principle of succession was substituted; and sometimes lifetime tenure was changed to tenure for a period of four years, or more frequently of one year, or occasionally even of a shorter period. In some of the more thoroughly Greek cities of the coast, such as Erythræ, the priesthoods of the numberless deities were put up to auction by the State, and sold to the highest bidder. But wherever an early or a more purely Anatolian and less Hellenized condition can be traced, the great priesthoods seem to be for life, and to be connected with certain families.

The number of priests, in this fuller sense, tended to increase from various causes, and to become a sacerdotal order. The possession of knowledge of the Divine law was a powerful engine, for the body of ritual was steadily growing in volume, and any mistake in it would have nullified its effect. Attention was entirely concentrated on details, and the spirit seems to have been wholly lost. But the knowledge of the multitudinous details required study and teaching; and this caused the formation of a priestly caste or order, in which the tradition was handed down. The power of that order rested on the inaccessibility and difficulty of their lore, and on the ignorance of the worshippers; and hence there was every temptation to keep up that ignorance, to multiply details of cultus and make the knowledge of it harder, and to create a bar of separation between the priestly order and the people. But no details are known, though the general principle may be confidently assumed.

Moreover, as the great religious centres or *Hiera* grew into importance (see § IV (4), above), they required a permanent staff of priests and ministers,

* This second purpose frequently passed into the sphere of magic: see C, § III (4).

† *ἡμετέραν δὲ ἀνὰ τὴν εἰς τὴν ἑρμηνείαν: Plato, Euth. 14 E.*

* See *Cities and Bish. of Phrygia*, i. pp. 56, 103, 110.

in order that the increasing number of persons who frequented them might always find help and counsel. In turn the increase of the permanent staff at the great *Hiera* tended to foster the growth of the established ritual. Instead of merely aiding the individual worshipper to perform one single act of the Divine action which suited his special circumstances at the moment, the priests of each *Hieron* on stated occasions set the whole Divine drama before the eyes of bodies of worshippers. While this more elaborate ceremonial had its justification in producing a certain good effect on the spectators, and in imparting ideas to them, yet there was the strongest temptation for the permanent priests to refrain from emphasizing this aspect of the ceremonial, and to elaborate the spectacular side in the way described above. In the simpler Anatolian system of society this strengthened their power (§ VIII (7), below); and in the developed Hellenic system it added to the wealth and influence of the *Hieron* by attracting immense crowds to the great festivals accompanying the annual (or in rare cases biennial) ceremonies.

Thus there was, necessarily, a large establishment maintained at the principal religious centres: see § IV (4). Besides the great priesthoods there were required large numbers of inferior priests, *ministri* and *ministrae*, to perform the details of the cultus (see § II, above) and prophecy and give attention to the worshippers and the offerings; also *hierodouloi*, of whom there were many thousands at the greatest *Hiera*. The *hierodouloi* had become serfs or slaves attached to the *Hieron* in various ways, and were protected and governed by the theocratic administration of the *Hieron*: on the female *hierodouloi*, see § VIII (2), below. Finally, there was a class of persons called *hieroi*: see next § (10).

It is clearly established by numerous cases, that, in later times at least, there was a college of priests in every religious centre in Anatolia. This college was a hierarchy, with distinct gradation of authority and allotted duties. At Pessinus a priest is described as occupying the fifth or tenth place in order of rank: and in other cases where the evidence shows only that there was a chief and various subordinate priests, we may probably assume from the analogy of Pessinus that strict gradation extended throughout the college. Every religious act was probably the work of the priests as a body (though the chief priest would be the leader); and this furnishes some argument in favour of the Bezan reading *lepis* in Ac 14¹³, where Prof. Blass condemns that reading on the incorrect ground that there was only one priest for each temple.

(10) *Hieroi*.—This class of persons, mentioned at Ephesus and many other religious centres, and evidently very numerous, have been much discussed, with varying results, by many modern writers. Their status is very obscure. The opinion advocated in the writer's *Cities and Bishoprics of Phrygia*, i. 147 f., is that the *hieroi* are merely a modification of the non-Hellenic institution of the *hierodouloi* under the influence of Hellenic institutions and spirit. The *hierodouloi* were serfs, but not slaves; whereas the Greek law knew only the grand distinction between freemen and slaves. The peculiar relation of the *hierodouloi* to the *Hieron* gave a power to the latter which was alien to the Hellenic spirit; and the old *hierodouloi* seem to have been transformed in the Hellenized cities into an inferior order of the city population, distinct alike from citizens and from resident strangers and from freedmen. The relation of the *hieroi* to the *Hieron*, and their service at the *Hieron*, seem to have been more a voluntary matter; and violation of it was left

to be dealt with by the god; it was not enforced as a rule by legal action.

VIII. INFLUENCE ON SOCIETY AND LIFE.—It is a necessary part of our task to observe the bearing of this religion and ritual on social life; but this subject is too obscure to justify any general statements of a very positive kind; and only a very few details can here be mentioned.

(1) *Marriage*.—There is unmistakable evidence that a marriage ceremony of a religious nature existed, and that this ceremony stood in close relation to a part of the ritual of the Mysteries. In fact, the marriage was, as it were, a reproduction by the bride and bridegroom of a scene from the Divine life, i.e. from the mystic drama. The formula, 'I escaped evil: I found better,'* was repeated by the celebrant who was initiated in the Phrygian Mysteries; and the same formula was pronounced as part of the Athenian marriage ceremony. Another formula, 'I have drunk from the *kymbalon*,'† was pronounced by the initiated; and drinking from the same cup has been proved to have formed part of a ceremony performed in the temple by the betrothed pair.‡ It is distinctly stated by a grammarian that the marriage ceremony took the form of celebrating the 'Holy Marriage' in honour of the Divine pair.§ At marriages in Athens certain instruction was imparted to the contracting pair by the priestesses of Demeter and Athena.

The ritual of the Mysteries as reported to us does not contain, it is true, any idea of marriage between the goddess and the god, but on the contrary presents a series of incidents of violence and deceit; and, as we have seen, the whole story is taken straight from the life of nature as seen in animals and crops. Undoubtedly, the suggestion from these incidents would seem to be that the Divine life, which is to form the model and exemplar for mankind, was of that rude and savage kind. But it must be remembered that our information comes from opponents whose object was only to paint the horrors, and not to give a fair judgment of the ritual as a whole. While we must admit the truth of everything they say, we must add what they have omitted; and in all probability they have omitted the reconciliation and the exhibition of the progress of life to a higher level through the influence of religion. That some such exhibition formed part of the Mysteries is made practically certain by certain allusions among the pagan authorities. The formula, 'I escaped evil: I found better,' implies it. So does the whole tone of the defence which the ancients give of the Mysteries. We suppose that the idea of legal union and of marriage formed part of this exhibition and improvement.

Diels, *Sibyllinische Blätter*, p. 48, has observed that part of the marriage ritual was almost identical with the purificatory ceremonies practised in the Mysteries (compare also S. Reinach's ingenious paper, *Rev. Archéol.*, Sept. 1901, p. 210): the connexion was suggested tentatively in the present writer's *Hist. Com. on Galatians*, p. 90; and it may now be regarded as proved.

It is an extremely important fact that the human marriage ceremony was thus celebrated by forms

* *ἔφυγον κακὸν εὗρον βέλτερον* (Demosth. *de Cor.* 259).

† *ἐκ κύμβαλου πίνακα*: Firmicus, *de Err. Prof. Relig.* 18.

‡ The proof is given in the present writer's *Historical Com. on the Epistle to the Galatians*, pp. 88-91, and is here strengthened by details there omitted.

§ *οἱ γαμήντες καὶ τὸ Δῖτ καὶ τῇ Ἁγῇ ἱερῇ γάμους*: *Lex. Rhetor.* p. 670 Porson, p. 345 Nauck. The grammarian probably did not correctly apprehend the nature of this fact, which he must have got from a good authority. Usener in *Rhein. Mus.* xxx. p. 227, assumes that the reference is to the Athenian 'Holy Marriage,' a festival well known at Athens. But the *Hieros Gamos* was known elsewhere, and the true meaning of the grammarian's words is certainly as stated in the text above.

taken from the Mysteries; and the conclusion must be that the human pair repeat the action in the way in which the god and goddess first performed and consecrated it, and that, in fact, they play the parts of the god and goddess in the sacred drama. This single example is, as we may be sure, typical of a whole series of actions. We have seen also that some, probably all, domesticated animals, intended to be eaten, were slain and sacrificed according to an elaborate ritual (§ III (9)); and we may accept as highly probable the general principle that all the important acts of life were regarded as religious ceremonies, which must be performed in the proper fashion, as inaugurated by the god or goddess and taught by them to men. Every important stage in life was modelled on what the goddess or the Divine pair had done, and thus each stage was consecrated by a sort of sacrament. The subject is both wide and obscure: see below, Nos. (5) and (6).

There are, however, many difficulties connected with the question of Anatolian marriage which must first be noticed briefly.

The practice of marriage between such near relations as father and daughter, mother and son, brother and sister, is often described as common in Asia Minor. This disregard of the common restrictions on marriage is mentioned usually as characteristic of tribes or persons, called *Magusai*, immigrant from Persia, and diffused over Cappadocia, Phrygia, and Galatia, who retained during the Christian period their mysterious ritual, worshipped fire, refrained from slaying animals (though they employed other people to kill the animals which they required for food).^{*} But we must be struck with the fact that, except as regards the worship of fire, we know that all the characteristics attributed to the *Magusai* are clearly marked in the Anatolian ritual. The mystic ritual of the Divine life consisted of a series of incestuous unions. The slaying of an animal for food was an impious act, and the impiety was punished in the ritual (§ III (9)), though the animal slain was eaten. Basil, who is one of our authorities about the *Magusai*, describes marriage by capture as practised and not harshly judged by ordinary opinion in his own time.[†] Now, marriage by violence is characteristic of the mystic drama.

(2) *Hierodouloi*.—In this connexion another social fact must be noted, viz. ceremonial prostitution of the female *hierodouloi* or slaves of the sanctuary. This custom is known to have been widely practised at the great centres of Anatolian religion. Strabo mentions it at Komana and other Eastern centres. In the West it was characteristic of Lydia generally;‡ and the women who contributed to build the grave of Alyattes were only employing in a sacred purpose the money which belonged to the goddess. This duty was originally or theoretically incumbent on all unmarried women for a season; but how far it was practically acted on by people in general we have no means of determining. During the Græco-Roman period it seems (so far as the scanty evidence permits any judgment) to have been carried into effect by women of ordinary society only in exceptional cases, on account of some special vow or some Divine command (given in dream or oracle). But, even in the most educated period and society, the custom, though doubtless regarded as a mark of superstition and devotion to an un-Hellenic cult, was re-

cognized and practised in some cases as one of the duties of religion by women who apparently returned to their ordinary place in society after their term of service.* Apart from these devotees, the custom was practised in later times by large numbers of women, slaves of the *Hieron*, as a permanent way of life.

It might fairly be disputed whether that custom belonged to the original Anatolian religion, or was part of the accretion which gathered round it in the course of its development. Evidence does not exist to warrant a decided opinion; but the custom probably belongs to a more 'advanced' and artificial state of society than the primitive Anatolian, and is to be ranked as belonging only to its development.† This forms part of the ground on which rests our opinion that no trace of elevation can be observed in the history of that religion, but that its development is simply a degradation. The custom is, undoubtedly, not in keeping with the simple type which we attribute to primitive Anatolia, and seems incongruous with the institutions described in the following section. If we are right in this opinion, then the custom would have to be regarded as one of the instances of Oriental influence (like the horror of the swine in § III (6)), due to immigration from the East and long subjection to a succession of Asiatic monarchies. It is certainly an old-established part of the religion, going back to the earliest days of Oriental influence; but we believe it is possible to go back on fairly reliable evidence to an older stage in the history, when the women *hierodouloi* were of a different character, viz. guardians of the goddess and of her worshippers.

(3) *Women guard*.—The myth of Herakles and the Lydian queen Omphale, in which the woman wears the hero's arms, while he sits and spins under her command, takes us back to the primitive type of society which is described in a series of early Anatolian legends of the Amazons. Omphale and Herakles are obviously types of the Great Goddess and her companion or attendant god; and we remember that the Lydian kings for five centuries boasted to be descendants (*i.e.* representatives in orderly succession) of the first priest-king Herakles. The tale of the hero Achilles dressed as a woman and spinning in the family of Lykomedes is another example of the way in which Greek fancy worked up that primitive custom: Achilles is a hero of the north coast of Asia Minor and of some points on the Greek coast.

The Great Goddess, the protecting and guarding mother of her people, had her attendant women. These were armed as warriors, and were called Amazons in Greek legend, where fantastic characteristics are assigned to them.‡ But that a real foundation lies under those fanciful tales is certain. We can dimly descry in primitive history the Amazons, the servants of the native Anatolian goddess, contending, on the banks of the Sangarios, against the immigrant Phryges from Europe, among whom Priam fought as a young leader of the Western tribe.§

The women servants of the goddess are to be considered as resembling her in part of her character as her active and armed *ministrae*. In Ephesus they were the *melissai* or working bees, while the

* Eusebius, *Præp. Evang.* vi. pp. 275, 279 (Viger); Basil *Com. Epist.* 258; see an article (by the present writer) in the *Quarterly Review*, vol. 186, No. 872, p. 425.

† *Quarterly Review*, No. 372, p. 426; Basil, *Epist.* 270.

‡ In Phrygia, compare, for example, a Roman inscription (erected by a native of Phidian Antioch), interpreted and printed correctly in *Hietor. Com. on Epistle to the Galatians*, p. 201 (incorrect in Kaibel, *Inscrip. Græc. Ital.* etc., No. 938, and elsewhere), with Strabo, p. 577.

* See Ramsay, *Church in Rom. Emp.* p. 397 f.; *Hiet. Com. on Galatians*, pp. 40, 201.

† The present writer formerly erred in considering it to be a relic of the primitive stage in Anatolian religion; the orderly analysis of that religion, above given, shows that it belongs to its degradation. Marriage was the original rule, though with barbarous usages: promiscuity belongs to the stage of deterioration.

‡ It is an interesting illustration of the view stated in § III (7) and § VI (3), that the modern discoverer of the sex of the working bees, Dr. Warder, called them 'true Amazons'.

§ *Iliad*, iii. 124-126.

goddess was the queen bee. The sexual side of the *melissai*, alike in the bee and the priestess, is not developed: the *ministrae* therefore must have been young, and their term of service was part of their education. Evidence has perished as regards the women servants of the goddess; but in all probability at the conclusion of their term of service they passed into ordinary society, and in the ceremonial of marriage went through the ceremonies above described, imitating the actions and fate of the goddess. The opinion stated by the present writer, that a number of those armed servants of the goddess are portrayed on the wall of the rock-sanctuary at Boghaz-Keui,* has not been adopted by recent scholars; but the argument against it—the failure of any indication of the female form in the breast—has no force in view of the character of the *ministrae* as active guards, in whom the sexual type is so slightly developed as to be imperceptible in their fully draped and armed forms.

In the primitive Anatolian period the women *ministrae* must be taken to have been real guardians of the goddess and agents of her government (which she exercised through her priest-king), true Amazons or armed warriors. But history changed: the plateau became a subject land; society, manners, and needs altered, and the *ministrae* necessarily lost their original character. During this change we may believe that their development into the slaves of the sanctuary, as we see them in the more developed period, occurred. There was an element in the old *ministrae*, hinted at in legend, which could be intensified and systematized so as to transform them into the later *hierodouloi*; but the primitive element was essentially different from the organized savagery of the time of the degradation, (2).

(4) *Self-mutilation*.—The most remarkable example of the way in which the individual man imitated in his acts the life of the Deity, was in the practice of mutilation. The fate of the god, the consort of the Great Goddess, had hallowed the act; and it was familiar to all as part of the treatment prescribed by the Divine regulations for domesticated animals. Not merely was it practised on occasion of great religious festivals as a part of the ritual, not merely was it almost certainly the prescribed and necessary condition, originally, for the priest who represented the god in the ritual; it was also often performed on themselves by individuals in a state of religious excitement, induced by some crisis of their own life or of the country in which they lived. On the origin of this ceremony, see § III (7).

This act was alien to the character of Hellenic civilization and religion; and was always regarded with horror and contempt by the Greek spirit as the crowning proof of the barbarity and vulgarity of Anatolian superstition, as in the *Attis* of Catullus (which follows a Greek model).

(5) *Burial*.—In a religion which taught, explicitly or implicitly, that men are children of the Goddess-Mother, and at death return to the mother who bore them, it is natural that great sanctity should be attached to graves and sepulchral rites. In fact the religion of the grave is the religion of the household, and lies at the foundation of religion in general. The dead man, as heroized or deified, was represented under the form of the Deity, and one of the commonest later types was the Horseman-god, § III (5).

This is an exceedingly wide subject; and more can be learned about it than about any other department of Anatolian religion. The principal points may here be briefly stated. See also § IX (1).

The grave was conceived as the house or home of

the deceased; and the word *olkos* is sometimes applied to it in epitaphs. But, inasmuch as the dead man is now part of the Divine nature, more frequently the grave is conceived as his temple. His right to the sole possession of it was guarded with jealous care, for, if any unauthorized corpse gains entrance, this intruder will share in the offerings and honours of the temple, and thus in the godhead of the deceased (for the dead man's godhead consists practically in the cultus and offerings paid to him; a god unworshipped is a dead god). It is noteworthy that the sepulchral inscriptions guard far more carefully against intrusion than against mere injury done to the tomb: injury can readily be repaired, but intrusion, if once successful, is hardly reparable.*

Then the making of the grave and the erection of a tombstone was a dedication to the Deity; and the epitaph on the grave was expressed often in the form of a prayer (and, of course, a vow accompanying it) to the Deity with whom the dead person was identified. Even when a person, during his lifetime, prepared his own grave, he expressed the epitaph in the form of a prayer and dedication to the Deity.† It was a duty which one owed to God to make a grave.

Thus every Phrygian grave was also a shrine or temple. Accordingly, there is no force in the argument, which many writers have employed, that such a monument as the famous sculptured rock which bears the dedication 'to king Midas' (ΜΙΔΑΙ ΦΑΝΑΚΤΕΙ) was a cult-shrine, and therefore cannot have been a sepulchral monument. In truth it was both. Similarly, some of the tumuli in the Phrygian land have probably a utilitarian purpose, being intended to serve as watch-towers and road-marks. But they were, in all probability, also sepulchral. It was desired to give them permanent sanctity, and this end was attained by the grave inside, with the religion attached to it. Probably it is not too bold to lay down the general principle that the sanctity of a locality was generally, in the primitive Anatolian system, confirmed by the awe attaching to the grave-temple. That principle remains to a large extent in force still. Sacred places are numerous all over the country; and in almost every one the sacredness is confirmed by, or founded on, the awe attaching to the supposed grave of some saint or hero. The fact that the grave is often demonstrably fictitious (as when the hero is a mere myth, or has several graves in different places) shows how strongly the need for a grave in every holy place is still felt by the Anatolian mind. The primitive custom in Greece of burying in the house, consecrated and guarded the family home.‡

The essential parts of the grave-monument were an altar and a door; and the two typical forms of gravestone in later Phrygia were developments of the altar and of the door. The former at least retained the name, and is called 'the altar' in numberless inscriptions. On this altar-tombstone there is sometimes engraved, apart from the epitaph (and even on a different side from it), the word 'door' (θύρα); and this custom obviously

* *Cities and Bishopric of Phrygia*, i. pp. 91, 348 (n. 24).

† These statements, made at first in explanation of the identity in form, appearance, and general character between grave-monuments and stones recording a prayer and vow or dedication, were controverted by Prof. A. Körte; but he has since published a stone whose inscription is purely a dedication to the god, except that at the end the dedicator adds the sepulchral form καὶ ταύτῃ ᾧ, proving beyond question that the dedicatory stone was at the same time the gravestone over his intended tomb. We are now agreed that this custom was characteristically Phrygian; but the present writer sees far more examples of it than Prof. Körte admits.

‡ See above, § IV (2); also Ramsay, 'Permanent Attachment of Religious Veneration to Special Sites in Asia Minor,' published in *Transactions of the Oriental Congress at London*, 1892, p. 381.

* *Journal of R. Asiatic Society*, 1893, p. 141: the relief is reproduced by Perrot, *Histoire de l'Art*, iv. p. 643.

arises from the feeling that a door was essential and must be indicated, even if only by a word. We have already seen that, in later grave-monuments, members which originally had a meaning were indicated by some part of their original form, and became mere conventional ornament. We may suppose that the door was simply an essential part of the house or temple in which the dead god dwelt, while the altar was necessary for the living worshippers to lay their offerings on.*

It was probably on the worship of the dead that the worship of Divine personal beings was built up. The dead parent links the family with the Divine nature. Any inexplicable misfortune or mischance was often attributed by the Greeks to some neglect of this cult, and expiated by special attention to the dead. Among the Greeks the special sacrifice to the dead hero took place on his birthday, and was called γενέσια or γενέθλια quite as often as νεκεία. Among Christians, on the contrary, the day of death of a martyr was celebrated as his *dies natalis*, birth into his true life.

The cult of the dead was therefore of prime importance, and this applies as much to Greece as to Anatolia. Here, too, the gods had set the example, which was to be followed in the case of men. The grave of Zeus, the grave of Achilles, and so on, formed an integral part of the equipment of their worship. The worship of the heroes, i.e. the Divine dead, bulked far more largely in Greek life and religion than would appear from a superficial survey of the literature. This is partly due to the fact that the cult of the dead was part of the half-submerged archaic religion, believed in by all, but not made prominent in public life. But even in the literature it is often evident, and must always be understood as the substratum on which all social life rests.

(6) *Brotherhoods and guilds.*—If the ritual of the Mysteries was used as a sort of sacrament to consecrate or give the Divine sanction to marriage and the other important steps in the family life of man, so that the family was united and constituted and maintained by Divine law, the same seems to have been the case in the formation of associations and unions wider than the family. Such groups played a highly important part in Anatolian society. Originally, in the simplest form of primitive society, there was probably only the one wider group, the village, united in the religion of the central sanctuary or *Hieron* [see (7)]. The ritual of the Mysteries (to use the later Greek name anachronistically) constituted the bond to hold the village together. All were brothers, because all knew in the mystic ritual that they were the children of the Great Mother.

But as life and society became more complex, as towns became too large for a common bond of ritual to hold them (while no common municipal bond existed, such as the Greek city offered), groups of persons with common interests and pursuits were formed, some as trade guilds, some for other purposes. They are known under many names, Boukoloi, Korybantes, Hymnodoi, Satyroi, etc.† but all were united in a common ritual; and an essential part of this lay in the common meal and the cup of which all partook. There can be no doubt that the ceremonial was similar to that of the Mysteries, and was of the nature of a sacrament or religious consecration of the common tie, and yet no direct evidence can be given, or is likely ever to be found. But the indirect evidence

seems conclusive: the most general name for the members of any association is *symbiotai* ('those who live in association'), but the term *symmystai* is occasionally used as an equivalent;‡ and this term seems conclusive, for it is inexplicable unless the *symbiotai* were united by the tie of the common mystic ritual.

The unity of the brotherhood or society was consecrated, therefore, by the common meal and the common cup from which all drank: this was the ritual of the Mysteries, according to the formula, 'I ate from the *tympanon*: I drank from the *kymbalon*'; where the names of the sacred instruments of the Mother-Goddess are given to the common dish and the common cup. The Christian idea of breaking a common loaf was perhaps peculiar to Christianity, and due to the direct institution of the Founder: the common meal of the pagan societies probably followed the usual practice of simple Oriental meals, in which each guest has his own loaf, though all eat from a common dish. But that eating from one loaf implies brotherhood is an old idea.

(7) *Government and administration.*—The form of social organization which, in the historical period, was characteristic of Anatolia was the village-system,† which is often contrasted with the highly articulated and self-governing municipality (πόλις) of the Hellenes. The people dwelt in groups of houses called villages: at the head of each village was a *komarch*, who represented it to the supreme authority, which in the strict Anatolian system was the priesthood of the neighbouring temple (ἱερόν) as representative of the Divine power in human form. The government was in theory a theocracy: in practice the priest (usually hereditary, according to some uncertain system of inheritance) or priest-dynast was autocratic, as speaking in the name of the Deity. One restriction of his power lay in the fact that intimation of the Divine will was often conveyed to worshippers in dreams; but even in this case the interpretation of the dream usually required aid from the priesthood. 'Beyond this there was no education, and no State, and probably little or no formal law.'‡

In what relation this system, as we find it later in practical working, stood to the primitive Anatolian system is uncertain. It shows obvious traces of development, in that the mother has become less prominent, and the male element more important. This line of development was inevitable. Immigrant races were usually insufficiently provided with women; and armed conquerors must certainly have consisted mainly of men. The conquering race, therefore, must take wives from the conquered race; and the social position of women necessarily deteriorated when the conquering caste was mainly men, and the women for the most part belonged to the subjugated people. In the earliest period there can be little or no doubt that theocracy was the ruling system; but the way in which it was worked, and the exact position of women in the priesthood, remain uncertain. Further, we know that there were in early Anatolia imperial systems and great monarchies; but what was the relation in which they stood to the theocracy is obscure. We may be confident that the Herakleid dynasty in Lydia ruled as priest-kings, each new king representing the god Herakles, consort of the Great Goddess (as we see in the myth of Herakles and Omphale);

* *Journal of Hellenic Studies*, 1884, p. 253; *Cities and Bishoprics of Phrygia*, i. p. 99 f., ii. pp. 387, 395.

† *Cities and Bishoprics of Phrygia*, i. p. 96 ff., ii. pp. 359, 360. See also the following note, and (among other places) *Athen. Mittheil.* 1899, p. 179 f., where the priest of Dionysos Kathegemon is head of a list of Boukoloi.

* *οἱ συμβιωταὶ καὶ συμμυσταί*, where the two names are embraced under the common article, and thus identified: see Ziebarth, *Griech. Vereinswesen*, pp. 52, 206. The subject is treated more fully in *Histor. Com. on Corinthians*, § xxxi. ff., in the *Expositor*, Dec. 1900.

† *κλῆρος κοινῆς* is the expression of Strabo.

‡ *Histor. Com. on Galatians*, p. 40.

and it is probable that the inheritance passed in the female line, and the king reigned as consort of the heiress.* The natural inference that the same practice existed in the ancient empire of the central plateau, whose chief city was at Boghaz-Keui, and in the later kingdom of Tyana, is valueless, while we have no information as to the relation of this chief priest-king to the priests of the many sacred centres throughout the land (each of which was, presumably, a small theocracy for its surrounding village or villages). The supposition that the empire consisted of a loose aggregate of separate theocracies would not account for the great size and imperial character of the city at Boghaz-Keui; and we are at present reduced to mere conjecture; but evidence is likely to be discovered, when the hieroglyphic inscriptions of the country are deciphered.

(8) *Household protégés*.—A class of persons who are called in documents of the Roman period by various names, *alumni*, *θερωτοί*, *θεράματα*, *θερωτά*, are frequently mentioned in Asia Minor. In the Roman period they are identified almost completely with foundlings, i.e. infants exposed by their parents and brought up as a speculation by strangers with a view to selling them for profit: such foundlings were not peculiar to Asia Minor, but known generally over the Empire, and rescripts relating to them were issued by Vespasian, Titus, and Domitian for the province of Achaia, and by Trajan for Bithynia,† and their status and rights formed a frequent subject for Imperial legislation. But in the inscriptions of Asia Minor these *protégés* are mentioned so frequently in epitaphs as to prove clearly that under that name is included also some class of persons peculiarly characteristic of the country. They are generally mentioned immediately after the children, and are sometimes distinguished from and mentioned before slaves, so that it is hardly possible to regard them as *vernae*, slaves born and brought up in the household, although we would not deny that the term possibly may sometimes have that signification. This class is at present of quite unknown character and origin, but probably it takes us back to a primitive custom—some Anatolian institution similar to, yet distinct from, the Roman *clientela*. In a Bithynian inscription, a husband and wife and their protectress (*θεράσα ἡμῶν* used as a noun) have a common tomb: all three have the same *nomen*, which the two *θεράματα* must have received from the protectress; but the two were not the children of the protectress either by nature or adoption, for they were free to marry one another. The inscription, No. 36, in *Cities and Bish. of Phrygia*, shows a case in which a child had been exposed in accordance with a dream and brought up by another person, and yet the parents retain some rights over him. The tie uniting the *protégé* and the protector was evidently a close and sacred one; but the subject is one for further investigation, and nothing positive can yet be laid down with regard to it.

(9) *Religious influences on social conditions*.—While immigration, war, and conquest are favourable to the male sex, it may conversely be assumed that the high position of women and the influence exercised by, and respect paid to, the mother in the primitive Anatolian system, imply the long continuance of a peaceful condition amid a settled and, so to say, autochthonous people, such that the importance of motherly care in promoting social development had full opportunity to make itself thoroughly appreciated.

In our brief survey of the prominent features of

the primitive Anatolian religion, it has become clear that this religion was originally a consecration of the rules and practices which were useful and almost necessary in actual life. While it cannot be proved in detail, yet all the evidence points to the conclusion, that in this religion the life of a simple community was ordered and prescribed from birth to death in a series of religious formulæ for personal conduct, personal purity, relation to others in the family and the community, management of the household and of agriculture and farm economy. A great deal which, in recent times, has ceased to be familiar to the poorest and the least educated classes was, in that early time, enforced on all as obligatory religious ceremonial. In modern times this growing ignorance of the fundamental principles on which comfort, propriety, and happiness in life depend, is felt to be a serious danger alike among the most civilized peoples, and in the less civilized Christian nations like the Russian. It cannot be denied that the tendency of the Christian Church to concentrate teaching on theoretical dogma and Church ritual, and to lose hold on the practical household life of the people, has contributed to spread this ignorance by gradually allowing the ancient stock of practical household wisdom to fall into oblivion, and sometimes even actively discouraging it as involved with superstition.

We have laid little stress on the barbarous elements in the Anatolian cultus, but have omitted them or passed them over lightly. Partly this is due to the fact that in many cases they seem to result from degradation of the primitive religion, due to the influence of foreign conquerors and immigrants, and accompanied by a probable deterioration of the original people. In other cases the barbarous elements are original, and correspond to the equipments and surroundings of primitive Anatolian society: these might profitably be investigated with a view to acquiring a better idea of that society, but time and wide knowledge on the part of the investigator are required.

The failure to develop the higher side of the Anatolian religion is doubtless due to many causes. The country was on the highway of armies, and the uncertainty and suffering consequent thereon were unfavourable to orderly development, while the best and most spirited element in the people was most exposed to extermination under the successive foreign conquerors. Nothing is more destructive to the highest qualities of human nature than the presence of an entirely uncertain and capricious, yet serious and ever dreaded, danger. In the succession of military conquerors the intermixture of foreign religious elements was often brought about in the worst way, viz. through the instrumentality of a rude, brutal, uneducated, and therefore superstitious Oriental soldiery, which had received not even military discipline.

The unquestioned and absolute domination of a priesthood was also unfavourable to development. The element of prophecy, in the sense of becoming sensitive to the Divine will and interpreting it with reference to contemporary events, was recognized, but seems to have been kept entirely under the control of the official priesthood. Moreover, the succession of priests in Anatolia was largely or altogether hereditary (according to unknown rules of inheritance): this increased the cast-iron and unprogressive nature of priestly rule. If, as seems probable, the chief priest in early times had to be a eunuch, that must have further debased the character of the priesthood. Thus there was no opportunity for the growing wisdom of the national mind to declare itself, since the nation outside the priesthood seems to have been given over to ignorance and practical slavery: or, rather, there was

* The evidence is collected by Gelzer in *Rhein. Museum*, xxxv. p. 510 ff. (cf. xxx. p. 5).

† Pliny, *Ep. ad Traj.* 65, 66; *Cities and Bish.* ii. p. 546.

probably no nation and no national life, but merely a congeries of villages.

IX. HISTORY AND CHRONOLOGY.—(1) *Development of the Anatolian Religion in history.*—It would be impossible in this place to treat even in outline the development of the Anatolian religion. The development was different in every region, varying according to the diverse historical vicissitudes and succession of immigrants and conquerors in each; and the subject would thus be a very complicated one. Moreover, as regards no single region has even any attempt been made to collect and classify the extremely scanty evidence. We can merely quote a very few examples of the process.

In north-eastern Phrygia the Gauls settled during the 3rd cent. B.C. They found there the ancient Phrygian worship of Cybele and Attis. In many instances we can prove that the Gauls adopted the religion of the land, in accordance with the ancient belief that every land has its own deities, whose power is supreme there (cf. 2 K 17²⁸). The religious types on the Galatian coins are entirely either Phrygian or Græco-Roman, the latter character coming in later. The marriage ceremony in the one recorded instance was of the Anatolian type: * this instance belongs to the family of a chief probably of the 2nd cent. B.C., and the noble families were doubtless more ready to change their religious customs than the common people; but Gaulish tribes would follow their chiefs.

It is, however, beyond doubt that the Gauls introduced some modification into the old worship. The Gallic spirit and temper undoubtedly made some impression on the character of Phrygo-Galatic religion. For example, we know that at Pessinus, one of the chief centres, where the spirit of the ancient religion continued dominant and little affected by Hellenism until the latter half of the first century after Christ, an arrangement was made about B.C. 160, whereby half of the places in the college of priests were appropriated to the Gauls and half left to the old priestly families.† We can, however, say little with any confidence about the Celtic element in the Phrygo-Galatic religion. That the Gauls retained the use of the Celtic language as late as the 4th cent. after Christ is certain, but how far they imposed it on the old Phrygian subject-population is uncertain.

But, when we go further back in the history of Phrygia, we find that the Phrygians themselves were immigrants from Europe, who adopted the religion of the native population. The Mother-Goddess was seated in the land before the Phrygians entered it; and mythology retained the memory of the contest between the immigrants and the old religion with its women-guards, the Amazons.‡ The Phrygian conquerors adopted the worship of Cybele, probably imposing their own language on the mixed population. But there is no trace in mythology that the women-guards were retained in the Phrygian system; and we may probably attribute to this crisis the strengthening of the male element in the Divine idea, and the introduction of the worship of the God-Thunderer (Hellenized as *Zeus Bronton*) or the God-on-the-Car, *Benni* or *Benneus*,§ into the Phrygian worship.

On the other hand, a special mode of burial was retained among the priests of the Phrygian land, evidently the old priestly usage. They were placed upright on a rock,|| whereas in the rock-graves that

remain in the country of the Phrygian kings this custom was evidently not followed.

In these two cases we have types of what must have occurred in the many conquests of parts of the country by immigrant races. There was no attempt to exterminate or expatriate the old people and religion. The conquerors took part of the land—sometimes one-third was recognized as the proper proportion—and shared in the established religion along with the ancient worshippers; but they affected the cultus more or less, and imparted to it some part of their own nature.

(2) *Local diversity in Anatolian Religion.*—While we have necessarily directed attention mainly to the common character of religion over the whole of Asia Minor, it must be clearly understood that this community of character was not complete, but that there were great local diversities, which cannot here be properly estimated. For example, the East Anatolian religion of the warlike goddess at Komana, who was identified by the Romans with Bellona, shows a marked diversity from the true Anatolian type; but this is probably to be attributed to racial difference. More warlike and barbarous tribes pressed in from the east of the Euphrates (see § I (3), above), and superinduced a new stratum of religious ideas and rites which belonged to their own tribal character. Similarly, in southern Thrace the Orphic ritual shows a character approximating on one side to the Phrygian, but also revealing clearly a different racial character, viz. that of more barbarous tribes accustomed to eat raw flesh, and giving to this custom a place and a consecration in their religion. This, however, is a large subject.

(3) *Chronology.*—As to the age to which we are carried back before we reach the primitive Anatolian worship in its uncontaminated form, it is not possible to make any positive estimate. The earliest stage in its development that is attested by external evidence is probably found in the subjects portrayed in the rock-sculptures of Boghaz-Keui, which are commonly dated somewhere in the second millennium before Christ. But there we are already face to face with a stage of contamination with the religion and cultus of a people from the east or north-east (perhaps in some degree also from the south-east)—a people who superimpose a new and incongruous stratum of religious, social, and governing ideas on the primitive forms.

Nor is it certain by any means that the Boghaz-Keui stratum was the first stage superimposed on the primitive religious foundation. Those sculptures are of such a highly complex character that they have as yet resisted all attempts at a complete solution; and none of the attempts at a partial explanation has commanded general approbation among scholars. For practical purposes the sculptures are still a mere riddle; and hence we have been unable in this study to make any use, except in a few superficial details, of these earliest and most elaborate religious records of Anatolia. But the very fact that they are so complicated and obscure furnishes probably a sufficient proof that they are not the records of a simple cultus, but of one which had already passed through a complex process of development and contamination.

Thus we are reduced to the study of the development from the inside—a method always unsatisfactory, because subjective and liable to become fanciful, but specially unsatisfactory on the chronological side, for only contact with external facts gives any marks of time. In the development we are struck with the tenacity with which primitive characteristics were retained, readily distinguishable from the added elements; and the primitive character seems autochthonous,

springing from the land, stimulated by its atmosphere, and imposing its character in some degree, more or less, on every new people or religion that entered the land.

The character of the plateau marks it out as an early home of human culture. The soil is fertile, the country is level and little exposed to dangerous animals, and in certain districts, where water is naturally abundant, cereals are naturally produced in sufficient quantity to furnish regular food to an early race of men. The art of agriculture was there taught almost by Nature herself, who thus revealed herself as mother and teacher of her people. The art of irrigation was also taught there by the same kindly mother: in some places it is so easy that the life-giving stream, flowing from a great heaven-sent spring (§ IV (3)), seems to invite men to divert and distribute its waters. The art, when once begun, was readily extended, and a country, which is now almost entirely uncultivated, and part of which is loosely indicated on Kiepert's map as *désert salé*, is shown by the remains to have supported many towns and cities in early times.* Step by step, and precept upon precept, the Goddess-Mother, the Thesmophoros of the Boeotian plain and the Athenian plain (see B, § II), educated her people; and showed them how to make the best of the useful animals, swine, ox, sheep, and goat, and later also of the horse, by proper nurture and careful treatment and breeding. The history of the education which she gave remains for us in that Anatolian religion of which some faint outline has been traced in the preceding pages.

If our view is correct, it is obvious that in a better knowledge of the Anatolian worship lies the key to an extremely early stage of human development; and that this religion has to be compared with the most primitive stages of the known ancient religions of the east Mediterranean lands. As a rule, even the most ancient Semitic cults are known to us chiefly in a considerably developed stage; and the Anatolian religion takes us behind them. In that land true religious development was arrested by causes at which we might guess; and the primitive revelation of the Mother-Goddess found no prophets and seems to carry it to completion: see § VIII (9).

B. THE HELLENIC RELIGION.—In studying the development of thought in the strictly Greek lands, we are inevitably carried back to an ancient form of religion there prevalent, which presented a marked similarity to the simple primitive Anatolian cultus. The extent and the limits of the similarity cannot be determined with our present knowledge. But everywhere, in attempting to comprehend the developed Hellenic religion, one finds that it rests on this substratum of deep religious feeling, which sometimes was hardly articulate, and in that case was often rather looked down upon as superstition and *δαιμονία* (Ac I 7²²) by the more educated and philosophic minds.

I. EARLY GREEK RELIGION.—Frequent references occur in Herodotus to an older Greek or Pelasgian religion different in character from the religion of which he conceived Homer and Hesiod to be the organizers (ii. 53). Arcadia he believed to contain more of the Pelasgian character than any other part of Greece. Precisely in Arcadia and the adjoining parts of the Peloponnesus, the strongest traces of such a pre-Hellenic religion are shown in the description of Pausanias. According to Herodotus (ii. 53), the gods of that old religion

had no names and no images. The meaning of this statement is that statues (*ἀγάλματα*) in the later sense were not used. Symbols of various kinds, however, existed in greater number and variety perhaps in Arcadia than in other parts of Greece; but Herodotus, who was speaking of the anthropomorphizing tendency in religion, would not call those rude and non-human embodiments *ἀγάλματα*. Epithets of a more general character were attached to these gods, but not proper individual names: among these epithets we may reckon 'the Great God or Gods' (*θεὸς μέγιστος*, *θεοὶ μέγιστοι*), 'the Pure Gods' (*θεοὶ καθαροί*), 'the Good God or Genius' (*ἀγαθὸς θεὸς* or *δαίμων*), as well as 'the Propitiated Gods' (*θεοὶ μετελχιοί*), 'the Revered Ones' (*Σεβαστοί*), 'the Kings' (*ἀνακτες*).

In this religion the worship of the Earth-Goddess appears in various aspects. She is sometimes the physical conception, but more generally is conceived in a more moral aspect, as the orderly harmonious march of physical phenomena, under such epithets as Themis, Harmonia, etc. This order is an avenging power that punishes all offence against itself: it is then Praxidike, Adrasteia, Nemesis, etc. It is also connected with happiness, wealth, and prosperity, and the goddess is then Tyche, Chryse, etc. The goddess is often accompanied by a male genius or deity, described as her husband or brother or attendant or child. He appears as the *ἀγαθὸς δαίμων*, the protecting hero, or the genius of fertilizing power.

Traces of this religion may be found in most parts of Greece: in Attica, in Boeotia, and the Northern islands, as well as in the Peloponnesus. The goddess is akin in nature to the Italian *Bona Dea*. It is a pre-Hellenic religion, but it has much of the Greek spirit about it. The deities have in many cases as much of moral as of physical character; Themis becomes a Hellenic conception. The relation of such older forms of belief to the true Hellenic religion is well given by Æschylus (*Eumen.* 11 ff.) in his history of the oracle at Delphi, where the gradual change from the first Gaia to the latest Apollo is clearly shown. No conflict is there said to take place, but the older religion merges in and is recognized by the later, so that the purely physical conception of the Earth (*Gaia*) is moralized and harmonized into Themis, and Themis is elevated into the highest Hellenic type, Phoebus Apollo, through the intermediate stage Phœbe, who is evidently a mere device to facilitate the transition in sex, as the god Phoebus inherits in right of his sister Phœbe. On the other hand, Æschylus (*Agamemnon*, 178 ff.) describes the relation of the Hellenic Zeus to the older dynasty as that of a conqueror and almost a destroyer.

These passages are important as showing that the Greeks always retained the recollection of a certain succession and development in religion, and occasionally they connect it—and in our view rightly—with the succession of races in Greece, where the later conquered without destroying the older.

The development of the Earth-Goddess into Themis was exactly paralleled by that of the older Demeter into Demeter *Thesmophoros*, 'the introducer of thesmoi' (*θεσμοί*, 'ordinances'), who is known chiefly in Boeotia, the plain of Athens, and Paros. The agricultural idea lies at the bottom of her chief festival at the time of the autumn ploughing and sowing. But that fundamental reference was merged in another idea, viz. the analogy between the continuation of the human family and the operations of agriculture.* The goddess Thesmo-

* The 'nomadization' of Asia Minor has been the chief cause of the present desolation: see *Impressions of Turkey*, p. 103, and the paper already quoted in *Geographical Journal*, Sept. 1902.

* Cf. Soph. *Edip. Tyr.* 1497; Æsch. *Sept.* 753; Eurip. *Phœn.* 18, etc.; also the old Attic legal formula *ἐν ἀρίστῳ καὶ ἀνδρὶ γυναικί*. See A, § VI (2), (3).

phoros founded and presided over social order, family life, the functions of women, and the birth of children; marriage was the chief *thesmos*,* and the priestess Thesmorphoros gave some instructions to newly married couples. A Hellenic touch lies in the custom of giving prizes to the most beautiful women in Arcadia, and apparently also at Thermopylae.† Here two great Hellenic ideas, love of beauty and liking for the competitive principle, are united in the developed form of the rites; but the goddess whose festival was thus honoured was Eleusinia and not the more primitive Thesmorphoros.

The resemblance of this Demeter Thesmorphoros to the outlines of the Anatolian Mother-Goddess, as it has been traced in the earlier part of this article, is too obvious to need any words; and Herodotus points out (ii. 171) that the *Thesmorphoria* rites were formerly practised by the Pelasgian women of the Peloponnesus, but perished when the Dorians conquered the country, except in Arcadia, where the primitive population and ritual remained. Moreover, the worship of the goddess Thesmorphoros was confined to women (which markedly distinguishes her worship from that of the Eleusinian Demeter), and swine were sacrificed to her by throwing them alive into holes in the ground. These are very primitive characteristics, and show that the cult of this goddess had not been developed so much as that of the Eleusinian goddess, who is in the myth marked as an immigrant with a long history of growth out of her Pelasgian germ.

Pausanias is sometimes inclined to identify those earlier conceptions with Hellenic deities. He feels that 'the Good God' must be Zeus;‡ but about the nature of the two *Anaktes* he expresses doubt, which proves that he was struck by some marked difference between them and the two Dioscuri. In short, the Greeks felt that those gods whom they counted older, and sometimes called Pelasgian, were different from their own gods, and yet closely related to them. The succession is sometimes described as the inheritance of child from parent, sometimes as the acquisition by victor from vanquished and even exiled gods. Those old deities were not in harmony with the later Hellenic gods; there belonged to the older a graver, sterner, and more solemn character; yet there were implicit in them the germs of the double Hellenic conception of Olympian and Chthonian deities, on which see § V, below.

The conservatism with which, as a rule, the old cult-ideas were preserved in Greece and allowed a certain scope alongside of the later, give great historical importance to the study of Greek religion. Often the institutions of a bygone age retained a religious existence long after they had disappeared from actual society.

II. GREEK RELIGION AND GREEK LAW.—That early religion was practically coextensive with the whole circle of public and private life. Religion was the only sanction which originally existed to enforce a custom or strengthen an institution; religion impressed these on the people by constituting them into solemn rites binding on all. When in the development of the Hellenic system political institutions grew and law became a power, the legal sanction to some extent replaced the religious sanction.

One by one the various branches of duty between members of the State were taken into the circle of law. In earlier times this was often done under the advice and approval of the oracles (especially

the Delphic). One set of duties after another was formulated as a branch of public law sanctioned by stated punishments and penalties. In various cases the old form was continued alongside of the later, and the offender against a law was not merely punished legally, but was also formally cursed, i.e. handed over to the punishing care of Heaven. The Court of Areopagus in Athens well exemplifies the gradual transformation of the religious into the legal sanction, with the religious forms persisting to some extent alongside of the legal.

But the old sanction in its primitive form continued to reign in the circle of family duties and rights, the duty of children to parents and of the younger to the older, the right of children to protection and care at the hands of their parents, of the poor to the charity of the richer, and of the stranger to hospitality. It was the *Erinyes*, the old vague conception of the avenging power of nature, older almost than the conception of personal gods, who punished any infraction of those duties and rights.* Here a conception akin to the primitive one reigned in the developed Hellenic thought. The *Erinyes* of the father, of children, of the poor, protected their rights and punished the violator; in other words, punishment was left to Divine action, and rarely interfered with by human law. Even the inviolability of the oath is described by Hesiod as protected by the *Erinyes*, who punished bad faith alike among gods and men.†

In the sphere of international law, heralds went between States as Divine officials (*κήρυκες Ἐρμού*). A species of international custom, not formulated into law in the strict sense, was recognized as existing between Hellenic States, but not between Greeks and barbarians;‡ but it was considered to be Divine or unwritten law, it depended on the conscience and feeling of the individual State, and was regarded by some more than others. By the religious, however, it was considered more binding than the formal laws.§

Thus religion continued to be a sort of completion of public law. Where the latter was insufficient or inapplicable, or beyond the reach of the sufferer, the religious sanction was invoked in the form of a curse. Especially, international obligations were guarded by little more than the religious sanction. Any idea of Hellenic unity which existed had been the creation of religion; and the rights of even the Greek stranger or traveller, much more of the non-Greek, were almost wholly left to religion. Law was mostly confined to the relations between one citizen and another; and in the cases where (as in Athens) it touched the relation of a resident stranger to citizens, the stranger must be represented by a citizen, and could not himself have any standing before the law. Similarly, the traveller was under the protection of the gods of the road.

III. THE ELEMENTS OF HELLENIC RELIGION.—Beyond other traceable but less important influences, three forces pre-eminently are to be distinguished in the history and formation of Hellenic religion. There was, first, that above-described pre-Hellenic cultus in the Greek lands, to which we may, like the Greeks themselves, apply the name Pelasgian: that cultus had certainly a very strong resemblance to the primitive Anatolian worship, and we have freely used certain obviously primitive ceremonies of the Greek lands as evidence of the character of the old Anatolian religion.

* *Iliad*, ix. 454, 567, xv. 204; *Odyssey*, xiv. 57 compared with xvii. 475. The names of the *Erinyes* as personal beings are of later origin: the very plural is a development.

† *Op.* 802; *Theog.* 221.

‡ *καὶ οἱ τῶν Ἑλλήνων νόμοι*; cf. *Thuc.* iii. 59, iv. 97, etc.

§ *ἄγραφοι νόμοι, ἀγραπτοὶ νόμοι*, *Soph. Ant.* 454.

* *Odyssey*, xxiii. 296, *λίστερις πάλαιον θεῖον*, is a faint echo of the religious idea.

† *Hesychius*, s.v. *Πυλαΐδης*; *Athenæus*, xiii. 90, p. 609.

‡ *Pausanias*, viii. xxxvi. 5.

Into the question whether it spread from Anatolia into Greece, as so many later religious impulses did, we shall not enter, though it may be pointed out that the Greeks believed themselves to have derived some very characteristic early forms of Greek cult from Crete, which in its turn was certainly connected with and influenced by Asia Minor.

There was, in the second place, the influence exercised by surrounding nations on early Greek history and religion. Only one side of this influence can be considered here, viz. the Oriental. Under the name of Oriental may be included all influence which came from Asia Minor during the period commonly called historical, as well as all traces of Phœnician or other strictly Asiatic influence. There was certainly great importance attaching to this influence; yet its true character must be noted. It did not make Greek ideas, but was simply the raw material out of which the Greek mind drew part of its growth. The Greek mind, with its eager, ardent curiosity, learned from all its neighbours, and most of all from the most advanced neighbours.

In the third place, there was that special quality and tendency of the Hellenic mind, a unique and exquisitely delicate element, which selected and moulded, moderated and regulated, mixed and added life to, the food which it absorbed from the experience and the acquirements of various other nations. That spirit of Hellenism stood in such obvious relations to the peculiar geographical and other external conditions of Greece, that some writers regard it as absolutely produced by them.

But, in our view, there was a certain innate intellectual character in the formed Greek mind, which enabled them to see in nature what no other race could see, and to use opportunities as no other race could have used them. The spirit of Hellenism, it is true, was fostered by the geographical conditions, and could have acquired strength in no other land. It needed just those peculiar relations of sea and land to foster and strengthen it; it was, like the most delicate and exquisite of Hellenic goddesses, born on the sea, not on the land; but that sea must be the Ægean, the path and the roadway of the Greek peoples, which united the Greek lands instead of estranging and separating them (as other seas seemed to do).

One of the most noteworthy forms in which the strong Hellenic appreciation of individual personality and rights (without much feeling of individual duty) showed itself was the love of competition and prizes. The individual Hellenic trained himself to the highest pitch attainable in competition with his fellows, and his eagerness was stimulated by the prize of victory. The prize, in the true Hellenic idea, was simply the victor's garland, the recognition by his peers that he had won the victory. In the early stages of Hellenism the mere honour of victory was hardly sufficient to tempt the competitive ardour without prizes of value; and when in later times the Hellenic games were introduced in the Asiatic cities, it was the custom there to give valuable prizes (*θήματα*); while even the Hellenic contests in that later time were made practically valuable by privileges and money rewards from the victor's own State. Only in the fullest bloom of the Hellenic spirit were the honour and crown sufficient to attract all Hellenes.

Many religious ceremonies were modified or developed by the introduction of such competitions. While the barbarism of primitive funeral rites was developed by the Romans into gladiatorial combats, it was developed among the Greeks into the system of funeral sports and prizes. The crown of wild olive, which originally was simply the garland of the foliage sacred to the god, worn by

every worshipper at Olympia, was by the Hellenes given as a prize to the victor in a competition.

The view, then, which we take is that the character of Greek religion arose in the country, and sprang from the Greek genius, which took into itself, assimilated, and gave new life and character to elements gathered from its own past and from every race with which the Greeks came in contact, so far as those races offered anything worth learning; but in this process the Greek spirit, so long as its bloom and vigour lasted, only grew more and more intensely Hellenic. The more the Greeks learned from Phœnicians or Phrygians, the more unlike them they became. In many of the Hellenic deities there is a certain Oriental element, but how utterly different in character and spirit is the Hellenic Aphrodite from a Phœnician goddess. Although Aphrodite, as she was worshipped in the cultus of the Greeks, bore strong traces of the ugly, gross, material Orientalism, and though Phœnician elements in origin can be assigned to her more confidently than to any other Greek deity, yet the Hellenic genius is almost more conspicuous in the graceful, exquisite, smiling Aphrodite of the *Med* than in any other Greek deity. The Greek spirit could make her beautiful without making her moral in the modern sense.

IV. THE GROWTH OF HELLENIC RELIGION.—
(1) *Continuity of development*.—The Hellenic religion which was built on that older Greek foundation had in itself little of true religious character and depth. It was in many ways a beautiful development of artistic feeling, harmony, and grouping, instinct with the Hellenic sense of individual rights and liberty, and indissolubly intertwined with the political institutions of the free, self-governing, progressive Greek City-State. The city was the highest creation of the Hellenic genius, with its free institutions and its education of the individual man; and the Hellenic religion was the ideal counterpart of the Hellenic city.

But, when we try to sound the real religious depths of the Greek nature, we must go to the worship of the dead or of the sacred stone (the *Hērma*), or the mystic worship of the deities of the old Pelasgian type. Yet the difference between the old religion and the formed Hellenic worship does not amount to absolute opposition. The later grew out of the earlier by a simple process of easy development. No definite and unvarying line divides the older gods of Greece from the properly Hellenic gods. There is hardly one of the latter who has not also in some district, or on account of some aspects of his worship, a place among the former.

(2) *Growth of mythology*.—The old personages of myth and religion continued to acquire new meaning and character amid the historical vicissitudes of the people. Just as among the Germanic and Scandinavian tribes the old Aryan tales took on a Christian character in their later development, so the old pre-Hellenic Divine personalities bear the impress of later history, or (to vary the metaphor) formed centres round which the floating beliefs and facts of later times gathered. Thus the name of Zeus goes back to the primitive Aryan stock, but he came to be the bearer of new thoughts and ideals in the Hellenic mind. To admit that Cadmus represents a Phœnician element in Greek history does not necessarily imply that Cadmus must be a Phœnician name. To take a typical case of a markedly late development: As the Oriental seclusion of women began to spread among the Greeks in general, the familiar use of boys and male favourites in domestic service, with the vices that accompanied this custom, became general. As was invariably the case, a mythical or religious parallel and example was

found, and Ganymedes became the mythical representative of the new custom in all its worst features. But, while one recognizes this, one may carry back the history of the mythic figure Ganymedes much further, and see in him one of the numberless local impersonations of the freshness and bloom of nature, the Good Genius who came from heaven and returns again to it.

The old legends can be traced in Greece in never-ceasing transformations. They appear in the Lyric poets in a very different form from what they bear in Homer; and the Tragic poets take them and again remodel them, while in Pausanias we find occasional traces of local forms differing from all the literary embodiments. The Odysseus of Homer is not the Odysseus of Sophocles. But the inference, which has sometimes been drawn, that the Tragic poets did not know the Homeric poems in the form in which we possess them, has no validity. The Lyric and the Tragic poetry represent a deeper phase—certainly a very different phase—of thought and religion from the Epic; and those later poets treated the myths as their poetic or dramatic property, and read in them or into them the thoughts of their own time.

(3) *Polytheism and the Hellenic unity.*—The older Greek religion, as we have seen, was comparatively simple. There was not a large number of gods worshipped in any one district. But the conception and names of the Divine beings varied in different districts to some degree. Though fundamentally the same, the idea of 'the God' tended in each district to assume some of the special character of the people, and to run through a special kind of development according to the succession of immigrant tribes or the varying experience of the original tribe. New religious conceptions came in with new tribes. The special deity of each race reflected in his nature the whole history of his people. The power of each deity was confined to his own district and the circle of his own worshippers.

But the idea of Hellenic unity became a political force, founded on a religious basis and strengthened in the literary development of the country. This unity was merely ideal, and never became a political reality: it was a power which exerted a certain influence on events: it was an end which some persons saw dimly before them in the distance. The Delphic Oracle was to some extent guided by that ideal in the leading which it gave to the Greek States when they consulted it; but its influence was never directed to modify the character of local or tribal religion. It always supported the established customs of each State. But it favoured uniformity by introducing new gods (*πυθόχρηστοι*) into almost every city of Greece: e.g. Aphrodite, Dionysos, Demeter, and Kora were all introduced at Erythræ by oracles from Delphi. Thus the local religions tended towards a common type by adopting each other's gods.*

Political or social unity, to the ancient mind, could exist only through common religion. Those who worshipped different gods and practised hostile religious rites could have no unity. Therefore, as a Hellenic ideal unity grew, the varying religions of the various States composing that unity could not be felt as essentially different from or really hostile to one another. If there was an ideal unity in the political sphere, there must necessarily be an ideal unity in the religious sphere; and the gods of one Hellenic State were recognized as gods by the others. Those gods quarrelled with one another, as brothers and sisters quarrel, or as the Hellenic States warred with one another. But the States met in the common recognition of the Hellenic deities. Especially the four great Pan-

Hellenic games—Olympian, Pythian, Nemean, and Isthmian—formed peaceful meeting-places for all Hellenes, where religion kept the peace and all celebrants felt the benign influence of the Hellenic gods.

(4) *Formation of the Hellenic Pantheon.*—But when all the various gods who obtained Pan-Hellenic recognition were thus set side by side, the religious consciousness demanded some theory of the relation between them. Various theories, in which a religious system was built up, came into existence. But out of these the great unifying forces, literature and the Delphic Oracle, formed a generally recognized Pantheon. No two expressions of that system are precisely the same. Different writers conceived it with slight variations, but the general type is clear. The conception of a household, as it were, consisting of twelve great deities is found in several parts of Greece; but it was far from being universal, and the twelve selected were not everywhere the same. Again, in no district did the Hellenic Pantheon correspond exactly to the actual popular religion.

Everywhere both literary and popular conceptions tended towards a common form, which had its root in the popular mind and the popular ideas. It was the great poets who most of all gave shape to it, and made it familiar over the whole country and in the Greek colonies. Hence the popular Greek idea that the Hellenic religion was the creation of Homer and Hesiod had a certain truth. They beyond all others gave expression to the popular tendencies, and were the chief instruments in moulding the recognized, or, as one might almost call it, the 'orthodox' Greek Pantheon.

(5) *The Hellenic Religion an ideal.*—This common religion, which we shall continue to term the Hellenic religion, must be carefully distinguished from the actual religion of any single Hellenic State. Like the political unity which originated along with it, the Hellenic religion was much more an ideal than an actual, realized fact. Its centre and crowning idea is the supremacy and almighty power of Zeus; but very seldom do we find that Zeus is in actual worship the most important god of any State. In Athens, e.g., Athenaia was the great divinity and tutelary goddess of the State; and her festivals were celebrated with greater magnificence and public interest than any others. The honour and safety of the State were bound up with her worship, not with that of Zeus. Zeus, at least so far as actual ritual is concerned, occupied quite a secondary position.

But under this local diversity it is clear that a general likeness existed. We can hardly consider that men who merely performed stated ceremonies had a religion. That term we can use only with reference to men who thought about the ideas involved in these rites; and it was the approximation to a general Hellenic type in their local religion that engaged general attention. Though they spent most care and most money on the festival of Athenaia, of Hera, or of Poseidon, their thought was concerned most with Zeus as the god, and with Athenaia or the others only as his representatives. Especially is this common or Hellenic religion the religion of the literature to which the most thoughtful men gave shape. But a national literature, though it be in advance of the prevalent standard of thought, is not in opposition to it. Homer and Plato only gave clearer form to the thoughts that were present in all educated minds. This common character, this Hellenic religion, is the true line in which the actual religion of Greece tended to develop. All intercourse of Greek with Greek, all education,

* *cf. above article, Xen. Mem. iv. 3. 16; Dem. Mid. § 61.*

all feeling of pride in their common blood and nationality, tended to foster it throughout the country, but, of course, in unequal degree according to the unequal strength of these influences in different parts of the country. Hence the Hellenic type was not equally apparent everywhere, just as it was not equally realized by all men. Some tribes went more rapidly, others very slowly, but all were tending in one direction. Various lines of argument lead to the conclusion that this Hellenic religion assumed a definite form by the middle of the 8th cent. B.C. Changes continued to take place, new ideas were added, new gods and new rites were popularized after that date, and indeed down to the latest time when Greek gave place to a new religion, which was thoroughly non-Hellenic and even anti-Hellenic, though to some considerable extent it has been influenced by Greek ideas. But at that period the religion of Hellas seems to have assimilated all its essential elements and to have established itself as a power over all the Greek tribes, which acted chiefly from a religious centre recognized by all the Hellenes—viz. the Delphic Oracle.

In fact, from that time onwards it was not so much blood or locality that determined the right of different tribes to the common name of Hellenes, as recognition of this Hellenic religion and participation in the Hellenic rites.

The history of the Greeks in modern times presents a remarkable parallel. For centuries the Greek religion was the only bond that held together the Greeks in different regions. Every other bond was gone. No Greek government, education, or literature existed. The national name had perished, and the people were set to a barbarous race. The tie of language had in many cases disappeared, and even at the present day there are Greeks in Asia Minor who do not know a word of the Greek tongue. Community of blood was confined to a small part of the Greek world, so called. But the religion remained to unite the people, and it proved a stronger tie than any other. Cretans of the Greek Church are Greeks, Cretans whose fathers became Mohammedans are non-Greek. This common religion was enough to preserve all the old feeling; and when the country was awakened from the sleep of centuries, when education and literature came in to help, as strong a national feeling and as complete a severance in the national mind between Greek and the rest of the world have been made manifest as ever existed in olden times. In the western parts of Asia Minor the movement can still be watched in progress. The schools have not yet been universally established, but, wherever they have been planted, a single generation develops the religious feeling into a strongly national one.

(6) *Theory of the Hellenic Pantheon.*—Further, there was a polytheistic element in the primitive Greek religion; and there grew up very early an idea that around the chief deity there were other great deities, in whom the Divine power existed in more narrowly circumscribed fashion: thus a system of higher and lower divinities was formed in such an ancient cultus as that of Eleusis. In the growth of a unified Hellenic religion this idea was developed. According to this system Zeus is the supreme god, father of gods and men, protector of right and punisher of evil: as *Ἐρκεῖος* and *Κτήσιος* he is the patron of family and household, as *Ἑμίος* and *Ἰκτίσιος* he is the guardian of hospitality and of friendly intercourse between different countries; finally, he is the protector of cities and public life, and the fountain of law and of morality: from him originates all revelation of the will of heaven

(*Πανουμφαῖος*). His will is fate; and the course of events is the gradual consummation of his purposes. In the whole *living* the will of Zeus was wrought out (*Διὸς δ' ἐρέελετο βούλη*). In the tale of Melampus and Iphiclus, as it is narrated in the *Odyssey*, xi. 290 ff., the fate from the god fettered the prophet, but, when the full time came, he was released and the purpose of Zeus was perfected. The other gods and goddesses are the ministers of the will of Zeus. Each has his special province: Apollo speaks to mankind in oracles what Zeus wishes to reveal; Hestia is the goddess of family life; Poseidon rules the sea; and so on.

The province or sphere of action assigned to each deity* in this Hellenic idea had not much influence on the local cultus. When we take the *Hermes* of Imbros we find, not the Hellenic idea of the messenger of Zeus, but the Imbrian idea of the Divine power. But the *Hermes* who was adopted in many Greek cities under the Hellenic impulse was the Hellenic idea; and the popular view approximated to the Hellenic view. The average Greek thought of *Aphrodite* as the deity of love and beauty, *Hermes* as the god of heralds, and so on, irrespective of the cultus; and their names passed often into proverbial popular usage in this connexion.

This religion as we find it in Homer was practically the general religion of Greece. While in each district the same gods as of old were worshipped with special care, and the regular cultus at their sanctuaries was traditionally fixed among the priests, the other Pan-Hellenic gods were recognized beside them, and occasionally a Pan-Hellenic cultus even eclipsed the native worship. Thus at Olympia, *Hera* (perhaps associated in the Holy Marriage, *ἱερός γάμος*, with Zeus *Καραδάτης*, the naturalistic deity) was the native goddess; but the festival of Zeus Olympius, a later institution, far surpassed the older worship in magnificence. In general, however, the native worship remained the chief one, and the 'orthodox' Hellenic system was recognized either by altars and worship of other gods separately, or by an altar of all the gods or of the Twelve Gods. See (14).

(7) *Moralization of the Hellenic gods.*—The most important element in the progress of Greek religion lay in the tendency to make its gods more and more into moral conceptions. In the case of the greater gods, the physical character that had once belonged to them almost entirely disappeared from the Hellenic mind. In this respect the view of Homer may be taken as identical with that which prevailed generally during the 6th or 5th century. The gods are concerned with human life and human action; they influence the course of nature solely as a means of aiding or hindering the works of men. While the gods had thus become almost purely moral conceptions, the tendency to see Divine life in external nature remained as strong as ever.

(8) *The Daimones and the Divine in the physical world.*—When once the tendency to polytheism had been established, it increased rapidly. The physical world was filled with Divine beings. Every place, every natural object which impressed men with its beauty or solemnity, became to them the seat of a deity. The nymphs of the old Pelasgian religion formed a convenient expression for this pantheistic idea; and nymphs were seen in every tree and every stream, every glen and every mountain.

In moral conceptions a Divine nature was equally conspicuous; and altars to Pity, Shame, Friendship, etc.,† were erected in different places. Many

* *τ. αἰὲς καὶ εἴχατος διαφέροντες*, Herod. ii. 53.

† *ἰλότης, αἰδώς, φίλος, ὀνεία, φρίκη, φόβος, γέλος, ἀγάπη, ἡγάπη, τιμή, εὐνοία, εὐκλεία, σωτηρία, ἔλεος, παῖς, εἰρήνη, ἀφ' ἧς, κ.τ.λ.*

of these names are known as actual epithets of different deities; Athena *Ergane* and Athena *Nike* are well known; Artemis *Eukleia* was worshipped at Thebes. Ara or the Arai are sometimes an independent conception, sometimes a name of the Erinyes or Eumenides. In such deities as Eros or the Charites we have forms which were in some instances worshipped as the great embodiment of the Divine conception and chief gods of the places (so Eros at Thespiae, the Charites at Orchomenos); but generally they were only inferior figures attendant on the great gods. The Greeks themselves found it difficult to determine how far a god was worshipped under two epithets continued to be one being. Socrates (Xen. *Symp.* c. 8, 9) knows not whether there is one Aphrodite or two, Ourania and Pandemos; for Zeus himself, whom men count one, has many surnames. Xenophon was wont to sacrifice to Zeus Soter and Zeus Basileus; but a soothsayer of Lamprus showed him that he had sinned in not sacrificing also to Zeus Meilichios. It cannot here be accidental that Xenophon's first sacrifices acknowledged only the Olympian religion, whereas Zeus Meilichios is a Chthonian deity. Solon's laws ordered that men should swear by three gods, *Iakchos*, *Kadarios*, *Ephaeostrophos*; but these, though expressly called three gods, are obviously epithets of Zeus. It is therefore not surprising to find that epithets gradually tend to acquire distinct personality and a separate worship.

This tendency is seen already in Homer, who personifies the *Arai*. The sea-monster Scylla he calls a goddess, and Chimera, Echidna, Sirens are godlike beings (*θειον γένος*). So pestilence and hunger are called gods by Sophocles (*Oedip. Tyr.* 28) and Simonides of Amorgos (vi. 102). These and all other striking instances of natural power, real or fabulous, were equally representative of the Divine nature. The term *daimon* (*δαίμων*) was often applied to such powers. In Homer the term *δαίμων* denotes a distinctly less personal conception than *θεός*: hardly anywhere except in *Il.* iii. 420 is a special god called *δαίμων*: the *δαίμων* is bearer of the Divine power which works in nature and in human life: the *δαίμων* has not been so formed, bounded and defined by mythology and cultus as *θεός*: *δαίμων* is sometimes even used impersonally (especially in the *Odyssey*) in the sense of *numen*. There is a certain tendency in Homer to attribute a bad influence to the *δαίμων*, and the preponderance of evil is distinctly marked in the *Odyssey*.*

In the post-Homeric usage *δαίμων* acquired a more definite meaning, and was applied to certain godlike beings intermediate between the great gods and mankind. In Hesiod the spirits of men of the Golden Age are appointed by Zeus to watch and guard men, and are called *daimones*, and the name is also applied to Phaethon, appointed by Aphrodite as guardian of her shrine. Hence it is generally applied to the train of inferior beings attendant on the chief gods, as Satyrs, Corybantes, Erotes, etc. (Plato, *Legg.* 848 D). These *daimones* are often conceived as the executors of the will of Zeus in particular cases.† The analogy with some phases of the Hebrew doctrine of angels is interesting. In Arcadia men sacrificed to Bronte and Astrape, evidently *daimones* of Zeus. Wind-gods‡ are worshipped in a similar fashion, though they are not expressly so named. *Daimones* as companions and guardians of individual men are men-

tioned by Theognis (161 ff.), and frequently in later authors.* The words *εὐδαίμων*, *δυσδαίμων* probably imply such a view. They are not found in Homer; and *δυσδαίμων* (*Il.* iii. 182) is one of many suspicious expressions in the passage where it occurs. *Εὐδαίμων* is used by Hesiod (*Op.* 824). The Roman idea of a genius of city or people is not found till a late date. After the Christian era the *Tyche* of the city was worshipped; and the head of the city-goddess appears on coins. This, of course, must be distinguished from the genuine ancient cult of Tyche.† In Athens a cult of the *Demos*, alone or along with the *Charites*, is mentioned in inscriptions of the last cent. B.C.

Some order was introduced into this motley throng of Divine beings by the idea of a train of inferior deities attendant on each of the greater gods. Dionysos had a troop of followers from Sileni and Satyrs down through all grades of life to wild beasts. The train of attendants is a sort of epitome of the sphere of action belonging to the god, and that of Dionysos represents all phases of the life and energy of nature which are included in the special significance of that deity. So it is with many other gods. All the deities and *daimones* of the sea form a court round their sovereigns Poseidon and Amphitrite. To Aphrodite is attached every variety of love and grace, Eros, Himeros, Pothos, the Charites, etc. Art had much to do in determining the form of all these trains of beings; and they seldom attained such importance as to be recognized in public cult.

(9) *Restrictions on the nature of the gods.*—The originally restricted character of the Greek gods continued to cling to them. Their power was once confined to a narrow district, their worship to a small circle. As the gods changed from physical to moral conceptions, the range of their power widened, and the circle of their worshippers was increased; but still there was a universal feeling that a defined boundary did exist, and that new worshippers were admitted into a select and exclusive company. The cultus of a god was often transferred to a new place, where his worship was established in a form as closely as possible resembling the original (*ἀφιδρωσις*); but blood and race were usually the cause of such a transfer. The worship of the mother city thus spread to the colonies. When smaller communities were concentrated in a great State, as the Attic towns were in Athens, the worship of each was transferred to the central city; and the chief festival of the god was constituted a memorial of the original transfer by a procession to the ancient seat of the worship. Thus the old image of Dionysos was taken from Eleutherai to Athens, and an imitation left in its place. But the Eleusinian worship was left in its own home, with Athens as a secondary seat of the cultus.

This process was common in Greek history, and a well-known example in historical times is the foundation of Megalopolis by Epaminondas, in order to establish a centralized Arcadian State in counterpoise to the power of Sparta. When this was done the gods and worship of the minor States were incorporated in the greater, and the memory of their relation was kept up in the annual festival and procession between the cities. The importance of this custom for the development of inter-communication in Greece has been well shown by Curtius.‡ A system of roads to connect the chief city with the minor ones was a necessity of the growing cult. When the worship was left in the minor State as too holy to be dis-

* Kröcher, *Gebrauch des Wortes daimon*, reckons that the word occurs there eighteen times in action unfriendly to men, fourteen times indifferent or friendly. Fick derives *δαίμων* from the root *das*, 'to teach,' and identifies it with the Sanskrit *dāmant*, 'wise.'

† So in Plato (*Legg.* v. 780 A), ὁ εἶναι ἑκάστου δαίμων καὶ θεός, καὶ εἶναι συννομήσαντες αὐτόν.

‡ Herod. vii. 178, 189.

* Cf. Plato, *Phædon*, 107 D.

† Paus. vi. 25. 4; ii. 7. 5; iv. 30. 2.

‡ Geschichte des Wegebaus bei den Griechen.

turbed, a road between the two cities was equally required. This conception of the roads is related to the utilitarian view described in A, § I (1), etc.: the use of the roads for the god's service was the guarantee and consecration of their usefulness for all his worshippers, and ensured that they were respected by all who revered his power.

Thus originated the sacred roads of the processions of Athens, of Megalopolis, of Sparta to Amyclae, of Elis to Olympia. The road from Athens to Marathon, by which the god had been brought to Athens, was, as Curtius has emphasized, always traversed by the *θεωπία* sent by Athens to consult the Delphic Oracle. There they found the road that connected Marathon with Delphi, marking the way along which the worship of the god had once been borne; and they travelled by the Sacred Way in preference to the direct path from Athens to Delphi. Hence they watched the lightning over Harma before starting; in other words, they observed the signs of the weather in the direction of Marathon. The most famous Sacred Way in Greece was the path by which Apollo had come to Delphi with the Dorians from the north of Thessaly, and every fourth year the sacred procession to Tempe kept alive the old relation. These processions are among the most interesting features of Greek religion. War was often stopped to allow them to be carried out. But in the Peloponnesian war this was not the case: for years after the Spartans occupied Dekeleia the procession by land to Eleusis ceased, till Alcibiades, by guarding the way with soldiers, enabled it to be held in safety.

(10) *State gods and gods within the State.*—Even in the State itself only a few of the gods were worshipped by the whole people. These were the *θεοὶ πατρίοι*, *γενέθλιοι*, *ἀρχηγέται*, with whose worship the safety, honour, and existence of the State were bound up. They have to be distinguished from *θεοὶ πατρίοι*, a term which includes all the gods legally recognized in the community.

Every set of persons within the city united in any relation had their own god. But voluntary associations for the worship of a god, and united by no other bond but this worship, belong to a later time, including those which were made in a city like Athens by a set of strangers for the purpose of their own national worship: see below, C, § III.

Besides the patron-gods of each city (*θεοὶ πατρίοι*), all gods legally worshipped in the State required respect from the State. If any of them were injured, or if their full rights were not given them, their anger was shown not merely against the individual wrong-doer, but also against any one in his company, and against the whole community.* Hence it was only prudent for the State to extend its support to the worship of every god, to contribute to the expense of his sacrifices and festivals (*δημορελῆ ἑπά*), and to give dedicatory offerings from time to time. At the same time, it was obviously necessary to guard against the introduction of new gods into the State (see (14) below).

(11) *Extension of the worship of a god.*—It depended entirely on the worshippers themselves to determine how far their circle should be widened. In some cases a rigid exclusiveness was maintained, and new members were admitted only as a special honour. In the family worship of Zeus Ktesios some did not allow even the domestic slaves to participate (Isaios, *Ciron*, § 16); but the general custom was to admit the household slaves to the household worship (cf. Aesch. *Agam.* 1026). To the public worship of some States no strangers were admitted, as was the case in the Panionion (Herod. i. 143). At Argos no stranger could sacrifice in the Heraion

* Aesch. *Sept.* 561; Eur. *El.* 1853; Hor. *Od.* iii. 2, 26, etc.

(Herod. vi. 81). Athens was in general far more hospitable (Dem. *Neur.* § 79). This exclusiveness is rather a relic of the past than a real characteristic of the Hellenic religion, and it disappeared sensibly as time elapsed. The worshippers were the chief source of revenue to the priests and the temple (Lucian, *Phalar.* ii. 8), and were generally encouraged to come from all quarters.

Apart from the formal ritualistic service of the temples, viz. the public festivals, admission to which was a matter of public concern, what may be called occasional worship, depending on the wishes and needs of individual worshippers, was a considerable element in the Hellenic religion. The cost of the public ceremonies was defrayed by the State: private worshippers in the temple also existed. This element was an increasing one, and was encouraged by the Oracle and by the priesthood in general. Pindar's house in Thebes was close by the temple of Rhea, and he honoured the goddess greatly (Pyth. iii. 77): the term indicates not mere vague respect, but practical acts of worship and offering were implied in 'honouring a god.' Neighbourhood to a particular god had the same effect in other cases (Plaut. *Bucch.* ii. 1, 3): even travellers passing a shrine or a sacred tree ought to show some token of respect, were it only to kiss the hand to it.

It is doubtful how far such worship was admitted from all comers. Probably the strict rule, in older time, was that only the privileged circle of worshippers could be admitted; and Herodotus (v. 72, vi. 81) shows cases of exclusion of extraneous worshippers. But it is probable that these cases were exceptional, that worshippers were rejected only in some excitement of national feeling, that the principle of Hellenic religion, which gradually established itself in most of the temples of local cults, was that all Hellenes might worship in Hellenic temples, and that, in such cases as Herodotus mentions, the intending worshipper acted on this principle.

(12) *State recognition of the Pan-Hellenic Religion.*—The idea of a Hellenic religion of gods common to all Hellenes never gained complete ascendancy, but is seen in many individual cases. Zeus *Hellenios* or *Panhellenios* was worshipped in Athens (Paus. i. 18. 9; Ar. *Eq.* 1253) and in Argina (Pind. *Nem.* v. 10; Paus. i. 44. 9). The expression *κοινὸι θεοὶ* and others similar (Herod. ix. 90, etc.) show the same feeling. Invocation of all the gods together is not infrequent (Dem. *de Cor.*, *mit.*; *Mid.* § 52). An altar of all the gods (*ἑωμὸς κοινὸς πάντων θεῶν*) existed at Olympia; and at Ilium there was a priest of all the gods (*πῶν πάντων θεῶν*). Altars of the Twelve Gods, as a convenient summary of the chief Hellenic gods, were frequent. Later we find in Messene statues of all the gods *ὁπόσους νομίζουσιν Ἕλληνες*.

(13) *The Hellenic Religion a part of the City-State.*—In the fully formed Hellenic city the State religion was one part of the commonwealth, and the State gods had a recognized claim to certain perquisites. The relation of the gods to the State lost the religious and pious character, and came to be conceived as a purely legal matter (*νόμῳ γὰρ τοὺς θεοὺς νομίζομεν*, Eur. *Hec.* 800). Here the verb does not mean so much as 'believe in the existence of' nor so little as 'practise the rites of'; it may be paraphrased by the preceding sentence. Not that the law could abolish the gods and their worship. The original thought that the Divine nature was a necessary part of the world, and help from it a necessary element in human life, was indelible and beyond the legal power to alter. A State without religion was as little conceivable as a State without laws; the good citizen and the religious citizen were equivalent expressions.

(14) *The Hellenic conception of piety.*—*Εὐσέβεια*, 'piety,' consisted in giving the gods their due; righteousness is justice to the gods.* Mythologically, the idea is expressed by Hesiod (*Theog.* 535) as a regular compact of mutual duties and rights (*κῆρυγμα*) made in Methone between Zeus and Prometheus as the representatives of gods and men. Law and public opinion required that the gods be given their due; but that personal honour be paid them there was no necessity. Their character and position might be ridiculed so long as no intention was shown to do away with their worship. The *ὑπαφὴ ἀσεβείας* was directed only against him that sought to alter or infringe the established ceremonial. The atheist (*ἀθεός*) was obnoxious to the law because his principles made the cultus unnecessary.

The worship of new deities was forbidden in Athens, until the Ecclesia, or the Nomothetai acting under its direction, sanctioned the introduction of a new cult, and settled the ceremonial belonging to it. But the effective prohibition of foreign rites was hindered by various causes. It was no one's business to protest against a new worship or prosecute the worshippers; the duty, disagreeable and entailing ill-will from a considerable section of the people, was left to the patriotic piety of the nation to carry out, and seldom found any one to perform it. An openness to novelties, a receptivity for foreign thought, characterized the Athenians; and foreign citizens and foreign religions (*ἐπίθετοι*) found in general an equally free access to the city. See below, C, § III; above, A, § VII (2).

A higher conception of *εὐσέβεια*, however, was not wanting. Fear of the god was from the first no prominent part of the idea of piety. Throughout the literature, love is a much more important element. Zeus is the father of gods and men, not as being their creator, but as a father-like ruler (Aristot. *Pol.* i. 12). The good man is the man beloved of God. The gods were full of goodwill towards men. The passages where the fear of God is mentioned often show that a high idea is implied in the word 'fear' (*ὅσα γὰρ δέος, ἔρβα καὶ αἰδώς*, Plat. *Euth.* 12 C). The word *δεδουλωμένος* occurs in the sense of 'pious' in Xenophon and Aristotle (*Pol.* v. 11. 25).

But the other conception of God as hurtful to men, and of the Divine action as showing itself in calamity, is not absent (see C, § I). In later times *δεδουλωμένος*, as the superstitious fear of God, is distinguished from *εὐσέβεια*. This sense is first found in Polybius, if we except the doubtful chapter of Theophrastus (*Char.* xvi.). Moreover, the expression 'justice towards God' is often used in a better sense than that of mere compliance with an external law. But such finer thoughts probably belonged only to the few; it is hardly possible to attribute any ideas of the kind to Nicias, who was to many the ideal of a pious man. The picture that Plato gives of the religion of his time is a very dark one. In one place (*Legg.* x. p. 885) he says that some disbelieve in the gods, and others think that they are moved unjustly by gifts and vows. Still worse is the account given by Adeimantos and Glaucon in *Rep.* ii., where the strolling soothsayers who sell pardons to the people, and teach them that a few ceremonies and a little money will gain forgiveness for all sins, are especially inveighed against.

It must, however, be remembered that these passages are purposely one-sided. The truth is that popular thought was unable to reconcile the love of the gods and the fear of the gods, which constituted the central antithesis of Hellenic religion. Their religion provided no help in the

difficulty. Ideas of sin, of the wrath of Heaven, were present to all men; and those who could not themselves rise to higher thoughts sank to superstitious practices to avoid the consequences of the guilt which they felt themselves laden with. The mythological legends handed down from an older stage of religion, and frequently gross and revolting in character, still clung to the gods of the national religion. The gods seemed themselves to sanction hateful and immoral acts, and exposed themselves as much to the ridicule of men as to that of their peers (*Il.* i. 600; *Odys.* viii. 343). The better thought of Greece rejected and abolished these fables; but the vulgar often justified their evil deeds by the example of the gods.*

As the Hellenic State grew, and as art separated itself from the service of religion, the secularization of all cultus proceeded with rapid strides. The productions of the fine period of art were not made to be worshipped, but to be admired in the temple. The spectacular side of religion became every year more prominent. If it could not satisfy the religious wants of the people, it aimed at least at satiating them with fine shows. In many temples the cultus, though never wholly wanting, was quite subordinate to the purposes of State offices and of occasional pageants, which had far more of a political than a religious character. See also C, § III (4).

Art no longer formed, as it once did, a part of religion; but it influenced the popular theory of religion very materially. The Artemis of cultus was developed mainly by the artistic element into the huntress maiden; and this conception of the goddess, though not ruling in cultus, was certainly the common Hellenic idea. In this and other ways the gulf between the ancient cult and the actual thought of the people was widened.

V. THE HELLENIC CLASSIFICATION OF DEITIES AS OLYMPIAN AND CHTHONIAN.—This distinction, so characteristic of and peculiar to Hellenic thought, has already been anticipated as if familiar. One can hardly speak about Hellenic religious thought without assuming it.

(1) *Hellenism and the thought of death.*—In the thought which belongs to and constitutes Hellenism, looked at in its relation to religion, the first moment was the revolt of man against the hard law of nature—a revolt springing from the energetic, joyous consciousness of individual power and freedom. This thought expressed itself in the gods whom it pictured to itself—gods of beauty and of enjoyment. There was a tendency to eliminate from the traditional conception of the Divine beings everything that conflicted with this sentiment, and leave only gods of life and brightness. The Athenaia of actual Attic cult died, and was mourned for every year according to the old religious idea of the annual death and rebirth of the life of nature; but the Athena of Hellenic thought was lifted far above death. The grave of Dionysos was a central fact in the actual ritual, but drops out of the literature almost entirely.

The older views as to the dead, which made them into and worshipped them as gods, were not in accordance with the Hellenic spirit, and are not conspicuous in Greek literature. But the continuance of the ritual and worship of the dead in practice among the Greeks is everywhere presupposed and sometimes alluded to. There was in this respect a deep gap between the educated spirit of Hellenism and the actual conduct of the ordinary Greek man or woman. The Hellenic spirit hated and avoided the thought of death. It was concerned with life and brightness and enjoyment, with show and festival and art. Homer

* Cf. Plat. *Protag.* 331, *Rep.* i. 831 B; Cic. *de Nat. Deorum*, l. 41, 116.

* Plat. *Euth.* 5 E; Ar. *Nub.* 905, 1080; Eur. *Hipp.* 451, *Ion*, 449; Ter. *Eun.* iii. 5. 3f

describes the *Eidola* of the dead as preserving in the realm of death a shadowy and wretched existence which is worse than the most miserable lot in life. Yet in the Homeric poems the old rites are seen in practice at the graves of Patroclus and Achilles (*Odys.* xxiv. 65, etc.). That old ritual was systematized and formulated under the influence of the Delphic Oracle (whose rule always was to recognize and regulate the ancient religious usages); and this systematization was repeated in the Solonian legislation, and doubtless all over Greece.*

Hellenism could not maintain itself at this stage: the hard facts of the world and of life demand and force recognition. Thus comes in the second moment in the Hellenic religious idea—the inevitable awe before this irresistible power, the power of nature, stern, inexorable, irresistible, which may be regarded either impersonally as Fate or Necessity (*Εἰμαρμένη*, *Ἀνάγκη*), or personally as a god whose power or will constitutes and moves and orders the course of nature. Here the gods of the old régime returned into the Hellenic consciousness. They were more closely connected in the Greek mind with the power of nature and the one great fact in nature, Death. Life, the other side of that great fact, was not, as a rule, apprehended by the Greeks in its true relation to Death. The Greek mind had sought to make for itself gods of life alone; and the two antithetic sides of the religious conception were to a great extent developed separately from one another. In this way, probably, must be explained the remarkable fact that in the Hellenic religion life and death are apportioned, so far as that is possible, to two different moods of thought and two different sets of deities. Only in the highest development of Greek thought in some rare minds, and there only in a very imperfect way, was the antithesis reconciled in a higher conception of the Divine nature (see C, § I, below).

(2) *The Olympian and the Chthonian gods.*—The difference between the gods of the old religious ideas and of the newer or Hellenic thought tended to crystallize in the distinction between Chthonian and Olympian gods, though this distinction never became absolute and universal, and there is hardly any deity who belonged everywhere and at all times to the one class and never to the other. But the worship of the dead, i.e. of the heroes, and of the Chthonian gods, was marked off by broad lines from that of the Olympian gods; and most of what was really deep and heartfelt religion in Greece belongs to the former, while most of what is artistic and a permanent possession for the civilized world belongs to the latter.

The even numbers and the left hand belonged to the Chthonian deities, the odd numbers and the right hand to the gods of heaven (*Plat. Legg.* iv. 717 A). White was the appropriate colour of the Olympian gods, the East their abode, and the direction to which their temples looked and their worshippers turned when sacrificing to them. The forenoon was the time suitable for their worship. The Chthonian gods preferred blood-red or black; the West was the direction to which their worshippers faced, the afternoon their chosen time. Offerings to the Olympian gods were shared in by men; offerings to the Chthonian gods were burnt whole. Men had community in the sacrifice with the former, with the latter they had none. One who had partaken of the black sheep offered to the hero Pelops in his grove in the Altis might not enter the temple of Zeus (*Paus.* v. 13). The priestess Theano refused to curse Alcibiades and

devote him to the infernal gods, on the ground that her duty was only to bless (*Plut. Alc.* 22).

The worship of the Chthonian deities was for the most part mystic; and a very brief description of the character of the ritual of the Mysteries has already been given in A, § VII. This mystic and secret character shielded the Chthonian gods against the Hellenizing tendency; and thus the awe that attached to them remained unimpaired. Awe was foreign to the spirit of Hellenism; but the human spirit demands an element of awe, and the Hellenes were human. Accordingly, Hellenism protected the Chthonian gods against itself by keeping them private, mysterious, and apart.

VI. THE RELIGION OF APOLLO AND THE DELPHIC ORACLE.—To attain a conception of the spirit and character and the infinite variety of Hellenic religion and its relation to Hellenic life, it is above all necessary to study the practical development of the individual gods out of their primitive form into the full Greek idea. We can here take only one example. We might select Athenaia, the champion and mother of Athens, originally a form of the Pelasgian Mother-Goddess, who became step by step an almost purely Olympian deity (at least in the popular idea, though never in the actual cultus*), patron of what the world holds in memory as most characteristic of Athens, protector of the democracy, of art and of letters, opposed to and yet closely connected with Poseidon, who was the champion of the oligarchic and aristocratic element in the city.† But Apollo is, on the whole, the most typical and representative Hellenic deity, and his oracle at Delphi was the most powerful influence in guiding and moulding the growth of Hellenism. And as, in the much debated subject of Greek religion, it is useful to see more than one view, Mr. L. R. Farnell, the author of *Cults of the Greek States*, will treat this part of it.—

[If the study of any single Hellenic divinity can suffice for the comparison of the pagan and Christian classical world in respect of religious thought and rite, one may be justified in selecting the Apolline worship for the purpose. It may not indeed present us with the highest achievement of the Hellenic spirit in religious speculation: for instance, to trace the gradual evolution of ideas that made for monotheism, we must turn rather to the worship of Zeus. Nor, again, did it attempt to satisfy, as did the Dionysiac and Eleusinian cults, the personal craving for immortality and happiness after death which was working strongly in the Hellenic world before the diffusion of Christianity. Currents of mystic speculation, coming partly from the East, and bringing new problems concerning the providence of the world and the destiny of the soul, scarcely touched and in no way transformed the personality of Apollo. Until the old Hellenic system was passing away, he remained a bright and clearly outlined figure of the early national religion, a Pan-Hellenic god, whose attributes reflected and whose worship assisted the various stages of material, social, and moral development through which the race had passed. The study of the cult is of the highest value for the student of Hellenism, and not without value for the wider study of European ethics and religion.]

To understand this, we must distinguish more carefully than is often done between the figure of worship and the figure of myth. This is the more necessary in the case of a religion such as the Hellenic, that was not fortified by any strong and imperious dogma which might bring the mythic

* See U. Kohler's commentary on the famous Oean inscription, *Athen. Mittheil.* i. 139; *Plutarch, Solon*, 21.

* Her relation to the Eumenides, the Gorgon, and the serpent-footed Erichthonios, shows her Chthonian and antique character.

† See Neil's edition of *Aristophanes' Knights*, p. 62.

fancy under control. Hence Greek myth, though usually bright and attractive, and often illuminative of actual worship, is sometimes repulsive, and no adequate expression of the serious mood of the worshipper. If we confine our view, then, to the public cults—Greek devotion being mainly public—and to the myths that illustrate these, we soon discover that Apollo did not instantly reveal himself, as he emerged above the horizon of prehistoric Hellas, as the divinity of the higher life who brought a higher message to his worshippers. The Apollo of Æschylus and Pindar is not quite the same as the Apollo of the earliest Greek tribes. The records of the historic period still preserve the impress of a wilder and more savage age.

The meaning of the name Apollo, like that of most of the Divine names in Greece, escapes us. A modern etymology that connects it with ἀπέλλα, the Doric word for 'assembly,' would yield us, if we could accept it, the very interesting result, that the aboriginal deity was not a mere 'Nature-god,' a personification of some portion of the natural world, but already a political divinity full of promise for the future public life of the race. But for etymological reasons the word ἀπέλλα could not give rise to the derivative Ἀπόλλων, though they might both come from some common stem.

We must content ourselves with having the right to believe that he is at least an Aryan god, brought in by the Hellenic conquerors, and the common possession of several of the leading tribes. In countries where the autochthonous population claimed to have survived, such as Attica and Arcadia, he is clearly an immigrant, not an indigenous deity. And Greek ritual preserved and hallowed the memory of his original entrance into Hellas from the north. It seems that in Herodotus' time the Delians were still in the habit of receiving certain cereal offerings at the festival of Apollo that purported to come from the 'Hyperboreans.' The route which the offerings followed entered Greece from the north-west, and, passing southward as far as Dodona, then struck across eastward to the Malian Gulf, and so by the Eubœan Carystos to Delos. Wild fancies have been conceived and foolish theories devised about these Hyperboreans. Error arose from the illusory belief that any people, known however dimly to the Greeks, and known to be worshippers of Apollo, could have been styled 'the people who live beyond the north wind.' The key to the puzzle has been undoubtedly found by Ahrens, who as a philologist has made one of the very few philological contributions to the study of Greek religion that are of any value. He discovered that the word Ὑπερβόρειοι is a slight popular corruption for Ὑπερβόροι or Ὑπερβερεταῖοι, a well-attested Macedonian dialect form for the Delian word Ἑρφερέες that Herodotus declares was applied to the sacred 'carriers' of Apollo's offerings. They are then northern Greeks, all bearing pure Greek names, which all have a religious origin proper to their ritualistic function. And it is of the greatest interest to note that the route by which the oblations of the North-Greek tribes are reported to have travelled is the natural route of invasion which the Aryan conquerors are now supposed by modern historians to have followed.

Can we discover the original character of this divinity in the earliest days of the worship in Greece? A belief that still appears to prevail in ordinary classical scholarship is that he began his career as a sun-god, displacing earlier and less personal solar powers, and became gradually humanized and withdrawn from this elemental sphere. But the belief is uncritically held, and breaks down before the evidence of the cult-facts. The epithets whereby a Greek divinity was addressed in prayer

and official hymns give the best clue to the ideas of ancient worship. None of those that are attached to Apollo can be naturally interpreted as designating a god of the sun or of the lights of heaven. Λύκειος, one of his most common titles, can come from the stem of λύκο-s, 'wolf,' and not phonetically from the stem of λύκη, an assumed old Greek word for 'light.' Δυκκηγένης, an epithet only used twice in the *Iliad* in a conversation between Athena and the Lycian Pandaros, can mean, in accord with the laws of word-formation, either 'Lycian-born' or 'wolf-born': the latter significance being in harmony with a well-attested legend. Διγλήτης, 'the god of the gleam' at Anaphe, appears to have been a later transformation for an older form Ἀργελάτας, a term of quite different import.

At a comparatively later period, Apollo comes into touch with Helios, especially in Asia Minor: the same may be said of other divinities, for whom no one would claim a solar origin. The first to identify him with Helios was Euripides; but this poet is often quite reckless of the popular religious view, and the statement belongs to a certain theory of his.

In pagan North Europe, and in pagan Greece, the leading practices of ritual that have been discovered and interpreted by modern research aimed at ensuring fertility and growth in the vegetable and animal kingdoms. This must be the chief interest of primitive society in the pastoral and agricultural age; and it is this that gives function and much of their character to most of the Hellenic divinities throughout all periods of their career, and especially to Apollo.

Doubtless, the earliest Hellenic invaders had already advanced beyond the social level of the hunter and the shepherd. Yet early cult and cult-ideas that survived the changes and progress of the ages preserve the traits of savage life. Here and there Apollo was still the cave-dweller: for instance, near Magnesia on the Mæander, where his image and spirit filled his priests with superhuman force, so that in wild frenzy they bounded down steep rocks and uprooted strong trees: even in cultured Athens he was still worshipped in a cave on the Acropolis. To this period belong such conceptions as that of Apollo Λύκειος, the wolf-god, the son of a wolf-mother, the god to whom wolves were offered in Argive ritual. In Cyprus we come upon the worship of Apollo Ὑλάρης, the deity of the woodland, to whom certain trees were sacred; and the bow, the weapon of early man, and always the chief badge of Apollo, belongs to him as the divinity of the chase, to whom the huntsman even in the days of Arrian offered a tithe of the spoil. Throughout all Hellas he was worshipped also as the deity of flocks and herds, who tended sheep and horned cattle in the pastures, and brought plentiful supply of milk, as Νόμος and Γαλάτιος. The agricultural life, which is again a higher stage, is also under his care. He guards the crops from mildew and vermin, preserves the boundaries of the tenements, and to his shrines at Delphi and Delos the Greek States far and wide send their tribute of corn.

His festivals, which fell in spring, summer, and early autumn, but never in winter, attest very clearly his vegetative and agricultural character. At Amyclæ, in Laconia, he succeeded to and absorbed the cult of an old hero of vegetation, Hyacinthus, probably a pre-Hellenic personage, the beautiful youth who dies young and is bewailed as the incarnation of the bloom and the early fruits of the year. His grave was beneath the basement of Apollo's statue, and the first part of the *Hyacinthia* festival was consecrated to him; the note of sorrow in the ritual is an echo from the primitive life of the husbandman and harvester in Europe and Asia. The Laconian festival of the

Káprēia is one of peculiar interest, and it is impossible here to cope with the questions that arise concerning it. Our own view is that Apollo *Káprēios*, whose name means 'the cattle-god,' was worshipped by the Dorians in North Greece, and probably by the Dryopes before the Dorian conquest of the Peloponnese; that the Dorians established his worship in Megara, Sicyon, Argos, and Sparta, though a previous migration, possibly of the Dryopes, may have already planted the worship in certain parts of Southern Greece. The Spartan ritual has been well interpreted by Mannhardt: for nine days all the people lived in tents or huts, a reminiscence of primitive life, and the chief act of the festival was the pursuit of a man called 'the runner,' who was covered with garlands, by youths who carried grape clusters; if they caught him, it was a good omen for the crops and vintage. The ritual is vegetation-magic and old European. Upon this, as upon the ritual of the *Hyacinthia*, the higher worship of the god of song and music was engrafted.

To this early pastoral and agricultural period belongs the rite of human sacrifice which survived here and there in the worship of Apollo, and which was probably more frequent in the earlier period when it was common to all Aryan and to less progressive races. In Cyprus those who touched the altar of Apollo were thrown from a rock; from the famous Leucadian promontory in Acarnania a victim was hurled once a year 'as a piacular offering' to Apollo; and in the Attic *Θαργήλια*, an early harvest-festival consecrated to Apollo, where most of the ritual was harmless vegetation-magic, the cruel rite may have prevailed, even in the civilized age, of leading forth two human scapegoats and putting them to death by stoning or burning. The human oblation, which Greek civilization tended to abolish or modify, is a practice—whatever its true meaning—that is rooted in savagery. Yet it sometimes contains the germ of the idea of piacular and vicarious atonement that can bear fruit in a higher religion.

So far it has only been the primitive character of Apollo that we have attempted to outline. His real significance for the Greek *πῶλις* touches higher issues. He becomes, or already at the dawn of Greek history he was, one of a special group of deities that presided over the communion of the family, the clan, the village, and finally of the *πῶλις*, the last development of these. His cone-shaped pillar stood in the street before the door of the citizen; and Apollo *Ἀγνέως* becomes Apollo *Προστατήριος*, the god 'who stands before the door' and shields the household from terrors of the seen and unseen world. To the Ionic communities he stood in the special relation of ancestor, and the Dorian cities honoured him as the leader of their colonies, and sometimes as the founder and organizer of their social institutions.

Two instances may be selected from the many that might be quoted, to show the importance of his cult for social and political progress. At Athens the court called *ἐν Δελφῶν* was founded to try cases of homicide where justifiable circumstances were pleaded. When criminal law becomes able to consider such pleas, it is advancing from the barbaric to the civilized stage. It is of importance, therefore, to note that this great advance was associated at Athens, in part at least, with the name and cult of Apollo. Again, at Delphi the worship of the Pythian Apollo played a very useful part in the emancipation of slaves. The slave who saved money could not, of course, be sure of buying his freedom from his master, for the latter might lay hands on the money and retain the slave; but he could, and from a vast number of Delphic inscriptions we have evidence that he

very frequently did, deposit the money with the god, who then purchased him from his master, and let him go free with a religious guarantee, that was legally effective, against further violence or constraint. This excellent system prevailed in other worships elsewhere, but was specially in vogue at Delphi.

To the development of ethical thought the Apolline cult contributed one vital conception, that of purification from sin, an idea that belongs to other cults also, but is most prominent in this. We must not interpret this conception as having at the outset any essential relation to inward or moral purity, or as even enforcing any austere ideal of sexual abstinence. Purification in the Apolline and other Hellenic cults must be understood in a ritualistic sense; the process of purification aimed at washing away certain stains from a man's person that rendered him ritualistically unclean, that is, unable to approach the altars and temples of the gods, or to mix with his fellows without spreading a deadly miasma around him: such stains would be contracted by harmless physical acts, but specially by contact with blood. It is therefore the shedder of blood who stood in special need of the Delphic ritual of purification, in which the use of the laurel and the lustration with swine's blood are combined. Now, these kathartic practices are not proved to have been very ancient in Greece; the poet Arctinus of the 8th cent. B.C. is the first who records them, and he associates them with Apollo and Artemis. There is reason for believing that they were introduced into Delphi from Crete, the land whence the Athenians summoned Epimenides to purge the city from the stain of the Cylonian massacre, and whither Apollo himself repaired to be purified from the blood of Python. The Athenian *Θαργήλια* was partly a feast of purification; and the idea was still more prominent in the Delphic feast of the *Σπερτήρια*, held every eight years in the early summer, when, after a dramatic representation of the slaughter of Pytho, the Delphians selected a beautiful and high-born boy, who was temporarily an incarnation of the god, and who proceeded to Tempe, and, after purification, returned by the 'Sacred Way,' bearing the pure laurel through many an old seat of Apollo's worship in Thessaly, Oeta, and Malis. This ritualistic idea of cleanliness, so prominent in the Apolline cult, at first a non-ethical idea, is of the greatest importance for the history of ethics, for from it has grown the advanced conception of moral purity and the civilized horror of bloodshed.

Finally, Apollo was pre-eminent a god of the arts and the higher intellectual life, the leader of the Muses, the deity to whom the stateliest forms of music and song were consecrated. In pre-Homeric days the Pæan was already his special hymn of praise. In its earliest period the Pythian festival was a musical, not an athletic, contest; it came to include a competition of poets, and even of painters, thus fulfilling some of the functions of a Royal Academy of Arts. It is, in fact, the distinction of the Greek as compared with other high religions of the world that it conceived of the Divinity as revealed in the achievements of art and human science no less fully than in the moral life of the household and the State.

It remains to give a very brief outline of the Oracular worship of Delphi; for this presents the salient features of the god in the strongest light; and the Delphic tripod was the chief source of his power, and one of the few bonds of religious union in the Hellenic world. The god had seized upon Delphi or Pytho before the period of the Homeric poems, that is to say, before the Greek colonization of Asia Minor.

We may ask how Apollo became pre-eminently the prophetic god, while the power of divination was always inherent and often active in every deity and many a departed hero. His special distinction in this sphere was probably not due to any fundamental fact in his original character. The prestige of Delphi was probably the cause rather than the effect of the oracular prestige of Apollo; what it was that won for Delphi this unique position is a question that cannot now be raised.

We are certain, at any rate, that it was from the Delphic rock that the fame of the prophetic god spread far and wide over the Hellenic and non-Hellenic world; and affiliated shrines were planted in Greece consecrated to Apollo Pythæus.

The sanctity of the temple was safeguarded by the Amphictyonic Council, whose constitution reflects the pre-Homeric age of Greece, and whose members bound themselves by a solemn oath to defend the shrine, and never to destroy or allow the destruction of an Amphictyonic State. It was not the fault of the religion that the oath was shamefully broken, and that this ideal of a higher national union remained barren.

The manner of divination at Delphi is interesting, and in one respect peculiar. The 'mantic' art in Greece has been defined as twofold; one kind being ecstatic, enthusiastic, insane, the other sane and rational. The diviner of the former type is possessed by the spirit of the god who enters into him or her through the sacramental eating or drinking of a substance in which the spirit of the god was supposed to reside; so possessed, the human frame becomes an organ of the voice of God, and the human lips are moved in madness with utterances that the skilled can interpret. Of the latter type is soothsaying from birds and other animals, inspection of entrails, the drawing of lots, which may be corn-stalks or notched pieces of wood. The soothsayer in this case is sane enough, and may be said to practise rationally an art or science that is merely based on a false hypothesis. To these we may add a third: prophecy by means of dreams that were supposed to well up from the earth and the earth-spirit into the sleeper's brain. The second type is regarded as specially Apolline, ecstatic enthusiasm being considered to be alien to the character of the sane god. All three were once practised at Delphi—the third when the Oracle was under the dominion of the earth-goddess, the two former after Apollo's arrival. But the only divination that was in real vogue there in the historic period was of the ecstatic, enthusiastic, epileptic type. The Pythoness drinks the water of the holy stream, chews the sacred laurel-leaf, mounts the tripod above the chasm whence the mephitic vapours rose, and then speaks words of frenzy which the *Ovrioi*, the five priests of the noblest Delphic blood, holding office for life, who sit near her listening, interpret according to some system of their own. This oracular madness has been supposed to be un-Apolline, and due to the strong influence of the Bacchic cult at Delphi. The theory is plausible, but not convincing. The priestess of the Argive shrine of the Pythian Apollo, a very early offshoot of Delphi, was also 'possessed by the god,' though the possession was wrought by a draught of the blood of the sacred lamb that was offered to him in the night. What strikes us as really un-Apolline is inspiration by means of the subterranean vapour: this may be a heritage from the pre-Apolline and 'Chthonian' period of the Oracle, for the subterranean world and its agencies are wholly alien to him.

The Pythoness was merely a virtuous woman, often of humble origin, a mere tool in the hands of

the 'Holy Ones.' The history of the Oracle is really the history of the generations of those *Ovrioi*, the record, if we could gather it, of their varying attitude towards the national ethics, politics, and religion; and a complete list of the oracles would give us a marvellous insight into the average mind of Hellas. For these priests must be taken as reflecting the better average character of the nation, not as inspired teachers with a definite mission and advanced dogma. But their power was really great, and their exercise of it and their claims remind us dimly of the Papal power in the Middle Ages. In one respect their work was evil, and through conservative instinct they lagged behind the growing morality of their age; many a legend and record attest that, so far from softening the harsher traits in Greek religion, they encouraged and insisted on the maintenance of human sacrifice. The savage rite gradually passed away in spite of Delphi.

The political career of the Oracle cannot be dealt with here. It may be enough to say that the oracles which have been preserved display no settled policy; usually, but not always, the Oracle is on the side of constitutional government as against the tyrant, and was nearly always the devoted friend of Sparta, owing much of its great prestige in the 7th and 6th cent. to the support of that State.

In a famous oracle concerning the Spartan plan of Arcadian conquest, Apollo's voice was on the side of righteousness, but the utterance suggests a quasi-Papal claim to dispose of territory. But with all her influence Delphi was too weak to menace the liberties of the Greek States. Her best political activity was in the sphere of colonization; the *Ovrioi* have every reason to be considered the best informed agency for emigration that any State has ever possessed. Of course, neither in this nor in any other matter could they dictate; they merely advised and pointed the route to adventurous spirits; and they advised very well, so that at last no body of colonists were likely to start without the sanction of Delphi. There is reason for thinking that this colonizing of Apollo began in prehistoric times. The Dorian migration was probably blessed by the Oracle; and, what is still more important, we have good evidence from the legends, of the custom of dedicating to Delphi a tithe of the captives taken by any conquest: these appear to have been sometimes sent forth as a colony of the god's.

A few last words may be added concerning the part played by the Oracle in Greek religion and morality. In spite of the dark exception mentioned above, its influence, which was certainly great, was often good, and generally innocent. The priests were propagandists of two departments of cult especially: the cult of Dionysos, who was Apollo's confrère at Delphi, and the cult of heroes. The latter is an interesting feature of Greek religion, for it explains the spread of later saint-worship in the Mediterranean; and as no departed holy person could be canonized without the sanction of the Pope, so no departed athlete, warrior, or benefactor could be, or was likely to be, the object of public worship without the authorization of Delphi. Usually, the Delphic rule in religion is to encourage each State to maintain the religion and ritual of their forefathers.

In the sphere of private morality, in the ethics of the conscience, the Oracle often did good service; and this short epitome of a large theme may close with a few illustrations of this. Herodotus has preserved for us the stern and significant words with which the Oracle denounced Glaukos for tempting the god to connive at fraud: the terrified sinner craved forgiveness for his evil thoughts;

but the Pythoness told him that God would punish evil intent as well as evil act. This was then almost a new phase in the world of Greek ethics. Again, at a later time the Oracle reveals how far the moral thought of Greece had advanced out of the old bondage to ritual: a brave and good man had slain his own friend by accident while defending him in a deadly encounter with robbers; horror-stricken, with his friend's blood upon him, he flees to Delphi to ask what atonement or ritual can wash off the sin; but a better voice greets him than might have greeted Oedipus: 'Thou didst slay thy friend, striving to save his life; go hence, thou art purer than thou wert before.' Akin to the ethical idea embodied here is a *χρησμός τῆς Ἰουδίας* preserved in the Anthology: 'Enter the shrine of the pure God, pure in soul, having touched thyself with holy water: lustration is easy for the good; but a sinner cannot be cleansed by all the streams of ocean.' The genuineness of these oracles is a matter of indifference; they prove a rising tide of ethical feeling, which originated in the philosophical schools of Greece, and was imputed to Delphi. The conservative Oracle itself came to be regarded as playing its part in freeing men from that ancient heavy burden of ritual that in an older period may have aided certain growths in the moral world, but had long been a clog upon moral advance.

This short exposition of a great chapter in Greek religion puts forth many unproved and undeveloped statements. The present writer hopes to be able to deal more fully and more satisfactorily with doubtful and important points in the fourth volume of his *Cults of the Greek States*.

LEWIS R. FARNELL.]

C. LATER DEVELOPMENT OF RELIGION IN THE GREEK WORLD.—I. RELIGION IN LITERATURE AND PHILOSOPHY.—The essential inconsistency and self-contradiction involved in the idea of the Hellenic Pantheon was apparent, in a dim way, even to the common mind. Zeus was himself an individual with a history full of faults and selfishness. While his rule was often a mere capricious despotism, the other gods were a court surrounding him, each with his own schemes clashing both with the will of Zeus and with the wish of his fellow-deities. Thus the power of the highest god was limited, and overruling fate then became an inexorable law, before which even he must bow. However unwilling, he must surrender his own son Sarpedon to the death that fate had allotted him.

The contradictions and inconsistencies which were inherent in the system were felt by the common people. Thus Euthyphron defends his action against his father by the analogy of Zeus's treatment of his own father Kronos. The worship of the different gods in the State was loosely co-ordinated into a religion. In Athens the enjoyment and splendour of the great festivals of Athena were supplemented by the solemn impressiveness of the Mysteries. The feeling of awe, the fear of God, and the dread of divinely-sent calamity, grew with the spread of education into a vague consciousness of sin, and of the need for reconciliation with an offended God. On this consciousness the Orphic Mysteries were based; and in them certain observances ensured Divine forgiveness and future happiness. Strolling prophets even professed to sell indulgences, and in return for money to ensure, by performing certain rites, safety from punishment. At the same time a vague idea was growing in the popular mind that a good and pious life was needed to please God, quite as much as compliance with a stated ritual.

There was only one possible cure—raising the

conception of God and intensifying the tendency to monotheism inherent in human thought, and not entirely lost sight of in the Greek religion. No adequate provision existed in the religion for educating the people and purifying itself. The Delphic with other Oracles had carried on this work for centuries, and *ἐγγράται*, appointed with its sanction in many States, were judges in difficult points of religion, and had some influence in co-ordinating the several cults; but the influence of the Oracles began to grow weaker after the end of the 6th cent., and their character deteriorated. The established religion became purely conservative, and the effort of all its ministers was solely to keep up the traditional state of things. The only hope lay in the literature of the age and the spread of higher thought. As poets had formulated with the help of the prophets the prevailing system, they with the help of the philosophers had now to raise its character. This was the religious work that the Gnostic poets, Pindar, and the Tragic poets successively performed.

The first adequate recognition in modern times of this important side of Greek literature is probably to be found in the pages of Zeller and of Trendelenburg, to whom especially we owe much in the following paragraphs.

Although the religious thought expressed in Greek literature and philosophy tended constantly to separate itself from the common religion, yet it was only the development of the latent capacities of that common religion. In its earlier stages literature worked hand in hand with the Delphic Oracle. The great Lyric and even the Tragic poets were recognized as the servants and ministers of the god. They wrote hymns for the worship which the Oracle propagated over Greece; and there is every reason to think that their finest conceptions of religion were practically those of the Oracle. Those brief proverbial utterances in which the wisdom of the 7th and 6th cents. concentrated itself are in the records expressly brought into connexion with the Oracle, over whose entrance was inscribed the *μηδὲν ἀγών* of the Wise Man.*

But the relation between the two did not always continue so peaceable. Apart from those who simply denied the truth of the prevailing religion, those who like Æschylus or Socrates continued in sympathy with, and tried to read a higher meaning in, the established religion, found themselves in frequent danger of being misunderstood. Æschylus was accused of revealing the Mysteries to the profane, and Socrates was condemned as seeking to introduce new deities into the State. The Delphic rule of maintaining the hereditary order of things (*τὰ πάτρια*) was generally on the side of the uneducated, though the Oracle seems on the whole to have appreciated the work and character of Socrates. The conflict of religion and science, which had begun in the 6th cent. or even earlier, was the prominent fact in the 4th.

Two questions rose naturally to the minds of all who thought about the common religion: first, what was the relation of Zeus to the other gods, and how could will and power in them be reconciled with his omnipotence? And, second, what was the relation of Zeus to that overpowering fate that seemed at times to control even his will? In truth, the two questions are but two aspects of the same difficulty, and the answer to one involves the answer to the other. As long as the conception of God contains any of the capricious human element, so long must the will of Zeus clash with the will of the other gods and be overruled by the unbending, unvarying order of nature. When the Divine nature is conceived as absolutely

* See especially a paper on *Freedom and Necessity in Greek Philosophy* in Trendelenburg's *Beiträge*.

regular and the Divine will as absolutely free from arbitrariness and caprice, opposition between the will of the different gods and disagreement with the course of fate tend to disappear.

As we have already seen, the religious view in Homer varies between the opposite and inconsistent views, and the same wavering is seen throughout Greek literature.

Herodotus represents more completely the lower view of Divine nature than any other of the great writers. In his view, success produces pride; man believes in his own power and sufficiency, and recognizes not the unseen power of God: the gods blind him and lead him into destruction through his own arrogance. This view, that the gods, acting as the instruments of an inscrutable fate, blind men, involves essentially the same idea of fate as the other view, that the gods are friends of men, but that fate is over the gods and too powerful for them. The latter view is summed up in the words of Pittacos, ἀνάγκη δ' ὁδὸν θεοὶ μάρχονται. To Herodotus mere success is in itself a defying of the Divine law: the Divine power is chiefly seen in the misfortune which it sends on men. The order and regularity of the world, recognition of which is the fundamental idea of his work, is quite above and apart from human reason; man cannot adapt himself to it, but only mourn when he has felt its power. Only when he dies is a man safe from the calamity that the god may at any moment send on him.

But in the literature Zeus became by degrees more completely the bearer of a moral rule, and the other gods the willing ministers of his providence and will. As this idea was more thoroughly grasped, the opposition between Fate and God was in some degree reconciled; the order of nature (Εἰσαγωγή) became a moral and knowable law, the will of God: man, by learning and living in accordance with that will, can avoid the calamity which must otherwise overtake him. So in Pindar, Zeus causes all that happens to man; he can turn night to day, and day to night: nothing that man does is hid from him; only where he shows the way is a blessing to be hoped for. The constant theme of Æschylus is the unerring, unfailing justice displayed in the course of nature. He uses Justice (Δίκη) and Zeus sometimes as convertible terms; and both denote that order in nature which through suffering teaches knowledge and conformity with itself, and the recognition of which is the only consolation in time of doubt. He recognizes a development in the history of religion; the triumph of Zeus over the older dynasty of the Titans is the triumph of a moral providence over a lower order of gods. He directly combated the ancient saying as it appears, e.g., in Herodotus (παλαίφατος λόγος), and declares that it is the actual sin of man, not the mere fact of his prosperity, that brings on him the divinely-sent calamity (*Agam.* 750; *Eum.* 531); and in many other passages he shows in clear words that such calamity is simply the way in which wisdom is taught to men even against their will. The law of Zeus, or the course of justice, is to learn by suffering (παθεῖν μάθειν, πᾶθει μάθος, *Agam.* 170). The law is a kindly one, the gracious dispensation of one that has power to make his will into Necessity. The older dynasty had represented the rule of fear: Necessity was only a punishing power, which man must dread but cannot understand; and was exercised by the gods of that dynasty—

τίς οὖν ἀνάγκης ἐστὶν οὐλοστροφός;
Μοῖραι, τριμφοῖο μῆτιμονες τ' Ἐρινύες

and Heracitus declares that if the sun were to transgress his bounds the Erinyes would punish him. But under the completed sway of Zeus the

avenging power of the older gods is merged in the helping and benignant power of the younger deities, for Necessity is changed into order and reason, which man can learn and respect, and thereby avoid the punishment and gain the good. Socrates seems even to have substituted *Pronoia*, Providence, for Necessity; but his biographer did not understand him.

In Sophocles, polytheism perhaps appears in its most perfect form; the other gods are only representatives of the one God, or instruments used in turn by a moral providence. To Pindar, also, Zeus is not so much a god, as the one God.

Euripides was clearly conscious of the essential self-contradiction involved in polytheism; he perceived clearly and felt strongly that it results in degrading the several gods and making the world irrational: he gave as emphatic and open expression to this as he dared: for example, in the Apollo of the *Ion*, whose criminal conduct towards Creusa in the past is even surpassed by the dishonesty of his attitude towards her and towards Xuthus in the play. That Euripides was fully conscious of this aspect of the action seems undeniable: that the general Athenian public had only some vague, uneasy sense that the poet was maligning the gods seems equally certain. It is doubtful if Euripides had any solution to offer that satisfied himself; but at any rate the conditions under which he had to work precluded his formally offering any solution, for he dared not make his views about the gods too explicit, and could only suggest difficulties and put questions. But, although his plays are remarkably instructive as regards the attitude of a section of the thinking and educated Greeks towards polytheism, the subject is too large for our limits.

At the same time, the other side of religious thought grew correspondingly. The idea of a larger cycle of life in which the apparent injustice of earthly existence might be eliminated and all men receive their deserts—an idea of which the most scanty traces appear in Homer and Hesiod—grows more apparent in Pindar: future punishment is the climax of the Divine vengeance in Æschylus, it is often referred to in Sophocles, and Euripides says, 'Who knows if death is not really the life, and life the death?' This recognition of a single rule in life and after death reconciles the antithesis of Olympian and Chthonian deities.

The influence of literature penetrated gradually through the people. The more educated were, of course, more open to it, and thus tended to become estranged from the popular beliefs as superstitions. Hence in the 5th and 4th cents. there was a growing gap between the religion of the educated and the religion of the common people. Both, so far as we have yet gone, were equally polytheistic. Philosophy entered on a bolder path, and directly combated the polytheism and anthropomorphism of the popular religion. While the poets saw in the ancestral religion the germs of higher thoughts, they did not try to free these thoughts from the sensuous symbolism in which the prevailing religion enveloped them. Philosophy naturally tended more to rise above the traditional and accepted ideas. Hence it appears to Plato in the Tenth Book of the *Republic* that in the conflict between philosophy and the vulgar crowd the poets are among the latter.

The fundamental doctrine of Greek philosophy is always the unity of the world. Some conceive this unity under the form of God, others under the form of Nature. Heracitus conceives this unity as the Divine λόγος, which constitutes the correlation and intelligibility of phenomena: and Anaxagoras as νοῦς or Reason. It is therefore the philosophic expression of that fate or order of nature

which is recognized by the poets and by religion; but the philosophers from the first maintain it as a knowable law.

The attitude of the philosophers towards the established religion is various. Some do not trouble themselves about it, others use it where it suits them. Heraclitus approaches most closely the Æschylean point of view; he declares that, whereas men see contradiction and perplexity in the world, God sees only unity and consistency; and, like Æschylus, he calls the order of nature 'Justice' (Δίκη). Man learns what is this Justice, and in learning achieves his own character and works out his own fate: *τὸ ἴδιον ἐκαστοῦ δαίμων* (compare Æsch. *Eum.* 520 f.). On the other hand, the worship of images and the offerings of beasts seem to Heraclitus hateful.

Democritus and Empedocles bring in the gods of the established religion as part of the system of things evolved from their primordial principles.

A third class of philosophers simply oppose the common religion, and would fain sweep it away to make room for a higher belief. Xenophanes cannot find strong enough terms to express his hatred for such doctrines as the plurality of gods, with all their moral failings. The anthropomorphism of the current religion, where gods are born and die, revolts him. God is infinite, and finite characteristics are foreign to His nature. God does not change and move like the vulgar deities; He is motionless, for He is all that exists, and there is nothing outside of Him into which He could move or change.

To the Sophists (who may be broadly distinguished from the Greek philosophers by their utter lack of sense for the unity of nature, and the limitation of their view to the multiplicity of phenomena) religion was created by voluntary compact among men; the variety of religions proved that it could not exist by nature, for if it came by nature it would be one. That the variety of religious thought was the necessary consequence of the variety of character produced in men by variety of external circumstances, their analysis of the world was too superficial to show. But this very superficiality of theirs is more representative of popular thought than the philosophy of deeper men, and shows better what was the religion of the educated in their own time.

Nothing sets in so clear a light the degradation of the gods in popular thought as the comedies of Aristophanes. Much as he hates the Sophists, and bitterly as he attacks their irreligion, he himself shows the gods of the established religion in more ludicrous and degrading situations than any of the Sophists cared to do. The Sophists approved of these gods as a very useful device, and inculcated respect for them as the means of developing morality among the people.

Isolated outbreaks of popular fury, in times when calamity terrified the people into piety and roused in them a temporary and quickly evanescent reaction against the growing irreligion of the time, were of no avail 'to stem the torrent of descending time.' Purely conservative, without any provision for deepening its character and keeping pace with the rapid growth of thought and of political and commercial life, the established religion continued, as a trammelling and impeding institution, losing its hold year by year on all classes of the people. How intense was the religious feeling of Athens is shown by such outbreaks as took place in B.C. 415 and 410. A longing for something more is everywhere manifest in the literature, and history shows the dissatisfaction to have been as strong in the mass of the people. The feeling was vague, for the people knew not what they sought; and it showed itself at first only in blind outbursts of fury

against more prominent violations of the established religion, though in reality these violations were merely stronger examples of the universal dissatisfaction.

Only a prophet with a deeper revelation could bring the strong religious feeling of the people and the decay of the national worship into harmony; and, after Socrates had sealed with his life his belief in freedom of religious thought, the succession of philosophy to the position once occupied by the Delphic Oracle as leader of Greek religion was accomplished. It was, however, the misfortune of Greek life, and a proof of its religious weakness in comparison with the Hebrew race, that the prophetic mantle found no new wearer. In the dangerous path of pointing out the true and divinely ordained course in actual public life,—that path in which Palestine produced a constant succession of great thinkers to walk,—Socrates found no follower. Plato, while fully acknowledging that the true philosopher should take part in public life, found the actual world too full of evil to allow philosophy to enter it. Greek thought therefore remained abstract from actual life; it found its work and its heavenly kingdom, not in the world, but apart from it. Thus, in Greece, there never took place that application of philosophy to practical work which makes for development in religion; and there was never exerted that influence of philosophy on public life and on the mass of the people which is the marvellous feature of Hebrew history.

Socrates only expresses more definitely and in simpler terms the theory of the older poets: one God rules all for the best. He expresses no disbelief in the other gods, and often uses the plural *θεοί*; but they are not an important element, and he never, so far as our accounts go, expressed any opinion about their relation to the great God. Plato regards the common religion as the exoteric form of a deeper truth; it is generally mythical, i.e. it expresses in sensuous language spiritual truths. This exoteric religion is proper for the education of children, and necessary for those who cannot rise to understand the reality pictured to them in the tales of the gods. But the popular mythology must be purified: it is full of hateful and false tales which have crept in through the influence of poets and corrupted the genuine myths.

Aristotle has the same view. Polytheism is a State-engine for education. On the other hand, he sometimes tries to connect it with his system, by placing the gods in the stars; but the subject gets little notice from him.

Aristotle was the last purely Hellenic philosopher; Greek thought had now run its course. With the victorious march of Alexander, Greek civilization went forth to conquer the East; and Greek thought was now brought directly in contact with Oriental religion, and particularly with the genuine monotheism of the Hebrews. The Greek contempt for barbarians gradually disappeared before the actual experience of a religion greater than their own; while the narrowness of the Jews recognized the high character of Greek philosophy. In the last centuries before Christ, constant attempts were made on both sides to unite Hebrew and Greek thought into one system. The doctrine of angels and devils, which was mixed up (in later times) with the Hebrew monotheistic belief, was assimilated with the Greek polytheism. The gods who surrounded Zeus became *daimones* who interposed between God and the world and bridged over the gulf between the infinite and the finite. The idea became common that all men are the children of God; that the true service of God lay, not in the cult-observances

of any particular religion, but in a virtuous life; and that a priesthood to mediate between man and God was needless and wrong. The *lógos* of Heraclitus and of Plato became in the Jewish school of Alexandria the Divine Word which is the bearer of all Divine power. Most of these attempts at a union of Hellenic and Jewish thought ended in an ascetic system; for all aimed at combining the two by dropping elements from each. In Christianity alone both find their completion and perfection, without loss of any of their true character.

Stoicism was the most remarkable Greek attempt to produce a synthesis of Hellenic and Oriental thought. It was to a great extent a religion, but it was an artificial religion with none of the vigour of natural unconscious life. As Zeller says, the whole Stoic view of the world was founded on the idea of one Divine being, father of all, containing and sustaining all, ruling all, manifest everywhere. God was to the Stoics the beginning and the end of the world's development. Virtuous action consists in fulfilling the Divine will and law. The true philosopher is sufficient for himself, master of his fate, above all surrounding circumstances, perfectly happy in his own knowledge, lord of all things, a true king—and a self-satisfied prig. As all men stand in the same relation to God, all men are brothers.

In its theoretic character Stoicism was wholly careless of and uninfluenced by the popular religion. But in practice the Stoic philosophers inculcated acquiescence in the religion which was accepted by common opinion and a restraint on the passions of the common people. They spoke with contempt of many points in the popular faith, the temples, the images, the fables; but they found real germs of truth in it, and thought these sufficient to justify its continuation.

Better almost than in any other writer we may see in Horace the effect of these religious philosophies on the world of Greece and Rome. To think and reason about conduct and good action and wisdom is his only religion. The gods to him are little more than names and fables. When he supported the attempt of Augustus to re-create the old religious cults, the poet and the emperor were alike urged on by the feeling that religion was a political and social machine so useful as to be indispensable to good government.

II. THE ATTITUDE OF ST. PAUL TO GREEK PHILOSOPHY.—In this brief, imperfect outline of the religious side of Greek literature—a subject which calls for a much more serious and systematic treatment than it has ever received—it has been shown how clearly the Greek thinkers conceived the problem, and how lofty was the plane on which they pitched their thoughts; but we have refrained from dwelling on their weaknesses and errors. But naturally St. Paul, who frequently alludes in very disparaging terms to the *Sophia* of the world, was most keenly sensible of its faults and imperfections. Three characteristics seem to have specially offended him.

In the first place, its method was shallow; it frequently offered irrational 'fables and endless genealogies' (1 Ti 1⁴) in place of real attempts to grapple with the problems, and was quite content with these pseudo-solutions: those genealogical explanations, not unknown even to the deepest Greek thinkers (as in *Æschylus, Agam.* 738 ff.), became more frequent in the later period, and were applied in all departments of pseudo-research, geographical, historical,* etc.

In the second place, the fibre in the popular philosophic speculation of the later Greek time (which alone was presented to the members of the Pauline Churches) was poor and its results disappointing. There came from the study no real advance in knowledge, but only frivolous argumentation and 'questionings' (1 Ti 1⁴).

In the third place, the Greek *Sophia* was entirely devoid of power over the will and heart of mankind. It remained purely theoretical and abstract: it could do nothing for men; it was the property of a few, and had no effect, or a miserably inadequate effect, on the life and character even of those few. Where it did to some degree touch the heart and affect the life of some rare individual, it produced a philosophic and affected prig rather than a true man; and in the case of some of its most eloquent exponents, such as Seneca, there was a woeful contrast in spirit between their words and their life. But the essential feature in St. Paul's teaching was that he propounded a doctrine of power, not of theory. That is what he lays special stress upon; and of that he found not a trace in the *Sophia* of the time. The Greek philosophers had sometimes observed that the unwritten laws which rested on religion had more influence on the will and conduct of men than the written laws of the State (see above, B, § II); but they had not carried out this observation to a practical result.

In this last observation lies the essence of the whole matter. The best and the most characteristic Hellenic thought was bound inevitably to regard the higher life, at which the good man must aim, not as the striving after an ideal above and beyond human nature, but as the proper and natural development of his human nature. There was in Hellenic thought no real conception of sin. There could not be such a conception, for it is of the essence of Hellenism to be perfectly content with the human nature, to rejoice in it, to find in it the Divine perfection. The counsel which Hellenic philosophy gave to man, which it must give so long as it continued true to the Hellenic spirit, was, 'Be yourself: do not fall short of your true and perfect development.' Such an idea as rising above oneself, trampling one's nature under foot as sinful, striving after the Divine nature, is essentially anti-Hellenic, and it is only rarely that any faint traces of it can be found even in those Hellenic philosophers who have been most affected by foreign thought. But it was in this revolt from the yoke of sin, in this intense eagerness after the Divine, that St. Paul found the motive power to drive men on.

But, though St. Paul saw so clearly and resented so strongly the faults of the Greek *Sophia*, it would be wrong to infer (as has been too often done) that he was either ignorant of or uninfluenced by it. It is a general fact that the great creative minds in philosophy have been more alive to the faults of their predecessors than to their excellences, and have given larger space and more emphasis in their writings to criticism of preceding philosophers than to expression of indebtedness to them. They were probably not fully conscious of their obligation, but it was very real. So it has been with St. Paul. He owed much to the Greek philosophy and thought, gained partly in formal education at Tarsus, partly by assimilation of the knowledge which floated on the surface of a more or less educated society and became insensibly the property of all its members. On this see the excellent papers by E. Curtius on 'Paulus in Athen,' and Canon E. Hicks, 'St. Paul and Hellenism,' in *Studia Biblica*, iv.; and on his probable debt (in common with Seneca) to the philosophy of Athenodorus, which must have been the staple of education and educated conversation at Tarsus in St. Paul's childhood, the present

* See, e.g., the account given of early Tarsian history and topography by Athenodorus, the greatest philosopher and politician whom the city produced, quoted by Stephanus Byz., s.v. 'Anchiale'; also pseudo-Plutarch, *de Fluvio*, etc. (*Expositor*, Dec. 1901, p. 412).

writer's remarks in *St. Paul the Traveller*, p. 300 ff., may be consulted.

Further, while St. Paul often harshly criticises the current *Sophia* in his letters to his young Churches, he was conscious that he was a debtor both to the educated Hellenes and to the uneducated non-Hellenes, both to the philosophically trained and to those who had no such training (Ro 1¹⁴). And he would not have his Churches lose anything of the excellences of the Greek spirit. His extreme fondness for the word *charis* can hardly be quite separated in his mind, and could not possibly be separated in the minds of his numerous Hellenic hearers, from the Greek *charis*, the grace and charm which is of the essence of Hellenism. And he sums up in three Greek words his counsel to the Colossians and the Asians generally, when he urged them to 'make their market to the full of the opportunity which their situation offered them' (Col 4², Eph 5¹⁰; cf. Ph 4⁴⁻⁸).

III. DEGRADATION OF THE HELLENIC RELIGION.

—(1) *Foreign influence.*—In Greece as in Anatolia (see A, § VII (4), above), the history of religion after a certain period of progress and elevation was a continuous process of deterioration. The changes in religion were for the most part forced on by external causes, viz. by the pressure of foreign worshipers; and their influence was almost wholly bad. This character resulted partly from the way in which the influence reached the Greek races and cities (see (3), below), and partly from deeper causes which cannot be described in this short sketch (though they have been briefly indicated in A, § VIII (9), above): those deeper causes combined to destroy that sensitiveness to the Divine nature, and that desire to hear and readiness to obey the Divine voice, which make for progress and elevation in religious thought.

(2) *Susceptibility to foreign religious influence.*—Some influence was exerted on the religion of the Greeks by almost every race with whom they came in contact. Even the despised and barbarous Thracians could make their Bendis and Kotys or Kotytto powerful and revered in cultured Athens. But it was mainly cults from the East that affected the Greek peoples during the period which is best known to us.

The foundation of this influence was always the same. The Hellenic religion, with its invariable tendency to concentrate attention on the bright side of nature and life, and to permit only reluctantly, under mystic and half-acknowledged forms, any ritual appealing to the sense of fear in the worshippers, could never completely satisfy human needs; and more was always sought after, and seemed to be found in the more impressive foreign religions. Especially the enthusiastic, emotional, and impressive Oriental forms of religion exercised on Greece an influence which acted continuously throughout ancient history. As we have seen in B, § III, the Oriental character and the primitive Pelasgian character in many deities were fused, during the vigorous growth of the Hellenic spirit, into a new form, becoming truly Hellenic conceptions; and although, in the cultus especially, the original characteristics can be traced in the Hellenic deity, yet the completed product is essentially and generically different from the Oriental type.

Thus far back in Athenian history we can observe the entrance of the Braurionian Artemis, a figure analogous to the Ephesian Artemis and the Phrygian Cybele, with her attendant animals and her Amazon priestesses; but myth tells how the invading Amazons were expelled by the hero of Athenian Hellenism; and the Artemis who established herself was the graceful huntress-maiden, a purely Hellenic conception, however much of the

primitive forms could be traced in the actual cultus. But as the youth and creative energy of Hellenism passed away the Oriental influence asserted itself more effectively, and was less modified by the spirit of Greece. Asklepios never became so thoroughly Hellenized as Dionysos, but he was a distinctly later introduction into the Hellenic circle of deities.

In all of those deities the Hellenic character is evident; but in later times Hellenism touched only very slightly, if at all, the gods of Phrygia, of Syria, and of Egypt, who were naturalized in Greek lands and cities. In an age when half-Greek or wholly barbarian kings and Roman emperors were worshipped as gods in Hellenic cities, it was clear that the spirit of Hellenism had grown very weak.

Those Oriental deities appealed to the side of human nature which was alien to, and could not be satisfied with, Hellenism and the bright festival-loving gods of Hellenic political and municipal life. But in earlier times, as any Oriental deities penetrated into the Greek circle, Hellenism tended to lend them its peculiar grace and charm, to tone down the excesses and the abandon of their rites, but at the same time to detract from their power to satisfy that deep-seated craving for an awe-inspiring deity. Even as late as the 3rd cent. B.C. the Cybele, who was worshipped at Athens in the Métrouon, was sometimes invoked under the name of Aphrodite;* and the first signs of the Hellenizing of a naturalized foreign deity was the substitution of a Hellenic for the barbarous name.

The Egyptian Isis, the Phrygian Cybele, and many others, can be traced as far back as knowledge reaches, pressing upon and forcing their way into the mind and the worship of Greece. The worship of Isis was known very early in the Greek colony of Cyrene (Herod. iv. 186); for the Greeks of Cyrene were necessarily in close relations with Egypt, and doubtless Egyptians visited or resided in Cyrene, and, moreover, there was invariably a tendency in the ancients to worship the gods of the land to which they had migrated, in the belief that those gods were powerful in the land which belonged to them.

Cybele was introduced from Phrygia into the Ionic Greek colonies on the west coast of Asia Minor at a very early time, and in much the same way as Isis was introduced at Cyrene. The Phrygian traders came in numbers to Miletus, as Hipponax mentions in the 6th cent. B.C., and they brought their religion with them. Moreover, in times of danger the Greeks turned to Cybele for help, and found her efficacious and powerful; in this respect the story of the introduction of her worship at Miletus is instructive, and may be taken as typical of what happened in many other cases.

The party of the old kingly dynasty in Miletus, having been expelled, took refuge in Assesos, and were there besieged by the tyrant of Miletus. Being hard pressed they consulted the Oracle, and were informed by the god that helpers would come to them from Phrygia, who would release them and Miletus from misfortunes. Thereafter two young men came from Phrygia, bringing the sacred things (*ra lepa*) of the Kabeiroi † in a basket, and approaching the wall of Assesos by night asked admittance, as they had come at the order of the god, bringing sacred things from Phrygia for the good of the people of Assesos and Miletus. In the issue the tyrant was defeated and slain, and the new rites introduced into Miletus.‡ Here the

* See Foucart, *Associations Religieuses*, p. 98, and Appendix, No. 16; cf. 10 and 11.

† This term must indicate the Phrygian rites with the sacred objects displayed to the worshippers in Phrygia.

‡ Nic. Damasc. 53.

reception of the native Anatolian ritual into Miletus is connected with the straits of a political party during a serious dissension in the city. Similarly, the introduction of the worship of the Dioscuri at Rome and the building of their temple in the forum was coincident with the struggle against the tyranny of the Tarquins, the Etruscan intruders, when the Twin Brethren aided the young republic.

(3) *Manner in which foreign religion entered Greece.*—As to the way in which these foreign gods came to be adopted by the Greeks, no clear information has come down to us about the very earliest times, though myth and legend on the subject can be interpreted by comparison with later historical facts. But the facts quoted as typical in the last few paragraphs are taken from a comparatively early period, and they agree in general with the fuller evidence that survives with regard to the later centuries (which will be stated in the following paragraphs). From all these sources of evidence, it results that nothing like intentional spread of religious belief by the adherents of any of those foreign cults occurred; that each body of worshippers rather desired to keep to itself its own gods, and was unwilling to extend the circle except for some distinct present advantage to themselves and their worship; that the spread of a cultus was connected with migration or colonization, both because the migrating people carried their gods with them and because settlers adopted also the gods of the land in which they settled; the adoption of a new god was frequently connected with and suggested by some calamity, which was attributed by popular superstition or by Oracular authority to neglect or contempt of the god in question.

The Oracle was often consulted in such cases of calamity, and often recommended that a novel worship should be introduced. Such was the way in which Rome adopted the Phrygian Cybele in B.C. 204, and Athens in 430. But the Oracle in these cases (as is always probable and in some cases certain) simply confirmed the popular impression, that the new deity if properly invoked would be able to help; and this popular impression was produced by seeing the worshippers of the deity in question, and by the superstitious fear that that deity was very powerful (which the worshippers attested) and was being outraged by neglect.

The religious history of Athens in later times is better known than that of any other Greek State, and may be taken as typical. Athens showed itself more hospitable to foreign cults than any other city, but it was also more hospitable to foreigners. There came into existence in Athens a bewildering multiplicity of gods; but the same process of multiplication went on in all Greek cities more or less, and the increase was greatest in those cities where the largest number of foreign visitors or residents was found.

There was, of course, in Athens (and doubtless in Greece everywhere) a formal law (in some less civilized places, perhaps, only a general principle and 'unwritten law'), confirmed at first by, and indeed originating from, a strong popular feeling, which forbade the introduction of strange or new gods. The penalty was death. The formal permission of the State was necessary before any new god could be introduced. But this law and this originally strong popular feeling were, in practice, far from effective. The following were the usual circumstances.

Commerce and intercourse brought to Athens, the Piræus, and other great trading centres large numbers of foreigners. As these foreigners con-
 curred to the increase of trade, the city which

desired to become a great trading centre was forced to encourage them; otherwise, in the keen competition of Greek trading cities, they would have been driven away to more hospitable places. Those strangers naturally desired to practise their own peculiar worship; and, obviously, a State which encouraged them must tolerate their practice of their rites. As early as the legislation of Solon this necessity was recognized by the law which is attributed to him. A body of foreigners who desired to conduct their native worship in Athens might form a religious society (*θιασος*); and the State granted to the society permission for the rules which it might lay down for its members, and toleration for its rites, so long as its aims and regulations did not conflict with the public law or tend to subvert peace and order in the city. The constitution of those religious societies was modelled on that of the State. The assembly (*ἐκκλησία*) of members (*θιασῶται*) framed rules, elected priests and other officials, who were responsible to it, and inflicted fines on disobedient members; the fines could be enforced by action before the legal tribunals of the State. New members were welcomed to these societies, not from the desire to affect the life or conduct or belief of the outside world, but because increase in numbers increased the wealth and influence of the body.

In strict legal effect the Athenian State merely tolerated, but did not encourage, the rites of the religious societies (*θιασοί*). Special leave was required from the Athenian Assembly (*Ἐκκλησία*) before any such society could build a sanctuary for itself. As regards the rites celebrated by the societies, if these seemed to the State to be unsuitable or disorderly, the primary law came into force prohibiting the introduction of new deities on pain of death. The ritual was permitted only to the foreigners who constituted the society; and when, as occasionally happened, an alarm was raised that Athenian citizens were going after those strange gods, the primary law was liable to be brought into operation, and the offending society with its gods expelled. Thus in B.C. 430 the strolling priest (*μυηταγέρτης*) who had initiated Athenian women into the rites of the Phrygian goddess was executed. But when the plague immediately afterwards broke out, owing to the overcrowding of the city due to the invasion of Attica by the Peloponnesian armies, an alarm arose, and the Delphic Oracle (which was consulted) attributed the epidemic to the wrath of the goddess at the murder of her priest, and ordered the State to atone by building her a temple. In consequence, the temple of the Mother-Goddess (*Mêtroôn*) was built at the Piræus.

The question arises, whether, and how far, the building of the *Mêtroôn* implied the introduction of the ritual of the Phrygian Mother-Goddess as part of the State religion. It was, of course, necessary that in her temple there should be a cultus of, and offerings to, the goddess: it was also obviously necessary that the ritual of the temple should be such as she loved. But that does not imply that the complete ritual and mysteries of the Phrygian deity were adopted and practised at the expense and under the sanction of the Athenian State. On the contrary, Demosthenes* holds up Æschines to public contempt because he had assisted at the performance of the Phrygian Mysteries; and he could hardly have done so if they had been part of the State religion. Probably the public worship in the *Mêtroôn* was selected and toned down by something of Hellenic restraint and order. But the Phrygian ritual was performed at the *Mêtroôn* by a private society of

* Demosth. *de Cor.* p. 259; cf. Aristophanes, *fr.* 478, *Leg.* 383, *Paz.* 10; Cicero, *de Legg.* ii. 15, 37.

Ὀρχεῶνες, and elsewhere by strolling priests and *Metragyrtaí*: and was still despised by the educated and the patriotic citizens, and discouraged by the State.*

The reason why the foreign rites spread was in Athens the same as elsewhere. The State religion, with its purely external show, did not satisfy the deep-lying religious or superstitious cravings of the people: the West turned to the more intense and enthusiastic religion of the East. While the educated classes in the later centuries were trying to unite Greek philosophy with Oriental ideas about the nature of God and his relation to man, the lower orders took refuge in the practice of the direct and undisguised Eastern rites. First naturalized in the Piræus among the lowest and most ignorant class of Athenians, who filled the harbour-town with the 'sailors' licence,'† those new rites, though scouted and despised by the more educated citizens, spread, and by degrees reduced the national worship to comparative neglect.

There was probably no period when Greece was not affected by such religious influence; but in Athens the movement assumed much greater strength through the influx of foreign merchants, attracted by the commercial supremacy and liberal policy of the city in the 5th cent. B.C.

Thus, e.g., the rites of Adonis were introduced before the outbreak of the Peloponnesian war in B.C. 431.‡ The festival was being celebrated at the time when the great expedition was setting sail for Sicily in B.C. 416, as Plutarch mentions (*Alc.* 18). The rites had come from Cyprus (and ultimately from Syria); one of the female conspirators in the *Lysistrata* of Aristophanes (performed B.C. 412) swears by the Paphian Aphrodite; and the ritual is ridiculed in the same play (389, 557). The chief ceremony was entirely non-Hellenic, with its vehement mourning for the goddess's dead favourite Adonis, the search for the body and its discovery, the planting of quick-growing plants in pots as the Garden of Adonis, the revivification of the god in the garden, and the joyous conclusion of the festival.

The Thracian rites of Kotytto were satirized by Eupolis in the *Bapta*, and the fragments of that comedy show how ugly was the character of the ritual; while the fact that Eupolis had Alcibiades in view in the play, suggests how far the rites had spread in Athens. Æschylus had previously described the Edonian worship of Kotys and Dionysos in a lost tragedy; but there the worship was foreign, though its place in the tragedy shows how great interest it had for the Athenians. The rites were of similar general character to the Phrygian ritual of Cybele and Attis or Sabazios.

Through the analogy of these cases the nature of the introduction of any foreign worship in the very early Hellenic period can be readily gathered from the associated myths and legends. The worship of Dionysos was essentially of the same kind and character as the Phrygian ritual. When it began to penetrate into Greece, through the influence of foreign settlers or a foreign tribe, it aroused the strongest opposition from the native and patriotic party, and from the government which represented the wisdom and long experience of the governing class. But it won its way through its hold on the masses; and supposed or real calamities occurring to those who had expressed contempt or made open resistance to the new god were taken as proofs of his power. The religion of Dionysos was gradually accepted over Greece, and the god himself was received as the

associate of Apollo in Delphi; but in general it rested on the devotion of the lower orders and the democracy,* and was resisted by the aristocracy and the governing classes. And even that religion was strongly affected by the Hellenic spirit; and its Greek ritual lost much of its Asiatic character and some of its most repulsive features.

(4) *Itinerant priests*.—The strolling impostors who dealt in religious and purificatory rites, and practised on the superstitions of the common people, have been mentioned above, and are often alluded to by the ancient writers. They generally claimed to be representatives of the old Orphic Mysteries, and to possess prophecies of Orpheus, Musæus, and other ancient seers. They had formulæ by which they could bend the gods to their will, and make them favour or injure whom they pleased; and this power they were ready to exercise in favour of any one who paid them. At a trifling cost, and without any personal trouble, one could gain forgiveness of sins, revenge on one's enemies, and a happy life in the future world. At other times the rites of the Mother-Goddess, or some other foreign ceremonial, formed the engine of their power. Some of them cured madness by ecstatic dances, either round the patient sitting in a chair or in company with him. *Orpheotelestai*, *Metragyrtaí*, etc., are common names for such impostors, and little distinction can be drawn between different kinds of them. They were generally of a very low class, and addressed themselves to the lower orders of the people. Their equipment was poor, and they often carried about the instruments of their ritual on an ass.†

Some of their customs are described by Apuleius, *Met.* viii. 25 ff. Among them was included a parody of the confession and expiation (see A, VII (6 f.), above): one of the strolling band (who are described as *Galli*) in a loud voice confessed publicly that he had been guilty of violating the law of the goddess in some way, and demanded from himself the just punishment of his crime (in the same way as the goddess is represented in the confessional steles as demanding expiation and penalty from the criminal). Thereupon the devotee took a whip and beat himself, till the blood flowed and the sympathy of the multitude showed itself in gifts.

(5) *Magic*.—The practices of such impostors as are described in the previous section are not always distinguishable from magic, into which they shade off by imperceptible gradation. Magic in the strict sense was always felt by the Greeks to be a foreign and specially an Oriental art, as is shown by the very name μάγος, a magician, literally a magian or Persian priest. The magical art was called γοητεία in reference to the loud howling utterance of magic formulæ.‡

In Homer, apart from the tale of the obviously Oriental Circe, little approach to magic appears except in the art of medicine, which was to a great extent learned from the older civilizations of the East, and which always assumes an uncanny character to a primitive people: charms (ἐρασιδαί) are uttered over wounds: Helena has a care-soothing drink, *nepenthe*; Aphrodite, a love-producing girdle; and Athena changes the form of men. But the use of all such arts is confined to gods and half-Divine heroes, and is therefore clearly distinguished from magic.

Later, the power of transforming men into other shapes, of making love-philtres, of stilling the

* Compare, for example, the story of Cleisthenes, the democratic tyrant of Sicily, who expelled the aristocratic hero Adrastus, and substituted *Dionysia* for Adrastus festivals (Herod. v. 67).

† Ar. Ran. 159; cf. Plat. Rep. ii. 364, Euthyd. 277 D; Theophr. Char. xvi.; Apul. Metam. viii. c. 27; Lucian, As. ch. 35.

† *ναυτικὴ ἀρχαία*, Eurip. *Heube*, 607.

‡ They are mentioned as common, Ar. Paz, 420.

winds, causing rain, etc., was believed to be attainable by human beings through arts which were strictly magical, and quite distinct from the process whereby (according to a primitive form of religious belief) priests through their prayers and rites could induce the gods to do those things.* The magical art whereby men could attain such powers was so well known and widely practised in Thessaly that the word *Thessalis* was used in the sense of 'witch.' Witches could draw down the moon (as Aristophanes says, *Clouds* 748), turn men into wolves, still the winds, and so on. This magic power was gained by *compelling* the gods; in other words, by appealing to a higher and supreme power to which the gods must bow. Magical art, then, was associated with an older pre-Hellenic religion and the Divine power of a more ancient system, and was always related to the Chthonian religion and the gods of the world of death.

The foreign origin of magic as practised in Greece must not be pressed too far. There can hardly be any doubt that it embodied elements of the primitive pre-Hellenic religion, which persisted in the form of popular superstition and occult lore after the public and acknowledged religion had assumed a new form.

The power of magic was most frequently invoked to attract reluctant persons to a lover, or to bring disease and death upon an enemy. Numerous examples of curses of this latter kind have been found in recent years, and have considerably enlarged our knowledge of the subject. They were usually scratched rudely on plates of lead, the proper metal, and buried in the ground, often in a grave, or in the *Temenos* of Chthonian deities. They were, however, also turned to a utilitarian purpose, and employed, e.g., almost like advertisements of lost or stolen property, the finder of which was subjected to a terrible curse if he failed to restore it to the owner. Such curses were intended to be seen by the thief, and must therefore have been publicly exposed; but even these seem to have been connected with Chthonian worship, and attached to the shrines of Chthonian deities. The penalty invoked most frequently in all curses was fever, the hidden fire of the gods of death, which burns up imperceptibly the strength and life of the sufferer.†

To this subject belong also the belief in the evil eye (which, while specially injurious to children and domestic animals, was dangerous to all) and other forms of baleful influence, and the use of charms and preservatives against them (*ἀπορροαία*). This belief was a debased form of the doctrine seen in Herodotus, that the gods are jealous of any surpassing success, or power, or beauty, or happiness in man, and interfere to destroy it; and that it is wise to propitiate them by voluntarily sacrificing part of one's good fortune or wealth: hence arose the common practice of guarding against evil by spitting, and by ugly or obscene gestures.

It would, however, serve no useful purpose at present to enumerate the various forms which magic and other superstitious practices assumed in the Greek world. For our purpose, the important point is, that they were alien to and in the long-run stronger than the true Hellenic religion, and helped to destroy it.

(6) *The worship of living men as deities.*—The deification of living men was not in itself alien to the spirit of Hellenism, but, on the contrary, was quite in harmony with the Hellenic satisfaction

and delight in human beauty and nobility. The worship of the dead as heroes was developed by Hellenism in a way that tended in that direction, as when the dead freebooter Philip was worshipped as a hero by the people of the Greek colony of Segesta (whom he had wantonly attacked in piratic fashion), simply on account of his personal beauty.* It was an easy step to identify the man of surpassing excellence, physical or mental, with a god either after his death or during his lifetime, when the perfection of human nature was regarded as Divine. Thus Pythagoras after death was worshipped under the form of Apollo Hyperboreios, Lycurgus as a god, Sophocles as Asklepios-Dexion. Sacrifices were offered to Brasidas and Hippocrates, and the term *θεῖος*, which properly denotes the offering to a god as distinguished from a hero,† is used about them. According to Plutarch, the first man to whom worship was paid as a god during his lifetime was Lysander (*Lys.* 18). It is significant that this first step was made among the Asiatic Greek cities. While there was nothing essentially non-Hellenic in such deification of human nature, yet the Hellenic sense of order and measure and grace long shrank instinctively from such a step as an excess; but, in Asia, Hellenism never was so pure as in Europe.

The Thasians honoured Agesilaos in a similar way. From the time of Alexander the deification of kings was customary, as a mere recognition of 'divine right.' Roman generals were often honoured by Greek cities with festivals and games, which implied deification.‡ Every Roman emperor in succession was worshipped; and it was inscribed on the coins and the engraved decrees of the greatest Greek cities as a special honour that they were temple-wardens (*νεωκόμοι*) of the emperors.

IV. RELIGION OF THE GRECO-ASIATIC CITIES. —In the Hellenized cities of Asia Minor, which had such importance in the early history of Christianity, all these forms of religious thought and act were busy simultaneously. The old Anatolian superstition retained no vestige of its early simplicity and its original adaptation to the needs of a primitive people, and had been brutalized and degraded by the exaggeration of its worst features and the importation of barbarian superstitions; but it was still strong, especially in the cities of the inner country. The Hellenic religion in its decaying forms was introduced and talked about by the Hellenes of the cities. Greek or Græco-Asiatic philosophy exercised a considerable influence on the thought of the educated classes in those cities, and many sayings and principles and scraps from it had passed into the popular language and conversation of society; but it had little influence on life, except in the way of producing disbelief in current religions and contempt for the most vulgar kinds of superstition. But on the great mass of the population all kinds of superstition and magic exercised a very strong influence, and were on the whole in harmony with the spirit of the Anatolian religion in its modern form.

As to the philosophic speculation current in those cities, in spite of its many faults and its obvious weakness as a practical force, the account given in § I makes it easy to understand how and why philosophy, though so depreciated and scouted by St. Paul, was, after all, his ally in a certain degree against the gross forms of vulgar superstition which were the only active religious force

* Compare, for example, Pausanias, ii. 34. 2 (at Methana in Argolis), viii. 38. 4 (at the spring Hagno on the Arcadian mountain Lycæus).

† See Wuenesch in *Corpus Inscript. Att.*, Appendix.

* Herod. v. 47.

† The distinction, however, was not strictly maintained: *θεῖος* were offered to Philip at Segesta.

‡ Cicero in *Verr.* ii. 21, 51, ad *Q. Fr.* i. l. 28, ad *Att.* v. 21. 7 Plutarch, *Lucull.* 23, *Flam.* 16.

in the cities. One can also readily understand why, to the educated observer in contemporary Graeco-Roman society, such as Sergius Paulus in Paphos, or the Stoic and Epicurean philosophers in Athens, he seemed to be a new teacher of philosophy, more or less impressive in himself, but not essentially different in type from scores of other lecturers who were striving to catch the ear of the educated world.

V. DECAY AND DEATH OF THE HELLENIC RELIGION. — While the religion of the country ceased to satisfy the wants of the people, the outward show became greater and greater. The Scholiast on Aristophanes (*Vesp.* 661) says that the year consisted really of only ten months, as two were occupied by festivals; and Strabo (vi. p. 429) says that finally at Tarentum there were more feasts than days in the year. But the spirit in which the rites had once been performed was now lost; people tolerated the duties as traditional ceremonial, and enjoyed the festivals merely as fine shows. The word ἀποσιῶσθαι, 'to discharge oneself of what is due to the gods,' came to denote careless and perfunctory performance. The duty of performing the public sacrifices was hired out to the lowest bidder. Zeus had to mourn the neglect into which he had fallen compared with the more recent gods (Lucian, *Icarom.* 24).

In truth, the Hellenic religion in its most typical form could not permanently maintain its hold on human nature. It was the evanescent, rare, and delicate product of a peculiar period and of special conditions in human history. It was the belief of an aristocracy of talents and opportunities, filled for the moment with the delight of activity and expansion, and the mere joy of living. It required the Hellenic City-State for the theatre of its development, and the existence of a class, supported and set free from mere drudgery by a huge enslaved population, but too numerous and too various in worldly circumstances to be only a narrow, privileged, and idle aristocracy of birth. But such conditions are rarely possible, and can never last long. Where an approximation to them occurs for a time in any considerable section of the population of any land, there results a tendency to a similar artistic development of religion. But there has never been elsewhere an experiment on such a scale as in Greece, where economic and social facts, natural surroundings, and relation to foreign nations, conspired to give a glory and an intoxicated consciousness of life to the small, energetic, busy, keenly competing cities of the Hellenes.

But even there the conditions soon ceased. Greece sank into its inevitable place as a third-rate province in some larger empire. It was essential to true Hellenism that it should be supported by the spirit of a self-governing people; its proud self-consciousness and joy in its own life and activity were inconsistent with servitude.

A mournful consciousness that the 'gods of Greece' were dead is often apparent in the later Greek literature, as, for example, in the well-known story preserved by Plutarch (*de Defectu Orac.* 17), that in the reign of Tiberius, when a ship sailing from Greece to Italy was among the Echinades Islands, off the Acarnanian coast, a voice was heard summoning by name a certain Egyptian pilot who chanced to be on board; and, when he answered the third summons rather reluctantly, the voice bade him announce when he reached Palodes that 'Pan the great is dead.'

It is a fitting conclusion to Hellenic religion that the Oracles became dumb; and especially that the Delphic Oracle, which had played so important and, for a time, so noble a part in guiding its development, lost first its influence and finally its

voice. As a force in history it had long lost all power; in the 1st cent. after Christ, Delphi and Ammon had given place to Chaldean astrologers, as Strabo and Juvenal agree in saying, and Plutarch wrote a treatise inquiring into the reason;* and in the 4th cent., when Julian sent to consult the Delphic Oracle, the last response was uttered for him: 'Tell the king, to earth has fallen the beautiful mansion; no longer has Phoebus a home, nor a prophetic laurel, nor a fount that speaks: gone dry is the talking water.'†

εἶπατε τῷ βασιλεῖ, χαμαὶ πέσε δαίδαλος οἰκία,
οὐκέτι Φοῖβος ἔχει καλὴν βίαν, οὐ μάντιδα δάφνην,
οὐ παγὰν λαλέουσαν: ἀπέσβετο καὶ λάων ὕδωρ.

The religious forms of Greece had served their day; they were now antiquated, and the world passed on to other forms. The alternatives presented to the people were Christianity or vulgar superstition, while a steadily diminishing remnant of the educated class clung to a philosophical form of paganism.

LITERATURE. — Besides the many general Dictionaries and works on Greek Antiquities, which usually include Religious Antiquities, such as Daremberg-Saglio's *Dict. des Antiquités gr. et rom.* (A-M published in 1902), Pauly-Wissowa, *Real-Encyclopædie* (A-Dem. in 1902), Smith (who includes Mythology under Biography, and Ritual under Antiquities), etc., the works devoted expressly to Greek Religion (under which some casual information is given about cults of Asia Minor), either generally or in some particular department or aspect, are extremely numerous, and complete enumerations unnecessary and hardly possible. The reader who looks at the discussion of any detail in a few of the following works will find in them sufficient indications to guide him to the vast literature (much of it not in itself valuable) that has accumulated round most of the chief topics. Owing to the capricious and subjective nature of the treatment (which can hardly be avoided), the information which is most important for an investigator from a novel point of view may, however, be passed unnoticed in several of the most elaborate works, and may be found only by looking into some of the older or the less important and honoured works. The old-fashioned and unpretending *Handwörterbuch der griechischen u. röm. Mythologie* of Jacobi (Coburg, 1835), with its bare and bald lists of references to ancient authorities, is still often most practically useful for the investigator, because there he gets facts unencumbered with opinions: in the voluminous and indispensable, and in many respects far more complete, work of Roscher, *Lexicon der griech. und röm. Mythologie* (still unfinished. A-Par. published in November 1902), facts are apt to be concealed by opinions: but the variety of writers in the *Lexikon* on cognate topics often supplies a useful diversity of opinion. Those who desire to study the history of modern opinion will find the following list, while inadequate, yet a sufficient introduction from which to make a beginning (only, as a rule, one work by any author is named: the most recent writers as a rule are given, and the older can be followed up from them) —

Maury, *Histoire des Religions de la Grèce ancienne*; Farnell, *Cults of the Greek States*, i. and ii. 1896 (sequel not ready in 1902); Foucart, *Recherches sur l'origine et la nature des Mystères d'Eleusis*, 1895, etc.; Preller-Robert, *Griechische Mythologie*, 1887; A. Mommsen, *Feste der Athener* (new edition of *Heortologie*); E. Curtius, *Gesammelte Abhandlungen*, etc.; Dieterich, *Nekyia*; Diels, *Sibyllinische Blätter*, 1890; Bouché-Leclercq, *Histoire de la Divination*; Usener, *Religionsgeschichtliche Untersuchungen*, 1889, *Griechische Götternamen*, etc.; Gruppe, *Die griech. Kulte u. Mythen*; Ridgeway, *Early Age of Greece*, 1901; many articles and other works by these writers, and also by S. Reinach, Miss J. E. Harrison, Wernicke, Wilamowitz, Robert, Maass, Kuhnert, Korte, Bloch, Drexler, Vitry, Perdrizet, Bernard, Cumont, Studniczka, Rohde, Tümpel, Marillier, Beurlier, Miss A. Walton, Krause, Keller, Stengel, Weinhold, Crusius, Hoffmann, Reichel, Thraemer, Toepfer, von Fritze, Ziebarth, Ziemann, Buresch, Dummiler, etc. Anrich, *Das Antike Mysterienwesen*, 1894; Wobbermin, *Religionsgesch. Studien*, 1890; Gardner, *Origin of the Lord's Supper*, 1894, etc., treat of the relation of the Mysteries to early Christianity: Anrich is the least imaginative; Gardner takes a more subjective view. Cf. also S. Cheatham, *The Mysteries* (Hula. Lect. 1896-97).

On the origin of rites and their relation to savage ritual, Botticher, *Baumkultus*; A. B. Cook, *Animal-Worship in the Mycenaean Age*; Frazer, *Golden Bough*² (nominally on Italian, really more on Greek), 1900; Mannhardt, *Wald- und Feldkulte*, etc.; Jevons, *Introduction to the History of Religion*, 1896 (totemistic). In Bursian's *Jahresbericht* from time to time reviews of the entire literature can be found.

* *Juv. Sat.* vi. 558; *Strab.* xvii. p. 1168; *Plutarch, de Defectu Oraculorum*.

† *Cedrenus*, i. p. 582, has preserved the oracle, which is perhaps the work of a triumphant Christian or of one of the last pagan philosophers.

On the religious ideas in the Greek poets and philosophers: Zeller, 'Entwicklung des Monotheismus bei den Griechen' in his *Vorlesungen und Abhandlungen Geschichtl. Inhalts*, 1865; *Ueber das Wesen der Religion*, Tübingen, 1845; Trendelenburg, 'Nothwendigkeit und Freiheit in der griech. Philosophie' in the second volume of his *Historische Beiträge zur Philosophie*; and many scattered references and discussions in the commentaries on the leading authors, and in the *Histories of Literature and Philosophy*. Verrall, *Euripides the Rationalist*, states well some of the difficulties which are caused by a too superficial view of the thought of Euripides; but the solution suggested suffers from the want of any attempt to estimate the place of that poet in the development of Greek thought, and the failure to emphasize that Euripides must be studied in relation to the preceding and succeeding writers.

STYLE OF SCRIPTURE.—

- i. Historical introduction.
- ii. Characteristics of Biblical style due to earliness of date or to the Semitic idiosyncrasy of the Hebrews.
- iii. Peculiarities of style purposely adopted upon occasion by all classes of Scripture writers.
- iv. Peculiarities of style for which a preference is shown by particular classes of Scripture writers.
- v. Conclusion. Observations on the critical and doctrinal significance of differences of style on the part of Scripture writers.

Literature.

i. HISTORICAL INTRODUCTION.—The question of the style of Scripture has formed the subject of discussion from a very early period. The diversity of forms in which prophecy, e.g., makes its appearance was a point of too much interest to escape the notice of the scribes. Hence we already encounter in the Talmud a saying which contains an excellent illustration of the formal differences that exist between prophecies. We refer to the words: 'Everything that Ezekiel saw, Isaiah also saw; but Ezekiel with the eyes of a rustic who has seen the king, Isaiah with the eyes of a citizen who has seen him' (*Hagiga*, 13b). The meaning is, that the descriptions found in the Book of Ezekiel are elaborated in much greater detail and sometimes developed at greater length than is the case in the Book of Isaiah (cf., e.g., Ezk 13-23 with Is 61-8). It may have been simply this diversity which marks the prophetic literature that gave rise to the judgment pronounced in *Sanhedrin*, 89a: 'No two prophets prophesy in the same style' (בְּכֵל קוֹלָם). Although this remark primarily concerned the differences disclosed by a comparison between Ob³ and Jer 49¹⁶. In the former of these passages we read 'The pride of thine heart (לִבְךָ) hath deceived thee,' but in the parallel passage we find 'Thy terribleness (אִתְּוֹנְתְּךָ) hath deceived thee.' Such differences between parallel passages of the OT as affect especially their linguistic colouring were not upon the whole unnoticed in antiquity. This may be seen from the *Massora magna* to Ex 20¹⁷ etc., or from the tractate *Sôphêrim*, 8, etc. (cf. Ed. König, *Einführung ins AT*, § 16).

Among early Christian writers no one has treated the question of the style of Holy Scripture in more detail than Adrianos in his *ΕΙΣΑΓΩΓΗ ΕΙΣ ΤΑΣ ΘΕΛΑΣ ΓΡΑΦΑΣ* (aus neuaufgefundenen Handschriften herausgegeben, übersetzt und erläutert, von Friedr. Goessling, Berlin, 1887). His whole book is devoted to the subject of the present article. He points out stylistic peculiarities of particular parts of the OT, e.g. the Psalter (§§ 99, 105). He also drew already the distinction between prose and poetry in Scripture. Taking the word 'prophecy' in the wider sense which it assumed in later times (cf. Ed. König, *Einführung*, p. 457), he remarked in the final paragraph of his work: 'It ought also to be known to the initiated that one kind of prophecy is composed in prose, like the writings of Isaiah and Jeremiah and their contemporaries, but another kind in regular measure adapted for singing (ἡ δὲ μετ' ᾠδῆς ἐν μέτρῳ), like the Psalms of the blessed David, and

the prophecy [Ex 15¹⁻¹⁸ and Dt 32 f.] contained in the second and fifth books of Moses' (§ 134).

This question of the style of Holy Scripture is of great importance in its bearing upon the judgment we form regarding its perspicuity and its inspiration. From this point of view, the style of the Biblical writers has been discussed by the authors we now proceed to name. Flacius Illyricus, in his famous *Clavis Scripturæ Sacræ* (1567, etc.; ed. Basileensis, 1628 f.), vol. i. Præfatio, fol. 3a, writes: 'Objiciunt illi [i.e. pontificii] de sensu ac intelligentia litem esse. Eam illi volunt ex Patribus peti oportere. At contra Augustinus et Hilarius contendunt ex collatione Scripturæ loca aut dicta obscuriora esse illustranda.' The other passages of his work which treat of style are 2³³, 420²⁵, 433³⁰, ('Lapsus styli ex alio in aliud') 489⁷, ('De plenitudine styli') 508²⁰, ('Stylus Paulinus'). These points, however, are much more fully discussed by Glass in his important *Philologia Sacra*, which went through a number of editions from 1623 onwards. To these questions he devotes the whole of the third and fourth tractates of the first of the five books into which his work is divided (4th ed. 1668, pp. 186-246). He sets out with the following statement: 'Inter rationes, quibus Belarminus Scripturæ Sacræ obscuritatem probatam dare vult, occurrit etiam illa quam a styli seu modi dicendi in Scripturis usitati ambiguitate desumit,' and he brings forward good arguments in refutation of this charge against Holy Scripture. The same point of view has been since then considered by many scholars, and is touched upon by Sanday in his admirable Hampton Lectures on *Inspiration* (1st ed. 1893, p. 403), and C. A. Briggs in his comprehensive *General Introduction to the Study of Holy Scripture* (1899, p. 328). This highest point of view from which the question of the style of Scripture has to be considered, is not, however, the only one. It is a question which is not only an eminently religious one, but of importance as regards the history of culture. For it is an extremely interesting inquiry how far the art of description by means of language was developed among the Hebrews and the writers of the NT. In what follows we shall endeavour to satisfy both interests, the religious and the secular.

ii. CHARACTERISTICS OF BIBLICAL STYLE DUE TO EARLINESS OF DATE OR TO THE SEMITIC IDIOSYNCRASY OF THE HEBREWS.—The most important of these phenomena, arranged according to their noteworthy and frequency, are the following:—

1. We have only to proceed a short way in our reading of the first book of the Bible to be struck with the great frequency with which the word 'and' occurs. The opening sentence of Genesis is followed by the statement 'And the earth was without form and void' (*tôhû wā-bôhû*). In like manner, the third sentence 'And darkness was upon the face of the deep' is tacked on by 'and,' while the fourth runs 'And the spirit of God moved upon the face of the deep.' And so in this same chapter there is a direct succession of some sixty sentences, all beginning with 'and.' This preference for the copulative conjunction may be observed no less in the frequent *Polysyndeton* which characterizes the style of Scripture, as, for instance, in 'Shem and Ham and Japheth' (Gn 9¹⁸); or 'Elam and Asshur and Arpachshad and Lud' (10²²); or 'thou nor thy son nor thy daughter nor thy manservant nor thy maidservant nor,' etc. etc. (Dt 5²⁴); or 'Thou shalt not kill, neither shalt thou commit adultery, neither shalt thou steal, neither,' etc. etc. (5¹⁷⁻²¹ 6⁵). Nay, this preference for 'and' went so far that we even find new books of the OT commencing with 'and.' This is the case not only with the five books of the Pentateuch, but also

with Joshua, Judges, Ruth, etc. It cannot be inferred from this form of opening that these books once formed parts of a continuous work, for the Book of Esther begins with the same formula. 'And it came to pass,' although its subject is an isolated episode. The correct view of this phenomenon is that the expression 'And it came to pass' was so much in use that one came to write it from force of custom and almost unconsciously. On this same account, the fact that the Book of Ezekiel opens with 'And it came to pass' is no indication that something has dropped out before this formula, as is contended by Budde and others (see the controversy on this point between Budde and the present writer in *Expos. Times*, xii. [1901] 39 ff., 375 ff., 525 ff., 566 ff.; xiii. 41 ff., 95). The expression 'And it came to pass' had become as common as the phrase 'And it shall come to pass,' with which circumstantial statements of time, etc., were introduced (cf. Is 2: 'And it shall come to pass in the last days that,' etc.).

When we compare even so simple a writer as 'the Father of History,' this Hebrew fashion of connecting sentences is striking. After giving his own name and dividing mankind into the two categories of Hellenes and barbarians, Herodotus begins his narrative with the following sentences: 'Now the learned among the Persians say that the Phœnicians were the authors of the discord (namely, between the Greeks and other peoples). For after they (the Phœnicians) came from the sea that is called the Red Sea to this (the Mediterranean) sea, and settled in the land which they still inhabit, they immediately devoted themselves to great enterprises by sea. But in the course of transporting Egyptian and Assyrian goods, they frequently visited Argos as well as the rest of the country.' There is no need for proceeding further with the translation of Herodotus' *History*, in order to show the striking contrast in structure and connexion presented by its opening sentences and those of the Bible. The numerous principal sentences which are co-ordinated in Gn 1st, and the stereotyped 'and' by which they are connected, have ceased, as a rule, to strike us, because from our earliest days we have been used to this characteristic of the Biblical narratives, and this fashion of writing, which is peculiar to Biblical history in the widest sense, was also very well calculated to impress our minds. For this way of adding principal sentence to principal sentence, and of connecting them for the most part by 'and,' is the childish device which always meets us at the naive stage in the history of culture. We encounter it in the childhood of the individual, we find it amongst the uneducated masses of the people, and it shows itself at the primitive stages in the development of the human race. For instance, 'The Homeric speech loves the co-ordinating of sentences' (G. Curtius, *Gr. Gram.* § 519; Hentze, *Parataxe bei Homer*, 1889), and it is very interesting to note how the number of conjunctions in the later Hebrew and other Semitic languages underwent increase: for illustrations see Ed. König, *Historisch-Comparat. Syntax der heb. Sprache*, §§ 377-396r).

There are other four principal marks of the simple method followed by Hebrew writers in grouping their ideas and their sentences. — (α) There are such forms of expression as 'Let them be for signs and for seasons and for days and years' (Gn 1st), words which mean, in all probability, 'Let them serve as signs for seasons,' etc. This is the same simple method of co-ordinating ideas as is familiar to us from the 'pateris libamus et auro' of Vergil, *Georg.* ii. 192, and is commonly known as *Hendiadys*. Other instances of it in Scripture are: 'a city and a mother in Israel,' i.e. a mother-city, a metropolis (2 S 20th); 'feasting and glad-

ness' = feasting of gladness (Est 9th); 'I heard whispering and a voice,' i.e. whispering of a voice (Job 4th); 'changes and war' = changes of war (Job 10th); 'glory and strength' = glory of strength (Ps. 29th 96th); 'time and judgment' = time of judgment (Ec 8th); 'cloud and smoke' = cloud of smoke (Is 4th); 'trouble and darkness' = dark, i.e. irremediable, trouble (Is 8th). In like manner the Heb. 'consumption and determination' is rightly changed in EV to 'consumption, even determined' (Is 10th 28th), and 'end and expectation' is correctly replaced by 'an expected end' (Jer 29th). The same co-ordination of ideas meets us in 'the roll and the words' for 'the roll of the words' (Jer 36th). An illustration of the same fondness for simple co-ordinating of ideas is found also in 'her hand . . . and her right hand' (Jg 5th); or 'my hand . . . and my right hand' (Is 48th); or 'the LORD . . . and his glory' (Is 60th); or 'the LORD . . . and his strength' (Ps 105th). This mode of expression is known as καθ' ὅλον καὶ μέρος, and a counterpart to it has been recently noted by the present writer in the words 'Who will bring me into the strong city? Who will lead me into Edom?' (Ps 60th 108th; cf. Ed. König, *Fünf neue arabische Landschaftsnamen im AT*, 1902, p. 33 f.). — (β) There is the frequent throwing in of the interjection 'Behold!': e.g. 'And (God saw . . . and, behold,' etc. (Gn 1st 6th 8th 18th 19th etc.; cf. Ed. König, *Heb. Syntax*, § 361g). — (γ) We have the very frequent employment of *direct speech*. The list of examples of this begins with the words 'Let there be light' (Gn 1st); it is continued in 'Let there be a firmament,' etc. (v. 6), 'Behold, I have given you,' etc. (v. 22), and so on it goes (cf. *Syntax*, § 377). The NT also shares abundantly in this preference for the *oratio directa* (Mt 1st 2nd 23rd etc.). — (δ) The fourth mark of the naive simplicity of style which is wont to be employed by the Biblical writers may be observed from the following instance: 'Till thou return unto the ground . . . for dust thou art, and unto dust shalt thou return' (Gn 3rd). Here we have first a destiny indicated for man, then the reason for this, and finally the destiny itself is once more repeated. Many of our readers must have noticed the same movement of thought in the conversation and letters of persons belonging to the lower classes. This process whereby one returns to the original starting-point is called *Palindromy*, and there are various species of it. Here are some other instances of the class represented by Gn 3rd: 'And it repented the LORD that he had made man, etc., and the LORD said, I will destroy, etc., for it repenteth me that I have made them' (Gn 6th); 'The earth also was corrupt, etc., for all flesh had corrupted,' etc. (v. 11th); 'The LORD scattered them abroad, etc. Therefore is the name of it called Babel, etc., and from thence did the LORD scatter them abroad,' etc. (11th); 'Every beast of the forest is mine, etc., If I were hungry, I would not tell thee, for the world is mine' (Ps 50th 12th); 'O that my ways were directed to keep thy statutes, then shall I not be ashamed when I have respect unto all thy commandments' (119th); 'Surely he hath borne our griefs, etc., for the transgression of my people was he stricken' (Is 53rd); 'The LORD said, etc., because I have spoken it' (Jer 4th); 'Because ye multiplied, etc., because of all thine abominations' (Ezk 5th). — Another species of *Palindromy* is represented by the words 'The land was not able to bear them, that they might dwell together; for their substance was great, so that they could not dwell together' (Gn 13th). There the course of ideas turns from the fact to its cause, and then returns to the fact or the consequence. The same mental movement may be observed in: 'Judah, thou art he whom

thy brethren shall praise; thy hand shalt be in the neck of thine enemies; thy father's children shall bow down before thee' (Gn 49⁸); 'The nakedness of thy mother shalt thou not uncover; she is thy mother, thou shalt not uncover her nakedness' (Lv 18⁷); and the same is the case in v. 15 'My strength is dried, etc., for dogs have compassed me, etc., I may tell all my bones' (Ps 22¹⁵⁻¹⁷); and in Is 53¹¹. 'By his knowledge, etc., Therefore will I divide him a portion with the great, etc., because he hath poured out his soul unto death.' Essentially the same phenomenon recurs in 1 Ch 9⁴⁴ 'Azal had six sons, and these are their names: Azrikam, etc., these were the sons of Azel.'—A third species of *Palindromy* is made up of instances like 'God created man in his own image, in the image of God created he him' (Gn 1²⁷); 'Make thee an ark, etc. Thus did Noah, according to all that God commanded him, so did he' (6¹⁴, 22²⁰); 'Thou shalt speak all that I command thee, etc., and Moses and Aaron did as the LORD commanded them, so did they' (Ex 7²⁷, 6^{ab}). The same mode of expression meets us in Ex 12^{2ab}, 28, 30, 39², 44, 40¹⁸, Lv. 4²⁰, Nu 1⁴, 5⁴, 8²⁰ etc., Ec 1⁶, Dn 8¹⁷, 20 etc. (see Ed. König, *Stilistik*, etc. p. 171 f.).

Another feature that strikes us in the structure of clauses in the OT presents itself in 'I am the LORD thy God which have brought,' etc. (Ex 20²). Other examples of the same fashion are Dt 5^{2b} ('all of us')³, Jg 13¹¹ ('the man that speaketh'), 1 S 25³⁸ ('and thou which hast'), Ps 71²⁰ ('thou which hast'), Neh 9⁷ ('thou art the God who didst'), 1 Ch 21¹⁷ ('I it is that have sinned').

2. It requires no great acquaintance with the language of Scripture to enable one to recall such forms of expression as the following: 'Joseph was the son of his old age' (Gn 37³), i.e. he was born when Jacob was advanced in years, forming thus a contrast to the 'children of youth,' i.e. children begotten by a man at the period of his full strength (Ps 127⁴, cf. Gn 49³). Where we now find in the EV the expressions 'son(s) of' or 'children of,' the Hebrew is בן or בנות, and their use constitutes such a characteristic feature of the style of Scripture that it deserves somewhat fuller illustration.

—(a) The בן (ben-) is sometimes retained in the EV: e.g. Ben-ammi (Gn 19³⁶), i.e. 'belonging to my people'; Ben-oni (35¹⁸), i.e. 'born in my sorrow'; Boanerges (Mk 3¹⁷), i.e. 'sons of thunder.' Seven proper names show the Aramaic form of בן-, namely bar-: Bartholomew (Mt 10³), Bar-jonah (16¹⁷), Barabbas (27¹⁶), Bartimæus (Mk 10⁴⁶), Barsabbas (Ac 1²³), Barnabas (4³⁶), Barjesus (13⁶).

—(β) בן or בנות are reproduced by 'son(s) of' or 'children of' in the following expressions: 'son of his old age' (Gn 37³); 'thy mother's sons,' or the like, i.e. brothers who have not only the same father but the same mother (Gn 27²⁰, Jg 8¹⁹, Ps 50²⁰, Ca 1⁶); 'children of his people' (Nu 22⁵); 'children of Sheth' (24¹⁷), i.e. friends of war tumult [according to Sayce, *Expos. Times*, xiii. 64^b, the 'Sutu], at least Jeremiah in the parallel passage (48⁴⁵) speaks of 'sons of tumult' (בְּנֵי שֹׁמֶן); 'children (son, sons) of Belial' (Dt 13¹⁸ [RV 'base fellows'], Jg 19²², 20¹³, 1 S 21¹², 10²⁷, 25¹⁷, 1 K 21¹⁰, 13, 2 Ch 13⁷), i.e. worthless persons (cf. Ed. König, *Syntax*, p. 309, n. 1 [against Cheyne]), cf. 'children of wickedness' (2 S 3³⁴, 7¹⁰, 1 Ch 17⁹); 'son of wickedness' (Ps 89²⁰); 'children of iniquity' (Hos. 10⁶); 'son of Hinnum' (?=wailing; Jos 15⁸, 18¹⁶, Jer 7³¹ etc.); 'son of the morning' (Is 14¹²); 'children of strangers' (26⁶); 'sons of strangers' (60¹⁰) = 'strangers' (Ezk 44⁷ etc., Ps 18⁴⁴, 144⁷, 11, Neh 9²); 'children of whoredom' (Hos 2⁴); 'children of the needy' (Ps 72⁴); 'children of youth' (Ps 127⁴); 'children of the province' (Ezr 2⁴); 'children of the captivity' (4¹⁵, 6³⁴, 10⁷, 15); 'son of man' (Nu 23¹⁰, Job 16²¹, 25⁶, 35⁸, Ps 84⁸⁰, 144³, 146³, Is 51¹², 56²,

Jer 49^{18b}, 33, 50⁴⁰, 51⁴³, Ezk 2¹ etc., Dn 7¹³, 8¹⁷, Mt 8³⁸ etc.); 'sons (=disciples) of the prophets' (1 K 20³⁸, 2 K 2³ etc., Am 7¹⁴); 'children' = 'disciples' (Mt 12²⁷); 'sons' = 'disciples' (Lk 11¹⁰); 'son(s)' or 'children' = 'citizen(s)' or 'adherent(s)' (Mt 8¹³, 13³⁸, Ac 13¹⁰); 'children of (i.e. those that prepare) the bride-chamber' (Mt 9¹⁵, Mk 2¹⁹, Lk 5²⁴); 'son(s)' or 'children' = 'belonging to' or 'sharing in' (Mt 23¹⁵, Lk 10¹⁶, 16⁸, 20³⁴, 36, Jn 12³⁶, 17¹², Ac 3²⁵, 2 Co 6¹⁸, 1 Th 5⁵, 2 Th 2³, Eph 2⁵, Col 3⁴).—(γ) בן or בנות are paraphrased in the following passages: Gn 5³² 'Noah was five hundred years old,' lit. 'a son of five hundred years' (and so in many similar passages); 15² 'the steward,' for the possessor or heir; 29¹ 'the people (lit. sons) of the East' (cf. Jg 7¹², 8¹⁰, 1 K 5¹⁰, Job 1³, Is 11¹⁴, Jer 49²⁸, Ezk 25¹⁰); 'his ass's colt' (Gn 49¹¹); 'the bullock' lit. 'son of the cattle' (Lv 1⁹); 'young' lit. 'son(s) of' (1¹⁴, 43, 14, 5⁷ etc.); 'their people' lit. 'children of their people' (Lv 20¹⁷, cf. Nu 22⁵); 'rebels' lit. 'sons of refractoriness' (Nu 17¹⁰); 'meet for the war' lit. 'sons of might' (Dt 3¹⁸ AV; RV 'men of valour'); 'men of valour' or the like (Jg 18²⁴, 1 S 14²², 18¹⁷ etc.); 'worthy' (Dt 25²); 'breed' (32¹⁴); 'surely die' lit. 'son of death' (1 S 20^{31b}, 26^{10a}, 2 S 12⁵, cf. Ps 79^{11b}, 102^{20b}); 'wicked men' lit. 'sons of wickedness' (2 S 3^{34a}); 'hostages' lit. 'sons of pledges' (2 K 14¹⁴ || 2 Ch 25²⁴); 'young' lit. 'son of' (2 Ch 13³); 'kids' lit. 'sons of' (35⁷); 'those that had been carried away' lit. 'sons of the exile' (Ezr 8¹⁵); 'sparks' lit. 'sons of flame' (Job 5⁷); 'a man' lit. 'son of man' (16^{21b}); 'lions' whelps' lit. 'sons of pride or savagery' (28⁸) = 'children of pride' (41³⁴); 'arrow' lit. 'son of the bow' (41²⁸); 'arrows' lit. 'sons of his quiver' (La 3¹³); 'young' lit. 'son of' (Ps 29^{6b}, 147⁹); 'any of the afflicted' lit. 'son of affliction' (Pr 31¹); 'appointed to' lit. 'sons of' (31¹⁸).

This characteristic of Scripture style attains all the greater prominence because the same derived usage is frequently met with in the case of the term 'daughter.' For instance, 'daughters of Heth' stands for Hittite women (Gn 27⁴⁶). The same usage appears in 28¹, Nu 25¹, Jg 11⁴⁶; 'the daughters of Shiloh' (Jg 21²¹); 'daughters of Dan' (2 Ch 24¹⁴); 'daughter of Tyre' (Ps 45¹²) = 'princess of Tyre'; 'daughters of Judah,' etc. (Ps 7⁷, Ca 1³⁶); 'daughters of Zion,' etc. (Is 3¹⁶ etc., Jer 49³⁴, Ezk 16²⁷); 'daughter of Zion' = 'inhabitants of Zion' (2 K 19²¹, Ps 9¹⁵, 137⁸, Is 1¹⁰, 30³², 16¹, 22⁴, 23¹⁰, 12, 37²², 47^{1a}, 52², 62¹, Jer 4¹¹, 31, 6¹, 14, 23, 8¹¹, 19, 21-23, 9⁶, 14¹⁷, 46¹¹, 19, 24, 48¹⁵, 50², 51²³, La 1¹⁶, 15, 21⁴, 4¹, 8, 10¹, 13, 15, 18, 34⁵, 48, 6, 10, 21¹. [on 'company,' etc., Ezk 27^{6b}, see Ed. König, *Heb. Syntax*, § 306m], Mic 1^{15b}, 48, 10, 13, Zeph 3¹⁰. [against Hommel's art. in *Expos. Times*, 1899, p. 99 f., see the present writer's *Fünf neue arab. Landschaftsnamen im AT*, 1902, p. 58] 14, Zec 2¹¹, 14, 9⁹ [on Is 1⁸ etc., see esp. *Stilistik*, p. 32^{10a}]; 'daughter of Belial,' i.e. of worthlessness (1 S 1^{16a}); Hos 1²; Mic 5⁷; 'daughter of a strange god,' i.e. a female worshipper of him (Mal 2^{11b}); 'the daughters of music' = musical tones (Ec 12⁴); θυγατέρες 'Ααρών (Lk 1⁵) = remote descendants of Aaron; and a similar sense is conveyed by 'daughter of Abraham' (13¹⁶), 'daughters of Jerusalem' (23²⁸), ἡ θυγάτηρ Σιών (Mt 21⁵, Jn 12²⁸), θυγάτηρ θεοῦ (2 Co 6¹⁶) = one belonging to the Kingdom of God.

A similar characteristic of the style of Scripture is its fondness for *employing substantives for adjectives*. There are numerous examples of this, even leaving out of account the instances in which the phenomenon disappears in the EV. Thus we find 'jewels of silver,' etc. (Gn 24³⁸, Ex 3²² etc.); 'men, etc., of truth' (Ex 18²¹, Pr 12¹⁹, 22^{21a}). 'Few in number' is lit. 'men of number' (Gn 34³⁰, Dt 4²⁷,

* On this expression in all its senses, see art. SON OF MAN in vol. iv.

1 Ch 16²⁸, Job 16²⁸, Ps 105¹³, Is 10¹³, Jer 44^{28a}, Ezk 12^{10a}. Cf. 'the king's court' (Am 7¹³); 'city of confusion' (Is 24¹⁰); 'an iron pen' (Job 19²⁴); 'instruments of death' (= 'deadly,' Ps 7¹²); 'sorrows of death' (Ps 116⁸, cf. Rev 13^{3, 12} *παλῶν τοῦ θανάτου*); 'sacrifices, etc., of righteousness' = just or right or righteous sacrifices, etc. (Dt 33¹⁹, Job 8⁶, Ps 4^{1, 2} 23⁵ 51¹⁹ 118¹⁸, cf. 119^{7, 82, 106, 160, 164}, Pr 8²⁰ 12²⁸ 16²¹, Is 1²⁸ 61^{3, 10}, Jer 50⁷, Am 6¹²); 'habitation of justice' (Jer 31²²); 'Branch of justice' (33¹⁵); 'garments of salvation' = garments which diffuse healing (Is 61¹⁰); 'God, etc., of my salvation' (1 Ch 16²⁸, Ps 13^{28, 46} 24⁵ 25⁵ 27⁹ 65⁵ 68²⁰ 79⁹ 85⁴, Mic 7⁷, Hab 3¹⁸); 'y' of strength' is at times replaced by 'strong' (Jg 9⁶¹, Jer 48¹⁷, Ezk 19^{11, 14} 26¹¹, Ps 61³ 71⁷ 89¹⁰), or 'mighty' (Ps 68³⁴), or 'loud' (2 Ch 30²¹); but we find, on the other hand, 'God of my strength' (Ps 43³), 'the rock of my strength' (62⁷), 'rod of thy strength' (110², cf. 132⁹), 'pride of your power' (Lv 26¹⁹), 'fury of his power' (Dn 8^{6b}), 'gall of bitterness' (Ac 8²⁵), *πᾶσα ψυχὴ ῥωτῆς* = 'every living soul' (Rev 16³).

Another of the peculiarities which belong to the Semitic idiosyncrasy of the Scripture narratives is the frequent introduction of *genealogies*. The interest was strong in the correct preservation of ancient tradition, and thus the genealogical connexions of families and tribes were noted. Hence we find many genealogical trees in the historical books of the Bible. A number of them form considerable lists, e.g. Gn 4^{17a}, 5^{3a}, 10^{2a}, 11^{10a}; many others are shorter, e.g. Jos 7¹⁸, Ru 4¹⁸⁻²², 1 S 1¹ 9¹ 14⁴⁹⁻⁵¹ etc., 1 Ch 1^{1a}, Ezr 7¹⁻⁵ ('Ezra, the son of Seraiah, the son of Azariah, the son of Hilkiah, the son of Shallum, etc., this Ezra went up from Babylon'), Neh 11², Est 2⁶, Job 32¹, Mt 1¹⁻¹⁷ Lk 3^{23a}.

A similar interest accounts for the arrangement of the Book of Genesis. It is an extremely noteworthy feature of its structure that the narrative regarding the main line of the human race, i.e. the citizens of the Kingdom of God, stands, like the trunk of a tree, in the centre of the whole. The branches of the race, which diverged from the main stem, are regularly dealt with at the outset briefly, but a detailed enumeration of the successive representatives of the main stem follows. Thus the final compiler, i.e. the author proper of the first book of the Bible, advances from the outside inwards, or from the remote to the near in chapters 4 (the Canites) and 5 (the Sethites, from whose line sprang Noah, who carried the human race over the period of the Flood and ensured its perpetuation thereafter); in 10¹⁻²⁰ (Japhethites and Hamites) and vv. 21-32 (Semites); in 11¹⁻⁹ (the human race, which rises in revolt against God in building the Tower of Babel) and vv. 10-25 (the Semites, and, above all, the Hebrews); in 11²⁶⁻³² (the Terahites in general, cf. the supplementary list in 22²⁰⁻²⁴) and 12^{ff.} (Abraham). In like manner the collateral branches of the descendants of Abraham are treated of in 25¹⁻¹⁸, but the main stem in v. 19^a; and the descendants of Esau are given in ch. 36 before the commencement of the history of which Jacob is the central figure (37^{1a}). The principal line is always set forth last, because it forms the starting-point for the earthly mediators and heirs of the future salvation.

An interesting light is thrown upon the social conditions under which the Biblical writers lived, by the phenomenon we now proceed to describe. There are two sets of passages in which 'thou' alternates with 'my lord,' or 'I' with 'thy servant' (or 'thy handmaid'). The first set finds its earliest illustration in 'Hear us, my lord' (Gn 23⁶), and recurs, e.g., in 'The LORD said unto my lord, Sit thou,' etc. (Ps 110¹ etc., cf. *Stilistik*, p. 244). Thus persons in a subordinate position

addressed their superiors as 'thou,' but frequently interjected 'my lord,' in order to express their subjection. In the same way they took care that the 'I' with which they introduced themselves should often alternate with 'thy servant.' E.g. 'If now I have found favour in thy sight, pass not away from thy servant' (instead of 'from me,' Gn 18³). Similarly, 'thy servant' and 'unto me' alternate (Gn 19¹⁶), or 'me' and 'thy servant' (Ps 19^{12b, 13a}), or 'I' and 'thy servant' (Dn 9^{16a, 17a}). Further, 'I' is resolved into 'your servant' in Gn 18⁵ and 19², where we read 'Turn in, I pray you, into your servant's house.' Again, 'we' alternates with 'thy servants' in 'We are true men, thy servants are no spies' (Gn 42¹¹); or 'thy servants' has its parallel in 'our' (v. 18); cf. 'Prove thy servants . . . and let them give us pulse to eat,' etc. (Dn 1¹² etc.), and the Aram. sentence 'Tell thy servants the dream, and we will show the interpretation' (2⁴ etc., cf. *Stilistik*, p. 252).

Another characteristic feature of Biblical style may be regarded at one and the same time from the *national* and the *religious* point of view. We refer to the frequent use of blessings and cursings. The series of blessings opens with Gn 1², and is continued in v. 28²⁸ (blessing of the beasts, of man, and of the Sabbath) 5² 9^{1-3a}, 12³ 14¹⁹ 25¹¹ 28¹ 35⁹ 47^{7, 10} 48¹⁵ 49²⁸, Ex 39⁴³, Nu 23^{7a}, Dt 33^{1a}, 1 K 8^{14, 55}, 2 Ch 6³. To the same class belongs also the frequent exclamation 'O the happiness of Israel!' or the like (Dt 33²⁹, 1 K 10⁷, Ps 1¹, and so on to Ec 10¹⁷); Mt 5⁴⁴ 'Bless them that curse you'; Lk 24^{40a}. 'bless' = bid farewell; Mt 21⁹, Mk 11^{9a}, Lk 19³⁸, Jn 12¹³, cf. Ps 118²⁶. The series of cursings begins with Gn 3¹⁴ (the curse pronounced upon the serpent), and is continued in v. 17¹⁷ 4¹¹ 9²⁵ 12³ 27²⁸ 49⁷, Nu 5^{18a}, Dt 27^{15a}, 28^{14a}, Jos 6³⁸ 9³, Jg 5²³ 21¹⁸, 1 S 14^{24, 28} 26¹⁹, Job 3⁸ ('cursers of the day'), Ps 119²¹, Pr 3³³ 28²⁷, Jer 11³ 17⁵ 20^{14a}, 48¹⁰, Mal 1^{14a}. To this list must be added the instances in which a 'Woe!' is addressed to any one: Nu 21²⁹ ('Woe to thee, Moab!') 24¹⁴, 1 S 4^{7a}, Ps 120⁵, Pr 23²⁸, Ec 4¹⁰ 10¹⁶, Is 3^{9, 11} 6⁵ 24¹⁶, Jer 4^{13a}, Ezk 16²³ etc., Hos 7¹³ 9¹², Mt 11²¹ 18⁷ etc., Mk 13¹⁷ 14²¹, Lk 6²⁴ etc., Jude 11, Rev. 9^{12a}, 12¹² etc. This form of expression is connected partly with the ancient custom of blessing one's children or friends and cursing one's enemies (Nu 22⁶ etc.), and partly with the habit of the religion of Israel of postulating happiness for the godly and punishment for transgressors.—By the way, these last two categories possess certain features of special interest. The series of blessings has its first representative as early as the narrative of the Creation, that of cursings does not open till after man's first sin. The Psalter, again, contains twenty-five examples of the phrase 'O the happiness!' (cf. *Syntax*, § 321g), but only once (120⁵) the exclamation 'Woe!' The list of blessings is longer than the other, and does not end till the last chapter of the last book of the Bible. Its last utterance is 'Blessed are they that wash their robes [or do his commandments],' Rev 22¹⁴.

iii. PECULIARITIES OF STYLE PURPOSELY ADOPTED UPON OCCASION BY ALL CLASSES OF SCRIPTURE WRITERS.—These devices will be set forth in such a way as to have regard to the interests, successively, of the human intellect, the will, and the feelings.

1. The Biblical writers aim at clearness, and this quality is not prejudiced (a) by the use, which is common to man, of Metonymy and Synecdoche.

Noteworthy instances of **Metonymy** are the following: 'seed' stands for descendants in Gn 3¹⁵ etc.; 'the earth,' as the source of its products, is put for the latter in 'In sorrow shalt thou eat it' (i.e. the earth=its products), 3^{17b}, cf. Is 1^{7b}. *Nāḇē*, 'prophet,' is correctly rendered 'prophecy' by AV in Dn 9^{24b}; but 'prophet' in Mt 5¹⁷ and Lk 16^{28, 31}

has the same meaning; and 'Moses' stands for the Law in the expression 'Moses is read' (2 Co 3¹⁵). 'Tongue' became naturally an expression for speech (Gn 10⁴ etc.). 'Lips' stands in Hos 14²⁰ for the confession of sin proceeding from the lips; the prophet means to say, 'We will offer as sacrifices of calves the confession of our sins.' Similarly, 'throat' means in Ps 51⁶ conversation. 'Hand' is often equivalent to activity (Ex 31⁹ etc. 'by a mighty hand'). 'Horn' represents power or rule (1 S 2¹ etc., 'My horn is exalted,' etc.). In parallelism to 'peace,' 'sword' stands for war (Mt 10³⁴). 'Yield unto thee her strength' (Gn 41²) is = give the product of her strength, i.e. her fruits. 'Lest ye be consumed in all their sins' (Nu 16³⁶) = through the consequences of their sins, i.e. the punishment for them. In 'dust thou art' (Gn 31¹³), dust = produced from dust (27). We encounter the same Metonymy in 'dust and ashes' (18²⁷ etc., Sir 10²⁴). 'Wood' or 'tree' is a term for the cross in Ac 5³⁰, Gal 31² etc.—When we read 'Two nations are in thy womb' (Gn 25²³), we must plainly understand this to mean the ancestors of two nations. In the same way 'covenant' in Is 42⁵ stands for the mediator of the covenant, and 'blessing' in Gn 12²⁰ for the formula wherewith the blessing is invoked.—The *possessor* naturally often stands for the *possession*. Thus Lebanon is put for the cedars (Is 10^{40b}) which symbolize the host of the Assyrians; and the cup stands for its contents in 1 Co 11²³ etc. 'Heart and reins' (Ps 7⁹ 26³ etc.) refers to thoughts and volitions. In Mk 5²⁸ ἀπὸ τοῦ οἴκου τοῦ ἀρχισυναγωγίου means 'from the house of the ruler of the synagogue.' So 'the hour' (Mk 14³⁰) might stand for the events of that period of time.—A *mark of distinction* points impressively to its bearer in 'A sceptre shall rise out of Israel' (Nu 24¹⁷). So also in Is 23³ the Shihor, i.e. the Nile, stands for Egypt.—The *contents* may stand for the *container*: for instance, in Ps 91¹ 'the gates of the daughter of Zion,' the daughter, i.e. the population, of Zion must be the equivalent of Zion itself. In like manner 'testament' (2 Co 31⁴) = book of the covenant, and 'prayer' (Ac 16¹⁸) = place of prayer.

Characteristic instances of *Synecdoche* are such as the following: 'the Jebusite,' etc. (Gn 10^{16a}); 'and the Canaanite was then in the land' (12⁶); 'the man' (Ps 11³² etc.). This employment of a *part for the whole* may be seen also in other expressions. 'Father' is equivalent to all kinds of ancestors (Gn 47⁹, Ex 12³, Nu 14¹⁸, Ps 22³ 39¹³ 106⁶ etc.). Again, in Abraham's words to Lot 'we are brothers' (Gn 13⁸), 'brothers' stands for all degrees of relationship, and so also in Ex 21¹ and Nu 16¹⁰. The principal members of a class could very readily be used to represent the whole class: e.g. 'a land flowing with milk and honey' (Ex 3⁸ 17 13⁵ 33³, Nu 13²⁷ etc., Dt 6³ etc., Jos 5⁶, Jer 11⁵ 32²², Ezk 20⁶ 15¹⁵). So also a principal part could stand for the whole in the following: 'the shadow of my roof' (Gn 19⁶), i.e. of my house; 'The ark of God dwelleth within curtains' (2 S 7², cf. 1 Ch 17¹, Ca 1⁵, Jer 4²⁰ 10³⁰ 49², Hab 3⁷), i.e. in a mere tent; 'Thy seed shall possess the gate of thy enemies' (Gn 22¹⁷ 24⁶⁰, Dt 12¹⁵ 15⁷ etc., Ps 87², Is 3^{25a} 14³¹, Mic 1⁹), i.e. their city. The 'soul' stands for the whole man in Gn 9²⁵ 12⁵, 'the souls that they had gotten in Haran' (11¹⁴ 17¹⁴ 46¹⁸, Ex 12¹⁵, Lv 7^{20f} etc.; 'Let every soul,' etc. (Ro 13¹, Ac 2⁴⁰ 3²³, 1 Co 15⁴⁰, Rev 16³); 'three thousand souls,' etc. (Ac 21¹ 71⁴ 27³⁷, 1 P 3²⁰); cf. 'Thou art my bone and my flesh' (Gn 29¹⁴, Jg 9², 2 S 5¹ 19¹², 1 Ch 11¹) = my blood relation; 'flesh and blood' (Sir 14¹⁵ 17²¹, Mt 16¹⁷, 1 Co 15⁵⁰, Gal 11⁵) = man; 'How beautiful upon the mountains are the feet of him that bringeth good tidings' (Is 52⁷, Nah 2¹, Ac 5⁴, Ro 10¹⁵), the feet being the organs most necessary to a messen-

ger.—In 'Blessed be the LORD God of Shem' (Gn 9²⁶), the designation of the whole ('Shemites') is put for that of the principal constituent of the race, namely Israel (cf. 10¹⁴). The general expression 'the river' stands for the Euphrates, because for Western Asia this stream was 'the great river' (Gn 15¹⁰), i.e. possessed most importance (31²¹, Ex 23³¹, Dt 1⁷ 11²⁴, Jos 1⁴ 24² 14², 2 S 10¹⁵, 1 K 4²¹ 24¹⁴, 1 Ch 5⁹ 19¹⁶, 2 Ch 9²⁶, Ezr 8³⁵, Neh 2⁷ 9, Ps 72⁶ 80¹², Is 7²⁰ 87¹¹ 19⁸ 27¹³, Jer 2¹⁸, Mic 7¹², Zec 9¹⁰). 'The high' κατ' ἐξοχὴν is the heavens (2 S 22¹⁷, Job 16¹⁹, Ps 7¹⁸ 18¹⁶ 71¹⁹ 93³ 144⁷ 148¹, Is 24¹⁸ 21 32¹⁵ 33⁵ 40²⁶ 57¹⁵, Mic 6⁸).—To this category belongs also the employment of the *abstract for the concrete*: as, for instance, 'a help' (Gn 2³⁰); 'captivity' (2 K 24¹⁵ 25²⁷, 1 Ch 5², Ezr 1¹¹, Neh 7⁵, Est 2⁵, Is 20⁴ 45¹³, Jer 24⁵ 28⁴ 29¹⁰ 40¹ 52²¹, Ezk 1¹² 33²¹ 40¹, Am 1⁶ 9¹², Ob 3¹⁰, Zec 6¹⁰). In Ps 110^{3b} 'youth' is employed in the same way as *iuventus* = *iuvenes*.

(b) Clearness of style can hardly be said to be prejudiced by the following devices.

It was natural that a single verb should express two cognate actions. Thus שָׁרַח (Gn 31⁵⁰) is used for the hostile action both of the seed of the woman and of that of the serpent, and is thus equivalent in the one instance to 'bruise' and in the other to 'sting.' This employment of only one verb is known as *Zeugma*. Other examples of its use are: Ps 76³ 'There brake he the arrows, etc., and [finished] the battle'; Ezk 6⁹ 'I am broken,' etc.; Hos 2¹⁸ 'I will break the bow, the sword, and the battle.'—Elsewhere we meet with a *play upon the double meaning of words*. For instance, in Gn 48²² כַּכּ has the two meanings of 'mountain ridge' and 'portion.' Further, Isaiah announces to his people, 'Though thy multitude, O Israel, be as the sand of the sea, a remnant of them shall return' (10^{22a}), i.e. 'a remnant certainly, but only a remnant' (Cheyne, 1884, *ad loc.*). Again, when Isaiah says to his people, 'God will lift up his staff over thee' [i.e. for thy protection] כִּנְיָךְ יִרְמָה (10^{24b} 26¹⁰), he means by כִּנְיָ, in the first instance, 'manner' or 'way.' That is to say, God will help Israel in the way in which He helped them once before, when He brought them forth from Egypt. But, further, כִּנְיָ has in view the notion that God will deliver Israel by destroying the Assyrian army on the way to Egypt, as actually happened in B.C. 701 (Is 37³⁶). 'A phrase of double meaning, such as Isaiah loves,' is Cheyne's comment on Is 10²². He adduces no other example, but we find a similar 'Janus-word' in 22^{23b} 24²⁴, where כָּבֹד is used in the two senses of 'honour' and 'weight.' Both originated from the radical notion of the word, namely 'heaviness.' Again, one and the same term שָׁב means both 'turn away' and 'return' (Jer 8^{4b}). The other instances of this *ambiguity* will be found enumerated in *Stilistik*, p. 11 f.—The striving after a witty use of words in a double sense culminates in the *Riddle*; and, in accordance with the general custom of Orientals of diverting themselves by putting and solving riddles, we find that the writers of Scripture have interwoven a number of these with their histories and arguments. The earliest example is Jg 14¹⁴ 'Out of the eater came forth meat, and out of the strong [eater] came forth sweetness.' Both the occurrences mentioned here are opposed to ordinary experience, and thus awaken reflexion. The answer to this riddle was in turn given (v. 18) as a riddle, namely, 'What is sweeter than honey, and what is stronger than a lion?' Once more, the words 'The horse-leech hath two daughters, crying, Give, give. There are three things,' etc. (Pr 30¹⁵), furnish a specimen of the enigmatic sayings which the Jews called מִדָּה 'measure,' because they lead to the measuring, i.e. exhausting of the scope of a notion.

The other instances are Pr 6¹⁶⁻¹⁹, Sir 23¹⁶ 25^{22, 71, 26²⁷, 19} 50²⁸. Also the name *SHESHACH* in Jer 25²⁸ contains a species of riddle. The key to it is found in the custom of interchanging letters. In one of these systems the last letter of the alphabet was substituted for the first, the next to the last for the second, and so on. In this way *Sheshach* (ששח) would stand for *Babel* (בבל). The same phenomenon presents itself in Jer 51¹, where the words 'in the midst of them that rise up against me' represent the Heb. *Leb-kamai* (לב כמאי), which, on the same system of interchange of letters, would = *Kasdim* (כסדים), i.e. Chaldeans.

The following instances of *interchange of pronoun and substantive* may also be traced to natural motives, and are thus readily intelligible: 'God created man, etc., in the image of God created he him' (Gn 1²⁶). The words 'of God' take the place of 'his,' because prominence is meant to be given to the concept 'God.' The same preferring of the name 'God' to the pronoun is to be noted in the following passages: 'And the LORD said unto Abraham, etc., Is anything too hard for the LORD' (Gn 18¹⁴) = 'for me'; 'The LORD rained fire from the LORD,' etc. (19²⁴); 'Thou (O LORD) shalt destroy them that speak leasing, the LORD will abhor,' etc. (Ps 5^{6ab}), instead of 'thou wilt abhor,' etc.; 'He (the LORD) answered, etc., and the LORD,' etc. (Is 6^{11a}); 'concerning his Son, etc., which was made, etc., and declared to be the Son of God' (Ro 1^{3a}). In the same way 'thou' and 'the king' alternate in 2 S 14^{12ab}, and the title 'king' on many other occasions takes the place of the pronoun: e.g. 'O king, the eyes of all Israel are upon thee, that thou shouldst tell them who shall sit on the throne of my lord the king,' etc. (1 K 1²⁰ 8^{ab} 22^{16b} etc.); or 'Thine arrows [O king] are sharp in the heart of the king's enemies,' (1s 45⁵ etc.; cf. *Stilistik*, 154).—It was no less natural that the bare pronoun should frequently be used to point to the personage who is the main subject of any particular discussion. For instance, the hero who was called from the rising of the sun to deliver the exiles (Is 41¹⁻⁷) is indicated by the simple pronoun in 41²⁵ 43¹³ 46¹¹ 48¹⁴, and perhaps 55^{11b}. Who, now, was a more important subject than God Himself, in religious texts such as are contained in the Bible? Hence the reference of the pronoun 'he' is not doubtful in the words 'if he destroy him from his place' (Job 8^{17a}), or in 9^{2a} 'for he is not a man,' etc. In both passages God is self-evidently the other party. The same function is discharged by 'he' in 12¹⁰, 13^{16b} 19³, and 'God' is quite justifiably substituted by AV for the Heb. 'he' in 20²³ and 21^{17b}. The same use of the pronoun 'he' to refer to God is found in the following passages: 'In them (the heavens) he set a tabernacle for the sun' (Ps 19⁴); 'Judah was his sanctuary' (114³); 'He will no more carry thee away into captivity' (La 4²² etc., cf. *Stilistik*, p. 115 f.). Thus 'God' came to be the *great logical subject or object of the Bible*. Almost more natural still was it that 'God' should be the *great logical vocative* of Scripture. Examples of the latter are: 'Salvation belongeth to the LORD, thy blessing is upon thy people' (Ps 3⁸), or 'Put your trust in the LORD,' and 'LORD, lift thou up the light of thy countenance upon us' (48¹), or 'the LORD shall judge the people, judge me, O LORD,' etc. (7⁸). This involuntary turning of the religious man to his God is met with again in 'I have set the LORD always before me,' and 'for thou wilt not leave my soul in hell,' etc. (Ps 16⁸⁻¹⁰), or in 'He sent,' etc., and 'at thy rebuke,' etc. (18^{14a} etc. 69^{25b} 76¹ etc.). The same natural apostrophizing of God is found in the well-known words 'therefore forgive them not' (Is 2^{6b}), or in 'and the LORD hath given me knowledge of it . . . then thou shewedest me their

doings' (Jer 11¹⁸). Many similar passages are collected in *Stilistik*, p. 243.

Besides these forms of transition from pronoun to substantive, there are other rapid transitions characteristic of the style of Scripture.—

(a) After Joseph has been extolled in the words 'Joseph is a fruitful bough,' etc., he is addressed directly: 'even by the God of thy father,' etc. (Gn 49²¹⁻²⁴ 25¹). A similar transition shows itself in such instances as the following: 'Let her cheriah him, and let her lie in thy bosom' (1 K 1⁴); 'who eat up my people,' etc., and 'you have shamed the counsel of the poor,' etc. (Ps 14^{4b} 6a). The complaint 'they are gone away backward' is continued by the question 'Why should ye be stricken any more?' (Is 1⁴); cf. Hab 2¹ etc. The opposite transition, from apostrophe to the objective and calmer treatment of a person, may be observed in the words 'Reuben, thou art my firstborn . . . he went up to my couch' (Gn 49³⁴). The same change occurs again in 'O Jacob . . . he shall pour the water out of his buckets,' etc. (Nu 24⁴⁻⁷); or in 'Worship thou him' and 'her clothing is of wrought gold' (Ps 45¹¹⁻¹²); or in 'Thou shalt be called the city of righteousness' and 'Zion shall be redeemed,' etc. (Is 1^{26a}); or in 'Thy men shall fall by the sword,' etc., and 'her gates shall lament,' etc. (3²⁵ etc. 22^{16b} etc.; cf. *Stilistik*, pp. 238-248). There are, further, many passages in which the employment of the *third person* passes over into a preference for the *first*. A large proportion of these cases is explained by the circumstance that the writer passes to the use of direct speech: e.g. 'He feared to say, she is my wife' (Gn 26⁷); 'The rulers take counsel together. . . . Let us break,' etc. (Ps 2³); 'He maketh . . . know that I am God' (46^{9a}); 'The LORD of Hosts doth take . . . and I will give children to be their princes' (Is 31^{4a} 4b); 'He fenced . . . and now judge between me,' etc. (5^{2a}). Other instances are due to the author's including himself in the same group as the persons spoken of: e.g. 'They went through the flood on foot, there did we rejoice in him' (Ps 66⁶); 'The daughter of Zion is left as a cottage . . . except the LORD of Hosts had left unto us a very small remnant' (Is 1^{9a}). It might also happen that a collective personality like the Servant of the Lord (Is 41⁸ etc.) found its herald in a prophet. In this way is explained the employment of 'I' in the expressions 'In the LORD have I righteousness,' etc. (Is 45²⁴ 48^{16b} 49¹ 50⁴ 53¹ 61¹).—Less frequent is the transition from the *first person* to the *third*, as in 'Lamech said, Adah and Zillah, Hear my voice, ye wives of Lamech, hearken unto my speech' (Gn 4²³). It is obvious that this form of transition is a very natural one. The 'I' or 'my' is replaced by the name of the person concerned. The same phenomenon appears in 'Balaam lifted up his eyes and said, Balaam the son of Beor hath said,' etc. (Nu 24²¹). 'David' is used instead of 'I' in 2 S 7²⁶. In the words 'I shall not be greatly moved' and 'How long will ye imagine mischief against a man?' (Ps 62^{2b} 3a) the poet passes over from himself to the general category to which he belongs. With special frequency does the 'I' of a Divine message pass over into the third person. In some passages the place of the Divine 'I' is taken by a Divine name, as in the words 'Will I eat flesh of bulls? . . . Offer unto God thanksgiving,' etc. (Ps 50²³), or in 'The LORD said unto my lord, Sit thou at my right hand . . . the LORD shall send the rod,' etc. (110¹⁴). In other passages where the first person alternates with the third, we observe the language of God passing into that of His interpreter. An indisputable example of this transition is found in the words 'I will command the clouds that they rain no rain upon it, for the vineyard of the LORD

is,' etc. (Is 5²⁴). So also in 'Mine anger in their destruction . . . the LORD of Hosts shall stir up,' etc. (10²², etc., cf. *Stilistik*, pp. 249-256).

(β) Another phenomenon very frequently met with in the OT is the *transition from plural to singular, and vice versa*. For instance, we read 'And ye shall observe this thing for an ordinance to thee and to thy sons for ever' (Ex 12^{24ab}). There 'all the congregation of Israel' (v. 3), which in vv. 5-24^a is addressed by the plural 'your,' is treated in v. 24^b as a singular, and this singular has probably at the same time an individualizing force, and a warm parenthetic tone. But the reader of the OT is not misled thereby, for this transition meets him very frequently: e.g. Ex 13⁵⁻¹⁶ 20²⁴ etc., Dt 6¹³ etc., Jg 12⁵, Ps 17^{12a} ('a lion'), Is 56^{2b} (where 'them' instead of 'him' has a levelling effect), Mal 2¹⁴ ('yet ye say . . . the LORD hath been witness between thee and the wife of thy youth')^{12b} etc.; cf. *Stilistik*, pp. 232-238.

(γ) Still less surprising is the *sudden transition from one subject to another*. The first instance of this is met with in the words 'When the sons of God came in unto the daughters of men, and they bare children to them' (Gn 6⁴). This example is more difficult in the Hebrew text, where there is no equivalent for 'they,' and the verb *yālēdū* might also mean 'beget,' and be connected with the 'sons of God.' The next example is 'God shall enlarge Japheth, and he shall dwell in the tents of Shem' (9²⁷). Here 'God' cannot be the subject of 'shall dwell,' for He has been already extolled in v. 26^a as the ally of Shem. The same phenomenon appears in 'And he believed in the LORD, and he counted it to him for righteousness' (15⁶). There are not a few instances of this rapid change of subjects (cf. *Stilistik*, p. 257 f.), seeing that it is favoured by the so-called *Chiasmus*, of which an excellent specimen is presented by the words 'And the LORD had respect to Abel and his offering, but unto Cain and his offering he had no respect' (Gn 4^{4b, 5a}). Here the words that come first in v. 4^b correspond to those that form the conclusion of v. 5^a. On the other hand, the words with which v. 4^b closes and the words that commence v. 5^a are closely akin. It is readily explicable psychologically that similar ideas should be treated at the end of one sentence and directly afterwards at the beginning of a second. Hence *Chiasmus* is an extremely frequent occurrence in the OT. Here are a few further instances: 'The LORD knoweth the way of the righteous, but the way of the ungodly shall perish' (Ps 1^{6ab}); 'Why do the nations rage, and the peoples imagine a vain thing?' (Ps 2^{1ab}); 'It was full of judgment, righteousness lodged in it' (Is 1²¹); 'The vineyard of the LORD of Hosts is the house of Israel, and the men of Judah his pleasant plant' (5⁷). An exceedingly instructive example is furnished by the words: 'Make the heart of this people fat, and make their ears heavy, and shut their eyes; lest they see with their eyes, and hear with their ears, and understand with their heart' (Is 6¹⁰). Here a threefold correspondence may be observed. A number of other examples will be found in *Stilistik*, pp. 145-148.

None of the above phenomena, as they are psychologically explicable, diminish the perspicuity of the style of Scripture, and there are a number of devices whereby its clearness is *increased*.—

The first place amongst these is held by the *Simile*. What a bright light is thrown upon the number of Abraham's descendants by the declaration that they shall be 'like the dust of the earth' (Gn 13¹⁶ 28¹⁴), or 'as the sand which is upon the seashore' (22¹⁷ 32¹³), or 'as the stars of the heaven' (15⁵ 22¹⁷ 26⁴ etc.)! How clearly defined is the victory of the theocratic king by the words 'Thou

shalt dash them in pieces like a potter's vessel' (Ps 2⁹)! With what terrible distinctness the persecutor stands before our eyes when it is said 'lest he tear my soul like a lion' (7³ 10⁹ 17¹³)! The few words 'Zion is left as a cottage in a vineyard' (Is 1⁸) describe the situation of besieged Jerusalem more clearly than could have been done in a series of sentences. With what a shuddering feeling we hear the words 'In that day they shall roar against them like the roaring of the sea' (5²⁰)! We will only note, further, the characteristic words spoken of Ahaz, 'His heart was moved as the trees of the forest are moved with the wind' (7²).—A special form of the *Simile* is the *Example*. For instance, when it is said 'We have sinned with our fathers . . . our fathers understood not thy wonders in Egypt,' etc. (1⁸ 106⁶), this is equivalent to 'We have sinned like our fathers,' etc. The *rapidēryma* or *Exemplum* is merely a *Simile* introduced in a peculiar manner. The *Example* is rare in the OT, there being hardly any more instances of it than the following: Mal 2¹⁵ (Abraham), Ps 99⁶ (Moses, Aaron, and Samuel), 106²⁰ (Phinehas), Neh 13²² (Solomon). Later generations had much more occasion to introduce characters from earlier history for the purpose of encouragement or of warning. The following are cited as examples for imitation: Abraham, Moses, and others in the 'Praise of Famous Men,' Sir 44 ff., in Jth 4²³ 8^{1st}, or in 1 Mac 2⁵²⁻⁶⁰; David as a pattern of self-restraint (cf. 2 S 23¹⁶) in 4 Mac 3⁶⁻¹⁷; the queen of the south (i.e. Saba) in Mt 12⁴²; the widow of Sarepta in Lk 4²⁶ etc. We have, held up to warning: the Egyptians in Wis 17²²; the Sodomites in Mt 10¹⁵ 11³¹; Lot's wife, that *μνηστρον ἀπιστοσύνης ψυχῆς* (Wis 10⁷) in Lk 17³²; Theudas and others in Ac 5³⁶ etc. The OT is somewhat richer in instances of the *Example*, if we include those that are drawn from the animal world. When, e.g., we read 'The ox knoweth his owner,' etc. (Is 1³), what is this but an example which puts man to shame? Similar is the force of the saying 'The stork in the heaven knoweth his appointed times,' etc. (Jer 8⁷), and every one is familiar with the call 'Go to the ant, thou sluggard, consider her ways and be wise' (Pr 6⁶). For further instances see *Stilistik*, p. 78 f.—Closely akin to the *Example* is the *Proverb*. For the function of the latter is simply to describe the usual working of an *Example*. It must, however, suffice here to note the high value of the *Proverb* as a device for lending vividness to a description. For further details, see art. PROVERB in vol. iv.—While, on the one hand, shortened forms of the *Simile* may be seen in the *Example* and the *Proverb*, this figure of speech assumes, on the other hand, expanded forms in the *Parable* and the *Fable*, as well as in those passages of the OT which may be called *Paramyths*. These three species of picturesque description are explained in the art. PARABLE (in OT) in vol. iii.

The second principal stylistic device for illustrative ends is the *Metaphor* and its cognates. The source of the metaphor is a vivid simultaneous contemplation of the main elements in two notions. For instance, the notions of joy and of light are naturally combined, because both exercise a liberative and elevating influence upon the health of man. On the other hand, unhappiness and darkness both weigh man down, as it were. Thus we explain sayings like the following: 'Thou wilt light my candle, the LORD my God will enlighten my darkness' (Ps 138²). For the same reason, a sorrowful period in one's life is described as a passing 'through the valley of the shadow of death' (23⁴). So we read 'The people that sat in darkness have seen a great light' (Is 9²), i.e. they shall attain to political freedom and deliverance

from guilt and sin. In a similar way 'fire' could be an expression for 'anger,' as may be seen in the words 'therefore the inhabitants of the earth are burned' (Is 24¹). The 'dew' was quite naturally used as a symbol for a great many phenomena of a cheerful order, so that there is no difficulty in understanding the expression in Ps 110³ 'Thou hast the dew of thy youth' (lit. 'Like the dew are thy young men'). On the other hand, the 'floods' and similar expressions stand for hosts of foes (Ps 18^{4b, 16b} etc.). The 'earthquake' may point an allusion to political disturbances, as in 'Thou hast made the earth to tremble,' etc. (Ps 60^{2a}). The 'rock' is an equally natural figure for a place of refuge (Ps 27¹ 'He shall set me up upon a rock'), as 'depth' is for catastrophe or misfortune (Ps 69² 'I am come into deep waters'; cf. v. 1^{4b}, and 130¹ 'Out of the depths have I cried unto thee'). Regarded from another point of view, the 'deep' was naturally employed as a symbol of the inexhaustible and unfathomable. Hence we read, 'O the depth of the riches,' etc. (Ro 11³, cf. 2 Co 8²), and for the same reason 'deep' in the sense of 'mysterious' is used of the heart (Ps 64^{4b}, Jth 8¹⁴) or of the lip, i.e. the speech (Is 33¹⁸, Ezk 3²⁴). Thus 'to be deep' is equivalent to 'to be unfathomable' (Ps 92² 'and thy thoughts are very deep'), and a matter that is incomprehensible is compared to the great primeval flood (פְּתִיחַ Ps 36⁶ 'a great deep').—The number of combinations of phenomena from the different spheres is almost endless. We can note only a few of them. 'Shield' is an expression for 'protector' (Gn 15¹ etc.), and 'star' is a beautiful figure for a conquering hero (Nu 24¹⁷ 'There shall come a star out of Jacob'; cf. Is 14¹², Dn 8¹⁰, Rev 22¹⁶, and Ovid, *Epist. ex Ponto*, III. iii. 2, 'O sidus Faliae, Maxime, gentis'). 'The waters,' again, stands for hostile troops (Ps 124², Is 8⁷, Rev 17¹ etc.), and 'branch' for 'descendant' (Ps 80^{11b}, Is 11¹ 60^{1a} etc.).—From the sphere of animated nature we have 'lion' as a honorific title for a strong hero (Gn 49⁹ 'Judah is a lion's whelp,' cf. 2 S 23²⁰ etc.); and 'goats' might be symbolic either of leaders of the people (Is 14⁹, where the Heb. is קִרְיָתִי 'all the goats of the earth'; cf. Zec 10³), or of refractory elements in the community (Ezk 34¹⁷); while 'sheep' was an honourable designation for gentle and pious men (Ps 79¹³ 100³, Is 53⁷, Ezk 36³⁸, Mt 25^{32a}, Jn 10¹ etc.). The expression 'on eagles' wings' (Ex 19⁴) portrays the triumphant fashion of the Divine intervention in the course of history (cf. Dt 32¹¹, Ps 17^{8b}).—Lastly, certain objects in the inanimate sphere were often regarded as if they had life, and even as if they were human beings. Thus the blood has a voice attributed to it in the words 'The voice of thy brother's blood crieth unto me from the ground' (Gn 4¹⁰); and when the prophet says, 'Hear, O heavens, and give ear, O earth' (Is 1²), this only falls short of *personification*. The same figure may be observed in the call to ships to howl (Is 23¹); and in the passages where it is said that 'the stone shall cry out of the wall' (Hab 2¹¹), or that 'if these should hold their peace, the stones would immediately cry out' (Lk 19⁴⁰), how vividly the scene presents itself to our eyes! Since metaphorical expressions portray, as it were, to our eyes a spiritual process, they readily combine to form whole pictures. We have an instance of this in 'The whole head is sick, and the whole heart faint; from the sole of the foot even unto the head,' etc. (Is 1^{2a}); and another in 'There shall come forth a rod out of the stem of Jesse, and a branch shall grow out of his roots' (11¹). A continued series of metaphorical expressions of this kind receives the name of *Allegory*. This figure meets us in the Song of Songs, as, for instance, in the words 'I sat down under his (i.e. my be-

loved's) shadow with great delight, and his fruit was sweet to my taste' (2²), or in 'A garden enclosed is my sister,' etc. (4^{12a}, cf. 7¹²), but it is not the case that the *whole* Song is an allegorical poem regarding the Messiah and His Church (cf. further, *Stilistik*, pp. 94-110, and art. SONG OF SONGS in vol. iv.).

2. The Biblical writers naturally desire to give their words the highest possible degree of *emphasis*. It is this aim that gives rise to not a few characteristic features of the style of Scripture. —(a) The employment of a *prospective pronoun*, as in 'This is that night of the LORD to be observed,' etc. (Ex 12⁴²); 'I shall see him, but not now,' etc. (Nu 24¹⁷), the effect in this last instance being to awaken strongly the interest in the star which is then mentioned. So also 'Thou shalt not go thither unto the land which I give,' etc. (Dt 32²²); 'the Most High himself' (Ps 87²); 'to this man will I look, even to him that is poor,' etc. (Is 66²; cf. *Stilistik*, p. 153 f.). —(b) *Emphasis* is sought, again, by the repetition of one and the same expression, giving birth to the so-called *Epizeuxis*. The list of its occurrences begins with 'Abraham, Abraham' (Gn 22¹¹), and is continued in the following: 'the red, the red' (25³⁰ AV 'that same red pottage'); 'Jacob, Jacob' (46²); 'Amen, Amen' (Nu 5²², Ps 41¹⁴ 72¹⁹ 89⁹, Neh 8⁹); 'of justice, justice' (Dt 16²⁰ AV 'altogether just'); 'Come out, come out' (2 S 16⁷); 'My God, my God' (Ps 22¹); 'Return, return' (Ca 6¹²); 'peace, peace' (Is 26³, where AV has 'perfect peace,' although it retains 'peace, peace' in 57¹⁹, Jer 6¹⁴ 8¹¹); 'Comfort ye, comfort ye, my people' (Is 40¹); 'Ho, ho' (Zec 2⁶ etc.; cf. *Stilistik*, p. 155 f.). A specially high degree of emphasis was naturally expressed by the thrice-repeated employment of a word. This is seen in 'Holy, holy, holy is the LORD of Hosts' (Is 6³); or 'The temple of the LORD, the temple of the LORD, the temple of the LORD' (Jer 7⁴); or 'O earth, earth, earth' (22²²); or 'I will overturn, overturn, overturn it' (Ezk 21²⁷); or 'The LORD revengeth,' etc. (Nah 1³). The same *emphatic repetition* occurs also with the conjunctions, as when the words 'We will arise and go and live and not die' (Gn 43⁸) furnish us with a speaking picture of anxious impatience. Again, the double use of the conditional particle in 'If ye have done truly . . . and if ye have dealt well with Jerubbaal' (Jg 9¹⁶) serves very well as a reminder that the point was open to question. Once more, to indicate how well deserved a punishment was, we have a repeated 'because, because' (Ps 116¹¹); or 'for, for' (Is 1^{2a}); or 'therefore, therefore' (51^{3a, 14a}); or 'for, for' (Jer 48^{5ab} etc.; cf. *Stilistik*, p. 159).—Emphasis is also aimed at in such words as 'Get thee out of thy country, and from thy kindred, and from thy father's house' (Gn 12¹), where a series of words is so arranged as to designate an ever-narrowing circle of persons. Abraham must separate himself from even the most intimate circle of his relations (cf. Jos 24²), in order to follow the Divine call. Such a form of expression is known as a *Climax*, and examples of it meet us frequently in the Bible. Here are a few: 'His bread shall be *fat*, and he shall yield *royal dainties*' (Gn 49²⁰); 'The children of Israel have not hearkened unto me, how then shall Pharaoh hear me?' (Ex 6¹²); 'the day . . . and the night' (Job 3³); 'ungodly . . . sinners . . . scornful' (Ps 1¹); 'my friend or brother' (35¹⁴); 'Forget thy own people and (even) thy father's house' (45¹⁰); 'in the twilight, in the evening, in the black night' (Pr 7⁹); 'Are they Hebrews . . . Israelites . . . seed of Abraham . . . ministers of Christ?' (2 Co 11^{22a}); 'which we have heard, which we have seen, which we have looked upon, and our hands have handled,' etc. (1 Jn 1¹). Speci-

ally common is the Climax in connexion with the use of numbers: e.g. 'He will deliver thee in six troubles, yea in seven there shall no evil touch thee' (Job 5¹⁹); 'God hath spoken once, twice have I heard this' (Ps 62¹¹); 'Give a portion to seven, and also to eight' (Ec 11³); 'two or three . . . four or five' (Is 17⁴); 'for three transgressions and for four,' etc. (Am 1^{2, 6, 9, 11, 13, 21, 4, 6}); 'Of three things my heart is afraid, and before the fourth I fear greatly' (Sir 26³); 'Where two or three are gathered in my name,' etc. (Mt 18²⁰; cf. *Stilistik*, p. 163 f.). Quite similar is the phenomenon which presents itself in such expressions as, 'They go from strength to strength' (Ps 84⁷); 'affording from species to species' (Ps 144¹⁸ AV 'all manner of store'); 'from wickedness to wickedness' (Sir 13^{21, 40, 43}), i.e. to ever new forms of wickedness; 'Add iniquity to their iniquity' (Ps 69⁷); 'The sinner heaps sin upon sin' (Sir 37⁵); 'A chaste woman shows grace upon grace' (26¹⁸; cf. Jn 1¹⁶ 'grace for grace, i.e. ever self-renewing grace').

3. In conformity with the nature of their subjects, the Biblical writers seek to invest their language with a high degree of *seriousness and dignity*. Both these qualities appear to be prejudiced by certain peculiar forms of expression. The first of these is the **Hyperbole**, a figure which is undoubtedly employed in the Bible. What is it but Hyperbole when the posterity of Abraham is compared to the sand upon the seashore (Gn 22¹⁷ etc.)? Even a theologian like Flacius admits this (*Clavis Script. Sacr.* 1628, ii. p. 383 ff.). But we must also assign to the same category forms of expression like the following: 'under every green tree' (from Dt 12² to 2 Ch 28⁴); 'The cities are great and walled up to heaven' (Dt 1²⁸ etc.); 'though thou set thy nest among the stars' (Ob 4 etc.); 'Saul and Jonathan were swifter than eagles' (2 S 12³ etc.); 'I am a worm,' etc. (Ps 22⁶; cf. *Stilistik*, pp. 69-77). But the employment of such expressions does not detract from the seriousness, not to speak of the truthfulness, of the style of Scripture. The Biblical writers simply conformed in this matter to the usage of their people and their time, and every hearer or reader of such expressions knew in what sense he must understand them. Nor will it be questioned that the same is the case with the examples of **Litotes** that occur in the Bible. Such are the following: 'A broken and a contrite heart, O God, thou wilt not despise' (Ps 51¹⁷), i.e. wilt accept and praise; 'The smoking flax shall he not quench' (Is 42³), but supply with fresh oil; 'He setteth in a way that is not good' (Ps 36⁴); 'Thou, Bethlehem, art not the least,' etc. (Mt 2⁶); 'when we were without strength' (Ro 5³), i.e. laden with sin and guilt. It is true also of these and other expressions of a similar kind (cf. *Stilistik*, pp. 45-50), that they were not strange to readers of the Biblical writings, but were a well-understood equivalent for the positive statement in each case. The same principle holds good of the examples of **Irony** in the Bible. For instance, we have 'Go and prosper,' etc. (1 K 22¹⁵), an ironical imitation of the words of the false prophets; 'No doubt but ye are the people, and wisdom shall die with you' (Job 12³); 'It pleased God by the foolishness of preaching to save them that believe' (1 Co 1²¹); 'Now ye are full, now ye are rich,' etc. (4⁸, cf. 2 Co 12^{10, 11, 12}). The Biblical writers were not afraid of prejudicing the seriousness of their utterances by resorting to Irony, nor had they any occasion to be afraid, seeing that every one knew to convert these ironical expressions into their opposite. Hence we find this figure employed even in utterances attributed to God: 'Let them (the false gods) rise up and help you' (Dt 32³⁸); 'Go and cry to the gods whom ye have chosen, let them deliver you' (Jg 10¹⁴); 'and give me to

know' (Job 38^{3b} AV 'answer thou me'); 'Gather my saints together unto me' (Ps 50⁴). Nay, even sayings of Jesus are reported which exhibit the use of Irony. Amongst these we do not include *καθεύδετε τὸ λοιπὸν καὶ ἀναπαύεσθε*, AV and RV 'Sleep on now and take your rest' (Mt 26⁴⁰ || Mk 14⁴¹), for *τὸ λοιπὸν* means 'later,' 'afterwards.'* But Irony is present (cf. *Stilistik*, p. 43) in the words 'Full well ye reject the commandment of God, that ye may keep your tradition' (Mk 7⁹). There are other undoubted occurrences of the same figure, as, for instance, in Jn 7²⁸ 'Ye both know me, and ye know whence I am.' To the Biblical writers Irony was simply what it is to human speech in general—a means of heightening the effect of an utterance. A similar intention underlies the occurrence of **Sarcasm** in Scripture. There is a scoff in David's question to Abner, 'Art thou not a valiant man?' (1 S 26¹⁸), as well as in the exclamation 'How hast thou helped him that is without power!' (Job 22³), or the statement 'As a jewel of gold in a swine's snout, so is a fair woman which is without discretion' (Pr. 11²²). Then there are the numerous familiar passages in which the gods of the heathen are the object of *satirical* persiflage: 'Elijah mocked them and said, Cry aloud, for he is a god, either he is talking,' etc. (1 K 18²⁷; cf. Ps 115^{4a}, Is 40¹⁸ etc.). We have similar instances of satire in the question 'Is this the city that men called the perfection of beauty, the joy of the whole earth?' (La 2⁵); in the affirmation 'They that be whole need not a physician' (Mt 9¹²); and in the indignant substitution of 'circision' (*καταρῆφι*) for 'circumcision' (*περιτομή*) in Ph 3² (cf. *Stilistik*, pp. 42-45). The Biblical writers, in short, avail themselves of all natural means of reaching their end, to teach and to warn men. In this respect as in others their heart was filled with the wish expressed by the apostle in the words 'I desire to change my voice' (Gal. 4²⁰).

4. The writers of Scripture sought to give to their words that ennobling effect which springs from regard to *purity* or chastity. Of this we find a considerable number of positive traces in the so-called **Euphemisms** such as the following: 'Adam knew Eve his wife' (Gn 4^{1, 25}; cf. v. 17 19^{3, 8, 24, 16, 38, 20b}, Nu 31^{17, 25}, Jg 11^{30, 19, 22} 21^{11, 12}, 1 S 1¹⁸, 1 K 1⁴, Mt 1²⁵, Lk 1³⁴); 'The sons of God came in unto the daughters of men' (Gn 6⁴; cf. 16³ 19^{1, 29, 30, 16, 38, 22}, etc., Ps 51²⁰ etc.); 'come near her' (Gn 20⁴, Lv 18⁴, Dt 22⁴, Is 8³, Ezk 18⁹); 'to touch her' (Gn 20⁹, Pr 6³⁰, 1 Co 7¹); 'lie with' (Gn 19³² 26^{10, 30, 18}, 34^{2, 7, 35, 22} etc.); 'Thou wendest up to thy father's bed' (49⁴); 'discover his father's skirt' (Dt 22^{30, 27, 40}); 'she catch,' said of the adulteress (Pr 30²⁰; cf. *Stilistik*, p. 39); 'Let the husband render unto the wife due benevolence' (1 Co 7³). Another series is represented by euphemistic expressions like the following: 'the nakedness' (Gn 9²², Ex 20^{26, 28, 42}, Lv 18²⁸, 20^{17, 18}, 1 S 20³⁰, Is 47³, La 1⁸, Ezk 16^{38, 22, 23}); 'her young one that cometh out from between her feet' (Dt 28³⁷); 'he covereth his feet' (Jg 3²⁴, 1 S 24⁴, cf. Is 7²⁰); 'flesh' (Lv 15^{2, 19, 16}, Ezk 16^{28, 23, 20} 44⁷ etc.; cf. *Stilistik*, pp. 36-38).—There are only a few passages where it appears to us that the Biblical writers might have shown a little more reserve in dealing with 'the secrets' (Dt 25¹¹). We have no exception to take to those instances in which 'shame' is employed (Is 20^{4, 47}), for this is still a veiled epithet. But the impression of a want of delicacy is given by modes of speech like the following: 'He lifteth up the beggar from the dunghill,' etc. (1 S 2⁹); 'I did cast them out as the dirt in the streets' (Ps 18⁴²); 'Thou didst make us as the off-

* The present writer in his *Stilistik* (p. 43) anticipated Professor Potwin (see *Expos. Times*, Aug. 1901, p. 481), who rightly denies the presence of Irony in the above passage.

scouring,' etc. (La 3⁴⁵, 1 Co 4¹³); 'Dost thou pursue after a dead dog, after a flea?' (1 S 24¹⁴); 'Am I a dog's head?' (2 S 3⁸); 'a dead dog' (9⁸ 17⁹); 'The carcass of Jezabel shall be as dung upon the face of the earth' (2 K 9³⁷); 'They made it a draught-house' (10²⁷); 'that they may eat their own dung,' etc. (18²⁷ || Is 36¹³); 'They became as dung for the earth' (Ps 83¹¹). Two facts, however, have to be taken into account with reference to such modes of expression. In the first place, they are in accordance with the fashion of earlier times, and were not so repugnant to men then as they are to us. But, further, the choice of such strong expressions served in some of the passages in question to increase the emphasis of the prophetic denunciation. This latter point of view helps us also to explain and to excuse certain passages in Ezekiel, notably 16²² and 23¹². We may assume that in these passages the idolatry of Israel is described in such detail as adultery, in order to deter subsequent generations from a repetition of this sin. At the same time, it must be admitted that the prophet could equally have achieved his purpose by a different method of treatment. In like manner, the description of the 'navel' and the 'belly' of the Shulammitte (Ca 7²²) is somewhat too realistic.

5. The Biblical writers are by no means indifferent to *euphony* in their style.

(a) The very first words of the OT furnish evidence of this, the Heb. words *bērēshith bārā* ('In the beginning created') being an instance of the first means of securing euphony, namely **Alliteration**. Other instances of it are found in *Nōah yēnahāmēnū* 'Noah shall comfort us' (Gn 5²⁹); *shemen shēmekhu* 'ointment thy name' (Ca 1³); *āphār wā-ēpher* 'dust and ashes' (Gn 18²⁷, Job 30¹⁹ 42⁶); *yishkhōm wē-shārak* 'shall be astonished and shall hiss' (1 K 9⁸, Jer 19⁸ 49¹⁷ 50¹³); *simhā wē-sāḥn* 'joy and gladness' (Est 8¹⁴); *hūd wē-hādār* 'honour and majesty' (Job 40¹⁰, Ps 21⁵ 96⁵ || 1 Ch 16²⁷, Ps 104¹ 111⁵); *shāmīr wā-shayith* 'briers and thorns' (Is 5⁸ 7²³⁻²⁵ 9¹⁸ 10¹⁷ 27⁴); *sāḥn wē-simhā* 'gladness and joy' (Is 22¹³ 35¹⁰ 51¹¹); *shōd wā-sheber* 'desolation and destruction' (Is 51¹⁹ 59⁷ 60¹⁸); *shommu shāmāyim* 'Be astonished, O heavens' (Jer 2¹²); *hāzīm kāzērā* 'shall reap thorns' (12¹³); *sar(r)hēm šorērīm* 'their princes are revolvers' (Hos 9¹⁵), etc. etc.; *σῴζων σωτήρ* 'this day a Saviour' (Lk 2¹¹).

(b) In other passages we meet with expressions like *tōhā wā-bōhā* 'waste and void' (Gn 1², Jer 4²³). These words exhibit what is called **Assonance**, a phenomenon which recurs in *šōrēr u-mōre* 'stubborn and rebellious' (Dt 21¹⁸ etc.); *ōyēb wē-ōrēb* 'the enemy and the liar in wait' (Ezr 8⁴); *nēsūy || kēsūy* 'forgiven' || 'covered' (Ps 32¹); *sādōn || kālōn* 'pride' || 'shame' (Pr 11²); *hōy gōy* 'Ah nation' (Is 1⁴); *kē || yōphē* 'burning' || 'beauty' (3²⁴); *hōy hōdō* 'Ah his glory' (Jer 22¹⁸); *σῆνος* 'mastic' and *πῖνος* 'holm' (Sus 24. 28); *κηνῶν* 'beasts' and *πηνῶν* 'birds' (1 Co 15³⁹). In a good many instances Alliteration and Assonance are combined: *nā wā-nād* 'a fugitive and a vagabond' (Gn 4¹²⁻¹⁴); *Kayin* 'Cain' and *kānithi* 'I have gotten' (Gn 4¹); *Kēnī* 'Kenites' and *kēn* 'nest' (Nu 24²¹); 'Achan' and 'Achor' (Jos 7²⁴); the frequently recurring 'Cherethites and Pelethites' (2 S 8¹⁸ 15¹⁸ 20⁷, 1 K 18. 44, 1 Ch 18¹⁷); *attā attā* 'thou, now' (1 K 21⁷); *āntiyyā* ('poor') *Anāthōth* (Is 10³⁰); 'Jezreel' and 'Israel' (Hos 1⁴), etc.; *πορνεία* 'fornication' and *πορνεία* 'wickedness' (Ro 1²⁹); *φθόνου* 'envy' and *φόνου* 'murder' (Id.), etc.; cf. *Stilistik*, pp. 287-295.

(c) The superlative degree of this harmony of elements in style is observable in such collocations as the following: *wayyakkirēm wayyithnakkēr* 'and he knew them, and made himself strange' (Gn 42²⁹); *wā-hāshimmōthi . . . wē-shāmēnū* 'and I will bring into desolation . . . and they

shall be astonished' (Lv 26³²); *shō'ā u-mēshō'ā* 'desolate and waste' (Job 30³ 38²⁷, Zeph 1¹², Sir 51^{10c}); *ēm lō tā'āmēnā kt lō tē'āmēnā* 'if ye will not believe, surely ye shall not be established' (Is 7⁹); *māsād mus(s)ād* 'of founded foundation' (28¹⁶). Many other instances might be cited of this species of Euphony, which is usually called **Paronomasia** or **Annominatio**. The number is particularly increased by the very frequent explanations of Proper Names, which form a noteworthy feature in the style of the Hebrew historical books. In Genesis we have the following combinations: *ādāmā* 'tillable land' and *ādām* 'man' (Adam) (Gn 2⁷); *ishshā* 'woman' and *ish* 'man' (v. 28); *shēth* 'Seth' and *shāth* 'hath appointed' (4²⁵); *yaphē* 'shall enlarge' and *Yāphēth* 'Japheth' (9²⁷), etc.; cf. *Stilistik*, p. 296. Elsewhere in the OT we have the following examples of Paronomasia: *Mōshe* 'Moses' and *māshīth* 'I drew' (Ex 2¹⁰); *Lēvi* 'Levi' and *yillāwū* 'they may be joined' (Nu 18²); *Mārā* and *hēmar* 'hath dealt bitterly' (Rtu 1²⁰); *Edom* and *ādōm* 'red' (Is 63¹⁴); *Jerusalem* and *shēlōm* 'wholly' (Jer 13¹⁹); *Solomon* and *shālōm* 'peace' (1 Ch 22⁹); *Πέτρος* and *πέτρα* (Mt 16¹⁸), etc.; cf. *Stilistik*, pp. 295-298.

(d) Euphony is aimed at also by making the same words recur at certain intervals. The various *nuances* that thus arise may be illustrated from the following groups of examples: (a) *bārūkh* 'blessed' occurs at the *beginning* of a number of sentences in Dt 28⁴⁻¹¹. This usage is called **Anaphora**, and we note it also, for instance, in the *ārūr* 'cursed' with which vv. 16-19 commence; cf. also 'I will sing . . . I will sing' (Jg 5³); 'Many . . . many' (Ps 31b. 22); 'Lift up your heads, O ye gates . . . lift them up' (24^{10a}); 'and it was full . . . and it was full' (Is 2^{10a}. 8a); 'Woe . . . woe,' etc. (5b. 11. 18. 20-22); 'and I will cut off . . . and I will cut off,' etc. (Mic 5^{12a}. 2a. 13a); 'All things are lawful for me, but, etc. . . all things are lawful for me, but,' etc. (1 Co 6¹²); 'Have we not power . . . have we not power?' (9⁴); 'All our fathers . . . and all . . . and all . . . and all' (10^{1b-4}), etc.—(β) In 'We perish, we all perish' (Nu 17¹²), we find the same expression repeated at the *end* of two successive sentences—a method of securing Euphony which is called **Epiphora**. We encounter it again in the eleven times recurring 'and all the people shall say Amen' of Dt 27¹⁵⁻²⁶; cf. 'Take them alive . . . take them alive' (1 K 20^{10ab}); and we find at the *end* of sentences repetitions like the following: 'the king of glory' (Ps 24^{10ab}); 'shall be bowed down' (Is 2¹². 17); 'when he raiseth up,' etc. (vv. 19b. 21b); 'shall lament her' (Ezk 32^{10ab}); 'as a child' (1 Co 13¹¹); 'so am I' at the close of three sentences (2 Co 11²); 'in watchings often . . . in fastings often' (v. 27), etc.—(γ) A superior degree of Euphony is sought by *beginning* one sentence and *closing* another with the same expression. This so-called **Ploke** is exemplified in 'Ceased . . . in Israel . . . they ceased' (Jg 5⁷); 'Blessed shall be . . . she shall be blessed' (v. 24ab); 'He lieth . . . he lieth' (Ps 10⁹); 'Wait on the LORD . . . wait' (27^{14ab}), etc.; 'Vanity . . . vanity' (Ec 1²); 'Hope that is seen is not hope' (Ro 8²⁴); 'Rejoice in the LORD . . . rejoice' (Ph 4¹), etc.—(δ) Specially frequent is the attempt to secure Euphony by making the same word *end* one sentence and *begin* the next—the so-called **Anadiplosis**. The earliest example of it in the Bible is *shōphēkh dam hā'ādām bā'ādām dāmō yishshā-phēkh* 'Whoso sheddeth man's blood, by man shall his blood be shed' (Gn 9⁶); 'The kings came and fought, then fought, etc. (Jg 5¹⁹); ' . . . the way, but the way,' etc. (Ps 1^{10ab}); 'and gathered themselves together, yea . . . gathered themselves together' (35^{10ab}); *lābēsh* ('is clothed'), *lābāsh* (Ps 93¹); *lākhēn yēyēlū Mō'ab lē-Mō'ab kulloh*

yēyēllū 'therefore shall Moab howl, for Moab shall every one howl' (Is 16⁷); *ha-kēz bā, bā ha-kēz* 'the end is come, it is come the end' (Ezk 7⁹), etc.; 'That which the palmerworm hath left hath the locust eaten, and that which the locust hath left hath the cankerworm eaten,' etc. (Jl 1⁴) etc.; 'In him was life, and the life,' etc. (Jn 1⁴); 'Faith cometh by hearing, and hearing by the word of Christ' (Ro 10¹⁷); 'He that soweth sparingly, sparingly shall he also reap' (2 Co 9⁶); 'The trying of your faith worketh patience, but let patience,' etc. (Ja 1³) etc.; cf. *Stilistik*, pp. 298-304.

iv. PECULIARITIES OF STYLE FOR WHICH A PREFERENCE IS SHOWN BY PARTICULAR CLASSES OF SCRIPTURE WRITERS.—1. In certain parts of the Bible the so-called 'lower' style is employed, while others are marked by the use of a 'higher' style. The difference may be observed even by readers of the Bible who have no acquaintance with Hebrew. They will note how in certain portions of the OT the employment of metaphorical expressions has a special vogue. Every one is familiar with the phrase 'daughter of Zion,' i.e. the inhabitants of Zion, and at times—Zion itself. But where do we meet with this phrase for the first time in the OT? From the beginning of Genesis we may read straight on to 2 K 19²¹ before we encounter it, and the passage just named is the only one in the historical books of the OT where it occurs. How has it found its way here? Simply because in this passage we have a report of words spoken by Isaiah (cf. Is 37³²), in whose writings this and similar phrases are found repeatedly (1⁸ 10^{30, 32} 16¹ 22⁴ 23^{10, 12} 37³²; cf. [Deutero-] Is 47^{1, 4, 6} 52² 62¹). The reader of the English Bible may, further, remark how, for instance, in the Book of Isaiah, the beautiful metaphors of darkness and light are employed (5^{30b} 8²² 9¹¹, etc.), and how at one time the hosts of the enemy and at another time the Divine judgments figure in the oracles of this prophet as irresistible floods (8⁷ 23¹⁷ etc.). Any ordinary reader of the Bible will notice, again, how in Isaiah there are far more questions and exclamations than in the Book of Kings. For instance, 'How is the faithful city become an harlot!' (1²¹); 'Woe unto the wicked!' (3¹); 'O my people!' (v. 12); 'Woe unto them!' etc. (5^{30c}); 'Woe is me!' etc. (6³); 'Bind up the testimony!' (8¹⁶); 'Shall the axe?' etc. (10¹⁵); 'This people was not!' (23¹⁸). Nor can the reader of this book help noticing the dialogues and monologues it contains. How lifelike, for instance, are the words 'The voice said, Cry, and he (the person formerly addressed) said, What shall I cry?' followed by the answer of the first speaker, 'All flesh is grass,' etc. (40⁶). The same quality excites our admiration in 'Can a woman forget her sucking child?' etc.; 'Yea, they may forget . . . Behold, I have,' etc. (49¹⁵); or in the question 'Wherefore have we fasted,' etc. (58⁴), etc.; cf. *Stilistik*, pp. 229-231. But the reader of the original text of the OT will recognize much more clearly still that certain portions and even whole books are distinguished from others by a *higher style*. He will observe that many components of the Hebrew vocabulary are used only in certain passages. For instance, there is no occurrence in Gn 1-4²³ of *he'ēšēn* 'give ear,' a synonym of *shāma'* 'hear,' which is used in 3^{8, 10c}. On the other hand, *he'ēšēn*, which is translated 'hearken' in 4²³, recurs in the following additional passages: Ex 15¹⁶, Nu 23¹⁸ (one of the Balaam oracles), Dt 1⁴⁶ 32¹, Jg 5³, 2 Ch 24¹⁰ (perhaps an imitation of Is 64³), Neh 9³⁰ (in a prayer), Job 9¹⁶ etc., Ps 5² etc., Pr 17⁴, Is 1² 10⁸ 28²² 32⁹ 48²³ 51⁴ 64³, Jer 13¹⁵, Hos 5¹, Jl 1². The same is the case with the word *'imrā* 'speech,' which likewise does not occur prior to Gn 4²³, and after that is preferred to its synonym *dābār* only in the following passages: Dt 32² 33⁹,

2 S 22³¹, Ps 12⁷ etc., Pr 30⁶, Is 5²⁴ 28²³ 29⁴ 32⁹, La 2¹⁷. Consequently, the choice of these two words suffices to bring Gn 4²³ into connexion with other portions of the OT where the same comparatively rare terms occur (cf. *Stilistik*, pp. 277-283). To take other two illustrations of a similar kind, the dative 'to them' is expressed by the usual *lāhem* in Gn 3²¹ etc., but by *lāmō* in the following passages: Gn 9^{26b, 27b}, Dt 3^{22, 28} 33², Job 3¹⁴ etc. (10 times), Ps 2⁴ etc. (21 times), Pr 23³⁰, Is 16⁴ 23^{26, 14} 30⁵ 35⁸ 43⁸ 44⁷ 1⁸ 48²¹ 53⁸ (?), La 1^{10, 22} 4^{10, 18}, Hab. 2⁷. Again, 'man' is expressed by *'ādām* from Gn 1²³ onwards, but *'ēnōsh* is the term selected in the Song of Moses (Dt 32²⁰) as well as in Job 4¹⁷ etc. (18 times), 1⁸ 8⁵ etc. (12 times), Is 8¹ 13^{7, 12} 24⁶ 33⁵ 51^{7, 12} 56², Jer 20¹⁰, 2 Ch 14¹⁰; cf. the Aram. *'ēnāsh* in Ezr 4¹¹ 6¹¹, Dn 2¹⁰ etc.

2. The portions of the OT which are characterized by the 'higher' style embrace the two categories of *addresses* and *poems*. This may be noted clearly enough, we think, by comparing the Book of Isaiah and the Psalms with one another. For instance, Is 1² reads—

'I have nourished and brought up children,
and they have rebelled against me.
The ox knoweth his owner,
and the ass his master's crib:
but Israel doth not know,
my people doth not consider.'

Here we find that peculiar construction of clauses to which, so far as the present writer is aware, the name 'parallelismus membrorum' was first given by Robert Lowth in the Fourteenth of his famous *Praelectiones de poesi Hebraeorum* (Oxonii, 1753). But this ideal rhythm (explained psychologically and comparatively in *Stilistik*, pp. 307-311) is not met with everywhere in Isaiah. For instance, when we read 'When ye come to appear before me, who hath required this at your hand to tread my courts?' etc. (12¹²⁻¹⁴), it would be precarious here to attribute to the author an aim at *parallelismus membrorum*. As little can any such intention be detected in sentences like 'In that day a man shall cast his idols of silver and his idols of gold, which they made each one for himself to worship, to the moles and to the bats' (2²⁰). Such instances occur frequently in the prophetic books; and if these contain also sentences which exhibit the *parallelismus membrorum*, it must be remembered that the higher form of prose, as employed especially by good speakers, was not without a certain kind of rhythm. This is pointed out by no less an authority than Cicero in the words 'Isocrates primus intellexit etiam in soluta oratione, dum verum effugeres, modum tamen et numerum quandam oportere servari' (*Brutus*, viii. 32); and we find a confirmation of his statement when we examine the opening words of his own First Oration against Catiline: 'Quousque, tandem, abutere, Catilina, patientia nostra? Quamdiu etiam furor iste tuus nos eludet? Quem ad finem sese effrenata iactabit audacia?' The word *nābī*, indeed, means literally 'speaker' (cf. the present writer's *Offenbarungsbegriff des AT*, i. 71-78), and prophecies as such could be co-ordinated with the productions of poets only if all prophetic utterances bore upon them the characteristic marks of poetical compositions. But no one would venture to assert this, for instance, of Zec 1-8 or of the Books of Haggai and Malachi. The last-named portions of the OT lack even those elements of the higher diction described above, (1). Further, the author of Ps 74⁹ did not count himself a prophet, for he says expressly of the age in which he lived, 'There is no more any prophet' (see, further, *Stilistik*, p. 318 f.).

A characteristic feature of the OT prophecies is that they begin with a Divine utterance, which they

then go on to develop. For instance, the Book of Isaiah contains at the outset God's declaration 'I have nourished and brought up children,' etc. (vv. 26, 27), which the prophet as God's interpreter (30²²) then illustrates in detail. Note the words 'They have forsaken the LORD,' etc. (1^{4b}), and 'Unless the LORD of Hosts had left us,' etc. (v. 2). Many similar instances will be found in *Stilistik*, p. 253 f. Another peculiarity of the style of the Prophets is that many of them commence with censure, then speak of the punishment of the impenitent, and close with the announcement of deliverance for the godly. This order is found, for instance, in Am 7¹⁻⁹ [on 9⁸⁻¹⁰ see Driver, *Joel and Amos*, pp. 119-123], Hos 1²⁻²³, Is 1²⁻²⁴ 2³⁻⁴⁸, Mic 4⁹. 11-15 5¹ etc.

The true relation of the Prophets of Israel to poetry consists, in the opinion of the present writer, in the circumstance that here and there they intersperse their addresses with poetical compositions. Thus in Is 51-6 we have a 'song' about the vineyard of Jahweh, and specially frequent are passages which reproduce the rhythm of the lament for the dead (the *kēnā*). This rhythm, which resembles the elegiac measure of the Romans, is heard in such passages as Am 5²—

'The virgin of Israel is fallen,
she shall no more rise,
She is forsaken upon her land,
there is none to raise her.'

The same rhythm is found also in the Prayer of Hezekiah in Is 38¹⁰⁻²⁰. Another 'elegy' occurs in Jer 9¹¹—

'And I will make Jerusalem heaps,
and a den of dragons,
And I will make the cities of Judah desolate,
without an inhabitant.'

And such 'elegies' recur in v. 21, Ezk 19². 14 26¹⁷ ('How art thou destroyed,' etc.) 27³². 32 28¹²². 32²⁶. 16. 19²⁷. See, further, art. POETRY, vol. iv. p. 5.

3. The structure of the other poetical parts of the OT (cf. מַעֲשֵׂי 'my works,' kar' & Ps 45¹) is not easy to determine. But certain conclusions may be affirmed with confidence, and the first of these is that the rhythm of ancient Hebrew poetry does not consist in the alternation of short and long syllables. W. Jones held, indeed (*Poeseos Asiaticae Commentarii*, London, 1774, cap. ii.), that the poems of the OT exhibit a regular succession of syllables of different quantity, such as we find in Arabic poems. But he was able to prove his point only by altering the punctuation and by allowing the Hebrew poets great freedom in the matter of prosody. The conclusion on this subject reached by the present writer in *Stilistik* (p. 341) is maintained also by Sievers (§ 58): 'Hebrew metre is not quantitative in the same sense as the classical.' Hence it is now admitted in all the more recent literature on Hebrew poetry, that the rhythm of the latter is based upon the alternation of unaccented and accented syllables. Still there are various nuances to be observed in the views held by those who have investigated this subject. G. Bickell (*Metriques Biblica Regulae*, etc., 1879, etc.) holds that 'the metrical accent falls regularly upon every second syllable.' But, in order to make this law apply to the Psalms, he has either removed or added some 2600 vowel syllables and proposed some 3811 changes, as is pointed out by J. Ecker in his brochure, 'Professor G. Bickell's *Carmina Veteris Testamenti metrica* das neueste Denkmal auf dem Kirchhof der hebräischen Metrik' (1883). Nevertheless, Bickell has adhered to his principle, and gives us his transcription, for instance, of Job 32⁶ thus—

'Za'ir 'ani leyāmīm
W'attām sabīm yeshishīm
Al-kēn zahālī wa'ira'
Mehāvvoth dēl'ēthkheni.

That is to say, he makes Elihu speak in Iambic Tetrameter Catalectic. But, in order to reach this result, he introduces in v. 2⁶ the superfluous word *sabīm* 'grey-headed,' while in v. 2^{6a} he robs *zahālī* of its ending -ī, which in Hebrew is the characteristic of the 1st person singular. In spite of such objections, Duhm in his Commentary on Job (*Kurzer Hdcom.* 1897, p. 17) accepted without reservation Bickell's theory of the rhythm of ancient Hebrew poetry. Afterwards, however, he rightly abandoned it (in his Commentary on the Psalms in the same series, 1899, Einleit. § 24). The falsity of Bickell's view is demonstrated by the present writer in *Stilistik* (p. 339 f.), and in like manner Sievers (§ 55) declares, 'I can take no further account of Bickell's system.'—A preferable view of the rhythmical character of OT poetry is that which is represented especially by J. Ley. According to this theory, the ancient Hebrew poets paid regard only to the accented syllables (cf., on this point, *Stilistik*, pp. 330-336). But even the advocates of this view are divided into two schools. The majority (e.g. Duhm, *Psalmen*, 1899, p. xxx) hold that the Hebrew poets aimed at an equal number of 'rises' in the corresponding lines. To this group belongs also Sievers (cf. §§ 52 and 88 of his *Metrische Studien*, 1901, Bd. i.). But Budde and still more the present writer have come to the conclusion that a Hebrew poet aimed at nothing more than the essential symmetry of the lines that answer to one another in his poem. This may be observed, for instance, in the following four passages: 'Be instructed, ye judges of the earth' (Ps 2^{10b}), 'and rejoice with trembling' (v. 11^b), 'and ye perish from the way' (v. 12^b), and 'blessed are all they that put their trust in him' (v. 13^a). Our conclusion is confirmed also by the poetical compositions which are sung by the inhabitants of Palestine at the present day (see *Stilistik*, pp. 337, 343). Cornill (*Die metrischen Stücke des Buches Jeremia*, 1901, p. viii) supports the same view, so far at least as the Book of Jeremiah is concerned: 'For Jeremiah an exact correspondence of the various *stichoi* was not a formal principle of his metrical system.' Duhm, it is true, in his Commentary on Jeremiah (*Kurzer Hdcom.* 1901) remarks on 2^{2b}: 'In all Jeremiah's poetical compositions the *stichoi* contain three and two "rises" alternately.' But, to make good his theory, he has to deny to Jeremiah a passage like 24¹³ because 'the metre of Jeremiah is wanting' in it. Such a conclusion, however, would be valid only if he were able to adduce other, independent, reasons for the excision of this passage. He urges, indeed, that v. 4 contains a fresh notice of the Divine commission to Jeremiah. But this is nothing strange; such notes occur very frequently in Jeremiah and the later Prophets (see the passages in *Stilistik*, p. 174). Moreover, vv. 29-31 of the same chapter are allowed by Duhm himself to be Jeremiah's, and yet v. 29^a is followed by a fresh call, 'O generation, see ye the word of the LORD,' quite in the manner in which v. 4 follows upon v. 2^a. Further, Duhm thinks himself entitled to deny 24¹³ to Jeremiah because the people of the LORD are addressed in v. 4 as 'house of Jacob,' a designation which Duhm believes to be unused except by later writers. But 'house of Jacob' occurs also in Is 2⁶ and 8⁷, both of which passages are regarded by Duhm himself (in Nowack's *Hdcom.*) as Isaianic; and the same expression is found in Am 3¹³ and Mic 2⁷ 3⁹, passages which cannot be attributed to 'later writers.' Finally, Duhm's view of Jer 24¹³ raises the difficulty that Israel is treated in v. 2^a as a feminine, but in v. 14 as a masculine, subject. But, if v. 14 is the sequel of v. 13, Israel is naturally treated as masculine, because it has just been designated in v. 13 by the masculine word 'am 'people.' In

any case, it may be added, the supposed interpolator of vv. 4-13 knew nothing of the metrical system which Duhm attributes to Jeremiah, else he would have accommodated the form of these verses to their surroundings. Hence the present writer is unable to accept Duhm's view as to 'the metre of Jeremiah,' quite apart from the fact that, according to our foregoing contention (see above, (2)), Jeremiah was not a poet.

4. Some interesting features of style occur sporadically in various parts of the OT.—(a) There are **alphabetical acrostics**. The present writer cannot, indeed, admit that Nah 12-19 belongs to this category [but see art. NAHUM in vol. iii. p. 475], which, however, probably includes Ps 9 f., and certainly Ps 25. 34. 37. 111 f. 119. 145, Pr 31¹⁰⁻³¹, La 1-4, and Sir 51¹³⁻³⁹, as is shown by the recently discovered Heb. text (cf., further, *Stilistik*, pp. 357-359). There is another species of acrostic which we do not believe to be found in the OT. The letters, for instance, with which the lines of Ps 110^{1b-4} commence are not intended to point to שמע, as the name of Simon the Maccabee, who reigned B.C. 142-135. That such is the case is represented, indeed, by Duhm (*Kurzer Hdcom.* 1899, *ad loc.*) as unquestionable. But, in the first place, it is surely awkward that the alleged acrostic should include only part of the poem. Secondly, as has been shown by Gaster (*Academy*, 19th May 1892), the name *Shim'on* is written upon the coins (where the vowel letters are relatively rare) 40 times with and only once without the *v*. Yet the latter is the way in which, upon Duhm's theory, it would be written in Ps 110. Once more, the clause 'until I make thine enemies thy footstool' (v. 1b) would be in glaring opposition to the statement of 1 Mac 14⁴¹ that Simon was to hold office 'until a trustworthy prophet should arise.' The former (Ps 110^b) promises the highest degree of triumph for the king who is there addressed, the latter (1 Mac 14⁴¹) reminds Simon that his choice to be prince was subject to recall.—(b) Other poetical compositions in the OT are marked by frequent use of the figure *Anadiplosis* described above (iii. (5)). Such is the case with the fifteen psalms (120-134). For instance, the 'dwell' of 'that I dwell in the tents of Kedar' (Ps 120^{5b}) is taken up again in the 'dwell' of 'my soul hath long dwelt with him' (v. 6a). Again, the two lines 'that hateth peace' (v. 6b) and 'I am for peace' (v. 7a) have a connecting link in the word 'peace.' The same characteristic is still more marked in Ps 121, as may be seen from the clauses 'From whence shall my help come?' (v. 1b) and 'My help cometh from the LORD' (v. 2a). The familiar title of these fifteen psalms 'Songs of Degrees' (AV; RV 'Songs of Ascents') has reference, in the opinion of the present writer, to their rhythmical peculiarity as well as to their destination to be sung by the caravans of pilgrims journeying to Jerusalem (cf. *Stilistik*, pp. 302-304).—(c) **Rhyme** is found in the poetry of the OT only in the same sporadic fashion as in the plays of Shakespeare (where, e.g., 'rise' rhymes with 'eyes' at the close of *Hamlet*, Act I, Scene ii, or 'me' with 'see' in Act III, at the end of Ophelia's speech). Rhyme of this kind may be observed in the very earliest poetical passage of the OT, namely Gn 4^{2a}, where *kōlî* 'my voice' rhymes with *imrālî* 'my speech.' But such rhymes, which could not readily be avoided in Hebrew, are not found at the end of every line of an OT poem. H. Grimme claims, indeed (in an article entitled 'Durchgereimte Gedichte im AT' in Bardenheuer's *Biblische Studien*, Bd. vi. 1901), to have discovered poems of this kind in Ps 45. 54 and Sir 44¹⁻¹⁴. But our suspicions are awakened at the very outset by the circumstance that the

poet does not exercise his rhyming skill at the opening of his composition (Ps 45²). Grimme offers, it is true, a scansion of the verse, marking it as he does with the sign of *arsis*, but he cannot point to the presence of rhyme in it. Further, with reference to the following lines, are we to hold that the poet considered an identity of final consonants (as in 'oznîkh and 'abîkh of v. 11^{1b}) to amount to rhyme, although the standing and correct conception of the latter demands an assonance of the preceding vowel, such as is heard even in the *rime suffisante* (e.g. in 'sourir' and 'desir') of the French? Again, Grimme, in order to establish a rhyme between the end of v. 3b and v. 4b, drops in v. 3b the closing word (*l'ôlām*) of the MT, and alters the preceding words. In like manner he transposes the words in v. 4a, and again drops two words in v. 10b. Lastly, all the rhymes which Grimme discovers in Ps 45 consist simply of the assonance of the pronominal suffix *-kh*, and he increases the number by making the masculine form for 'thy,' namely *-khā*, the same as the feminine form, namely *-kh*. Thus instead of the MT *hādārekhā* (v. 3^{4b}), 'thy majesty,' he would pronounce *hādārēkh*, a course of procedure which is shown to be wrong by R. Kittel in his treatise *Ueber die Notwendigkeit und Möglichkeit einer neuen Ausgabe der hebräischen Bibel* (1901), §§ 62-68. The weakest point in Grimme's contention is found in the circumstance that the rhymes he discovers depend upon an assonance of a series of pronouns, which could not be avoided in Hebrew. Why should not the composer of Ps 45 have placed at the end of v. 4b a word to rhyme with the final *l'ôlām* of v. 3b? At all events, the tradition which allowed *l'ôlām* to stand at the end of v. 3, knew nothing of any intention on the part of the author of Ps 45 to provide all the lines of his poem with rhymes. Grimme's attempt to demonstrate the presence of rhyme in Ps 54 and Sir 44¹⁻¹⁴ must equally be pronounced a failure (see the present writer's brochure, *Neueste Prinzipien der alttest. Kritik geprüft*, 1902, p. 24).

5. The last feature we wish to notice as discoverable in the stylistic structure of the OT is the construction of **strophes**. Those scholars who at present are disposed to co-ordinate the prophecies and the poems of the OT, speak of strophes also in the Book of Isaiah, discovering them, for instance, in 28-31 vv. 12-17 and vv. 18-21. But even an orator may unfold his subject in sections of nearly equal length, and may conclude each of these with the same sentence, the so-called *Epiphora* (see above, iii. (5d)). Lately, the opening of the Book of Amos has been a favourite field for attempts to discover a strophic structure. The earlier attempts are examined in *Stilistik*, pp. 347-352, and Sievers (i. § 103) agrees with the judgment expressed there by the present writer. But a renewed effort of the same kind has been made by Löhr in his *Untersuchungen zum Buche Amos*, 1901. He proposes to regard the four prophecies against Damascus, Gaza, Ammon, and Moab (13-6 vv. 7-8 vv. 12-15 21-3) as four strophes, each consisting of 4+2+4 *stichoi*. But, in order to make out this uniformity, he is compelled in 1³ to reckon the object 'Gilead' as the fourth *stichos*. Similarly, in 2¹ the fourth *stichos* has to be made up simply of *lassid* ('into lime'). Short parts of sentences have thus to be counted as whole lines, although in the corresponding passage of the prophecy against Ammon (13-15) a whole clause ('that they might enlarge their border,' v. 13¹⁵) is found, which Löhr himself takes as the fourth *stichos* of the 'strophe' 12-15. The creating of *stichoi* in such a fashion, in order to form strophes, appears to the present writer to be an artificial procedure, the responsibility for which belongs, not to the

prophet. Amos but to modern upholders of the theory that the Prophets of Israel meant to employ 'strophes.' Our view of the matter is that also of Cornill in the *Theol. Rundschau* (1901, p. 414 f.). Sievers (*Metrische Untersuchungen*, ii, p. 473) gives up the attempt to establish an exact equality between corresponding lines, for, according to him, 1st ('because they have threshed,' etc.) contains four feet, while v. 6th has five, v. 13th six, and 2nd seven.—In the real poems of the OT there are not a few traces of an aim at a strophic structure. The latter cannot be denied, for instance, to the author of Ps 2, who evidently meant to exhaust his subject in four sets of three verses each. Such an aim was connected also with the construction of alphabetical acrostics (see above, (4)). What, for instance, are the twenty-two groups of eight verses each of which Ps 119 is made up, but strophes? Such divisions of a poem are at times indicated even externally. We have an instance of this in the occurrence of quite similar clauses, 'Surely every man at his best estate is wholly vanity' and 'Surely every man is vanity,' in Ps 39th and v. 11th. In 42nd, 43rd, again, we have the thrice repeated 'Why art thou cast down, O my soul, and why art thou disquieted within me?' and there are a good many similar 'refrains' in the Psalter (cf. 46th, 49th, 57th, 136th, etc., see *Stilistik*, p. 346 f.).

V CONCLUSION.—1. In so far as the stylistic differences between Biblical writings depend upon the choice of words, the style is not without significance for the purposes of literary criticism. This is proved in the present writer's *Einleit. ins AT*, pp. 147–151, and its truth reaffirmed, in reply to recent doubts expressed by W. H. Cobb, and defended, with fresh materials, in the *Expository Times*, xiii. (1901) p. 134. For instance, the relative pronoun is expressed by *כִּי* in Is 1st, 2nd, 40th, 21st, 26th, 30th, 55th, 28th, but *וְ* is not met with till 40th and 43rd. Again, the negative *אֵין* may be counted at least sixteen times in Is 1–6. Yet how easily we might have had at least one occurrence of *לֹא*, the word used in 40th, 43rd, 44th. Now, these and other words selected in chs. 40 ff. belong to the vocabulary of the 'higher' style of the Hebrews, and it is a fact that in chs. 1 ff. Isaiah cultivates the most elegant mode of writing. Why should he, then, have avoided in these chapters all those elements of the higher style for which a preference is shown in chs. 40 ff.? Such conduct would be all the more incomprehensible, seeing that the most of the linguistic peculiarities which mark Is 40 ff. concern expressions which, on account of their frequency, are employed without deliberate choice and almost without consciousness.—But a number of the more recent expounders of the OT have thought to discover a critical touchstone also in features of Biblical style which do not depend upon the choice of words. Duhm, for instance, says in his Commentary on Isaiah in Nowack's *Hdkom.* p. 30: 'The fate of the unknown city is depicted in 34th. in too elegiac a strain to allow of our assigning these verses to Isaiah.' He has in view the words 'Thy men shall fall by the sword, and thy mighty in the war,' etc. But to say that this is 'in too elegiac a strain' is simply a subjective opinion, whose correctness is not proved by Duhm, and cannot be proved. For the strongest expressions of grief over the catastrophes that overhang Israel are given utterance to by Isaiah in other passages, such as 1st–9 and 61st–13, which are allowed by Duhm himself to be genuinely Isaianic. A number of similar critical judgments, which have been built in recent times upon the mannerisms of style in certain portions of the OT, are examined in the present writer's brochure, *Neueste Prinzipien der alttest. Kritik geprüft*, 1902, pp. 13–19.

2. The differences in style between various books of Scripture have a special significance from the point of view of the *history of religion*. It is a weighty circumstance that Nathan's prophecy, which is found in 2 S 7th–16, is reproduced somewhat differently in 1 Ch 17th–19, and that the oracle of Is 2nd–4 has another form in Mic 4th–5. From this we gather that the Israelites of earlier times cared for nothing more than to preserve the contents of revelation in their essential identity. The form was of importance only in so far as it served for the preservation of the contents, and thus, even with the Prophets, the form was the human element. God permitted His interpreters to make use of the language of their own time. If this statement required proof, it would be found in such facts as the following. In the prophetic writings the two forms for the pronoun 'I,' namely 'anōkhi and 'ani, stand to one another in the following ratios:—in Amos as 10 : 1, in Hosea as 11 : 1, in Micah as 1 : 2, in Jeremiah as 35 : 51, in Ezekiel as 1 (36th) : 138, in Daniel as 1 (10th) : 23, in Haggai as 0 : 4, in Zec 1–8 as 0 : 9, in Malachi as 1 : 8. Then in the historical book, Samuel has 48 'anōkhi to 50 'ani, Kings 9 to 45, Ezra 0 to 2, Nehemiah 1 to 15, Chronicles 1 (1 Ch 17th || 2 S 7th) to 30, Esther 0 to 6. A number of other evidences will be found in the present writer's article 'Prophecy and History' in the *Expository Times*, xi. (1900) pp. 305–310. The above assertion that the form of the language is the human element in the Bible, is subject only to the reservation that the contents of a prophecy were naturally not without influence upon its form, and this was the case also with the spirit which animated the prophets (Mic 3rd, Is 8th etc.). But we are convinced that there is still another point to be observed. When, for instance, we read 'They pierced my hands and my feet' (Ps 22nd), the present writer cannot believe this sentence to have been written without the co-operation of the Divine Spirit, who was the supreme director of Israel's history. Such expressions were meant to pre-establish a harmony between the Old and the New Covenant, so that believers who lived under the new dispensation might be strengthened in their faith by noticing the presence of such features in the earlier history of God's saving purpose.

LITERATURE.—In addition to the works mentioned in the introductory part of the above article, the present writer's *Stilistik, Rhetorik, Poetik, in Bezug auf die Biblische Literatur komparativisch dargestellt* (1900) may be consulted throughout. For special points, reference may be made to Karl J. Grimm's *Euphemistic Liturgical Appendices in the OT* (1901), pp. 3–5, and Ed. Sievers' *Metrische Untersuchungen*, 2 vols. (1901).

ED. KONIG.

SYMBOL, SYMBOLICAL ACTIONS.—

- i. Distinction between Metaphor and Symbol.
- ii. Symbols in Scripture.
- iii. Symbolical actions: (A) in common life; (B) in the religious life: (a) constant or usual actions; (b) unusual actions. The symbolical actions in the prophetic literature.

I. DISTINCTION BETWEEN METAPHOR AND SYMBOL.—Both these terms stand for something which is not used in its barest literal sense or for its proper purpose. Both describe methods which are employed to give concrete expression to ideas belonging to the realm of spirit. But what the *Metaphor* is in the sphere of speech, that the *Symbol* is in the sphere of things. 'Metaphorical' applies to expressions, 'symbolical' is an attribute of objects and actions. How closely allied the two conceptions are is shown by the fact that in familiar speech the terms are occasionally interchanged. For instance, we recently met with this sentence: 'If the ordinary man is to fulfil the command to love God above everything, the word "love" must be understood merely as a symbolical [*sinnbildlich*]

designation for two dispositions of mind for which there is no more fitting expression' (*Die Grenzboten*, 1900, p. 447). The correct term here would be 'metaphorical,' not 'symbolical.'

The varieties of Metaphor which occur in Biblical literature are enumerated and explained in the present writer's *Stilistik, Rhetorik, Poetik, in Bezug auf die Biblische Literatur komparativisch dargestellt* (1900). But the notions of 'Symbol' or 'symbolical' could not be handled there, because they have not to do with a sphere in which language is the agency at work. Hence the explanation there given (pp. 93-109) of Metaphor and the present article will be found to supplement one another.

ii. SYMBOLS IN SCRIPTURE.—The extent to which symbolism pervades the Biblical literature is a doubtful question. The following may be regarded as the surest instances:—

(a) The word *ʾššera*, which had all along, in the sense of 'gracious,' been an attribute of Astarte, and hence appears also as a personal name for her (1 K 15¹⁸ [= 2 Ch 15¹⁶] 18¹⁰, 2 K 21⁷ 23⁴⁻⁷), came in later times to be used mainly as the name for the symbol of this goddess, namely a tree, in allusion to the fruitfulness of the life of nature (Ex 34¹³, Dt 7⁵ etc., 2 Ch 34⁷).—Further, the *hammānīm* (Lv 26³⁰, Is 17⁸ 27⁹, Ezk 6⁴⁻⁶, 2 Ch 14³ 34⁴⁻⁷ et al.) were miniature obelisks, which represented the sun's rays. They were symbols of the sun-god who in Phoen. inscriptions is called *baʿl ḥamān* *baʿl ḥamān*, and the like (cf. Bloch, *Phon. Glossar*, p. 22).—The *mazzēbōth*, again ('pillars,' Gn 28¹⁸ etc.), were not set up on their own account. They were not meant to be dwelling-places of the Deity, but were symbols, expressive of gratitude for a Divine revelation (Gn 28²² 31¹³ etc.); primitive altars (cf. Ex 20²⁵, Is 19¹⁹); allusions to the rock (*Zūr*), which formed the surest ground of trust for Israel (Dt 32⁴⁻¹⁵, 18 etc.; *Stilistik*, p. 99³²⁻³⁴); or they were symbols of the twelve tribes of Israel (Ex 24⁴, cf. 1 K 18³¹).

(b) It is equally unmistakable that the visible dwelling-place of God, i.e. the Tabernacle and the Temple, was a symbol of His invisible dwelling-place. In point of fact, the Holy Place and the Holy of Holies correspond respectively to the heavens and the highest heaven (עֲלִיּוֹת 1 K 8²⁷ etc.), while the forecourt was the analogue of the earth, which, according to Is 66¹, is God's footstool. Josephus was quite right, then, when he said long ago that the subdivision of the sanctuary was an imitation of the constitution of the universe (*Ant. III. vi. 4*: πρὸς μίμησιν τῆς τῶν δῶν φύσεως). The same notion is favoured by He 9²⁴ οὗ γὰρ εἰς . . . ἀντίτυπα . . . ἀλλ' εἰς αὐτὸν τὸν οὐρανόν. Hengstenberg contended that the OT sanctuary was to be viewed as symbolizing the pre-Christian stage of the Kingdom of God (*Authentic des Pent.* ii. 628 ff.). But in that case the arrangement of the sanctuary of the religion of Israel would have pointed to the imperfection of that religion; and the view that this arrangement was chosen in order to express the truth that the OT religion was imperfect, is unnatural. Still less conceivable is the notion (Schegg, *Bibl. Arch.* 1887, p. 418) that 'the sacred tent typified the Christian Church.'

(c) A symbolical meaning of numbers cannot be certainly demonstrated for the OT. This question has already been so exhaustively discussed in art. NUMBER in vol. iii., that only a very little needs to be added here.—The circumstance that the sanctuary was divided into three parts, has just been explained. It was not, then, on account of the number 'three' that this arrangement was adopted. That number was not a symbol of the Deity (Schegg, l.c. 420) at the OT stage of religion. As little is a symbolical meaning of the number 'four' evident

in the construction of the Sanctuary. Nor was the number 'ten' meant to express the idea of 'perfection' (Schegg, l.c. 419), as one may see from the fact that the Holy of Holies in Solomon's temple formed a cube of 20 cubits (1 K 6³).

(d) With somewhat more foundation it may be contended that the colours selected for the adornment of the OT sanctuary had a symbolical meaning. Why, for instance, does blue- or violet-purple (*tekheleth*) occupy the first place among the four colours of the curtains of the sanctuary (Ex 26¹)? Without doubt, because it was meant to allude to the unclouded sky and thus to God. But, to take another instance, it appears to the present writer doubtful whether the red-purple (*argāmān*) 'recalls the God of judgment,' as was suggested by Franz Delitzsch in his interesting work, *Iris: Studies in Colour and Talks about Flowers*, 1888, p. 55. On the other hand, the white colour which we note in the high priest's dress (Ex 28³⁰ etc., Rev 4⁴), and in the horses, etc., of Zec 6³ and Rev 6² 19¹¹ (cf. 14¹⁴), is as certainly a symbolical expression of purity, salvation, and victory as black (Zec 6², Rev 6² 12¹²) is a symbol of death.

(e) It may be added that the forms of the CHERUBIM in the Tabernacle (Ex 25¹⁸ etc., 26¹⁻³¹) and the Temple (1 K 6²³⁻³², Ezk 41¹⁸) were symbols of the presence of God (cf. Ps 18¹¹). Again, what but God's dominion over nature can have been meant to be represented by the carved palms and flowers (1 K 6³²⁻³³ 7³⁶, 2 Ch 3⁷)? As to the lions, finally, which were to be seen on various pieces of the furniture of the Temple (1 K 7²⁹⁻³⁶) and on the throne of Solomon (10²⁰), were these not symbols of the power exercised by the heavenly or the earthly king of Israel? This symbolical significance of the lion shows itself also in the description of the Cherubim (Ezk 1¹⁰ 10²⁰) and the four apocalyptic creatures (Rev 4⁷); and in the same passages we find the ox, the eagle, and the man as symbols of strength, swiftness, and reason.

iii. SYMBOLICAL ACTIONS.—While it is a debatable question how far the realm of Symbol extends in the Biblical literature, the sphere of *symbolical actions* is defined with almost complete precision. For it is easy, in the case of each particular action, to perceive whether it is performed for its own sake or in order to express an idea. But what is the best classification for the wide department of symbolical actions? Perhaps as suitable a course as any will be to distinguish symbolical actions (A) of common life and (B) of religious life. The latter class will then be subdivided again into ordinary and extraordinary actions.

A. SYMBOLICAL ACTIONS IN COMMON LIFE.—(a) The very beginning of life was connected with a symbolical transaction. The newborn child used to be placed on the knees of the father, not merely to be caressed by him (Is 66^{12b}), but also to be acknowledged as his offspring. This is the most probable meaning of Job's question, 'Why did the knees receive me?' (Job 3^{12a}). For in the two *stichoi* of v. 12 it is most natural to find a reference to the action respectively of the father and the mother, and the placing of the newborn child on the knees of the father is encountered also outside Israel as a recognition of the child by the father (cf. *Il.* ix. 455, etc., and Lat. *tollere*). It is essentially the same act that is referred to when in the MT of Gn 50^{25b} it is said that great-grandsons of Joseph were 'born upon his knees.' The expression יָרַדָּה answers to the question Whither?, and the meaning is that great-grandsons of Joseph were brought after their birth to the supreme head of the family that they might be recognized by him as new members of it. It is quite natural that this statement should have come in later times to be regarded as incredible.

Hence in the Samaritan Pentateuch we find the reading *וַיִּשְׂרַח* 'in the days of' substituted. But if this had been the original text, as is assumed in Kautzsch's translation of the OT, and by Holzinger in the *Kurzer Hdbch. (ad loc.)*, it is unintelligible how such a strange reading as the other should have arisen. And how does the *וַיִּשְׂרַח* 'also' witness against the reading of the MT, as Holzinger contends? This conjunction really couples the two facts that Joseph lived to see grandsons not only in the line of Ephraim, but also in that of Manasseh. Holzinger further argues that, supposing the statement in Gn 50^{25b} refers to adoption, Joseph may have adopted Machir but cannot have adopted his sons. 'Machir certainly gained the same standing as Manasseh, but his sons did not.' But is it really established as a necessary conclusion that the narratives found in the patriarchal history simply reflect the later history of the tribes of Israel? Is it not rather possible that the story of Gn 50^{25b} contains an argument against the correctness of this recent theory?—Further, adoption on the part of the mother is clearly expressed in the words attributed to Rachel in Gn 30^{3b} 'And she (Bilhah) shall bear upon my knees, and so shall I come into possession of a family from her.'

(b) Not only the beginning of life but also *new steps* in life were marked by symbolical transactions. A woman captured in war, who is chosen by an Israelite to be his wife, 'is to shave her head and pare her nails' (Dt 21¹²). In this way she is to indicate that her former state of mourning has ceased, and 'that she is about to begin life again under new auspices' (Driver, *Deut. ad loc.*). It is not possible to discover in either of the two actions 'expressions of grief,' as is done by Bertholet (*Kurzer Hdbch. ad loc.*). On the one hand, this interpretation is not required on the ground of 14¹. For in the last-named passage and in Jer 16⁶ and Ezk 7¹⁸ it is not the simple shaving off of the hair (Dt 21¹²) that is forbidden, but 'the making of a baldness between the eyes, i.e. on the forehead.' On the other hand, Bertholet's view of Dt 21¹² is reduced to an impossibility in view of v. 12a. For it is added there that the woman in question is also to put off 'the raiment of her captivity,' which is quite a different thing from 'to strip herself naked like a mourner' (Bertholet). Consequently the three actions described in Dt 21^{12b, 12c} are really meant to illustrate the fact that a happy change has taken place in the woman's life. It is true that she is still to be allowed a month's time to bewail her parents. But during this she is not to return to her previous absolute mourning. This is proved beyond question by the laying aside of her captive garb (v. 12a). The intention rather is merely that during the month specified she may have time to reconcile herself to the transition from the old to the new condition of things. Thus her situation during this month is a mingling of grief and joy.—A happy advance in life was very clearly expressed by the 'breaking of the yoke,' a symbolical action introduced in Jer 28¹⁰; cf. Is 58⁶, Ezk 30¹⁸, Nah 1¹².

(c) Symbolical actions which denote a *disturbance* of one's life or its *end*.—The border of the garments, especially over the breast, is rent: e.g. Gn 37^{23, 24} 44¹³, Nu 14⁶, Jos 7⁶, 1 S 4¹², 2 S 1³ 31¹ 13³¹ 15³², 2 K 2¹² (עֲרֵפְתָּ עֵצֶם) 5⁸ 11¹⁴ 18²⁷ 22¹⁹, Is 36²² 37¹, Jer 36²⁴, 41⁵, Jl 2²⁴, Job 1²⁰ 2¹², Est 4¹, Ezr 9^{3, 5}, 2 Ch 23¹⁸ 34²⁷, 1 Mac 2¹⁴ 3⁴⁷ 4³⁹ 5¹⁴ 11⁷ 13⁴⁵, Mt 26⁶⁵, Mk 14⁶³, Ac 14¹⁴ (Barnabas and Paul), Jos. BJ II. xv. 4 (γυμνωθεὶς τὰ στήθεα τῶν ἐσθίων περιεργαμένον). Further, one puts on sackcloth, a primitive article of dress, in order to show that one is giving up every convenience and every ornament: e.g. Gn 37²⁴, 2 S 3³¹ 14³ 19²⁴ 21¹⁰, 1 K 21²⁷, 2 K 6³⁰, Is 3³⁴ 15³ 20³ 22¹² 50⁵ 58⁵, Jer 4⁶ 6³⁶ 49³, Ezk 7¹⁸, Jl 1⁸, Am 8¹⁰,

Jon 3⁵⁻⁶, Ps 30¹³ 35¹³ 69¹³, Job 16¹⁵, La 2¹⁰, Est 4^{12, 3}, Dn 9³, 1 Mac 2¹⁴ (περιεβάλλοντο σάκκους), Mt 11³ (cf. 3⁴), Lk 10¹³, Rev 11³ (cf. 6¹³ σάκκος τρίχινος). * One goes barefooted (2 S 15³⁰, cf. Is 20³⁰) and without turban (Ezk 24^{17a}), or neglects washing oneself (2 S 12²⁰). Ashes are sprinkled upon the head: 2 S 13¹⁸, Is 58⁵, Est 4², Jos. BJ II. xv. 4 (τῆς κεφαλῆς κόνιν); cf. G. Jacob (*Altarab. Parallelen*, p. 15, where it is shown how the pre-Islamite Arabs were also wont to sprinkle ashes upon the head in token of great grief); or one simply sits in the ashes: Jer 6³, Ezk 27³⁰ 28¹⁸, Jon 3⁶, Job 2⁸ (cf. La 3¹⁴). In this way one clothed himself as it were with ashes (Est 4¹, cf. Dn 9³, Is 61³), and thus proclaimed in a visible fashion that he was indifferent to the joy of life. Or, again, the hand might be laid upon the head (2 S 13¹⁹, Jer 27⁷), to express the fact that the soul was bowed down by a heavy sorrow. One covered the head (2 S 15³⁰, Jer 14³⁰, Est 6¹²), or at least the beard (Lv 13⁴⁵, Mic 3^{7a}, Ezk 24^{17b, 22}, cf. 2 S 19²⁴ 1) and thereby the mouth, in order to mark oneself as a person who could neither see nor speak for grief. Perhaps the smiting of the thigh or the breast (Jer 31¹⁹, Ezk 21^{17b}, Lk 18¹³) were also meant to express mental suffering.

(d) A special group of symbolical actions expresses the *establishing of a relation* between persons. This is above all symbolized by the *giving of the hand*: 2 K 10¹⁵ ('give me thine hand then'), Ezr 10^{10a} ('and they gave their hand'), Jer 50^{13a}, Ezk 17^{18b}, La 5^{3a}, 2 Ch 30²⁶, Pr 6¹ 11¹³ 17¹⁸ 22²⁸. In 1 Ch 29²⁴ the giving of the hand by the vanquished is the sign of submission, and thus a pendant to the placing of the conqueror's feet upon his neck (Jos 10^{24b}). An alliance is likewise cemented by the one party *laying hold of the right hand* of the other: Is 41¹³ 45¹, Ps 73²³ (cf. 80¹⁸).—The concluding of an agreement was also symbolized by a *common meal* (Gn 26³⁰ 31³⁴, Ex 24^{11b}, 2 S 3³⁰), and it is very natural to find that on such an occasion not only bread (Jos 9^{14a}, cf. v. 5b) but, above all, salt was eaten. For salt serves to keep other articles from putrefaction and consequent destruction, and might thus fittingly point to the security of the agreement. The same is still the practice among the modern Arabs (d'Arvieux, *Mémoires de la Commission de l'Égypte*, etc., Bd. iii. p. 164 f.), and hence the OT speaks of the 'salt of the covenant' (Lv 2¹³) and of 'a covenant of salt' (Nu 18¹⁹, 2 Ch 13^{5b}).—The establishing of a connexion with a property is indicated by a man casting one of his shoes upon it (Ps 60^{10a} 108^{10a}). See art. SHOE in vol. iv.). This is based upon the fact that walking upon a piece of ground is a sign of proprietorship. We may recall the Roman custom of bringing before the pretor a clod of earth from the field which one claimed as his property.—A certain relation was established also when Elijah the prophet cast his mantle upon Elisha (1 K 19^{19b}). A special meaning may be discovered in this act, namely, the investiture with the prophetic mantle (2 K 2²³, cf. Is 20²). So the covering of a woman with one's mantle (Ezk 16⁸, Ru 3⁹) expresses the intention of becoming her protector *par excellence*, i.e. of marrying her. This is the interpretation already given to Ru 3⁹ in the Targum ('and let thy name be named [cf. Is 4¹] over thy handmaid, to take me to be thy wife'), and by Rashi (*ad loc.*: 'this is an expression for marrying' [יָמְנָה לְיָמְנָה]); and 'thy wing' here does not mean 'thy protecting arm,' as M. Peritz (*Zucchi alte arab. Uebersetzungen des Buches Ruth*, 1900, p. 37) holds. The correct view of Ezk 16⁸ and Ru 3⁹ is confirmed by

* Perhaps the *rending of the garments* and the *putting on of sackcloth* should be regarded as the earlier and the later form, respectively, of the same announcement of mourning (so M. Jastrow; cf. *Expos. Times*, 1901, p. 3371.).

Arab custom. 'The son who, in the heathen period of Arab history, took over the widow of his father, threw his garment over her. So, too, Mohammed cast his mantle over the Jewess Saffja, captured at Khaibar, as a token that he desired to have her in marriage' (G. Jacob, *l.c.* p. 23, where other instances of the same thing will be found). Other actions whereby the conclusion of the marriage bond was symbolized, are not mentioned in the OT, unless we are to reckon among these the loading of Rebekah as Isaac's bride with presents (Gn 24^{23a}), and Isaac's conducting of her into the tent of his mother (v. 67a).

(e) The opposite condition of things, namely, the *dissolution of relations*, is indicated as follows. One person takes off another's shoe (Dt 25^{9a} 'נָשָׂא), or the wearer removes it himself (Ru 4^{8b} 'נָשָׂא). The idea at the basis of this act may be explained thus. Seeing that one enters upon the occupancy of a field by treading upon it with his shoes (see above, on Ps 60¹⁰ || 108¹⁰), the pulling off of the shoe indicates the intention of *not* carrying out this occupancy. The drawing off of the shoe was also, among the Arabs, a special sign of the dissolution of a marriage. This is shown by

the use of *خلع* (*khul'un*=*extractio*) for 'divorce.'

'The drawing off of a shoe also meets us in still later times as the symbol of renunciation of allegiance. When a ruler was declared to have forfeited the throne, it was customary to cast off the shoe in a solemn assembly' (Ign. Goldziher, *Zur arab. Philologie*, Bd. i. p. 47). A parallel to the above-cited passage, Ru 4^{8b}, will be found also in Burton, *The Land of Midian*, vol. ii. p. 197.—A very energetic expression for the complete dissolution of a connexion consists in the *shaking off the dust from one's feet* (Mt 10¹⁴ ἐκτυνάζετε τὸν κονιορτόν, κ.τ.λ.; Mk 6¹¹ ἐκτυνάζετε τὸν χοῦν, κ.τ.λ.; Ac 13⁶¹).—The superlative degree of separation from a person may be seen in the *covering of his face* (Est 7^{2b} 'and they covered Haman's face'). By this act he was marked as if non-existing. A similar symbolical action was practised among the Macedonians (Curtius, iv. viii. 22) and the Romans (cf. Bertheau-Ryssel in *Kgf. exeg. Hdb. ad loc.*). Similar to a certain extent is the Turkish custom of sending a silken cord to one who is condemned to death.

(f) *Symbolical actions affecting certain classes of society*.—(a) If a Hebrew slave declined to avail himself of the liberty that was open to him after seven years' service, one of his ears—probably the right one—was bored through with an awl against the door and thus pinned to it (Ex 21^{6b}, Dt 15¹⁷). This was meant to indicate that the service of his ears—i.e. his obedience—must henceforth be indissolubly devoted to this house. The pierced ear is found also amongst other nations as the mark of the slave (Nowack, *Heb. Arch.* i. 177).

(β) The office of house steward was conveyed to one by *laying the key of the house upon his shoulder* (Is 22²², cf. Rev 3⁷). The investiture with the prophetic office is once, too, symbolized by the *giving of a book to eat* (Ezk 3¹).

(γ) We find quite a number of symbolical actions intended to indicate a man's rank as ruler. First of all there is *anointing* (Jg 9⁸, 1 S 9¹⁶ 10¹ 15¹ 16³², 2 S 2⁴ 3³⁰ 5³, 1 K 1³⁰ 19¹³, 2 K 11¹² 23³⁰, Ps 45⁸ 89²¹, 1 Ch 29²², 2 Ch 22⁷ 23¹¹, but not Ps 2⁴). Although this practice of anointing princes is witnessed to even in the Tel el-Amarna letters (*KIB*, Bd. v., Brief 27⁵⁰⁻⁵³ 37⁶¹), it acquired a peculiar meaning in Israel. For the oil which fed the lamps of the sanctuary readily became a symbol of Divine illumination, and so a vehicle of the Holy Ghort.—In the second place, the elevation of a man to

be ruler was expressed by putting on his head a *diadem* (2 S 1¹⁰, 2 K 11¹², Ps 132¹⁸, 1 Mac 11¹³, Rev 19¹²) or a *crown* (2 S 12³⁰, Ezk 16¹³ 21³² 23⁴², Zec 6^{11b}, Ps 21⁴, Est 8¹⁶, 1 Ch 20²).—Thirdly, a ruler was acknowledged by the act of *kissing*. Thus Samuel kissed Saul after he had anointed him king over Israel (1 S 10¹). The kiss, as an act of homage, is found, not indeed in Gn 41^{40a}, but in Ps 21⁴, 1 K 19¹⁸, Hos 13⁴, Job 31²⁷, and the same custom prevailed among the Assyrians (Schrader, *KAT* 455) and other peoples.—Again, a person may be recognized as a sharer in rule by being *caused to sit at one's right hand* (1 K 2¹⁹, Ps 45¹⁰ 110¹, Job 30¹², 1 Mac 10⁶²⁻⁶³, Mt 19²⁸ 20²¹, Ac 7⁵⁵, Ro 8³⁴, He 8¹ 12², Jos. *Ant.* vi. xi. 9: παρακαθεσθέντων αὐτοῦ, τοῖ μὲν πατὴρς Ἰωρδάνου [1 S 20²³] ἐκ δεξιῶν). Thus Nerc made Tiridates, king of Armenia, sit on his right (Sueton. *Nero*, c. xiii.: 'Juxta se latere dextro collocavit'), and Sallust (*de Bello Jugurth.* xi. 3) tells us: 'Hiempsal . . . dextra Adherbalem adsedit . . . quod apud Numidas honori ducitur.' Moreover, when a person is spoken of who stands in need of protection, the man who stands at his right hand is his patron (Ps 16^{8b} 121^{5a}).—Finally, the act of *intercourse with the concubines* of a ruler was meant to indicate seizure of his sovereignty. This was a natural interpretation of the act in question, and is sufficiently authenticated by 2 S 3⁷ and 1 K 2^{22a}. But it was not necessarily its meaning, as von Bohlen (Com. on *Genesis*, 1835) maintains with reference to Gn 35²² and 49⁴, and as has been held since by a number of scholars, as, e.g., Guthe, *GVI* (1899) § 1. 4. In these two passages the act in question may denote merely a gross violation of filial duty, and the same interpretation is put upon it in 2 S 16^{11b}, whereas the struggle for the kingly sway was indicated by other acts (15^{12a}). It is not to Judah, whose tribe actually strove for the hegemony in Israel, that intercourse with one of his father's concubines is attributed.

(g) Another group of symbolical actions expresses *thoughts, feelings, and aspirations*.—(a) The consciousness or the assertion of innocence was symbolized by the *washing of the hands* (Dt 21⁶, Mt 27²⁴, Herod. i. 35: καθάρως χεῖρας ἔων, cf. Verg. *Aen.* ii. 719 f.).—(β) A feeling of aversion to a person is proclaimed by *spitting in his face* (Nu 12^{14a} בִּרְגֵל בִּצְיָהּ; Dt 25^{9a}).—(γ) Bitterness and anger show themselves by *gnashing of the teeth* (Ps 35¹⁴ 37¹² 112¹⁰, Job 16⁹, La 2¹⁶, Mt 8¹² 13³² etc.). Hostile desires express themselves in a similar way: one *gapes with the mouth* as if he would swallow a person (Ps 35²¹, Job 16¹⁰, La 2^{16a}).—(δ) *Clapping the hands* is a gesture expressive sometimes of ill-feeling (Ezk 6¹¹ 21¹⁷⁻²² 22¹³), sometimes of joy (2 K 11¹², Is 55¹², Nah 3¹⁹, Ps 47² 98⁸).—(ε) Scoffing wonder is expressed by *shaking of the head or the hands* (2 K 19²¹, Is 37²², Jer 18¹⁶ 48²⁷, Zeph 2¹⁵, Ps 22⁸ 44¹⁵ 109²⁵, Job 16⁴, La 2¹⁵, Sir 13⁷, Mt 27⁴⁰), silent astonishment by *laying the hand upon the mouth* (Jg 18¹⁹, Mic 7¹⁸, Job 21⁵ 29⁹ 40⁴) or *pressing the lips closely together* (Is 52^{15a}, Ps 107⁴², Job 5¹⁶).—(ς) The fear of profaning a place consecrated to the Deity is expressed by *putting off the shoes*, these being not only a product of man's work, but also dirty (Ex 3⁵ 'נָשָׂא, Jos 5¹⁵, Ex 29³⁰, Lv 8²³, cf. the covering of the feet in Is 6²).—(η) The dread of looking upon the holy God found expression in the *covering of the face* (Ex 3^{6b} 'נָשָׂא, 1 K 19¹³ 'נָשָׂא, Is 6² 'נָשָׂא), and Verg. *Aen.* iii. 405 ff. describes the offering of a sacrifice thus—

'Purpureo velare comas adlopturus amictu,
Ne qua inter sanctos ignes in honore deorum
Hostilis facies occurrat et omnia turbet.'

(θ) The meaning of the interesting ceremony described in 1 S 7⁶, when the Israelites, moved to repentance by the words of Samael, *drew water and poured it out* before Jahweh, is unfortunately

not clear. But perhaps we shall not be wrong to find in it an expression of humility. Bowed down with grief for its sin, the soul melts like water before its God (Ps 67), and prostrates itself before Him (Ps 22²⁸ 'like water I am poured out,' La 2¹⁹).—(c) Much clearer is the meaning of the action attributed in Zec 9⁹ to the future ideal king, namely, the *riding upon an ass*. This is a striking allusion to the eminently peaceful aims of his rule. For the ass was the riding animal not of poverty (cf. 1 K 1³³) but of peace, whereas the horse along with the battle-bow is to be expelled from the future kingdom of God (Zec 9¹⁰, Is 2² 30¹⁵, Mt 21⁷ 26², Jn 18²⁶).

(h) A connecting link between the symbolical actions of common life and those of the religious sphere is found in the *lifting up of the hand*, by which swearing is symbolized. The first instance of this meets us in Abraham's words, יָרֵכְתִי 'I have lifted up my hand' (Gn 14²²), and we have noted the same gesture as mentioned in the following passages: Ex 6⁸ (יָרֵכְתִי), Nu 14³⁰, Dt 32⁴⁰, Ezk 20¹⁶, 15, 22, 28, 36⁷, 44¹², 47¹⁴, Ps 106²⁶, Neh 9¹⁵, Dn 12⁷. To the same category belongs the somewhat obscure expression יָרֵכְתִי לַיָּדָיִם (Ex 17¹³), whether יָרֵכְתִי be regarded as a by-form of יָרֵכְתִי 'throne,' which to the present writer appears impossible, or whether it is a corrupt form of יָרֵכְתִי 'standard.' The latter view seems to us the correct one, because the words manifestly point back to the rod of God (v. 16), which had once more evinced its character as the standard of Jahweh by the defeat of the Amalekites (vv. 10-13). The most probable rendering would thus be: 'With my hand on the standard of Jahweh I declare [as interpreter of the Divine oracle in v. 14b], War continues for Jahweh against Amalek from generation to generation.' Swearing is symbolized, further, by *placing the hand under the thigh*: Gn 24², 47²⁹. See art. THIGH in vol. iv.

There are also two isolated actions mentioned in the OT, which are performed not on their own account, but in order to express an idea. We refer to the *cutting in pieces* of the concubine of the Levite (Jg 19²⁴), and of Saul's two oxen (1 S 11⁷), both of which tokens bear the marks of symbol.

B. SYMBOLICAL ACTIONS IN THE RELIGIOUS LIFE.—(a) *Constant or usual actions.* (a) In *prayer* we find, first of all, the spreading out of the palms of the hands (פָּתַח כַּפַּיִם), 1 K 8²², 33, 54, Is 1¹⁵, Ps 44²¹ 63⁵, Job 11¹⁶, Ezr 9⁶, 2 Ch 6^{12b}, 13^{2b}, 29; cf. Ps 141^{2b}, La 2¹⁹ 34¹. This gesture symbolizes the thought that one comes forward as a suppliant and desires to obtain gifts from God. Hence it is intelligible how also at times the hands simply (פָּתַח) are spread out (Ps 143⁶, La 1^{17a}), or lifted up (Ps 28² 134², Neh 8⁶, 1 Ti 2⁹), or stretched forth (2 Mac 3³⁰ *προετείχεν τὰς χεῖρας*). It is not at all likely that the word פָּתַח 'palms of the hands' was chosen because originally it was the custom to stroke the image of the god (Wellhausen, *Reste*², 105). Would this have been a reason for retaining פָּתַח with the verb 'spread out'? It may be noted that the heathen Arabs also lifted up their hands to heaven in the act of prayer: e.g. we read, 'Then he lifted up his hand towards heaven, and said, O Allah, give me victory over Nahd!' This is a parallel to Ex 17^{11c}. (G. Jacob, *Altarab. Parallelen*, p. 8).—Further, in praying, one practised bowing down (Gn 24²⁶ 47³¹, 1 K 1⁴⁷, Job 1³⁰, Neh 8⁶, Jg 9¹) or kneeling (1 K 8⁵⁴, Ps 95⁶, Dn 6¹⁶, Ezr 9^{6b}, 2 Ch 6^{12b}, Ac 20³⁶ *θεὸς τὰ γόνατα*), sinking of the head (1 S 1³², 1 K 18², Ps 35¹³, Dn 9²⁰). There can be no doubt as to the idea expressed by these actions. They amount to a confession that man humbles himself before his Lord and Judge.

(β) In the act of *blessing*, the hand is laid upon

the head of the recipient, or at least stretched out towards him (Gn 48¹⁴, Lv 9², 2 K 13¹⁶, Mt 19¹³, Mk 10¹⁶, Lk 24⁵⁰). This imposition or motion of the hand is meant to symbolize the passing over of the blessing from the one party to the other—an idea which is expressed by the imposition of hands in other cases as well. Cf. the following groups of passages: Nu 8¹⁰ 27¹⁸, Dt 34⁹, Ac 6⁶ 13³, 1 Ti 4¹⁴ 5²², 2 Ti 1⁶, Lv 16²¹ 24¹⁴, Sus 24; Ex 29¹⁰, Lv 1⁴ etc.; Mt 9¹³, Mk 5²³ etc., Rev 1⁷.

(γ) Other parts of the cultus also provided rich material for symbolical actions. To follow up what was said a moment ago, the *incense offering* is interpreted in Ps 141² and Rev 5⁸ 8² as expressing the idea of prayer ascending to heaven. And no less are the other *offerings* the medium whereby such feelings as gratitude or penitence or the longing for reconciliation with God are expressed in an unmistakable fashion. For a God who is spirit has no need of such offerings for Himself (Ps 50¹⁴; cf. Is 40¹⁵ and Ac 17²⁵).

(δ) Symbolical actions with a *negative* purpose included, in the first place, the oft-mentioned *washings* (Ex 19⁴⁰ etc.). Washing oneself is spoken of elsewhere as an act of self-consecration (Jos 3⁵ 7¹³, 1 S 16⁵; cf. *Odyss.* iv. 759), and least doubtful of all is this symbolical sense in the case of Jesus' washing of His disciples' feet (Jn 13⁷).—Again, the *circumcision* of male children, when eight days old, as this rite was practised among the Israelites, had a symbolical meaning, being intended to indicate that the child in question belonged to the religious community of Abraham.—Within this community smaller circles receive a higher degree of consecration, and this, too, was effected by means of symbolical transactions. In the case of *priests* we read of washing, anointing (see above), etc., Ex 29¹ 40¹³, Lv 8¹², 30. Again, the symbolical actions whereby the separation of NAZIRITES was proclaimed, are described in Nu 6¹⁻²¹ (cf. Jg 13⁷, 13², Am 2¹², and Ed. Vilmar, 'Die symbolische Bedeutung des Nasiräatsgelübdes' in *SK*, 1864). Once more, there are symbolical actions, although their number is very small, connected with *prophets*. The one action of which we read in this case is anointing, and the mention even of this is doubtful. In 1 K 19⁶ it is merely in parallelism with 'Jehu shalt thou anoint to be king' that it is said 'and Elisha shalt thou anoint to be prophet'; and in Is 61¹ it is from the possession of the spirit that the inference is drawn 'therefore hath Jahweh anointed me.' Consequently we hear much in the prophetic writings of symbolical actions, and these demand a more detailed examination.

(b) *Unusual actions in the sphere of religion.*—This category does not yet include the writing up in public of Divine oracles in the way we find the prophets sometimes enjoined to do (Is 8¹ 30⁸, Hab 2²; cf. Jer 36², Ezk 24²). For this was not intended to give publicity to an oracle itself so much as to emphasize one quality of it, namely, its importance. With more reason may this class be held to include those instances in which prophets gave a *symbolical name* to a person or a thing: e.g. 'A remnant shall return' (*Shē'ār-jāshūb*), etc., Is 7³ 8³; 7^{14b} 8^{8b}, 10¹; 30^{7b}; Zec 11⁷. For Isaiah, in bestowing upon one of his sons the name *Shē'ār-jāshūb* (Is 7³), gave an embodiment to the hope that at least a minority of Israel would return to their God; and as often as the bearer of this name walked the streets, he performed a *symbolical action by the bearing of this name*. Although silent, he preached a sermon whose text was Is 6¹³. But, in the most proper sense, the category with which we are dealing has to do with the following passages:—

The prophet Ahijah tore his garment into twelve pieces, to illustrate the Divine determination to divide the kingdom of Israel (1 K 11³⁰⁻³⁷).

A parallel to this passage was found by 'some,' as Abulwalid (*Bigma*, ed. Goldberg, p. 215, lines 28-30) says, in 1 S 15^{27v}. They presupposed the reading וַיִּקַּח , and took Samuel to be the subject of the statement 'and he rent it' (namely, his upper garment). But the subject of the preceding clause וַיִּקַּח is Saul, as the second of two persons that have been mentioned is frequently in the OT taken for granted as the subject of an action (Gn 3^{10a, 11a} etc.; cf. König, *Stilistik, Rhetorik, Poetik*, p. 180, lines 29 ff.). But a symbolical action is really recorded in 1 K 20^{32v}, where we read that one of the 'sons of the prophets' got one of his comrades to smite him, in order that he might exhibit by his wounds the punishment that king Ahab had deserved. A symbolical character belonged also to the iron horns which the false prophet Zedekiah put on, in order to express the notion that Ahab was to push the Syrians as with horns of iron (1 K 22¹¹). Something analogous is seen in the conduct of Tarquinius, who struck off poppy heads (Livy, I. 54) to indicate that his son should deal in like manner with the nobles of the city. While the imperative וַיִּקַּח 'strike' in Am 9¹ is not certainly addressed to the prophet, chs. 2 and 3 of the Book of Hosea belong to the present category. Again, according to Is 20²⁻⁴, the prophet Isaiah announced the defeat of Egypt and Ethiopia beforehand, by going about half-clothed (cf. 58^{7b}) and barefooted, like a captive. We may notice, in passing, the contrast to this presented by the words of Rev 11³ $\text{προφητεύουσιν περιβεβλημένοι σάκκους}$. Jeremiah, too, speaks of similar actions in 13¹⁻¹² (the journey to the Euphrates), 18¹⁻⁶ (the work of the potter), 19¹⁻¹⁵ (the bottle cast out into the Vale of Hinnom), 25¹⁵⁻³¹ (the handing of the cup, which is full of Jahweh's fury), 27^{2v} (putting on of fetters), 28¹⁰⁻¹³ (wearing and breaking a yoke), 32⁷⁻¹⁵ (purchase of the field in Anathoth); cf. also the offering of wine to the Rechabites (35^{2v}), and the building in of great stones (43⁹). In the Book of Ezekiel the following passages come into account: ch. 4 (the lying upon the left and upon the right side), ch. 5 (the cutting off, etc., of the hair), 12^{3v} (the procuring of baggage appropriate to a captive), v. 17^v (eating bread with trembling), 21^{11 (6)} (sighing), v. 19 (14) (smiting the hands together), vv. 24-28 (19-23) (the appointing of two ways), 24^{3v} (the setting on of the seething caldron), 37^{18v} (the two sticks which represent the two separated portions of Israel). Finally, the prophet to whom we owe Zec 9-11 tells how he was appointed to be shepherd of the sheep for slaughter (11^{4v}), and received instructions to take to himself the instruments of a foolish shepherd (v. 15).

With reference to the above passages from the prophetic literature, the difficult question now arises, what we are to hold as to the literal performance of the actions mentioned by the prophets. We will examine the various possible solutions of the problem, in order to arrive at the correct solution.

(a) As in dealing with other questions, the proper course will be to consider the OT data themselves. It appears to the present writer that a starting-point from which a sure conclusion may be reached is to be found in Jer 25^{18v}. There we read: 'For thus saith Jahweh, the God of Israel, unto me, Take the cup of the wine of this fury at my hand, and cause all the nations, to whom I send thee, to drink it (v. 15). Then took I the cup at the hand of Jahweh, and made all the nations to drink, unto whom Jahweh had sent me (v. 17), namely, Jerusalem and the cities of Judah,' etc. (vv. 18-26). Now, it is obvious that the causing of whole cities and peoples to drink *cannot* have been carried out literally. But when, in spite of this, the narrative of this transaction runs as if it had been so, we have at least *one* certain instance of a prophetic action

which to all appearance was literally performed, although its performance is seen to have been an impossibility. Jeremiah thus means nothing more than that he was stirred up by his Divine director to a certain action, and that he carried this out in his inner life. The purpose meant to be served by the Divine commission and the record of it, is to set forth the determination of God with the greatest clearness. Incidents belonging to the spiritual sphere are to pass like an earthly drama before the eyes of the hearer and reader.

The position of matters disclosed in Jer 25^{18v} furnishes a ground for holding that some of the other symbolical actions of which we read in the prophetic books, could also have been performed only ideally. The prophets, like Jeremiah in the above passage, might so relate the symbolical transaction as to guide their hearers to the correct conclusion as to its actual or ideal occurrence. Let us examine this point in detail.

Jeremiah records in 13⁴⁻⁷ how he was commanded by God to bury a girdle by the 'Perath' (רָפַד), and that he carried out this commission. If the contemporaries of Jeremiah must necessarily—and no other possibility can be plausibly made out—have understood by 'Perath' the well-known great river of Asia, the Euphrates, they must at the same time have been aware that the prophet had not actually gone to the Euphrates.—Again, the circumstance noted in Is 20²⁻⁴ that the prophet went about for three years half-clothed and barefooted, is far from natural. But it may be that the statement of time here is not original. The mention of a definite period seemed to be required, and so it was inserted in the form of a so-called round number. We venture to add another remark on this passage. The form of expression, 'At that time Jahweh spake by Isaiah' (v. 2) is extremely surprising, seeing that the following words are addressed to Isaiah. The form is not at all explained by such passages as Ex 9³⁵, Lv 10¹¹, 1 K 12¹⁵, Jer 37³, Hag 1¹⁻³, which are cited by Duhm (in *Kurzer Hdcom.* on Is 20²), for in none of these does any Divine message follow, addressed to the person who is introduced by 'by' (בְּ). Is it too much to assume that the man who wrote the words 'by Isaiah' meant to mark the contents of vv. 2-4 as containing nothing more than the report of an announcement by God? Have we not the same indication in the strange form of v. 3, where the words of God are reported in a definite form meant for the people? Was it not Isaiah's intention by this narrative to call attention to the overthrow of Egypt and Ethiopia?

But, be this as it may, the history which meets us in Hos 1 and 3 was certainly enacted only in the spiritual sphere. By means of the Divinely inspired narrative of the experiences of the prophet with an unfaithful wife, the ideal relations are meant to be portrayed, which had partly been realized in the case of the prophet's Master and the people of Israel, and were partly to follow by way of punishment. It is true that, even in recent times, there have not been wanting exegetes who have seen in these chapters the record of actual experiences (Nowack, *Die kleinen Propheten*, p. 29; Valetton, *Amos und Hosea*, 1898, p. 221 f.; O. Seesemann, *Israel und Juda bei Amos und Hosea*, 1898, p. 32 ff.). But the objections to this view appear to the present writer to be too weighty to be set aside. The marriage of the prophet with a harlot, if it had been an actual incident, would have been altogether too repulsive. And it may be remarked, in passing, that what the prophet was commanded to do was to take to himself a wife of whoredom and children of whoredom (1³). The notion that 'the impure inclinations of this woman did not reveal themselves to Hosea till

after marriage' (Wellhausen, *Skizzen und Vorarbeiten*, v. p. 104 f.; similarly W. R. Smith, *Prophets of Israel*, p. 181 f., and G. A. Smith, *Book of the Twelve Prophets*, i. 238 f.) cannot be reconciled with the text. Our first main argument may be reinforced by the following questions. Would Hosea, even supposing his wife to have been thus guilty, have inscribed her name on the page of history and thus pilloried her for ever? Or would the name of his wife have been so much as named, had it not been a significant one? No, the designations *Gomer bath-diblayim* (Hos 1³) do not really form a proper name. We are constantly told, indeed, that these designations defy all attempts to explain them as appellatives (Nowack, Valetton, *et al.*). But why may not *Gomer* mean 'completion' (Frd. Delitzsch, *Prolegomena*, etc. p. 200), or, better, 'ripeness' (namely, for judgment), or 'end' (cf. *Ps* 7¹⁰ etc.)? Why may we not find in *diblayim* the sense of 'double compression' (cf. E. Meier, *Wurzelwörterbuch*, p. 163 f.; Wünsche, *Erklärung des Hosca*, p. 15; Arab. *dabali* = 'coegit')? May not, then, the epithet *bath-diblayim* characterize *Gomer* as one who had to do with two husbands? (We may recall the question: 'How long halt ye on both knees? If Jahweh is God, follow him; and if Baal, follow him,' 1 K 18²⁴). Finally, it would surely have been a strange circumstance if Hosea's real wife had had a name composed of two elements, capable of being explained as = 'ripeness or end,' and 'double copulation.'

Further, Zec 11^{4a} records how the prophet was told to call one of the two staves, with which he was to shepherd the people of Israel, 'graciousness,' and the other 'union,' 'community of fate' (cf. Ed. König, *Syntax*, § 244c). Would not these very names be enough to show to the prophet's contemporaries that the actions recorded in vv. 4^a were not actually performed? This conclusion is favoured by the circumstance that there is no mention of the execution of the command given in v. 1².

Of greatest weight for the solution of the problem before us are the indications supplied by the prophet who speaks most of symbolical actions, namely Ezekiel. The data are as follows:—In the first place, in his narratives regarding symbolical actions, it is only rarely (12⁷ 24¹⁸) that he states that these when commanded were carried out. Secondly, in place of mention of the actual performance of these, we find rather an account of their symbolical meaning (4^{18c} 5¹² 12¹⁹ 21²⁴⁻²⁶). Thirdly, the external performance of the charge 'thou shalt eat thy bread with trembling, and drink thy water with trembling and despair' (12¹⁸), would have been scarcely noticeable. The intention of presenting clearly the Divine decree as to the final chastisement of Israel was realized by the bare narrative about a Divine command as effectively as would have been the case if the command had been actually performed. Fourthly, God's command to carry out a symbolical transaction is expressly introduced in these terms: 'Give to the rebellious house a parable (*māšāl*) and say (!) to them, Thus saith the LORD God, set on the caldron, and pour water into it,' etc. (24³, cf. also 21^{1b}). This, too, favours the conclusion that Ezekiel's statements about commands from God to perform symbolical actions, do not differ essentially from the parables spoken in 17^{2a} and 13^{3a}. But, as a matter of fact, these narratives may be understood as parables, whose subject is the prophet as the representative now of God and now of his people. As the representative of God he is to smite one hand against the other (21¹⁷), to depict the conflict which Jahweh, to His sorrow, has to wage against the unfaithful majority of Israel (21²⁴), just as the smiting together of the hands is attributed to Jahweh Himself in 22¹³. In

the same capacity Ezekiel is also called on to depict vividly the rejection of Israel, to which God has been compelled to resort by the excessive unfaithfulness of His people (32²⁻⁷ 24²⁶⁻²⁷). Hence, when the prophet has to picture forth the highest degree of the Divine displeasure, he does so by becoming dumb, i.e. by ceasing to act as a reprover (32²), and by refraining from articulate expressions of grief at the destruction of Jerusalem, in order to impress upon the people about him the truth that this turn in their fortunes was a just punishment from God. This dumbness continued till, with the fall of Jerusalem, the Divine justice was satisfied, and then the Divine grace in the person of the prophet turned anew to the people (33^{21a}), and sought to win their love.—Again, as representative of his people, Ezekiel is the subject of those narratives in which actions of Jahweh against Israel are vividly portrayed. This comes out with special clearness in the words, 'But thou, O son of man, behold, they shall put bands upon thee' (3²⁵), and 'Behold, I put bands upon thee' (4^{2a}). In this way the punishment impending from God upon Israel is described as inflicted upon the prophet, and the purpose of this is evident enough. The exiles who, living far from their native land, could not be onlookers at the act of judgment to be executed upon Judah and especially upon Jerusalem, were to have a clear reflexion of the fate of Jahweh's people placed before their eyes.

Such are the positive grounds for holding that Ezekiel's accounts of symbolical actions, whose actual performance is not specially mentioned (12⁷ 24¹⁸), make up a species of parables, whose subject was the prophet as representative either of Jahweh or of Israel (cf. the present writer's art. 'Zur Deutung der symbolischen Handlungen des Propheten Hesekiel' in *Die kirchliche Zeitschrift*, 1892, p. 650 f.). The same conclusion, however, is supported by weighty considerations of a negative kind. For instance, is it credible that Ezekiel should literally have lain upon his left side for 390 days (4⁸), i.e. for more than a year? Did the neighbours count the days? Or is it likely that he actually baked his barley cakes, using human excrement for fuel (4¹²)? These negative considerations have led even Smend (*Kgf. exeg. Hdb.* 'Hesekiel,' 1880, p. 27) to the conclusion that 'it is evident that such a transaction as that of 4⁸⁻⁹ cannot have been literally carried out.' Practically, the same standpoint is occupied also by Kuenen (*Hist.-crit. Einleitung*, ii. p. 258 f.), Toy ('Ezekiel' in *SBOT*, 1899), and Hühn (*Die Messianischen Weissagungen*, 1899, p. 160); and a similar judgment is passed by Frankenberg (in Nowack's *Hdkom.*, 'Sprüche,' 1898, p. 18). It may further be noted that Hos 1 and 3 are called 'parabolæ' by Wenrich (*De poseos hebraicæ atque arabicæ origine*, p. 152).

(β) But in the most recent times there have been a number of exegetes who have held that all the symbolical actions mentioned in the Book of Ezekiel were externally performed. These scholars fall into two groups. The one group is made up of v. Orelli (in Strack-Zöckler's *Kgf. Kom.*, 'Hesekiel,' p. 3) and Giesebrecht (*Die Berufsbegabung der alttest. Propheten*, 1897, p. 171), who both found their interpretation upon the appearance of literalness in the language of the passages in question. In particular, Giesebrecht simply asserts that 'the symbolical actions of Ezekiel cannot be understood as mere figures.' But this is no argument.—The other group comprises the following scholars:—Klostermann, in his art. 'Ezechiel: Ein Beitrag zur besseren Würdigung seiner Person und seiner Schrift' in *SK*, 1877, p. 391 ff.; L. Gautier, *La mission du prophète Ézékiel*, 1891, p. 85 ff.; Bertholet, in Marti's *Kurzer Hdkom.*,

'Hesekiel,' 1897, p. 24 f.; and Kraetzschmar, in Nowack's *Hdkom.*, 'Ezechiel,' 1900, p. v. They have come to this conclusion in consequence of accepting the hypothesis regarding the person of Ezekiel put forward by Klostermann in the above-named article. Hence it is necessary to examine this hypothesis, and to ask whether it can supply a ground on which to defend the view that the symbolical actions of which Ezekiel speaks were literally performed.

Klostermann's theory is based on the assumption that the dumbness of Ezekiel (3²⁴⁻⁷ and 24²⁵⁻²⁷) was due to a temporary *atalia* from which the prophet finally recovered (33³¹); and that his long-continued lying posture (4¹⁶) was the result of *hemiplegia* (*l.c.* pp. 417 f., 422). But to this hypothesis there are the following objections:—(a) The Divine command to the prophet to shut himself up in his house and keep dumb (3²⁴⁻²⁶), or to refrain from articulate lamentation (24¹⁶⁻²⁷), and to lie upon his left side (4⁸⁻⁹), must be interpreted in the same manner as the command to shave his head and beard with a sharp sword (5¹²). It is impossible to pick and choose amongst the various records of symbolical actions contained in the Book of Ezekiel. If, then, symptoms of disease on the part of the prophet are to be discovered in Ezk 3²⁴⁻²⁶, 24¹⁶⁻²⁷, and 4⁸⁻⁹, all symbolical actions of which he speaks must be traced back to some disease of his, and we must be permitted to bring all the particular features of the narratives of 3²⁴⁻²⁶, 24¹⁶⁻²⁷, and 4⁸⁻⁹ into a causal connexion with some pathological habit of Ezekiel. But it may be asked whether, among other disordered inclinations, he had a fancy for using human excrement for fuel (4¹²). Did he at one and the same time suffer from temporary *atalia* and also have the peculiarity at one time of sighing (21⁹), and at another time of crying aloud (v. 12)? If the Divine command to refrain from any articulate lament for the dead (24¹⁶) is to be explained by a temporary speechlessness, then the non-shedding of tears, which is enjoined in the same verse, must be derived from a bodily idiosyncrasy of Ezekiel.—(β) It must be observed that in 3²⁴⁻²⁶ Ezekiel speaks not of dumbness in general, but of keeping silence with any prophetic message. This is obvious from the single circumstance that, in order to carry out the injunction of silence, the prophet had to shut himself up in his house—a course of action which would have been unnecessary if he had been suffering from temporary speechlessness. The same conclusion follows, on the positive side, from the circumstance that his silence is to evidence itself by his not coming forward as a reprover (3²⁶), and that it is to come to an end when his God again makes disclosures to him (v. 27).—(γ) If Ezekiel had suffered from temporary *atalia*, this could not have been unknown to his neighbours, whose principal representatives used to assemble in his house (8¹ 14¹ 20¹). But, in that case, a new attack of this dumbness could have had no symbolical meaning to them.—(δ) It must truly have been a remarkable *hemiplegia* which compelled the prophet to lie for exactly 390+40, i.e. 430 days, and thus to furnish a parallel to the 430 years (Ex 12⁴⁰) of Israel's bondage in Egypt.—(ε) If it was, as alleged, a bodily infirmity that prevented the prophet from articulate wailing (24²⁵⁻²⁷), he could, and no doubt would, at least have expressed his grief at his bitter loss by practising all the other mourning usages. But, as he did not do so, it is unmistakably plain that his neglect of the lament for the dead was due, not to a bodily indisposition but to a higher impulse. What a novel kind of *atalia*, by the way, which had its cessation foretold (3²⁶ 24²⁷)!

Consequently, the view that all the symbolical actions mentioned in the Book of Ezekiel were literally performed, fails again to find any support from Klostermann's hypothesis about the condition of the prophet's health. On the contrary, in 3²⁴⁻²⁶ 24²⁵⁻²⁷ and 4⁸⁻⁹ he is only represented as the subject of a symbolical action in the same way as in 5²², etc. It is also intelligible how he should be introduced as afflicted with dumbness. For God meant to symbolize the extreme of His displeasure against Israel by breaking off His revelations (3²⁷). Again, Ezekiel is described in 4⁸⁻⁹ as lying, because Israel's captive condition might suitably be regarded also as a lying, just as it is elsewhere (Hos 3^{3a}) compared to a sitting in isolation.

A subdivision of symbolical actions may be formed of those which depict some feature of the future consummation of the Kingdom of God. They may be called *προφητεῖαι δι' ἔργων* (Adrianos, *Εἰσαγωγή εἰς τὰς θείας γραφάς*, ed. Goessling, § 130) or 'types.' But it is questionable whether the OT speaks of any actions which were meant to be performed with the intention of pointing beforehand to some incident in the life of Christ. This is doubtful even in the case of the passage in which Adrianos (*l.c.*) appears with a measure of certainty to have discovered a *προφητεία δι' ἔργων*. We refer to Gn 22² 'Take now thy son Isaac, thine only son, whom thou lovest,' etc. This story is rather intended to express the notion that the God who has revealed Himself to Israel, holds human sacrifices in abhorrence. It could all the less have been meant to point to the time of Christ, seeing that God did not spare Himself the sorrow of offering His only Son as a sacrifice for the sin of mankind. Nor was the Flood sent to serve as an allusion to baptism, although it might afterwards be viewed as an analogue to the latter (1 P 3²¹). This has been noted also by J. D. Michaelis in his interesting work, *Entwurf der typischen Gottesgelartheit*², 1763, p. 37.

The most familiar symbolical actions of the NT (Jn 13⁴, Ac 6⁶ *ἐπέθηκαν αὐτοῖς τὰς χεῖρας*, etc.) have been already referred to in speaking of symbolical *washing* and the *imposition of hands* (which see). To these may be added the *cursing of the fig-tree* (Mt 21¹⁹, Mk 11^{13a}), the texts relating to which are not meant to be a mere 'symbolical narrative,' as has been recently maintained in the *Theol. Ztschr. aus der Schweiz*, 1899, pp. 228-238. Further, the *casting of lots* (Ac 1^{9b}) is merely an external parallel to the previously (v. 24) mentioned prayer; and, finally, the *breaking of bread* (*κλάσις τοῦ ἄρτου*, Mt 26²⁶, Lk 24³⁵, Ac 2⁴³) and *baptism* (Mt 28¹⁹) have a fundamentally symbolical character. See BAPTISM in vol. i. and LORD'S SUPPER in vol. iii.

 - (2) Foreign deities: (a) Libyan, (b) African, (c) Asiatic.
 - (3) Deified men.
 - (4) The popular gods. Partition of the great gods. (a) heaven and earth, and the heavenly bodies, (b) stone worship, (c) worship of high places, (d) cult of springs and streams, (e) animal worship, (f) worship of plants and trees, (g) city divinities, (h) veneration of buildings.
 - (5) Deified abstract notions.
- III. THE CULTURE. The daily temple ritual.
- IV. CONCEPTIONS OF A FUTURE LIFE.
 - (1) Notions connected with the sun and his 24-hour's course.
 - (2) Dwelling-place of the gods.
 - (3) Realm of the dead variously placed: (a) above the earth, in heaven, (b) under the earth, in *Duat*, (c) on the earth, in the Plain of Aalu.
 - (4) The Osirian doctrine of immortality: (a) the Osiris myth, (b) later influences of sun-god myths, (c) judgment in the world beyond, (d) the Book of the Dead, etc., (e) principal features of the Osirian faith. Part-souls.

Literature.

Introduction.—In studying the religion of ancient Egypt we encounter a phenomenon which it has in common with almost all religions. Two forms of conception may be distinguished, which started from the same principles and exercised a permanent influence upon one another, but which at the same time exhibit a number of radical differences in the view they take of Divine things. These two are, respectively, the official religion of the upper classes, and the popular faith. It is true that the difference is not so pronounced in the Nile valley as elsewhere, since the Egyptian religion was never subjected to a systematizing process and a logical establishing of its various dogmas, but always remained in a fluid condition, so that even the official religion was thus permanently exposed to powerful influence from the side of the popular conceptions.

The sources of information of which modern investigation can avail itself in seeking to arrive at a knowledge of the official religion of ancient Egypt are very copious. It is the subject of the inscriptions on temples, and of almost all the texts found in tombs and on monuments (including the religious papyri) dedicated to the worship of the dead. Far fewer materials have to be taken account of in estimating the popular religion. Its adherents belonged in general to the poorer classes, who were not in a position to erect any fine monuments. Besides, in the texts they destined for publicity, such persons almost uniformly employed the terminology and the formulae of the official monuments, even in cases where they understood the dogmas in view differently from the priestly colleges of the great sanctuaries. In order to recover this realm of ideas belonging to the popular faith, our main resources are a series of ill-executed sepulchral steles and rock-inscriptions, sporadic passages in the temple texts and those concerning the dead which show traces of popular influence, and in which, notably for instance in the so-called Book of the Dead, the popular doctrine could occasionally not be passed over. When referred to, this doctrine is, strangely enough, spoken of as a great secret. Lastly, we have to take account of the statements of the classical writers, who, like their countrymen that were settled in the Nile valley, were brought into contact less with the priests and the upper classes than with the great mass of the people proper, so that their accounts reproduce primarily the notions of the latter. What holds good of these Greeks applies also to the Israelites, who, if they

acquired information or received stimulus from Egypt, must have derived these from the middle classes or the lower orders, and not from study of the doctrines in the temples which were so difficult of access to a non-Egyptian, or of the inscriptions which must have been almost always unintelligible to a foreigner.

Under these circumstances, it will be necessary in the present article to lay more emphasis on these popular notions than it has been usual, in view of the above described meagreness of the sources, to do in descriptions of the Egyptian religion. But, on the other hand, owing to the want of materials and the constant interpenetration of the two forms of conception, it becomes impossible to treat the two apart; the difference between their points of view can only be indicated from time to time in the course of our exposition.

I. COSMOGONY.—(A) *Creation of the world.*—(1) From the earliest times from which we possess Egyptian religious texts down to the period when the ancient polytheism gave way to the Christian faith, the relation between Divinity and humanity was thought of by the inhabitants of the Nile valley as reciprocally conditioned. Man dedicates to the Deity food, drink, clothing, a dwelling-place—the things which the Deity, who shares in all earthly qualities and needs, requires for comfort. The Deity gives in return such benefits as he can dispense—long life, endurance, joy, victory over enemies, health, and the like. If either party neglects his duty, the other is at once set free from any counter obligation. Man offers only to *that* god who shows himself helpful to him; the god favours only *that* man who does him some service. Thus in the inscriptions the god says to the king, 'I give thee victory in proportion to thine offerings,' and the king threatens to discontinue his worship if the god will not bestow long life upon him.

As in every instance where similar notions are cherished, this way of thinking led in Egypt to the continuance of a polytheistic system. Upon the assumption that only one or only a few gods existed, or that their supremacy was universal, it was difficult to conceive how, in view of the conflicting interests of different individuals, any decisive pressure could be exerted on the Divine will by a particular suppliant. This was more practicable if a man could apply to special gods who had to be considered in relation to only *one* or only a few individuals. Then, when he had obtained the good graces of these, he could leave it to them to accomplish their will in the circle of their fellow-gods, or to bring it at the proper moment under the notice of a higher god. The kings of the gods were accessible, if necessary, to the Pharaohs and their court; the sphere of their activity was far too exalted to permit of their rendering continuous help to ordinary mortals.

In this way the notion that every family and every locality or province possesses and must retain for itself its special deities, persisted for thousands of years, and was never absolutely suppressed. At no time was there a religious system in which every Egyptian was bound to believe; the belief in the gods always exhibits a particular form and development in the different divisions of the country, the so-called nomes (see below, p. 182^b).

It is quite recently that historical science has come to recognize the above characteristic of the Egyptian religion. Only some thirty years ago it began to be urged and demonstrated that, in order to obtain a correct view of the faith of the ancient Egyptians, we must examine individual conceptions and individual deities, instead of setting up *a priori* principles. Up till then it had

been the fashion to attribute to this people now an obscure monotheism, now a professedly profound but in reality perfectly unintelligible pantheism, or some other religious system, and to support such pretensions by sentences of the inscriptions torn from their context. From the point of view of scientific inquiry, the ancient Egyptian religion is made up of a long series of particular religions and separate spheres of ideas, which one has to follow in their development, unconcerned at first with the question which of the various conceptions is the oldest and whence each originated. The time may come when it may be possible to bring a number of the deities into connexion with the various elements that gave birth to the Egyptian people of history; with the Libyan aborigines, the conquering Hamites, and the Semite peaceful immigrants. But at present the materials at our disposal are far too scanty to lead to any certain conclusions, and the hypotheses that have been started about the Egyptian religion are already so numerous that in the interests of the progress of science any multiplying of them is to be deprecated.

(2) The variety of ways in which myth-forming speculation could view one and the same event forces itself at once on our observation when we essay a survey of the most important of the Egyptian myths intended to explain the origin of the world and of gods and men. It will be best to commence our study of the religion of Egypt with an account of these myths, because we can here take account at the same time of a number of fundamental ideas of the ancient Egyptians about religious questions, which exhibit resemblances to, or differences from, certain classes of notions that prevailed among the Israelites.

In the opinion of the ancient Egyptians, as with other peoples, our world, the heavens and the earth, and the beings that inhabit them, did not exist from the beginning, but were created. Not, indeed, out of nothing, but out of a fluidity which the Egyptians called *Nu*, and which may be compared with the *Chaos* of the Greeks. While this filled the universe, there was, as a text expresses it, 'not yet the heaven; not yet was the earth. not yet were formed the good and the evil serpents.' Or, as it is put in an inscription in the pyramid of a king belonging to the 6th dynasty (Pepi I. l. 663 f.), i.e. c. 3000 B.C., 'not yet was the heaven, not yet the earth, men were not, not yet born were the gods, not yet was death.'

(a) In this primeval mass lay hidden the germs of the future world, but no text as yet discovered points to any attempt on the part of the Egyptians to form a clear and harmonious picture of the relation of these germs to one another. It is only as to particular points that we have indications. Thus, according to a widely diffused notion, in primeval times the heaven, *Nut* (thought of as female), reposed in the close embrace of the earth, *Seb* or *Keb* (thought of as male). Besides the primeval fluid, *Nu*, there existed, according to Egyptian ideas, prior to the creation, one deity, who appears sometimes alone as a male god, and at other times falls apart into a male and a female form. This deity calls into existence from *Nu* the world that is to be. The means employed are very variously described, but they may be conveniently divided into two great categories, namely, *acts* and *words*.—Amongst the myths belonging to the first class the most popular is that which describes how the creating deity forced his way between heaven and earth, tore them from their embrace, trod the earth under foot, and raised the heaven on high with his arms. For the most part, it is *Shu* that appears as the separating deity, but his place is taken at times by *Bes* (Petrie, *Hawara*, pl. 2).

We possess numerous pictures (especially from the period c. 1500–1000 B.C.), showing, with slight variations of detail, the breaking up of the ancient union. For the most part, the act is represented as just completed. The goddess of heaven, *Nut*, supports herself on her hands and feet, and so arches herself over the earth-god *Seb*, who is still falling. A number of other deities are generally to be seen, notably the gods of the *Osiris* circle. These are regarded as the children sprung from the union of *Seb* and *Nut*; they were gradually generated, but first made their appearance at the moment when their parents were torn apart.

Other pictures show a somewhat later scene in the process of creation. We see the earth-god lying wearied on the ground, while the separating god stands over him, holding up the goddess of heaven with his hands. To save himself from fatigue, he has sometimes called assistants to his aid: these either hold up particular portions of the heaven, or even form points of support for the arms of the god himself.—A variant of this legend found it unworthy of the god that he should himself permanently play the part of an *Atlas*, and he thus hindered from exercising his power in other ways. Accordingly, we are told how the god erected four bifurcated supports—one each in the north, the south, the east, and the west—to bear the arch of heaven. And, in order to ensure the stability of these supports, upon whose existence the continuance of the earth depended, a deity was set over each to guard it. It is the notion of these supports that underlies the figures of the four pillars which, in some pictures of the separation scene, appear beside the god. The names of the supporting deities are variously given. At times they are the usual deities of the regions of heaven: *Horus* for the south, *Set* for the north, *Thoth* for the west, *Septi* for the east; at other times the place of these gods is taken by goddesses. But the four supports mark the end of the world; and, when the Pharaoh desires to emphasize the fact that he is the lord of all lands, he declares that he rules 'to the supports of the heaven.'

The goddess of heaven is for the most part thought of as a woman, but at times also as a cow—two forms which from the point of view of Egyptian mythology are really identical. For in the Nile valley in general the only purpose served by the goddess is to be the mother and nurse of the future god. The natural symbol for this among an essentially agricultural people was the domestic animal that was most common, the cow, which hence appears as the form of manifestation of practically all the goddesses in their maternal activity. If, for instance, the Egyptians desire to represent the king drinking from the goddess, in order to imbibe, along with her milk, the immortality inherent in her, they introduce him in contact sometimes with the breast of an anthropomorphic form, sometimes with the udder of a cow. Even when such a Divine nurse is portrayed in human form, she is not infrequently provided with a cow's head, in order to indicate with corresponding emphasis her most important function (cf. e.g. Naville, *Deir el bahari*, ii. pl. 53).

On the body of the goddess of heaven the celestial bodies move to and fro, the sun by day, the stars by night; hence she is often depicted with her whole body studded over with stars.

While in the above instances the deity of heaven always appears as female, there is another series of cosmological conceptions where a partition into a female and a male form takes place. We meet with these from about B.C. 1500 downwards, and it is quite possible that they originated at the date just mentioned, for during this period the whole Egyptian mythology is ruled by the effort

to divide as far as possible all divinities into a male and a female form of manifestation. This is bound up with a phenomenon that appears even in the language. When the Egyptians wish to express a totality with the utmost possible clearness, they write both the masculine and the feminine of the word, thus exhausting the genders of a language that has no neuter. Thus they say 'every male and every female death,' 'every male and every female disease,' when they mean all forms of death or of disease. In like manner they seek to exhaust the totality of the notion of any particular deity by emphasizing the male and the female form of manifestation. This partition of the divinity is in most instances the result, not of a logical development of religious processes of thought, but of an artificial formation, the female supplementary being obtained simply by adding the feminine suffix *-t* to the name of the male deity. Thus from *Hēr* was derived a *Hēr-t*, from *Rā* a *Rā-t*, etc. (see p. 184^b).

In thus partitioning the deity of heaven, they usually thought of the female form as overarching the upper, inhabited, side of the earth, while the male form correspondingly arched the under side, both being thus placed at a distance, either above or below, the earth-god *Seb*. Starting from this conception, the rising of the sun is occasionally so depicted that the subterranean god of heaven holds up the sun at arm's length, while the *cynocephali* that have to greet the rising sun offer their praises to it.

Occasionally, although rarely, the sex of the deities of heaven is reversed, the upper heaven being male and its counterpart female. Thus in texts of the 13th cent. B.C. the rise of the sun in the under world is so depicted that the male god of the heaven of day hands the bark with the sun-god to the female deity of the nightly heavens, as she stands upon the spherically conceived under world.

(b) The above described cosmogonic conception is connected with another, intended to explain the origin of the sun, but to which we have as yet only brief allusions. One of these is found in the so-called Book of the Dead, a collection of magical formulae, whose purpose is to procure, for the deceased, entrance into the world beyond and authority there. In pronouncing these the deceased is to identify himself with certain deities, and to endeavour to obtain advantages by pointing to this fictitious identity. One of the chapters (54), which we can trace back to about the year B.C. 2500, begins thus: 'I am the double lion of the egg of the great cackler, I guard the egg which the god *Seb* drops from the earth' (cf. *PSBA* vii. p. 152, xv. p. 288). This double lion is the horizon. Here sat, according to Egyptian notions, back to back two lions, which represented yesterday and to-day, the issue of the sun from the under world and his entrance into the upper world (cf. *Tombeau de Ramses IV.*, ed. Lefébure, pl. 40), and whose charge was to guard the sun as he rose between them. The sun himself is often called 'the egg of the great cackler,' while this cackler, again, is the earth-god, who was supposed to have let fall, i.e. laid, the egg. Hence he had assigned to him as his sacred animal the goose, which he frequently bears upon his head in those pictures in which he is introduced in human form as a man. How he conceived the egg is not expressly said in the texts, but a picture on a coffin of c. 1200 B.C. (Lanzzone, *Diz. di mit.* pl. 159) points to the explanation. Here we see the earth-god strain himself under the male nightly heaven till his erected *phallus* points to his mouth. That is to say, he must have impregnated himself, and the sun portrayed behind him is the egg which he will detach from himself as the result of this act.

Alongside of the myth of the great cackler which in the form of a goose lays the sun-egg, runs another, according to which the sun- and also the moon-egg are fashioned by a deity upon the potter's wheel, a process in which it is especially the by-form of the god of Memphis, *Ptah-Tatunen* (relief at Philae, in Rosellini's *Mon. del culto*, pl. 21), that we find engaged. To *Ptah* is attributed also the creation of the whole world, in which rôle he is called 'the great artificer,' so that in this instance we have to think not of a crude tearing apart of the primeval mass, but of an artificial construction of the universe. In this work the god had a number of coadjutors, the so-called *Chnumu* or 'formers.' These are little, dwarf-like, deformed, thick-headed forms, which, eight in number, were regarded as sons of *Ptah*, or, at a later period, also of *Rā*. Images of them were frequently put in a grave along with the corpse. As they had once co-operated in the forming of the world, they would now in the world beyond devote themselves to the reconstruction of the deceased, and help him to attain to a new and everlasting life.

(c) But the creation of the world was a subject of far less interest to the Egyptians than the origin of the living beings and the objects it contains, gods and men, animals and plants. But in the myths connected with this subject we meet again with that want of systematizing which shows itself everywhere in the Egyptian world of ideas. We have statements as to the origin of particular beings and objects, but there is no finished story of creation such as we find, for instance, at the beginning of the *Bk. of Genesis*. It is this inability to combine individual notions into a whole that explains also how it was possible for the numerous particular statements to maintain their existence side by side in spite of their contradictions. Since it was not required to unite them into a harmonious system, there was no need to separate duplicate legends, or to exclude or harmonize irreconcilable elements.

For the most part, one was content to celebrate in general terms the praises of this or that god as creator. Thus, c. 1500 B.C., it is said of *Osiris* (stele in Paris, *Bibl. Nat.*, published by Ledrain in *Mon. égypt. de la Bibl. Nat.* pl. 21-26; cf. Chabas, *Rer. arch.* xiv. i. 65ff., 193ff.): 'He formed with his hand the earth, its water, its air, its plants, all its cattle, all its birds, all its winged fowl, all its reptiles, all its four-footed creatures.' Again, we read of the ram-headed god *Chnum*: 'He created all that is, he formed all that exists, he is the father of fathers, the mother of mothers,' 'he fashioned men, he made the gods, he was father from the beginning,' 'he is the creator of the heaven, the earth, the under world, the water, the mountains,' 'he formed a male and a female of all birds, fishes, wild beasts, cattle, and of all worms.' In another passage the god of Thebes, *Amon-Rā*, is celebrated as 'the father of the gods, the fashioner of men, the creator of cattle, the lord of all being, the creator of the fruit trees, the former of the grass, the giver of life to the cattle.'

Similar functions are attributed also to other members of the Pantheon, and it even happens not infrequently that in the same tomb or temple different deities are hailed as creator in almost identical terms, without any sense of contradiction. It is seldom, however, that one gets beyond general language; and above all it is impossible to establish a fixed order in the succession of creative acts. Sometimes it is gods that first come into being, at other times men, or again animals or plants, etc.

(d) The choice of methods of creation, again, is left to the different deities—nay, one and the same god adopts one method according to one

author, and another according to another. (α) Relatively most frequent is the conception of creation, after the analogy of earthly conditions, as a series of births. A god and a goddess are placed at the beginning of the development; these unite and have children born to them, who in their turn are gods. But gradually their posterity degenerates, becoming demi-gods and at last men. To avoid the difficulty of having to postulate the pre-existence of two deities, a myth, which recurs from the Pyramid era down to that of the Ptolemies, makes only one god pre-exist, namely Tum, who by means of Onani formed the first divine pair, Shu and Tefnut (Pyramid Pepi I., l. 465 f. = Mer-en-Rā, l. 528 f.; Papyr. Brit. Mus. 10188, ed. Budge, 'On the Hieratic Papyrus of Nesi-Amsu' in *Archaeologia*, lii, 1891; cf. Pleyte, *Rec. de trav. rel. à l'Égypte*, iii, p. 57 ff.; Budge, *PSBA* ix, p. 11 ff.; Brugsch, *Religion der alten Ägypter*, 470 f.; and, for the creation myth, Wiedemann, *Urquell*, ii, p. 57 ff., where a collection will be found also of further ancient statements bearing upon the same circle of conceptions). Then were born to Shu and Tefnut the god Seb and the goddess Nut, who were the parents of Osiris and the gods of his group, whose children multiplied upon this earth. This genealogy shows that the Onanistic creation was placed before the heavens and earth were formed, the representatives of these first making their appearance as grandchildren of the pre-existing god.

It was not only gods that originated from a primeval deity by the instrumentality of Onani; men also were formed in the same way. In the tomb of Seti I., founded c. 1350 B.C., there are portrayed (Leps. *Denkm.* iii, 136^b) the four races of men, which, according to the Egyptian view, peopled the earth, and which are characterized as the flocks of the sun-god Rā. They are the reddish-brown 'men,' i.e. the Egyptians; the dark-yellow Asiatic Semites; the black negroes; and the whitish-grey Libyans. According to the accompanying inscription, these beings were created by another form of the sun-god, namely the hawk-headed Horus; the negroes by Onani, the Egyptians by his tears, the Libyans by the shooting forth of his eye, i.e., apparently, by his warming beams.

A great creative power is attributed also in other inscriptions to the tears of a deity. They play a part in the most diverse periods of Egyptian history. There are other texts besides the above which trace the origin of the Egyptians to them. But then the sun as well brought other things into being by his tears. 'When the sun weeps a second time,' we read in a papyrus of c. 800 B.C. (Papyr. Salt, No. 825 in London, tr. by Birch in *RP* vi, p. 115), 'and lets water fall from his eyes, this changes itself into working bees, which pursue their task in flowers of every kind, and honey and wax are produced instead of water.' Further products of the tears of the sun-god Horus are cloth-stuffs, wine, incense, oil, the most varied objects used for offerings, which, accordingly, are designated 'the eye of Horus.' The tear of the goddess Isis, which falls into the Nile, causes the inundation of the river, and thus brings to the land abundance, wealth, and the means of nourishment.

Not only the tears but other fluids from the body of a deity have creative power attributed to them. From the blood that issued from the *phallus* of the sun-god when he cut himself, sprang, according to the Book of the Dead (chs. 17, 23), two gods, Hu (Taste) and Sa (Perception), who henceforth remained in his train. After the slaughter of the bull, in which Bataw, who in the fable of the Two Brothers (composed c. 1300 B.C.) is conceived of as almost a divine being, had incarnated himself (Papyr. d'Orbiney, pl. 16, l. 8 ff.), two drops of blood

fell upon the earth, and from these sprang two great trees, which now served Bataw as an embodiment.—Side by side with the blood is the saliva. When saliva flows from the mouth of the senile sun-god and falls upon clayey soil, Isis forms from these materials a serpent, which at once assumes life, and whose bite threatens to be fatal to the sun-god (Wiedemann, *Rel. of Anc. Egypt*, 54 ff.).

The root idea is the same in all these instances. In every part of the body of the god, in everything that proceeds from him, there is a portion of his Ego, something Divine and therefore capable of development and life-producing.

(β) A further way to the formation of living beings was found in the artificial methods attributed to the gods. We have already had occasion to mention how Ptah, the god of Memphis, was supposed to fashion the sun-egg on the potter's wheel. In like manner, according to the view that prevailed in Upper Egypt, the ram-headed god Chnum fashioned the king and his *ka* upon a similar wheel (relief at Luxor, in Ma-péro, *Hist. anc.* i, p. 157). If no wheel was available, the god was capable also of forming human beings in a simpler way. When the sun-god, in the fable of the Two Brothers (Papyr. d'Orbiney, pl. 9, ll. 6-8), found his favourite Bataw alone, and desired to furnish him with a wife, Chnum 'built' a woman for him. Since the latter owed her origin to a god, she was more beautiful in her limbs than any woman in the whole land, and all gods were in her. The word 'built' has here for its determinative the picture of a man erecting a wall, so that the Egyptian writer thought of an actual construction of a woman—a manner of origin for which the reconstruction of the dismembered body of the god Osiris supplied him with a fitting analogy, for after this reconstruction the god at once acquired new life (cf. p. 195^a).

(γ) Procreation is another process which is not left out of account by the ancient Egyptians in connexion with the formation of man. It is employed above all by the sun-god when his earthly representative and son, the Pharaoh, has to be brought into being. In each successive case the god assumes the form of the present occupant of the throne, unites himself with the queen, and thus generates the future ruler (see the detailed representations in Naville, *Deir el bahari*, ii, pll. 47-53). This belief in the Divine origin of the monarch was held fast down to the Greek period. When Alexander the Great gave himself out as the son of Jupiter Amon, he was thoroughly accommodating himself to the notions of his Egyptian subjects. The ram's horn, moreover, which, in conformity with this origin, shows itself in the pictures of Alexander and his successors, has its prototype in the ancient Pharaohs, who (so, above all, Seti I. at Abydos) likewise, as sons of Amon, bear this horn.

For the most part, the king is satisfied with one god as his father; but at times a step further is taken, and the Pharaoh claims a plurality of heavenly fathers. Thus Ramses II. makes the gods of Egypt declare that they had generated him as their son and heir, while the goddesses tell how they nursed and brought him up, so that in a sense at least they performed maternal functions for the monarch.

(δ) In all the forms of creation hitherto discussed, some act of a deity is required in order to call something new into being; it may be an act of violence, or a procreative act, or a shedding of tears, etc. But, side by side with these, there was a considerable series of myths which did not regard any active exertion on the part of the creator as necessary, but attributed the result simply to speech, the uttering of words.

The Egyptian assumed—and this is a very im

portant notion from the point of view of the history of religion—that an inward and indissoluble connexion subsists between an object and its name (cf. Wiedemann in *L'Egypte*, i. 573 ff., and in the *Museum*, xv. 49 ff.). Every thing has a name; without name is no thing, and without thing no name is conceivable. Thus the name becomes an imperishable component of the Ego, on a footing of equality with soul, form, heart, etc., and its continued existence is indispensable if the whole man is to enter upon immortality. Any one who utters the name of a god correctly is sure of his favour. When the goddess Isis succeeded by her wiles in inducing the sun-god Râ to whisper to her his real name, she thereby obtained the power of this god and became the supreme goddess. Any one who in the under world was able to call a demon by name was safe from any further harm at his hands; a gate must open its leaves to any one who named it correctly.

As acquaintance with the name of a god gave power over the god, so did acquaintance with a man's name give power over him. Hence it was very dangerous to one to have his name known to an enemy, who could make use of it in connexion with magic, and only required to introduce it into a formula to bring disease and death upon its bearer. The anxiety to escape such a result was sometimes so keen that the Egyptian bore two names—one civilian, by which he was called in his ordinary life, and one sacred, which was introduced only into religious texts, in the hope that its holy environment would avail to save its bearer from destruction. We meet with analogous notions among various peoples, it being sometimes the case that even the man himself does not know his real name, for fear of his inadvertently betraying it. The ancient Egyptians did not go so far as this, but the true name was uttered only in the narrowest possible circles. In the above-mentioned myth of the sun-god Râ, the god himself is made to say, 'My name was uttered by my father and my mother, and then was it concealed in me by my parent that no spell might be formed to bewitch me.' For these reasons it is often said of the great gods that their name is hidden, and from the second millennium B.C. downwards the Divine name *Anon* was explained to mean 'the hidden one,' as if the word had been derived from the root *imen* = 'to be hidden,' which indeed is not true to fact.

The theory of the connexion between name and thing gave rise to quite a number of creation myths, which all go back to the same fundamental idea, however they may differ in details. The moment the deity in the exhilaration of his creative activity utters a word, the object designated by that word springs into being, even if it should happen that the word in the particular instance has quite a different meaning. The word had sounded so or so, and thereupon the notion inherent in it made its appearance, the word had assumed the form corresponding to it, and co-existed now with its notion to all eternity. Some examples taken from the presently to be described legend of the destruction of the human race, will best show how the Egyptians record the process of creation in such instances as we have in view. There the god says, 'I give thee authority to send forth thy messenger (*hab*), then originated the ibis (*habi*),' or 'I let thee turn (*ânân*) to the peoples of the north, then originated the *cynocephalus* (*ânân*).'¹ Sometimes the word uttered is not even the exact name of the object, in which case a resemblance of sound sufficed to bring the latter into being. Thus in one text it is said, 'I let thee comprehend (*ânḥ*) both heavens, then originated the moon (*ânḥ*).'²

Especially in the later periods of Egyptian history, from the 17th cent. downwards, such theories of creation, which in the earlier literature occur only sporadically, find favour, until in the Ptolemaic era a perfect passion for them sets in. Long, fantastic, occasionally unconnected, ætiological myths bring the god into the most diverse situations, in order to cause him to utter the word that shall bring into being one or another portion of the *materia sacra* of a particular sanctuary. And in such myths as little concern is displayed for logical connexion as for grammatically correct derivations (cf. e.g. the legend of the winged solar disc at Edfu, tr. by Brugsch in *Abhandlungen der Gottinger Akad.* xiv.).

The god who, above all, created by means of words, was Thoth; who appears sometimes, as at Hermopolis, the principal seat of his worship in Upper Egypt, as exercising this function on his own initiative, at other times as acting as the instrument of the creator proper, for whom he speaks. This was a rôle to which he was specially called, as lord of the words of the gods, composer of the most powerful magical formula, god of wisdom. Since he knows what is correct and gives it correct expression, he comes to be also the god of wisdom, who, along with his two embodiments, the ibis and the *cynocephalus*, is revered above all the gods by scholars and devout students of magic.

In all the ancient Egyptian literature known to us, actual words require to be uttered by the god in the act of creation. The notion that *articulate sounds*, his laugh and the like, could produce the same results, meets us first in the later Greek papyrus-literature of the Hellenistic and post-Christian period, and then in the Gnostic writings (cf. Maspero, *Études de mythol.* ii. p. 376). How far this belief is older than Hellenism cannot be determined. At all events, there is a connexion between it and the strange statement of the Church Fathers that the inhabitants of Pelusium paid Divine honours to flatulence and to the onions that caused it (Jerome, xiii. in Is 46; cf. Clem. Alex. x. 76; Minucius Felix, *Oct.* 28; Theoph. Ant. *Oct.* i. 15; Orig. c. *Cels.* v. 36).

The Egyptians had at their disposal a wealth of materials bearing upon the above doctrines, when it was desired to record the causes and the course of creation, but—to emphasize this point again and once for all—they never succeeded in harmonizing the particular conceptions and constructing out of them a finished system of cosmogony.

(B) *Destruction of the world.*—(1) While the ancient Egyptians have much to tell of the creation of the world, they know far less about its destruction, or even about a partial destruction of the world or of man. Presumably, this world appeared to the ancient Egyptian in a light so fair that in general he was unable to conceive of a time when it should be no more, and when no Egyptian should dwell any more on the banks of the Nile. It is true that recent investigators, founding upon some statements of a Saitic priest reported by Plato (*Timæus*, 22), have frequently attributed to the Egyptians a belief in a great world-conflagration. But the truth is that in the passage in question what is said is that, if a conflagration of the world should set in in consequence of the stars leaving their courses, the Nile would protect Egypt by its inundation. Egyptian papyrus-passages which have been cited for the same purpose (Ebers, *Papyrus Ebers*, p. 15), contain equally little to bear out the contention built upon them. They tell of a fire which threatened to be fatal to Horus, the son of the goddess Isis, and which Isis extinguished. But there is no thought here of a

conflagration of the world, but of a local fire, presumably in a hut in the Delta where Horus happened to be at the time. The means, again, employed by Isis are little suited to the extinguishing of a world-conflagration (see Schaefer, *Aegypt. Ztschr.* xxxvi. p. 129 ff.).

(2) The only allusion as yet discovered to a deluge that threatened to destroy the whole earth, or at least parts of it, is contained in a papyrus of c. 1200 B.C. (Lepsius, *Denkm.* vi. 118, ll. 25-39 [the tr. by Pierret in *Études égypt.* 1 ff., is not free from errors]), which contains a hymn of praise to the pantheistically conceived Deity. Here we read: 'Thine (sc. the god's) overflowing water [lit. 'Thy spreading-itself-out'] rises to the heavens, the roaring water of thy mouth is in the clouds, thy jackals are upon the mountains [i.e. the jackals which, according to an Egyptian doctrine, drew the bark of the sun-god, have been compelled to retire before the flood to the mountain-tops]. The water of the god Horus covers the tall trees of all lands, the overflowing water covers the circuit of all quarters of the heavens and of the sea. A scene of inundation would all lands (still) be, were they not under thine influence. The waters (now) move themselves in the way which thou assignest them, they pass not over the bounds which thou settest them, (the path) which thou openest for them.' The Deity, that is to say, saved the world from destruction by the deluge, and now by his providence prevents a recurrence of that event.

(3) Another text treats of the destruction of a portion of the human race by the Deity, against whom they had rebelled, and thus belongs to the category of so-called Deluge legends in the wider sense of the term. We have this legend in two copies in Theban kings' tombs belonging to the period B.C. 1400-1200 (Lefébure, *Tombeau de Seti I.*, part 4, pll. 15-18, *Tombeau de Ramses III.*, pll. 2-5; cf. Bergmann, *Hierogl. Inschriften*, pll. 75-82; Naville in *TSBA* iv. p. 1 ff., viii. p. 412 ff.; Brugsch, *Religion*, etc., 436 ff., and *Die neue Weltordnung*, Berlin, 1881; Maspero, *Les Origines*, 164 ff. [Dracon of *Civilization*, 164 ff.]; Wiedemann, *Religion*, etc. [Eng. ed.], 58 ff.). There is a further allusion to this myth in Papyrus Sallier iv., of the Ramesside period (cf. Chabas, *Le calendrier des jours fastes et nefastes*, Chalons, 1870), which contains a list of the days of the year, with an appended note as to whether they are to be considered lucky or unlucky, and a record of the mythological occurrence which gave them this character. This text remarks on the 13th Mechir: 'Unlucky, unlucky, unlucky! Go not out in any wise on this day. It is the day on which the eye of Sechet grew terrible and filled the fields with desolation. On this day go not out at sundown.' The same occurrence is in view also in the plates of glazed clay which exhibit the lion-headed goddess Sechet, with a huge eye introduced behind her. These were intended, in all probability, to protect their owners from a fate similar to what then befell guilty men. Their pretty frequent occurrence down to a late period proves that the legend in question not only found its way occasionally into Egypt, but had wide and long-continued vogue.

The myth itself relates how the sun-god Rā ruled over gods and men. But men observed that he had grown old, his bones had turned into silver, his joints into gold, and his hair into lapis-lazuli. When Rā noticed how men were thus inclined towards rebellion, he secretly summoned the rest of the gods to Heliopolis to take counsel as to counter measures. The gods advised him to send forth his eye, the goddess Sechet (the sun in its consuming strength), against men to destroy them, although the rebels, filled with fear, had already

begun to seek refuge in flight. Rā followed their counsel, and Sechet slaughtered mankind, wading for several nights in the blood of her victims, from Heracleopolis Magna in Middle Egypt to Heliopolis. But Rā quickly repented of having instigated this massacre. Not venturing directly to forbid the goddess to complete the task assigned her, he had recourse to stratagem. He caused beer to be brewed and poured into the blood of the slain. When the goddess saw this next morning, and found the fields flooded with it, she rejoiced, drank the mixture till she was intoxicated and could not recognize men. Thus mankind was rescued; but Rā was dissatisfied with himself, because he had not left their destruction unchecked. He saw in this a token of his weakness, and determined to abdicate his sovereignty voluntarily before a new weakness should overtake him. At first he set out, on the back of the cow of heaven, for the Mediterranean coasts. At this spectacle men were seized with contrition. They besought Rā to remain with them and destroy his enemies. But the god went on his way, men followed him, and, when it was morning, they came forth with their bows and joined battle with the enemies of the god Rā. Then spake Rā: 'Your transgression is forgiven. The slaughter (which ye have wrought on my behalf) compensates the slaughter (which my enemies intended against me).' In spite, however, of his forgiveness of men, Rā did not continue to dwell with them. He betook himself to higher regions, created the Fields of Peace and the Fields of Aahu, and settled many men there. Then he handed over his sovereignty of the earth to his son Shu (who was likewise a sun-god), called into being a number of sacred animals such as the ibis and the cynocephalus, and charged the earth-god Seb to give heed to the serpents, which must be charmed by means of magical formulae.—In these details, which are not explained by the legend itself, some part is played presumably by the recollection of other myths, in which the serpents appeared as opponents of the sun-god, and with which the author assumed an acquaintance on the part of his readers.

ii. THE GODS.—(A) *Historical development of the power of particular gods.*—(1) We have already remarked that the Egyptian religion was not a unity. Nor did it form a concentrated system any more than the Egyptian State. The latter had originated in early times from a number of small States, which either peaceably or as the result of conquest had become united under a single ruler, without thereby making a complete surrender of their former independence. To these ancient petty States corresponded the later so-called *nomes* (Egyp. *hep*), of which there were generally reckoned 22 for Upper and 20 for Lower Egypt. The number underwent not infrequent variations, adjacent nomes being sometimes united for administrative purposes, while at other times particular nomes might be partitioned owing to rights of succession or other causes. Nevertheless, these nomes, especially in Upper Egypt, continued to be the same on the whole from the Pyramid era down to that of the Greeks and Romans.

The nomes were independent from not only a political but a religious point of view. In their principal city stood the temple of the chief god of the nome, and here the conception and the worship of this higher being developed themselves independently of the religious development in other parts of Egypt. The cultus, however, was not confined to this nome god; worship was offered in his temple to other gods as well. In this way groups were readily formed, a goddess and a son or a larger

family being assigned to the god, or the latter was conceived as the supreme deity, with a circle of inferior gods surrounding him. Nor did his cult exclude the worship of other gods in other localities of the same nome or in other temples of the same metropolis. The nome god was simply regarded in general as the tutelary lord who had the first claim upon the inhabitants in all specially important matters, and, above all, when their common interests were concerned.

(2) The authority of the nome god was not so firmly established but that it might be overshadowed, even in his own nome, by other deities, although such an experience was relatively rare. Thus the god of the Thinite nome was originally Anher. At a later period, Osiris, the god of the city of Abydos, in the same nome, gained such preponderance that he stepped into the place of Anher in the nome cult as well. In the Thebaid the principal rôle appears to have been played at first by Mont (Ment), the god of the ancient metropolis Hiermonthis. With the advance of Thebes and the growing importance of its temple of Amon, the latter became from the 12th dynasty onwards the principal deity. But as the power of Thebes waned more and more during the Saitic period, the prestige of its god also sank in the nome, and the significance of Mont once more revived.

In other instances nome gods were able to extend their worship beyond the limits of their own province. Thus shrines were occasionally built to their own gods by men who had migrated from one nome to another. If these shrines were richly endowed, other Egyptians might be led to attach themselves to the newly introduced cult. As far as we can trace the matter back, in such cases the gods who from of old had been in possession were always tolerant, and took no umbrage at the introduction of the new divinities so long as these made no claim to supremacy over themselves. But cults of this kind, whose introduction was due to private persons, had no importance outside a limited sphere. The authority of a nome god increased in far greater measure when the princes of his province raised themselves to the rank of Pharaohs. The god had procured for his prince the supreme power in Egypt, and thereby showed that he was mightier than the other nome gods. The maintenance of his cult was consequently the primary duty of the royal house and of all the courtiers and officials connected with it, not indeed in the sense that an officially prescribed State cult was introduced, but one that had the force of consuetudinary propriety in view of the religious notions which had been cherished from olden times by the now reigning Pharaonic house. But similar considerations would gain over other Egyptians also to the new cult, and move the various priestly colleges to grant it admittance into their temples. This advance in the honours paid to some particular god, followed by a decline when the power of the dynasty from that nome decayed, may still be traced, by aid of the inscriptions, in the case of Amon, Bast, and other Divine figures. With other gods the change of prestige has taken place prior to the commencement of the literary tradition accessible to us. In primitive times, for instance, great significance was possessed by the jackal-headed god Ap-nat, who was ultimately regarded as the nome god of Siut. His image was borne upon a standard before the king, and the jackal's tail, in allusion to his cult, was, down to the latest times, worn by the Pharaohs, attached to their girdle behind, as a symbol of rule. In the course of Egyptian history, however, Ap-nat receded quite into the background in the cult. In the Old Empire he still held the place of one of the chief gods of the dead, in the Middle Empire even this prestige begins to decay,

and under the New Empire in almost every necropolis his place is taken by another jackal-god, Anubis, who, in the train of Osiris, the god of the dead, obtains growing significance in the conceptions of the under world.

(3) In all these instances a political development of Egypt, originally quite apart from religious considerations, had brought with it as a logical consequence a change of faith, without the co-operation of any external compulsion on the part of the State. Once only was it otherwise, namely, when Amenophis IV. sought at one bound forcibly to raise to the chief place the cult of Aten, the solar disc, worshipped as one of the natural bodies—a cult which under his predecessors had been slowly growing in importance. The rest of the gods were to take only a secondary place, if indeed the attempt was not made, as in the case of Amon, to prevent their worship altogether, and to damage the god by destroying his name in inscriptions, etc. This violent revolution had no success. After the death of the innovator, even his own family speedily lost interest in his god. The temples consecrated to Aten were deserted and destroyed, his worship survived in only a few places, and even there to only an insignificant extent.

(4) In order that the heavenly figures should enjoy Divine authority, it was not necessary for them to be the chief gods in one of the nomes of Egypt; the enormous number of Egyptian divinities is itself sufficient to exclude such a supposition. Some of them even enjoyed widespread regard throughout Egypt, without ever having possessed any such local authority. Some even of the chief deities of the whole country have no place among the nome gods, as for instance the goddess of Truth Maat, the god Nefer-Tum, the Nile god Hâpi, and, above all, the principal god of historical Egypt, Râ. This sun-god was indeed specially worshipped at Heliopolis, a city which was called after him by the sacred name *Pa-Râ*, 'house of Râ,' but the nome god here was originally not Râ but Atum (Tum). The latter is likewise a sun-god, who even in later times always enjoyed veneration side by side with Râ, an attempt being frequently made to represent him as a partial form of Râ, namely, the god of the evening sun. For his veneration over the whole of Egypt, Râ is indebted, accordingly, not to any local authority possessed by him,—as a city Heliopolis never had any very great importance,—but to the doctrine concerning him and to the development of religious conceptions in the Nile valley.

In the time of the early dynasties, whose power was concentrated in Upper Egypt, and which, it would appear, succeeded only gradually in conquering the Delta, Râ plays no considerable rôle. Even under the 4th dynasty, which had its residence at Memphis, not far from Heliopolis, he is still quite in the background. With the accession of the 5th dynasty these conditions are changed. A fabulous story, dating from c. 2000 B.C., makes the first three kings of this dynasty to have been the offspring of the god Râ by the wife of a priest of Râ in an otherwise unknown place of the name of Satchebu. How old this legend is we cannot tell, but it is certain that from the 5th dynasty onwards all the Pharaohs give themselves out to be sons of Râ. Nevertheless, the god does not at first appear very frequently in the inscriptions, although king Râ-en-user of the 5th dynasty already caused a great sanctuary to be erected to him at Abusir (cf. *Aegypt. Ztschr.* xxxvii. 1 ff., xxxviii. 94 ff., xxxix. 91 ff.). It is not till the time of the Middle Empire that Râ is mentioned with ever-increasing frequency, and that the conception of the specially close relation between deity and sun begins at the same time to influence the conception

formed of other gods. This leads, for instance, in the case of the Theban Amon, to a complete amalgamation of the old god of Thebes with the sun-god—a result which finds outward expression in the usual name for this deity under the New Empire, namely Amon-Rā. But, even when this new name is not employed, the simple name Amon is always during this period to be understood of the deity who had become a solar one. The same happened with other Divine figures. Sometimes the amalgamation is indicated by the name (Sebek-Rā, and the like), at other times the old name is retained, and it is merely the conception of the god that is influenced by solar notions. In the first millennium B.C. practically the whole of the more important Egyptian gods became more or less clearly defined sun-gods, and processes of thought derived from the solar faith were allowed to influence even the conceptions of the gods of the under world who were connected with the Osirian doctrine of immortality (see below, p. 195^b).

But, although the nature of the Egyptian deities was in later times prevailingly solar, we must be careful not to carry inferences from this back to earlier periods. We can trace the progress of the process by aid of the monuments, and are not at liberty offhand to place the result at the beginning of the development of Egyptian religion.

(5) In consequence of the independence of the various nome gods, the doublets already referred to were bound to arise in the circle of the higher powers. In his own district each nome god is at once creator, preserver, ruler of the world, quite untrammelled by similar pretensions on the part of his Divine neighbour. The Egyptians never attempted to remove the logical contradiction that thus arose. Quite the reverse! In taking over a foreign god to a new nome, they calmly took over also his titles and his myths, quite unconcerned that in this way a *Doppelgänger* to the old nome god found entrance into the nome. The only concession occasionally made in favour of more systematized thought was that deities of this kind were declared to be essentially identical or emanations of the same Divine notion, without, however, the further step being taken of abandoning the assumption of an independent individuality for each particular form. Especially in later texts it is often asserted that the nome or temple god bears in other places the names of the local deities, but one must not infer from this, as has frequently been done, e.g. even by Brugsch, that the forms in question are actually identical. Such statements are merely intended to characterize the particular god as the possessor of all Divine power—a position which in other places might quite well be attributed to any other who was the ruling deity there.

(6) In principle, then, the nome gods have equal importance, they may all of them, if the occasion demands it, have omnipotence attributed to them; but we have already noted that this relation might assume a different form in practice, according to the power of their particular nome. The material at our disposal does not indeed always give us a trustworthy picture of the actual conditions. We have an exact knowledge only of those deities whose places of worship and temples survive and have been already excavated. Our views are thus subject to constant shifting when new texts and monuments emerge from places that had not been previously examined. Chance plays so great a part in the matter that it is quite possible that gods at present scarcely known to us had great importance in antiquity, and, conversely, that the forms which are frequently named in our sources once possessed only slight significance. Here, as little as elsewhere in Egyptological questions, are we at liberty to forget that, in spite of the wealth

of monuments that have survived, their number is relatively small considering the thousands of years of Egyptian history, and hence their data must be used with caution in drawing inferences as to ancient conditions in general. This must be kept in view in judging of the following list of the most important Egyptian deities. These are the forms of which the extant texts principally speak; and, above all, they are those which possessed the greatest interest for the nations of antiquity outside Egypt.

(B) *List of gods*:—1. *NATIVE EGYPTIAN DEITIES*.—Rā is the god of the sun, who, conceived of as a man, or as a man with a hawk's head, guides the heavenly bodies, creates new life by his rays, and thus blesses mankind, although at times he also shoots forth consuming fire (his eye is the goddess Seshet, cf. above, p. 182). The centre of his worship is Heliopolis (Egypt. *An* [Heb. *an*] or *Pa-Rā*, Gr. *Ἡλιούπολις* [Heb. *עַרְן רָא*]), where the kings of the 12th dynasty built him a great temple. For the most part he stands alone, but occasionally an artificially formed consort (see above, p. 179^a), Rā-t (Rā-t-ta-*ui*), is placed by his side. The monuments of the cult of Rā resemble the conical stone in which among others he embodied himself at Heliopolis. In the time of the Old Empire huge buildings were erected to him in the form of a flat-topped pyramid surmounted by an obelisk. The best known of these was that erected by king Rā-en-user at Abusir (see above, p. 183^b).

The god pursued his course in the heavens by ship. Two barks, bearing the names Mādet and Sekti, are generally attributed to him; in later times he is supposed to use a special vessel for every hour of the day. The name of Rā is associated with numerous legends which depict him as a king decaying with age, against whom gods and men rebel, but who always emerges victorious from the resulting conflicts. The texts name a number of other sun-gods along with and often confused with Rā. Of these we now proceed to notice the five most important—

(1) *Horus*.—Our treatment of this god is rendered difficult by the circumstance that under this name were understood two deities, who were originally quite distinct, although afterwards they passed into one another: Horus, the son of Isis (see below, p. 194^b), and Horus the sun-god. The latter, again, is separated into a number of independent individual forms, which are distinguished by additions to the name Horus. Thus we have: *Her-ur*, 'Horus the ancient,' of Letopolis; *Her-men-ti*, 'Horus of the two eyes,' of Shedenu in the Delta; *Her-chent-ān-ma*, 'Horus in the condition of not seeing,' of Letopolis; *Her-em-chuti*, 'Horus on the horizon,' the Greek Harmachis, at Tanis, and in the environs of Memphis, where the great sphinx of Gizeh is his symbol; *Her-nub*, 'the golden Horus,' who is regarded especially as the midday sun; *Her-behudti*, 'Horus of Edfu,' whose symbol, the winged solar disc, used to be placed as an omen-averting on temples, steles, etc. Then, again, *Her-ka*, 'Horus the bull'; *Her-desher*, 'the red Horus'; *Her-āp-shetu*, 'Horus the revealer of the secret,' answer to the planets Saturn, Mars, Jupiter, which were thus thought of as solar forms.—*Her-t* is a later-formed female complementary form of the male Horus (see p. 179^a).

(2) *Cheperā*, 'he that becomes' (Germ. 'der Werdende'), is primarily the morning sun. A Turin text declares: 'I am Cheperā in the morning, Rā at midday, Tum in the evening,' but the three deities just named are usually thought of in pretty much one and the same way as the sun in general.

(3) *Tum* or *Ātum* is the god of Heliopolis, and

is frequently regarded as the creator; he is portrayed mostly as a man with the crowns of Egypt. A great temple dedicated to him was situated at the modern Tell el-Maskhuta, and known as *Pa-Tum* ('house of Tum,' the biblical Pithom; cf. Naville, *The Store-city of Pithom*, London, 1885).

(4) *Shu* appears, above all, as creator, and at Thebes and Memphis is named as one of the Egyptian kings of the gods. His female consort and twin sister is the lion-headed *Tefnut*. The notions cherished regarding this goddess, and especially her genealogical place in the Egyptian religious system, underwent numerous variations. In the myths she does not come at all prominently forward.

(5) *Āten*, 'the sun's disc,' of whom we have spoken already (see p. 183^b), is, in contrast to *Rā*, not an anthropomorphic form, but the celestial body itself. He is portrayed as the solar disc from which rays stream down towards the earth. These end in hands which reach down the signs for life, power, etc. Amenophis IV. (c. 1450 B.C.) desired to make *Āten* the ruling god in Egypt, called himself in honour of him *Chu(archu)-en-āten*, 'splendour of the solar disc,' and built him a great temple at Tel el-Amarna in Central Egypt, to whose neighbourhood he removed the royal residence, which had been at Thebes. Apart from the prominence it gave to the new god, the henotheistic (not monotheistic) reformation of this king made little change in Egypt. The organization of officials remained the same (cf. Baillet, *Rec. de trav. rel. à l'Égypte*, xxiii. 140 ff.), and so did the cultus and the religious formulae, in which the ancient Divine names were simply replaced in many instances by that of *Āten*. In numerous hymns, touched with poetical feeling, which have been found in the tombs of el-Amarna, the god is hailed as beneficent star, bringer of light and heat, rejoicer of man and beast, creator and nourisher of all things and beings, the only deity that is worthy of veneration, etc. As a matter of course, no myth is attached to the nature god himself.

Amon of Thebes was presumably at first a god of the reproductive natural force which generates animals and plants, as were his neighbour gods, *Ment* of Hermionthis and *Min* of Koptos. The three names probably go back to the root *men* (= 'stand'), the allusion being to the erected *phallus*. At a later period *Amon* blends more and more with the sun-god (see above, p. 184^a), and thus arises *Amon-Rā*, who is now hailed repeatedly in hymns as creator, dispenser of nourishment, etc. More and more he arrogates the functions of other gods, and is first invoked in a henotheistic sense, and then designated pantheistically as god of the All, the other gods being his members and parts. During this period the custom originated of deriving his name from *āmen* ('to be hidden'), the idea being that his true name, i.e. his real nature, is concealed (see above, p. 181^a). He is portrayed as a man with a high feather crown.

At Thebes *Amon* does not usually appear alone, but in company with the goddess *Mut* and their son *Chunsu*. There is thus constituted a Divine family, a triad, the members of which, however, always remain independent, and never blend into a trinity. It was generally held in ancient Egypt that a god, like a man, grows old and dies. In order to secure, in spite of this, the perpetual life of the god, he is supposed to generate by his wife, who is usually also his sister, a son like himself, who, when the father dies, steps into his place. He in turn generates, by her who had been his own mother, a son like himself—he becomes, as the Egyptians say, *ka-mut-f*, 'husband of his mother,'—who succeeds him on his death. Strangely

enough, there is no word of the goddess dying. But this is probably due, not to any real immortality being attributed to her, but to the meagre significance of goddesses in Egyptian mythology.

Besides the triad, we find in Egyptian temples groups of four or eight, and especially of nine deities. The composition of these groups rests upon a variety of principles: at times the forms have actually a close connexion, at other times one of the gods is regarded as king, the others as his court, etc. Pre-eminent in this class is the ennead of Heliopolis, in the formation of which a mythological system co-operated, and which then exercised an influence upon other temples as well (cf. Maspero, *Et. de myth.* ii. 337 ff.). In place of a single ennead some temples have two, a great and a small, while others have a still larger number.

Mut, depicted as a woman with a human head or that of a lion, had a temple of her own to the south of Karnak in Thebes (Benson-Gourlay, *The Temple of Mut in Asher*, London, 1899), where she passed for queen of heaven and eye of *Rā*, and where numerous lion-headed statues were dedicated to her or to *Sechet* (see below, p. 186^a), particularly by Amenophis III. and Sheshonk I. Instead of her we occasionally meet with the grammatically formed goddess *Ament* by the side of *Amon*. She has nothing to do with the almost homonymous goddess of the under world, *Amenti*, 'she who belongs to the realm of the dead.'

Chunsu appears to have been primarily a moon-god [*chens* = 'pass through,' here with reference to the motion of the stars]. He bears upon his hawk's head a moon-crescent and sun's disc, and the mention of him runs parallel with that of the other moon-deities (*Thoth*, *Āah*, etc.). In later times he becomes the god of healing, and falls apart into two forms, 'Chunsu, the beautifully resting one,' who always abides in the temple at Thebes, and 'Chunsu, the executor of plans,' who is sent out by the other as physician and magician. To the first of these a great temple was erected at Karnak by Ram-*ses* III. and his successors; the latter had a small sanctuary beside it, which is mentioned as late as the Ptolemaic era (cf. *Aegypt. Ztschr.* xxxviii. 126).

Ment was worshipped at various places in the Thebaid; he has a hawk's head, solar disc, and the *Amon* feathers, and in the Theban period of Egyptian history he is regarded especially as the god of war, to whom the Pharaoh, as he sets out for battle, is compared. His embodiment at Erment is the *Bacis* (see below, p. 190^a).

Min [formerly read *Chem* or *Amsi*] was the god of Panopolis, Koptos, and other places; he presents himself as an ithyphallic man, and is viewed as the god of procreation. Harvest and other joyous festivals are held in his honour, and he often coincides with *Amon ka-mut-f*, as the god who constantly reproduces himself and thus lives for ever.

Chnum or *Chnuphis*, the ram-headed god of the cataract region, is creator of the world, which he fashioned upon the potter's wheel, and of human beings, whom he 'constructed.' By his side appear the goddesses to be presently mentioned, *Sati* and *Anukit*. In addition, we find occasionally coupled with him the frog-headed goddess *Hekt*, who is frequently mentioned from the earliest times downwards, without our being able, however, to fix her exact significance. At all events, she played a part in the resurrection dogma, which was symbolized down to the Christian-Coptic era by her sacred animal, the frog.

Ptah (Gr. *Θηθᾱ*) was the god of Memphis, and,

as such, well known to the Greeks, who for unknown reasons call him *Hephaestus*. Herodotus visited and described his temple (Herod. ii. 99, 101, 121, 176). Ptaḥ appears in mummy form, swathed, with only the head free; the feet are placed upon the sign for truth. In Memphis he was regarded as the first king of the country and as creator, a rôle which at Philæ is assigned to *Ptaḥ-Tatunen*, a combination of Ptaḥ and Tanen or Tatunen, a deity who makes his appearance especially in Nubia, and who, as earth-god, recalls the Egyptian Seb (Keb). Ptaḥ is also combined with other deities so as to form new special gods. Thus we have *Ptaḥ-Aten-en-pet*, 'Ptaḥ solar disc of the heaven,' who illumines the earth with his rays; *Ptaḥ-Nu*, the father of the gods; *Ptaḥ-Hapi*, Ptaḥ the Nile; and, above all, *Ptaḥ-Sokaris*, to whom *Ptaḥ-Sokaris-Osiris*, *Ptaḥ-Osiris*, and Sokaris alone (see below) correspond. The triad at Memphis is composed of Ptaḥ along with Setchet and their son Nefer-Tum or Imhetep (Imṯhes).

Setchet (Seclmet) is a lion-headed sun-goddess, who, under the title of 'the eye of Rā,' slaughters Rā's enemies. In her essential significance she coincides pretty nearly with the lion-headed Mut of Thebes, Tefnut, Pacht of Speos Artemidos, and the cat-headed Bast of Bubastis.

Nefer-Tum appears, particularly in more recent texts, as a man whose head is surmounted by a budding lotus, from which we may infer that he was a god of the regeneration and reawakening of nature, although there are no specific details of this in the inscriptions. **Imhetep**, 'he who comes in peace,' is depicted as a youth with a closely-fitting cap upon his head. He generally appears seated, with a rolled-up papyrus upon his knees. In earlier times his figure does not seem to occur, but in the later New Empire, and, above all, in the Saitic period, numerous bronzes of him are found, notwithstanding which he does not become any more prominent in the texts, where he is introduced as a learned god. — For the associates of Ptaḥ, see above, p. 179^b.

Sokaris, conceived of as hawk-headed, is primarily a sun-god. His principal festival fell at the winter solstice, and in the Ptolemaic period was celebrated on the morning [at an earlier period perhaps on the evening] of the 26th of Choiak (cf. Brugsch, *Rev. égypt.* i. 42 ff.). He was worshipped especially in the neighbourhood of the necropolis of Memphis (where there is still a reminiscence of him in the name *Saggarah*), and thus became blended on the one side with the Memphitic Ptaḥ, and on the other with the god of the dead, Osiris, whose symbols were, in consequence, often assigned to him.

Nechebit of Eileithyiaspolis, the vulture-formed tutelary goddess of Upper Egypt, generally appears in company with the serpent-formed *Uat'-it* of Buto, the tutelary goddess of Lower Egypt. The combination of the two stands for the empire of the Pharaoh, who united both their spheres of authority under his sway.

Hathor, 'the house of Horus' according to the later etymology, is mentioned times without number, and had her principal temple at Denderah. She is the goddess of joy, the patroness of mirthful gatherings. Her sacred animal was the cow, in consequence of which she occasionally appears with a cow's head, and, even when she wears a human form, she has very frequently cow's ears. Another Hathor is regarded as the goddess of the under world, and yet other Hathors are the seven female beings who made their appearance at the birth of a child and, like our fairies, foretold its fortune.

Sebak (Suchos) appears with a crocodile's head or as a crocodile. Under this same name, how-

ever, we must distinguish at least three different deities. In the first place there was a sun-god, who is combined with Rā and makes his appearance pre-eminently at Ombos, side by side with the sun-god Aroëris. Another Sebak constitutes a kind of by-form of Osiris. Finally, there is a Sebak who is regarded as the god of evil. His sacred animals were the crocodiles, which were supposed to be the associates of Set in the under world, and which in most of the nomes of Egypt were hunted to the death. The centre of worship of a Sebak who was well disposed to men continued till a late period to be the Fayum.

(2) **FOREIGN DEITIES.** — The Egyptian gods during the flourishing period of the country's history were not exclusive. They admitted into their number such of the gods of neighbouring peoples as had been found to be powerful and capable of resistance. It is a sign of deterioration that such a course was not followed with the Greek and Roman deities, who had no place assigned to them in the temple cult, but had to be content with the worship of certain circles of the people who would regard them as special gods. In the first millennium B.C. the Egyptian religion was too ossified to permit of its assimilation of new ideas. And this all the more because at this very time an archaizing tendency made itself felt in religion, so that from the time of the 25th dynasty the oldest attainable religious formulæ are in the most unmistakable fashion sought out and employed once more. In earlier times it was different. Libyan, African, Semite deities were then worshipped in the Nile valley along with the native gods.

(a) From the *Libyans* the Egyptians, in invading their future settlements, presumably borrowed the goddesses Neith and Bast, who at the beginning of Egyptian history play a considerable part, then recede entirely, and come forward once more in the Saitic period (from B.C. 700 onwards).

Bast appears pre-eminently as the local goddess of Bubastis in the Delta, where she had a share in the cult of the principal temple (Naville, *Bubastis*, London, 1891; *Festival Hall of Osorkon II.*, London, 1892). She is portrayed with a cat's head, and, like all lion- and cat-headed goddesses, is regarded as an embodiment of the sun. She plays no considerable part in the mythology.

Neith was thought of as an armed woman, with bow and arrow in her hand. As local goddess of Sais she was well known to the Greeks. In mythology she is regarded as the mother of Rā, and then becomes blended with Isis, along with whom she plays a rôle in the Osirian festivals, which under the New Empire had one of their centres at Sais. The Libyans of the time of Seti I. tattooed the ideogram of Neith upon their arms and wore it into their clothes (cf. Mallet, *Le culte de Neith à Sais*, Paris, 1889; Petrie, *Nagada*, p. 64).

Amongst deities that were originally Libyan should perhaps be included also the two goddesses **Sati** and **Anukit**, who at a later period make their appearance in the cataract district as companions of Chnum (see above). Sati is depicted with the crown of Upper Egypt and the cow's horns, and is regarded as queen of heaven and of Egypt, queen of all gods, and is compared by the Greeks with Hera, although she has fundamentally nothing in common with her. Anukit wears a feather crown, is regarded above all as mistress of the island of Sehel in the neighbourhood of Philæ, and is compared with Hestia, but never succeeded in gaining any firm footing in Egypt proper.

(b) **Bes** and **Ta-urt** and their companions appear to be of African origin, by which is not meant that we are to think of divinities of a pronounced

negro type. We have to do rather with deities whose acquaintance the Egyptians made through the medium of the tribes on the southern border of their empire, and to whom they left their grotesque forms, although these stood in the most glaring opposition to the refined forms of the genuine Egyptian gods, and permanently retained the stamp of their barbarian origin.

Bes is portrayed as a bearded dwarf, with long ears, bandy legs, long and generally bent arms, with a feather crown on his head. Behind him hangs down to the ground a long tail, probably that of the *cynalurus guttatus*, whose name (*bes*) the god himself bears. Apart from occasional ornaments, he is represented naked, and almost always as of the male sex. It is only rarely that a female form appears beside him. In later times a number of by-forms (Hait, Ahti, Sepd, Ahani, etc.) take their place by his side. These are at one time identified with him, and at another remain independent. In the Old Empire he seems to have as yet played no part; in the Middle Empire there is still little mention of him; it is during the New Empire, especially in the Saitic period, that he attains his bloom (cf. Krall in *Jahrb. d. Wien. Kunsth. Samml.* ix. p. 72 ff.; A. Grenfell, *PSBA* xxiv. 21 ff.). He is regarded as a deity who renders aid at the birth of gods and kings, who amuses the newborn babe with his dances and waits upon it, protecting it at the same time from all evil, and especially against witchcraft. He thus becomes one of the most important of the omen-averting deities. At times he is confused with the young sun, and at a later period is thought of also as a pantheistic divinity.

Ta-urt's embodiment is a female hippopotamus standing upon its hind legs, with thick belly and pendant breasts, and often with a long mane hanging down to the ground. She, too, is ready with her aid at the birth of gods and kings, and in certain localities she is regarded, in her by-form Apet, as mother of Osiris. In representations of the under world she takes her place by the side of the cow-formed Hathor. She appears at the entrance to necropoleis and to the realm of the dead, presumably occupying this position that she may render aid at the new birth of the dead, the resurrection. Her symbol is one of the most frequently occurring amulets in tombs belonging to the more recent periods of Egyptian history.

(c) *Asiatic*, principally *Semitic*, deities (cf. Meyer, *ZDMG* xxi. 716 ff.; W. Max Müller, *Asien u. Europa*, 311 ff.) found their way into the Egyptian temples under the New Empire, a period during which the Egyptian people was much brought into contact, alike in peace and war, with the different tribes of Western Asia. The principal deities of this class are Baal, Reshpu, Astarte, Anta, and the city goddess of Qadesh. The last named will be dealt with in the same category as the Egyptian city goddesses (see below, p. 191*).

Baal was worshipped notably in the Ramesseide period, and indeed his cult appears to have had its starting-point at the city of Tanis in the eastern Delta, where Ramses II. gave to this god a place even in the chief temple. His name has frequently for its determinative the sacred animal of the god Set, with whom he thus appears to have been identified—a result which would be reached all the more readily because the by-form of Set, namely Sutech, was also regarded elsewhere as god of the Asiatics. No statues of Baal have been discovered in Egyptian temples up till now.

Reshpu, the Phœnician *Reseph*, carries a lance, exhibits Semitic features, and makes his appearance frequently upon steles belonging to the flourishing period of Egyptian history.

Astarte was worshipped in several Egyptian

temples. The most frequently mentioned is her shrine at Memphis, which existed down to the Ptolemaic period, and must have stood not far from the Serapeum. In the treaty between Ramses II. and the Asiatic Kheta, she appears as goddess of the Kheta, but even Ramses II. himself esteemed her so highly that he named one of his sons after her—*Mer-A-(st)rot* (Wiedemann, *Herodot's Zuvrites Buch*, 433; cf. Spiegelberg, *PSBA* xxiv. 41 ff.).

Anta likewise makes her appearance as goddess of the Kheta. She bears shield, lance, and battle-club, and is occasionally mounted on horseback. Ramses II. and III. worshipped her, and the first named of these monarchs called his favourite daughter and future wife after her—*Bent-Anta*, 'daughter of Anta.' But neither her cult nor that of her Semitic associates appears to have laid hold upon the mass of the people. It remained an official cult, quite in contrast with that of the Libyan and African divinities, who appear to have found their principal worshippers in popular circles.

(3) **DEIFIED MEN.**—In treating of the Egyptian religion, great importance has frequently been attached to the worship of the king of the land, and a whole pantheon of kings has been attributed to the Egyptians. But this way of putting it is not correct. The Pharaoh was, as we have seen already (p. 180^b), the direct offspring of a god, and hence bore the title 'beautiful god,' and felt himself to belong to the order of heavenly beings. Even during his lifetime hymns were composed which attributed to him all manner of divine attributes (for examples see Maspero, *Genre épist.* 76 ff.); he is portrayed with the insignia of the gods; his subjects approached him as a god, and no doubt offered adoration to him in the popular cult and elsewhere. But in the temple cult his worship had a very subordinate place. Amenophis III. indeed prays to his own *ka*, and obtains from the latter the promise of all kinds of heavenly gifts. Ramses II. admits himself into the number of his temple gods, etc. But, upon the whole, even these monarchs stand a long way behind the great gods. It may be noted also as a circumstance connected with this, that the cult ceases as a rule upon the death of the particular Pharaoh concerned. It is true indeed, that occasionally, even after their death, offerings continue for a considerable time to be presented to them in accordance with their own directions and from funds left by them for the purpose, until later generations apply these gifts to their own use, but it is seldom that the defunct Pharaohs continue to be invoked as actual heavenly powers. Only a few of them are mentioned after the lapse of centuries as deities (cf. e.g. for the kings of the first dynasties, Erman, *Aegypt. Ztschr.* xxxviii. 121 ff.), and even then only in company with others. The temples to the dead, which the Pharaohs erected to themselves, appear to have been nearly all very quickly alienated from their proper use.

Still less frequently than kings did ordinary mortals attain to Divine honours after death. One of these rare instances is found in the time of Amenophis III. in the person of Amenophis the son of Hapu, who is still regarded as a god as late as the Ptolemaic period (cf. Wiedemann in *PSBA* xiv. 334, *Urquell*, vii. 289 ff.; Sethe, *Aegyptiaca*, 107 ff.). Another is the prince of Cush, Pa-ser, who for a length of time bears the title of 'the god' (Wiedemann, *PSBA* xiv. 332 f.), and there are examples of the same in other two private persons under the 18th dynasty (Wiedemann, *Orient. Ltztg.* iii. 361 ff.). The Greeks assert, further (see the citations in Wiedemann,

PSBA xiv. 335), that in the otherwise unknown city of Anabis a man was venerated as a god, and had gifts presented for him to eat. But such notices are isolated; the veneration of such men being confined as a rule to the narrow circle of the clan to which they belonged, or the officials of the building erected by them.

Naturally, we must not confound Divine veneration of this kind with the proper cult of the dead, the object of which was to ensure a supply of food and drink to the deceased so as to prevent his wandering about as a ghost, but which did not necessarily imply the attributing to him of any Divine attributes in the stricter sense of the term.

(4) *THE POPULAR GODS.—Partition of the great gods.*—The older investigators of the history of Egyptian religion proceeded on the principle that the best way to arrive at a thorough knowledge of the character of the particular deities was to collect all the references to them in the monuments and to draw conclusions from these. But the progress of study showed that identity of name is in the Nile valley no necessary guarantee for identity of deity, that, for instance, Horus of Edfu is quite a different form from Horus of Letopolis or Horus the son of Isis. This circumstance it was sought in the first instance to explain by assuming that the original Egyptian gods were worshipped at different places, and that, under the influence of the varying local development of doctrine, the varying images, etc., there arose in course of time different conceptions of the gods, which found expression in the local by-names for the primeval divinities. This view is in general correct, but the phenomenon had a much fuller scope than was formerly supposed. It happened not infrequently that even in one and the same place the same god was worshipped under several forms, and that each of these forms was regarded as an independent personality.

When in invocations a god appears with different by-names, as for instance Amon-Rā the king of the gods, side by side with Amon-Rā the lord of the throne of the world, our first impulse is to find here two titles of one and the same god, and we shall thus do justice upon the whole to the notion of the worshipper. But when in pictorial representations we see a number of forms seated together who all represent the same god, but with the addition in each instance of a different by-name, and who are worshipped together, the Egyptians held in such cases that each of the pictures had also a special divine personality corresponding to it. Thus Thutmōsis III. appears at Karnak (*Leps. Denkm.* iii. 36 c, d) in the act of worshipping ten gods who are seated side by side and who are all called Amon, but one is Amon the lord of the throne of the world, another Amon-Rā the lord of heaven, another Amon of western Thebes; and these are followed by Amon the bull of his mother, Amon-Rā the great in love, etc. Sometimes the texts in such instances indicate that one is to address the god by his names. But in Egypt to name any one must not be understood in our weakened sense; the name is an independent part of the Ego, the different names have different independent forms corresponding to them. This occurrence of different forms of one and the same primeval god, if one might use the expression, explains how it is that upon certain steles the same god is portrayed in a variety of embodiments. Thus a stele now at Berlin (No. 7295, publ. by Wiedemann in *Mélanges déd. à Harlez*, p. 372 ff.) represents one of the king's shoemakers, Amen-em-āpt (about the 20th dynasty), engaged in worshipping the following forms: (1) the human-formed Amon-Rā in the valley, the lord of heaven; (2) the goose-formed Amon-Rā, the lion of valour, the

great god; (3) the ram-formed Amon-Rā of Surerii, i.e. probably the deity who lived in animal form in a shrine erected by Surerii.

It will scarcely be safe to assume that in such instances as the above there has been uniformly a partition, due to local conditions, of the god into a number of individualities. Rather may we find in not a few of these forms originally independent deities, whose old names afterwards became by-names of a greater divinity, without the memory of their original independence being thereby permanently lost. Many indications in the texts suggest that there was once a god known as 'lord of heaven,' another as 'lord of the All,' a third as 'great in love,' etc., and that these titles were gradually drawn into the sphere of Osiris, Amon, etc., just as happened, for instance, in Greece with deities like Hygieia, Eubuleus, Basileia, and others (cf. Usener, *Götternamen*, 216 ff.). But the old deities never became completely absorbed in the new form, but always detached themselves from it afresh, as may be seen from the variety of their embodiments. To each particular form of the deity a special form of embodiment must correspond, for the Egyptians recognized no gods but such as were conceived of personally, whether as man or beast or any other perceptible object. Thus there could be in the same place different embodiments of the same great god, the latter being only apparently a unity, but in reality composed of a long series of Divine individualities independent of one another.

(a) The Divine forms for *heaven and earth* are supplied, in the Egyptian mythology known to us, by personal forms that animate these concepts, namely, the goddess of heaven, Nut, and the earth-god, Seb, to whom we have referred already in dealing with the creation myths. So is it also with the *heavenly bodies*. Here, again, there is in general no mention of the worship of the natural body but of that of a deity animating it. For the most part, it is true, these remained special gods; it is only in a few instances that we have to do with great gods whose functions extended beyond giving its proper movement to the heavenly body. Occasionally, however, the attempt was made to combine the special god with a great god, in the same way as at Thebes the special gods were readily brought into relation to Amon-Rā (see above, p. 185^a). We thus hear of Isis-Sothis instead of Sothis alone as goddess of the dog-star, or of Bennu-Osiris instead of Bennu (Phoenix). The combination of Horus with the planet-gods also belongs to this category. The old month-gods were almost wholly replaced by great gods, to whom the months were dedicated; the lists of later times have preserved of the old deities, properly speaking, only 'the great heat' and 'the little heat' for the two principal summer months (see, for lists of such divinities, *Leps. Denkm.* iii. 170 f.). The gods of the particular days of the week were also combined with great gods, whereas the goddesses of the hours of day and night were able to preserve their independence down to the latest times. It is only rarely then that we find an invocation of the stars themselves, or that a particular star is mentioned as a god except in star catalogues.

The proper moon-god Aāh gradually passed into the god Thoth, and, even when he is not exactly amalgamated with the latter, he is depicted similarly to him. In later times he is further attached also to Osiris. In the case of Thoth it is probable that, at least in some localities, we have in him an actual moon-god whose personality originally ran parallel with that of Aāh, and to whom the *cynocephalus* was sacred; whereas the later more important Ibis-Thoth, associated with writing and the healing art, is, to all appearance, of a different

origin. Egyptology has not as yet succeeded in separating the various Divine primary elements combined in the same god, although the task is one that in the Nile valley is at once suggested and facilitated by the presence of the various sacred animals.

(b) *Stone* worship prevailed especially in Heliopolis, where the sun-god embodied himself, amongst other forms, in a stone. It is hard to say whether we should detect here the influence of the Semites, in whose native land Divine stones played a great part, or whether we have to do with genuine Egyptian notions. In any case, this species of worship exhibits itself as long established. The form of the deity appears to have varied; the texts speak now of a pyramid, now of an obelisk (whence the obelisks in the classical period of Egyptian history are always dedicated to Rā or to some deity amalgamated with him), and again of a kind of pillar; but the essential form is always that of a cone, the shape common to the Semites. It was probably owing simply to the influence of Heliopolis that the belief in this embodiment of Rā found entrance into other temples. The god Set, the opponent of Osiris, was occasionally thought of as embodied in a stone, as is shown by the determinative of his name, which is a stone in the shape of a brick-mould. Late texts mention also worship paid to the metals and to half-precious stones, but such notices are rare.

(c) The worship of *high places* could naturally attain to no great proportions in the Nile valley, as characteristic elevations are in general wanting in the flat plateaus that stretch along both banks of the river; but instances of it do occur. The circumstance that the temple of the Hathor of the copper mines of the Sinaitic peninsula was situated upon a mountain height, may, it is true, have been due to Semitic influence. But we find a similar state of things in other places as well. At Heliopolis there was a sandhill, on which sacrifices were offered to the sun-god at his rising (Piānchi stele, l. 102). At Gebel Barkal the mountain on which the temples were situated was called the holy mountain, probably because it was itself regarded as holy, and not merely because of the sanctuaries to which it afforded shelter. From the end of the second millennium B.C. come some notices pointing to the paying of Divine honours to the mountain peak over Sheh Abd el-Gurnah at Thebes. This peak has prayers addressed to it; a *ka*, a Divine personality, is attributed to it; transgressions may be committed against it, which it punishes severely, or forgives if entreaty to that effect is addressed to it. In other texts it is brought into connexion or even identified with the serpent Mer-seker ('she who loves silence'), one of the most popular deities of the Theban necropolis. But originally the mountain was an independent Divine form (cf. the texts in Maspero, *Ét. de myth.* ii. 402 ff.; Capart, *Revue de l'Université de Bruxelles*, vi. [April 1901]), which, amongst other functions, was supposed to discharge those of a healing deity. A more exact study of the rock-inscriptions of Egypt may be expected to bring to light more of these high-place deities; in temple-inscriptions, on the contrary, they appear to be practically wanting, showing that here they were not regarded as of sufficiently high rank to find mention by the side of the great gods.

(d) The cult of *springs* and *streams* was in the Nile valley naturally confined to a few instances, there being so slender a supply of independent watercourses. Of springs, the only one, properly speaking, that comes into consideration, is at Heliopolis. In it, according to a stele of the 8th cent. B.C. (Piānchi stele, l. 102), the sun-god Rā washed his face, and his example was followed by

kings when they visited the sanctuary. It is not said whether the spring actually received Divine honours, but it certainly possessed a certain sacredness, which it retained even after the fall of the Egyptian State. The Arabs regarded it as the fountain of the sun; and, according to the Christian legend, the Virgin Mary, when fleeing from Herod, washed the swaddling-bands of the infant Jesus in it (*Evang. Inf. Arab.* c. 24; Abd Allatif, *It. de l'Égypte* [French tr. by de Sacy], p. 38 ff.).

Far more important was the place held by the Nile (Hāpi), on whose flow and inundation the prosperity and even the existence of Egypt depended, and which was conceived of as a fat man with nipple-formed breasts, flowers upon his head, and wearing a loin-cloth composed of sedge. He had temples in a number of places (Nilopolis near Memphis, Heliopolis, etc.); in other instances he was received into the important temples in company with other deities. The greatest of the popular festivals were held in his honour and to mark the phases of his increase; numerous hymns celebrating his beneficence have come down to us, being found even engraved upon rock-walls along with lists of offerings to be presented to him (cf. e.g. Stern, *Aegypt. Ztschr.* 1873, p. 129 ff.; Maspero, *Hymne au Nil*, Paris, 1868). In these texts he is hailed as giver of life to all men, bringer of joy, creator, nourisher of the whole land. In all this we have no myth in the proper sense of the term, and the Nile comes into no further relations with the great deities of the temples. Occasionally the Nile is not viewed as one divinity, but is divided into the Nile of Upper and of Lower Egypt. When these two bind together for Pharaoh the plants that characterize them, he is thereby constituted lord of the whole land. There are other instances where the process of partition is carried still further, and each nome has its own Nile.

In the train of the Nile appear a number of forms which embody the blessings dispensed by him. Thus we have the god of provisions, Ka (not to be confounded with the soul-form *ka*), who is also called the father of the gods; the gods Hu, Tefu, and Resef, which stand for abundance and nourishment; the goddess of corn, Nepera, and the serpent-headed goddess of the harvest, Rennut.

(e) The worship of *animals* (cf. Wiedemann, 'Culte des animaux' in the *Muscon*, viii. 211 ff., 309 ff.; *Mé. de Harlez*, 372 ff.; *Herodotus' Zootetes Buch*, 271 ff.) has been regarded from ancient times as one of the most remarkable features of Egyptian religion. In discussing this subject we must distinguish between the Divine honours paid to certain individual animals, and the high regard for whole classes of animals sacred to certain gods. In the latter instance it was supposed that certain animals were specially dear to certain gods, whether because they were fond of incorporating themselves in these, or for some other mythological reason. The animals in question must not be hurt or killed, in their lifetime they must be fed, after their death they were frequently embalmed and buried, but were not worshipped. The phenomenon with which we are dealing may be compared with the high regard for certain animals shown in other lands: for instance, at the present day, for the stork in N. Germany: it is not animal worship, properly so called. Almost every species of animal found in Egypt is included in this category of sacred animals (see list in Parthey's Plutarch, *de Is.* 261 ff.), but regard for a particular species is commonly confined to particular nomes or districts, and one nome had no scruple about killing and eating the sacred animals of another.

The case is quite different with individual animals that ranked as Divine. In them a particular god embodies himself when he descends to

earth, and lives on in this incarnation in the temple. The cult is then occupied essentially with this god-animal, which is duly supplied with food, drink, adornments, etc. We learn this, above all, from the classical writers; the inscriptions in such cases always speak of the god himself. These animal deities were immortal in the sense that, whenever the animal incorporation died, a fresh embodiment of the god in an animal of the same species immediately took place. Moreover, the death of the first embodiment was not a complete one; its immortal soul passed, like that of man, as Osiris, into the world beyond. Hence the Osiris dirge was raised for the animal, and it was solemnly interred, sometimes in an isolated tomb, sometimes in a spot where there were numerous such graves of animals. Besides real animals, we encounter, amongst these embodiments of deity, certain fabulous creatures. Pre-eminent amongst these is the *phoenix*, an embodiment of Râ. The Egyptians came to look upon these fancied forms as actually existing creatures, like the sphinx, the griffin, etc., which were supposed to inhabit the desert (cf. e.g. Lepsius, *Denkm.* ii. 131).

The most important of the god-animals, or at least the most frequently mentioned in the classical authors, are the following:—

Apis (Egypt. *Häp*)—a bull in the form of which Ptah of Memphis embodied himself, and whose worship is attested from the 4th dynasty down to the time of the emperor Julian. This animal was believed to be engendered by a moonbeam; the cow which gave birth to him shared in the veneration paid him. He was recognized by a number of marks, about whose appearance tradition varies as to details. Solemnly introduced into the temple, the animal gave oracles, partly directly, and partly through his attendants. His death occasioned general mourning; his place of burial, from the middle of the 18th dynasty, was a rock-cut catacomb, the so-called *Serapeum*, in the middle of the necropolis of Memphis. The soul of the animal passed as Osiris-Apis into the world beyond, and this double form became blended, in the minds of the Greeks, who were settled in Egypt, with the notions of Pluto and Asclepius. Thus arose the hybrid god Sarapis or Serapis, whose cult at the beginning of the Christian era was diffused over the whole of the Roman Empire (cf. e.g. Lafaye, *Hist. du culte des divinités d'Alexandrie*, Paris, 1884).

Mnevis—an incorporation of Râ as a bull, at Heliopolis.

Bacis—a bull form of Râ (Mont), at Hermopolis.

Suchos—a crocodile embodiment of Sebak in a lake in the Fayum, which likewise gave oracles, and was interred in the catacombs of the labyrinth.

A *ram* form belonged, amongst others, to Osiris at Mendes, and Amon-Râ at Thebes. Thoth had the form of an *ibis* at Hermopolis Magna, and, it would appear, also in a temple at Memphis, where the ibis was regarded as a sacred animal, and buried accordingly.

The **Phoenix** (*bennu*), in earlier times conceived of as a heron, in later also as an eagle, was an embodiment of Râ, especially as the morning sun, in a temple at Heliopolis (cf. Wiedemann, *Aegypt. Ztschr.* 1878, p. 89 ff.), but worshipped also in other places in Egypt, and one of the forms of the blessed dead, whose resurrection was guaranteed by that of the Phoenix itself.

The **Sphinx**, a lion with human head, was an embodiment of Râ-Harmachis, who is represented in this manifestation-form by the great Sphinx of Gizeh. The Sphinx, further, represents more generally the form assumed by various deities

when they descend to the earth as watchers. The figures representing sphinxes generally have the features of the dedicator of the particular sphinx, i.e., for the most part, the features of a king. The majority of sphinxes are of the male sex. But if the deity portrayed should be female, and the dedicator of the monument a woman, the sphinx may also have a female form. The sphinx was originally unwinged; it was only under Asiatic influence that it came to assume wings.

The *cow* was an embodiment of Hathor and of other maternal deities.—The *serpent* was the form of embodiment of several deities of the tomb districts—above all, of Mer-seker (see above, p. 189*), as well as of harvest deities like Rennut and many others.

(f) In the Nile valley there is less frequent mention of the worship of *plants and trees* than one might expect in the case of an essentially agricultural people. This deficiency of statement is explicable on the ground that the cult of vegetable life was part of the popular religion, and only found occasional admittance into the temple cult. Even when the latter was the case, one can always see clearly how loose was the connexion of the cult of plants with that of the great gods, and how little, in consequence, this connexion was maintained.

Thus, a religiously important tree is the *sycomore* which stood in the West on the way to the world beyond, and from which a goddess, who is more or less identified with the tree, supplied the dead with food and drink for their wanderings. This notion took its rise from the actually existing isolated trees growing at the commencement of the desert, in small hollows where water is found. Under the shadow of these the shepherd or the huntsman would seek rest, and express his gratitude by paying veneration to them. A great deal of vacillation is shown as to the particular deity with whom this sycomore is to be brought into relation. The one usually selected was Hathor, the mistress of the West, but besides her we find Isis, Selkit, Neith, Nut (cf. Wiedemann, *Rec. de trav. rel. à l'Égypte*, xvii. 10 ff.). Within the sacred domain of the temples there were groves, the trees of which were occasionally venerated in the same sense as everything else connected with the temple. In the Ptolemaic period an attempt was made systematically to establish this veneration in the case of all temples, and thus to include the various species of sacred trees in the lists of *materia sacra*. Thus in 24 nomes we find the Nile acacia, in 17 the *Cordia myxa* (?), in 16 the *Zizyphus Spina Christi*, in 1 or 2 the sycomore, the *Juniperus Phœnicea*, and the *Tamarix Nilotica*. In all, 10 species of trees appear as sacred. Of these as many as 3 are sometimes venerated in the same nome (Moldenke, *Ueber die in altägypt. Texten erwähnten Bäume*, 8 ff.). So far as we know, the only tree that played a considerable rôle in the temple cult was one that grew at Heliopolis near the spot where the sun-god killed the Apepi serpent. From this tree the Phoenix took flight, and on its leaves Thoth or Sefekh inscribed the name of the king in order thus to endue him with everlasting life (cf. Lefebvre, *Sphinx*, v. 1 ff., 65 ff.).

The most surprising circumstance in connexion with the whole subject of plant worship is that the tree which is most characteristic of the Nile valley, namely the palm, makes its appearance only very rarely in the cultus inscriptions. Thus, the palm is found instead of the sycomore of Nut upon a relief now at Berlin (No. 7322); and a stele at Dorpat (*PSBA* xvi. 152) mentions the goddess Ta-urt of the Dum palm; but such notices are only exceptional.

With greater frequency than sacred trees we encounter the special gods of corn, who, as noted above, are sometimes assigned to the train of the Nile god. Also the dogma of the resurrection of Osiris is brought into connexion with plant life, and Osiris awakening to new life is portrayed as a mummy lying upon its back, and with corn sprouting from it (Papyr. Louvre, v. 27, in Pierret, *Duque de la resurrection*; relief at Philæ, in Rosellini, *Mon. del culto*, p. 23). Allusions to this doctrine are found as early as the Middle Empire (Birch, *Coffin of Amannu*, pl. 276), and then repeatedly in the Book of the Dead. Even in the Osiris festivals of late times the sprouting of grains of corn from the figure of Osiris still plays a part; and in a tomb of the time of Amenophis III. proof has been discovered by Loret (cf. *Sphinx*, iii. 106 f.) that it was occasionally the practice then, in connexion with burial, to make corn grow from an image of Osiris as a kind of pledge of human immortality.

(g) Of city divinities there must have been a considerable number, but only one of them is mentioned somewhat frequently, namely the goddess of Thebes, who was conceived of as an armed woman, and who appears in two forms, namely East 'Thebes,' and 'she who is there in sight of her lord' (originally the necropolis of Drah abu Neggah; cf. Maspero, *Et. de myth.* ii. 403). As yet, we know nothing of temples erected in honour of such personifications. Even a foreign city deity found admittance into the Egyptian pantheon, namely the goddess **Kadesh**, who derived her name from a Syrian city on the Orontes, and who comes before us as queen of heaven, mistress of all gods, daughter of Râ. She is portrayed, with a front view, as a woman standing upon a lion. To what foreign deity she originally answered, whether a Semitic Astarte in her local form as worshipped at Kadesh, or a Hittite goddess, cannot be determined, but the fashion of her portraiture makes the latter supposition the more probable.

(h) There were also certain buildings, temples, pyramids, and the like, that were temporarily regarded as divinities to whom veneration was due.

(5) **DEIFIED ABSTRACT NOTIONS.**—These hold a special place in the list of Egyptian objects of veneration. It would be a mistake to look upon such deification as the result of profound philosophical speculation; it is simply a development of the fundamental idea which never ceased to make itself felt in Egypt, namely, that every word must have corresponding to it a perceptible form, a kind of personality, which could be portrayed and, if necessary, worshipped. The number of abstract notions known as yet from lists of gods or from other indications, is pretty large; the discovery of fuller lists will no doubt increase the number. The base of an altar (now at Turin, publ. in *TSBA* iii. p. 110 ff.) dating from the time of king Pepi I. (6th dynasty), supplies the following group: Day (*Hru*), Year (*Renpt*), Eternity (*Hch*), Unendingness (*Tet-ta*); followed by Life (*Anch*), Stability (*Tet*), and Joy (*Fut-âb*). Further, we find here Seeing (*Ma*), and Hearing (*Sen*), and, finally, Right Speaking (*Maâ-cher*). In other inscriptions appear Taste (*Hu*), Perception (*Sa*), Strength (*Us*), etc. When it is desired to portray these abstract notions, they are simply provided with a human form having the appropriate written sign on its head, or their ideographic hieroglyph sign is drawn with arms and legs appended to it. In the temple cult these forms in general scarcely received actual worship, although some of them are mentioned not infrequently

under the New Empire. A number of abstract notions seem to make their appearance as a connected group at Hermopolis, where the so-called eight elementary deities enjoyed Divine honours. These eight, divided into four pairs, each with a male and a female, were Eternity (*Hch*), Darkness (*Kek*), Heavenly Water (*Nu*), Earthly Water of Inundation (of the Nile, *Nenû*); see the Literature in Wiedemann, *Orient. Ltztg.* iv. 381 ff. From this starting-point they found admittance into other temples as well.

There was only one abstract notion which by itself played a prominent part, namely the goddess Maât, 'Truth,' who appears as a woman, with the ideogram for 'truth' upon her head. She is quite materialistically conceived of; one can eat and drink the truth, in order to become truthful. Maât is mentioned from the earliest times onwards, but, in spite of the widely diffused veneration for her, she had seldom a sacrificial cult of her own. When prominent officials are called 'priests of the truth,' this is probably rather a title intended to characterize them as specially truthful, and not the name of an actual office. Occasionally we hear of two Truths, in which case there was probably in view the distinction between truth in action, i.e. justice, and inward sincerity. The goddess of Truth, when represented as human, appears at times blindfolded, because she judges without respect of persons. She conducts the dead into the judgment-hall of Osiris, where she attends to the weighing of the heart. In mythology she plays no part; and if at times she appears as the consort of Thoth, this has nothing to do with her proper significance, but rests upon later speculation, which desired to bring the god of wisdom into connexion with the truth. A similar judgment is to be passed on the statement that Maât is a daughter of Râ. This is simply an expression of the thought that the light of the sun brings the truth to view. None of these notions has been further worked up (cf. for Maât, Stern, *Aegyp. Ztschr.* 1877, pp. 86 ff., 113 ff.; Wiedemann, *Ann. du Musée Guimet*, x. 581 ff.).

iii. **THE CULT'S.**—The worship of the deity in the temple was concerned, above all, with the charge of the image of the god or the sacred animal that found a place in the holiest part of the building, the *naos*. The door leading to the *naos*, or the barred gate giving access to the god-animal, was fastened by a priest every evening with a strip of papyrus, the ends of which were smeared with clay and a stamp impressed upon them. The following morning it was one of the first sacred functions to break this seal, and thus to renew the possibility of communion between the deity and man. Regarding this ceremony and others which accompanied or followed the breaking of the seal, we are informed through the ritual books of various temples which have come down to us, and which describe the various sacred duties to be performed on the morning of each day. We have the ritual at Abydos, in the time of Seti I., for Osiris, Isis, Horus, Amon, Râ, Harmachis and Ptah (publ. by Mariette in *Abydos*, i. 34-86); at Karnak (in the Hall of Pillars, back wall), from the time of Seti I., for Amon-Râ (not yet publ.). Then there are isolated pieces: mostly with reference to royal visits to the temple, containing also pictures of the various ceremonies, mostly in the correct order, but furnished with abbreviated legends. These are to be met with on most temple walls, on the outside of the *naos*, temple doors, obelisks, etc. Further texts may be found in Papyr. Berlin 55 [now 3055] for Amon, and 14 and 53 [now 3014 and 3053] for Mut, both dating from the time of the 20th dynasty (publ. in

Hieratische Papyr. aus der Königl. Mus. zu Berlin, i., Leipzig, 1896-1901; cf. Lemm, *Ritualbuch des Ammondienstes*, Leipzig, 1882; and Moret, *Le rituel du culte divin journalier en Égypte*, Paris, 1902. For the parallel texts of the ritual for the dead, cf. especially Schiaparelli, *Il Libro dei Funerali*, ii., where numerous examples are given; for the meaning and translation of the latter texts, cf. Maspero, *Ét. de myth.* i. 283 ff. A number of the statements that come under the present category are already found in the Pyramid texts of the 6th dynasty. These surviving accounts of the ritual show that the ceremonies were nearly the same in almost all Egyptian temples.

There is first a brief indication of the ritual act to be performed, with a picture of it also when the text happens to be engraved in relief on the temple wall, and then follow the terms of the prayer which the priest is to utter as he performs each of the acts named. These prayers consist almost exclusively of invocations of the deity, without any further point of interest, whereas the acts themselves have a higher significance, as they let us see what was the form of the ancient Egyptian divine service. They show at the same time that the latter was very much of one cast, for the same ceremonies as were performed before the god every morning were performed also by the king when he brought a great offering to the temple in the hope of obtaining from the god in return the promise of victory over his enemies, joy, strength, or everlasting life. Much the same usages were followed, moreover, when the object was to reanimate a dead man, that he might be able to enter the world beyond and eat and drink there. We cannot go more fully into these ceremonies here, but we must speak of their order:—(1) There was first the 'striking or rubbing of the fire,' i.e. a spark was generated by striking a flint or rubbing dry pieces of wood against each other, and this spark was regarded as Divine and as an effluence of the eye of the sun-god Horus. It furnished the means of lighting the temple and of kindling the fire for the burnt-offering. The latter was the main object, for now follow: (2) the taking hold of the censer, (3) the placing of the incense-container on the censer, (4) the casting of the incense into the flame. Thereupon (5, 6) the ministrant advanced to the elevated place, the *naos*, (7) loosed the band that fastened its door, (8) broke the seal, (9) opened the *naos*, and thus (10) made the face of the god himself visible, and (11) looked upon the god. Reverently (12-17) he cast himself upon the ground, raised himself, and repeated the prostration a number of times, keeping his face all the while turned towards the earth, and then (18, 19) commenced a hymn of praise to the god. When this was ended, a series of offerings were presented to the god: first of all (20) a mixture of oil and honey, with which it was customary to anoint the images of the gods, and then (21) incense. After this the priest stepped back from the *naos* into the adjoining room of the temple, where (22) he uttered a short prayer. Then (23, 24) he took his place once more in front of the *naos*, and (25) solemnly praying ascended the steps which led from the temple floor to the level of the interior of the *naos*. Whereas he had hitherto stood lower than the deity, he now felt himself, after performing the above-mentioned ceremonies, to be on an equal footing with him, and might thus stand on the same level. But scarcely had he taken this step when he was seized once more with awe of the god, whose countenance was now distinctly visible (26, 27), he looked upon him (28), and repeated the prostrations he had previously performed (29-34). Then he burned incense (35, 36), and uttered one

or more prayers and hymns in honour of the god (37-41). A figure of the goddess of Truth was now presented to the god (42), who, in order to be truthful, must receive the truth into himself by eating or drinking. Then followed an incense-offering, meant not only for the god who was the special object of worship, but for all his companions who shared the veneration of the temple (43). Then began the purifying and clothing of the god. First of all the priest laid both his hands upon the god himself (44), then upon the upper side of the case in which the figure was placed, in order to effect its purifications as well (45). Then he purified the deity with four libation-pitchers full of water (46) and with four red pitchers full of water (47), fumigated him with incense (48), brought a white sash (49) and put it on the god (50). Then he put on him, successively, a green, a bright-red, and a dark-red sash (51-53), after which he brought to him two kinds of ointment (54, 55), then green and black eye-paint (56, 57), an act which was followed by scattering dust before the god (58), in order thereby to make even the spot, on which the god or the sacred animal stood, clean. The priest next walked four times round the god (59), and this ceremony explains why the temple *naos* occupied a detached position in the sanctuary, namely, in order that this walking round it might be possible. At the close of this performance the presentation of offerings again took place. First the god received natron with which he was purified (60), then he was fumigated with incense (61), and underwent a purification with four grains of a substance brought from the south, and then with four grains of the same from the north (62, 63), then a purification with water (64), followed by a fumigation with ordinary incense, and another with the *Anti* incense from Arabia (65, 66). Here ended the regular Divine service.

The object of all these acts was to clothe and to purify the god. The latter point was considered important, because the Egyptians in all matters of religion laid special stress upon bodily cleanness. Washings of every kind were required before any sacred transaction; even the gods must wash themselves repeatedly if they desire to consult the sacred books. Fumigating and rubbing with ointment also come under the category of purification, it being the custom in the Nile valley to perfume oneself before important transactions of a civil as well as a religious character. The man who above all had to wash himself was the priest, who was accordingly designated 'the clean' (*āb*, *uāb*), the ideogram for which is a man over whom water is poured or who finds himself beside water, in allusion to these frequent washings.

In addition to the purifying, the supplying of food and drink to the god or to the sacred animal played a part in the cultus; but here we have no extensive books of ritual to tell us in detail, for instance, about the prayers to be uttered in connexion with the performance of the various acts. No doubt, all this was regulated by as exact a code of ceremonial as the actions and prayers connected with the clothing and the purifying of the god. In regard also to other religious ceremonies we are without the prescriptions as to the occasions and the ordering of processions, burnt-offerings, and various consecrations. There are merely allusions in the inscriptions, but these show that here too everything was fixed by a hard-and-fast rule instead of being left to the discretion of the individual worshipper or the temple college.

iv. CONCEPTIONS OF A FUTURE LIFE.—(1) The notions as to a world beyond (cf. Wiedemann, *The Realms of the Egyptian Dead*, London, 1901).

where gods and the dead have their home, are primarily connected in the Nile valley with the sun and his 24-hours' course. The sun rises in the east in the morning, and sails in his bark to the west; for the motion of the sun, like that of all the heavenly bodies, is conceived of by the Egyptians as effected by a vessel, the waters on which it sails being sometimes viewed as a heavenly ocean, and sometimes as a Nile that flows through the brazen heaven. The sun-bark is generally supposed to be carried along by the stream, requiring merely to be steered; it is only exceptionally that it is represented as drawn by jackals which run on both banks of the heavenly stream. In the cabin of the bark sits the sun-god, while other gods man the vessel. The day voyage lasts 12 hours, that is to say, the Egyptians divided the time from sunrise to sunset into 12 equal parts, these being consequently, as a matter of course, longer in summer than in winter.

The sun sets in the west, and commences now upon a subterranean stream its night voyage, which also lasts 12 hours. The whole voyage of the sun is compared by the Egyptians to the life of man. The god is born in the morning, grows old during his course, sinks in the evening, as an old man, into the night, to rise again as a new god the following morning. Usually the whole process is accomplished, as indicated above, within four and twenty hours; more rarely, instead of this, it is spread over a whole year or over longer periods of 365 and more years. Wherever the sun comes, he finds gods and spirits, but the distribution of these beings over heaven, earth, and the under world is variously conceived of at different times.

(2) As to the dwelling-place of the gods themselves we have only meagre data. In the matter of the cultus, apart from the offerings which were daily offered to the sun upon open-air altars, the whole concern was with the embodiments of the gods that dwelt in the temples. If *Hoppelgangers* who did not dwell on earth were postulated for these, they were spoken of without any precise localizing of them, or they were called by such general titles as 'lord of heaven or earth or Egypt,' etc. In later times, in addition to this, the various gods are frequently conceived of pantheistically as inhabiting the whole world. Thus it is said (Horraek, *Lamentations d' Isis*, pl. 5, l. 2) of Osiris: 'The heaven contains thy soul, the earth contains thy forms, the under world (*Duat*) contains thy secrets.' A dwelling-place of the gods in the sense of the Greek Olympus is unknown to the Egyptians.

(3) Far more numerous than the statements regarding the abodes of gods are those about the region which was believed to be the place of sojourn of dead men when they were awakened to new life. This region is variously placed—

(a) *Above the earth, in heaven.*—Different views prevailed as to how the soul succeeded in gaining admittance into the sun-bark among the stars or into the spreading Plain of the Blessed. According to some, the soul, immediately upon a man's death, hastened to the west to the spot where the sun sank through a narrow opening into the deep, and there clambered into the solar bark. On board of the latter it passed through the under world, and the following morning rose to heaven. Others believed in a ladder, by whose aid the soul could climb to heaven. Another set of notions attached themselves to the cremation of the dead; the soul was supposed to ascend with the smoke from the burning corpse. But the most widely diffused view was that the soul had the form of a bird, that of kings being in the form of a hawk, that of other men in that of a bird with a human head. In this

shape it left the body as it grew cold in death, and flew upwards.

On reaching heaven, the soul dwelt in the company of the gods and of the souls that had arrived there before it. How a place was assigned it here is a question on which the Egyptians in general do not appear to have had settled convictions. Only the Pyramids of the 5th and 6th dynasties notice it, the dead Pharaoh being here represented as seizing the supremacy of the other world by force. With the aid of his servants he captures the gods on his arrival, causes them to be slaughtered and cooked, and devours them along with their souls and attributes, crowns and bracelets. In this way their magical power passes over to him, and he becomes the mightiest of the gods. The texts give no indication, it is true, of how he was able to maintain this position against a subsequently dying Pharaoh, or to avoid being himself captured and eaten in turn.

(b) *Under the earth.*—Here lay *Duat*, 'the deep,' which the sun passed through by night, and which was divided into 12 parts, corresponding to the 12 hours of night. These were separated from one another by doors, or, according to another view, by massive gates. This realm is described in words and illustrated by pictures in a number of texts, notably in the Book of *Am-Duat*, 'that which is in the deep,' and the Book of the Gates, the beginnings of which go back to the Middle Empire, but which were widely circulated above all in Thebes from the 18th to the 20th dynasty. In later times they were less frequently copied. While their accounts are similar in their fundamental ideas, there are far-reaching differences in details. Through the midst of *Duat* flows a Nile, upon which floats the bark containing the ram-headed night sun. On the banks to right and left were found innumerable demons of the most varied forms, men, animals, especially serpents, or hybrid forms, human and animal. Many of them attend upon the sun, aiding him in his course. Others, with the great Apepi serpent at their head, labour to destroy the sun, but are always overcome, although this does not prevent their always commencing afresh the conflict of darkness with light—a conflict whose end the Egyptians never attempted to portray, and probably never expected.

The souls of men joined the sun in the west when he entered *Duat*. The god assigned them fields in the various divisions. Here they lived under conditions that were in general far from enjoyable, and had to render help to the god on subsequent nights. Each of them had the benefit of only a single hour's sunshine upon their land. As soon as the god had left any division, night reigned in it, illuminated at most by the seas of fire in which enemies of the sun-god were burned, or by fire-vomiting serpents. Originally it was held that all men, good and bad, kings and subjects, would experience much the same lot in these regions. Only those who were expert in magic might escape from *Duat* and pursue their journey in company with the sun till they reached a new day. In later times *Duat* became the scene of a process of judgment, in which sentence was pronounced concerning good and evil. The good were then allowed to till the fields, the bad were punished by being plunged in seas of water and fire.

Similar and as little reassuring is the account of the future world contained also in other Egyptian works; hence, above all, the numerous exhortations to enjoy life which were in vogue from ancient times down to the closing period of Egyptian history. Here the future world is presented as a land of sleep and darkness, whose inhabitants recognize neither father nor mother, in which they

pine for water and fresh air, and where there is a reign of absolute death, which shows no tenderness to its worshippers, and regards not the offerer of sacrifice.

(c) *On the earth.*—On this theory the realm of the dead appears to have been for long sought in the north, in the Delta. This Plain of Peace or Plain of *Aalu* (i.e. 'of marsh plants'; later, by popular etymology, explained as Plain 'of worms'), as it was called, was thought of as a district traversed by a stream and divided by numerous canals and river-arms into islands, which were the abode of the gods and the dead. The latter were mainly occupied with agriculture, which provided them with the necessary food. When the Delta came to be better known, the realm of the dead was naturally banished from it. At first it moved further north, still continuing on earth, but was afterwards transferred to heaven, being located in the region of the Great Bear.

In that form of Egyptian conceptions of the future world which prevailed in later times, above all in the Osirian faith, a realm of the dead, similarly thought of and named, lies in another quarter of the heavens, in the west, where the sun sets. Whether this notion is as old as that of the dwelling of the dead in the north—which appears most likely—or was of later origin, cannot be made out from the texts. From the time of the Middle Empire the adherents of the Osirian system are likewise at one regarding the western situation of the Plain of Aalu. The dead man, before he could arrive there, must first traverse the desert. In his earthly form, with the traveller's staff in his hand, he set out on his journey, commencing, according to the commonest view, at Abydos, from which a number of caravan roads ran to the west. Hunger and thirst threatened him; with Divine help he procured refreshment from the presiding deities of isolated trees; by means of magical formulæ he overcame the serpents which beset him, and the crocodiles which filled the streams he had to pass through. He was aided by the same kind of formulæ also when he wished to pass terrible demons, or had to go through mysterious rooms, or was terrified by all kinds of dangers. These formulæ, consequently, appeared to be indispensably necessary for reaching the life beyond; and they were collected into a compilation called by modern scholars the Book of the Dead. From the time of the Middle Empire it was a favourite practice to commit these formulæ to the grave along with the body of the deceased, inscribing them at times on the walls of the tomb or on the coffin, at other times entrusting them to the corpse itself, written on papyrus or on the swathings of the mummy. In the various copies extant the terms of the formulæ are approximately the same, but their order varies very frequently. The Egyptians did not mark off the road to the world beyond with geographical precision; the notions on this subject changed again and again; the order of the demons to be encountered and of the various realms of the gods is not the same. Only the starting-point is given, the western mountain-chain of Egypt, and the goal, the Hall of Judgment, in which the verdict is pronounced on the dead (see below, p. 197*). If this was favourable, they entered the Plain of Aalu, to dwell there for ever, or at least to find a home, which they left only if it was their own wish to do so. In the latter event, they could assume any other form they pleased, visit the earth, or even change themselves into gods.

(4) *The Osirian doctrine of immortality.*—We have already noticed in the preceding pages a considerable number of Egyptian conceptions of the future life. In this matter there was no uniform

system of belief in the Nile valley. It appears to have been a generally accepted dogma that man's life endures for ever; but this was represented and developed by each nome in conjunction with its own religious conceptions, without any regard to the possible prevalence of contradictory notions amongst their neighbours. They even went further than this in their want of system. The very same individuals occasionally regarded views of the future life which were logically self-contradictory as equally legitimate, and gave them a place side by side in their funeral texts. We must here pass over a long list of such doctrines, and rest content with giving a short account of the most important of them—a dogma which already played a part in the earliest period of Egyptian history, and became from c. 2000 B.C. the prevailing conception of the future life, till, finally, in the first millennium B.C. it was practically the only doctrine on the subject that was taken account of by the great mass of the Egyptian people.

(a) This doctrine connects itself with the fortunes of the god Osiris. The first biography of this god we possess comes from the post-Christian period, being found in Plutarch's *de Iside et Osiride*; but allusions in the monuments show that much the same story of his life was known as early as the Old Empire. It is true that, besides this main narrative, there were a number of others which showed deviations in details. Above all, the conceptions regarding the most important episode in the god's existence, namely his resurrection, differed very widely, especially in the later texts. This may be due to the fact that, now that the Osirian doctrine was the prevailing one, the attempt was made to assimilate to it other doctrines of immortality, which originally started from other divine conceptions, or, conversely, to assimilate the Osirian doctrine itself to these heterogeneous processes of thought. The most widely current version, however, continued, to all appearance, to be that handed down by Plutarch, which is essentially as follows:—

Rhea (Nut), the consort of Helios (Rā), had sexual relations with Kronos (Seb). Helios observed this, and laid a curse upon her to the effect that she should not give birth to a child in any month of the year. But Hermes (Thoth), who was also in love with the goddess, succeeded in evading the curse. He won from Selene (Aāh) at draughts the 70th part of each day, and formed from these 5 intercalary days, which he placed at the end of the year. Osiris was born on the first of these days, Aroëris (Her-ur, the elder Horus) on the second, Set on the third, Isis on the fourth, Nephthys on the fifth. Osiris and Aroëris pass for children of Helios, Isis of Hermes, Set and Nephthys of Kronos. According to some accounts, Osiris and Isis had already intercourse in their mother's womb, the result being the birth of Aroëris. In general Osiris and Isis appear as one married couple, Set and Nephthys as another. After a time Osiris became king of Egypt, ruled mildly, gave laws, taught the doctrines concerning the gods, and then journeyed over the world as an introducer of civilization. On his return he was murdered, on the 17th of Athyr, in the 28th year of his life or his reign, by Set, who had associated with him as fellow-conspirators 72 men and a queen of Ethiopia named Aso. Isis' grief was profound, but she found a companion in Anubis, a son of Osiris and Nephthys. Besides, she had herself a son by Osiris, namely Horus, who later became a helper to her after having during his youth been often threatened with danger at the hands of Set. According to Plutarch, Isis discovered the coffin in which Set had deposited Osiris, at Byblos in Phœnicia, and

brought it from there to Egypt. Set, however, found the coffin which had been concealed by Isis, tore the corpse of Osiris to pieces, and scattered them. When Isis discovered this outrage, she searched for the different parts of her husband's corpse, and, wherever she found one of them, erected an Osiris tomb. Then she and Horus commenced a campaign against Set, which ended in the victory of Horus. By way of appendix Plutarch states that Isis had intercourse even with the dead Osiris, the result of which was the birth of Harpocrates (*Her-pe-chrut*, 'Horus the child').

When we look more closely at the treatment of the corpse of Osiris, as described in Plutarch's narrative, we are struck with one feature which points to a mixing up of originally different accounts of the fate of the corpse. At first the latter rests as a whole in the coffin, then it is cut in pieces, and, finally, the pieces are again brought together. As a matter of fact, we have here a reflexion of the chief points in the Egyptian treatment of dead bodies; the only feature wanting is cremation, which in the earliest times was practised in the case of kings, and later occurs sporadically and in connexion with human sacrifice. This omission must be due to the circumstance that, at the time when the Osirian doctrine was attaining to full vigour, cremation was no longer sufficiently in vogue to demand consideration. During the Naqada period, a dismemberment of the corpse was customary at burial. In the Pyramid era this was generally replaced by the burial of the whole body, which it was sought at the same time to preserve from decay by a more or less complete process of embalming. During this same period we find also a transition form, by which the corpse was first allowed to decompose, and then the bones were collected and placed again in the proper order of a skeleton. At a later period the custom that had practically exclusive sway in the Nile valley was that of embalming, which then came in general to be regarded as that applied to Osiris. During the process of embalming the latter, Nephthys and Isis were said to have sung dirges over the god, in order to aid in his resurrection; and a similar practice for a like purpose was followed also in connexion with human interments (see the texts in Horrack, *Lamentations d'Isis et de Nephthys*, Paris, 1866; Budge, *Archaeologia*, lii. 11 ff., 65 ff. The festivals in commemoration of the burial and the resurrection of Osiris at the end of the month Choiak are portrayed at Denderah; cf. Loret, *Rec. de trav. rel. à l'Égypt.* iii. 43 ff., iv. 21 ff., v. 85 ff.).

In addition to the embalming of the god, we hear of the reconstruction of his body. This connects itself with the erecting of his spinal column, and a festival in its honour was held on the 30th of Choiak especially at Busiris in Lower Egypt. Finally, side by side with this there lingers on till the latest times the conception of the dismemberment, in consequence of which various parts of Osiris' body remained at different places in the land, and continued to be venerated as relics in the particular temples, the so-called *Serapeums*. Upon this theory, then, there was no such collection of the parts of the body as is referred to by Plutarch. Thus the head of the god was said to be preserved at Memphis, the neck at Letopolis, the heart at Athribis. There is, however, no fixed system in the matter; occasionally the same parts rest at different places, according to the tradition of the temples concerned. Thus the head, for instance, is claimed not only for Memphis but for Abydos, and the legs are catalogued as Divine relics at a plurality of sanctuaries.

(b) Taken as a whole, Osiris stands in Egypt for

the prototype of the man who after a virtuous life must die, but who afterwards rose again to life for ever. Even in early times, moreover, an influence on the conception of Osiris entered from the side of the sun-religion. This movement appears to have originated at Memphis, where Osiris was identified with Sokaris, the local god of the dead and of the sun,—in Abydos this amalgamation rarely meets us. Then, when the sun-worship was centralized in Ra, the latter assumed the character of a parallel to Osiris. The custom grew up of identifying the fate and the death of Osiris with the fate of the sun; and, as the old Osiris myth was also retained, duplicate dates were thus obtained for the period of the year that marked the occurrence of the different events in the life of Osiris. For instance, the murder of Osiris fell, according to Papyrus Sallier iv. (19th dynasty) and Plutarch, upon the 17th of Athyr. Numerous other texts (from the 18th dynasty onwards), on the other hand, transfer this event to the end of the month Choiak, the period of the shortest days of the year, within which the death and the regeneration of the sun are accomplished. It is this contamination between the Osiris and the sun-god myths that explains how Osiris, from being a human king of divine descent, becomes a complete god. Thus a text of the 18th dynasty describes him in detailed fashion as creator of the world (see above, p. 179^b), although, remarkably enough, it contains also copious allusions to the usual Osiris myth, and remarks: 'Isis the glorious, the avenger of her brother (Osiris), sought him and rested not while she journeyed through this land full of grief; she ceased not until she had found him; a wind she stirred up with her feathers, a breeze she created with her wings; she performed the panegyrics usual at burial; she raised up the wearied parts of him whose heart is still (the dead Osiris); she took his seed and fashioned an heir for herself.' The extraordinary method by which Horus is here generated after the death of his father is mentioned also in Plutarch, and meets us already in the Pyramid texts. This was a matter of faith then during the whole period of Egyptian history, and is even frequently (in Abydos and Denderah) the subject of pictorial representation (cf. Wiedemann, *Rec. de trav. rel. à l'Égypt.* xx. 134 ff.).

(c) Osiris in his lifetime had been a king on earth, after his death he became ruler in the world beyond. He there passed judgment on the dead, to him were presented the prescribed offerings which were meant to procure food and drink for the dead. His sisters Isis and Nephthys play no rôle in the world beyond. In general, Set, the murderer of the god, is of course tabooed there, and hence his name is avoided in sepulchral texts. This is carried so far that king Seti I., in the inscriptions on his tomb, in writing his own name, everywhere replaces the *Set* by *Osiris*. It is true that alongside of the usual tradition a wholly different class of conceptions is found attached to the god Set. In Tanis, for instance, he is regarded as a good god and a favourite of the sun-god, on whose behalf he pierces with his lance the Apepi serpent—in contrast, again, to the Theban conception, in which Set himself corresponds essentially to the Apepi serpent. This difference is probably connected with the circumstance that at Thebes one started from the original form of the Osiris myth, where Set appears as the murderer of Osiris; whereas, at Tanis, Set or Sutech, as god of the desert and of foreign parts, was amalgamated with the foreign god Baal, who was thought of as the sun-god, the result of which was that in this roundabout way Set assumed a wholly altered character.

Of far more importance in the future world than Set is the jackal-god Anubis, who is generally presented as a son of Osiris and Nephthys, but occasionally also as a son of Râ. He had aided Isis and directed the embalming of Osiris. According to the usual view, he was one of the guides of the dead, whom he, alternating in this function with Thoth, conducted into the judgment-hall of Osiris. His cult had no great vogue, whereas in early times a prominent part was played by another jackal-god Ap-ut (see above, p. 183). The worship of the latter had its centres at Lycopolis in Upper Egypt and Lycopolis in the Delta. In consequence of this double local worship, we frequently hear of two gods of the same name, who are called, respectively, 'Ap-ut of the south' and 'Ap-ut of the north,' and, further, by a combination of Ap-ut with Anubis, two jackals are frequently portrayed upon steles of the dead as guardians of the under world.

(d) The doctrine of immortality attached to the name of Osiris is the best known to us of all the Egyptian conceptions of the future life. To it is devoted the so-called Book of the Dead, whose oldest texts date from the Middle Empire (cf. Lepsius, *Älteste Texte des Totenbuchs*, Berlin, 1867; Birch, *Egyptian Texts of the Coffin of Amamu*, London, 1886; Lepsius, *Denkm.* ii. 98 f., 145-148; Maspero, *Mém. de la Miss. du Caire*, i. 155 f. [These texts show a great resemblance to the Pyramid texts which Maspero published in *Les inscriptions des Pyramides de Saqqarah*, Paris, 1894, a reprint from *Rec. de trav. rel. à l'Égypt.*, vols. iii.-xiv.]). Its period of bloom, to which belong the copies that are relatively freest from verbal errors and best illustrated, falls within the period from the 18th to the 20th dynasty (for the texts see Naville, *Das ägypt. Totenbuch der 18-20 Dynastie*, Berlin, 1886; le Page Renouf, *Facsimile of the Papyrus of Ani*, London, 1890 [2nd ed. by Budge, 1894-1895, with Introduction and Translation]; Budge, *Facsimiles of the Papyri of Hunefer*, etc., London, 1899 [among them notably the very important text of the Papyrus of Nu]. Translations have been published by le Page Renouf in *PSBA* xv. ff. [recently continued by Naville]; Budge, *The Book of the Dead*, 3 vols., London, 1898 [abridged ed. under same title, London, 1901]. Renouf's notes are mainly on the language; Budge discusses also the history of the Book of the Dead, with the later and the supplementary texts). In later times many passages were no longer intelligible to the scribes, who, accordingly, frequently produced very faulty copies. To this category belongs the Turin exemplar (emanating from the Ptolemaic period) published by Lepsius, which is now used as the basis for citations from the Book of the Dead (Lepsius, *Totenbuch der Ägypter*, Berlin, 1842). A similar but less complete text is found in the Papyrus Cadet used by Champollion, and published in the *Description d'Égypt. Ant.* ii. 72-75. Translations, mainly based on the Turin exemplar, have been published by Birch (in Bunsen's *Egypt's Place in Universal History*, v. 123 ff.) and Pierret (*Le Livre des Morts*, Paris, 1881).

At a late period, from about B.C. 1000 onwards, there grew up, side by side with the Book of the Dead, numerous religious compilations, based upon the same doctrines, and utilizing the Book itself as a source. Thus we have the various Books of 'Breathing,' the Book of 'Journeying through Eternity,' the Book of 'May my name flourish,' and the like. (Texts of this class have been published and discussed by, amongst others, Maspero, *Les momies royales de Deir el-Bahari*, p. 594 f.; cf. Budge, *The Book of the Dead*, 1898, ii. pp. clxxxiii ff. [text of Nesi-Chunsu]; Horrack, *Livre des Respirations*, Paris, 1877 [another text in

Budge, *l.c.* p. xciv ff., publ. by Budge with the Book of the Dead of Hunefer]; von Bergmann, 'Das Buch vom Durchwandeln der Ewigkeit' in *Sitzungsber. der Wiener Akad.* 1886, p. 369 ff.; Lieblein, *Le Livre Égyptien 'Que mon nom fleurisse'*, Leipzig, 1895; *Papyrus Louvre*, No. 3283, ed. by Wiedemann in *Hieratische Texte*, Leipzig, 1879). These works help in some measure to fill up lacunæ in the conceptions of the Book of the Dead. Further supplements, emanating from the same circle of ideas, are furnished by the rituals for the process of embalming (Rhind Papyrus, ed. by Birch, London, 1863, and Brugsch, Leipzig, 1865; a 'hieratic Papyrus from Vienna' in von Bergmann's *Hieratische Texte*, Vienna, 1887; texts from Gizeh and Paris in Maspero's *Mém. sur quelques papyrus du Louvre*, Paris, 1875) and for the ceremonies at the door of the tomb (Schiaparelli, *Libro dei Funerali*, Turin, 1881-1890; cf. Maspero, *Ét. de myth.* i. 233 ff.).

These texts yield an uncommonly large number of notices with reference to the notions of immortality that attached to Osiris, but they contain nothing like a systematic Osirian religion. This is due to the circumstance that from first to last the Book of the Dead was a collection of hymns to gods and of magical formulae, which were based upon the most diverse fundamental doctrines, and were united in a single work without any attempt being made to remove the contradictions and establish a harmony. As time went on, this compilation always received fresh accessions in the shape of independent passages; and, in addition to this, the already existing texts were constantly being expanded at every turn, without any regard to the harmony of the various doctrines expressed.

(e) Thus the same confusion that reigns in Egyptian religion in general, prevails also in the Book of the Dead and its supplementary texts. It is impossible here to illustrate this in detail; we must be content to sketch briefly the principal features of the Osirian faith, passing over all incidental points and particular deviations.

Originally, the adherents of Osiris appear to have held, in accordance with the teaching of the Book of the Dead, that the dead man as a whole would enter upon the way to the world beyond. The name Osiris—and this custom persisted through the whole course of Egyptian history—was then given to him, in the hope that, like the god Osiris, he would attain to immortality. In earlier times, so far as we know, the deceased was always thought of as male. It was only at a later period, after c. 500 B.C., that women began to have their sex left to them, and to be sometimes called in the funeral texts by the name Hathor instead of Osiris.

As experience proved more and more that mummies did not leave the sepulchres, a distinction was drawn between the mummy (*cha*) and the Osiris; the former remained in the coffin, the latter passed to the Plain of Aalu. All the same, however, the two were thought of as essentially identical. The mummy was equipped for the journey to the world beyond, the necessary amulets and magical formulae were given to it, the tomb was so arranged that it could serve as a dwelling-place of the Osiris, and offerings of food and drink were put in it.

While, on the above view, the immortal part of the deceased, his soul as we should say, was an Osiris, thought of as with an earthly human form, in other places the soul was quite differently conceived. But these divergent views were, even at an early, and still more fully at a later, period amalgamated with the Osiris conception just mentioned, without on that account being completely

given up. Thus it came about that a man was credited with a number of souls that pursued their course side by side. It was then supposed that in the man's lifetime these souls were united, while at death they forsook the corpse and sought, each one independently, the way to the next world. If they succeeded in this, and if the deceased was found righteous when tried before Osiris, his souls once more united within him and lived with him in the Plain of Aalu, as they had once done on earth. The fact that these part-souls are borrowed from originally independent doctrines, explains how the views of their nature frequently clash and contradict one another, and, above all, how a number of attributes are ascribed to several of the part-souls. Here, again, there is a complete lack of any systematic harmonizing of the various doctrines, which must of necessity be logically contradictory. Besides, it is to be remarked that the texts in general do not introduce all the part-souls at once, and that now one and now another, according to place and time, came more to the front. The following is a list of the most important of them, along with some notes on the main significance attributed to each of them (cf. Wiedemann, *The Ancient Egyptian Doctrine of the Immortality of the Soul*, London, 1895, and 'Le Livre des Morts' in the *Muséon*, xv. 40 ff.):—

Ka had the same form as the man, and corresponded to the *Osiri*, standing in much the same relation to the man as that in which the word stands to the thing, the name to the person. The *ka* was born with the man, and could, even during his lifetime, separate itself from him to a certain extent: thus Amenophis III. honoured his own *ka* as a god. After a man's death, the *ka* could at any time return into the mummy, animate it, and assume the dignity of the '*ka* living in his coffin.' For the most part, the cult of the dead recognized in the *ka* the essential personality of the deceased, the sacrificial formulæ were addressed to it, the tomb is its house, its temple, etc.

Ba has the form of a bird, mostly with human head and arms. At death it takes flight from the body, but visits it occasionally, and brings it food and drink. The *ba* itself, like the *ka*, also requires nourishment, being thus as little as the rest of the part-souls thought of as an immaterial being.

Ab or *huti* is the heart. At death it leaves the man and goes by itself into the next world. In the Hall of Judgment it encounters its former possessor, and gives evidence, if need be, against him. In the event of his being pronounced righteous, it was restored to him; in the opposite case, the heart was supposed to live on in the Dwelling-place of Hearts. The deceased being bereft of his heart was thereby consigned to annihilation, for without a heart no existence was possible. This notion led to a peculiar practice. In the process of embalming, the readily decomposing heart was removed from the body. But, as neither the latter nor the Osiris could live without this organ, an artificial heart was substituted for the natural one. For this purpose they selected an amulet in the form of a small vase or of a scarabæus beetle, the latter symbolizing the notions of Becoming, Being, and Resurrection in general.

Sahu is the form, the envelope of the man.

Chai-bit is the shadow cast by the man, which has an existence of its own, and is depicted as a black human form, or figuratively as a fan.

Chu (*achu*) is a shining transfigured soul, which was frequently, it may be assumed, conceived of in bird form.

Sechem is the personally conceived strength and power of the man; occasionally it appears to stand also for the form of the dead.

Ren is the name of the man. As long as this survived, and monuments associated with it lasted, as long as sacrificial formulæ, which commemorated it, were uttered, the dead man also continued to live in the other world. In the Saitic period in particular, great importance was attached to the *ren*, the conception of which at times coincides with that of the *ka*.

LITERATURE.—Jablonski, *Pantheon Aegyptiorum*, Frankfurt, 1750-1752 (the best collection of the passages from the classical writers, the most important of which are those found in Plutarch's *de Iside et Osiride* [good edition by Parthey, Berlin, 1850]). | Champollion's *Pantheon Egyptien*, Paris, 1823-1831, and Wilkinson's *Manners and Customs of the Ancient Egyptians* (last vol.), London, 1841, have a mainly historical interest. | Lanzone, *Dizionario di mitologia egizia*, Turin, 1881-1888 (alphabetical list of the gods, with citations of the sources, and illustrations. This work is very difficult to procure). | E. de Rougé, *Revue archéologique*, Nouv. sér. i.; Pierret, *Essai sur la Mythologie Egyptienne*, Paris, 1879; le Page Renout, *Lectures on the Origin and Growth of Religion*, London, 1880 (emphasize the monotheistic, or, more correctly, henotheistic element in Egyptian religion). | Tiele, *Handboek comparatieve der antieken religies*, Paris, 1882, and E. Meyer, *Geschichte Aegyptens*, 1887 (attempt to trace the historical development of Egyptian religion, but the materials used by them are not sufficient to justify any very far-reaching conclusions). | H. Brugsch, *Religion und Mythologie der alten Aegypter*, Leipzig, 1885-1890 (an attempt, principally with the aid of texts belonging to the late period of Egyptian history, to elucidate a connected religious system, somewhat on the lines of Plutarch's ideas. Brugsch's views, however, lack the support, above all, of the older monuments. Nevertheless, the materials collected by him have an importance of their own). | Strauss and Torner, *Der altägyptische Gotterglaube*, 2 vols., Heidelberg, 1889-1891 (draws upon second-hand sources). | Maspero, *Études de mythologie et d'archéologie*, 4 vols., Paris, 1893-1900 (a collection of the extremely important articles of Maspero on general questions of Egyptian religion, and on various religious compositions such as the Book of the Dead and of Am-duat, together with reviews of modern works on questions of the same kind); cf. also the relevant passages in Maspero's *Histoire ancienne de l'Orient classique*, Paris, 1895-1899. | Wiedemann, *Die Religion der alten Aegypter*, Münster, 1890 [Eng. ed., freshly revised, and with illustrations, under the title 'Religion of the Ancient Egyptians,' London, 1897].

PHILO.—

- i. Life.
- ii. Works.
- iii. System of thought.
 1. The general character and basis of Philo's system.
 2. The origin and nature of philosophy.
 3. Philo's theory of the universe.
 4. Man as the microcosm.
 5. The doctrine of God as eternal Being: (a) His existence; (b) His nature, *ousia*; (c) His attributes.
 6. The doctrine of the Divine powers: (a) existence and character; (b) relation to God; (c) function.
 7. The doctrine of the Logos: (a) meaning of the term; (b) the supreme idea; (c) the Divine Logos twofold; (d) God's son and image; (e) mediator between God and matter; (f) relation to Wisdom, Spirit, and *logoi*; (g) Was the Logos a person?
 8. The higher relations of man: (a) general relation to God; (b) ethics.
- iv. Influence on Christian writers.

Literature.

i. LIFE.—Philo, called *Judæus*, to distinguish him from others of the same name, was a resident, probably a native, of Alexandria. Born about the year B.C. 20, or perhaps a little earlier, he was an older contemporary of Jesus Christ; and this fact lends a peculiar interest to his writings, as revealing the intellectual and religious position of a Hellenist who was at once enlightened and conservative. If these writings did not directly influence the earliest expressions of Christian faith, they certainly exhibit the line of philosophical thought, to some extent the phraseology, and the method of Scripture exegesis, to which that faith resorted when it first appealed to the Græco-Roman world as a system of theology.

Little is known of Philo's life. He belonged to a wealthy and distinguished family, his brother enjoying Imperial favour, and holding the high position of *alabarch*. Familiar with cultivated society and the luxuries of Alexandria, he did not regularly practise the asceticism which he some-

times admired in others. But he led a blameless and studious life, amply availing himself of those opportunities of learning which Alexandria at that time afforded, with its Museum and Library, its concourse of lecturers and students, and the commingling of ideas which resulted from its position as a meeting-place of East and West. He was well versed in Greek literature, especially in the works of the great philosophers, whom he regarded with admiration; but, instead of being led by this admiration to despise the simple records of the Pentateuch, he found whole and untarnished in the sacred books of Israel the wisdom which was partially contained in the writings of Greece, so that, with all his width of culture, he remained a devout and believing Jew. He was strongly attached to his own people. On some occasion he was sent to Jerusalem to offer prayer and sacrifices; and late in life, notwithstanding his aversion to the turbulence and anxieties of political life, he was so moved by the brutal riots in which the Jews were barbarously treated, that he went on an embassy to Caligula, in the winter of A.D. 39-40, to seek for redress and security against further outrage. From such an Emperor nothing was to be obtained but insult and even blows, so that the members of the embassy were glad to escape with their lives. Philo describes himself as old and grey-headed when writing an account of this transaction. The year of his death is unknown.

ii. WORKS.—Philo's collected works have appeared in several editions, of which that of Thomas Mangey is still the standard. This edition, however, published in 1742, is neither sufficiently complete nor sufficiently accurate, and will be superseded by that of Cohn and Wendland, of which four volumes have appeared (November 1902). A convenient edition is that of Richter, in eight volumes (1823-1830), containing in addition to Mangey's text the treatises *de Festo Cophim* and *de Parentibus Colendis*, and the books translated from Armenian into Latin by Ancher. From this the Tauchnitz edition (1851-1853) was taken, with some slight alterations.

The works fall into several groups. 1. There is a series of *philosophical works*, which are believed by Cohn to have been written in Philo's early life, because they contain little of his characteristic thought, and seem like exercises in philosophical style and dialectic. The difference of their character from that of the other writings of Philo has led to suspicions of their genuineness; but Cohn thinks their style so specifically Philonian that there ought not to be a doubt on this point. This series comprises:—1. *de Incorrumpibilitate Mundi*. This has been commonly regarded as spurious, but its genuineness has been defended by F. Cumont in the *Prolegomena* to his edition of the treatise (Berlin, 1891), and is accepted by Cohn. At the close it promises a sequel, which, however, has not been preserved. 2. *Quod omnis probus liber sit*, which, as we learn from its opening lines, was preceded by a discourse *Περὶ τοῦ πάντα δοῦλον εἶναι φαῖλον*. 3. *de Providentia*, in two books, preserved in Armenian (with considerable fragments in Greek), of which the genuineness of the first, which has been somewhat injured in transmission, has been questioned. 4. *Alexander, sive de eo quod rationem habeant bruta animalia*, preserved in Armenian. The mention, in § 54, of an embassy to Rome cannot refer to the embassy to Gaius, as it occurs not in a speech of Philo's, but in the treatise of Alexander which Philo begins to read in § 10. But, as Cohn points out, the consulship of Germanicus, in A.D. 12, is alluded to in § 27, so that the book must be later than this, but might still be a comparatively early work. Philo, however, in § 73,

says 'ex juventute in hac nutritus sum disciplina,' so that he probably wrote this treatise in middle life.

2. There is the great collection of writings containing *explanations of the Pentateuch*. This embraces three extensive works. 1. The large group of allegorical commentaries, designed for educated Jews. These begin with the treatises now known as *Sacrarum Legum Allegoriae* (a title which once had a more extended application), and dealt with the text of Gn 2-20, certain parts being omitted for special reasons. There are several gaps, some of which were certainly, and others probably, filled by books which are lost. This group, following the order observed in the editions, ends with the two books (originally five) *de Somniis*. To this series must have belonged the two lost books 'On Covenants,' to which reference is made in *de Mutatione Nominum*, 6 [i. 586].* A second book 'On Drunkenness' also, with the exception of some fragments, is lost; and yet another treatise, 'On Rewards' (founded on Gn 15'), is referred to as having preceded *Quis rerum divinarum heres* (1 [i. 473]). The fragment *de Deo*, preserved in Armenian, may have belonged to this group, and formed part of a treatise between *de Mutatione Nominum* and *de Somniis*. A few pages which appear in Mangey (ii. 265 ff.) as part of a separate tract, *de Mercede Meretricis*, have been restored by Cohn and Wendland to their proper place in the *de Sacrificiis Abelis et Caini*, § 5. The first section belongs to the treatise *de Sacrificantiis*, where it should be inserted between sections 4 and 5. 2. The explanation of portions of the Pentateuch in the form of question and answer. This was intended to cover the whole Pentateuch; but it is uncertain whether it was completed. Several books on Genesis and Exodus have been preserved in an Armenian translation, and some fragments in Latin and Greek. Though this work is shown by references to be later than the great group of allegorical commentaries, certain difficulties suggest that the two works may to some extent have proceeded simultaneously. 3. An exposition of the Mosaic legislation, in which allegorical explanation is sparingly used. The plan of this series is clearly described by Philo himself in the opening of the treatise *de Præmiis et Pœnis*. It dealt first with the account of the Creation, then with history, and lastly with laws, the following treatises being a supplement. It is clear, therefore, that the tract *de Mundi Opificio*, which occupies the first place in the editions, formed the beginning of this group. This indeed foreshadows the general plan, and is expressly referred to as 'the former composition' in the opening of the treatise *de Abrahamo*, which introduces the second division. The object of this division was to illustrate the excellence of the laws through typical examples. The essays on Isaac and Jacob are lost; and the three books on the Life of Moses do not belong to the series. The tract on Joseph is succeeded by one 'On the Decalogue,' and this again by four books on 'Special Laws.' The first of these has been broken up into several distinct treatises, beginning with that 'On Circumcision,' and the second and fourth books also comprise treatises with distinct titles. The essays on Fortitude, Philanthropy, and Penitence form a kind of appendix, and the work is completed by a dissertation on Rewards and Punishments, and on Curses.

3. There are several *historical treatises*, which were complete in themselves. 1. *de Vita Moysis*, originally in two, but now arranged in three books.

*The first number refers to the section in Richter and Tauchnitz; the subsequent figures to the volume and page of Mangey.

2. A work called *Τροθητικά*, of which only fragments have been preserved. This is perhaps the same as—3. The Apology for the Jews, from which Eusebius extracted an account of the Essenes (*Præp. Ev.* viii. 11), and to which perhaps belonged the *de Vita Contemplativa*, containing an account of the Therapeutæ. The genuineness of the latter has been sharply disputed by Lucius and others, and ably defended especially by Massebian and Conybeare (the former in the *Revue de l'Histoire des Religions*, xvi. [1887] pp. 170 ff., 284 ff.; the latter in his edition of the treatise, 1895). There are some valuable remarks also in Edersheim's article on Philo in Smith and Wace's *Dictionary of Christian Biography*, iv. 368 ff., and some of the principal objections are considered in a review of Conybeare in the *Jewish Quarterly Review*, 1896, p. 155 ff.). 4. *in Flaccum*. 5. *Legatio ad Gaium*, which survives out of five books *Περὶ ἀπερώων*, describing the persecutions of the Jews, and the sad fate of the persecutors.

The editions contain also certain works, the spuriousness of which is generally admitted: *de Mundo*; and, in Armenian, *de Sampson* and *de Iona*.

For fuller information and references, see the excellent section on the writings of Philo in Schurer's *GVV*³ iii. 487 ff. The above classification is in the main that suggested by Ewald (*GVV*² vi. 294 ff.), who, however, regards the Life of Moses as an introduction to group 2 (3), and places the leading groups in a different order. We have followed the careful classification of Cohn ('Einteilung und Chronologie der Schriften Philos.', published in *Philologus, Zeitschr. für das classische Alterthum*: Supplementband vii. Heft 3, 1899). A similar classification, though somewhat differently arranged, is given, with other interesting matter, in an earlier article by Cohn, on 'The latest Researches on Philo of Alexandria' in the *Jewish Quarterly Review*, v. [Oct. 1892] pp. 24–50.

iii. SYSTEM OF THOUGHT.—1. *The general character and basis of Philo's system*.—The peculiarities of Philo's thought are largely due to the influence of his time and place. In Alexandria, (Greek philosophy and Oriental mysticism met and mingled; and while the former, in its decline into scepticism, sought for support in eclectic schemes or in positive revelation, the latter endeavoured to justify itself before the world of thought by clothing its ideas in the language of philosophy. Jews, living in the midst of intellectual culture, and deeply versed in the finest portions of Greek literature, could no longer be satisfied with the crude ideas of their forefathers, and it became necessary to show that their ancestral religion was in harmony with the highest philosophy. Of those who made this attempt Philo was by far the most eminent, and his writings possess a singular interest for the Christian student, not only as revealing an instructive phase of human thought, but on account of the influence which they exercised, directly and indirectly, on the theology of the Church. He combined in himself the two tendencies which were seeking for reconciliation; for he was at once a religious man, full of devout feeling and moral enthusiasm, and, although his philosophy was largely borrowed, distinguished by no small share of speculative faculty. Of the truth and Divine authority of the Jewish religion he was profoundly convinced. His system avowedly rested upon the Scriptures, which were inspired in the minutest details. The prophets speak nothing of their own, but only what the Divine Spirit suggests, while the voluntary powers are in suspense. This condition, transcending the ordinary operations of the will, is open to good and wise men, and Philo does not hesitate to speak of his own enjoyment of it

(*de Migrat. Abr.* 7 [i. 441]). Moses, however, was the supreme prophet, as well as king, legislator, and high priest; and his law remained, among the vicissitudes of States, unchangeable and eternal. Nevertheless, Philo did not resort to the Hebrew Scriptures, but, accepting the current story of the miraculous origin of the LXX, he assumed that the Hebrew and Greek were one and the same both in the facts and in the words. But, though he was ready to attach the utmost importance to a letter or even to an accent, he is not remarkable for the correctness of his citations. This subject has been investigated by Siegfried, who arrives at the following results:—A large part of Philo's citations consists of paraphrases from memory; in many instances the citation and the interpretation are so blended that a complete separation is impossible; there are many examples of double citation, one agreeing with the LXX, the other deviating from it; many of his deviations are found in single manuscripts of the LXX; others are explicable from the Hebrew text; some instances occur which point to a Hebrew text different from the Massoretic; and others indicate an attempt to improve the Greek. Passages also occur in which Philo bases an interpretation on an expression which is not found in our text of the LXX. And, finally, some variations must be ascribed to errors of transcribers. (See Siegfried's *Philo von Alexandria als Ausleger des Alten Testament*, 1875, p. 162, where he sums up the results of three articles in Hilgenfeld's *Zeitschr. f. wiss. Theol.* 1873. See also Dr. H. E. Kyle's *Philo and Holy Scripture: or the Quotations of Philo from the Books of the OT*, 1895, where the subject is carefully treated in the Introduction, § ii.; and two articles in the *JQR*, v. [Jan. 1893] pp. 246–280, and viii. [Oct. 1895] pp. 88–122, 'On the Philonean Text of the Septuagint,' so far as it may be gathered from the Armenian version of the *Questiones et Responsiones*, by F. C. Conybeare, who surmises that 'Philo, at different times, and in writing his different works, used different texts of the LXX'; which would not be surprising, as the text must by that time have swarmed with variants). His canon must have been substantially the same as that which is now recognized, though there is no direct proof that he accepted Ruth, Esther, Ecclesiastes, Song of Songs, Lamentations, Ezekiel, or Daniel. (See the subject fully treated in Dr. Ryle's work, Introduction, § i. This volume contains also the text of Philo's quotations from Scripture).

Notwithstanding his apparent narrowness of view and rigid scripturalism, Philo was far from limiting his sympathies to the Jewish nation. The man who conformed to the Law was, he conceived, a citizen of the world. He himself attended the theatre as well as lectures on philosophy, and was a shrewd observer of the habits and emotions of men. But philosophy could not satisfy him; for, owing to the difficulty of its problems, it was broken up into conflicting schools, and, while he found in all the great sects certain elements of Divine truth, he took the teaching of Moses with him as a clue to guide him amidst their contending thoughts. He was not, however, content with carrying the great monotheistic faith and noble moral principles of Judaism into the disputes of the lecture-room; he believed that Moses had anticipated the philosophers, and that the sublimest speculations of Greece lay embedded in the Pentateuch. But how was it possible to find the philosophy of Plato or of the Stoics in the simple tales of Genesis? By the method of allegorical interpretation, which had already been applied by some of the philosophers, and especially by the Stoics, to the ancient mythology, and which Philo

seriously adopted in order to rescue the wisdom of Scripture. If anything in the venerated records appeared on the surface to be childish and absurd; if any statement was made which appeared derogatory to God; if there was something contradictory, or a representation which was contrary to known fact,—any of these cases was in itself an indication of some hidden meaning which was worthy of a Divine author; and so a method of exegesis which must seem to us false and arbitrary grew out of the exigencies of the time, and was reduced to a kind of rule among the interpreters of Scripture. The rules which are followed by Philo are carefully classified by Siegfried in the above-mentioned work (p. 168 ff.); and it is evident that allegorical interpretation, however absurd and fantastic it must appear to us, was not left wholly to individual caprice, but followed certain definite lines which were considered as established among the students of allegory. Several of these canons, though differently applied, are found in the Haggadic interpretation of Palestine; but this connexion may be due less to Philo's knowledge of Rabbinical methods than to the general tendencies of thought which characterized the age. While thus holding that almost everything in the Pentateuch was related allegorically, Philo did not reject the literal meaning of that which seemed intrinsically credible or reasonable; and he insists that the ceremonial laws, though possessing a spiritual significance, must be observed according to the letter. Many things, however, especially anthropomorphic expressions, could be understood only allegorically; and here we may observe that no distinction is drawn between allegorical and simply figurative language. Philo's mode of treatment, being that of a commentator rather than a thinker, leaves no room for a systematic exposition of the problems of philosophy, and his theory of the universe must be gathered and pieced together from an immense number of unconnected passages. His style, though flowing and ornate, is often tedious, and the modern reader grows weary of interpretations which destroy the living beauty of the original text, and make the patriarchs the puppets of Alexandrian speculation. Yet the patient student may find many a golden saying, and perceive that Philo's rambling disquisitions are bound to one another by a thread of coherent thought.

From what has been already said, it is evident that for a proper understanding of Philo some knowledge of Greek philosophy, especially of the Platonic doctrine of ideas and of the Stoical doctrine of the Logos, must be presupposed. This the reader must necessarily seek elsewhere. The Old Testament, too, prepared the way both for the main problem of philosophy and for the special mode of solving it. The problem may be thus stated: How was the transcendent and infinite Spirit to be brought into connexion with the material universe and with the souls of men? An answer was partly suggested by the doctrine of angels, and by the poetical personification of Wisdom, while 'the word of the Lord,' frequently translated λόγος, furnished the very expression which Heraclitus and the Stoics had selected to denote the all-pervasive reason of the cosmos, and so provided a scriptural basis for the speculations of the thinker.

2. *The origin and nature of philosophy.*—According to Philo, philosophy originated in the contemplation of the cosmos, especially of the orderly movements of the heavens; but, as this suggested problems which seemed to him insoluble, he turned to the study of human nature, which permitted a closer and more fruitful examination. Thus he was led to the universal Mind, to Him

who alone is real Being. Philosophy, accordingly, concerned itself with the whole nature of things, visible and invisible, and with the regulation of conduct, its end being wisdom, which consisted in the knowledge of Divine and human things and their causes. The incentive to it was found in the hope of blessedness (*eudaimonia*). Before entering on so serious a pursuit, it was necessary to have a good moral and intellectual education, and to master the preparatory or 'encyclical' studies—grammar, geometry, and rhetoric. Philosophy itself had been divided into physics, ethics, and logic. Of these Philo assigns the lowest place to logic, and entertains a very poor opinion of physics or cosmology, as presenting nothing higher than fruitless conjecture. To ethics, which includes theology, or the knowledge of God, is assigned the highest and only worthy position.

3. *Philo's theory of the universe.*—Notwithstanding his depreciation of physics, Philo believed that the invisible could be entered only through the door of the visible cosmos, and he was fairly familiar with the science of his day. In order to understand some of his speculations, it is necessary to know in what sort of universe he conceived himself to be living. The earth, apparently regarded as spherical, was its fixed centre, and around it extended the heavens in successive spheres. Enclosing all was the vast sphere of the fixed stars, with its daily revolution from east to west. Within this were the seven spheres of the planets, the Sun occupying the centre; above it Saturn, Jupiter, and Mars; below it Mercury, Venus, and the Moon. This arrangement was symbolized by the golden candlestick. Matter was divided into four elements—fire, air, earth, and water, the ἀρχαί τε καὶ οὐράνους of the cosmos. The air extended from the earth to the lunar sphere, beyond which was the ether, the salutary form of fire, as distinguished from the useful but destructive form with which we are familiar on the earth. The various objects of nature which admit of classification were constituted by a process of rational differentiation. First, things were divided into animate and inanimate. The latter comprised things which remained unaltered, through the possession of 'habit' (*ἔξως*), and things which had the higher property of 'nature' (*φύσις*), involving nutrition, change, and growth. The animated kingdom, divided into rational and irrational, was distinguished by the presence of soul (*ψυχή*), which rose above *φύσις* by having the attributes of perception, mental representation, and impulse. To these, rational beings add reason and free preferential power. Air, or πνεῦμα, was the element which constituted habit, nature, and soul. The air, the life-giving element, must be full of living beings, and therefore was peopled by invisible and immortal souls. It seemed impious to suppose that the stars were only fiery masses of earth. They were unmixt and Divine souls, 'manifest and perceptible gods.'

This survey of the phenomenal world led to many important questions, the answers to which must be briefly given. The universe, notwithstanding the multiplicity of its phenomena, was proved both by monotheistic faith and by pantheistic philosophy to be one, all its parts being mutually related, and each object depending for its perfection upon its place and function in the entire system. The heavenly bodies, besides shedding down light upon the earth, gave indications of future events through eclipses and other celestial occurrences; but Philo rejected the Chaldaean astrology, as deifying fate and destroying human responsibility. This unity, which presented the universe to the eye of reason as a well-ordered city, showed that there were powers by which the

several parts were united, and an everlasting law, stretching from centre to circumference, and forming a bond that could not be broken. It was assumed that this universe, being the work of the greatest Creator, must be itself perfect, that is to say, complete in itself, and not depending on anything extraneous for the supply of its wants. Its perfection proved that it was the only cosmos; for it could not be perfect unless the whole substance of the elements had been used up in its production, and the Creator, being one, made it resemble himself in solitude. To the question whether the cosmos was self-existent and eternal a Jew could give but one answer: there was a time when the universe was not. That which is eternal is immutable; and therefore the universe, which is constantly changing, must have come into existence. Its genesis, however, did not take place in time; for time began with the interval of days and nights, and the six days of creation denote not a chronological succession, but an order in thought. Nevertheless, as the cosmos came into existence, Philo is driven into the expression, 'there was once a time when it was not' (*Dec. Orac.* 12 [ii. 190]). The archetype of time is eternity, in which nothing is either past or future, but only present. The genesis of the world was, according to a philosophical maxim, the beginning of its corruption; but the natural process might be stayed by the providence of the Creator, and thus Philo was able to believe that the entire cosmos endures for ever. But, while he admitted the dependence of the universe on an eternal and transcendent Cause, he was not a monist. The four elements pointed to something prior to themselves, of which they were differentiated forms. This was matter (*οὐσία* or *ἐλη*). It was conceived as the necessary substratum of the forms impressed upon it by reason, and as therefore in itself wholly destitute of rational distinctions. It was accordingly described by negative predicates, *ἀπαιος*, *ἀτακτος*, *ἀψυχος*, *ἀμορφος*, *ἀνείδεος*, *ἀσχημάτιστος*, *ἀνύπτωτος*, *ἀσημος*, *ἀπειρος*, *πλημμελής*, *ἀνόματος*, *ἀνιστος*, *νεκρός*. Matter was thus only the passive condition of the exercise of efficient causality. Its existence was postulated by a necessity of thought; for causality involved four things—the agent, the material, the instrument, and the end in view. Matter being thus the condition of the efficient causality of God, was itself uncaused and eternal. Nevertheless, Philo does not seem quite at home with dualism, for he nowhere explicitly asserts the eternity of matter, and he occasionally uses expressions which, on a cursory perusal, seem inconsistent with it, but on more careful consideration appear not to be so. Again, he was not a dualist in the sense of accepting an eternal principle of evil. Dead matter could not be an efficient cause of imperfection, or limit the agency of God. Passages are, however, cited which establish Philo's belief that the created universe limited in some way the flow of Divine power. This limitation was due, not to the opposition of matter but to the very fact of creation, for the phenomenal is necessarily contrasted with that which is not phenomenal, and therefore could not be a full expression of Eternal Being. And, again, the parts of the universe were, in the original design of God, arranged in an ascending scale, and so could experience Divine benefits only in proportion to the capacity of their being. These considerations sufficiently explain Philo's language, without attributing to matter a causality which is expressly denied.

4. *Man as the microcosm.*—From the macrocosm we pass to the microcosm, man, considering him at present simply as a natural object. He combines in himself the powers which we have already encountered, *ἐκτική*, *φωτική*, *ψυχική*, and adds to these

λογική and *διανοητική*. It is accordingly from the study of man that we derive our knowledge of God; for the higher principle in man corresponds with the supreme Mind in the cosmos. Man, then, is a dual, composed of body and soul. The body is made out of the same four elements as the rest of the material world. Soul is distinguished by the possession of *αἰσθήσις*, which, being an *εἰσθεσις*, introduces things to the mind through the five channels of sensation, which are signified by the creation of animals on the fifth day; of *φαντασία*, which is an impression (*τύπωσις*) left in the soul by what the senses have communicated; and impulse (*ὁρμή*), which has the two forms of desire and aversion. The human soul, however, is twofold, and, in addition to the lower part which it shares with the animals, has the higher principle of reason. The lower part of the soul, the vital principle, consists of blood, or, more properly, of air which is mixed with blood, and carried by it to every part of the body. Like the sphere of the planets, it has seven parts or natures. These are the five senses, speech, and the faculty of reproduction. Being material, it is mortal. The higher principle is regularly spoken of as *νοῦς*. The possession of *νοῦς* in a qualified sense is indeed sometimes extended to the lower animals; but this vacillation in the use of language does not necessarily indicate any contradiction in Philo's thought. The rational principle, in its highest sense, was distinctive of man, and in him it was the sovereign part (*τὸ ἡγεμονικόν*). Several able interpreters believe that Philo derived the substance of the rational soul from the ether, and to that extent was a materialist, although he sometimes wavers. A remarkable passage seems decisive. He alleges that we cannot know the substance (*οὐσία*) of mind, and nevertheless asserts parenthetically, as though this one point were certain, *ἀλλ' οὐ σῶμα, ἀσώματος δὲ λεκτέον* (*de Somn.* i. 6 [i. 625]). To resolve his doubts he appeals to the statement of Moses, 'God breathed into his face a spirit of life,' meaning by spirit 'not air in motion, but a certain stamp and character of Divine power' (*Quod det. pot. ins.* 22, 23 [i. 207]). Accordingly, the substance of the higher soul is 'Divine spirit' (*de Concep.* 11 [ii. 356]), 'derived from nothing at all that is originated, but from the Father and Sovereign of the universe' (*de Mundi Op.* 46 [i. 32]). It is accordingly *τῆς μακαρίας φύσεως ἐκμαγείον ἢ ἀπόσπασμα ἢ ἀπαιγασμα* (*ib.* 51 [i. 35]). In one of the passages which are thought to contradict this view he is simply stating the opinions of others; one or two more admit of an interpretation which is consistent with his more clearly expressed view; and in the remainder the word 'ethereal' may readily be understood figuratively of a pure and heavenly origin. Philo is a rhetorical writer; and his highly wrought language must frequently be interpreted by reference to his more careful and exact statements. The immaterial soul was by its nature incapable of division, and accordingly corresponded with the unbroken sphere of the fixed stars, and so completed the analogy between the microcosmos and the macrocosmos. It belonged to the tribe of souls who peopled the air. These fell into two divisions: some, endowed with a more Divine constitution, living close to the ether; others descending into mortal bodies. The former were called by Moses angels, as bearing messages between God and man. The desire of the latter to descend into bodies is not clearly explained, and seems to imply an original moral distinction among souls. The souls of the wise, indeed, may have come to increase their experience and wisdom; but others abandoned wisdom, and were swept away by the earthly torrent. In either case, however, the soul was intrinsically immortal.

We must now view the soul in its temporary connexion with the body. Its seat is the heart or brain, more probably the brain, which is so closely connected with the senses. There it acts as a 'god' of the irrational part (*Leg. All.* i. 13 [i. 51]), through which, though itself incapable of severance, it is wholly diffused. This diffusion is effected by means of the ductile powers, which, without rupture, not only pervade the body but extend far beyond it, reaching even to God Himself. The analogy for this extension of an inseparable monad confined to one small portion of space is found in the sun, which, without leaving its place, sends its rays into every part of the cosmos (*de Somn.* i. 14 [i. 632]). These powers, however, are not dependent on the soul that has them, but are in their nature imperishable, so that the individual mind only has its share of those spiritual essences which belong equally to countless others. Beyond the division into rational and irrational, Philo does not venture on any systematic classification, though numerous powers are casually alluded to. We must confine our attention to the most important. Man alone, upon earth, has been endowed with freedom and the power of voluntary choice between good and evil, and is therefore justly subject to praise and blame (the most important passage is *Quod Deus immut.* 10 [i. 279 f.]). He alone is capable of sin, for higher beings are above the reach of temptations, and the animals, being subject to necessity, are below it. It is not inconsistent with the power of choice between alternatives that God is represented as the sole originating Cause; but one fragment pushes this so far as to be inconsistent with the general doctrine, the writer's mind being for the time overwhelmed by his sense of the nothingness of the creature (see J. Rendel Harris, *Fragments of Philo Judaeus*, p. 8). The logos is another faculty which raises man above the brute. Here Philo, except in his scriptural allegories, simply follows the Greek philosophers. The logos is twofold: *ὁ ἐνδιδάκτορος*, *ὁ κατὰ διάνοιαν λόγος*, by virtue of which we are rational; and *ὁ προφορικός*, or *ὁ κατὰ προφορὰν*, or *ὁ γηγωνῶς λόγος*, whereby we are able to converse. The latter is the interpreter (*ἐρμηνεύς*) of the mind, and therefore ought to be cultivated, so as to do justice to the thought. The virtues of the double logos were symbolized by the Urim and Thummim (*δὴλωσις* and *ἀλήθεια*) on the breastplate of the high priest. The sources of knowledge are sensible perception and reason. The former brings the mind into connexion with the material world, and is the starting-point of all our knowledge; for the intuitive apprehension of the intelligible cosmos arises only on occasion of some sensible experience, as space is apprehended from the perception of bodies at rest, and time from perceiving bodies in motion. Nevertheless noumena shine by their own light, and in their higher forms reveal themselves only to the pure. Knowledge, however, which depended simply on the natural faculties, was insecure. As a rule, things were known only by comparison with their opposites, and that which required something else to support it could not be depended on. The formula of scepticism, that it is safest to suspend one's judgment (*ἐρέχειν*), is advocated in a long passage, in which the errors of the senses and the conflicting views of men are dwelt upon (*de Ebriet.* 41-49 [i. 383-388]). Through the varying opinions of the philosophers, therefore, Philo took for his unerring guide the laws and customs divinely communicated to the Jews.

5. *The doctrine of God as eternal Being.*—(a) The belief in the existence of one supreme God was fundamental in the Jewish religion. In the world of speculation, however, this was opposed by atheistic and pantheistic hypotheses, and it was there-

fore necessary to support the belief by philosophical arguments. The microcosm, man, suggested the true solution of the problems presented by the macrocosm. As the visible body was presided over by the invisible mind, so the universe which engages our vision must be held together and governed by an unseen sovereign. This conclusion is confirmed by the evidence of design and harmony in the objects around us. The cosmos has all the appearance of being a work of art, and consequently cannot be itself *ὁ πρῶτος θεός*, but must have proceeded from an intelligent and providential artificer. Again, the universe, as we have seen, bore the marks of transience and dependence, and so pointed to a *πρῶτον* or *πρεσβύτατον αἰώνιον*, which could be none other than supreme Reason or Mind (*ὁ τῶν ὄλων νοῦς*), which alone could produce a world that bore everywhere the impress of rational thought. But the highest mode of approaching God was by religious intuition. The world was only a shadow, which left men subject to conjecture; but God shone by His own light, revealing Himself to the eyes of the soul, and imprinting immortal thoughts upon the mind. This intuition is not universal. It requires solitude, detachment from earthly cares, and freedom from the sway of the senses. Self-knowledge, leading to self-despair, opened the way for this diviner knowledge; and he who had despaired of himself knew the Self-existent. Accordingly, the apprehension of God not only varied in different persons, but in the same person changed with changing moods.

(b) In forming an opinion about the Divine nature we are necessarily hampered by the limitations of our own consciousness. The human analogy evidently fails in a fundamental point. Man is a derived being, placed in a world which he has not created, while God is the undervived Creator of the universe. He is not only without the human form, but without human passions. The highest truth is expressed by the statement that 'God is not as man' (*Nu* 23¹⁹), and it is only for purposes of admonition that He is said to be 'as man' (*De* 1²¹), and to have bodily organs, and such passions as enmity and wrath. This thought is frequently insisted on. The two most instructive passages are *de Sacr. Ab. et Caini*. 28-30 [i. 181-183], and *Quod Deus immut.* 11-14 [i. 280-283]. The former, explaining the necessary use of anthropomorphic language on account of our weakness, sums up in these words: *ἀφελείς οὖν, ὡ ψυχῇ, πᾶν γενητὸν θνητὸν μεταβλητὸν βέβηλον ἀπὸ ἐννοίας τῆς περὶ θεοῦ τοῦ ἀγενήτου καὶ ἀφάρτου καὶ ἀτρέπτου καὶ ἀγίου καὶ μόνου μακαρίου*. The higher faculties in men, however, reason and the preferential freedom of the will, were peculiar to them among created beings, and must be regarded as essentially Divine; so that we may regard God as free, self-determining, ever active Mind (*ὁ τοῦ παντός νοῦς*), possessed of *τὸ αὐτεξούσιον κράτος*, even His beneficence being ascribed, not to His inability to do evil, but to His preference for the good (*de Plantat. Noe*, 20 [i. 342]).

When we seek to pass beyond this description, and inquire into the essence of God, we are met with blank mystery. The essence of the human mind is impenetrable, much more that of God, so that we can know only that He is, not what He is: *ὁ δ' ἀρα οὐδὲ τῷ νῷ καταληπτὸς ἐστὶ μὴ κατὰ τὸ εἶναι μόνον· ὑπάρχει γὰρ ἐστ' ἢν καταλαμβάνομεν αὐτοῦ, τῶν δὲ γε χωρὶς ὑπάρξεως οὐδέν* (*Quod Deus sit immut.* 13 [i. 282]). Accordingly, He is in the strictest sense without a name. There are, indeed, numerous appellations which serve to denote Him, and He is called in Scripture *κυριῷ ὀνόματι ὁ ὢν* (*de Abr.* 24 [ii. 19]); but these do not reveal His essence, so as to communicate a perfect knowledge of what

He is. In spite of this opinion, Philo constantly assumes that we have a very extensive knowledge of God, and it is generally supposed that his whole doctrine is involved in hopeless contradiction. This, however, may be resolved by a strict attention to the meaning of words. According to Philo, God is a simple uncompounded unity. But, when we speak of Him as rational, good, powerful, we violate His unity, and represent Him as manifold. This is due to the imperfection of our thought, which cannot comprehend the essence in which these things are one, but can notice only the different effects of the Divine causality in the manifoldness of nature. As a simple essence, God is without qualities (*ἀποιος*, a word which expresses not, as is often said, the absence of attributes, but the impossibility of classification). God is not a sort of God, or a sort of anything, but is alone in His incomprehensible perfection. How, then, are we to regard His attributes? A man is good by partaking of goodness, which as it may be shared by others, makes the man a particular sort of man. God, however, is not good by partaking of goodness, as though it were something extraneous to Himself. Goodness and all such attributes are among the *ἰδιότητες* of God; and if other beings may be classified as good, it is only because they participate in the Divine essence, in the eternal and archetypal ideas which the fulness of God exhausts and transcends. Οὐδὲν γὰρ ἐστὶ τῶν καλῶν, δὲ μὴ τοῦ τε καὶ θεῶν (*de Sacr. Ab. et Caini*, 17 [i. 174]); πλήρης δὲ ἀγαθῶν τελείων, μᾶλλον δὲ, εἰ χρή τὸ ἀληθὲς εἰπεῖν, αὐτὸς ὢν τὸ ἀγαθόν, δις οὐρανῷ καὶ γῇ τα κατὰ μέρος ὠμψύρεται ἀγαθὰ (*de Septen.* 5 [ii. 280]); οὐ τῶν ὅλων νοῦς ἐστὶν εἰλικρινέστατος καὶ ἀκραίφινεστατος, κρείττων ἢ ἀρετῇ καὶ κρείττων ἢ ἐπιστήμῃ καὶ κρείττων ἢ αὐτὸ τὸ ἀγαθόν καὶ αὐτὸ τὸ καλόν (*de Mundi Op.* 2 [i. 2]).

(c) There is, then, no contradiction in ascribing attributes to Him whose uncompounded essence is so inscrutable. He is eternal, incorruptible, and immutable, and thus differentiated in the most absolute way from every thing created. Hence He is not only the one only God, but He is the indivisible, archetypal unity, without parts or members. He is invisible, except as spiritual light revealing itself to the soul. He is omnipresent, and 'has filled the cosmos with Himself' (*de Post. Cain.* 5 [i. 229]), having stretched his powers through the earth and sky, so as to leave no part empty. Being independent of place, He is at once everywhere and nowhere, and all terms of motion, like up and down, are inapplicable, except figuratively, to God in His essence (*τῷ κατὰ τὸ εἶναι θεῷ*; see especially *Conf. Ling.* 27 [i. 425]). He is equally independent of time, which belongs only to the phenomenal world. Every thing being thus present to His view, He is omniscient, and no man can hide himself from Him. As sole efficient Cause, He is omnipotent. He is also perfect, that is, complete in Himself, so that nothing could add to the fulness from which all things come; and, regarded as pure Being, He is out of all relation (*τὸ γὰρ ὂν, ἢ ὅ ἐστιν, οὐκ ἔστιν πρὸς τι*), but some of His powers are, as it were, relative (*ὥσπερ πρὸς τι*); a phrase which implies that, though they are described by relative terms, their character is not altered by the relation, but they impart all and receive nothing (see *de Mut. Nom.* 4 [i. 582]). Philo habitually teaches that God has no participation in evil, and is the source only of good. With him are οἱ θησαυροὶ μόνων ἀγαθῶν (*de Fuga et Invent.* 15 [i. 557]). In one passage, however, this is verbally contradicted, *εἰσι γὰρ ὡς περ ἀγαθῶν οὕτω καὶ κακῶν παρὰ τῷ θεῷ θησαυροὶ* (*Leg. All.* iii. 34 [i. 108]). This may illustrate the kind of inconsistency into which Philo is betrayed by his allegorical interpre-

tation of different passages; but here the contradiction is relieved by the consideration that in one passage he is dealing with moral evil, and in the other with Divine punishments. When we add that God enjoys perfect blessedness and uninterrupted peace, we have completed this preliminary survey of His attributes.

And now a profound question arises which philosophy was bold enough to answer. Why did a Being so perfect, and in need of nothing, create the universe? Because He was good and munificent, and did not grudge to matter a share of His own best nature; and in thus bestowing His favours He acted from His own sole initiative, *οὐδενὶ δὲ παρακλήτω*—*τίς γὰρ ἦν ἕτερος*;—*μόνῳ δὲ αὐτῷ χρησάμενος* (*de Mundi Op.* 5, 6 [i. 5]). From the same source springs His providential care, with which He pours forth the abundant riches of His favours, blessing the imperfect, and pitying the unworthy. But His mercies are measured out in due proportion, for not even the whole world could contain them in their purity. Every doctrine of Providence, however, is required to account for the existence of pain and of moral evil. The questions thus suggested are discussed by Philo in his treatise on Providence, where he gives the usual philosophical answers, on which it is unnecessary to linger. We must pass to the more characteristic problem. How are we to reconcile the absolute simplicity and unity of God with His manifold activity in the world of phenomena?

6. *The doctrine of the Divine powers.*—(a) *Their existence and character.*—When we survey this world and observe the mutual relation of its several parts, we are driven to the conviction that it is one system, and therefore that it is held together by a pervasive and enduring power. But this power is manifested in a vast variety of objects, which embody distinct ideas or rational forms; and nothing but the presence of a compelling force can prevent them from sinking back into amorphous matter. We are therefore constrained in thought to recognize a multitude of powers, such as habitual, vital, rational. God being the only efficient Cause, these powers must be Divine, and so constitute the link between God and matter. They belong therefore to the Divine essence, and, as that essence is unknown, the powers too hide their essence, and reveal only their effects. They are uncircumscribed, timeless, and unbegotten, holy and unerring as God Himself, and consequently they are only partially exercised in creation. From this brief description it is apparent that they correspond with the Platonic *ideas*, and accordingly Philo adopts this part of Platonic philosophy. The principal passage bearing on this subject may be quoted. God is represented as replying thus to Moses: 'As, among you, seals, whenever wax or any similar material is applied to them, make innumerable impressions, not suffering the loss of any part, but remaining as they were, such you must suppose the powers around Me to be, applying qualities to things without quality, and forms to the formless, while they experience no change or diminution in their eternal nature. But some among you call them very appropriately *ideas*, since they give ideal form to each thing, arranging the unarranged, and communicating determinate limits and definition and shape to the indeterminate and indefinite and shapeless, and, in a word, altering the worse into the better' (*de Monarch.* i. 6 [ii. 218 f.]). The function of these powers or ideas in the work of creation is described in the following passage: 'For God, as being God, anticipating that there could never be a beautiful imitation without a beautiful pattern, or any perceptible thing faultless which was not modelled in conformity with an archetypal and intelligible idea,

when He wished to fabricate this visible cosmos, first shaped forth the intelligible, in order that, using an immaterial and most Godlike pattern, He might work out the material cosmos, a more recent copy of an older one, destined to contain as many perceptible genera as there were intelligible in the other. But it is not to be said or supposed that the cosmos which consists of the ideas is in any place; but in what way it subsists we shall know by following up an example of what takes place among ourselves. Whenever a city is founded to gratify the high ambition of some king or emperor, claiming autocratic authority, and at the same time brilliant in thought, adding splendour to his good fortune, sometimes a trained architect having offered his services, and inspected the good temperature and suitability of the place, describes first within himself almost all the parts of the city that is to be erected—temples, gymnasia, town-halls, market-places, harbours, docks, lanes, equipment of walls, foundations of houses and other public edifices. Then, having received the forms of each in his own soul, as in wax, he bears the figure of an intelligible city, and having stirred up the images of this in his memory, and, still more, having sealed there its characters, looking, like a good workman, to the pattern, he begins to prepare that made of stones and timber, making the material substances like each of the immaterial ideas. Similarly, then, we must think about God, who, when He purposed founding the great city, first devised its forms, out of which, having composed an intelligible cosmos, He completed the perceptible, using the former as a pattern. As, then, the city which was first formed within the architect had no exterior place, but had been sealed in the artist's soul, in the same way not even the cosmos that consists of the ideas could have any other place than the Divine Logos which disposed these things into a cosmos. For what other place could there be for his powers which would be adequate to receive and contain, I do not say all, but any one unmixed? (*de Mundi Op.* 4 f. [i. 4]). The ideas are not mere names, which could have no efficiency, but are real essences, to which the qualities of things are due (see especially *Sacrificant.* 13 [ii. 261 f.]), and which maintain in material objects the permanence of ideal types. They are eternal, and do not perish with the things on which their seal has been set; for wisdom and goodness do not die with the wise and good man. In their combination they form the κόσμος νοητός, which is the archetype of the κόσμος αἰσθητός. They have no locality but the Divine thought, or God Himself, who is the 'immaterial place of immaterial ideas' (*Cherub.* 14 [i. 148]), the primal archetype, or rather older and higher than the archetype, the Idea being only one mode of the eternal Thought. From this point of view the κόσμος νοητός is the son of God, and its counterpart, the κόσμος αἰσθητός, is his younger son. Philo attempts no careful classification of the powers; but there are a few on which he frequently dwells. The highest of all is the Logos. Next to this comes the creative power, ἡ ποιητική, and then, in succession, ἡ βασιλική, ἡ ἡγεύς, and the two divisions of ἡ νομοθετική, the preceptive and the prohibitive. The lowest on the scale, which are virtually only two, are subordinate varieties of the two powers above them, affecting the life of men, and not the entire cosmos. The two great powers, the creative and the regal, have their unity in the Logos. They are otherwise called ἀγαθότης and ἐξουσία, for by goodness God generated the universe, and by authority He rules it. Scripture represents this distinction by the two titles, θεός and κύριος. Under the latter power is ranked the punitive, for it is the business of a ruler to punish the guilty; but this is not inconsistent with goodness,

'the oldest [i.e. the highest and best] of the graces,' for punishment is intended as a prevention or correction of sin.

(b) We must now notice a very difficult question, What was the relation of the Divine powers to God? It is generally said that Philo is here involved in hopeless contradiction, sometimes treating the powers merely as attributes, sometimes regarding them as distinct persons. Philo himself felt that the subject was obscure, and not to be rashly spoken of before those who were incapable of philosophical reflexion (see, especially, *de Sacr. Ab. et Caini*, 15 and 39 [i. 173 f. and 189]). The most definite statement is found in an allegorical interpretation of the visit of the three men to Abraham. These symbolized the Father of the universe, and His two oldest and nearest powers, the creative and the regal. These present to the seeing intelligence a mental image, now of one, and now of three,—of one, whenever the soul, being perfectly purified, presses on to the idea which is unmingled and complete in itself; but of three when it is unable to apprehend the self-existent Being from itself alone, but apprehends it through the effects. That the triple image is virtually that of one subject is apparent not only from allegorical speculation, but from the word of Scripture, which represents Abraham as addressing his visitors, not as three but as one, and as receiving the promise from one only (*de Abr.* 24 f. [ii. 18 f.]). It is clear from this passage that the creative and regal powers are not conceived as beings distinct from God, but only as answering to our imperfect modes of apprehension, while to a true perception both are lost in the supreme and unbroken unity of God. In other words, our highest thought, when it penetrates to the Divine unity, can apprehend God only as pure Being; but, when we view Him through the variety of His operations, we are obliged to think and speak of certain aspects of that Being. An instructive analogy is furnished by a description of the 'power' in the wise man. It receives various names, piety, natural philosophy, ethical, political; and the wise man contains these and numberless other powers; but in all he has one and the same εἶδος (*de Ebriet.* 22 [i. 370 f.]). Agreeably to this view, the powers are spoken of collectively as equivalent to the 'invisible' or 'eternal nature' of God. It is not surprising, therefore, that God and His power or powers are used interchangeably. Again, there are several passages in which the powers are regarded as predicates of God, and God is referred to as Himself being or doing what is implied by their several names.

(c) What, then, is the function of the powers? They are not intended, as is so often said, to act as personal agents who can take the place of God in all mundane affairs, but to present to our thought the mode in which we may conceive of the Eternal Mind as acting in time and space; or, in other words, they are not meant to separate God from the material world, but to bring Him into contact with it. It is through them that the self-existent Being (ὁ ὢν or τὸ ὄν) is omnipresent, having filled the universe with Himself. He 'stretches' them into every part, as we may stretch our mind to a speaker, or the energies of our souls to God. It is through the powers that God 'touches' the soul; for we can receive only a broken and partial revelation. The passage which is thought to prove decisively the separate personality of the powers is the following: ἐξ ἐκείνης [οὐσίας] γὰρ πάντα ἐγέννησεν ὁ θεός, οὐκ ἐπαπτόμενος αὐτός· οὐ γὰρ ἦν θέμις ἀπείρου καὶ πεφυρμένης ὅλης ψαύειν τὸν ἰδμεν καὶ μακάριον, ἀλλὰ ταῖς ἀσωμάτοις δυνάμεσιν, ὃν ἐτυμον ὄνομα αἱ ἰδέαι, κατεχρήσατο πρὸς τὸ γένος ἕκαστον τὴν ἀρμόττονσαν λαβεῖν μορφήν (*Sacrificant.* 13 [ii. 261]). Yet even

here it is God, evidently used in the highest sense, who generated the universe, and the powers are really 'ideas,' which impart form to every genus. God did not touch matter Himself, for that would imply that He communicated to it the totality of the Divine idea, and that the universe, instead of affording fragmentary glimpses of the Divine thoughts, was a complete revelation of His nature. Again, it is quite in conformity with Philo's abundant use of figurative language when God and His powers are compared to a sovereign and his attendant bodyguard. Similarly, the human mind, as a king, has its bodyguard of attendant powers (*de Migrat. Abr.* 31 [i. 462], and several other passages); and the passages where the Divine powers figure most clearly as separate persons may all be explained as instances of this rhetorical style. It is impossible for us to survey these in detail. Some confusion arises also because expositors are not careful to separate Philo's literal interpretations from his allegorical. Thus the three visitors to Abraham might literally be angels, and yet allegorically might be designed to represent God under three aspects of His being. A different order of reflexion arises in connexion with the creation of man. The words 'Let us make man' point to a plurality of persons. These words would have been quite intelligible if Philo had looked upon all the Divine powers as distinct persons; but in fact he feels their difficulty, and declares that the truest reason for them is known to God only. He treats of them in four passages of considerable length (*de Mundi Op.* 24 [i. 16 f.]; *Conf. Ling.* 33-36 [i. 430-433]; *de Fuga et Inv.* 13 f. [i. 556]; and *de Mut. Nom.* 4 [i. 582 f.]); and in these he professes to give only a plausible conjecture. One distinction is made perfectly clear. Man, unlike the rest of the creation, has been partly formed by inferior agents, whereas the whole cosmos, heaven and earth and sea, was made by the architect Himself, without the co-operation of others. This proves conclusively that the subordinate agents, to whom is assigned the partial creation of man, were not regarded as identical with the Divine powers which were exercised in every part of creation. Man occupies a unique place in that he is liable to sin; and therefore God delegated the creation of man in part to others, in order that, if evil arose, it might not be ascribed to the Supreme Goodness. These others are angels, and angels are souls flying in the air, and 'under-servants of God's powers' (*τοὺς ὑποδιακόνους αὐτοῦ τῶν δυνάμεων ἀγγέλους*, *de Monarch.* ii. 1 [ii. 222]). Nevertheless, they are themselves spoken of as God's powers. This apparent inconsistency is easily explained. All objects which embodied a rational idea might be spoken of as powers; but these created and finite manifestations of Divine thought in the elements, in all the lovely sights of nature, and in pure angelic souls inhabiting the air, are not to be identified with the infinite and unbegotten powers which, in our modern language, must be described as attributes of God. While, however, they are distinct to our thought and perception, they participate in the same nature; for it is only through sharing in a Divine idea that matter can receive the impress of rational form, or souls concentrate in themselves the characters of personality.

7. *The doctrine of the Logos.*—(a) At the head of the hierarchy of Divine powers was the Logos. This word occasions a good deal of difficulty to interpreters of Philo, owing to the want of any precise English equivalent. It denotes, in its highest sense, the mind itself, but more especially the rational faculty. Then it is applied to any rational thought or idea residing within the mind, and is extended to any relation which may be

rationally conceived, to an underlying principle or law, for instance, of numbers or harmony, and to the meaning of anything. From this it passes to any kind of outward expression of some thought or idea, particularly in spoken or written language. Probably its best representative in English is 'Thought,' a word which has some approach to the same variable application.

(b) We have already seen that the cosmos presented a picture of rational forms or ideas; and, as these were combined in one harmonious whole, they constituted one cosmic thought. This thought was the highest genus, under which the multitudinous ideas took rank as species; or, more strictly, God, as pure Being, was the most generic, and His reason or thought was second. The Logos, therefore, regarded as a Divine power, was the unitary principle of all beneath it. It was by virtue of His reason that God was both ruler and good; or, in other words, creation and providence were both expressions of reason. If so, a *νοητὸς κόσμος* must have existed in the mind of God prior to the visible world; and, as it was the sum of the Divine thoughts, it was the Logos of God. 'The intelligible cosmos,' says Philo, 'is nothing else than God's Logos, when he is already engaged in making a cosmos; for neither is the intelligible city anything else than the reflexion (*λογισμὸς*) of the architect when he is already intending to create the city' (*de Mundi Op.* 6 [i. 5]). From this point of view the Logos is the supreme archetypal idea (*ἰδέα τῶν ἰδεῶν*), which by its impress, as of a seal, on matter constitutes the visible universe. Matter, however, was inherently incapable of retaining what was once impressed upon it; and hence its ideal forms were forces or powers constantly present and active, and might be regarded as a law, the eternal and pervasive law of 'right reason,' which, stretching from centre to circumference, was a bond of the universe that could not be broken. The same supreme Logos appeared in man as the moral law, enjoining what was right and forbidding what was wrong. Thus the Logos, the intelligible cosmos, became manifest in the universe, where it dwelt as an 'intelligent and rational nature,' ministering as a high priest in the cosmic temple of God.

(c) It is well known that the human logos was divided into *ἐνδιάθετος* and *προφορικός*, and that these terms were, in the later theology, extended to the Logos of God. Now Philo, while familiar with this distinction in the case of man, never applies to God the technical language by which it was described. Hence it is sometimes maintained that the distinction in the Divine Logos was absent from his thought. But the conception of a twofold Logos is involved in the account which we have already given, and it is quite explicitly recognized by Philo. The principal passage is in the *Vita Mosis*, iii. 13 [ii. 154], where it is said that the 'Logos is double both in the universe and in the nature of man,' and the former is divided into that which relates to immaterial ideas, and that which relates to the visible objects of the perceptible cosmos. Nevertheless, the analogy between man and God was incomplete; for God had no organs of speech, and His word was seen in His works, and not heard by the ears (see, especially, *de Migrat. Abr.* 9 [i. 443 f.]). Philo may therefore have shrunk from adopting the usual terms, as one of them suggested anthropomorphic ideas.

(d) The Logos, as the sum and unity of the world of ideas, was identical with the Divine reason; and this reason was not an essence extraneous to God, by sharing in which God became rational, but was a mode of the Divine essence, and in no way broke the solitude of God which

εἰκόνα ἀνθρώπου, ἀπεικόνισμα, παράδειγμα, ἰδέα τῶν ἰδεῶν, ἀρχέτυπος ἰδέα, ὁ νοητὸς κόσμος, τύπος τοῦ ἐκ τῶν ἰδεῶν κόσμου, σφραγίς, χαρακτήρ, σκιά θεοῦ, δεύτερος θεός. We may further observe that the multitude of philosophical terms descriptive of God is entirely absent from the Gospel. In reading the valuable collection of parallels made by Professor Julius Grill (*Untersuchungen über die Entstehung des vierten Evangeliums*, Erster Teil, 1902, pp. 106-138), where the Greek text of Philo is fully presented, one cannot fail to be impressed by the marked difference in the style and phraseology of the two writers. Amid many interesting resemblances of thought, which indicate the presence of a similar religious and philosophical atmosphere, there are some striking contrasts; and, in the few cases where the same words are used, the identity may be explained without the hypothesis of direct literary dependence. These facts show that it is not unreasonable to suppose that the resemblances may be due to the common stock of ideas which belonged to thoughtful men at that time. There are two lines of evidence which strengthen the probability that this may be the case. First, Philo himself had an extensive acquaintance with Palestinian interpretation. For particulars see Siegfried, *Philo von Alexandria*, p. 145 ff., and Bernhard Ritter, *Philo und die Halacha: Eine vergleichende Studie unter steter Berücksichtigung des Josephus*, 1879. Secondly, other books of the New Testament also contain a number of parallels to Philo's exposition; and, although we cannot prove that the writers of these books had not read Philo, it seems more probable that the coincidences are due to the general drift of thought. Even the Synoptic Gospels furnish some striking resemblances in phraseology and sentiment. The Epistles of St. Paul approach Philo more nearly, and even contain examples of allegorical interpretation. It is perhaps more surprising to find that the Epistle of James has many words and figures, allusions and precepts, in common with Philo, and that the two writers agree in some of their doctrines, both in substance and in the mode of presenting them. The author of the Epistle to the Hebrews betrays an obvious affinity with the Alexandrian school; and yet, even in his case, we cannot prove a direct dependence upon Philo. See particulars, and other works referred to, in Siegfried, and in Anathon Aall, *Geschichte der Logosidee in der christlichen Literatur*, 1899, who assumes a more direct dependence upon Philo than seems securely established by the evidence. On the wide prevalence of a Logos-doctrine in the 1st cent., and its connexion, through the mediation of Stoicism, with the old Egyptian theology, see many interesting particulars in R. Reitzenstein's *Zwei religionsgeschichtliche Fragen nach ungedruckten griechischen Texten der Strassburger Bibliothek*, 1901.

When we pass from the New Testament, the connexion with Philo gradually becomes more and more obvious, especially through the predominance of that vicious mode of interpretation of which he made such extensive use. This is seen in the Epistle of Barnabas, which follows some of the principal rules of allegory. It is still further exemplified in the writings of Justin Martyr, where the whole false system is fully established. The Apologist, moreover, in his doctrine of the Logos, has many points of agreement with Philo, which are wholly wanting in St. John; and it is certainly not improbable that a philosopher had studied the works of the Alexandrian sage. Similar appearances are presented by the works of other apologists, Tatian, Athenagoras, Theophilus. When we come to the great Alexandrian writers, Clement and Origen, there is no longer any room for doubt; for they expressly refer to him. They inherit from

him the rules of allegorical interpretation, and are dependent on him in some of their important doctrinal statements. Eusebius frequently quotes him, and borrows his doctrines and interpretations; and he was read even in the West, for Ambrose makes ample use of him, and sometimes transfers his very words, in a Latin translation, to his own pages. Jerome, too, is familiar with his writings, and avails himself especially of his interpretations of scriptural names, though sometimes correcting him. It was probably, for the most part, through Jerome that these explanations passed on to other Latin Fathers. See the whole subject treated by Siegfried, p. 303 ff., where other works are referred to. This widely spread knowledge of his writings shows the high estimation in which Philo was held; but, nevertheless, we cannot place him among the world's great original thinkers. To class him, as ancient writers did, with Plato, must seem to us an absurd exaggeration of his powers. His system of interpretation, borrowed indeed but extended and popularized by him, may have helped for a time to save the reverence due to the Scriptures, but was in its ultimate effect purely mischievous, hiding the real beauties of the ancient records, and reducing Revelation to a fantastic puzzle. But he gave eloquent expression to a great movement of thought, and prepared a sort of philosophical mould in which the fluid doctrines of Christianity could acquire consistency and shape; and amid his tedious interpretations there are splendid flashes of spiritual thought, while his ethical teaching reaches an exalted purity, without transgressing the bounds of sober sense, and is always flushed with the hues of religious faith, and reverence for the Will and Spirit of God.

LITERATURE.—In the foregoing article only the most important references have been given; for the opinions of Philo are collected from such a number of passages that the complete references would occupy an undue amount of space. They will be found in the present author's work, *Philo Judæus: or the Jewish-Alexandrian Philosophy in its Development and Completion*, 2 vols. London, 1888, where also there is a much fuller discussion of controverted points. In addition to works already referred to, it may be sufficient to mention the following: August Gröner, *Philo und die alexandrinische Theosophie*, 1831; August Ferdinand Dahn, *Geschichtliche Darstellung der jüdisch-alexandrinischen Religions-Philosophie*, 1834; Friedrich Keferstein, *Philo's Lehre von den göttlichen Mitterwerken*, 1846; Zeller, *Die Philosophie der Griechen in ihrer geschichtlichen Entwicklung*, iii. Thl. 2 Abth. 1881; Henry Soulier, *La Doctrine du Logos chez Philon d'Alexandrie*, 1876; Anathon Aall, *Geschichte der Logosidee in der griechischen Philosophie*, 1896. A fuller bibliography may be consulted in Schurer, *GJV* 3 in. 542 ff. An interesting *Florilegium Philonis* has been collected and published by Mr. C. G. Montefiore in the *JQR* [April 1895 vii. pp. 481-545.

JAMES DRUMMOND.

TEXTUAL CRITICISM (OF NT).—

- i. §§ 1, 2. The Object of Textual Criticism.
- ii. §§ 3, 4. Materials for Textual Criticism, and Critical Editions.
- iii. §§ 5-84. Methods and Principles.

- 83 f. Conclusion.

i. OBJECT.—1. The object of Textual Criticism is to recover the *ipsissima verba* of the document of which the NT is composed, and to present them to modern readers as nearly as possible in the form in which they left their authors' hands. This definition is based on the assumption that all the copies of the different books we possess, whether in Greek or in a translation, are capable of being traced back in the last resort to one and the same original. The assumption is a natural one, and not to be surrendered without very cogent reason. Still we cannot exclude the possibility that any particular book may have been current from Apostolic times in two closely related but distinct forms. St. Paul may, as Lightfoot suggested,* have issued a second edition of his Epistle to the Romans. St. Luke may, as Blass maintains, have issued two editions, both of his Gospel and of the Acts. The phenomena presented by the text of St. Mark, not only in regard to the last twelve verses but throughout the Gospel, may need the same hypothesis for their adequate solution.† In such cases the task of the critic becomes still more delicate. He has to disentangle and present distinctly not one original but two, which were once current side by side, but which have in the course of time been blended together, in almost inextricable confusion, in all our extant authorities.

2. From this definition of the object which all textual critics alike have before them two consequences follow, to which it will not be superfluous, judging from the past history of the science, to call attention before we pass on.

The first is this. There is at present, and there must remain, room for legitimate difference of opinion. We must be careful not to arrogate to the form of text which we ourselves prefer an exclusive right to represent the true 'word of God.'

* See the papers by him and by Hort, reprinted from the *Journal of Philology in Biblical Essays*, pp. 257-374.

† See Blass, *Textkritische Bemerkungen zu Markus*.

The necessity for this caution is perhaps not so great as it was in the days of Griesbach.* The appeal made in a recent pamphlet by the leading supporter of one of the two rival schools of Textual Criticism to a standard which has yet to be fixed is a most hopeful sign.†

The second consequence which follows from our definition of the object of Textual Criticism is this. As all textual critics are engaged on one and the same sacred study, and are fellow-workers to a common end, they will do well to take special pains to cultivate mutual respect. It is strange, but it is none the less true, that the study of Textual Criticism seems to have a peculiarly disastrous effect upon the temper. The virulence with which Walton, Mill, Griesbach, and Lachmann were assailed, not to speak of more recent examples, is a deep stain on the annals of the study.‡

ii. MATERIALS.—3. It does not fall within the scope of this article to describe at length the materials available for the Textual Criticism of NT. In part they are dealt with under separate heads (see A, N, B, C, D, Arabic Version, etc.). For a complete list (and for purposes of reference anything short of a complete list is unsatisfactory) the student must be referred to the recognized store-houses of information, e.g. Tregelles, vol. i. of Horne's *Introduction to the New Testament*, revised 1856, by no means to be neglected; *Prolegomena to Tischendorf*, ed. C. R. Gregory, 1884-94; Scrivener's *Introduction to the Criticism of the New Testament*, 1894, revised by E. Miller and others; Gregory, *Textkritik des Neuen Testaments*, Leipzig, 1900. The evidence, so far as it had been ascertained at the time of publication, was collected in two great critical editions.

4. The edition by Tischendorf, ed. viii. 1869-72, is at present indispensable for students, but it needs throughout to be carefully checked and supplemented. The edition of Tregelles (1857-79) is no less a marvel of patient accuracy. Unfortunately, the first two Gospels were issued before the discovery of N, and, though the evidence is supplied in an Appendix issued by Hort and Streane after the author's death, it is awkward to use. The statement of the evidence is, however, given with great clearness. And the method adopted—a deliberate limitation of the authorities, whose evidence was to be represented, to the uncial

* See the *Prolegomena* to his second edition, Sect. 1. § 3, p. xlvf. (ed. London, 1809), esp. 'Deinde non ideo *verbum Dei* mutatur, quia in textu vulgari unum alterumve vocabulum deletur aut additur aut cum alio permutatur. Quod hebraico magis quam latino nomine *verbum Dei* appellare solent, continetur *sensu* Scripturæ sacræ; non autem ita in ip-sis syllabis atque literis consistit, ut mutato (ob gravissimas rationes et auctoritates, ac salvo sensu) vocabulo quodam, ipsum *Dei verbum*, hoc est doctrina Christi ac Apostolorum, pereat. Nulla emendatio a recentioribus editoribus tentata ullam Scripturæ sacræ doctrinam immutat aut evertit; paucos sensum sententiarum attinent. Ad has posteriores quod attinet, tenendum porro est, principium, ut aunt, peti ab iis, qui *verbum Dei* ab editore mutari existiment. Nempe hoc est id ipsum, de quo disputatur, utrum scilicet lectio vulgaria editionum, an vero lectio aliorum ac meliorum codicum, genuina sit verbi divini pars. Nemo itaque *verbum Dei* se defendere ideo jactet, quia textum Elsevirianum tuetur. Nam *ex quo* jure il, qui manuscriptorum codicum textum defendunt, dicere possent, verbi divini integritatem a se propugnari contra corruptorum interpolationes.'

† See *The Textual Controversy and the Twentieth Century*, by Edward Miller, M.A., p. 24: 'Thus I submit my case to all the learned in Christendom. When I speak of the Traditional Text, I mean that recension of the Received Text which shall ultimately be settled by the voice of Christendom upon an exhaustive examination of all the evidence in existence. My own Commentary, so far as it goes, is meant to be a contribution towards such a settlement.'

‡ Accordingly, neither does my theory consciously override facts, nor must my expressions be taken to be dogmatic, when convenience in writing leads me to drop hypotheticalal language.'

§ See Tregelles, *Account of the Printed Text*, pp. 115-117. 254-256.

MSS, a few select cursives, all the Versions, and the Fathers up to Eusebius—has a real advantage, as it concentrates attention on that period in the history of the text about which there is room for serious difference of opinion.*

Editions which aim at giving only a selection of readings such as Baljon's (1898) are radically unsatisfactory. It is impossible to estimate the value of any authority in any single book without studying the whole of its readings through that book.

Editions such as that published by E. Nestle at Stuttgart in 1899 are convenient as indicating concisely the differences between the most important among recent critical editors, but do not profess to give the grounds on which their judgments are based. A *Textual Commentary upon the Holy Gospels*, edited by E. Miller largely from materials collected by the late Dean Burgon, of which part i. (Mt 1-14) appeared in 1899, will afford a useful index to the Gospel references to be found in the Fathers down to the latest period. This list is based directly on the indexes compiled with enormous labour by Dean Burgon, now in the British Museum. It has not apparently been supplemented by reference to other sources, e.g. Tregelles, or Hort in the Notes on Select Readings in his Appendix. It needs, besides, and will no doubt in due course receive, careful sifting. Scholars, however, cannot but be grateful for the labour that has been bestowed on its preparation.

It is only right to add that Mr. Miller's judgment on the drawback to the use of Patristic evidence from the uncritical character of the current editions of their works† must be checked in the light of Barnard's edition of the *Quis dives salvetur*, and his account of 'The Biblical Text of Clement of Alexandria' in *Cambridge Texts and Studies*, v. 2 and 5. Nestle also has some pertinent remarks, with illustrations, in his *Textual Criticism of NT*, p. 144 ff., Eng. tr.

Mr. Miller's edition embodies, besides, the results of recent collations, chiefly of cursives. A certain number of misprints are inevitable in a work of this scope. Students, however, should be warned that Mr. Miller has not incorporated all the various readings for which there is MS evidence. Nor does he always quote completely the subsidiary authorities, e.g. the MSS of the Latin Versions, in the passages which he selects for comment. Again, the authority of the Revisers is quoted constantly for readings on which it is clear that they were never called upon to pronounce an opinion.

iii. METHODS AND PRINCIPLES.—5. The main purpose of this article is to discuss the methods and principles by the help of which we may hope to secure the best result from our use of the materials available for Textual Criticism. This, it is well to remember, is the true province of the textual critic. It is, no doubt, of first-rate importance for any one who wishes to bring out a critical edition, that he should have a certain amount of experience in the direct handling of MSS. But to imagine, as Dean Burgon seems to do, that the value of a

man's opinion on a matter of Textual Criticism depends directly on the extent of his first-hand acquaintance with original documents, is very like measuring the skill of a jeweller by the amount of his experience in the work of a diamond field or of a gold mine, or refusing to accept a historian's estimate of a document unless he has himself inspected the MS from which it was printed. In fact, the qualities that go to make an ideal collator, such as Scrivener for instance, are very rarely combined with the capacity and the opportunity for taking such a comprehensive and intelligent survey of the whole evidence as can qualify a man to pronounce a sound judgment on the relative importance of any particular element in it. The constant growth of available material makes it increasingly important to lay stress on the radical distinction between the two functions—the function of collecting and the function of interpreting the materials of criticism.

It is strange, and not a little sad, that after nearly two centuries of discussion there should as yet be no general agreement among textual critics on the fundamental principles or even the methods of their science. Yet so it is. Critics have from the first been divided into two main schools—the 'Traditional' and the 'Critical.' They approach the problem from diametrically opposite points of view, and are at present almost as far from coming to an agreement as they have ever been. The 'Oxford Debate', however, at least indicates a desire for mutual understanding, and is so far a sign of better days in store.

6. The Traditional School is represented by a small but vigorous band of English scholars, at the head of whom stands Mr. Miller,* to whom reference has already been made more than once.† This school has, so far as known to the present writer, no support on the Continent, though readings of the Traditional Text constantly commended themselves to the veteran French commentator, Godet.

7. Traditionalists are strong in the prescriptive right due to fifteen centuries of almost unchallenged supremacy. They have, or had,—for the 19th cent. has not left matters as they were in this respect,—what Mr. Gwilliam in writing of the Peshitta (Scrivener⁴, vol. ii. p. 17) fairly calls 'the advantage of possession.' They are, however, fully alive to the necessity of establishing their position on the ground of a reasoned and not an unreasoning faith. They are busy, therefore, in justifying their position by argument in the court of truth and fact, which, as they cannot but feel, must cast prescription to the winds if there is a flaw in their title. Their fundamental canon, as formulated by Mr. Miller (*Oxford Debate*, p. xii), runs as follows:—

'It (the true text) must be grounded upon an exhaustive view of the evidence of Greek copies in manuscript in the first place, and, in all cases where they differ so as to afford doubt, of Versions or Translations into other languages, and of Quotations from the NT made by Fathers and other early writers.'

On p. xiv we read further: 'In the ascertainment of this text, or these readings, guidance is to be sought under Seven Notes of Truth, viz.—(1) Antiquity, (2) Number, (3) Variety, (4) Weight, (5) Continuity of Witnesses, (6) The Context of Passages, (7) Internal Evidence. These Seven Notes of Truth, which are essential to the Traditional Text, sufficiently exhibit the agreement of it with the Canons laid down. In fact, coincidence with the first Canon implies coincidence with all the rest.'

* Mr. Miller died while the present art. was passing through the press.

† Mr. Miller is the author of—(1) *A Guide to the Textual Criticism of the NT*, 1886; (2) *The Oxford Debate*, 1897; (3) *The Present State of the Textual Controversy*, 1899; (4) *The Textual Controversy and the Twentieth Century*, 1901. He is joint author with Dean Burgon of *The Traditional Text of the Holy Gospels*, 1896; and *The Causes of the Corruption of the Traditional Text*, 1896. He also edited the 4th ed. of Scrivener's *Introduction*.

* Von Soden's *Die Schriften des NT*, etc. (Bd. I. Abt. 1, 1902) is a worthy fruit of the recent revival of German interest in NT Textual Criticism. He has already revolutionized the catalogue of NT Greek MSS. When completed, the work cannot fail to mark an immense advance in the scientific presentation of the materials for Criticism.

† I.e. p. xiii: 'I am persuaded that more is made of this drawback than would be if it were generally known how little modern editing of the best kind, perhaps not in Eusebius, but in most authors, alters the quotations.'

A somewhat lurid light is thrown on this remark by a sentence in Nestle, l.c. p. 145, Eng. tr. 'As late as 1872 an Oxford editor, in bringing out Cyril of Alexandria's Commentary on the Gospel according to St. John, wrote down only the initial and final words of the quotations in his manuscript, and allowed the compositor to set up the rest from a printed edition of the *Textus Receptus*.'

8. There is no indication of the kind of differences between MSS which 'afford doubt,' and render it necessary to call in the evidence of Versions or Quotations; nor is there any hint of the method of determining the 'weight' of a witness. Judging from his *Textual Commentary*, Mr. Miller's own habit is to weigh uncials against uncials and cursives against cursives, and he feels no doubt so long as there is a clear numerical preponderance in each class in favour of the same reading. In 7 cases an adverse group is characterized as 'Western.' In 5 of these it includes \aleph and B. In one case (Mt 9¹³) a reading attested by \aleph BD + 6^{unc} 30^{unc} all latt. exc. c gl.² Syr-vg (against *cur* and *sin*) and Clem. Rom. (ii. 2), is described as 'Syrio-Low-Latin with Alexandrian support.' These are the only cases in which he gives any guidance in the classification of MSS.

In 4 cases, viz. Mt 6²⁸ (pl. verb after *τὰ κλίνα*), 13²⁸ (*ἐπέσπειρεν* for *ἐσπείρεν*), 13³⁶ (*διασάφισον* for *φράσον*, 'prob. a Latin gloss adopted by Origen'), 13³⁷ (*ἰδία* for *αὐτοῦ*, disregarding Jn 4²⁴), he suspects 'Latinization.' In 14²⁴ (*σταδίου πολλοὺς ἀπὸ τῆς γῆς ἀπέειχεν* for *μέσον τῆς θαλάσσης ἦν*) he hints at retranslation from Syriac. Here, again, we might wish that the suggestions were more illuminating. In 5 cases he discusses the possibility of the influence of Lection systems; in 2 of assimilation to St. Mark; in one case (14³⁰) he appeals to 'internal testimony' (construction of *βλέπω*). For the rest, he is content to let his lists speak for themselves. The mere recital of a long list of authorities ought, he has no doubt, to bear down opposition by sheer weight of numbers. It is true that in the 'Seven Notes of Truth' antiquity stands before number. But his power to estimate the antiquity of witnesses is limited by his failure to grasp clearly the distinction between the *date of a document* and the *date of the text contained in it*, or at least by his failure to apply this distinction consistently.* In practice, his convenient assumption,

* As this distinction is of primary importance in estimating the weight to be attached to a document, and as beginners in Textual Criticism sometimes find a difficulty in understanding it, it may be worth while to explain that the 'date of a document' is, strictly speaking, the date at which it was written, and, when the MS is not expressly dated by the scribe, is settled by paleographical considerations. 'The date of the text contained in the document' is, of course, primarily the date of the autograph. But in the case of a text like that of NT, which has a continuous history, the 'date of the text' refers naturally to the time when the particular form of text contained in the document was current, either generally or in some particular district. E.g. D (Codex Bezae) is a document of cent. vi, but its text represents a type which was widely prevalent in cent. ii. 'k' (Bohemus) is usually assigned to cent. v. Mr. Burkitt has recently given strong grounds for dating it early in cent. iv, but the text of 'k' is the text current in Africa in the days of Cyprian, A.D. 250 (see *Old-Latin Biblical Texts*, ii.).

It is interesting to notice that Mr. Miller is alive to this distinction in regard to Syr-cur and Syr-sin (p. xviii of *Text. Com.*). But he habitually ignores it in the case of \aleph and B. The confusion in this case goes back to Scrivener, who writes in a note (p. vi, *Advers. Crit. Nær.*), describing the work of Dean Burgon, which underlies Miller's *Text. Com.*: 'He had been engaged day and night for years in making a complete index or view of the MSS used by the Nicene (and ante-Nicene) Fathers, by way of showing that they were not identical with those copied in Codd. \aleph and B, and, inasmuch as they were older, they must needs be purer and more authentic than those overvalued uncials' [italics are the present writer's]. He also quotes, 'as helping to annul much of Dr. Hort's erroneous theories' (p. xxviii), an extract from Mr. Rendel Harris, which exactly expresses Dr. Hort's fundamental contention on the matter. 'It is not a little curious to the person who commences the critical study of the documents of the NT to find that he can discover no settled proportion between the age of a MS and the critical weight attached to it. . . . A little study soon convinces the tyro of the impossibility of determining any law by which the value of a codex can be determined in terms of its age only without reference to its history.'

This quotation can have no point in Scrivener's note, except on the assumption, which Mr. Miller adopts without hesitation, that Westcott and Hort attached fundamental importance to the dates at which \aleph and B were written in arriving at their estimate of the weight to be ascribed to them.

that the almost universal prevalence of the Traditional Text in the Greek Church after the end of cent. iv proves that text to be Apostolic, frees him from any qualms arising from the demonstrable antiquity of those witnesses which he is content to disregard.

9. At this point it will be well to examine a little more minutely the claim of the Traditionalists to be the only school that takes account of the whole available evidence. It would, no doubt, be a strong point in their favour if they could substantiate it. Unfortunately for them, the assertion is utterly baseless. Their most formidable antagonist, Dr. Hort, framed his text, as any one who has read his *Introduction* must know, at least as directly as any Traditionalist, on a patient examination of all the evidence. And he lays at least as much stress on the importance of bringing the knowledge gained by the examination of all the facts to bear on the interpretation of the evidence in each case that comes up for decision. When at last a choice has to be made between two rival groups of authorities, the one or the other must be rejected. But it does not follow that its claims have not been fully considered. Otherwise, the Traditionalists themselves would be open to the charge of 'taking no account' of what seems to others the most significant part of the evidence. This charge would, of course, be untrue. And it is an encouraging sign of a *rapprochement* between the two schools, that the Traditionalists are beginning to admit the necessity for accounting for the existence of the various readings which they reject, on some more satisfactory theory than that of the blind or malignant perversity of the individual scribe of \aleph , B, or D. A great step towards ultimate agreement will have been made when it is admitted on both sides that no solution of a textual problem can be final which does not leave room for a rational account of the origin of all the extant variants.

10. The cause of corruption on which Mr. Miller is at present inclined (*Oxford Debate*, p. xv) to lay most stress, is a striking admission of the antiquity of the texts affected by it. He traces it back to forms of the oral Gospel which may have been in existence 'even before the Gospels were written.' A similar source was suggested long ago by Dr. Hort as a possible explanation of certain remarkable insertions in the text of D and its allies. It remains to be seen whether the characteristic differences between the text of \aleph B and the text of the later Gospel MSS are best explained on the same hypothesis. The suggestion does not at first sight commend itself. In the text of \aleph B the separate Gospels stand before us, each with a marked individuality of its own. In the Traditional Text the specific differences in the several reports of the same utterance or the same incident which help to define this individuality, are constantly obliterated. Now, of course, it is *a priori* possible that this uniformity was original, and that the variations came from a corrupting force, which may well have been very potent while it lasted, but which can, *ex hypothesi*, only have been in operation during a very limited period. Only in that case it is difficult to see why it should not have affected all the Gospels equally.

On the other hand, we are bound to make allowance for an undeniable tendency towards the assimilation of parallel passages—a tendency which must have acted with growing intensity as the comparative study of the Gospels developed (as it did very early), and especially in a country which possessed a popular 'Harmony' (cf. Chase, *Syro-Latin Text of the Gospels*, p. 76 ff.). It is unlikely, therefore, that Mr. Miller's suggestion will

obtain any wide acceptance as an explanation of the characteristic readings of NB.*

11. In treating of the problems raised by the felt necessity of offering an explanation of the origin of variant readings, we have reached what is really the starting-point of the labours of the 'Critical' school. Ever since the collection of the evidence for the text of NT began in earnest, in the great edition published by Mill in 1707, the attention of critics was attracted by the nature of the variants from the 'Traditional' text contained in the writings of the earliest Fathers, in the Versions, and in a few of the oldest MSS.†

* This seems the most convenient place to notice Dr. Salmon's criticism of Westcott and Hort for their lack of interest 'in the question of the origin of the Synoptic Gospels; that is to say, in inquiries whether the narratives of the three have any common basis, oral or written' (*Some Criticism of the Text of NT*, ch. v.). It is strange that in making this criticism Dr. Salmon should have forgotten Dr. Westcott's *Introduction to the Study of the Gospels*, the most powerful statement in any language of the case on behalf of the old 'oral' hypothesis, and the share Dr. Hort took in the formation of the plan of (Abbott and) Rushbrooke's *Synopticon*, which was designed as an instrument for testing any 'Documentary Theory' that might be started. Otherwise, he might have looked for some other reason than 'lack of interest' to account for the silence of their *Introduction to the NT* in regard to the Synoptic Problem. The fact is, that to have called in one out of many possible solutions of the Synoptic Problem to fix the weight to be attached to MSS of the Gospels, would have been to explain *obscurum per obscurius*.

It is strange also that so close a reasoner should have failed to notice that his application to the Synoptic Problem of Dr. Hort's method for 'the recovery of the text of a single lost original, assuming the fact of exclusive descent from it to have been sufficiently established,' must fail from the neglect of two vital considerations. He has failed to allow (see Hort, p. 55, l. 6) for the possibility of 'mixture' between the representatives of his different groups. But, what is even more serious, he has overlooked the primary condition of 'exclusive descent.' For, while we may well believe that the three Synoptics take us back to a common original, whether that original be our St. Mark or an Ur-Marcus, no one, least of all Dr. Salmon, has ventured to suggest that St. Matthew and St. Luke had no independent information. In fact, if St. Matthew had anything to do with the Gospel that bears his name, it may well preserve genuine elements in certain incidents that had failed to attract St. Peter's attention. From this point of view, the story of the 'Canaanaïsh woman' (Mt 15^{21f}, Mk 7^{24f}), where there is no serious question of reading, affords an instructive parallel to 'the rich young man' (Mt 19¹⁶, Mk 10¹⁷, Lk 18¹⁸). In each case Matthew follows a distinct but by no means necessarily inconsistent tradition. (On 'the rich young man' see G. Macdonald, *Unspoken Sermons*, 2nd series).

It is clear that in settling the text of the Gospels we have to allow for the operation of forces acting in opposite directions: (1) a constant tendency to assimilation, affecting all the Gospels alike, complicated by (2) a tendency to dissimilation, produced by various accidents in the special history of the transmission of each Gospel.

No mechanical rule can therefore be laid down, and we may be thankful that in this, as in other cases, the editors were content to follow consistently the evidence of the MSS which, taking everything into account, they found most reason to trust, whether it made for likeness (e.g. Mt 8⁹ 15²³) or for difference (as in Mt 19¹⁶) between the Evangelists, instead of revising their decision in each case with an eye to the Synoptic Problem. No doubt, the questions cannot be ultimately dissociated. But, after all, we must provisionally settle our text of the Gospels before we can solve the problem of their inter-relation.

† A few dates may with advantage be noted here. In the time of Mill (1707) the only 'primary uncials' of the Gospels of which full collations were available were A and D. Bengel (1734) had access as well to 'select readings' of C. Griesbach, in his first edition, used full collations of ACODL. No collation of B was published till 1788. κ was discovered in 1859.

In the light of these facts, Mr. Miller's method of accounting for the preference shown by the 'Critical' school for the small over the large group of authorities needs correction. 'The explanation,' he says (*Oxford Debate*, p. 6), 'is what has frequently been called by other men the extreme adulation paid to B, especially by Dr. Hort and men of that side. I think some of it is very natural, and that history quite accounts for it. They [A and B] are the two oldest MSS; and in early times, when people had in their view only a small amount of evidence, it was very natural that they should say that these two MSS, which come to us as the earliest, and were therefore nearest to the original autographs, should be right.'

In the interests of 'true history' and 'sound logic' we must remember that the foundations of the Critical position were laid, not only long before κ was discovered, but even while the readings of B were almost entirely unknown.

It must, no doubt, have given B a peculiar interest in the eyes of Griesbach when he found how exactly it verified results which he had arrived at independently (see Tregelles, *Intr.* p.

Not only was the authority for these variants demonstrably early, but it was again and again so much easier to account for the origin of the variants on the supposition that the Traditional Text was wrong. In fact it soon became clear that the substantial uniformity of the bulk of the later copies of the Greek Text was due to a gradual process, by which the variety of texts current in cent. iv were in the course of three or four centuries transformed after a common type. This common 'Traditional' type Bengel called 'Byzantine.' It is the same as that which Dr. Hort calls 'Syrian' and some modern scholars 'Antiochian.'

It is interesting to notice that there is now no controversy as to the fact of this transformation.* The only question at issue is the significance to be attached to it. Mr. Miller contends that the triumph of the Traditional Text was due to the fact that it was already widely diffused at the beginning of the period in documents of such excellence, and so highly accredited, that it simply crushed all rivals out of existence.

12. This contention clearly demands careful examination. In order that the investigation may be as precise as possible, it will be well to deline the field which it is proposed to explore. As Mr. Miller's language (e.g. Preface to *Oxford Debate*, p. xiv) is quite general, all periods may be assumed to come alike to him. Let us take, then, the period between the Council of Constantinople in 381 and the Council of Chalcedon in 450. It is the latest that we can choose that will give evidence which can in any real sense be said to speak with the voice of the whole Eastern Church. During this period the development of Christian thought was determined by influences emanating from three main centres: from Alexandria, fresh from the triumph over Arianism, which Athanasius had done so much single-handed to secure; from Antioch; and from the Church which ecclesiastically was the daughter of Antioch, from Constantinople. Of these three centres it is not, the present writer thinks, too much to say that Alexandria never accepted the Traditional Text. The date of the Bohairic Version must, we suppose, still be regarded as uncertain. If, as seems to be at present the verdict of the most competent Coptic scholars, it is to be assigned to cent. iv or v, it would give us exactly the evidence that we need as to the state of the text officially recognized in Egypt either at the beginning or at some point in the course of our period. The Bohairic constantly sides with κ and B against the Traditional Text.

Nor does this evidence stand alone. The same type of text † is found in the two great Alexandrian writers of this period, Didymus (†394) and Cyril (†444). Further evidence on this point will, no doubt, come to light with the progress of Egyptian exploration. It is too soon as yet to summarize the evidence of the papyri.‡ Here, then, at the outset, the boasted 'universality' breaks down. On textual matters, as the earliest nomenclature for describing the 'families' of readings might have warned us to expect, there was a permanent distinction between Constantinople and Alexandria.

13. Nor is this all. Jerome's revision of the Old Latin Versions was made at Rome c. 382 by the aid of the Greek MSS which he judged most trustworthy. It is true, as Nestle says (*Textual Criticism*, p. 124), that it is not yet clearly made out

131), a forecast only less brilliant than that which was verified by the discovery of the Curetonian and Sinaitic Syriac.

* See Miller's *Text. Cont.* p. 29: 'Thenceforward [from the end of the 4th cent.] till the 19th [† 18th] cent. was far advanced if [the Traditional Text] reigned without a rival, though perhaps the thorough establishment of it did not take effect till the beginning of the 8th century.'

† See Hort, p. 650 of WH Text, smaller ed.

‡ Yet see Burkitt's Introduction to Barnard's *Biblical Text of Clement*, p. viii ff.

what these MSS were. But it is remarkable that the latest editors of the Vulgate have seen reasons to infer for them a close kinship with κ and B.* At any rate, Jerome had not been taught by his stay in the East to believe in the exclusive validity of the Traditional Text.

14. The other two centres, Antioch and Constantinople, resolve themselves into one, at least in the person of Chrysostom, the most prominent representative of the Imperial city. Here, no doubt, we do find clear evidence of the coming supremacy of the Traditional Text. But even here the agreement is by no means as complete as it might appear to a casual observer. Each writer, even of those connected with these centres, has his own degree of approximation to the Traditional Text, and can be identified by his readings.

The fact to which we allude is in itself so striking an evidence both of the phenomenon to which we wish to call attention, and of the insight of the scholar who alone in our generation seems to have mastered the textual problems presented by Patristic citations, that we venture to transcribe in full the account which Dr. Hort gave of the steps by which he was led to the discovery of the lost commentaries of Theodore of Mopsuestia. He is referring to commentaries in Latin on ten of St. Paul's Epistles contained in a Corbey MS to which Pitra had recently called attention, claiming their authorship for Hilary of Poitiers. He writes (*Journal of Classical and Sacred Philology*, No. xii., Feb. 1860, p. 303 f.) as follows:—

'What led me to the true authorship was, first, the character of the text used in the quotations; and, secondly, two passages on Gal 4^{24, 29}, referred to by Pitra among the "splendiora, quibus sibi haud impar identidem Hilarius emicat." St. Hilary employs, as is well known, a tolerably pure form of the Old Latin version of the NT: the text of the commentary is distinctively Greek of a late and bad type. No Father using any known Latin text could have so written; it contains many corruptions not found in the very worst copies of the Vulgate, much less in earlier versions. It is too corrupt in its character for any considerable Greek Father even of cent. iv, except those connected with the Syrian school, and, among them, a shade too bad for St. Chrysostom or Theodoret. These facts considerably narrowed the question of authorship. And when, in commenting on the passages of Galatians, the author showed himself a vehement opponent of allegorical interpretation, it was easy to see that he must have been a literalist of too decided a character to be unknown,—in fact could not well be any other than Theodore himself, the chief of the literalists, or his brother Polychronius. Reference to a catena at once put an end to all speculation; the Greek fragments of Theodore appeared in the Latin along with their lost context.'

15. Now, if Alexandria persistently rejected the Traditional Text, if Jerome came back from the East convinced of the excellence of the MSS that least resembled it, if there are marked differences during this period even between individual members of the Antiochene-Constantinopolitan school, it is difficult to know where to look for evidence of the universal, not to say exclusive, predominance of the Traditional Text in cent. v. Even the Peshitta, which Mr. Gwilliam† believes, and no doubt rightly (*Oxford Debate*, p. 32), that he can trace back with minute accuracy to the shape which it possessed in this same cent. v, is very far from affording that undivided support which Mr. Miller desiderates; a fact which perhaps accounts for the coldness with which he receives a statement that used to be regarded almost as a commonplace—to wit, that 'the Syrian Version is the sheet-anchor of the Traditionalist position.' We are not sure that he would have been pleased with the suggestion, for which nevertheless there is something to be said, that Theodore of Mopsuestia should be promoted to the place left vacant by the Peshitta.

16. These, however, are matters of minor import-

ance. It has all along been admitted that the Traditional Text was in existence in substantially its present form by the middle of the fourth century. The really vital point is to determine whether there is any evidence of its existence in the preceding period. On this point Dr. Hort 20 years ago made a statement, which was precise and definite enough, one might have thought, to ensure patient and attentive consideration on the part of those whose whole system must fall to the ground if the position laid down in it should prove to be well founded. His words are these (*Introduction*, p. 114, § 162): 'Before the middle of the third century, at the very earliest, we have no historical signs of the existence of readings, conflated or other, that are marked as distinctively Syrian by the want of attestation from groups of documents which have preserved the other ancient forms of text.' For the identification of the readings referred to, full directions are given in §§ 225 f., 343. And any one who chose to take the trouble could make out lists of them for himself and test the accuracy of the contention. Mr. Miller refuses to take this method of attempting to understand the position of his opponent. He prefers a method which is not a little surprising in a writer who lays such stress on the importance of sound logic. His words (p. xv, Preface to *Oxford Debate*) are as follows:—

'We entirely traverse the assertion, that "no distinctly (*sic*) Syrian (i.e. Traditional) readings" are found amongst the earliest Fathers. Very many of the readings in the Traditional Text which are rejected by the other school are supported by those Fathers: and there is no evidence, as we maintain, to show that they pertain to the other side or to any other Text rather than to us, or that readings confessedly old and found in the Traditional Text did not belong to that Text.'

In other words, 'we entirely traverse' a statement, which has express reference to one element in the Traditional Text, by asserting propositions which have never been denied with regard to the other elements which on any hypothesis are recognizable in its composition. It would have been simpler to deny altogether the existence of 'distinctively Syrian readings' as defined by Dr. Hort. That at least is a question which can be brought to a definite issue. On that point the *Apparatus Criticus* will be recognized as an impartial arbiter.

17. Let us, then, examine the facts for ourselves. It is clear that in this article we shall have to limit ourselves to illustrative specimens, as an example of a method which any one can learn to apply for himself to any part of the NT that he chooses. At the same time it is important for the right understanding of the method, that it should be seen in application to continuous portions of the text—and not in isolated examples chosen because they possess special features of interest or importance. The weight of authorities in cases of primary importance can be learnt only by patient attention to details which in themselves may seem absurdly trivial and insignificant.

We propose therefore to set forth and to examine first a list of all the readings which have a claim to be regarded as distinctively Syrian in 1 Timothy, and then to attempt a more comprehensive analysis of all the variants in Mk 1¹⁻²⁰. It is true that the ultimate decision of the true text in the Pastoral Epistles is less secure than it is in the case of most of the books of the NT, owing to the absence not only of B, but also of any demonstrably early Latin or Syriac evidence—apart from the isolated quotations in Cyprian; but these considerations will not seriously affect the identification of 'distinctively Syrian readings,' and the specimen chosen has the advantage of enabling us to study the influence of similar but not identical contexts on one another in a way that may throw light on a class of readings that meet us constantly in the Synoptic Gospels.

* Wordsworth and White, *N.T. Latine Epilogus*, cap. vi. 'De regulis a nobis in Textu constituendo adhibitis.'

† Mr. Burdett's essay (*Texts and Studies*, vii. 2) goes far to prove that the Peshitta is in fact a revision made in this century.

18. The first step is to collect all the readings supported by the mass of later documents without the support of any of the five leading uncials \aleph ACD₂G₂.

- (1) 1 Ti 1²— $\eta\mu\omega\nu$ (after $\pi\alpha\tau\rho\acute{o}s$) \aleph^* AD₂*G₂ cu⁴ Lat-vg Boh Go Arm: Orig^{int}.
+ ϵ c. rell. Syrr Sah \mathcal{A} eth: Chr, etc.
See v. 1, and note similar addition in 2 Ti 1³, Tit 1⁴, 1 Th 1¹.

It forms part of the true text in all the other Pauline salutations except Galatians.

- (2) 1 Ti 1⁴ (a) $\omicron\kappa\omicron\nu\omicron\mu\iota\alpha\nu$, \aleph AG₂K₂L₂P₂, most cursives Arm Boh: Chr, etc.

(b) $\omicron\kappa\omicron\delta\omicron\mu\omicron\eta\nu$, D₂* Iren Lat-vg Go Syr.

(c) $\omicron\kappa\omicron\delta\omicron\mu\omicron\iota\alpha\nu$, ϵ^* D₂* and a few cursives.

Note characteristic Pauline use of $\omicron\kappa\omicron\nu\omicron\mu\iota\alpha\nu$; cf. Eph 3².

$\omicron\kappa\omicron\delta\omicron\mu\omicron\iota\alpha\nu$ (not found elsewhere in Gr. Bible) combines the sound of (a) with the sense of (b).

- (3) 1 Ti 1⁹ $\pi\alpha\tau\rho\omicron$ - $\mu\eta\tau\rho\lambda\acute{\omicron}\phi\alpha\iota\varsigma$, \aleph AD₂G₂ (P₂) (K₂) 17 37 137.

$\pi\alpha\tau\rho\omicron$ - $\mu\eta\tau\rho\lambda\acute{\omicron}\phi\alpha\iota\varsigma$, ϵ c. rell.

The spelling $\pi\alpha\tau\rho\omicron$ - is due to a false analogy; but the question we have to settle is not which spelling is right in itself, but which St. Paul is most likely to have used.

- (4) 1 Ti 1¹³ $\tau\acute{o}$ $\pi\rho\acute{o}\tau\epsilon\rho\omicron\nu$ $\delta\upsilon\tau\alpha$, \aleph AD₂*G₂P₂ cu⁷: Chr $\mu\alpha\sigma\epsilon$ 1 Cyr.

$\tau\acute{o}\nu$ $\pi\rho\acute{o}\tau\epsilon\rho\omicron\nu$ $\delta\upsilon\tau\alpha$, ϵ c. rell. Lat-vg: Chr, etc.
Here the neuter is clearly the more idiomatic.

- (5) 1 Ti 1¹⁷ $\mu\acute{o}\nu\omega$ $\theta\epsilon\acute{\omega}$, \aleph^* AD₂*G₂ cu³ Lat-vg Syr-lr Boh Sah Arm \mathcal{A} eth: Eus Cyr Chr $\omega\mu$ Tert.
 $\mu\acute{o}\nu\omega$ $\sigma\omicron\phi\acute{\omega}$ $\theta\epsilon\acute{\omega}$, ϵ c. rell. Go Syr-hcl: Chr $\tau\alpha\iota$ $\nu\alpha\iota$ $\omega\mu$, etc.

Cf. Ro 16²⁷ where $\sigma\omicron\phi\acute{\omega}$ has point, cf. 11²³; and note similar insertion in Jude 2⁵.

- (6) 1 Ti 2⁹ $\omega\sigma\alpha\iota\tau\omega\varsigma$ $\gamma\upsilon\nu\alpha\iota\kappa\alpha\varsigma$, \aleph^* AP₂(D₂*G₂ add $\kappa\alpha\iota$): (Clem) (Orig).

$\omega\sigma\alpha\iota\tau\omega\varsigma$ $\kappa\alpha\iota$ $\tau\alpha\varsigma$ $\gamma\upsilon\nu$., ϵ c. D₂* b. ω rel: Chr.

Cf. v.l. in 1 P 3¹, and note neighbourhood of $\tau\omicron\upsilon\varsigma$ $\delta\upsilon\delta\rho\alpha\varsigma$.

- (7) 1 Ti 2⁹ $\acute{\epsilon}\nu$ $\pi\lambda\acute{\epsilon}\gamma\mu\alpha\sigma\iota\nu$ $\kappa\alpha\iota$ $\chi\rho\upsilon\sigma\acute{\omega}$ η $\mu\alpha\rho$., \aleph AD₂*G₂ Syr-vg Boh: Orig $\frac{1}{2}$.

$\acute{\epsilon}\nu$ $\pi\lambda\acute{\epsilon}\gamma\mu\alpha\sigma\iota\nu$ η $\chi\rho\upsilon\sigma\acute{\omega}$ η $\mu\alpha\rho$., ϵ c. rell. (exc. P₂a¹) f m Lat-vg Syr-hcl Go Sah: Clem Orig $\frac{1}{2}$ Cyr Chr.

The combined evidence of Versions and Fathers, if the details may be trusted, proves that this variant is pre-Syrian. It is possibly Alexandrian.

Cf. v.l. in 1 P 3². There seems to be a point in the distinction between the treatment of the hair and of the jewels.

- (8) 1 Ti 2¹² $\delta\iota\delta\acute{\alpha}\sigma\kappa\epsilon\iota\nu$ $\delta\epsilon$ $\gamma\upsilon\nu\alpha\iota\kappa\iota$, \aleph AD₂G₂P cu¹¹ Lat-vg Arm: Orig Cyr.

$\gamma\upsilon\nu\alpha\iota\kappa\iota$ $\delta\epsilon$ $\delta\iota\delta\acute{\alpha}\sigma\kappa\epsilon\iota\nu$, ϵ c. rell. Syrr (Boh) Sah: Chr.

The emphasis clearly lies on $\delta\iota\delta\acute{\alpha}\sigma\kappa\epsilon\iota\nu$.

- (9) 1 Ti 2¹⁴ $\acute{\epsilon}\xi\alpha\pi\alpha\tau\eta\theta\epsilon\iota\sigma\alpha$, \aleph^* AD₂*G₂P₂ cu¹¹: Chr $\frac{1}{2}$. $\acute{\alpha}\pi\alpha\tau\eta\theta\epsilon\iota\sigma\alpha$, ϵ c. rell: Chr $\frac{1}{2}$.

$\acute{\epsilon}\xi\alpha\pi$. Pauline, cf. 2 Co 11². $\acute{\alpha}\pi\alpha\tau$. has come in from context.

- (10*) 1 Ti 3³— $\mu\eta$ $\alpha\lambda\sigma\chi\rho\omicron\kappa\epsilon\rho\theta\acute{\eta}$, \aleph AD₂G₂KLP cu²⁷ verss: Orig^{int} Tert Chr.
+ ϵ c. rell. Syr-hcl-mg.

Insertion from v. 5, Ti 1⁷; cf. Ti 1¹¹, 1 P 5². Here superfluous, see $\acute{\alpha}\phi\iota\lambda\acute{\alpha}\rho\gamma\upsilon\rho\omicron\nu$.

- (11) 1 Ti 3¹⁶ $\delta\epsilon$ $\acute{\epsilon}\phi\alpha\nu\epsilon\rho\acute{\omega}\theta\eta$, \aleph^* A²C²F₂G₂ cu³ Boh Sah Syr-hcl-mg: Orig^{int}.

δ $\acute{\epsilon}\phi\alpha\nu\epsilon\rho\acute{\omega}\theta\eta$, D₂* Lat-vg Syr-vg-hcl Arm.

$\delta\tau\epsilon$ $\acute{\epsilon}\phi\alpha\nu\epsilon\rho\acute{\omega}\theta\eta$, ϵ c. \aleph^* C²D₂*KLP rell.

F₂ is quoted here, though the present writer does not believe that it has any authority independent of G₂, because it is sometimes quoted wrongly in support of $\theta\epsilon\acute{o}\varsigma$. The line above ϵ is not horizontal, and corresponds exactly to the line which elsewhere indicates a rough breathing in this MS. There is no trace of a sagitta in the ϵ .

On this reading see Hort, Appendix, p. 132 ff.

Note especially the evidence of the Versions.

- (12) 1 Ti 4¹² $\acute{\epsilon}\nu$ $\acute{\alpha}\gamma\acute{\alpha}\pi\eta$ λ $\acute{\epsilon}\nu$ $\pi\iota\sigma\tau\epsilon\iota$, \aleph ACD₂G₂ cu⁹ verss: Clem Chr.

$\acute{\epsilon}\nu$ $\acute{\alpha}\gamma$. $\acute{\epsilon}\nu$ $\pi\upsilon\epsilon\upsilon\mu\alpha\tau\iota$ $\acute{\epsilon}\nu$ π ., ϵ c. rell.

Insertion awkward; 1 Co 4²¹, 2 Co 6⁶ no parallels. Prob. from Col 1⁸.

- (13) 1 Ti 4¹⁵ $\phi\alpha\nu\epsilon\rho\acute{\alpha}$ η $\pi\acute{\alpha}\sigma\iota\nu$, \aleph ACD₂*G₂ cu³ verss. $\phi\alpha\nu$. η $\acute{\epsilon}\nu$ π ., ϵ c. rell: Chr.

Cf. Ac 4¹⁶.

- (14*) 1 Ti 5⁴ $\acute{\alpha}\nu\omicron\delta\epsilon\kappa\tau\acute{o}\nu$, \aleph ACD₂G₂KLP cu¹ Lat-vg Syrr \mathcal{A} eth: Chr.

$\kappa\alpha\lambda\acute{o}\nu$ $\kappa\alpha\iota$ $\acute{\alpha}$., ϵ c. rell. incl. Boh Go Arm.

Insertion from 2³. The only other instance of $\acute{\alpha}\nu\omicron\delta$ in NT.

- (15) 1 Ti 5²¹ $\Sigma\chi\rho\iota\sigma\tau\omicron\upsilon$ $\text{'}\text{I}\eta\sigma\omicron\upsilon$, \aleph AD₂*G₂ cu³ Lat-vg Boh Sah Arm \mathcal{A} eth: Clem Ath.

$\kappa\upsilon\rho\iota\omicron\upsilon$ $\text{'}\text{I. X.}$, ϵ c. rell. Syrr Go: Chr.

Cf. 2 Ti 4¹. Fuller titles characteristic of later MSS.

- (16) 1 Ti 5²⁵ $\tau\acute{\alpha}$ $\acute{\epsilon}\rho\gamma\alpha$ $\tau\acute{\alpha}$ $\kappa\alpha\lambda\acute{\alpha}$, \aleph AD₂G₂P₂ cu³.

$\tau\acute{\alpha}$ $\kappa\alpha\lambda\acute{\alpha}$ $\acute{\epsilon}\rho\gamma\alpha$, ϵ c. rell: Chr.

Perhaps from Mt 5¹⁶, note $\omicron\upsilon$ $\delta\upsilon\nu\alpha\tau\alpha\iota$ $\kappa\rho\upsilon\beta\eta\nu\alpha\iota$ v. 14.

- (17) 1 Ti 5²⁵ (a) $\pi\rho\acute{o}\delta\eta\lambda\alpha$, \aleph A 67².

(b) $\pi\rho$. $\acute{\epsilon}\iota\sigma\iota$, D₂G₂P₂ cu¹.

(c) $\pi\rho$. $\acute{\epsilon}\sigma\tau\iota$., ϵ c. rell: Chr.

Here (b) and (c) are insertions of a common type. (c) apparently a correction of (b) to bring it into agreement with classical rules; cf. 2 Ti 4¹⁷.

The plural is by no means uncommon in later Greek.

- (18*) 1 Ti 6⁵ $\delta\iota\alpha\pi\alpha\rho\alpha\tau\rho\iota\beta\alpha\iota$, \aleph AD₂G₂L₂P₂, etc.: Clem Chr.

$\pi\alpha\rho\alpha\delta\iota\alpha\tau\rho\iota\beta\alpha\iota$, ϵ 'not many cursives.'

$\delta\iota\alpha\pi\alpha\rho\alpha$ —in itself a rarer form of compound—is much more vigorous, connoting an intensified form of $\pi\alpha\rho\alpha\tau\rho\iota\beta\eta$, 'friction' or 'collision.'

- [19] 1 Ti 6⁶— $\acute{\alpha}\phi\iota\sigma\tau\alpha\sigma\omicron$ $\acute{\alpha}\nu\omicron$ $\tau\acute{\omega}\nu$ $\tau\omicron\iota\omicron\upsilon\tau\omega\nu$, \aleph AD₂G₂ cu³ Lat-vg Boh Sah Go \mathcal{A} eth.

+ ϵ c. rell. incl. Syrr Arm: Chr; cf. Cyr.

An insertion, of an unusually bold type for this form of text, to complete a misunderstood construction. The evidence of Cyprian shows that it is not purely 'Syrian.' It is of a Western type.

- (20) 1 Ti 6⁷ (a) $\delta\tau\iota$ $\omicron\upsilon\delta\epsilon$ $\acute{\epsilon}\xi$., \aleph^* AG₂ 17 (Lat-vg-codd) r Sah Boh Arm: Ath.

(b) $\acute{\alpha}\lambda\theta\epsilon\varsigma$ $\delta\tau\iota$ \omicron . $\acute{\epsilon}$., D₂* m Go: Cyr al. aliter.

(c) $\delta\eta\lambda\omicron\nu$ $\delta\tau\iota$ \omicron . $\acute{\epsilon}$., ϵ c. \aleph^* D₂*K₂L₂P₂: Chr.

(b) and (c) are independent attempts to mend (a).

See Hort, Appendix, p. 134. He conjectures that the true reading is simply $\omicron\upsilon\delta\epsilon$ $\acute{\epsilon}\xi$. This is found in Arm Cyr. Cyprian also seems to omit $\delta\tau\iota$.

- (21*) 1 Ti 6¹³ $\acute{\epsilon}\iota\varsigma$ $\eta\nu$ $\acute{\epsilon}\kappa\lambda\acute{\eta}\theta\eta\varsigma$. All uncials, many cursives, all versions (exc. Syr-hcl): Chr.

$\acute{\epsilon}\iota\varsigma$ $\eta\nu$ $\kappa\alpha\iota$ $\acute{\epsilon}$., ϵ c. rell.

An echo of Col 3¹⁵.

- (22) 1 Ti 6¹⁷ $\acute{\alpha}\lambda\lambda'$ $\acute{\epsilon}\pi\iota$ $\theta\epsilon\acute{\omega}$ (or $\tau\eta$ $\theta\epsilon\acute{\omega}$), \aleph AD₂*G₂P₂ cu¹³: Orig Chr.

δλλ' ἐν τῷ θ., ε c. rell.

It seems difficult to find a clear case of ἐλπ. ἐν in NT. Certainly not Ph 2¹⁹, and 1 Co 15¹⁹ is more than doubtful.

ἐπὶ is found regularly, e.g. 1 Jn 3³, 1 Ti 4¹⁰, and in this verse.

- (23*) 1 Ti 6¹⁷ πάντα πλουσιως, all uncials exc. G, most cursives, all versions (exc. Æth): Orig Chr.

πλουσιως πάντα, ε Æth, not many cursives.

G₂ omits πάντα.

- (24) 1 Ti 6¹⁹ ὁντως, NAD₂*G₂ cu¹⁶ versas.

αλωνιον, ε c. rell. (37 'conflates' αλωνιον ὁντως): Chr.

αλωνιον is habitual with ζωης; cf. v. 12.

ὁντως is striking, and characteristic of this Ep.; cf. 5³. 5. 16.

- (25*) 1 Ti 6²⁰ παραθήκην, all uncials, most cursives: Clem Ign.

παρακαταθήκην, ε with many cursives: Hipp Chr.

παρακαταθ. is said to be the Attic form.

19. Here, then, are 25 readings which have a *prima facie* claim to be regarded as 'Syrian' or 'post-Syrian.' The criterion, as Dr. Hort warns us (§§ 324 f., 343), is not an infallible one. We need not be surprised, therefore, to find among them 2 readings (7 and 19) which are proved by Old Latin evidence to be pre-Syrian: we may therefore strike them out of our list. The whole 25 belong to the Received Text. How many of them Mr. Miller would assign to the Traditional Text it is impossible to say. No. 2, the support for which is infinitesimal, may be assumed to disappear. We shall therefore exclude it also from consideration. Nos. 10, 14, 18, 21, 23, 25 (which are distinguished above by an asterisk), when there is serious division among the cursives, must be regarded as at best uncertain. Dr. Hort would call them post-Syrian; it would be interesting to know how many of them Mr. Miller would class as 'post-Traditional.' In any case, they witness to a progressive deterioration in the text of the Epistle. We shall not, however, strike them out of the list, as their internal characteristics show a striking 'family likeness' to their predecessors. They may well be regarded as later results of the working of one and the same tendency. We shall, however, where possible, mark a distinction between them and the other readings. We have no wish to take an unfair advantage of the Traditional Text.

20. The first point that strikes us on a survey of the list as a whole is the triviality of by far the greater number of the examples. One (3) is a mere matter of spelling, (4, 6, 16) affect only an article, 3 (8, 16, 23*) relate to the order of words, 2 (13, 22) to prepositions, 3 (9, 18*, 25*) to different compounds of the same root, 4 (1, 17, 20, 21*) are quite trivial insertions; there are only 7—2 changes of words (11, 24) and 5 insertions (5, 10*, 12, 14*, 15)—which can be regarded as at all important. Of these, only 1 (11) can be supposed to affect any point of doctrine, and, as the Nicene Fathers managed to make shift without the reading of the Traditional Text, we need not be afraid to keep the demonstrably older reading.

21. The next point of interest is the distribution of support on the different sides on the part of Fathers and Versions.*

In the Patristic evidence the result is remarkable. Taking the whole number of passages (25), ante-Nicene evidence is quoted against the 'Syrian'

Text 18 times, and only once (25*—a reading in Hippolytus incapable of verification) in support of it. If we leave out the 6 doubtful examples, the numbers are 12 against, 0 for. Chrysostom's text shows a marked contrast. He is quoted in all on 20 of the passages. In the 6 doubtful cases he supports the ante-Nicene in 5. In the remaining 14 his authority is quoted on both sides in 3 cases (4, 5, 9). He supports the Traditional Text in 12 (or 9) cases, he opposes it in 2 (or 5).

Among Versions the results are as follows:—

Latin Vulg. supports the Trad. Text 1, opposes it 13 (9) times.

Bohairic	"	"	2 (1)	"	10 (7)	"
Sahidic	"	"	1	"	10 (7)	"
Syriac Vulg.	"	"	3	"	8 (5)	"
Syriac	"	"	4	"	8 (4)	"
Harclean Syriac	"	"	1	"	10 (9)	"
Æthiopic	"	"	1 (0)	"	12 (9)	"
Armenian	"	"	4 (2)	"	6 (5)	"
Gothic	"	"		"		"

All the extant Versions are combined in 10*, 11, 12, 13, 23*, 24, in each case against the Received Text.

22. It remains to indicate briefly the character of the readings of the Traditional Text. Clearly, its most noteworthy feature is its fulness. In one case (16) it errs by defect, it drops one article out of two, while it contains 9 (6) additions. The most potent factor in this expansion of the text is, without doubt, the tendency to assimilate cognate passages. A second feature we may fairly describe as general weakness. In no single case has any of the editors collated by Nestle in his Stuttgart edition accepted any of those distinctively Traditional readings.

The net result of our examination may, we think, be fairly stated as follows: There is a demonstrably late element in the Traditional Text of 1 Tim.; the readings, which may fairly be regarded as distinctive of it, in which it is unsupported by any member of the numerically insignificant group NACD₂G₂, are both weak in themselves and can very rarely be traced back historically into ante-Nicene times, and then they seem to belong also to other types of text.

23. We pass* now to our second specimen passage, Mk 11²²⁻²³.

This time—as we wish to study the whole structure of the Traditional Text, and not merely to sift out 'distinctively Syrian' readings—we must begin by printing the verses at length, marking as clearly as the typographical means at our disposal will allow, the relation in which this text stands to the other types of text out of which, on the Critical hypothesis, it was constructed. In one case (v. 16) where 'the verdict of the MSS' seemed decisive, we have ventured to print as 'traditional' a reading which is not found in the Received Text. Otherwise, the text printed here agrees with that which Scrivener edited for the Cambridge University Press as representing the Greek Text that may be presumed to underlie the AV.

[In the form of the extract the following points should be noticed: Words in ordinary type, and undistinguished by any signs above or below them, are common to all forms of text alike; words in heavy type belong to readings which, either in particular words or in arrangement or combination of words, may be regarded as 'distinctively Syrian,' because as they stand they agree exactly with no other form of text.

The relation in which the text as a whole stands to the 'Western' Text is indicated by continuous lines. These lines are drawn under the word

* We have taken the evidence from Tischendorf and Tregelles. We have not thought it worth while to subject the whole to an independent verification. The Patristic evidence includes, it will be noticed, all the ante-Nicene quotations, together with the quotations in Chrysostom.

* A careful collation of the readings of 1 and the MSS related to it in Mk 1 has just been published by Mr. Lake in *Cambridge Texts and Studies*. It contains a few variants which have not been noticed above, notably λωα for δισμα in v. 14.

when the Traditional Text has accepted, above the word when it has rejected, a 'Western' reading. Its relation to the 'Alexandrian' Text is similarly indicated by spaced lines.

In a few cases, where it is desired to call attention to some evidence for or against a reading of the Traditional Text, though the authorities cannot be assigned with certainty to any of these types, the words affected are indicated on the same principle by a row of dots.

The 'Neutral' Text may be assumed to be at variance with the Traditional Text in all cases where words are underscored; all the other words in ordinary type are supported by it. Slight differences in form and spelling have in this case been neglected].

1^a Ἀρχὴ τοῦ εὐαγγελίου Ἰησοῦ Χριστοῦ υἱοῦ τοῦ θεοῦ.
 2^a ὡς γέγραπται ἐν τοῖς προφήταις· Ἰδοὺ ἐγὼ ἀποστέλλω
 τὸν ἄγγελόν μου πρὸ προσώπου σου, ὃς κατασκευάσει
 τὴν ὁδὸν σου ἔμπροσθέν σου· 3^a φωνὴ βοῶντος ἐν τῇ
 ἐρήμῳ, Ἑτοιμάσατε τὴν ὁδὸν Κυρίου, εὐθείας ποιεῖτε τὰς
 τρίβους αὐτοῦ. 4^a Ἐγένετο Ἰωάννης ὁ βαπτίζων ἐν τῇ
 ἐρήμῳ καὶ κηρύσσειν βάπτισμα μετανοίας εἰς ἄφεσιν
 ἁμαρτιῶν. 5^a καὶ ἐξεπορεύετο πρὸς αὐτὸν πᾶσα ἡ Ἰουδαία
 χώρα καὶ οἱ Ἱεροσολυμίται· 6^a καὶ ἐβαπτίζοντο πάντες
 ἐν τῷ Ἰορδάνῃ ποτάμῳ ὑπ' αὐτοῦ, ἐξομολογούμενοι τὰς
 ἁμαρτίας αὐτῶν. 7^a Ἦν δὲ ὁ Ἰωάννης ἐνδεδυμένος τρίχας
 καμήλου, καὶ ζώνην δερματίνην περὶ τὴν ὀσφίν αὐτοῦ καὶ
 ἐσθίων ἀκρίδας καὶ μέλι ἄγριον. 8^a Καὶ ἐκήρυσσε λέγων
 Ἐρχεται ὁ ἰσχυρότερός μου ὀπίσω μου, οὗ οὐκ εἰμὶ ἱκανὸς
 κοῦψας λῦσαι τὸν ἱμᾶντα τῷ υποδημάτων αὐτοῦ. 9^a ἐγὼ μὲν
 ἐβάπτισα ὑμᾶς ἐν ὕδατι· αὐτὸς δὲ βαπτίσει ἐν Πνεύματι
 Ἁγίῳ.
 10^a Καὶ ἐγένετο ἐν ἐκείναις ταῖς ἡμέραις ἦλθεν ὁ Ἰησοῦς
 ἀπὸ Ναζαρέτ τῆς Γαλιλαίας, καὶ ἐβαπτίσθη ὑπὸ Ἰωάννου
 εἰς τὸν Ἰορδάνην. 11^a καὶ εὐθέως ἀναβαίνων ἀπὸ τοῦ
 ὕδατος εἶδε σχιζομένους τοὺς οὐρανοὺς, καὶ τὸ Πνεῦμα ὡς
 περιστερὰν καταβαίνον ἐπ' αὐτόν. 12^a καὶ φωνὴ ἐγένετο
 ἐκ τῶν οὐρανῶν· Σὺ εἶ ὁ υἱὸς μου ὁ ἀγαπητός, ἐν ᾧ
 εὐδόκησα. 13^a Καὶ εὐθέως τὸ Πνεῦμα ἦν αὐτὸν ἐκβάλλει εἰς τὴν
 ἐρήμον. 14^a καὶ ἦν ἐκεῖ ἐν τῇ ἐρήμῳ ἡμέρας τεσσαράκοντα
 πειραζόμενος ὑπὸ τοῦ Σατανᾶ, καὶ ἦν μετὰ τῶν θηρίων·
 καὶ οἱ ἄγγελοι διηκόνουν αὐτῷ. 15^a Μετὰ δὲ τὸ παραδοθῆναι τὸν Ἰωάννην ἦλθεν ὁ
 Ἰησοῦς εἰς τὴν Γαλιλαίαν κηρύσσειν τὸ εὐαγγέλιον τῆς
 βασιλείας τοῦ θεοῦ, 16^a καὶ λέγων, Ὅτι πεπλήρωται ὁ
 καιρὸς καὶ ἤγγικεν ἡ βασιλεία τοῦ θεοῦ· μετανοεῖτε καὶ
 πιστεύετε ἐν τῷ εὐαγγελίῳ. 17^a περιπατῶν δὲ παρὰ τὴν
 θαλάσσαν τῆς Γαλιλαίας εἶδεν ὁ Σίμων καὶ Ἀνδρέαν τὸν
 ἀδελφὸν αὐτοῦ τοῦ Σίμωνος βάλλοντας ἀμφίβλησ-
 τρον ἐν τῇ θαλάσσῃ· ἦσαν γὰρ ἀλιεῖς. 18^a καὶ εἶπεν
 αὐτοῖς ὁ Ἰησοῦς, Δεῖτε ὀπίσω μου, καὶ ποιήσω ὑμᾶς
 γενέσθαι ἀλιεῖς ἀνθρώπων. 19^a καὶ εὐθέως ἀφέντες τὰ
 δίκτυα αὐτῶν ἠκολούθησαν αὐτῷ. 20^a Καὶ πρὸς ἐκεῖθεν

ἀλγίον εἶδεν Ἰάκωβον τὸν τοῦ Ζεβεδαίου καὶ Ἰωάννην
 τὸν ἀδελφὸν αὐτοῦ καὶ αὐτοὺς ἐν τῷ πλοίῳ καταρτίζοντας
 τὰ δίκτυα. 21^a καὶ εὐθέως ἐκάλεσεν αὐτούς· καὶ ἀφέντες
 τὸν πατέρα αὐτῶν Ζεβεδαίου ἐν τῷ πλοίῳ μετὰ τῶν
 μισθωτῶν ἀπῆλθον ὀπίσω αὐτοῦ.

21^a Καὶ εἰσπορεύονται εἰς Καπερναοὺμ· καὶ εὐθέως τοῖς
 σάρβασιν εἰσελθὼν εἰς τὴν συναγωγὴν ἐδίδασκεν ἃ.
 22^a καὶ ἐξεπλήσσοντο ἐπὶ τῇ διδαχῇ αὐτοῦ· ἦν γὰρ διδά-
 σκων αὐτοὺς ὡς ἐξουσίαν ἔχων, καὶ οὐχ ὡς οἱ γραμματεῖς.
 23^a καὶ ἦν ἐν τῇ συναγωγῇ αὐτῶν ἄνθρωπος ἐν πνεύματι
 ἀκαθάρτῳ, 24^a καὶ ἀνέκραξε λέγων, Ἐὰν τί ἡμῖν καὶ σοί,
 Ἰησοῦ Ναζαρηνέ; ἡθες ἀπολέσαι ἡμᾶς; Οἶδά σε τίς εἶ,
 ὁ ἅγιος τοῦ Θεοῦ. 25^a καὶ ἐπετίμησεν αὐτῷ ὁ Ἰησοῦς
 λέγων, Φιμώθητι καὶ ἐξελθε ἐξ αὐτοῦ ἃ. 26^a καὶ σπαράξαν
 αὐτὸν τὸ πνεῦμα τὸ ἀκάθαρτον ἃ καὶ κράξαν φωνῇ
 μεγάλη ἐξῆλθεν ἐξ αὐτοῦ. 27^a καὶ ἐθαμβήθησαν πάντες
 ὥστε συζητεῖν πρὸς αὐτοὺς λέγοντας, Τί ἐστὶν τοῦτο;
 τίς ἡ διδαχὴ ἢ ἡ καινὴ αὕτη, ὅτι κατ' ἐξουσίαν καὶ
 τοῖς πνεύμασιν τοῖς ἀκαθάρτοις ἐπιτάσσει καὶ ὑπακούουσιν
 αὐτῷ; 28^a ἐξῆλθε δὲ ἡ ἀκοὴ αὐτοῦ εὐθὺς ἃ εἰς ὅλην τὴν
 περίχωρον τῆς Γαλιλαίας.

 and LXX of Mal. the phrase is found
 here, but not after ἄγγ. μου.

V.³ αὐτοῦ, N^aBLΔ rell f¹ g¹ l q Syr-vg-hcl-txt
 Boh Arm Æth: Orig.
 τοῦ θεοῦ ἡμῶν, (D) (34¹⁴) a b c f f² g² Syr.

hel-mg Go: Iren^{int} (D 34^{ms} υμων). Assimilation to Isaiah, LXX and Heb.; found also in Latin and Syriac texts, Mt., Lk.

V.⁴ (a) δ βαπτίζων ἐν τῇ ἐρήμῳ κηρύσσων, B 33.

(b) δ βαπτίζων ἐν τῇ ἐρήμῳ καὶ κηρύσσων, NLA Boh.

(c) ἐν τῇ ἐρήμῳ βαπτίζων καὶ κηρύσσων, D 28 Latt (exc. f) Syr-vg.

(d) βαπτίζων ἐν τῇ ἐρήμῳ καὶ κηρύσσων, A rell f Syr-hel.

The clue to the readings here, as the present writer finds hinted in a MS note of Dr. Hort's, lies in Mark's use of ἰω. δ βαπτίζων (6¹⁴ 24, not 8²⁸; yet see 28 2²⁰) as a title for the Baptist. The original reading is: (a) = 'John the Baptizer appeared in the wilderness preaching.' (b) is an Alexandrian emendation, the Marcan idiom not being recognized, and the article causing difficulty in consequence = 'There appeared John who used to baptize in the wilderness and preach.' (c) shows the Western handling of the difficulty, dropping the troublesome article, inserting καὶ, and, because the wilderness was a strange place to be specially connected with the baptisms, transposing the words. (d) is 'distinctively Syrian,' and conflates (b) and (c), keeping the order of (b) and dropping the article with (c). This is a first-rate example of the excellence of B in Ternary Variations. The connecting particle with ἐγένετο in N* and Boh should be noticed. It could preclude the conn. of vv.¹ and ⁴ which Orig *Joh* favours.

V.⁶ (a) πάντες after ἑρ., NBDLA 28 33 versions: Orig Eus.

after εἰσαπτ., AP rell (69 cu⁴ om. πάντες = Mt.).

(b) ποτάμῳ, om. D a b c f² Eus; cf. the 'Western' and 'Syrian' reading in Mt.

(c) ἐπ' αὐτοῦ after εἰσαπτ., NBL 33 Latt (exc. a) Arm: Orig Eus.

after ποτάμῳ, ADP rell a Syr-hel Go.

Note, further (d), that N 69 a om. καὶ before εἰσαπτ.

In (d) the omission was probably due to the idea that the subj. of ἐξεπορεύετο was complete at χώρα (cf. the post-Syrian ἐξεπορεύοντο). The result is a strange statement that the city folk took the lead in accepting baptism, which can hardly be historical.

The Syrian change of the position of πάντες may be a modified echo of this. It is more likely due to a misunderstanding of the characteristically Marcan indefiniteness of ἐβαπτίζοντο = 'men' were being baptized. πάντες with εἰσαπτ. is hyperbolical after a fashion to which Luke supplies parallels, not Mark.

In (b) and (c) notice once more how the Syrian Text combines the language of the 'Neutral' with the order of the 'Western' Text. The result is a close assimilation to Mt.

V.⁸ (1) καὶ ἦν, NBL 33.

ἦν δέ, AD²P rell.

Mark's resolute adherence to καὶ causes constant difficulty to scribes. At least 40 times δέ has been wrongly introduced into the Syrian Text; cf. vv.¹⁴ 16. 28 in this extract.

(2) δ ἰω., NBL unc³ cu²⁸.

-δ, ALA rell? assim. to v.⁴. Otherwise the tendency in these authorities, esp. D, is to insert articles before proper names. See vv.⁹ 14. 16. 28. 35.

(3) For τρίχας καμήλου D² reads δέρριν (= δέρριν) καμ., 'a' pellem and 'd' pīlos. δέρριν in LXX (of raiment) Jg 4¹⁸ 21, Zec 13⁴ only. In Zec 13⁴ δέρριν = ηἷμα, found also (Heb. not LXX) for Elijah's mantle in 1 K 19¹³ 19, 2 K 2⁸ 12¹.

This is remarkable, because the clause καὶ ζώνην δερμ. π.τ. δόφ. αὐτοῦ, omitted by D, is found exactly in 2 K 1⁸ in another description of Elijah. δέρριν (= the prophetic mantle) was probably regarded as a concise and picturesque equivalent for the whole phrase. But the man who introduced it must have known his Hebrew Bible and his LXX. Note that 'a,' which also omits καὶ ζώνην, κ.τ.λ., places v.⁸ after v.⁵.

V.⁷ ἔλεγεν αὐτοῖς for ἐκήρυσσεν λέγων, D (a). In 'a's' arrangement of the verses, αὐτοῖς has a point which is lost in D. In view of the rest of vv.⁷ 8 in D, it is safe to say that ἔλεγεν comes from Lk 3⁷ or Mt 3⁷. ἐκήρυσσεν is characteristic of Mk. (cf. e.g. 1³⁸ and Lk 4⁴³, 1⁴⁵ and Lk 5¹⁵, 6¹² and Lk 9⁶). It is curious that in these passages there should be no par. in Mt.). It has also point as resuming v.⁴.

Vv.⁷ 8 (1) D a (ff¹) read: Ἐγὼ μὲν ὑμᾶς βαπτίζω ἐν ὕδατι, ἔρχεται δὲ ὀπίσω μου ὁ ισχυρότερός μου οὐ οὐκ εἰμὶ ἱκανὸς λῦσαι τὸν ἰμάντα τῶν ὑποδημάτων αὐτοῦ· καὶ αὐτὸς ὑμᾶς βαπτίσει ἐν πνεύματι ἁγίῳ. Notice first the order of the clauses, natural in Lk 3¹⁶, which this reading reproduces almost *verbatim*, but weak in Mk., where there is no ref. in the context to popular surmises about John. Notice also the omission of the characteristic Marcan κύμας.

A clear case of assimilation in the 'Western' text.

(2) The Syrian text adopts μὲν from this text, or from Mt. and Lk. NBL 33 69 124 Orig om.; cf. Jn 1³⁰. μὲν rare, in Mk 4⁴ 9¹³ 12⁵ 14²¹. 28 only; cf. 10³⁸.

(3) Also ἐν 1^o against NBDH cu⁸. ἐν 2^o against BL b Lat-vg.

In Mt 3¹¹ Jn 1²⁶ 33 ἐν is found with both words without variant. In Ac 1⁵ ὅς, and ἐν πν. without variant. In Lk 3¹⁶ ὅς. (exc. D 1 13 69 al ἐν ὅς.) and ἐν πν. without variant. There seems, therefore, no tendency to omit ἐν where it is clearly genuine, even to balance phrases, e.g. Ac 1⁵. The tendency to insert from par. must have been very strong.

V.⁹ (1) ταῖς ἡμέραις ἐκείναις, DΔ Latt (exc. a c).

ἐκείνος never comes after ἡμέρα in Mk. without special emphasis.

Only in 13¹⁶. 32 14²⁵, all three eschatological passages.

(2) ὁ ἰησ., D²MFΔ 13 28 69 al. See on v.⁶.

(3) εἰς τὸν ἰορδ. ὑπὸ ἰωάν., NBDL cu¹⁵ (ἐν τῷ, 1-28, etc.) Latt (c f) Syr-vg Boh.

ὑπὸ ἰωάν. εἰς τὸν ἰορδ., AP rell c f Syr-hel Arm. Eth Go.

Notice the converse change in v.⁵. Here clearly the important fact is that the baptism was administered by John, not that it took place in the Jordan. ὑπὸ ἰω. is therefore rightly kept to the last.

V.¹⁰ (1) εὐθέως or εὐθύς, om. D a b.

A peculiarly difficult word for the textual critic in Mk., clearly characteristic, offending some scribes and some translators by its recurrence, at the same time always to hand when an adventurous scribe wished to 'improve' the story. We find ourselves therefore driven by sheer perplexity to take refuge in obedience to the one golden rule of sound criticism and to 'trust our MSS.' The result will show if our confidence is misplaced.

One point we can lay down at the outset. A close examination of the facts shows that the effect of Synoptic parallels on the text of Mk. must, so far as this word is concerned, have been uniformly towards omission: Mk 14⁴⁰ om. D 251 2²⁰ a c f² k q (Mt 26⁴⁰ 'non fluctuat') is the only possible exception.

The facts are interesting, and we may allow ourselves this one excursion into the field of Synoptic

criticism. Assuming the WH text as our standard, *εὐθὺς* occurs 40 times in Mark. In 29 of these there are parallel contexts in both Mt. and Lk., in 8 there is a parallel in Mt. only, in 2 in Lk. only, in 1 there is no parallel in either. In one case, 1²² = Mt 8³ = Lk 5¹², *εὐθ.* is found in all three Gospels. In none of the other 30 cases where Lk. has a parallel context is *εὐθ.* found: in 7 the whole phrase to which *εὐθ.* belongs in Mk. is transformed; in 17 *εὐθ.* is simply omitted; in 5 he substitutes *παρὰρῆμα*, in 1 *εἶτα*. Of the 37 places where Mt. presents a parallel, *εὐθ.* is retained in 12; in 8 the whole phrase, in 15 the word, disappears; in 2 *ἀπὸ τῆς ὥρας ἐκείνης* does duty as an equivalent. In one case Lk. (21⁹) = Mt 24⁶ = Mk 13⁷) substitutes *οὐκ εὐθὺς* for *οὐρα*.

Assuming, as it is probably worth while to do at present, that our Mk. was in the hands of both Mt. and Lk., the figures given above supply a good illustration of the delicate literary criticism to which Mark was subjected, esp. by Luke. This general result is not seriously affected by questions of text. In 6 places TR ins. where WH om., in 4 TR om. where WH ins. But it is worth notice that the 'Western' Text, esp. in D and in the various MSS of Lat-vet, shows a clear tendency to omit *εὐθ.* The chief passages are 1^{20.22.29} 2⁸ 3⁶ 4¹⁰ 5^{2.42} 6^{25.30} 9²⁰ 14^{3.4}. The same tendency is found in the same authorities in Mt., e.g. 4²² 21².

In the case before us (1¹⁰) the genuineness of *εὐθὺς* in Mk. is, we think, supported by its presence in Mt 3¹⁶. There are only 2 cases (24²⁹ 27⁴⁸) where Mt. in a parallel context shows a *εὐθ.* which is not represented in the true text of Mark. And in neither of these does any authority for the text of Mk. attempt to assimilate.

- (2) *ἐκ τοῦ ἔδ.*, NBDL 13 28 33 69 124.
ἀπὸ, AP rel; cf. Mt 3¹⁶.

Here, again, *ἐκ* is characteristic of Mark. In 4 other cases it corresponds to *ἀπὸ* in a parallel context in Mt., and in 10 cases in Luke. A similar reaction on the MSS of Mk. also in 1^{25.26} 7¹⁵ 9⁹ 16³.

- (3) *σχιζομένους*, NAB rel.
ἡνυγμένους, D Latt ('apertos') = Mt. and Luke.

Here there is nothing to account for the change of *ἀνεωγμένους* if it were genuine, while *σχιζομένους* is at once vivid and difficult.

- (4) *καταβαῖνον εἰς αὐτόν*, BD 13 69 124 a.
καταβαῖνον ἐπ' αὐτόν, NAP rel, but note that N 33 insert *καὶ μένον* before *ἐπ'* from Jn 1³².

Fondness for *εἰς* is another characteristic feature of Mark's style. It occurs in all about 157 times. Of these, 42 are found in both Mt. and Lk., 39 in Mt. alone, 19 in Lk. alone, 57 belong to sections or phrases peculiar to Mark. In 3 places Lk. substitutes *ἐν*, in 2 *ἐπὶ*, in 1 *ἐν μέσῳ*. Mt. substitutes *ἐν* in 5 places and *ἐπὶ* in 4. Here (1¹⁰) Mt. and Lk. agree in substituting *ἐπὶ* as they agree in substituting *ἐν* in 11⁸. In 4 cases Mt. or Lk. supports *εἰς* when the other has changed it.

On the other hand, *ἐπὶ* with acc. occurs only 32 times in Mark. There is only very slight evidence of a tendency to change it into *εἰς*. See 6³³ 15^{22.46}, and perhaps d (not D) in 9¹³. In no case is there a real parallel to the phrase here, which must have suffered from 'assimilation.'

- V. 11 (a) Om. *ἐγένετο*, N* D ff² mt (a f 'venit'; 28 2²⁰ g¹ *ἡκούσθη*).

Here, again, light is thrown on the reading by a careful study of Mark's usage. He is fond of *ἡνεσθαι*, and uses it to cover a great variety of different meanings. It occurs 52 times in the WH Text; of these, 6 are found both in Mt. and Luke. Besides these, Mt. retains only 16, Lk. only 9; and even in some of these instances slight modifications are introduced. (Mt. has a parallel context in 49,

Lk. in 36 cases). The text of Mk. shows similar traces of the attempt to obliterate this individualism. See 1¹⁷ 2²⁷ 4¹¹ 5¹⁶ 6³ (9⁶) 9⁷ 10³³ 12¹¹ 14⁴. 9⁶ seems to be Syrian. In all the other cases, except 1¹⁷ 2²⁷ 5¹⁶, D appears in the group which either omits or provides a substitute for *ἡν*. D is generally supported by some Old Latin MSS and various members of the group 1-28, etc. The most instructive case is the closely par. 9⁷ *ἐγένετο φωνὴ ἐκ τῆς νεφέλης* (NBCLΔ), where AD rel inc. Syr-sin read *ἦλθεν* (exc. k l Syr-vg-codd om.), while *ἰδοὺ* from Mt. and *λέγουσα* from Lk. also find support. In Lk 9³² *ἐγένετο* . . . *λέγουσα* is found without variant, except that D reads *ἦλθεν*, Syr-cu-sin *ἡκούσθη*. In 10⁴⁴ the Syrian Text has *γενέσθαι*, NBC(D)LD *εἶναι*. The omission of *ἐγένετο* may therefore safely be regarded as 'Western.'

- (b) *ἐν σοί*, NBD²LPΔ 1 13 22 33 69 cu²⁵ Lat-vg a c ff^{1.2} g² l Boh? Syr-vg-hcl-txt Arm .Eth Go.

ἐν φ, AΓII unc⁸ rel b d g² f Syr-hcl-mg.

In Lk. there is virtually no doubt (apart from the very early 'Western' variant *νῆος μου εἰ σὺ*) about the reading *σὺ* . . . *ἐν σοί*.

In Mt. the reading is *οὗτος* . . . *ἐν φ*, exc. that 1) a Syr-cu read *σὺ*—*ἐν φ*; Syr-sin *σὺ* . . . *ἐν σοί*.

ἐν σοί was peculiarly liable to change from the association with Is 42¹ = Mt 12¹⁸; cf. 2 P 1¹⁷.

- V. 12 (1) *τὸ πν.* add *τὸ ἄγιον*, D.

The tendency to add *ἄγιον* is much less than might have been expected (see 2⁸, Jn 7³⁹). Its presence here, perhaps due to Lk 4¹, is more likely meant to mark the contrast with the Tempter.

- (2) (a) *ἐκβάλλει αὐτόν*, DA 33-69.

(b) *αὐτόν ἐκβάλλει*, NABL rel.

The order in (b) is somewhat unusual, though relatively commoner in Mk. than in Mt. or Luke. See 3⁶. 11. 12 5⁴ 11¹⁵ 12¹⁸ 13³⁴ 14⁶⁸ 16⁷.

- V. 13 (1) (a) *ἐν τῇ ἐρήμῳ*, NABDL 13 33 346 Boh: Orig Eus.

(b) *ἐκεῖ* KII 1 69 124 131 209 al¹⁸ Syr-sin Arm.

(c) *ἐκεῖ ἐν τῇ ἐρήμῳ*, Δ unc⁸ rel Syr-vg.

Here (a) is apparently the original reading. The repetition *εἰς τὴν ἐρ.*, *ἐν τῇ ἐρ.* is thoroughly Marcan; cf. v. 16. It is interesting to notice that Mt. keeps *εἰς τὴν ἐρ.* and Lk. *ἐν τῇ ἐρ.*

(b) is a substitute for (a) to avoid the repetition.

(c) is a simple conflation of (a) and (b).

The only alternative is to regard (c) as a reduplication of the regular Marcan type (e.g. *ἀφ' ἧς δὲ γενομένης ὅτε ἔδν ὁ ἥλιος*), of which (a) and (b) are alternative redactions. But Mark's pleonasm is never, we think, weakly tautological, as this would be; e.g. in 5¹¹ *ἐκεῖ πρὸς τῷ δρεῖ*, the second clause brings out a fresh and important feature in the scene; cf. v. 28.

- (2) *τεσσ-ῆμ.*, NBL 33: Orig Eus.

ἡμ. τεσσ., ADA rel = Mt. Lk. without variant.

- V. 14 (1) *καὶ μετὰ*, BD² a (c) Boh?

μετὰ δέ, NAL rel.

See on v. 6.

- (2) *τὸ εὐαγγέλιον*, om. *τῆς βασιλείας*, NBL 1 28

33 69 209 b c ff² Syr-sin Boh Arm.

Add AD rel Lat-vg a f ff² g² Syr-vg .Eth.

τὸ εὐαγγέλιον is used without further definition 5 times in Mk. (cf. Ac 15⁷). In 1¹ *Ἰησ. Χρ.* is added. In Mt. *εὐαγ.* occurs 4 times, 3 times defined by *τῆς βασιλείας*. *εὐαγ.* is not found in Lk. or John. The full phrase *τὸ εὐ. τ. βασ. τ. θεοῦ* is not found anywhere else. It is most likely that *τ. βασ.* came in from Mt. assisted by its recurrence in v. 18. No

good reason can be given to explain its omission, if it were genuine. The phrase $\eta\ \beta\alpha\sigma.\ \tau.\ \theta\epsilon\omega\delta$ is constant (14 times) in Mk., and never seems to have provoked alteration.

(3) (a) $\kappa\alpha\iota\ \lambda\acute{\epsilon}\gamma\omega\upsilon\upsilon$, BLD unc³ 1 33 69 rel a b ff¹ g² Lat-vg Boh Syr-vg-hcl.

(b) $\lambda\acute{\epsilon}\gamma\omega\upsilon\upsilon$, N²AD unc³ cu²⁰ f ff² g¹ Go.

(c) Om. N²c mt Syr-sin: Orig.

This is a difficult case. It is surprising how many of the various readings in Mk. involve the insertion or omission or change of $\lambda\acute{\epsilon}\gamma\omega\upsilon\upsilon$. In some cases the insertion is clearly due to assimilation, 9⁷ 11² 14¹ 15²⁴. In others the word is omitted or changed because it seemed bald or pleonastic, 17 6²³ 8²⁸ 10⁴⁰ 11⁵¹ 12⁴. The aberrant text is almost uniformly supported by D, some MSS of Lat-vet, and some members of the 'Ferrar Group.'

In 3 cases besides this, 1²⁰ 2¹² 15⁴, no certain decision is possible. In 2 of these, 1²⁰ 15⁴, N is the chief authority for omission. It is difficult to account for the change of (a) either into (b) or (c) if it be genuine. (a) is also open to suspicion from Mt 4¹⁷.

The asyndeton in (b) might have led to (a) and (c) as independent simplifications (cf. 14⁰). But it is harsh even for Mark.

(c) might have caused difficulty, because v.¹² can hardly be regarded as merely exegetical of τὸ εὐαγγέλιον τῆς βασιλείας.

V.¹² πεπλήρωται οἱ καιροί, D a b c ff² g¹ mt, probably due to the association in thought of passages like Lk 21²⁴ and esp. Eph 1¹⁰, the singular seeming too tame.

V.¹⁶ (1) $\kappa\alpha\iota\ \pi\alpha\rho\acute{\alpha}\gamma\omega\upsilon\upsilon$, NBDL 13 33 69 124 346 Latt Boh Arm Syr-hcl-mg.

περιπατῶν δέ, AΔ rell Syr=Mt.

For δέ see note on v.⁶.

παράγω recurs in 2¹⁴ (=Mt 9²) and 15²¹; cf. Mt 9²⁷ 20³⁰, Jn 9¹.

It is never found in Luke. He has no strict par. here. In both the other cases he avoids it. There seems no reason why περιπατῶν should have been changed, if it were original.

(2) Σίμων, D 28 69 124 346 add τόν.

See note v.⁶.

(3) (a) Σίμωνος, NBLM al a Boh Arm.

(b) τοῦ Σίμωνος, AE²Δ 1 69 al²⁰. See on v.⁶.

(c) αὐτοῦ, ε DGT 33 al vix mu Latt (exc. a) Syr-sin-vg Aeth.

(d) αὐτοῦ τοῦ Σίμωνος, EFH unc³ al plus¹²⁰ Syr-hcl Go.

(a) is here clearly the original reading. The repetition of the subst. is a trick of the Marcan style (see 3¹⁷). (c) is an inevitable 'Western' correction agreeing with Matthew. (d) is a simple conflation.

(4) ἀμφιβάλλοντας, NBL 33.

(b) ἀμφιβάλλοντας τὰ δίκτυα, D 13 28 69 124 346 Latt.

(c) ἀμφιβάλλοντας ἀμφιβληστρον, AΔ unc¹¹ Boh Syr-hcl Go.

(d) βάλλοντας ἀμφιβληστρον, E²MTI² al pl Arm=Mt.

Here, again, (a) is clearly original. Its full force not being understood (or requiring in translation the express mention of the object), the 'Western' reading (b) supplied τὰ δίκτυα from v.¹². On the other hand, the influence of Mt. suggested (c) ἀμφιβληστρον. Finally, by substituting βάλλοντας (d), the resemblance to Mt. was made complete.

V.¹⁷ γενέσθαι, om. 1 13 28 69 118 209 al¹⁰ b Syr-sin-vg Aeth.

See on v.¹¹. Here the omission is helped by text of Mt.

V.¹⁸ (a) τὰ δίκτυα, NBCL al¹⁰ ff¹ g² Lat-vg Boh Arm=Mt.

(b) πάντα, D a b c ff²=Lk.; cf. 10²⁸.

Note that D a c have already used δίκτυα in v.¹⁶.

(c) τὰ δίκτυα αὐτῶν, A unc¹² al pl f g¹ Syr Aeth Go.

Notice a similar addition in vv.¹⁸, ²² etc. V.¹⁹ (a) ὀλίγον, BDL 1 28 118 124 131 209 2¹⁰ a b ff² g¹ Boh Syr-vg (sin).

(b) ἐκείθεν, N²=Mt.

(c) ὀλίγον ἐκείθεν, N²c 33.

(d) ἐκείθεν ὀλίγον, AC unc¹² al pl c f ff¹ g¹⁻² Syr-hcl Arm Go.

Here there is no doubt of the genuineness of ὀλίγον. ἐκείθεν seems to have come in from Matthew. The tendency to omit ἐκείθεν is very slight in the Gospels, and confined to quite insignificant MSS, exc. in Jn 11⁵⁴.

(c) and (d) represent independent conflations of (a) and (b).

V.²⁰ ἀπῆλθον ὀπίσω αὐτοῦ, NABC rell Syrr.

ἠκολούθησαν αὐτῷ, D Latt Boh=Mt.; cf. v.¹⁶.

ἀπερχ. ὀπίσω is a remarkable, apparently unique phrase (Jn 12¹⁹ is no true parallel), which has suffered assimilation. Perh. a Syriasm; but ἀκολ. is a common word, not wont to provoke alterations.

V.²¹ (1) (a) εἰσπορεύονται, NABC rel d.

(b) εἰσπορεύεται, 1 6 22 71 121 al pauc.

(c) εἰσπορεύόμενος, Orig (e) (e).

(d) εἰσπορεύοντο, D² 33 (61) (a b f).

A reading worth looking at. At first sight (a) seems entirely natural, and we wonder why it should have caused any trouble. Then we notice the sequence of verbs, ἀπῆλθον, εἰσπορεύονται, ἐδίδασκεν. The subject of no two of them is the same, though they are linked by καί, but in genuine Marcan fashion the reader is trusted to infer the subject of each himself.

Again the sequence of tenses, an historic present, characteristic of Mk., between an Aor. and an Imperfect. (b) and (c) are independent attempts to smooth over the change of subject, (d) assimilates the tenses.

(2) (a) τοῖς σάββασιν εἰσελθὼν εἰς τὴν συναγωγὴν ἐδίδασκεν, ABD rell Latt (exc. c) Syr-hcl.

(b) εἰσελθὼν τοῖς σαβ. ἐδίδασκεν εἰς τὴν συναγ., 33 124.

(c) τοῖς σάββασιν ἐδίδασκεν εἰς τὴν συναγ., NL 28 346 2¹⁰: Orig.

(d) ἐδίδασκεν ἐν τοῖς σάββασιν εἰς τὴν συναγ., C Boh Syr-sin-vg.

(e) τοῖς σάββασιν εἰς τὴν συναγ. ἐδίδασκεν, Δ 69.

(f) et ingrediens cum eis sabb. in synag. Capharnaum docebat populum c.

Note that Syr-sin omits καὶ εἰς. εἰς Καφ.

This is a strange case of confusion affecting the simplest of sentences. The omission of εἰσελθὼν, which is common to (c) (d) and (e), produces a reading which at first sight seems attractive. It is short and vigorous. And the pregnant use of εἰς might easily have led to the insertion of εἰσελθὼν. On the other hand, the group NCLΔ, which supports the omission, is, the present writer believes, in Mark typically 'Alexandrian,' in Dr. Hort's sense of the term. They exhibit constantly a type of readings quite their own, which, though always interesting, rarely succeed in establishing their claim to preserve the original text. The most favourable examples are 3⁶, 7 4²², 28 11¹¹ 15¹, 44. Here it is worth noticing that in (f) ingrediens may stand either for εἰσπορεύόμενος or εἰσελθὼν. And it is possible that the repetition may have given offence to the linguistic sense of the Alexandrians, and have led to the dropping of εἰσελθὼν. Both words are well established in Mark's vocabulary. For though πορεύεσθαι never occurs (outside 16²⁰⁻²¹) exc. perhaps in 9²⁰, εἰσπορ. is found 8 times.

Nor is Mk. fond of the pregnant use of *eis*. 1st 13th (2nd v.l.) 13th. 14th are the only examples; and even *κηρύσσειν eis* (13th 14th) hardly justifies *διδάσκειν eis*.

The larger omission in Syr-sin may well be due to the difficulty of supposing that the work from which Simon had been called (v. 16) lay at any distance from his home (v. 29).

(3) *αὐτοῖς post ἐδίδ.*, D (Latt) Syr-hcl Arm Æth Go. Probably from v. 21.

There is no difficulty in the absolute use of *διδάσκειν*, which occurs fairly often in all the Gospels, and generally causes no trouble. Mt 4th is the only parallel. Curiously enough, in Mt 21st 20th Lk 23rd some auth. omit *διδάσκειν* altogether. Mark is never tired of emphasizing this aspect of our Lord's activity. In 9 cases (out of 17) the word is not paralleled either in Matthew or Luke.

V. 22 *καὶ αὐτὸ οὐκ*, om. D^h b c d e.

Cf. v. 14 (3) (b).

V. 23 (1) *εὐθὺς post καὶ*, NBL 133 131 209 Boh: Orig. Om. ACDΔ rel.

Cf. on v. 10 (1). It is not found in Lk 4th.

Here the word would be specially liable to alteration, as it expresses simply the suddenness of the interruption, without reference to any definite point of time.

(2) *αὐτῶν post συναγωγῇ*, om. DL 72 b c e ff² g¹ Boh.

The presence of the word is remarkable. It has no antecedent. *συναγ.* is regularly defined in Mt., but very rarely in Mark or Luke. Only Mk 1st 23. 30, Lk 4th 16 (where as here D a b l om.). But there is no trace of any tendency to supply *αὐτῶν* mechanically with *συναγ.* in either Mark or Luke. Lat-vg in Lk 13th 10 is an instructive exception. So it is unlikely that it has come in here from Matthew. On the other hand, Mark has no quite similar case (exc. 9th, where *αὐτῶν* has come in from LXX) of an indefinite *αὐτῶν*. It is possible that it may represent Mark's transformation of what on St. Peter's lips was 'our' synagogue.

V. 24 (1) *Ea om. NBD 157 2nd Latt Boh Syr-sin-vg Æth.

Ins. (A) CLA rel. Syr-hcl Arm Go: Orig. Eus=Lk 4th 34 (where as here D cu⁴ Lat-vet Boh Syr-sin-hier Æth om.).

Another 'Alexandrian' reading, this time adopted by the 'Syrian' Text, against the 'Neutral' and the 'Western.' Granted that the 'Western' authority here must be discounted because of its behaviour in Lk 4th, still the 'Neutral' reading is preferable because it alone explains the phenomena in the two passages taken together. There seems no reason why *Ea (however it is to be understood) should have caused trouble. All is simple, if we suppose that the 'Alexandrian' and 'Syrian' texts here assimilated Mark to Luke, while conversely the 'Western' assimilated Luke to Mark.

(2) *οἶδαμεν*, NLA Boh Arm Æth: Tert Iren^{int} Orig Eus.

οἶδα, ABCD rel Latt Syrr=Lk 4th 34 (where only Arm has pl.).

Neither reading has any intrinsic difficulty. It is simply a question whether the Alexandrian Text introduced the pl. in consequence of *ἡμῶν* (cf. *ἡδίσταν*, v. 34), or whether the rest assimilated Mark to Luke. The fact that the Alexandrians omitted to insert the corresponding change in Luke is not a fatal objection to the first hypothesis.

V. 25 (1) *ἀπ' for ἐξ*, HL 33 cu¹⁸ c f g¹=Lk.

See on v. 10. *ἐκ* is habitual in cases of possession in Mark. In these cases it is never retained either by Matthew or Luke.

(2) (a) *τοῦ ἀνθρώπου* for *αὐτοῦ* and + *πνεῦμα ἀκάθαρτον*, D (8th) Latt (exc. f) (Go Æth).

Go Æth add *πν. ἀκ.* but read *αὐτοῦ*. 8th *τὸ πν. τὸ ἀκ.*

(b) NABCLA rel: Orig Syr-sin read *αὐτοῦ* without *πν. ἀκ.*=Lk.

Here we have to balance the chance that (b) has arisen out of (a) by assimilation to Luke, against the chance that (a) has arisen out of (b) by assimilation to 5th. (a), as 5th shows, is thoroughly Marcan; but the evidence for it, as our experience even in these few verses is enough to suggest, is far from trustworthy. Again, if we may allow any weight to our provisional hypothesis as to the relation between Luke and Mark, there is no reason to suppose that Luke would have modified (a) if his text of Mark had contained it. In 8th (=Mk 5th) he retains the words, though putting them into the *oratio obliqua*. His agreement with Mark in these verses, 4th 23-25 = Mk 1st 23-25, is exceptionally close. There is no *par.* in Matthew.

V. 25 (1) The whole verse reads as follows in D:—*καὶ ἐξῆλθεν τὸ πνεῦμα τὸ ἀκάθαρτον σπαράζας αὐτὸν καὶ κράζας φωνῇ μεγάλῃ ἐξῆλθεν ἀπ' αὐτοῦ.*

With this e agrees (only omitting *τὸ ἀκάθαρτον*), and ff² (only transposing *σπαρ. αὐτ.* with *τὸ πν. τὸ ἀκ.*).

It is difficult not to believe that this exhibits a conflation of two readings: (a) *καὶ ἐξῆλθεν τὸ πν. τὸ ἀκ. σπαράζας αὐτὸν καὶ κράζας φωνῇ μεγάλῃ*, with (b) the reading in the text. Some such conflation must also underlie the reading of D in v. 24. (a) might have arisen out of (b) by free assimilation to Mk 5th, where also we find the masc. *καὶ κράζας καὶ πολλὰ σπαράζας ἐξῆλθεν*.

(2) *κράζαν* is read by AC(D) rel.

φωνῇσαν, NBL 33: Orig.

Neither phrase is objectionable in itself. *φων. φ. μεγ.* is found in Lk 23rd, Ac 16th, but not in contexts likely to have suggested themselves here. *κράζω*, on the other hand, is constantly used of the cries of the possessed, and *κράζας φ. μ.* occurs in Mk 5th.

(3) *ἀπ'* is read for *ἐξ* by C(D)ΔM 33 Latt.

See on v. 25.

V. 27 (1) (a) *αὐτοῖς*, NB (b e ff² q).

(b) *πρὸς ἑαυτοῦς*, ACDΔ unc⁹ al¹⁰.

(c) *πρὸς αὐτοῖς*, GLS rel verss.

It is difficult to find any test to enable us to judge between these readings. The reciprocal use of *πρὸς ἑαυτ.* is characteristic of Mk 9th 11th 12th 14th 16th, besides v.l. 9th 14. 16. 34 10th. It is not found in Matthew. It occurs in Lk 20th (=Mk) 22nd (v.l. 20th=Mk), and in Jn 12th. On the other hand, NB exhibit no special animus against it. They seem clearly right on the three other occasions (9th 10th, Lk 20th), where they combine to attest an alternative reading. *συνζητεῖν* is used absolutely in 12th and Lk 24th. The construction of Mk 9th is ambiguous. In 9th 14. 16 the true reading is clearly *πρὸς αὐτοῖς*, though here N in each case reads *εαυτ.* These facts, so far as they go, are in favour of (a), as is the fact that some of the authorities for *πρὸς* (ACE* MΔ² al¹⁰) give what is perhaps a further sign of the influence of Lk 4th by reading *λέγοντες* for *λέγουσας*. *αὐτοῖς* has a real point (cf. on *αὐτῶν* in v. 22) if it indicates a distinction between the circle immediately round our Lord, and that part of the congregation whose astonishment found vent in the words that follow.

(2) (a) *τί ἐστιν τοῦτο; διδασκὴ καὶ κατ' ἐξουσίαν*, NBL 33 (1 118 131 2nd al³ + *αὐτῇ*) Boh.

(b) *τίς ἡ διδασκὴ ἐκείνη ἢ καὶ κατ' ἐξουσίαν αὐτῇ*, D (ενν³ Latt).

(c) *τί ἐστιν τοῦτο; τίς ἡ διδασκὴ ἢ καὶ κατ' ἐξουσίαν*, (A)CA rel (A *τίς ἡ κ. αὐ. διδ.*) (89 *τίς ἡ κ. διδ. αὐ.*).

Note that the Latin renderings are very various.

They agree with D in leaving out *τι ἐστιν τοῦτο*; Some omit *καὶ*. Most, if not all, may represent *καὶ ἐξουσίαν*, none exc. 'd', *ἐξουσία*.

The simplest solution is to regard (a) as the original reading; it is vigorous and vivid, and its abruptness might easily offend. (b) would then be a 'Western' *μυριαπλασε*, (c) a 'Syrian' conflation of (a), with one or other of the various forms of (b).

V.²⁸ (1) *καὶ ἐξηλθεν*, *ℕBCDΛM* 33 al¹¹.

(d) *ἐκεῖνον*, *ℕ^c12*; cf. Mt 14³⁵, v.l. Mk 6⁵⁶.

24. The facts are now before us. We can judge for ourselves the kind of variations that are to be met with on every page of the Gospels, and the kind of considerations by which we can attempt to discriminate between alternative readings, before we are in a position to assign a special value to any particular authority, or group of authorities, over the rest. It is true that we have in one or two particulars anticipated results that must be verified by further examination. We have treated certain groups of authorities, which even within the limits of this passage can be seen to mark themselves off from time to time from all the rest, as approximately constant units, and we have given distinctive names to the particular sets of readings which they attest. The fact that the authorities do exhibit this tendency to fall into groups is now generally admitted, and even the Traditionalists are beginning to see that a careful study of these groups is the first step towards the understanding of the history of the changes through which the text, taken as a whole, has passed. They point out, however, quite rightly, that the term 'text' as applied to these groups must be used with caution. It does not necessarily imply, e.g., that there ever existed an edition of the 'Western Text,' including all the variants that we should be prepared to class as 'Western,' and excluding all their rivals, in the sense in which Westcott and Hort include, with a few exceptions, all the 'Neutral' readings; or, again, in which Mr. Miller prints the Traditional Text. No critic is likely to take serious exception to the definition which Mr. Miller puts forward of the sense in which he is himself prepared to use the word. 'What is properly meant,' he writes, 'is that of the variant readings of the words of the Gospels which, from whatever cause, grew up more or less all over the Christian Church, so far as we know some have family likenesses of one kind or another, and may be traced to a kindred source.'

25. More serious exception has been taken by Dr. Salmon to the names which Dr. Hort gave to the different groups. He calls them 'question-begging.' But it is by no means easy to see the exact point

of his criticism. The names are as free as possible from any invidious connotation, differing in this respect *toto caelo* from the name 'Neologian,' which Mr. Miller regards as a fair description of the text of any editor who rejects a 'Traditional' reading. They are all descriptive of certain clearly marked and carefully defined characteristics of the groups to which they are applied. The 'Syrian' Text is so called because its most constant support is found, as we have seen, in the writings of Fathers connected directly with the Church of Antioch. An objection may no doubt lie against it, because it must suggest to an uninstructed reader that the chief support for these readings is to be found in the Syriac versions; but in itself it is purely descriptive, and implies no judgment on the genuineness of the readings connoted by it.

26. 'Western' again, as Dr. Hort himself pointed out, is an inadequate title for readings which have early Greek, Syriac, and Egyptian support, as well as Latin. But he retained it because it was established by long usage, and there seemed no sufficient reason for obscuring the continuity of the development of the science of Textual Criticism by any unnecessary change in the accepted terminology. The name as he defined it connoted nothing more than the fact that this group of readings had first attracted the attention of scholars by the support that it receives in the great Græco-Latin MSS and in the Latin versions. There was nothing in the name to imply that no readings in this group could be regarded as genuine.

27. The name 'Alexandrian' was chosen simply because the authorities supporting it are, so far as we can judge, exclusively confined to Alexandria. It had, no doubt, already been applied to all non-Western pre-Syrian readings by Griesbach. Neither *ℕ* nor *B* was, however, accessible to Griesbach when he made his classification. And, now that in the light of the new evidence a further subdivision of Griesbach's Alexandrian family has become possible, no serious difficulty is likely to arise from appropriating to one division the name which belonged to the whole class before its elements were fully differentiated.

28. It would be difficult to devise a more scrupulously colourless name than the last on our list—the name 'Neutral.' It was chosen to express the fact that the authorities supporting it were habitually found in opposition to the 'distinctive' readings of both the 'Western' and the 'Alexandrian' groups. It is true that these 'distinctive' readings are, from the nature of the case, in the great majority of instances corruptions that have affected one particular line of transmission; so a group that has escaped them must be, so far as these corruptions are concerned, a relatively pure text. But there is nothing in the name to imply that all the readings attested by it must necessarily be genuine, or to exclude the possibility that the rival authorities may in any individual case have preserved the genuine text. To adopt the name 'Early Alexandrian' for this group, as Dr. Salmon suggests, on the strength of the number of names connected with Alexandria which appear among its most prominent constituents, would obscure the fact, to which attention must be called later, that the attestation to it is by no means confined to Alexandria, besides obscuring the clearly marked distinction between this group and the one last described. It is difficult, therefore, to see what question any one of these names as defined by Dr. Hort can be supposed to beg.

29. It will be noticed that the points suggested for consideration in the notes, as likely to afford a presumption either for or against the genuineness of the different variants, are exclusively of an internal

* *Trad. Text*, p. 118. The light thrown on the extent to which Mr. Miller is prepared to believe in the existence of 'editions' in very early times by his note (i.e. p. 22) should not be overlooked.

character. This limitation is deliberate, because at this stage of the investigation our purpose must be simply to determine which reading in each case has the best claim to be regarded as original, apart from any preconceived theory as to the weight to be attached to the authorities by which it is attested. Some minds are, no doubt, constitutionally impatient of this class of considerations, and profoundly sceptical of any conclusions which are based on them. And, no doubt, there would be far less room for difference of opinion, and far less need of patient study and careful and exact scholarship in Textual Criticism, if we could start with some external standard, and so dispense with internal considerations altogether. Nothing, for instance, can be easier, if one may assume that the mass of authorities must always be right, than to prove that a numerically insignificant group of dissentients must be worthless, just because the evidence of 'the many' can always, *ex hypothesi*, be described as 'overwhelming.' But when the precise question at issue is the relative weight to be attached to the rival groups, no amount of erudition can conceal the fact that a demonstration constructed on these lines has no logical value; it does 'beg the question.' It is well, therefore, to realize from the outset that the element of personal judgment can never be eliminated from the processes of Textual Criticism. A clear realization of this fact is necessary if we are to understand the importance of a careful study of the laws which must regulate the use of the critical faculty, and of the different methods which other workers in the same field have found useful as safeguards to minimize the dangers arising from unconscious caprice or personal idiosyncrasy. The criteria for testing the *internal evidence of Readings* are of two kinds: *Intrinsic Probability*, or 'the consideration of what an author is likely to have written,' and *Transcriptional Probability*, or 'the consideration of what a copyist is likely to have made him seem to have written.' No doubt, taken separately, they are, as Mr. Miller calls them, 'weak pillars.' But, when they combine in favour of any variant, their testimony is overwhelming. Such cases are indeed comparatively rare. They are numerous enough, however, to enable us to form, first a provisional, and then a more carefully balanced estimate of the characteristic excellences and defects of each authority with which we have to deal. They enable us—that is, in cases where the internal evidence of the readings is ambiguous—to appeal to the *internal evidence of the Documents* by which the different variants are attested. But even this is not enough. The same document may be of very different value in different parts.

30. We have therefore still to inquire what methods are available when, as in the case of most of the MSS of the NT, whether uncial or cursive, the documents are of a very mixed character, and considerations derived from internal evidence alone are in consequence unusually precarious.†

It is at this point that the real importance of the principle of *Genealogy* comes full into view. It is based on the obvious fact that our documents, to quote the words of Dr. Hort to which Mr. Miller has called special attention, 'are all fragments, usually casual and scattered fragments, of a genealogical tree of transmission, sometimes of vast extent and intricacy.' It is true, as Mr.

Miller points out, that the analogy with human relationship which the word suggests is not complete. There is a variability in the transmission of acquired characteristics in human heredity which is lacking under normal conditions in derivation by a process of copying. But this difference is all in favour of the textual critic, and enables him to tread securely even in cases where the normal conditions of transmission are disturbed by the presence of 'mixture,' i.e. when the scribe at work on a particular MS embodies either constantly or occasionally readings derived from more than one exemplar. For the process depends on the principle, which it is encouraging to notice that Mr. Miller accepts without reserve, that 'identity of reading implies identity of origin.'

31. The consequences that follow from the acceptance of this principle and the careful application of this method are far-reaching. Its chief importance lies in this, that it opens a field for strictly historical investigation into facts which can be brought to definite tests. These tests no doubt require the greatest delicacy and skill in their application, but the facts are in themselves concrete and quite independent of subjective consideration.

It has, however, one or two subsidiary consequences to which we may call attention before we pass on. We may notice, first, that it justifies at once the treatment of groups of documents, which are found constantly associated in the support of the same variant, as approximately constant units: to this point attention has already been called. It also suggests the explanation of one of the paradoxes of Textual Criticism which has puzzled Dr. Salmon (p. 55). It is certainly strange that the evidence of two witnesses should be lowered in value by being associated with, rather than opposed by, a third; that, for instance, more weight should be assigned by Dr. Hort in the Pauline Epistles to $B + D_2 - G_3$, than to $B + D_2 + G_3$. As long as each document is regarded as an independent witness, it is clearly impossible to assign a negative value to its evidence. But when we realize that each document has a composite character determined by its ancestry, and that in consequence we have to determine in each case which strain is represented in any particular reading before we can estimate the value to be assigned to its evidence, the paradox disappears. The value of any group is simply the value of the element common to all the members composing it. Thus B in the Pauline Epistles is largely 'Neutral' with a decided 'Western' element: D_2 is Western with a decided 'Neutral' element: G_3 is almost purely 'Western' with a Syrian admixture. The combination $B + D_2$ may therefore be either Neutral or Western, both elements being present, though in different proportions, in each document. And the reading attested by G_3 can be either Western or Syrian. But a reading supported by $B + D_2 + G_3$ in opposition to all other authorities must be distinctively 'Western.'

32. One further remark may be allowed before we leave this paradox. It is, no doubt, tempting to illustrate different stages in the critical process by comparison with the everyday procedure of the Law Courts, especially when one's object is to interest Englishmen in the minutiae of a dry and technical study. But the habit is a dangerous one. The legal and the scientific methods are fundamentally distinct, and, in consequence, serious fallacies, as this paradox shows, may lurk even in the most specious analogy. But the worst effect of yielding to it is that it tends insensibly to merge the critic himself in the advocate, and to make him 'the champion of an opinion,' for whom

* *Trad. Text.* p. 228; cf. Hort's *Summary*, ed. minor, p. 543.

† The mixed character of the text in the uncials will be obvious from the study of any *App. Crit.* If any one wishes to realize the mixed character of the text even in the cursives, he cannot do better than study Mr. Hoekler's admirably thorough examination of the codex 604. The only surprising thing is that he should imagine that the facts he has observed disturb any of the results at which Dr. Hort arrived. Compare also the introduction to Scrivener's collation of 20 MSS with Tregelles' remarks upon it (Horne, *Intr.* p. 145).

the value of an argument is measured by its immediate effectiveness rather than 'the single-hearted lover of truth,' who knows that there is no influence against which he must guard more resolutely than the influence of the popular prejudices which tend to warp his own judgment, and which respond most readily to a rhetorical appeal.

33. Dr. Salmon suggests in another place (p. 43) that the dogmatic tone of WH's *Introduction* is due to the influence of the established Cambridge method of mathematical teaching. A closer parallel would seem to be provided by ordinary text-books in any department of Natural Science. We expect to find in them a description of the methods, and a classified record of the results, of an investigation into a series of phenomena which the student is no doubt expected to take on trust, but only until he has repeated the experiment and verified the result by his own observation. The extraordinary insight and skill in classification which the *Introduction* reveals, reflect the expert botanist more than the mathematician.

34. The last consequence of the acceptance of the principle of 'Genealogy' to which we wish to call attention, is the light that it throws on the radical unsoundness of any system of Textual Criticism which bases itself directly on a numerical calculation of the attesting documents, before the significance of the numbers has been checked and interpreted by descent. It is, no doubt, a remarkable fact that one of the types of text which were current side by side in the fourth century is represented to-day in extant MSS by a progeny 'like the stars of heaven in multitude';* while the representatives of the others are few and for the most part fragmentary. But the principle of Genealogy reminds us that, however numerous the progeny of any MS may be, their united value can never be higher than that of their common original. And it has yet to be seen whether that common original can, in the case of distinctively Syrian readings, be traced back beyond the 4th century. The facts which we have already noticed in the history of the text of one of the Pauline Epistles prove that the answer to that question cannot be taken for granted. We must not forget that, if 'identity of reading' implies 'identity of origin,' identity in a demonstrably wrong reading, except in the case of a primitive error, implies a common original later than the autograph. And in such cases it becomes of primary importance to determine as precisely as possible the date of the common original.

35. We can now pass on to consider what light is thrown by our examination of the variants in Mk 1¹⁻²⁸ on the character of the witnesses by which they are supported. We must begin with those variants that are the exclusive property of the Traditional Text, and by which in consequence the value of the authorities supporting it can be most effectively tested. We have included provisionally as belonging to it all the readings which are attested by none of the five MSS, N¹BCD or L. Further examination will show which, if any, of these readings have a claim to be regarded as belonging also to one or other of the alternative texts. Sixteen examples occur. The points affected are in almost every case extremely trivial, but they are none the less significant as indications of documentary relationship.

- (16) V.²⁸ δέ for καί.

36. Now, it is surely remarkable that in no single one of these cases does the internal evidence, taken as a whole, point unequivocally in favour of the Traditional reading. In many cases it seems to be definitely adverse. Again, it is surely remarkable that even in this short passage five of the readings, vv. 4, 13, 16, 19, 27, admit of a ready explanation on the supposition that they were produced by combining, with more or less modification, two alternative readings which were at one time current independently. In other words, they suggest the presence of Conflation as a factor in the production of the Traditional Text. This hypothesis is rendered distinctly more probable by the observation which rests on a wide induction of undisputed facts, that the normal tendency of scribes in all ages is towards addition and not subtraction.* The exceptions to this rule, which spring from purely accidental causes, e.g. 'Homoeotelenion,' are clearly not in point here. Nor, again, can we logically give any weight here to the charge of a deep-seated tendency to omission brought against the scribes of all our oldest authorities: because again and again the only evidence adduced in support of it is that the text they attest is habitually shorter than the Traditional, and we are looking for an assurance that the Traditional Text itself is free from addition.

It is true that there is evidence that some scribes, the originators of the 'Western' readings, did in the course of their extraordinarily rash recasting of the text omit a word here and there without introducing an equivalent. But there is no evidence to show that a tendency to omit affected a large proportion of their work. And the common ancestor of N and B was, so far as we can judge, entirely unaffected by 'Western' influence.

37. The suspicion of Conflation is deepened when we indicate to the eye, as has been done in the passage as printed above, the relation in which the Traditional Text stands to the earlier texts out of which on this hypothesis it must have been constructed. The passage certainly illustrates with remarkable vividness the phenomena which Dr. Hort's description would have led us to expect. His words run as follows:—

'To state in a few words the results of examination of the whole body of Syrian readings, distinctive and non-distinctive, the authors of the Syrian Text had before them documents representing at least three earlier forms of text, Western, Alexandrian, and a third. Where they found variation, they followed different procedures in different places. Sometimes they transcribed unchanged the reading of one of the earlier texts, now of this, now of that. Sometimes they in like manner adopted exclusively one of the readings, but modified its form. Sometimes they combined the readings of more than one text in various ways, pruning or modifying them if necessary. Lastly, they introduced many changes of their own where, so far as appears, there was no previous variation. When the circumstances are

* See Tregelles, *The Printed Text of the NT*, p. 184.

fully considered, all these processes must be recognized as natural' (§ 165).

When the whole text has the appearance of being conflate, individual readings combining elements which can be proved to have existed independently are more naturally accounted for on the hypothesis of Conflation than on any other. It would seem impossible to determine *a priori* what proportion of such readings we should expect to find in a passage of any given length. Mr. Miller is probably right when he says, 'I venture to think that, supposing for a moment the theory to be sound, it would not account for any large number of variations, but would at the best only be a sign or symptom found every now and then of the derivation attributed to the Received Text.* This is exactly the impression that an attentive reader would receive from Dr. Hort's carefully measured language in reference to them.†

38. The last point to be examined in regard to these readings is the presence or absence of ante-Nicene Patristic support. What has already been said on the principle of Genealogy will put us at the right point of view for appreciating the significance of this part of our investigation. For it is clear that, unless we can discover some evidence external to the MSS for locating and dating the readings contained in them, we shall find it difficult, if not impossible, to make sure of the direction actually taken by the different streams of textual change. The primary source of such evidence is provided by fully verified and tested Patristic quotations.

39. We must not, however, hide from ourselves the difficulty of the task. Even at the risk of some repetition, we must remind ourselves that it is always necessary, in cases where the text of a Father appears to agree with the Traditional Text, to make allowance for the possibility that that agreement would disappear if we had access to his autograph, even though there is no variation in the printed editions or in any of the extant MSS of his work. No conclusions can be based on such evidence unless the correctness of the reading is guaranteed by the context.

40. Again, in a passage like the one before us (Mk 11²⁸), which has parallels throughout either in one or in both of the other Synoptics, and in which a considerable proportion of the variants suggest the influence of assimilation, it is clearly unwise to build any conclusions on a Patristic reference to the text in its assimilated form, unless the writer gives us independent means of determining the particular Gospel from which he is quoting.

41. Again, in applying the knowledge derived from such evidence, after it has passed all our tests, to the interpretation of the facts of textual history as indicated by the groups into which the MSS are observed to fall, we have to bear in mind that it is

impossible on MS evidence alone to determine precisely what readings, other than 'conflate,' are to be classed as distinctively Traditional—i.e. are to be regarded on the Critical hypothesis as having originated with the 'Syrian' revisers, and not merely been adopted by them from some pre-existent text. For, as the evidence of the Latin, Syriac, and Egyptian versions shows, the preservation of at least the 'Western' types of text in Greek MSS is incomplete and fragmentary. So that it is practically certain that some of the readings which are at present attested only by MSS of a markedly Traditional type are not really the exclusive property of the Traditional Text. They must have belonged also, at one time, to one or other of its rivals. We must be ready, therefore, to make allowance for the possibility that some of the readings in our provisional list, and in any other list drawn up on the same rough-and-ready principle, may be 'Western,' 'Alexandrian,' or even 'Neutral,' as well as 'Syrian.'

42. Ante-Nicene evidence is quoted by Tischendorf or Tregelles on one side or the other in 7 out of the 15 readings in our list. In the first case (v.), the insertion of *τοῦ* before *θεοῦ*, the ante-Nicene evidence disappears on close examination. The passages in Irenaeus which contain the clause are extant only in Latin, and are therefore indecisive. The clause is wanting in the one passage where we have access to the Greek of Irenaeus, and in Origen. We may note, however, that Severianus (fl. 400) and Victor of Antioch (d. 430) both omit the article. Cyril Alex. (d. 444) is the earliest authority quoted in support of it. The second reading *τοῖς προφήταις* for *ἑσ. τῷ προφ.* finds a place as No. 14 in Mr. Miller's select 30 (*Trad. Text*, p. 108), and is also discussed at length by Dean Bugnon (*Causes of Corruption*, p. 111 ff., cf. *Trad. Text*, App. iv.). So in this case we have the advantage of a full statement of the evidence that can be put forward on behalf of the Traditional reading. It will be instructive to examine this statement in detail.

43. Only a summary of the evidence is given in *Trad. Text*, detailed references being promised in *Causes of Corruption*. In the summary, 6 names appear as supporting *τοῖς προφ.*: Titus of Bostra, Origen, Porphyry, Irenaeus (p. 205), Eusebius, Ambrose. 7 names appear on the other side: Irenaeus (p. 191), Origen (*Cels.* ii. 4; in *Joan.* i. 14), Titus of Bostra (*adv. Monich.* iii. 4), Basil (*adv. Eunom.* ii. 15), Serapion, Victorinus of Pettau (in *Apor. Joh.*), Epiphanius (twice over—the second time with a ref. *adv. Hær.* ii. i. 51). When we come to *Causes of Corruption* we are met by a statement that Tischendorf quotes 13 Fathers against the Traditional reading: Irenaeus, Origen, Porphyry, Titus, Basil, Serapion, Epiphanius, Severianus, Victor, Eusebius, Victorinus, Jerome, Augustine. We are then told that 'from this list serious deductions must be made. Irenaeus and Victor of Antioch are clearly with the Textus Receptus. Serapion, Titus, and Basil do but borrow from Origen, and with his argument reproduce his corrupt text of Mk 12. . . Victorinus and Augustine, being Latin writers, merely quote the Latin version, which is without variety of reading. There remain Origen (the faulty character of whose codices has been remarked upon already), Porphyry the heretic (who wrote a book to convict the Evangelists of mis-statements, and who is therefore scarcely a trustworthy witness), Eusebius, Jerome, and Severianus. Of these, Eusebius and Jerome deliver it as their opinion that the name of "Isaiah" had obtained admission into the text through the inadvertency of copyists. Is it reasonable, on the slender residuum of evidence, to insist that St. Mark has ascribed to Isaiah words

* *Causes of Corruption*, p. 270.

† As curious misapprehensions are current on this point, it may be well to quote the sentences in full, italicizing the significant phrases. The ref. are to paragraphs in the *Introduction*. § 133, 'The clearest evidence . . . is furnished by conflate readings, where they exist; and in the case of some of the primary groupings of the textual documents of the New Testament they are *fortunately not wanting*.' In § 165, already quoted, notice the words, '*Sometimes* they combined the readings of more than one Text in various ways, pruning or modifying them, if necessary.' In § 185, '*Occasionally* also the readings of two of the antecedent Texts were combined by simple or complex adaptations.' We may also compare the language used in the short statement of the principles of Textual Criticism printed at the end of the volume containing the text (p. 548, ed. minor). 'The priority of two at least of the three Texts just noticed to the Syrian Text is further brought to light by the existence of a *certain number* of distinctively Syrian readings, which prove on close examination to be due to a combination of the Western with the Neutral readings.' The number of readings in Mk 11²⁸ that have a claim to be considered as 'conflate' is distinctly larger than this language would have led us to anticipate. But we must not forget that the genealogical antecedents of the component elements are in some cases obscure.

confessedly written by Malachi?' The passage concludes with a lecture on the duty of 'carefulness' and 'honesty.'

44. If, in the light of this statement, we come back to the summary in *Trad. Text*, the result is startling. Of the 6 names quoted on behalf of the TR, the evidence of the first 3 in favour of the rival reading is discussed and discounted. But no hint is given of any justification for the appearance of their names on the opposite side. Of the other 3, Ambrose is left unnoticed; Irenæus, whose name appeared in the summary, like the names of Origen and Titus, on both sides, is boldly claimed exclusively for the TR. Of Eusebius we gather that he is usually quoted in favour of the opposite side, but that he felt the difficulty of that reading so much that he regarded the text as corrupt. (It is difficult to see how he could have failed to refer to a difference of reading among MSS on the point had he been conscious that any such difference existed). A reference to the Latin version of Irenæus is rather a 'slender residuum' from the original 6, even when supplemented by a claim to Victor of Antioch, whose date no doubt excluded his name from the summary. This result, we may notice in passing, does not inspire confidence in the accuracy of the summary, or in the conclusions built on it. But that is not the point immediately before us.* We must turn to a closer examination of the details of the evidence in the light of Dean Burgon's comments upon them.

45. The earliest witness is Irenæus. Three passages in his writings (pp. 187, 191, 205) come up for consideration. Two (pp. 187, 205) are extant only in Latin; but, as Grabe showed (see note in Stieren), there is no reason to question the accuracy of the translation. The reading '*in prophetis*,' for which they vouch, cannot have come in through the Latin version, and it is, besides, strongly, though not quite conclusively, confirmed by the context (p. 205). The passage on p. 191 is, fortunately, extant both in Greek and Latin. The Latin reads '*in Esau propheta*' with no recorded variant. The Greek is attested in various ways. It is found in an extract from Irenæus preserved by Anastasius

* Mr. Miller's 30 passages are meant to supply materials for comparison between the Patristic evidence to be derived from writers who died before A.D. 400 to the Traditional and the 'Neologian' texts respectively. It is impossible to discover the principle which underlies this selection. He professes to choose passages in which 'evidence is borne on both sides.' But in 8 out of the 30 he can find no Patristic evidence on the 'Neologian' side.

The selection is certainly not regulated by any consideration of the distribution of MS authority. 24 out of the 30 are supported by one or more members of the group ABCDL. Nor, again, is any care taken to choose passages where the Patristic evidence is free from the uncertainty caused by the presence of Syroptic parallels. The only element common to all the 30 is that they are printed in thick type by Scrivener in the Cambridge Greek Testament, i.e. each of them has, at one time, been adopted by one or more of the critical editions collated at the foot of Scrivener's pages.

It is equally difficult to see the bearing of this evidence on the point at issue. It is true that at the beginning of the chapter a vague reference is made (p. 95) to a statement of Dr. Hort's, and it is assumed at the end that his contentions have been shown to be baseless. But we are left to divine, as best we may, how the collection of ref., reaching to the end of the 4th cent., relating to readings four-fifths of which are obviously not distinctively Syrian, affects Dr. Hort's position that there are no historical signs of the existence of distinctively Syrian readings before the middle of the 3rd cent. There is no excuse for this flagrant *ignoratio elenchi*. Dr. Hort's position was precisely formulated in words which called special attention to the fundamental importance of the fact which he claimed to have observed. The passage reads as follows (*Int.* § 162): 'Before the middle of the third century, at the very earliest, we have no historical signs of the existence of readings, confate or other, that are marked as distinctively Syrian by the want of attestation from groups of documents which have preserved the other ancient forms of text. This is a fact of great significance, ascertained as it is exclusively by external verification, and therefore supplying an absolutely independent confirmation and extension of the results already obtained by comparison of the internal character of readings as classified by confation.'

of Sinai. Here the reading is certainly *ἐν Ἡσ. τῷ προφ.* The only recorded variant is *ἐν βίβλῳ λόγων Ἡσ. τοῦ προφ.* in a Florentine MS containing an extract from Anastasius. This independent confirmation of the reading of the Latin version makes the fact that Irenæus in this passage wrote *ἐν Ἡσ. τῷ προφ.* practically certain. Nor does it stand alone. The same passage of Irenæus is quoted in an anonymous scholion preserved in Evv. 237, 238, 259 (Matthæi's *d, e, a*). And in each case, according to Matthæi, the reading is *ἐν Ἡσ. τῷ προφ.* It is therefore not a little difficult to understand how Dean Burgon, in a note expressly based on a reference to the scholion in Ev. 238, should print '*in the prophets*.' If his translation is based on an independent examination of the MS, it was unkind of him not to give a hint that Matthæi's transcript was in error. If not, we have another illustration of the danger of trusting to printed texts when they agree with TR.

Mk 1² is quoted also in a short introduction to St. Mark, attributed in some MSS to Cyril Alex. and in others to Victor of Antioch, in the same form *ἐν Ἡσ. τῷ προφ.* printed in Combefis, i. p. 436. It is true that Germanus (Patriarch of Constantinople, A.D. 715), who has drawn on this same passage of Irenæus, writes *ἐν τοῖς προφ.* But the natural suspicion that he has in this case assimilated the text of his author to the text with which he was himself familiar, is confirmed by the observation that this same Germanus, a few lines earlier, in his extract, writes *τοῦ δὲ Ἰησοῦ Χριστοῦ ἡ γέννησις* in a quotation by Irenæus of Mt 1² in accordance with TR, though, in view of the special stress laid by Irenæus on the point in a well-known passage (p. 204), there can be no doubt that the Latin version '*Christi autem generatio*' preserves the text as Irenæus wrote it.

We may fairly, therefore, claim Irenæus as a witness to both readings in Mk 1². It is, no doubt, strange that he should have gone from one codex to another and back again in less than 20 pages, but a similar phenomenon with regard to the reading in v.¹ shows that something of the kind must have happened. The difficulty, such as it is, would disappear if we might accept Dr. Hort's suggestion (*App. in loc.*) that the whole of the peculiar passage (p. 191) was derived by Irenæus from an earlier writer. As the passage contains the well-known argument proving from 'the nature of things' that the number of Gospels cannot be more or less than four, the conclusion has consequences of wider interest than can attach to the solution of any merely textual problem. If this strange argument was already traditional in the time of Irenæus, it throws back the evidence as to the closing of the Gospel Canon, which is rightly felt to be involved in its very strangeness, into the generation that preceded him.

46. The next authority in point of date is Origen. Tischendorf gives 4 references. Mr. Miller's summary is content with 2. In one passage Origen deals expressly with the problem of the composite quotation. He does not regard the difficulty as serious. He writes (*4th*): *δύο προφητείας ἐν διαφόροις εἰρημένας τόποις ὑπὸ δύο προφητῶν εἰς ἐν συνάγωμην πεποίηκε καθὼς γέγραπ. ἐν Ἡσ.* His evidence is discounted by Dean Burgon on the ground that his codices were bad. As this condemnation is based mainly on the fact that his quotations constantly support 'the few' against 'the many,' it need not delay us at this stage. The significant fact for us is that the MSS used by Origen at different periods during the long course of his literary activity (d. 248) in different centres of Church life read uniformly *Ἡσ. τῷ προφ.*

47. The next witness is Porphyry, the Neo-Platonist philosopher, a leading opponent of Chris-

tianity from the standpoint of philosophic paganism, who endeavoured, among other things, to confute Christians out of their own Gospels. These facts must, of course, be taken into consideration in estimating his evidence, and no doubt they would make him 'scarcely a trustworthy witness' on a question of Christian doctrine. But it is difficult to see that they invalidate his testimony on a simple question of fact. Indeed the character of the work in which the quotation occurs offers the strongest possible guarantee that he found *ἐν Ἡσ. τῷ πρῶτῳ* in his copy of the Gospels. It is impossible to suppose that he invented it in order to create a difficulty. The retort to which he would have exposed himself would have been too obvious and too crushing. As it is, it is not easy to see how, if his opponents were familiar with the existence of the alternative reading, they should not have mentioned it in reply. Controversialists find it difficult to resist the temptation to accuse an opponent of corrupting the text, when he follows a reading to which they are unaccustomed. However easy, therefore, it may be, after the approved style of forensic oratory, to discredit the character of this witness, if one find his evidence inconvenient, we have in this instance a strong guarantee that he gives a true report of what he has seen, and the most venerated names in Church history can do no more. Dean Burgon himself has no scruples about appealing to this same extract from Porphyry for evidence in support of a Traditional reading (*Trad. Text*, p. 286). It would not be easy to find a better illustration of the fact that the help to be derived from Patristic quotations in elucidating the course of Textual History has nothing whatever to do with the personal 'respectability' of the writer from whom it is taken. It is determined entirely by the more tangible considerations of his locality and his date.

48. The other authorities quoted on this text are not included in the chronological limits within which our examination is at present confined. So we must not delay upon them, except to notice that, when a later writer embodies in his own work thoughts derived from one of his predecessors, his evidence is not necessarily worthless. If he repeats an argument which deals directly with the difficulty inherent in a particular reading, the adoption of the argument will be evidence of the continued prevalence of the reading. In any case, we shall have a fresh assurance that the text of his predecessor has been accurately preserved. For instance, Victor of Antioch, as preserved in the catena edited by Possinus, adopts Origen's explanation of the difficulty caused by the reading *ἐν Ἡσ. τῷ πρῶτῳ*. 'ἐπιτεμόμενος οὐδὲν εὐαγγελιστὴς ὡς ὑπὸ Ἡσαίου εἰρημένας τὰς δύο χρήσεις παρέθηκεν.' The fact that in the same catena the text of Victor's quotation from St. Mark contains the reading *ἐν τοῖς προφήταις* (*Trad. Text*, p. 285), is therefore only a fresh instance of the necessity for caution in accepting any reading which reproduces the Traditional Text. Again, Basil's words seem to Dean Burgon to reflect Origen. They present also remarkable affinities with Irenæus. In either case, and especially in the latter, the confirmation of his predecessor's text should not be overlooked.*

49. The next point of reading that we have to consider is the presence or absence of *ἐμπροσθέν σου*. The omission is supported by Irenæus. The

passage (p. 187) is known only in Latin. But there is evidence in the context to show that the translator is at any rate not mechanically substituting the Latin version, with which he must have been familiar, for the Greek text in front of him. For this is the first of the two passages in which he gives '*in prophetis*,' when the uniform reading of the Latin versions is '*in Esaia propheta*.' We may fairly therefore assume that *ἐμπροσθέν σου* was wanting also in the Greek of Irenæus. Origen in one place (4¹²⁰) calls special attention to the absence of the words from the quotation as given by St. Mark. We are quite justified, therefore, in refusing to accept the reference to St. Mark as printed on the preceding page (4¹²⁰) in support of the inclusion of the words. Of the 2 other passages in Origen quoted in favour of the words, one (3⁷⁰⁰) is really a direct quotation from the prophet, in the other (1³⁸⁰) there is nothing in the context to decide whether the words did or did not stand as part of the quotation as Origen made it. The passage in Eus.^{dem} 4³⁰, which is also quoted on the same side, is really indecisive. He gives the quotation at length from the prophet, and then tells us that Mk. makes use of it. He does not write out Mk.'s text at length.

50. In no other case is any ante-Nicene evidence alleged in favour of the Traditional side of any of our 16 readings. In v.⁴ the 'Western' Text is supported by Eus.^{dem}. In v.⁵ Origen 4¹²⁰, 1²⁶ Eus.^{dem} are quoted against the TR, and in v.⁹ Origen and in v.¹² Origen and Eus.^{dem} reappear against it. In 8 out of the 16 no ante-Nicene evidence is alleged on either side.

To sum up our results. The comparative weakness of the *Trad. Text* in ante-Nicene support is obvious at the first glance. The only support it can muster that will stand examination is Irenæus in 2 places out of 3 on v.², and possibly one passage in Origen on v.³.

51. Before we can decide whether this support is wholly lacking to the 'distinctively Syrian' readings, we shall have to consider more closely the attestation and the internal characteristics of the readings in v.² and v.³. In regard to v.², it is certainly remarkable that the reading *ἐν τοῖς πρῶτῳ*, if not genuine, must be a deliberate emendation of the text, of a bolder type than the other readings of the group, and quite in the 'Western' spirit. When we add to this that Irenæus is one of the most constant supporters of the 'Western' Text, it will not seem unreasonable to class this reading provisionally as an early 'Western' reading of exceptionally limited circulation, which was afterwards taken up into the 'Syrian' Text. We shall thus cease to regard it as 'distinctively Syrian.' In v.³, if the reading in Orig. 1³⁸⁰ be accepted, there would be nothing unnatural in classing it as Alexandrian. It is attested by Δ, one of the small group which, as we shall see, have a large Alexandrian element in this Gospel. It also may disappear from the 'distinctively Syrian' list.

So much then for the ante-Nicene evidence. The passages clearly do not afford sufficient ground for any wide generalization. But enough has been said to illustrate the method of investigation which has to be followed, and the results as far as they go are in general agreement with what Dr. Hort's words would lead us to expect.

52. We have now completed our examination of

* The passage in Basil runs as follows: ὁ μὲν Ματθαῖος τῆς κατὰ ἑσπέραν γινόμενης λειτουργίας γράσας ὡς αὐτὸς εὐαγγελιστὴς Ἰησοῦ Χριστοῦ υἱοῦ Δαβὶδ, υἱοῦ Ἀβραάμ. Ὁ δὲ Μάρκος ἀρχὴν τοῦ εὐαγγελίου τὸ Ἰωάννου πρεσβυτέρου κήρυγμα εἰσάγων Ἀρχὴ τοῦ εὐαγγελίου Ἰησοῦ Χριστοῦ καθὼς γέγραπται ἐν Ἡσ. τῷ πρῶτῳ. Φατὴ βεβαιῶται, κ.τ.λ. In Irenæus we read: Ματθαῖος δὲ τὴν κατὰ ἀνθρώπους αὐτοῦ γινόμενην λειτουργίαν λέγων· Βίβλος γινόμενος Ἰησοῦ Χριστοῦ υἱοῦ Δαβὶδ, υἱοῦ Ἀβραάμ, καὶ τοῦ δι' [Ἰησοῦ] Χριστοῦ ὃ γίνονται αὐτὸς ὡς ἀνθρώπων· μαρτυροῦν οὐδὲν τὸ εὐαγγέλιον τοῦτο . . . Μάρκος δὲ ἀπὸ τοῦ

προφητικοῦ πνεύματος τοῦ ἐξ ὧντος ἐκείνους τοὺς ἀνθρώπους τὴν ἀρχὴν εἰσαίνατο λέγων· Ἀρχὴ τοῦ εὐαγγελίου Ἰησοῦ Χριστοῦ ὡς γέγραπται ἐν Ἡσ. τῷ πρῶτῳ.

It should be noticed that Basil here passes straight from the mention of the prophet's name to the quotation which is taken from him—omitting the intervening quotation from Malachi. In this he is supported by Epiphanius and Victorinus. It seems not unlikely that this represents another attempt to escape the difficulty.

the distinctively Syrian readings under the different heads suggested by Dr. Hort's analysis, §§ 132-168. And we have before us examples which will help to give 'actuality' to most of the different classes of phenomena to which he calls attention. We are therefore in a position to estimate to some extent the strength of the case against the Traditional Text. If this passage be, as there is no reason to doubt, a fair specimen of the general character of that text, as indicated by the internal evidence of its 'distinctive readings,' if some of those readings are 'conflate,' if they prove on careful examination to be destitute of ante-Nicene support, we can understand why critics should be driven to the conclusion that, in spite of the vast number of witnesses that support Traditional readings, the true text must be sought elsewhere. We can see also in its true proportions the nature of the issues at stake between the rival schools. In the vast majority of cases the differences relate to points in themselves exceedingly minute and trivial—the loss or the preservation of delicate distinctions in style and phraseology between different Evangelists, the question whether a particular saying of our Lord is recorded by one witness or by two; at the highest, whether narratives of incidents or recorded words which admittedly embody traditions of the Apostolic period, and have the sanction of centuries of ecclesiastical use, were or were not actually incorporated by the Evangelists themselves in the Gospels that they wrote.*

53. Again, a careful comparison of these readings with their rivals will help us to understand why it has now come to be admitted on both sides that the differences between the Traditional Text and the 'Neutral' or the 'Western' cannot be explained as due merely to the normal accidents of transmission. The changes bear too clearly stamped upon them the marks of method and deliberation, and have been carried out too consistently, not to be the result of design. Dr. Hort expressed his opinion on this point with remarkable boldness and precision, asserting that a thorough examination of the facts pointed not to one only, but to two careful revisions under editorial supervision—the first after the death of Origen, and the second about the middle of the 4th century. This second revision he saw reason, as has been already pointed out, to connect with the Church of Antioch. None of his conclusions has roused so much scorn and indignation among his opponents, or has been so unsparingly denounced as groundless and visionary. But time and further study under the stimulus of controversy have brought a more intelligent appreciation of the phenomena. Dean Burgon (*Trad. Text*, p. 234), though 'not so simple as to pretend to fix the precise date and assign a definite locality to the fount source, or sources, of our perplexity and distress,' yet suspects 'that in the little handful of authorities which have acquired such a notoriety in the annals of recent Textual Criticism, at the head of which stand Codices B and N,

* Dr. Salmon seems hardly to do justice to the attitude of WH on this last point. It is true, in a sense, that, as he says (p. 155), they investigated the subject merely as a 'literary problem.' It is difficult to see how, if their work was to have any scientific value, and to provide materials on which a student of the Apostolic age can work with confidence, they could have done otherwise. All considerations of immediate edification had to be rigorously excluded. At the same time they would be the last people in the world to dispute Dr. Salmon's doctrine of 'the well-illuminated penumbra.' A highly developed literary conscience does not necessarily imply a rigidly mechanical theory of Inspiration.

The text adopted by the Revisers really represents that kind of compromise which Dr. Salmon's argument would desiderate. In it distinct recognition is given to 'prescriptive rights.' Passages like the *pericope de adultera* and Mk 16:7-8 are retained in their familiar places for public use. At the same time, the student receives due warning of the difference in authentication between these passages and their surroundings.

are to be recognized the characteristic features of a lost family of (once well-known) 2nd or 3rd cent. documents, which owed their existence to the misguided zeal of some well-intentioned but utterly incompetent persons who devoted themselves to the task of correcting the Text of Scripture, but were entirely unfit for the undertaking.' Mr. Miller sees reason to place this editorial activity at an even earlier period (*Causes of Corr.* p. 22, note); 'I am inclined to believe that, in the age immediately succeeding the apostles, some person or persons of great influence and authority executed a Revision of the NT, and gave the world the result of such labours in a "corrected Text." The guiding principle seems to have been to seek to *abridge* the Text, to lop off whatever seemed redundant, or which might in any way be spared, and to eliminate from one Gospel whatever expressions occurred elsewhere in another Gospel. Clauses which slightly obscured the speaker's meaning, or which seemed to hang loose at the end of a sentence, or which introduced a consideration of difficulty,—words which interfered with the easy flow of a sentence,—everything of this kind, such a person seems to have felt at liberty to discard. But, what is more serious, passages which occasioned some difficulty, as the *pericope de adultera*; physical perplexity, as the troubling of the water; spiritual revulsion, as the agony in the garden,—all these the reviser or revisers seem to have judged it safest simply to eliminate. It is difficult to understand how any persons in their senses could have so acted by the sacred deposit; but it does not seem improbable that at some very remote period there were found some who did act in some such way. Let it be observed, however, that, unlike some critics, I do not base my real argument upon what appears to me to be a not unlikely supposition.'

54. When we add to this that the result of the revision was to produce 'a Thucydidean compactness, condensed and well pruned according to the fastidious taste of the study,' 'exactly that which does not in the long-run take with people who are versed in the habits of ordinary life' (*Trad. Text*, p. 291), we have a picture of the characteristic differences between the rival texts, the main outlines of which it would be difficult to improve, blurred though they are in parts by a failure to discriminate between features peculiar to the Western and features belonging to both the Western and the Neutral types. Students may safely be left to decide for themselves between the rival methods of explaining the character and accounting for the origin of these differences.

It is true that in neither case has any record of this work of revision survived in historical tradition. Mr. Burkitt,* however, has shown, by reference to a far more complete transformation in a biblical text—the exchange of the LXX version of Daniel for Theodotion's by the Church of Africa during the 3rd cent.—that no conclusion unfavourable to Dr. Hort's hypothesis can be based on this silence.

55. For the sub-Apostolic period, to which Mr. Miller would relegate us, historical evidence is at its scantiest, so that the absence of any allusion to the revision which he postulates has virtually no weight at all. Such writings, however, as have survived to show what manner of men the Church produced during that period do not indicate any very high degree of literary power or intellectual distinction. What a delightful surprise it would be, if among the Egyptian papyri even a fragment could come to light representing original work by some leading member of this early-second-century school of critics, who, unlike any other Greek writers of their time, loved Thucydidean

* *The Old Latin and the Itala*, pp. 7, 8.

compactness of style, not wisely, indeed, if it betrayed them into tampering with the text of Scripture, but with a masterful power of reproducing it, and who anticipated by seventeen centuries modern scientific perplexities. It might do far more to shake the foundations of Dr. Hort's position than the discovery of the early history of the cursive script, which seems to Mr. Miller so clear a proof that the world is drifting away from his opponents (*Trad. Text*, p. 238 f.).

56. The points that remain under this head demand reverent handling. They belong to that side of the subject where the textual critic is bound to give an account of the position that he occupies on fundamental articles of Christian faith. Dean Burgon claims that faith in the Inspiration of Scripture carries with it, as a corollary, faith in a special Providence watching over the transmission of the text, and that the same ecclesiastical tradition which guarantees the list of books which are to be accepted as Canonical must be held also to guarantee the type of text which all believers in the authority of the Church are bound to uphold (*Trad. Text*, ch. i.).

57. Let us take these points in order. If there is one doctrine more than another that has in the Providence of God been forced on the attention of Christian students during the course of the last century, it is the doctrine of Inspiration. And if any result with regard to it may claim to be established by the trial through which God has seen fit to test and discipline the faith of those that believe in Him, it is surely this: that there is no subject on which *a priori* arguments are so liable to be upset when they are brought to the test of facts. Here as elsewhere we are forced to acknowledge that God's ways are not as our ways. The course of events has followed again and again a very different line from that which we should naturally have anticipated. And while we may, I think, confidently affirm that the result of this last century of freest discussion has been to deepen and strengthen the faith of men in the reality of the inspiration of the Prophets of the Old Covenant, and of the Apostles and Evangelists of the New, it has shown that there is no royal road to the discovery of the laws by which Inspiration works, except through the most patient and attentive study of the books which owe their form and their contents to its influence.

58. The Church in the 2nd cent. was led by processes, which we have no reason to distrust because they were to a large extent 'instinctive,' to make a provisional selection of the books that had a claim to be regarded as Canonical. The list of books 'of whose authority was never any doubt in the Church,' is amply sufficient as a standard by which we can estimate the claims of those whose credentials are less complete. Centuries of pious use and devout meditation, even if sometimes 'not according to knowledge,' have shown the rich stores of spiritual fruit which can be drawn from them. But the Church, as a whole, has never attempted to put forward an authoritative definition of Inspiration. This being so, we are clearly not in a position to formulate any theory with regard to the course which the Providence of God may be assumed to have followed in regard to the preservation, in literal exactness through the ages, of the text as it left the hands of the inspired writers. Even the languages in which the books are written are living languages no more. Not one Christian in 10,000 can read either Testament in the original. We have therefore no grounds *a priori* to expect that kind of accuracy in the Traditional Text which Dean Burgon would postulate for it.

59. 'But,' it will be said, 'you must at least admit that the claims of the Traditional Text on our

acceptance rest on the same Church authority that guarantees the Canon.' Supposing the contention to be true, the patent differences which exist to-day in point of actual content between the Greek, Latin, Syriac, and English Bibles would show that we must expect to find in Textual Criticism, as we find in regard to the contents of the Canon, many questions which cannot be foreclosed by an appeal to 'authority.' The text recognized by the most explicit conciliar decision as alone authoritative for the Latin part of Western Christendom is fundamentally distinct from that for which Dean Burgon claims the prescriptive sanction of undisputed and universal possession. But the contention itself will not bear examination. The differences of use between the different centres of Christendom in regard to the contents of the Canon at the beginning of the 4th cent. were perfectly definite, and the problems arising out of the differences claimed immediate and special attention. The *Ecclesiastical History* of Eusebius is a permanent memorial of the interest taken in them, and of the general principles that were applied, at least in some quarters, to their solution. But there is nothing even remotely parallel to this in regard to the development of thought on the problems of Textual Criticism. If it is true, as Dean Burgon asserts (*Trad. Text*, p. 11), 'that in the time of Origen the first principles of the science were not understood,' it would hardly be rash to hazard the assertion that Origen at least shows more interest in the subject, and takes more pains to compare the readings of different MSS, and to mention any variants that he found existing, than all the Greek Fathers from Athanasius to Chrysostom put together.*

It would indeed be strange if, in the stress of the battles which they had to fight for the defence and elucidation of the fundamental verities of the Christian faith, the great protagonists of the Nicene period and of that which immediately succeeded it, had had time to spare for such comparative minutiae. And, unless it can be proved that they ever took more than an occasional and passing interest in the question, what is it but a gross abuse of a great principle to appeal to their authority in a matter like this, as if it stood on the same level as their authority on the great problems which we may well believe they were raised up by God to solve for the guidance, not of their own generation only but of all the generations that were to come after them?

60. We must pass on now to examine such specimens as the same passage (Mk 11²⁸) provides of characteristic readings belonging to the other, and, if the conclusion we have reached with regard to the Traditional Text be right, presumably earlier types of text.

The first of these to attract attention is the 'Western.' It will be worth while to print the list *in extenso*, marking the readings which it shares with other types.

- (1) V.² ὡς for καθὼς, also Syriac.
- (2) om. ἐγώ, also Neutral. Ina. Syr. and Alex.
- (3) V.³ τοῦ θεοῦ ἡμῶν or ὁμῶν for αὐτοῦ, with further addition from the prophet in c.
- (4) V.⁴ ἐν τῇ ἐρήμῳ βασιλεῶν καὶ κηρύσσων for ὁ β. ἐν τῇ ἐρ. κηρ.

* The *prima facie* grounds for this assertion are strong enough to justify its being put forward for examination. Unfortunately, no systematic collection has yet been made of the materials by which it could be tested. The list of ref. to passages in the Fathers in which express reference is made to *ἐκτίγναι*, which Nestle has compiled (*Intr.*, Appendix II.) from Tischendorf's *Apparatus Criticus*, is a preliminary step of great importance. It is much to be hoped that the matter will not be allowed to rest there.

- (5) V.⁵ ἐν Ἰορδάνῃ for ἐν τῷ Ἰ. ποτάμῳ with transp. of ὑπ' αὐτοῦ.
 (6) V.⁶ δέ for καί, also Syrian.
 (7) Vv.⁶⁻⁸ completely recast (see above). Chiefly assimilation to parallels in other Gospels. Note, however, δέρριν (= δέρριν) for τρίχας.
 (8) V.⁹ ταῖς ἡμέραις ἐκείναις for ἐκ. τ. ἡμ.
 (9) V.¹⁰ om. εὐθύς.
 (10) V.¹⁰ ἡνυγμένους for σχιζόμενους.
 (11) V.¹⁰ εἰς for ἐπ', also Neutral. Against Syr. and Alex.
 (12) V.¹¹ om. ἐγένετο.
 (13) V.¹² add τὸ ἄγιον.
 (14) V.¹² ἐκβάλλει αὐτὸν for αὐτ. ἐκβ.
 (15) V.¹² ἡμέρας τεσσαράκοντα for τεσσ. ἡμ. Assimilation.
 (16) V.¹⁴ καί for δέ, also Neutral. Against Syr. and Alex.
 (17) V.¹⁴ add τῆς βασιλείας, also Syr. Assimilation.
 (18) V.¹⁵ λέγων perhaps for καὶ λέγων.
 (19) V.¹⁵ πεπλήρωται οἱ καιροὶ for πεπ. ὁ καιρὸς.
 (20) V.¹⁶ αὐτοῦ for Σίμωνος.
 (21) V.¹⁸ πάντα for τὰ δέκτνα. Assimilation.
 (22) V.²⁰ ἡκολούθησαν αὐτῷ for ἀπῆλθον ὀπίσω αὐτοῦ.
 (23) V.²¹ εἰσπορεύονται for εἰσπορεύονται.
 (24) V.²¹ add αὐτοῦς after ἐδίδασκεν.
 (25) V.²² om. καί.
 (26) V.²² om. εὐθύς.
 (27) V.²² om. αὐτῶν.
 (28) V.²⁵ om. ὁ Ἰησοῦς.
 (29) V.²⁵ τοῦ ἀνθρώπου for αὐτοῦ.
 V.²⁵ add πνεῦμα ἀκάθαρτον.
 (30) V.²⁶ Recast (see above). Note κράξας (cf. Syrian) for φωνήσαν, and ἀπό for ἐξ.
 (31) V.²⁷ πρὸς αὐτοῦς, with Syrian and perhaps Alex.
 (32) V.²⁸ τίς ἡ διδαχὴ ἐκείνη ἢ καὶ αὐτὴ ἡ ἐξουσία for τί ἐστὶν τοῦτο; διδαχὴ καὶ κατ' ἐξουσίαν.
 (33) V.²⁸ om. πανταχοῦ, with Syrian.

To these we should probably add, as we have seen—

- (1b) V.³ ἐν τοῖς προφήταις for ἐν Ἡσ. τῷ προφ.

61. The difference in general character between these readings and the 'distinctively Syrian' series is obvious. Without for the most part seriously affecting the sense, they yet show, if we take the Neutral text as our standard, a remarkable freedom in altering the form of expression, 'the love of paraphrase,' which Dr. Hort's description (§ 173 f.) would have led us to anticipate. And in most cases, as we have seen, there is little doubt that the change was made by the 'Western' scribe. This fact will help us to realize the true character of a reading such as δέρριν in (7), which, if it stood alone, or was supported only by one or two carefully chosen examples, might quite easily appear unquestionably original, or, at least, a correction due to the author himself. It is in itself remarkably vigorous and appropriate. And, if we were dealing with the work of scribes of a normal type, we should say at once that they could not have had either the inclination or the capacity to invent it. But the matter presents a different aspect where we find in the same company readings like (29) τοῦ ἀνθρώπου for αὐτοῦ, (20) αὐτοῦ for Σίμωνος, (21) πάντα for τὰ δέκτνα, (22) ἡκολούθησαν for ἀπῆλθον ὀπίσω, (30) κράξας for φωνήσαν, (10) ἡνυγμένους for σχιζόμενους. There is no such ground for attributing these to the hand of the author. And a scribe capable of introducing them may well have been capable of changing τρίχας to δέρριν if the word occurred to him. This assumption is strengthened when we note that this spirit of licence has affected not single words only but whole sentences, e.g. (7) (30) (32); where, in like manner, it would seem im-

possible to attribute the readings to a revision by the author himself.

This case, we may notice in passing, is a good example of the importance of attending to what Dr. Hort called the 'Internal Evidence of Documents,' before deciding finally on particular readings. No conclusion can safely be built on a mere selection of readings, however striking in themselves.*

62. The general character of these readings, then, is not such as to inspire confidence. It is not likely that any editor will be found to accept them as a whole, and construct his text throughout from the documents that contain them. Editions, indeed, like Professor Blass's edition of the Acts and St. Luke, which enable the two recensions to be studied side by side, supply a real need. At the same time, the character of these readings, and the very early date at which they must all have originated, will ensure for them a large share of attention. Certainly, the most fruitful work that has been done in this department of Textual Criticism in recent years, if we except the closely kindred work done by Professor Sanday and Mr. Burkitt on the early history of the Latin Version, is work that has been devoted to the investigation of their origin. The first step was taken by Mr. Rendel Harris in the 'Study of the Codex Bezae,' printed in the series of Cambridge *Texts and Studies* in 1891. The thesis of this stimulating but inconclusive essay was that the origin of the peculiar readings in the Greek text of Codex Bezae, the primary authority for the Western Text in its Greek dress, can be traced to the influence of the Latin version that accompanied it in various stages of its history. At the same time, he claimed to trace the Latin version, in the form in which it has accompanied D, back to Carthage early in the 2nd century. One direct result of his work was the publication of two vols. by Dr. Chase on 'The Old Syriac element in Codex Bezae' and 'The Syro-Latin Text of the Gospels,' in which he collects the evidence in support of the thesis that the true source of the peculiar elements in the Bezan text is to be found, not in Latin but in Syriac. And he emphasized, following a suggestion thrown out by Dr. Sanday in a review of Rendel Harris, the claims of Antioch as the centre from which this influence had spread. It is difficult to doubt that the swing of the pendulum will ultimately bring us back to a simpler, if more commonplace, solution, and we shall be content to believe that the bulk of the Western readings originated in Greek, excepting those which may fairly be regarded as individualisms of D. The influence of Syriac can hardly have been more than occasional and spasmodic. If the suggestion with regard to Antioch can be established, important consequences will flow from it. It would be rash, perhaps, to say more at present.† In any case, it is in striking agreement with the opinion expressed by WH (§ 153): 'On the whole, we are disposed to suspect that the "Western" Text took its rise in North-Western Syria or Asia Minor, and that it was soon carried to Rome, and thence spread in different directions to North Africa and most of the countries of Europe. From North-Western Syria it would easily pass through Palestine and Egypt to Ethiopia. But this is at present hardly more than a speculation; nor do any critical results depend upon it.' It is interesting, however, to notice that, as Mr. Lake has pointed out in his little book on the *Text of NT* (p. 89), this view

* This caution is specially necessary in judging of any list of readings which from the nature of the case can consist only of specimens: e.g. in Blass's article on 'The Western Text of St. Mark,' and in Nestle's 'Critical Notes on various Passages.'

† See esp. Chase, *Syro-Latin Text*, p. 141.

would at the same time satisfactorily account for most of the phenomena in the remarkable series of interpolations in Acts which Prof. Ramsay has sought to elucidate.

63. A further question, of some importance with regard to this class of readings, still remains. Even if it be granted that, as a whole, the 'Western' represents an aberrant type of text, 'it does not follow,' as WH themselves point out, (§ 237), 'that none of its distinctive readings are original.' The special class of 'Western non-Interpolations' to which they called attention may or may not be regarded as favourable specimens.* At any rate they show that WH did not start, as Dr. Salmon's humorous illustration might lead the unwary to conclude, with an invincible prejudice against any reading that might be called 'Western.' The fact is that their uniform habit, in their preliminary examination of the text of each book of NT, was to make a list of all the Western readings that were not obvious corruptions. In Mk. more than 200 such readings were tabulated. The list so made was then subjected to repeated revisions, and no reading of any interest was passed over without full consideration. In Mk. more than 60 of these readings were recorded in their first edition under one form of notation or other on the same page as the text. In the smaller edition 12 rank as strictly alternative readings, 51 are printed as Noteworthy Rejected Readings in a list at the end of the volume. Whether this list would have received large additions had they had access to Syr-sin is an interesting question on which something must be said presently. The only point which it is worth while to emphasize at this stage is this. They state expressly that they were not prevented by any genealogical considerations from accepting any 'Western' reading. Only, they found very few that seemed to them commended by internal evidence (§§ 269-273).

We must postpone for the present the question, raised by Mr. Burkitt,† whether we are bound to attach such weight to the demonstrable antiquity of the readings supported by a combination of the earliest Syriac and the earliest Latin authorities as to enable us to dispense with the necessity of applying the test of 'the Internal Evidence of Documents' to the readings of this as of any other group, before taking it as the foundation for a reconstruction of the text.

64. The Alexandrian readings in our passage are few, but thoroughly representative of the class. They include—

- (1) The insertion of *καὶ* before *κηρύσσων* in v.⁴.
 - (2) The omission of *ἐλεῖθῶν*, with various rearrangements of the words in v.²¹.
 - (3) The insertion of 'Ea in v.²⁴.
 - (4) *οὐδαμῶς* for *οὐδα* in the same verse.
- To these we should add—
- (5) V.³ ins. *ἐγώ*, also Syrian.
 - (6) V.¹⁴ *δέ* for *καὶ*, also Syrian.
 - (7) V.²⁷ *πρὸς αὐτοὺς*, perhaps Alex. as well as Western and Syrian.

These readings are relatively far less numerous and less startling than the 'Western,' and in consequence their identification by WH as a distinctive class was a triumph of delicate and patient analysis,‡ and writers who are not alive to the necessity for finding a clue through the maze of the *concordia discors* of the small group of demonstrably early authorities, still find it possible and

convenient to despise the evidence on which this part of WH's classification rests. No one, however, who will be at the pains to study the readings of the group NCLA through the rest of the Gospel will doubt either the soundness or the importance of the conclusion. WH tabulate upwards of 70 examples, printing 11 either in text or margin; see 1²¹.²⁴ 3⁵ 7 4⁸ 8²¹.²⁵ 10⁴³ 11¹¹ 15¹. The readings similarly treated, 3¹⁷ 4²³ 5²³ 6¹².²² 22 9²⁰ 12³⁰ 15¹⁴, seem to differ from these only by the fact that they were adopted by the Syrian revisers. We must not, however, forget that these are all picked specimens, and cannot be fairly judged apart from their companions.

65. The results of our examination were not favourable to the genuineness of any of the 6 (or 7) examples that are immediately before us. Our study will, however, help us to appreciate the accuracy of WH's sketch of the general characteristics of the class (§ 183). 'The changes made have usually more to do with language than matter, and are marked by an effort after correctness of phrase. They are evidently the work of careful leisurely hands, and not seldom display a delicate philological tact which unavoidably lends them at first sight a deceptive appearance of originality.' 'Some of the modes of change described above as belonging to incipient paraphrase occur as distinctly here as in the Western texts, though as a rule much more sparingly; and the various forms of assimilation, especially harmonistic alteration and interpolation in the Gospels, recur likewise, and at times are carried out in a very skilful manner.'

The example in v.⁴ is an excellent specimen of the class referred to in the closing sentence of § 184: 'The most instructive distributions, as exhibiting distinctly the residual pre-Syrian text, which is neither Western nor Alexandrian, are those produced by the simultaneous aberration of the Western and Alexandrian texts, especially when they severally exhibit independent modes of easing an apparent difficulty in the text antecedent to both.'

66. The subsidiary attestation that they receive both from versions and from ante-Nicene Patristic quotations is remarkable.

In (1) they have the support of the Bohairic.

In (2) (in one form or another) of Boh Syr-sin and some old Latin MSS, besides Origen in 4 places.

In (3) they are supported by Origen and Eusebius.

In (4) by Boh Orig² Eus⁴, besides Orig^{int} 1 Iren^{int} 1 Tert.

In (5) by Orig & Eus.

In (6) by Orig Eus.

67. We come now to the last and in many respects the most difficult part of our task—the examination of the evidence for 'the residual pre-Syrian Text, which is neither Western nor Alexandrian,' and to which in consequence WH gave, as we have seen, the name 'Neutral.' The specimens before us, with the authorities attesting them, are these—

- (1) V.³ *τῷ Ἑρ. τῷ προφ.*, NB(D)LA 1 33 Latt Syr-vg Boh: Orig Iren² Porph.
- (2) V.³ om. *ἐγώ*, BD am fu Syr-vg Boh: Iren Orig¹ Tert.
- (3) V.⁴ 'I. ὁ βαπτίζων ἐν τῇ ῥ. κηρύσσων, B A3.
- (4) V.⁵ *ὁ π' αὐτοῦ* after *ἐβαπτ.*, BL 33 (N 69).
- (5) V.⁶ *καὶ* for *δέ*, NBL 33 Lat-vg b d ff¹ g¹ Boh
- (6) V.⁶ *ὁ ἰω.* for *ἰω.*, NBPL al¹ 1 69.
- (7) V.⁸ om. *μέν*, NBL 33 69: Orig.

 (24) V.²⁸ *καὶ* for *δέ*, NBCDLAM 33.
 (25) V.²⁸ add *πανταχοῦ*, BC(N*L) 69 b e 9 Boh.

68. The internal evidence, as we have seen, is strongly in favour of the 'Neutral' Text in many of these cases. In none is it clearly unfavourable. What are we to say of the documents by which it is supported?

The first point that will strike us as we go through the list is the variation in size in the attesting groups. At times, *e.g.*, (1) we have an array as strong and varied in its contents as we could desire, including 7 good MSS, all the early Versions, and abundant ante-Nicene Patristic evidence. Side by side with this we find in (3) only one uncial and one cursive. In fact the only constant supporter of the whole series of readings is the single uncial MS, B. Clearly we must test our ground most carefully if we are to rest securely on evidence that is liable from time to time to be reduced to such slender proportions.

69. What, then, is the real foundation for the authority which WH claim for B?

First and foremost it rests, they tell us, on 'Internal Evidence of Readings.'^{*} They claim that the great majority of readings, even when but slenderly supported, approve themselves as genuine after repeated examination. The 25 examples before us certainly tend to confirm this judgment. The case does not, however, rest purely on internal considerations. It is confirmed, so far as the evidence at our disposal will enable us to speak, by 'genealogy.' In this connexion the reading in v.⁴ is once more most instructive. It supplies us with a clear proof of the existence of a third type of text distinct alike from the Western and Alexandrian, and presenting a reading which may well explain the origin of both, and it helps us to appreciate the significance of the fact that in other cases the same MS, which in cases like this is seen to preserve a text independent of both the other early groups, supports now one and now the other of these groups against its rival. In other words, except in the comparatively rare cases in which both the Western and Alexandrian text have gone astray in the same place, B has uniformly the support of one set of authorities or the other, *i.e.* it would naturally rank both as an early Western authority as compared with the Alexandrian group, and as an early Alexandrian authority against the Westerns. Or, to put the same thing from the

other side, both the Western and the Alexandrian texts are fundamentally 'neutral' in a large proportion of their readings. And the further back we can trace either of them, and more especially the Western, where the evidence, though still far from complete, is yet relatively abundant, the more closely do its readings as a whole approximate to the 'Neutral' Text.

70. In the light of this fact we may estimate more truly the extent of the confirmation which the text of B receives from other primary authorities. *E.g.* in the passage before us it is supported by N in 19, by L in 18, by 33 in 12, by D in 9 out of the 25 cases. C is extant in 10, and supports B in 3. Latin evidence of one kind or another supports B in 16, the Bohairic in 13, Syr-sin in 2 out of 8 passages where it definitely supports one or other of the variants (in 3 passages Syr-sin presents us with a new variant). Origen, who in some cases supports the rival reading as well, is quoted in support of B in 8 cases, and Irenæus in 2. These results correspond closely with the anticipations which Dr. Hort's words in § 235 would have led us to form.

71. In the case of N and the oldest form both of the Latin and of the Syriac Versions, it is important to examine the extent and the limitations of their support more closely.

Let us take first the relation of these two MSS of the Greek text to one another. The amount of agreement between N and B in readings in which they stand almost or altogether alone is so great that there can be no doubt, on 'genealogical' grounds, that for a considerable part of their contents they preserve unchanged the text of a common original. What, then, we are forced to ask, is the length of the interval which separates each of them from this common ancestor? Or, in other words, to what extent are we justified in regarding their testimonies as 'independent'?

72. To Mr. Miller the case seems very simple. The MSS were certainly written in the same generation; in part, as it would seem, by the same scribe. What more is wanted, in view of their admitted agreement in a peculiar type of text, to prove that they are 'twin products of a lost exemplar,' and to justify us in quoting them as 'N-B,' linked by a hyphen, as certain groups of cursives are linked, and as Mr. Cronin (*JTS* vol. ii. p. 390) has proved that the Codices Purpureæ (N-S-Sinop) should be linked, because they are all derived directly from one and the same MSS?

Dean Burgon was more cautious. His minute comparison of the two MSS had impressed him very strongly with the extent not only of the agreement, but of the differences between them. He writes of them (*Trad. Text*, p. 33) as 'closely resembling one another, yet standing apart in every page so seriously that it is easier to find two consecutive verses in which they differ than two consecutive verses in which they entirely agree.' And, though he would have it that the 'idea of fixing the date of the common ancestor of B and N is based upon pure speculation' (groups of attested variations being for some unexplained reason excluded from the category of facts), yet he was perfectly well aware that the differences between the two MSS required 'several generations' of transcription to account for them. Only he was able to persuade himself that, at a time when the demand for fresh copies must have been very great, these generations could 'have been given off in two or three years' (*ib.* p. 73).

73. The treatment of the problem in WH (*Intr.* §§ 287-304) is very different in character. Few better examples could be found of Hort's inexhaustible fertility in conceiving hypotheses which might fit the

^{*} Dr. Bernhard Weiss has published in various numbers of *Texte und Untersuchungen* a careful examination of the text of the leading uncials as determined exclusively by a study of 'the Internal Evidence of Readings.' His results are summarized conveniently in Kenyon's *Handbook to the Textual Criticism of the NT*, p. 264 f. They supply a striking and entirely independent corroboration of WH's estimate of the relative purity of the text of B.

The present writer is glad of this opportunity of calling attention to Dr. Kenyon's *Handbook*. It contains, besides other matter which none but so expert a palaeographer could supply, a statement of the questions at issue in the present state of Textual Criticism which is eminently clear and fair.

facts by which he was confronted, and the patient consideration which he was prepared to give to each before he pronounced judgment on it. The passage is too long to extract, and too condensed already to admit of further condensation. It cannot, however, be too earnestly commended to the consideration of all students.

Far too many of the theories that have been recently put forward have been framed without reference to the facts to which these paragraphs call attention. Meanwhile we must content ourselves with the summary of his conclusions, given by Hort himself (*ed. min.* p. 559): 'If B and \aleph were for a great part of their text derived from a proximate common original, that common original, whatever might have been its own date, must have had a very ancient and a very pure text. There is, however, no tangible evidence for this supposition; while various considerations, drawn from careful comparison of the accessory attestation of readings supported by NB together, by B against \aleph , and by \aleph against B respectively, render it morally certain that the ancestries of B and of \aleph diverged from a point near the autographs, and never came into contact subsequently; so that the coincidence of NB marks those portions of text in which two primitive and entirely separate lines of transmission had not come to differ from each other through independent corruption in the one or the other.'

74. The passage of Mark already before us will supply material by which we can at once illustrate and test the force of the argument on which this conclusion rests. We have already examined the most remarkable of the readings in which \aleph and B agree in the course of our study of the 'Syrian,' 'Western,' and 'Neutral' texts in these verses; and certainly the standard of excellence which the two MSS reach in combination is very high. Whatever the date of their common original, 'it must,' judging by internal considerations in those parts of it which we can at once restore with confidence, 'have had a very pure text.' The accessory evidence for a large proportion of these readings makes it clear at the same time that it is also 'a very ancient' text.

75. The following list of readings in which the two authorities disagree will give us examples of the 'various considerations' to which Dr. Hort alludes, and so enable us to appreciate the rest of the passage:—

- (1) V.¹ + $\nu\lambda\omicron\upsilon$ $\theta\epsilon\omicron\upsilon$, \aleph^* BDL etc.: Iren $\frac{1}{2}$ Orig^{int}.
— \aleph^* : Iren $\frac{1}{2}$ Orig Syr-hr.
- (2) V.² — $\epsilon\gamma\omega$, BD am fu Syr-vg Boh: Iren Orig $\frac{1}{2}$ Tert.
+ \aleph APLA etc. Syr-hcl: Orig $\frac{1}{2}$ Eus.
- (3) V.² $\alpha\pi\omicron\sigma\tau\epsilon\lambda\lambda\omega$, B etc. $\alpha\pi\omicron\sigma\tau\epsilon\lambda\omega$, \aleph Boh.
- (4) V.⁴ $\epsilon\gamma\acute{\epsilon}\nu\epsilon\tau\omicron$, B etc. $\kappa\alpha\iota$ $\epsilon\gamma\acute{\epsilon}\nu\epsilon\tau\omicron$, \aleph^* (Boh).
- (5) V.⁴ $\kappa\eta\rho\upsilon\sigma\sigma\omega\upsilon\upsilon$, B 33. $\kappa\alpha\iota$ $\kappa\eta\rho\upsilon\sigma\sigma\omega\upsilon\upsilon$, \aleph LA Boh.
- (6) V.⁵ $\kappa\alpha\iota$ $\epsilon\beta\alpha\pi\tau\acute{\iota}\zeta\omicron\upsilon\tau\omicron$, B etc. $\epsilon\beta\alpha\pi\tau.$, \aleph^* 69 a.
- (7) V.⁷ $\omicron\pi\iota\sigma\omega$, B: Orig $\frac{1}{2}$. $\omicron\pi\iota\sigma\omega$ $\mu\omicron\upsilon$, \aleph etc.
- (8) V.⁸ $\pi\upsilon\epsilon\upsilon\mu\alpha\tau\iota$ $\alpha\gamma\iota\omega$, BL b Lat-vg. $\epsilon\upsilon$ $\pi\upsilon$. $\alpha\gamma.$, \aleph etc.
- (9) V.⁹ $\epsilon\gamma\acute{\epsilon}\nu\epsilon\tau\omicron$, B (a). $\kappa\alpha\iota$ $\epsilon\gamma\acute{\epsilon}\nu\epsilon\tau\omicron$, \aleph (ff² mt Boh) etc.
- (10) V.¹⁰ $\epsilon\iota\varsigma$, BD 69 a (g¹). $\kappa\alpha\iota$ $\mu\epsilon\lambda\omicron\upsilon$ $\epsilon\pi\prime$, \aleph 33 Latt Boh.
- (11) V.¹¹ $\phi\omega\eta\eta$ $\epsilon\gamma\acute{\epsilon}\nu\epsilon\tau\omicron$, B etc. $\phi\omega\eta\eta$, \aleph^* D ff² mt.
- (12) V.¹⁴ $\kappa\alpha\iota$ $\mu\epsilon\tau\acute{\alpha}$, BD^{int} a (c) Boh? .
 $\mu\epsilon\tau\acute{\alpha}$ $\delta\acute{\epsilon}$, \aleph ALA etc. Latt Syrr: Orig Eus.
- (13) V.¹⁵ $\kappa\alpha\iota$ $\lambda\acute{\epsilon}\gamma\omega\upsilon$, BKLA unc² a b ff¹ g² Lat-vg Boh Syr-vg.
— \aleph^* c mt Syr-sin: Orig.
- (14) V.¹⁸ $\eta\kappa\alpha\lambda\omicron\upsilon\theta\omicron\upsilon$, B. $\eta\kappa\alpha\lambda\omicron\upsilon\theta\eta\sigma\alpha\upsilon$, \aleph etc.

- (15) V.¹⁹ $\delta\lambda\iota\gamma\omicron\upsilon$, BDL 1 a b ff² Syr-vg (sin) Boh. $\acute{\epsilon}\kappa\epsilon\iota\theta\epsilon\upsilon$, \aleph^* (33).
- (16) V.²¹ $\epsilon\iota\sigma\epsilon\lambda\theta\omega\upsilon$, ABD etc.
— \aleph (C) L (A) (33 69) (c) (Syr-sin-vg) (Boh).
- (17) V.²⁴ $\sigma\upsilon$, ABAG (a curious instance of accidental coincidence in an *itacism*).
 $\sigma\omicron\iota$, \aleph etc.
- (18) V.²⁴ $\omicron\iota\delta\alpha$, ABCD etc. $\omicron\iota\delta\alpha\mu\epsilon\upsilon$, \aleph LA: Iren^{int} Orig Eus Tert.
- (19) V.²⁵ + $\lambda\acute{\epsilon}\gamma\omega\upsilon$, B etc. *om.* \aleph^* (A¹): Dam.
- (20) V.²⁵ — $\pi\upsilon\alpha$ $\tau\omicron$; B by homoteleuton. + \aleph etc.
- (21) V.²⁸ + $\epsilon\upsilon\theta\acute{\upsilon}\varsigma$, B etc.
— \aleph^* 1 33 b c e ff¹⁻² (g¹) Boh Syr-sin.
- (22) V.²⁸ $\Gamma\alpha\lambda\iota\lambda\alpha\iota\alpha\varsigma$, ABCD etc. $\iota\omicron\upsilon\delta\alpha\iota\alpha\varsigma$, \aleph^* (cf. 28 a^{int}).

76. From this list we may at once eliminate (17) and (20), which are clearly only slips of the pen; and (4), (14), (22), as possibly individualisms. In a certain number of the cases that remain—(2), (5), (12), (16), (18), where, as we have seen, the readings may be classed as either Alexandrian, or Alexandrian and Syrian—it is possible that the variants might have come in together, if the archetype of \aleph had been collated with a MS containing a strongly-marked Alexandrian text. There remain, however, 12 variants, even in these 28 verses, supported on both sides by early evidence, and by no means the same evidence in the different cases, which can only have come into the aberrant text, whichever it is, at different times in the course of an eventful history. We can see, then, what kind of evidence is available in support of Dr. Hort's 'various considerations.' Further evidence will be forthcoming from the investigation which we have yet to make, into the relation in which these two primary MSS of the Greek text stand to the two earliest Versions—the Latin and the Syrian.

77. A complete examination of this, the most important problem that still awaits solution in Textual Criticism, is not as yet possible. Mr. Turner has recently reminded us (*JTS* vol. ii. p. 602) that the 'African Latin' had a history before Cyprian. The evidence of k, priceless as it is, is only part of the evidence that will become available in due course as the result of the work at present being carried on at Oxford under the direction of Prof. Sanday on the text of Irenaeus and kindred subjects. Similarly, we must not forget that the history of the 'Old Syriac' did not begin with Syr-sin. The total amount of evidence for enucleating this history is still lamentably small, and inaccessible to those who are not themselves good Syriac scholars. Students, however, have long been cheered by the announcement that Mr. Burkitt has in hand an edition of the Syriac Gospels which, they have good reason to know, will leave nothing to be desired that wide reading, accurate scholarship, and brilliant genius can supply.

78. Meanwhile something can be done with the evidence already accessible. Dr. Sanday contributed a valuable essay on the Greek text underlying k to the Oxford edition of that MS.* The various lists are, unfortunately for our present purpose, admittedly incomplete. Still they afford a sufficiently wide basis for the experimental investigation, which is all that can be attempted here. A collation of Syr-sin with the readings tabulated by Dr. Sanday supplies a list of upwards of 200 cases in which the evidence of the 4 authorities is simultaneously available for comparison. These may well be taken as samples of the ore which this mine will supply.

It is worth while to tabulate* and print these
* *Old Latin Biblical Texts*, No. II. pp. 96-122.

examples in full, as the tables will need to be carefully checked and supplemented by better equipped scholars; and no merely numerical summary of results can give even an approximately true impression of the facts.

79. List I. NB k Syr-sin in combination against later 'Western' or 'Syrian' readings.

- Mt 4¹² - δ' Ἰς.
5¹¹ - ῥήμα.
5²⁷ - τοῖς ἀρχαίοις.
5⁴⁴ 3 omissions.
6⁴ - αὐτός.
8⁷ - δ' Ἰς.
8¹² - αὐτῆς.
8¹³ - καὶ.
- ἐν τῇ ὥρᾳ ἐκείνῃ.
8²⁰ - Ἰου.
8²¹ ἀπύστελλον ἡμᾶς.
8²² εἰς τοὺς χοίρους.
9⁵ ἀφίενται.
9¹² - αὐτοῖς.
9¹⁵ πενθεῖν.
10⁹ + νεκροὺς ἐγείρετε.
11¹⁰ - γάρ.
12¹⁰ - ἦν.
12¹⁵ - ὅχλοι (Syr-sin ut vid.).
12²⁵ - δ' Ἰς.
13⁹ - ἀκούειν.
13³⁶ - δ' Ἰς.
13⁴⁰ - τοῦτου.
13⁴⁴ - πάλιν.
13⁴⁶ εὐρὼν δέ.
13⁵¹ - λέγει αὐτοῖς δ' Ἰς.
14¹² πτώμα (Syr-sin ut vid.).
15³⁰ αὐτοῦ for τοῦ Ἰου.
Mk 8²⁰ λέγουσι for οἱ δὲ εἶπον.
8²⁵ διέβλεψεν (Syr-sin e lacuna) for ἐποίησεν αὐτὸν ἀναβλέψαι.
8²⁶ εἶπαν for ἀπεκρίθησαν.
9⁷ - λέγουσα.
9¹⁴ ἐλθόντες . . . εἶδον for ἐλθὼν . . . εἶδεν.
9¹⁶ αὐτοὺς for τοὺς γραμματεῖς.
9²⁴ - μετὰ δακρύων.
9⁴⁴ om. verse.
9⁴⁵ - εἰς τὸ πύρ, κ.τ.λ.
10²⁹ - ἡ γυναῖκα.
11²⁶ om. verse.
12²² δώσουσι (σημεῖα) for ποιήσουσιν.
14³⁰ - θέλεις (Syr-sin ut vid.).
14⁷⁰ - καὶ ἡ λαλιά σου ὁμοιάζει.
15⁴⁶ - καὶ ἀπῆλθεν.
16⁹⁻³⁰ omit.

List II. B v. N k Syr-sin.

- Mt 9²² + Ἰς.
13¹⁶ - ὑμῶν.
14¹⁶ + Ἰς.
Mk 8²¹ πῶς οὐ for οὕτω.
15⁴⁴ ἐθαύμασεν for ἐθαύμαζεν.

List III. N v. B k Syr-sin.

- Mt 5⁹ - αὐτοί.
οὐδὲ ἐν τῷ Ἰσρ. τοσ. πίστιν.
8¹⁰ παρ' οὐδένι τοσ. πίστιν, κ.τ.λ. (Syr-sin aliter).
9²⁸ + δού.
9³⁵ + ἐν τῷ λαῷ.
11¹⁵ - ἀκούειν.
13¹⁷ - γάρ.
13³⁵ + Ἡσαίου.
{ + κόσμου.
- B k (Syr-sin paraphrases).

11³ + ὅτι.
12¹⁵ ἰδὼν for εἰδώς.
14²² + δ' Ἰς. { - B k.
- λαβὼν δ' Ἰς., Syr-sin.
14⁴⁶ αὐτῶν for αὐτῷ.
15²⁴ σταυρώσαντες for σταυροῦσιν . . . καὶ.

List IV. Syr-sin v. NB k.

- Mt 1²² + Ἡσαίου.
1²⁵ τὸν υἱὸν αὐτῆς for υἱόν.
4¹⁰ + ὁπίσω μου.
4¹⁶ - μέγα.
4²⁰ + αὐτῶν.
5²⁵ - δ' κριτῆς.
5⁴⁶ ὅς for ὅτι.
ἀγ. καὶ πον. for πον. καὶ ἀγ.
8³ + δ' κύριος ἡμῶν.
8⁹ ἔχων ἐξουσίαν for ὑπὸ ἐξου. τασσ.
+ λέγων.
8¹³ + αὐτοῦ.
8¹⁵ αὐτοῖς for αὐτῷ.
8²⁵ + οἱ μαθηταὶ αὐτοῦ.
9⁵ + σοὶ αἱ ἀμ. σου for σοὺ αἱ ἀμ.
11¹⁷ + ὑμῖν.
11²³ ἡ . . . ὑψωθείσα for μὴ . . . ὑψ.
12²² + ἀκούειν.
12²⁵ ἰδὼν for εἰδώς.
12²⁸ + αὐτῷ (sentence recast).
12³⁵ + τῆς καρδίας αὐτοῦ.
12⁵⁰ ποιεῖ ut vid. for ἂν ποιήσῃ.
13¹⁰ + αὐτοῦ.
13²² + τοῦτου.
13³⁷ + αὐτοῖς.
13⁴³ + ἀκούειν.
15²⁵ προσεκύνησεν for προσεκύνει.
15³³ + αὐτοῦ.
Mk 9³ + ὡς χιών for ὅλα γναφ. κ.τ.λ.
9²³ εἰ πιστεύεις πάντα δυνατὰ σοὶ γενέσθαι.
9²⁴ + κύριε.
9²⁹ + νηστεία καὶ.
9³⁸ + λέγων.
9⁴² - τῶν πιστευόντων [eis ἐμέ, B].
10¹³ τοῖς προσφέρουσιν for αὐτοῖς.
10²⁴ + τοὺς πεπ. ἐπὶ χρήμ.
10⁴⁹ αὐτὸν φωνηθῆναι for φωνήσατε αὐτόν.
12²⁷ + ὑμεῖς δέ.
13⁸ + καὶ ταραχαί.
13¹⁵ + εἰς τὴν οἰκίαν.
14²⁴ + καινῆς.
14³² + ἀπ' αὐτῶν.
14⁵⁴ καθήμενον for συγκαθ.
14⁷² - εὐθύς.

List V. k v. NB Syr-sin.

- Mt 1³ - καὶ τὸν Ζαβὰ ἐκ τῆς Θάμαρ.
4¹ - ἀλλ' ἐπὶ παντὶ . . . Θεοῦ.
4¹⁶ εἶδεν φῶς μέγα (Syr-sin - μέγα).
φῶς εἶδεν μέγα, NB.
4²³ ὅλην for ἐν ὅλῃ.
4²⁴ - καὶ ἐθεράπευσεν αὐτούς.
5 v.⁵ before v.⁴.
5¹¹ δικαιοσύνης for ἐμοῦ, NB. 'My own name's sake,' Syr-sin.
διώξ. καὶ θρεῖδ. { NB θρεῖδ. καὶ διώξ.
Syr-sin only διώξ.
5²⁵ ἐν τῇ ὁδῷ μετ' αὐτοῦ for μετ' αὐτοῦ ἐν τ. ὁ.
5²⁸ - ὅτι.
- καὶ ὅς ἐάν. . . μοιχᾶται, + N Syr-sin (B)
{ ποιῆσαι τρίχα μίαν λευκὴν ἢ μέλαιναν.
5²⁸ μίαν τρ. λ. ἢ μέλ. ποι., NB (Syr-sin paraphrases).
5⁴⁶ ἔχετε for ἔχετε.
6¹ ἐλεημοσύνην for δικαιοσύνην.
6⁸ - ὁ θεός { + NB.
+ 'Hou' Syr-sin.

- Mt 8^a - ὁ παῖς μου.
 9¹¹ εἶπον for ἐλεγον, NB. λέγουσι, Syr-sin.
 9¹² + Ἰς.
 9¹⁷ ῥήσσει ὁ οἶκος, κ.τ.λ. {NB ῥήγνυνται οἱ ἀσκ. {Syr-sin conflates.
 9²⁸ + ἀνθρωπων { - NB.
 10³ - καὶ bef. Ἰάκ.
 10³ Λεββαῖος for Θαδδαῖος, NB.
 10³ Ἰουδ. Ἰάκ. Syr-sin.
 10¹⁰ ῥάβδους for ῥάβδον.
 11¹⁰ καὶ for ὅς.
 12³⁴ σπείροντι for σπείραντι.
 13³⁰ - αὐτὰ εἰς, + NB (Syr-sin ut vid.).
 13³⁶ Ἰωσήφ, B Syr-sin Ἰωσήφ. N Ἰωάννης.
 14³ - Φιλίππου.
 Mk 8²⁶ (besides om. ὁ δ' . . . ψυχὴν) τοῦ εὐαγγελίου, NB ἐμοῦ καὶ τοῦ εὐαγγ. Syr-sin τοῦ ἐμοῦ εὐαγγ.
 9¹⁵ gaudentes for προστρέχοντες.
 9²⁸ - καὶ λέγει . . . διάκονος.
 9²⁸ + ὁς οὐκ ἀκολουθεῖ ἡμῶν after δαιμόνια.
 9²⁸ - ὅτι οὐκ ἀκολουθεῖ ἡμῶν after αὐτόν.
 9⁴³ ὅπου ἐστὶ for εἰς.
 10¹⁰ + secreto.
 10¹⁹ μὴ μοιχ. μὴ πορν. {B Syr-sin μὴ φον. μὴ μοιχ. {N only μὴ φον.
 10²² + et agros.
 11¹ - Βηθφαγή καὶ. + NB (Syr-sin).
 11⁸ ἔκσπον for κόψαντες, NB.
 + καὶ ἐστρώννουν. - NB (Syr-sin omits the whole sentence, ἀλλοὶ δὲ . . . ὁδόν, app. by homœoteleuton).
 11⁹ + τῆ ὑψίστου.
 12¹⁴ interrogabant eum farisæi dicentes for ἐλθόντες λέγουσιν αὐτῷ. Syr-sin aliter.
 + εἰπέ οὖν ἡμῶν τί σοι δοκεῖ.
 12¹² - πτωχῇ.
 12¹³ - ἡ πτωχῇ.
 13² + καὶ διὰ τριῶν ἡμερῶν ἄλλος ἀναστήσεται ἀνεὺ χειρῶν.
 13¹⁴ + τὸ ῥηθέν . . . προφήτου.
 13¹⁸ + ἡ φυγὴ ὑμῶν . . . μηδὲ σαββάτου.
 13²¹ - ψευδῶς. καὶ.
 13²⁷ - αὐτοῦ after ἐκλεκτοῦς.
 14⁴ + καὶ λέγοντες { - NB.
 14⁸ + αὐτῇ { - NB.
 14¹⁹ + καὶ ἄλλος μῆτι ἐγώ.
 14²⁰ + ἀποκριθεὶς.
 14²⁷ + ἰσχύσατε for ἰσχυσας.
 14⁴³ - ἐλθὼν εὐθύς.
 15²³ + πεινῶν.

List VI. B Syr-sin v. N k.

- Mt 12⁴⁰ + αὐτοῦ after τὴν χεῖρα.
 13¹¹ + αὐτοῖς.
 Mk 8³⁰ + αὐτῷ.
 10¹⁹ μὴ φον. μὴ μοιχ. {k μὴ μοιχ. μὴ πορν. {N only μὴ φον.
 10³⁰ + οικίας . . . ἀγρούς.
 14⁷¹ + ὃν λέγετε.
 15³⁰ + αὐτὸν after σταυρώσουσιν.
 14³⁰ + οἷς. - N k.
 14³⁰ - καὶ ἀλέκτωρ ἐφώνησεν. + k not N.
 14³⁰ - ἐκ δευτέρου. - N not k.
 14³⁰ + οἷς. - N.

List VII. B k v. N Syr-sin.

- Mt 12⁴⁴ - καὶ before σεσαρ.
 13³⁵ - κόσμον. + N (Syr-sin paraphrases).
 15³² ἔκραζεν for ἔκραξεν.
 Mk 8³² ἐρχονται for ἐρχεται.

- Mk 13²⁷ - αὐτοῦ after ἀγγέλους.
 13³³ - καὶ προσεύχεσθε.

List VIII. NB v. k Syr-sin.

- Mt 5¹¹ + ψευδόμενοι.
 5²² - εἰκῇ.
 5⁴¹ - ἐτι ἄλλα.
 5⁴⁶ τὸ αὐτὸ for οὕτως.
 8²¹ - αὐτοῦ after τῶν μαθητῶν.
 9¹¹ ἔλεγον. k εἶπον. Syr-sin λέγουσιν.
 9²⁷ + καὶ λέγοντες.
 9³² - ἀνθρωπων. + k. Syr-sin τινα.
 10²³ - κὰν ἐν τῇ . . . ἄλλην.
 11¹⁶ ἐν ταῖς ἀγοραῖς for ἐν τῇ ἀγ.
 11¹⁹ ἐργων for τέκνων.
 12²⁶ μείζον for μείζων.
 13⁴⁸ ἦν ὅτε for ὅτε δὲ (?Syr-sin).
 Mk 8⁹ - οἱ φαγόντες.
 8¹⁰ εὐθύς ἐμβάς for ἀνέβη.
 8³⁶ ὠφελεῖ for ὠφελήσει.
 10² + προσελθόντες [οἱ] φαρισαῖοι.
 10⁵ ὁ δὲ Ἰς for καὶ ἀποκ. ὁ Ἰς.
 10⁶ - ὁ θεός.
 10²⁹ ἔφη for ἀποκ. . . εἶπεν.
 11⁸ κόψαντες for ἐκόπτον, k.
 - καὶ ἐστρώννουν. + k. Syr-sin omitt app. by homœoteleuton.
 11³¹ + οὖν.
 12³⁰ - αὐτῇ πρώτῃ ἐντολῇ.
 12³¹ αὐτῇ for ὁμοία αὐτῇ.
 14⁴ - καὶ λέγοντες.
 14⁸ δ ἔσχεν ἐποίησεν προέλαβεν μυρίαι τὰ σώμα μου εἰς τὸν ἔνταφ.
 k: quod habuit hæc, præsumpsit et unguentavit, etc.
 Syr-sin, 'For that which she hath done, behold as if for my burying she hath done it, and hath anointed my body beforehand.'
 14⁹ + δέ.
 14¹⁴ μου after τὸ κατάλυμα.
 14¹⁶ - αὐτοῦ after οἱ μαθηταί.
 14¹⁹ - οἱ δέ.
 14²⁷ - ἐν ἐμοί.
 14⁴² + εὐθύς.
 - πολὺς.
 14⁵¹ + ἐπὶ γυμνοῦ.

80. List I. contains 44 passages in which all four authorities are agreed. Generally (not always) they form the nucleus of a small group of authorities in opposition to the bulk of later evidence. In no case do they stand quite alone. Of course this list represents only a small part of the total amount of agreement between the four texts. The most noteworthy reading in the list is the omission of Mk 16⁹⁻²⁰—verses which must on internal grounds, as even their most strenuous supporters are now prepared to admit, have had an origin in some respects different from that of the rest of the Gospel. See, e.g., *Trad. Text*, p. 305.

Lists II.-V. contain passages in which each of the four stands in turn unsupported by any of the rest. Lists VI.-VIII. represent the various combinations of the authorities taken two together.

B stands alone in 5 places.

N stands alone in 14. In 4 of these Syr-sin has a reading of its own differing both from N and B k.

Syr-sin stands alone in 44 places.

k stands alone in 56. In 15 of these Syr-sin presents a third alternative, N in 2.

B and Syr-sin range against N k in 7 places (besides the 4 closely connected readings referring to the cock-crowings in Mk.).

B and k oppose N Syr-sin in 6 places.

NB oppose k Syr-sin combined in 31 cases, besides 4 cases in which k and Syr-sin offer divergent alternatives.

210 passages in all come before us. In five-sixths B is supported by N, in three-fourths it has the support either of k or Syr-sin. And, what is even more remarkable, B (and in a less degree N) is decidedly more nearly allied to both k and Syr-sin than k and Syr-sin are to one another.

81. What, then, shall we say of the significance of these facts?

First, surely, that they amply vindicate Hort's contention that the 'Neutral' text was by no means confined to Alexandria.

Next, that they demonstrate the absurdity of supposing that the text of NB was in any sense the result of a 'recension' by Origen.* At least five-sixths of their characteristic readings are demonstrably at least a century older than his time. Even if, as must no doubt have been the case, his judgment on a reading, as expressed in his commentaries, affected the opinions of some of the scholars and scribes—notably, e.g., Pamphilus—who came after him, his influence in the case of the readings where NB are opposed by k Syr-sin would as often have led away from as towards NB.

Thirdly, since both B and N, as we have already seen, are more nearly allied to k than Syr-sin is, judging by the standard of k, B and N are better than Syr-sin. Similarly, judging by the standard of Syr-sin, B and N are both better than k. So it would seem that, on the evidence of the Versions themselves, the value either of N or of B, and *a fortiori* the value of the two combined, is distinctly higher than that of either version separately.

82. It only remains to consider the problem which arises when the two versions combine against the two MSS. Their very divergences would seem to reinforce Mr. Burkitt's argument from geography, and to lend a peculiar weight to their evidence in the readings in which they are found to agree. As we have already seen, even if these readings are to be regarded as distinctively 'Western,' genealogical considerations offer no insuperable objection in the way of their acceptance (WH, *Intr.* § 237). It is true that Hort had had to examine a closely kindred group, k Syr-cu in Mt., and had not found reason to reject outright any of the readings of NB in their favour. Still he would have been the first to insist on a careful re-examination of the whole evidence in the light of any new discovery, not to speak of a discovery of such primary importance as Syr-sin. He would, however, have approached the question from a point of view different in many important respects from Mr. Burkitt's. It would clearly have been no surprise to him to learn that fuller knowledge brought into clearer light the fundamentally 'Western' character of Clement's biblical text (*Intr.* § 159). He would have needed no special exhortation to come out of 'the land of Egypt,' because he had said from the first that the 'Neutral' text in remote times was not confined to Alexandria (§ 178); and the fresh evidence that has come to light since he wrote, esp. the discovery of Syr-sin, has brought abundant fresh confirmation in support of his original contention. On the other hand, he would no doubt have been inclined to question very seriously the assumed independence of 'East' and 'West,' of 'Carthage' and 'Edessa,' on which so much of the force of Mr. Burkitt's appeal depends.† Mr. Turner may no doubt be quite justified in contending (*Journal*

of Theol. Studies, vol. ii. p. 602) that 'the agreement—when they do agree—of the two great pillars of the "Western" text, the African Latin and the Sinai Syriac, can hardly be explained away as due to any identity of their immediate source. Both may have first seen the light, it is true, in some part of Northern Syria, and both may have been produced within the limits of the same generation; but that is the only extent to which a common origin can be ascribed to them, and it is not enough to qualify seriously the weight of their consentient testimony.' It is, however, more than enough, if any part of Northern Syria is really to be regarded as the birthplace of the Latin Version, to weaken considerably the force of Mr. Burkitt's argument. For the agreement of two parts, even allowing them to be different parts, of Northern Syria, is a very poor substitute for the agreement 'of East and West, of Carthage and Edessa.' We shall require at least some clear internal evidence to induce us to go to 'some part of Northern Syria' for a surer foundation than NB for the text of the Gospels. In fact the ultimate appeal must lie, as Dr. Hort's words (§ 373) indicate, and Dr. Westcott's words* (*Intr.* p. 328) state expressly, to the Internal Evidence of the Readings of the opposing groups. Judged by this standard, if the readings of List VIII. prove, as the present writer thinks they will, to be a fair sample of the whole, it is extremely unlikely that more than a very few of the readings of k Syr-sin will ultimately make good their claim to a place in the text. E.g. Mk 10² the omission of *φαραίσις* may with considerable probability be regarded as genuine, but hardly any other in the whole list, least of all the insertion of *εὐκῆ*, Mt 5²².

83. On the whole, then, there seems no reason to anticipate that the present revival of interest in the early history of the 'Western' text will in the end be found to upset the estimates formed by WH of the relative importance of the different groups of textual authorities, or to modify in more than a mere handful of passages the judgments which they formed on individual readings.

84. As this article is drawing to its conclusion the news comes in rapid succession of the deaths of the two last surviving protagonists in the textual controversies of the nineteenth century. Fundamentally as the present writer differs from the position taken up by Prebendary Miller in his published works on Textual Criticism, and strangely as he seems to him to have overlooked or failed to understand the plainest statements put forward on the other side, he must not close this article without a warm tribute of admiration for his unwearied industry, his enthusiasm for his subject, and his profound conviction of the sacredness of the cause which he felt called to defend.

The loss of Dr. Westcott will naturally be felt most keenly in spheres of Christian thought and activity that are of deeper, broader, and more universal interest than Textual Criticism. But it may be permitted to call attention here to the witness borne to the intrinsic importance of the

agreement of East and West, of Edessa and Carthage, will not give us a surer basis upon which to establish our text of the Gospels.

* His words are: 'The discovery of the Sinaitic MS of the Old Syriac raises the question whether the combination of the oldest types of the Syriac and Latin texts can outweigh the combination of the primary Greek texts. A careful examination of the passages in which Syr-sin and k are arrayed against NB would point to this conclusion.' The best comment on the last sentence is supplied by the specimens of Dr. Westcott's habitual method of working, as shown in the introductions to his commentaries on the Gospel and Epistles of St. John, and on the Epistle to the Hebrews. It does not, as Nestle seems to think (*Intr.* p. 923), involve a surrender at discretion to the authority of Syr-sin and k. It simply calls for a systematic comparison of the distinctive readings of the rival groups before a final judgment is passed on their respective merits.

* It is interesting to notice that Koetschau ('Bibelcitatie bei Origenes,' *Z. f. w. Theol.* p. 321 ff.) has recently expressed his agreement with the opinion of Griesbach and Hort (*Intr.* § 249; cf. Nestle, *Intr.* p. 185 ff.) that Origen 'never made anything like a recension of the New Testament.'

† *Intr.* to Barnard's *Clement*, etc. p. xviii: 'Let us come out of the land of Egypt, which speaks (as Clement's quotations show) with such doubtful authority, and let us see whether the

study by the fact that it occupied so large a share of the time and attention of such a man. The fact that the writing of the *Introduction* fell to Dr. Hort has prevented scholars generally from realizing the nature and the extent of Dr. Westcott's share in that wonderful monument of the labour of 28 years. The minds and methods of the two fellow-workers were remarkably distinct, and well fitted to check and complement each other. And their work is in the strictest sense the resultant of their combined forces, and not, as in weaker hands work on the same principle might tend to become, a mere compromise appreciably feebler and weaker than either scholar would have produced independently.

All the time the present writer was engaged on this article he was looking forward to the day when he could present it to Dr. Westcott as some acknowledgment, however unworthy, of a debt of gratitude that has been accumulating for 24 years, and gather from his kind but searching criticism what measure of success had attended this attempt to expound and illustrate the principles on which he and his great collaborator had worked. Now he can only inscribe it with reverence and affection to their memory. Christian scholarship will for all time be the richer for the example of their 'implicit confidence in all truth' and their 'guileless workmanship' (*Intr.* § 423).

J. O. F. MURRAY.

VERSIONS (ENGLISH).—Owing to the length of the subject, it may be found convenient to divide it into the following sections: (i.) Anglo-Saxon; (ii.) Anglo-Norman; (iii.) Wyclifite; (iv.) Reformation period; (v.) Puritan; (vi.) Elizabethan; (vii.) Roman Catholic; (viii.) The 'Authorized' and its successors; (ix.) The 'Revised'; (x.) The 'American Revised.'

i. ANGLO-SAXON.—At the head of this period it is usual to place *Cædmon* († c. 680), although he did not, properly speaking, translate any part of the Bible. The work ascribed to him is an alliterative poem, in which he paraphrases the Scripture account of the chief events in Genesis, Exodus, and Daniel. A continuation of the poem, now imperfect, treats of portions of the life of Christ. His story is picturesquely told by Bede (*HE* iv. xxiv.),—how, from a servant, he became a monk in the mixed monastery under St. Hilda; and how, when bidden to exercise his newly found gift of song, he burst forth into a hymn of praise of the great Creator. Bede gives in Latin the substance of this hymn. On the margin of some MSS of Bede a short West-Saxon poem of nine lines is found, purporting to be the original. At the end of the Moore MS (Camb. Univ. Lib. Kk. v. 16) the verses are found in the Northumbrian dialect; and, as this would be *Cædmon's* own tongue, it has been considered to be the older form. But whether any of these is the original vernacular of *Cædmon*, or only a retranslation from Bede's Latin, cannot be pronounced with certainty. The hymn bears only a general resemblance to the beginning of the poems, and hence doubts have been thrown on the *Cædmonian* authorship of the latter.* The poems exist, so far as is known, in one manuscript only (Bodleian, Junius xi.). It was given by Archbishop Ussher to Francis Dujon, or Junius, librarian of the Earl of Arundel, and by him bequeathed to the Bodleian. It was printed at Amsterdam in 1655, and was edited with an English translation by Ben-

* See the edition of Bede's works by Plummer, 1896, vol. ii. p. 252, where the question is ably discussed, and F. Graß's *Beiträge zur Textkritik der sogenannten Cædmonischen Genesis*, Königsberg, 1896. An interesting study of this 'Milton of our forefathers' will be found in B. S. Watson's *Cædmon, the first English Poet*, 1875.

jamin Thorpe in 1832, and again published by Grein in his *Bibliotick* in 1857. A short passage from Thorpe's literal rendering, on the subject of Nebuchadnezzar's chastisement, will give some notion of *Cædmon's* style—

'To thee shall not be meal-meat,
save the mountain's grass,
nor rest assigned:
but thee the rain's shower
shall waken and chastise.'

Bede († 735) himself is known to have translated portions of Scripture into his native tongue. Purvey, indeed, in his General Prologue,* asserts that 'if worldli clerkis loken wel here cronicles and bokis, thei shulden fynde, that Bede translatide the bible.' No authority, so far as is known to the present writer, can now be found for this statement. But Bede expressly says, in a letter to Bishop Egbert (c. v.), that he had often translated the Creed and Lord's Prayer for uneducated priests.† And the touching passage is familiar to all, in which his biographer Cuthbert describes the end of his life approaching, before he had finished his version of St. John.‡ It is a matter for regret, that not even this version should have escaped the ravages of time.

King Alfred († 900) added to his other titles to the name of Great an expressed conviction that his code of civil laws must be based upon the revealed law of God. Acting on this conviction, he prefaced his code of Saxon laws with a free translation of the enactments in Ex 20-23, and of the letter sent by the apostles in Jerusalem, contained in Ac 15. His reason for the addition, at first sight apparently singular, of this passage from the NT, was to show how the harshness of the Hebrew *lex talionis* was modified by the teaching of Christianity. In king Alfred's translation there are some noticeable peculiarities. In Ex 20¹¹ 'for in six days the Lord made heaven and earth,' for 'Lord' (*Dominus*) he puts, not *Dryhten*, the usual word, but *Crist*:—'forðan on .vi. dæsum crist sewohrte heofonas ⁊ eorðan.' The explanation is that, in a contemporary Anglo-Saxon poem, Christ is made to describe how He created the earth; and *Dominus*, in the Vulgate of the NT, is of course frequently used of Christ. Another singular change is his transposition of a clause in the Fifth Commandment. He places 'which the Lord thy God giveth thee' directly after 'thy father and thy mother,' apparently wishing to take 'land' in the general sense of earth, and so removing the limitation. A third alteration is made at the end of Ac 15²⁹. In the Latin text followed by him there is an interpolated clause: 'et quod vobis non vultis fieri, non faciatis aliis.' This is duly rendered: '⁊ þæt 3e willen þæt oðre men ðow ne don, ne doð 3e ðæt oþrum monnum'; 'and what ye would that other men should not do to you, that do ye not to other men.' §

Besides these, there are extant various MSS by unknown authors, containing Anglo-Saxon versions of the Psalms and of the Gospels. One such version of the Psalter, contained in a MS found in the National Library of Paris about the be-

* Forshall and Madden's *Introduction*, p. 59.

† 'Propter quod et ipse multis sæpe sacerdotibus idiotis hæc utraque, et symbolum uidelicet et dominicam orationem, in linguam Anglorum translatam optulit.'

‡ See Appendix ii. to vol. i. of Plummer's edition. A difficulty is caused, as the editor points out, by the reading of the St. Gallen MS, which appears to make Bede's translation extend only to Jn 6¹⁹. Such a limitation spoils the sequel of the story; unless we understand it to mean that the translator had got no further, when the premonitory symptoms of his illness came upon him.

§ See *The Legal Code of Alfred the Great*, ed. by Professor Milton Haight Turk, Boston (U.S.A.), 1893, pp. 33-37. The explanations given in the text are from Professor Turk, who in turn acknowledges his indebtedness to the late Dr. F. J. A. Hort.

gining of this century, has been thought to be, in part at least, the work of Aldhelm († 709), bishop of Sherborne. If so, it would be as early as the 7th century. There seems, however, no evidence that it is his work, or as early as his time. In this version the first fifty Psalms are rendered into prose, the remainder into verse. It was published by Benjamin Thorpe in 1835.* Two other versions were published—one edited by Spelman in 1640, and the other by Stevenson in 1843.†

Of the Gospels, in like manner, three Anglo-Saxon versions were published, from MSS—one by Archbishop Parker, in 1571; another by Marshall, rector of Lincoln College, in 1665; and the third by Thorpe, in 1842.‡ It had been a complaint of scholars that no proper estimate could be formed, from these detached publications, of the relative value of the original MSS, or their relation to one another.§ This cause of complaint has now been removed. In the edition of the Gospels just referred to, put forth by Skeat,|| not only is a larger number of MSS brought into requisition, but their comparative date and value are ascertained. Two well-known 'glosses' are also included in this collection—the Lindisfarne, or Durham Book, and the Rushworth. In these the Latin is interlined with a *verbatim* rendering in Anglo-Saxon. The date of the Latin text of the Lindisfarne is, roughly speaking, about A.D. 700; that of its 'gloss,' the work of a priest named Aldred, some two and a half centuries later. The gloss in the Rushworth MS (so called from its donor) is derived from the Lindisfarne. In a note at the end of St. John's Gospel the names of the two makers of the gloss (in this case little more than transcribers) are given: Færmæn, or Farman, a priest of Harewood in Yorkshire, and Owun.¶ It is obvious that, from the nature of its construction, a word for word gloss can scarcely be called a translation.

Before leaving the Anglo-Saxon period, a brief mention should be made of the metrical version, with many abridgments and omissions, of the Pentateuch, and the books of Joshua, Judges, Kings, Esther, Job, Judith, and Maccabees, the work of Ælfric, Abbot of Peterborough in 1004, and Archbishop of York in 1023. What remains of this version was published in 1698 by Edward Thwaites, at Oxford, under the title *Heptateuchus, Liber Iob, et Evangelium Nicodemæ*, etc. It was reprinted by Thorpe in 1834, in his *Analeceta Anglo-Saxonica*, and still more recently by Grein in his *Bibliothek*. This version, like all those previously mentioned, is from the Latin.**

* See the Preface to Forshall and Madden's Wycliffe Bible, p. i, and Mombert's *English Versions*, p. 9, where a specimen of the translation is given.

† See Moulton's *History of the English Bible*, p. 8. In 1885 the Vespasian Psalter (an interlinear Anglo-Saxon gloss, so called from its being contained in the Cotton MS Vespasian A. 1) was edited by Henry Sweet for the Early English Text Society. Its date is the first half of the 9th century. The text of a later one, the Eadwine Canterbury Psalter, was also edited for the same Society by F. Harsley in 1888.

‡ Forshall and Madden, as before.

§ Westcott, *History of the English Bible*, 1872, p. 6, n. 2.

|| The *Holy Gospels in Anglo-Saxon, Northumbrian, and Old Mercian versions*, ed. by the Rev. Walter W. Skeat . . . 1871-1877, 4to.

¶ These particulars are taken from Skeat's edition. See also the Preface to Forshall and Madden. With regard to the MS versions, Skeat considers the C.C.C. Cambridge MS (No. 140), the Bodleian (441), and the Cottonian (Otho C. 1), to be practically duplicate copies of an unknown original. The MS in the Camb. Univ. Lib. (Il. 2. 11) is closely akin, perhaps a little later. This evidence is of value as pointing to the existence of a common Anglo-Saxon version.

** A specimen of Ælfric's translation will be found at p. 16 of Mombert's *English Versions*. See also Eadie's *English Bible*, vol. i, pp. 15, 16. In the Handbook for the Wycliff Exhibition, arranged by Sir E. M. Thompson, 1884, p. 4, there is a description of an early 11th cent. MS of Ælfric (Cotton, Claudius B. iv.); and also, at p. 1, a full account of the precious 'Durham Book,' mentioned above.

It is a characteristic of the Anglo-Saxon idiom, in the versions described, that it prefers rendering foreign words, even though clumsily, to retaining and assimilating them. Thus 'centurion' becomes 'hundred-man,' 'disciple' 'learning-onit,' 'parable' 'bigspel,' 'sabbath' 'reste-dæg,' 'treasury' 'gold-hord,' and so on.* It will be borne in mind, also, that the Latin text from which these versions have been made is not the Vulgate as we have it, but in some cases the earliest of Jerome's revisions, in others the *Vetus Italia*.†

ii. ANGLO-NORMAN.—During the three centuries that elapsed after the Conquest, the changes going on in the national life and character were not favourable, at any rate for a time, to the spread of vernacular translations. Apart from the sudden disruption in government, and the diversion of men's thoughts to war rather than religion or literature, the infusion of Norman-French, with its swifter current, into the slower English speech, like the influx of the Rhone into the Saône, would tend to check the formation of a common literary tongue. The native strength of the invaded language prevailed in the long run; but for a while, as all know, the Norman-French remained the language of the court, the school, the bar, while its rival held possession of the farmhouse and the cottage. A collateral result of this state of things was, that the educated classes were the more readily satisfied with Latin, as the language for religious use; while the need, or the possibility, of devotional books in one common native tongue was less and less thought of.‡

Yet even in this period, as Forshall and Madden have pointed out, the Anglo-Normans had translated into their own dialect, before the year 1200, the Psalter and Canticles of the Church in prose.§ More remarkable still, they are said to have executed in this country a prose translation into their own tongue of the entire Bible.|| Metrical paraphrases of Scripture stories, such as are found in the *Ormulum*,¶ would help to keep alive a knowledge of Holy Writ.

It will suffice, however, here to give a short account of two works, both belonging to the first half of the 14th cent.; of one of which it is said that it is 'the earliest version in English prose of any entire book of Scripture.' Both are prose versions of the Psalms. The author of the first is commonly believed to be the William of Shoreham (de Schorham), of whom we have a number of English poems remaining. William himself was probably a monk of the priory of Leeds in Kent. Shoreham, presumably his native place, is between four and five miles from Sevenoaks. When the rectory of Chart Sutton, in Kent, was impropriated by Walter Raynolds, Archbishop of Canterbury from 1313 to 1327, to Leeds priory, William of Shoreham became its first vicar.** In this capacity, like an earlier George Herbert, he poured forth his

* See Bosworth and Waring's *Gothic and Anglo-Saxon Glosses*, 1865, p. xvii.

† Moulton, *The English Bible*, p. 9. See also Bosworth and Waring, as before, Pref. p. x, where examples are given.

‡ See Traill's *Social England*, vol. ii. (1894) p. 533, and Freeman's *Norman Conquest*, v, p. 508.

§ Preface, p. iii. They refer, in evidence, to Cotton MS Nero C. iv., Trinity Coll. Camb. MS R. 17. 1, and others.

|| *Ib.* The editors refer to the *Catalogue des MSS français de la Bibliothèque du Roi*, by M. Alexis Paulin Paris; in vol. i, pp. 1-3 of which is a description of a MS (No. 6701) entitled *Traduction littérale de la Sainte Bible*. M. Paris thinks that the writing and dialect of the MS, which is assigned to the 14th cent., prove it to have been 'exécuté en Angleterre.' The other two MSS referred to by Forshall and Madden contain, according to M. Paris (*Catalogue*, t. vii. pp. 183, 200), only 'traductions en vers' from the Bible.

¶ The *Ormulum*, so called from its author Ormin, or Orm, an Augustinian canon of the 12th cent., was edited by E. M. White (2nd ed. 1878). Notes on its spelling will be found in an edition of the *History of the Holy Rood*, by A. S. Napier (Early English Text Society), 1894.

** These particulars are taken from the Preface to *The Religious Poems of William de Shoreham*, edited for the Percy Society by Thomas Wright, 1849. Wright's text is criticised in many passages by Konrath in his *Beitrage zur Erklärung und Textkritik des W. von Schorham*, Berlin, 1878.

soul in verse. So far as is known, his poems are contained in one solitary manuscript,* which also contains a prose version of the Psalter in English of this period. Whether the two productions are to be referred to the same author, has been made a matter of question. That the poems are the work of William of Shoreham, is not doubted. His name is found in the colophon to some of them. And it might be thought sufficient evidence of unity of authorship, under the circumstances, that the handwriting is the same throughout. But Konrath argues, on the other side, that the dialect in which the version of the Psalter is written is not Kentish, as 'Schorham's' would naturally be, but Midland.†

The subjoined extract, containing the opening verses of Ps 56 (in the Latin Bible 55), will enable the reader to judge of the style of the version:—

Miserere mei, deus, quoniam concitauerunt me homines: tota die inprimans diaboli tribulauit me. Haue mercy on me, god, for man hap defouled me. Þe fende trubled me, feztand alday oȝayns me. Concitauerunt me inimici mei tota die, quoniam multi bellantes erant aduersum me. Myn enemyz defouled me(e) alday, for many were feztand oȝayns me. Ab ascendine diei timebo te: ego uero in te sperabo. Y shal drede þe fram þe hezt of þe daye: Y for soþe shal hope in þe. In deo laudabo sermones meos in deo speraui: non timebo quid faciat michi humana caro. Hii shal hery my wordes, what manes fleshe doþ to me. Tota die mala uerba mea execrabantur: aduersum me omnes cogitationes eorum in malum. Alday þe wicked acurseden myn wordes oȝayns me: alle her þoutes ben in iuel. Inhabitauit in inferno & abscendit se ibi. ipsi calcaneum meum obseruabunt. Hii shul women in helle, and þer hii shul hidden hem, and hii shul kepen mid fouleinges. Sicut sustinuerunt .i. temptauerunt animam meam, pro illo saluos faceres eos & in ira tua populos istos constringes .i. aduersabis. Ashii tempteden my soule for nouȝt, þou shalt make hem sauȝ and þou shalt bringe to nouȝt þes folkes in þyn ire. Deus, uiam meam annuntiasti tibi: posuisti lacrimas meas in conspectu tuo. Ha, god, ich telde my lyf to þe: þou laigest min teres in þy syȝt.‡

Whatever doubt there may be as to the authorship of the version of the Psalter known as Shoreham's, there is none regarding that assigned to Richard Rolle of Hampole († 1349). Richard was a native of Thornton, near Pickering, in Yorkshire, and was sent to Oxford by Thomas de Neville, archdeacon of Durham. At the age of nineteen, obeying an inward impulse, he left the university, and became a hermit at Hampole, near Doncaster.§ His commentary is devotional and mystical, and, as such, is often quoted by Adam Clarke in his notes on the Bible. The following specimens will show his method, which is to set down, after each verse of the Latin in order, a literal rendering of it, and then to add his own comments:—

Ps 135 *Confitemini Domino quoniam bonus: quoniam in eternum misericordia eius.* ¶ Shrifis til lorde for he is gode: for withouten and the mercy of him. ¶ Grete louyng of this psalme is shewyd in paralympomenon, | where it is red. that when the sunnys of israel came to loue god and sey *confitemini domino*, the loy of god fulfille goddis hous. also nere is the presens of goddis grace, if hit be purly sey. loue we god here that we may loue him with aungels: his louyng is our fode. for no delite is like it.

* No. 17,376 of the Additional MSS in the British Museum. It is on vellum, 7½ by 5½ in. in size. A memorandum by the late Sir F. Madden, on the fly-leaf, relates the curious adventures through which the MS passed before it finally came into the possession of the Museum in 1849. The writer notes also the resemblance of the version of the Psalter to that in a MS in the Library of Trinity College, Dublin, ascribed to John Hyde.

† *Beiträge*, as before, p. 1. It was, however, a tendency of the Mercian, or Midland, to absorb collateral dialects into itself; and possibly some who spoke Kentish might write Mercian. See a passage quoted from John de Trevisa in Traill's *Social England*, ii. p. 538.

‡ The English of this passage was given as a specimen in the Guide-book to the Wyclif Exhibition, before mentioned, p. 10. We have inserted the Latin text from the MS itself, fol. 60. It is noticeable how much it differs from the Vulgate.

§ See the edition of *The Psalter or Psalms of David and certain Canticles* . . . by Richard Rolle, of Hampole, ed. by H. R. Bramley, 1884, p. v. The MSS used by the editor are Univ. Coll. MS lxiv.; Sidney Sussex Coll. MS A 6. 2; and the Laudian MS 286.

¶ Chronicles. The reference is to 2 Ch 71.

Ps 136 *Super flumina babilonis illic sedimus & struimus: dum recordamur syon.* ¶ Abouen the fiodes of babilon thar we sat and gret: whils we vmthout* of syon. ¶ *flodis* of babilon are all thinges that are lufd here, and passis, that holy men beholdis and forsakes, sitand abouen thaim. ¶ gretis thair oun pilgrymage & thair synne. that are rauyht in til the fiodis. whils thei thynk of syon. that is, of heuen, where nothing renays, bot all that loy is to gedur. worldis meȝ gretis. bot nouȝt bot for tynal of thair godes or thair frendis. as thei loy nouȝt bot in thair welth. ilk man shal grete. bot thinkand of syon.

iii. WYCLIFITE.—To understand aright the Biblical labours of Wyclif and those who worked with him, we must take a brief survey of the events amidst which he grew up, and try to discern their general drift.

The reign of Edward III. is often described as one of outward glory and prosperity. It was so in part, but it was much more (the latter part of it, at least) a period of upheaval and slow-working revolutionary movements. It was a period in which the sentiment of national independence became more strong and definite, both in civil and religious matters. In 1338 the German electors asserted their right to choose a king, whose title should not need confirmation by the pope.† The 'captivity' of the papacy itself, when from 1378 to 1409 an anti-Rome was fixed at Avignon, tended materially to strengthen this sentiment. The claims of a spiritual sovereignty, the visible seat of which was at a spot just outside the French frontier, became perceptibly weakened, as regards England at least, in a country which regarded France as its natural enemy. Evidence of the growth of this anti-papal feeling was shown in the passing of the Statute of Provisors in 1351, of the Ordinance of Præmunire in 1353, and of the formidable statute bearing that name in 1393. The great battles of the reign, and its great calamity of the Black Death, both, rightly interpreted, taught the same lesson. At Crecy and Poitiers it was the national militia of England that overthrew the feudal chivalry of France; the yeoman's cloth-yard shaft that unhorsed the mail-clad noble. After the Black Death of 1348-49, which ceased only after it had swept away half the entire population, those of the working classes who were left, whether as labourers in the fields or handicraftsmen in the towns, were masters of the situation. No statutes of labourers could prevent them from demanding and obtaining higher wages. For the next thirty years the struggle went on between the forces of upheaval, on the one hand, and repression on the other, till it culminated in the Peasant Revolt, and in the scenes of riot at Bury and St. Albans.

This spirit of the age is seen reflected in the two poets who, with Wyclif, are the greatest names in its literature. William Langland, born about 1332, took for the hero of his discursive poem, no noble, but a peasant, Piers the Plowman, who 'rises, in the poet's conception, from being only a representative English labourer, to the type of Christ himself.'‡ And of the many characters who grew into life under the creative hand of Chaucer, the one drawn with the finest and most loving touch, the 'poure persoun of a toune,' was a ploughman's brother.

Of John Wyclif himself, at least for the earlier part of his life, but few facts are known with certainty. He was a Yorkshireman, and, according to Leland,§ came from the village of Wyclif-on-Tees. That he entered Oxford is certain; and, as he was afterwards Master of Balliol College, a college founded not long before by a neighbouring

* Thought about. So *umgang*, with the prefix used as in German.

† Traill, *Social England*, ii. p. 159.

‡ *Id.* p. 226.

§ *Collectanea*, ii. 323. For the claims of a supposed 'Sprawell' to be his birthplace, see the Introduction to Wyclif's *English Works*, by F. D. Matthew, 1880, p. i.

family, the Balliols of Barnard Castle, it may be reasonably concluded that this was the place of his education. In 1360 he became, as has just been said, Master of Balliol; and in 1361 he was presented to the rectory of Fillingham in Lincolnshire, resigning his Mastership soon after. This living he exchanged, in 1368, for that of Ludgershall in Buckinghamshire, probably as being nearer Oxford. Whether he was the John Wyclif appointed by Archbishop Islip, in 1365, warden of his secularized foundation of Canterbury Hall, is doubtful.* In 1366 his pen was employed in the service of Parliament, which had rejected the claim of pope Urban V. for payment of arrears of the annual tribute first imposed on king John. On this occasion he terms himself 'peculiaris regis clericus'.† In 1371 he advocated the proposal that the revenues of the Church should be subject to the general taxation. In 1374, being by this time a Doctor of Divinity, he was nominated on a commission appointed to confer with the pope's representatives at Bruges about the exercise of papal Provisions.‡ In his protracted stay on the Continent his mind may well have been stirred by what he saw, to speculate 'de optimo statu ecclesie,' as More's was, when on a similar mission on secular business, in the same region, to speculate 'de optimo statu reipublice.' The embassy was a fruitless one. Possibly as a reward for his services, Wyclif was presented, in 1374, to the Crown living of Lutterworth; where, having resigned Ludgershall, he remained till his death.

In 1377 came the first open attack made upon him by the authorities of the Church. He was cited to appear before Convocation, assembled at St. Paul's on Feb. 19th. But the prosecution was really a political one, aimed at John of Gaunt, through Wyclif, and the proceedings came to nothing. Papal bulls then arrived, requiring his prosecution on nineteen specified articles. For a time these were suspended owing to the death of Edward III. in June of the same year. But in the spring of 1378 he appeared at Lambeth to stand his trial. Once more, however, the prosecution was arrested, this time by the influence of the Princess of Wales, widow of the Black Prince.§ In 1382 he had a stroke of paralysis, from which he partially recovered. But on Innocents' Day, 1384, he was again struck down, while engaged in Divine service, and died on the last day of that year.

Such are the bare outlines of Wyclif's life. It would seem that one of the subjects most in his thoughts, suggested in part, no doubt, by the events through which he lived, was that of lordship or dominion. By what title did the pope, the abbot, the secular governor, claim the power he exercised? Was that 'lordship' dependent, in any way, on his own personal character? Did it involve a reciprocity of service? The theories he formed appear to have been suggested by the *ae Pauperie Salvatoris* of Richard Fitz Ralph, archbishop of Armagh, who died in 1360.|| But in the mind of Wyclif they did not remain mere speculative theories, but became actively aggressive principles. One of his propositions was: 'Quod ad verum dominium seculare requiritur iustitia dominantis, sic quod nullus in peccato

mortali est dominus alicuius rei.'* From this great principle, which Wyclif intentionally made a prelude to his *Summa in Theologia*, the line of action he subsequently followed may in large measure be deduced. His life was a rebellion against what he believed to be unjust dominion—a rebellion analogous to the national one going on in more than one country of Europe at the time.

As a justification of this course of conduct, since ecclesiastical authority was adverse to him, he fell back upon the teaching of Holy Scripture. The Word of God, he believed, would support him in his position, though the religious orders might assail him, and archbishops condemn. Hence he began to lay stress on the importance of a study of the Bible, and the necessity that people should be able to read it in their own tongue. In his tract on the Pastoral Office, probably written not later than 1378,† he pleads for an English translation. After instancing the gift of tongues at Pentecost, and the fact of St. Jerome's making a translation of the Bible, he continues: 'Also the wurthy reume of fraunse, not-with-standinge alle lettingis, hath translafid the bible and the gospels with othere trewe sentensis of doctours out of lateyn in-to freynsch, why shulden not engliysche men do so? as lordis of england han the bible in freynsch, so it were not ayenys (against) resoun that they hadden the same sentense in engliysch; for thus goddis lawe wolde be betere knowun & more trowid for onehed of wit (believed for unity of meaning), & more acord be be-twixe reumes.'‡

At what precise date Wyclif began himself to supply this want, we have not the means of knowing. No doubt, his thoughts had long been turned to it. But the genuineness of what is commonly cited as his first work in this field, a Commentary on the Apocalypse, with translation, has been called in question. At any rate, by the year 1380 he was busily occupied with the task of translating the NT, while a fellow-worker, Nicholas of Hereford,§ was engaged upon the OT. Hereford's work, of which the original MS is extant, breaks off abruptly in the middle of a verse, Bar 3²⁰. The cause of this sudden interruption has been conjectured to be a summons to appear before a synod of preaching friars, served upon Hereford in 1382, followed by an adjourned trial held at Canterbury, which ended in his being excom-

* *Ib.* p. xlvii. For the evidence that the *de Dominio* is Wyclif's, see p. xxii.

† *English Works*, ed. by F. D. Matthew, pp. 405, 429. The editor makes no doubt that this is Wyclif's own composition. In another tract, on the Office of Curates, probably not by Wyclif himself, but by one of his school (*ib.* p. 141), the language used is very decisive. Speaking of the opposite party, the writer says: 'thei crien opynly that seculer men schullen not entirmeten (meddle) hem of the gospel to rede it in heir modir tonge, but heere her goostly fadris preche & do after hem in alle thingis; but this is expresse ayenst goddis techynge.'

‡ Mr. Matthew suggests (p. 530) that the French translation referred to in this passage may be that described by M. Paris. See above, p. 237^b note j. Bender, in his *Der Reformator Johann Wyclif*, 1884, pp. 11-20, collects the passages, from Foxe and others, which seem to indicate the existence of vernacular Bibles in England before Wyclif's time. But if any such had been known to Wyclif, his argument in the text would have lost its force.

§ Nicholas of Hereford was an Oxford man, and Fellow of Queen's, with which college Wyclif also is said to have been connected. He was implicated in the confession of John Ball in 1381. Throughout the Lent of 1382 he was preaching zealously at the University Church in support of Wyclif's doctrines; but on June 15th was suspended from all public functions. On July 1st, failing to appear at his trial, he was excommunicated. From this sentence he appealed to the pope, and set out for Rome. Hence probably the sudden termination of his manuscript work, before referred to. More than once he narrowly escaped being handed over to the secular power. At length, after being, according to Foxe, grievously tormented in Saltwood Castle, he recanted, probably in 1391. He afterwards himself sat in judgment on heretics, was treasurer of Hereford Cathedral in 1397, and died in the Carthusian monastery of St. Anne, Coventry, somewhere about 1420.—See R. L. Poole's article in the *Dict. of Nat. Biography*.

* F. D. Matthew inclines to the view that he was. See the *Introduction* as before, p. iv, n. Sir E. M. Thompson, in the account of Wyclif prefixed to the Guide-book before referred to, thinks the evidence for it conclusive.

† Compare the title 'clericus specialissimus domini regis,' borne by Philip Repyngdon. It appears to mean king's chaplain, and not, as some think, a special clerk or commissioner.

‡ Stubbs, *Constitutional History*, 1880, II. p. 463.

§ *Ib.* p. 484.

|| See the Preface to E. L. Poole's edition of the *de Dominio*, 1890, pp. xxxiv-xxxvi.

municated on July 1st. Who continued and finished the OT* we do not know. It would no doubt be under Wyclif's superintendence; but it was in this year that he had his first seizure of illness, and it is difficult to believe that he could, single-handed, have finished his own NT work, and also what was wanting of Hereford's. It is usual, however, to assign to him the whole of the NT translation and the remainder of the OT.

The want of uniformity perceptible in the work, added to the defects naturally attending a first attempt, rendered a complete revision necessary. This was at once taken in hand; but, before it could be finished, death removed the master mind. A faithful disciple of Wyclif, John Purvey,[†] carried on the work, and, somewhere about 1388, the whole task of revision was accomplished.

In a lengthy 'Prolog' to the OT thus revised, Purvey states the principles by which he had been guided. Out of a charitable desire, he says, 'to saue alle men in our rewme (realm), whiche God wole haue sauid, a symple creature hadde myche trauaile, with diuerse felawis and helperis; to gedere manie elde biblis, and othere doctouris, and comune glosis,§ and to make oo Latyn bibel sumdel (somewhat) trewe.' He then describes the process of revision, as the workers compared the version made with 'the glose,' and other doctors, 'and speciali Lire|| on the elde testament, that helpide ful myche in this werke.' A third time their performance was tested, by a reference to grammarians and early writers, in order to settle

* It should be remembered that, according to the arrangement of the books of the OT in the Vulgate, the portion remaining after Baruch is not large—Ezekiel, Daniel (with its continuations), the Minor Prophets, and 1 and 2 Maccabees.

† The important part taken by Purvey in Wyclif's great work makes some particulars of his life desirable. He is said to have been a native of Lathbury in Buckinghamshire, born about 1354. Wyclif, it will be remembered, was at one time rector of Lutterworth in that county. During Wyclif's residence at Lutterworth, Purvey was closely associated with him, and, after his master's death, went, as one of the itinerant preachers, to Bristol, a city in sympathy with the new movement. Proceedings were taken against him by the Bishop of Worcester, and in 1380 he was imprisoned. In 1400-1 he was brought before Convocation, and recanted. In August 1401 he was presented to the vicarage of West Hythe in Kent; but, his mind being ill at ease, he resigned it in Oct. 1403. In 1421 we find him again imprisoned by Archbishop Chicheley. He was alive in 1427, after which nothing seems known of him.—See the article by J. W. Hales in the *Dict. of Nat. Biography*, vol. xlvii. p. 52.

‡ Who these helpers were we can only conjecture. The three following were noted adherents of Wyclif at the time, and it is not improbable that one or more of them had a hand in the work:—John Aston, or Ashton, is said to have been of Merton College, Oxford. If Wyclif was seneschal of Merton, this might account for their friendship. In 1382 he was conspicuous as one of Wyclif's itinerant preachers. In that year, along with Lawrence Belesman, Nicholas Hereford, and Philip Repyngdon, he was summoned to appear at Blackfriars, in London, before Archbishop Courtney. By a royal patent, July 13th, he was expelled from his university. On Nov. 27th he recanted, but we find him again denounced as a Lollard, and prohibited from preaching.

Lawrence Bedeman, otherwise Stevine, was an Oxford man, like his companions, being of Stapeldon Hall, afterwards Exeter College. It fared with him, in 1382, as with Aston. Brantingham, Bishop of Exeter, took proceedings against him for his conduct as an itinerant preacher in Cornwall. After making his submission, he became rector of Lifton, Devonshire, and was there as late as 1410.

Philip de Repyngdon was probably a native of Repton. He was educated at Broadgates Hall, Oxford, and before 1382 was an Augustinian canon of St. Mary de Pré, Leicester. Like Hereford, he was a vigorous upholder of Wyclif's tenets in sermons at Oxford. When exposed to the same trial, he appears to have succumbed at once, becoming afterwards a great favourite with Henry IV., with the style of 'clericus specialissimus domini regis Henrici,' and in 1404-5 being made Bishop of Lincoln. On Sept. 18th, 1406, he was created a cardinal by Gregory XII., and died in 1424.—See the articles by O. L. Kingsford and R. L. Poole in the *Dict. of Nat. Biography*.

§ The *glossa ordinaria*, or 'comune glose,' was the work of Walafrid Strabo, about A.D. 840. The interlinear gloss was later.

|| Nicolaus de Lyra, so called from the place of his birth in Normandy, was a converted Jew. Hence the special value attached to his commentary on the Old Testament. He died at Paris in 1340.

the precise use and meaning of words and phrases. And yet once again there was a final scrutiny, by a committee, as we should say, when there were present 'manie gode felawis and kynnynge at the correcting of the translacioun.'*

That the work, after so much preliminary care, was well and thoroughly done, need not surprise us. Purvey's revision appears to have aimed chiefly at making the rendering more idiomatic, both in respect of the vocabulary and the construction of sentences. In particular, too close an imitation of the participial construction of the Latin had often led the earlier translators into difficulties. 'Wyclif's own part,' says a competent judge,[†] 'offends less in this respect than Hereford's; but the work of each needed anglicizing or englishing; and this was the improvement Purvey set himself to carry out.' A few examples will make this clearer. It should be premised that not only was the Vulgate the sole authority for the translation, but that, as Purvey himself says, the text of the Vulgate was then in a bad state. 'The comune Latin biblis,' he declares, 'han more nede to be correctid, as manie as I haue seen in my lif, than hath the English bible late translad.' This was particularly the case with the Psalms, St. Jerome's version of which was not used in the services of the Church, 'but another translacioun of othere men, that hadden myche lasse kynnynge and holynesse than Jerom hadde.'

In Ex 7²² the *malefici* of the Vulgate is rendered 'the clepers of deuils to doon yuel' by Hereford; 'witchis' by Purvey.

Jos 10¹⁷ 'lurking in the spelunk of the cite' (H.); 'hid in the denne of the cite' (P.).

Jg 5²⁸ *Maledicite terram*, 'curse ye to the loond' (H.); 'curse ye the lond' (P.).

Ps 77 (78)⁷⁰ *De post fatantes accepit eum*, 'fro the after berende blet he too hym' (H.); 'he took hym fro bihynde scheep with lambren' (P.).

Ps 113 'The maunetis of Jentilis syluer and gold' (H.), 'The symulacris of hethene men ben siluer and gold' (P.).

Lk 14¹⁵ 'Whan sum man of sittinge at the mete had herd' (H.); 'And whanne som of hem that saten togider at the mete had herd' (P.).

Ro 13¹¹ 'And we witinge this tyme, for hour is now, vs for to ryse of slepe' (H.); 'And we knowen this tyme, that the our is now, that we rise fro sleep' (P.).

Besides the general 'Prolog' already spoken of, there are separate prologues, some of them very short, to most of the books of the OT and NT. These are usually translated from St. Jerome. The order of books in the main follows the Vulgate, but 'Deeds' (Acts) stands between Hebrews and James. The Epistle to the Laodiceans, inserted after Colossians in the first version, was left out by Purvey.§ The later version has also a number of marginal glosses or notes in place of the short textual insertions common in the earlier. These glosses, it may be remarked, whether textual or marginal, are not of a controversial nature. They are simply explanatory. There does not appear to be any desire to use them for party purposes. Thus, on the passage relating the institution of the Lord's Supper, a subject on which Wyclif's views were elsewhere so strongly pronounced, there is no note at all. Neither is there on Mt 16¹⁷, with the exception of a textual

* Forshall and Madden, vol. i. p. 57. The General Prologue fills 60 pages in this edition. It is strictly a prologue to the OT, hardly mentioning the NT, to which Purvey may have intended to prefix a similar prologue.

† J. W. Hales, in the article before quoted. By the publication in a convenient form of *The Book of Job, Psalms, . . . etc.*, from Hereford's version as revised by Purvey (Oxford, 1881, 8vo), Skeat has made it easy for the ordinary reader to form an opinion of Hereford's style, though not as he originally wrote.

‡ The list of such passages may be easily extended from Eadie or Mombert.

§ As none of the volumes in Forshall and Madden's great edition has a table of contents, Skeat was at the trouble to compile one for a paper read by him at a meeting of the Philological Society, June 6th, 1896. He distinguishes the different MSS used by the editors in each part of their work. See the *Transactions of the Philological Society*, 1896, p. 217 E.

gloss, explaining *Duriona* as 'the sone of culuer' (a dove).

This being the case, one is perplexed to know on what ground Sir Thomas More should inveigh so bitterly against Wyclif's translation. 'In which translatioun he purposely corrupted the holy text, malyciously placynge therein suche wordys as myght in the reders erys serue to the profe of such heresyes as he went about to sow; which he not only set forth with his own translatioun of the byble, but also with certayne prologes and glosses which he made ther vpon.* Such prologues and glosses as we have do not answer this description. 'The ecclesiastical authorities in England' at the time, writes an unexceptionable witness,† 'most certainly approved of various copies of the actual versions now known as Wycliffe.' Some of these extant copies are shown, by the autographs and inscriptions they bear, to have belonged to high personages in Church and State. What is the explanation? A very daring one has been started by Father Gasquet.‡ He endeavours to prove that the versions of which we have been speaking, those we call the Wycliffe, are not Wycliffe at all; that we have been under a delusion all these years; that the heretical translation of the Bible due to Wyclif and his followers, if it ever existed, has completely disappeared; and that what we possess under that name is neither more nor less than an authorized Catholic translation of the Bible. The existence of such orthodox versions is attested by the evidence of Sir Thomas More, who declares that 'the whole byble was longe before his (Wyclif's) dayes by vertuous & well-learned men translated into the englysh tonge, & by good and godly people with deuocyon & sobernes well & reuerently red.§ In another well-known passage he speaks of having seen 'Bibles fair and old.' It is to be observed that More speaks of such orthodox versions as were in use long before Wyclif's days. The Bibles he has seen are old. That no authorized version was made at, or after, Wyclif's time, follows plainly, it would seem, from another passage a little later on in this same *Dyalogue*. 'And surely howe it hathe hapned that in all this wylde god hath eyther not suffered or not prouyded that any good vertuous man hath had the mynde in faythfull wyse to translate it, and ther vpon eyther the clergy or at the lest wyse some one bysshop to approue it, this can I nothyng tell.¶

If, then, the orthodox English versions seen by More were old ones; if, as he implies, no fresh ones were made by authority from Wyclif's day to his own, how is the fact to be explained that the Bible, now suddenly claimed as Catholic, while found, wholly or in part, in nearly 200 MSS, should be found nowhere but in MSS written in or soon after Wyclif's time? Why should the style, in every instance, fix the composition to the last quarter of the 14th century? What can have caused this sudden and prolific growth of orthodox Bibles just then, when no link is visible to connect them with an earlier stage?

Father Gasquet's paradox is a bold one, and, it need not be said, ingeniously and forcibly defended. But, if it is proved untenable, the resorting to it will be one more testimony to the candour and good faith of the Wycliffe translation.¶

iv. REFORMATION PERIOD.—The century that intervened between the death of Wyclif and the birth of Tindale has been rightly called a century of preparation. For a time the spread of Lollard opinions was checked. The passing of the *Act de heretico comburendo* in the reign of Henry IV., and the condemnation of unauthorized versions of the Bible in the Synod at Oxford in 1408, threatened to be a deathblow to the hopes of Wyclif's followers. But the wave which had retreated for a while was soon to return with redoubled force. The fall of Constantinople in 1453 threw open to the Western world the treasures of Greek literature. The invention of printing, about the same period, furnished the means of spreading abroad the results of the new learning. In 1466 ** was born one destined to be perhaps the greatest exponent of that new learning, Desiderius Erasmus. Hitherto authority had triumphed against conviction: it was now to be seen whether it would triumph against conviction allied with knowledge.

** That 1466 and not, as commonly said, 1467 was the date of Erasmus' birth, has been shown by Kan, the learned headmaster of the Erasmusgymnasium at Rotterdam.

Between the years 1480 and 1490, possibly in the same year that Luther was born at Eisleben, William Tindale first saw the light, it is believed, in the little village of Slymbridge, Gloucestershire.* Foxe says that 'from a child' he was brought up in the University of Oxford. If so, as he did not take his Bachelor's degree till 1512, nor his Master's till 1515,† it would seem that his first years there were spent, not in college but in school. And with this agrees the statement that he entered Magdalen Hall, then known as Grammar Hall, the school preparatory to the great foundation of William of Waynflete. As a boy there, he may have seen Colet, who was probably of Magdalen; but Colet left Oxford on being appointed Dean of St. Paul's in 1505, and it is not likely that Tindale could have come, in any direct manner, under his influence. 'Spying his time,' says Foxe, Tindale presently left Oxford for Cambridge. The exact year of this migration we do not know, nor the immediate cause of it. It is natural to connect it with the presence of Erasmus in the sister university, where he was Lady Margaret professor from 1511 to 1515. But here, again, the date of Tindale's M.A. degree is a difficulty.

After leaving the university, about 1521, as we may suppose, he became tutor in the family of Sir Thomas Walsh, a knight of good position and well connected, at the manor house of Little Sodbury, not far from the place of his birth. Here he remained till the latter part of 1523. The need of reform in matters ecclesiastical in Gloucestershire may be inferred from the fact that from 1512, when Sylvester de Giglis returned to Rome, to 1535, when Hugh Latimer was consecrated, there was no resident bishop of Worcester. The see was held by Italians; one of them being afterwards Clement VII. As men's thoughts were turned to such abuses, we can hardly wonder that a blunt, free-spoken man like Tindale occasionally got into heated arguments with the local clergy and others who frequented the manor house. These he silenced by a translation of the *Enchiridion* of Erasmus; but, beginning to preach in an irregular manner to the neighbouring villagers, he was summoned to appear before a clerical tribunal, presided over by Parker, chancellor of the diocese.

Though no proof of heretical teaching was established against him, Tindale began to turn his thoughts to another scene. The idea of an English Bible had been long present to his mind. In London the idea might become a fact. He would address himself to the Bishop of London, Tunstall, the friend of More, a man of repute as a statesman and a scholar. Armed with a translation of Isocrates to be his introduction to the bishop, and a letter from his patron to Sir Harry Guildford, he came to London. The reception he met with from Tunstall, though not surprising to us, and the disappointments he experienced in other quarters, convinced Tindale, as he sorrowfully owns, 'not only that there was no rowme in my lorde of londons palace to translate the new testament, but also that there was no place to do it in all englonde.'‡

During his short stay in London he met with one faithful friend. This was Humphrey Monmouth, afterwards an alderman and sheriff, and knighted, who chanced to hear him preach in the

* We follow in this account the *Life of Tyndals* by R. Demaus, revised edition 1886. The Reformer, it may be noted, spelt his own name Tindale (*ib.* p. 9), the spelling adopted throughout this Dictionary.

† See Boase, *Register of the University of Oxford*, 1885, i. pp. ix, 80. He supplicated for his degree in the name of Huchens, or Hychyns, a name by which some previous generations of his family appear to have been known. The dates furnished by the *Register* make the earlier year suggested for Tindale's birth improbable.

‡ *Preface to the Pentateuch.*

church of St. Dunstan in the West. Monmouth took him into his house as chaplain, at a stipend of £10 a year.* For this he afterwards got into trouble; and his petition to Cardinal Wolsey, between four and five years later, is valuable for the picture it gives us of Tindale's manner of life while in his house. After relating his first acquaintance with him, Monmouth continues: 'So I took him into my house half-a-year; and there he lived as a good priest as methought. He studied most part of the day and of the night at his book; and he would eat but sodden meat by his good will, and drink but small single beer.'†

At the table of Monmouth, a merchant who had travelled, and visited Rome and Jerusalem, Tindale would be sure to meet with men who could tell him of the doings abroad, and especially of Wittenberg and Luther. Determined at length, as the safest course, to entrust his contemplated work to a foreign printer, he made choice of Hamburg, and in or about the month of May 1524 set sail for that busy city. As Hamburg is said to have possessed no printing-press at this time, it is a matter of dispute whether or not Tindale stayed there till his translation was ready for printing. He may have gone to visit Luther at Wittenberg, as is implied in statements of More and others. If so, he returned to Hamburg, to receive his remittance from Monmouth, and then went on to Cologne, to arrange for the printing of his English Testament at the press of Peter Quentel. Three thousand copies of the work, in small quarto size, were to be struck off. The printing had advanced as far as signature K, when the authorities of the city unexpectedly gave orders for the work to be stopped, and the printed sheets confiscated. An enemy, Cochläus,‡ had been dogging the footsteps of the English scholar, and from him came the information given to the senate. Tindale and his companion Roye§ hastily caught up what they could of their materials, and took passage up the Rhine to Worms, where they would be in less fear of interruption. From the difficulty of matching Peter Quentel's type at the press of Peter Schoeffer (son of the partner of Faust), Tindale seems to have given up the thought of completing the 4to edition; and instead to have had his work printed in small 8vo, without notes or glosses. But, not to waste the copies of the sheets printed in 4to at Cologne, he sent them on to England. In this way, about March 1525-26, there appeared the first English New Testament ever printed, the one in 8vo, complete, and the portion of the one in 4to. Of this latter, the first printed in point of time, only one solitary fragment is known to remain; and of the former, only two copies, neither of them complete.||

Before pausing to consider these translations in

* Equal to about £120 now.

† Monmouth's petition is in the Harleian MSS. See Demaus, p. 88 n.

‡ John Dobeneck, who latinized himself as *Cochläus*, was born about 1503 in a village near Nurnberg. He was a violent opponent of Luther. As he was himself passing a book through Quentel's press at the time, he had peculiar opportunities for learning the business of the two Englishmen. See the letters from him in Arber's *First Printed English New Testament*, 1871, pp. 18-24.

§ William Roye, who had been an Observant Friar at Greenwich, was acting as Tindale's amanuensis. As would be guessed from his poem, he was an uncongenial spirit, and Tindale was glad to get rid of him as soon as he could.

|| The fragment in 4to is now in the Grenville Library of the British Museum, No. 12,179. It consists of 31 leaves, and goes to the end of sheet H, ending abruptly with the words 'Friend, how earnest thou in hither, and' (Mt 22¹²). It has been photographed, with an Introduction, by Mr. Arber. Of the 8vo edition there is an imperfect copy in the Library of St. Paul's Cathedral, and a perfect one (all but the title-page) in the Library of the Baptist College, Bristol. The singular vicissitudes through which this last book has passed are told by Demaus, p. 126.

detail, we must briefly conclude the story of the author's life.

The summer of 1526 was probably spent by Tindale at Worms, in making arrangements for the transmission of his books to England.* Obstacles in the way of their reception soon began to appear. Besides the warning given by Cochläus, Edward Lee, the king's almoner, afterwards Archbishop of York, wrote from Bordeaux on Dec. 2nd, 1525, to report what he had heard of the suspected work in his journey through France. One active agent in the distribution of the books was Simon Fish, author of *The Supplicacyon for the Beggars*, then living near the White Friars. Standish, bishop of St. Asaph,† was the first to bring the matter under the cognizance of Wolsey. The great cardinal was disposed to make light of it, but Tunstall was urgent for the condemnation of the anonymous version, and it was ordered that the books should be burnt, wherever found. To make the condemnation more impressive, a public burning was appointed, to follow a sermon by the Bishop of London at Paul's Cross.‡ A mandate to the like effect was issued by Warham, Archbishop of Canterbury, on Nov. 3rd; and by the end of the year the part taken by Tindale and Roye came to be publicly known, and an active search was made for them. West, a priest of the community to which Roye belonged, was sent abroad to track them, and letters from him and Hermann Rinck, during 1528, give an account of their efforts. Tindale and Roye, however, had separated, and their machinations were thus baffled. In 1527, or thereabouts, Tindale went to Marburg in Hesse, the seat of a university, and there, towards the end of 1528, was joined by Frith. At Marburg (anglicized in his colophons as 'Marlborow') he printed several of his controversial works, and, what more concerns us, the first instalment of his long-meditated version of the OT. The Pentateuch was here printed by Hans Luft, and published Jan. 17th, 1530.§ Several copies of this exist, but only one (now in the Grenville Library) in a perfect condition. It is remarkable for the 'piebald' appearance of the printing; Genesis and Numbers being in Gothic letter; Exodus, Leviticus, and Deuteronomy, in Roman. The explanation probably is that the books were prepared for separate issue, the five having no collective title-page. The following year Tindale printed, at

* It is a mystery whence the money was obtained for defraying the first cost of these editions. 3000 copies of the 8vo edition are said to have been struck off at Worms. Whether the 4to edition was completed there, is disputed. No trace of such a complete edition is left, beyond the fragment printed at Cologne. Still, even the existence of this was not known till 1834.

† For this person, see Erasmus' Letter to Justus Jonas (Eng. tr. 1883, p. 42).

‡ As need hardly be said, this buying up and burning the copies of Tindale's first edition proved the readiest means of providing money for a second. But it is not fair to call Tindale, as Dore does, a 'participator in the crime' because he let the books be sold, knowing to what purpose they would be put. The motives of the two parties were different. The bishops wished to destroy this translation; Tindale wished to replace it by a better. See Dore, *Old Bibles*, 1888, p. 26.

§ Genesis alone has the colophon: 'Emprinted at Marlborow in the lande of Hesse, by me Hans Luft, the yere of oure Lorde M.cccc.xxx. the xvij dayes of Januarij.' From the peculiarity of 'Marlborow' as an equivalent for Marburg, and from an impression that Hans Luft never had a printing-press there, Mombert endeavoured to prove that the Pentateuch was really printed at Wittenberg, and that 'Marlborow' was a pseudonym. 'It is painful,' says one writer, accepting this as proved, 'to think that an intentional misstatement should be on the imprint of the first part of the English bible ever issued' (Dore, *Old Bibles*, 1888, p. 67). The pain may fortunately be relieved, and the fair fame of Tindale cleared, by observing the evidence furnished by an able reviewer of Mombert in the *Athenaeum*, Apr. 18th, 1885, to show that Hans Luft really had an itinerant press at Marburg at this time, and that in fact one publication of this very year, the *Compendious olde Treatise* used by Foxe, bears the colophon: 'Emprinted at Marlborow in the lade Hessen by me Hans Luft.'

Antwerp most probably, his translation of the Book of Jonah.[†] Antwerp was a dangerous retreat, but it was conveniently situated for communicating with England. Here accordingly he resided from 1533, if not earlier, to his arrest in 1535. The last two years of his life were years of great literary activity. In 1534 appeared at Antwerp his revision of the Pentateuch, Genesis being the only book in which any changes were made;† and in November of that year his revised NT.‡ This is commonly called the second edition, and it is strange that nine years should have elapsed before Tindale himself published one.§ But if there had been any delay, there was none now. Two editions appeared in 1535. These must be carefully discriminated. The first is entitled: *The newe Testament dylygently corrected and compared with the Greke by Willyam Tindale, and fynished in the yere of oure Lorde God A.M.D. and XXXV.*¶ No place or printer's name is given, but it is considered to be from the press of Hans van Buremonde at Antwerp. It is in 8vo. A striking peculiarity of this edition is the curious misspelling of English words, such as 'faether' for father, 'stuede' for stood, and the like. This gave rise to the fancy that Tindale had adapted his version to the pronunciation of the Gloucestershire farmers. But the more rational explanation is that Dutch or Flemish compositors were employed upon this edition; and that in fact it was not superintended by Tindale at all, but a private enterprise of Dutch printers, who had observed the censure passed on Joye's unauthorized production of the previous August, and wished to anticipate the final revision which Tindale was understood to be preparing.¶

This last revision, in which 'yet once again' Willyam Tindale addressed the reader, has two titles, the first bearing date 1535, the second 1534; denoting, we may suppose, the times of publication and printing. It is in 8vo size, with black letter type, and has a calendar prefixed. While bearing no printer's name, or place, it has a printer's mark with the initials G. H. These were conjectured by Stevens to denote Guillaume Hychyns, a form of the translator's name; ** but the late Henry Bradshaw has shown convincingly that they are the initials of the Antwerp publisher, Godfried van der Hagen, who latinized himself as *Dumaüs*. The printer he employed was frequently Martin Emperour, who was probably the printer of this last revision.††

We must hasten to the close. On the 23rd or 24th of May 1535 Tindale was entrapped and carried off from Antwerp to the fortress of Vilvorde, where he was strangled and burnt on Oct. 6th, 1536. Even in his imprisonment he was not idle. In the touching letter‡‡ to the governor of the fortress, the Marquis of Bergen-op-Zoom, in which

he petitions for warmer clothing, he asks also for a Hebrew Bible, grammar, and dictionary. And it is said that he finished in prison a translation of the books Joshua to 2 Chronicles inclusive.* His last words at the stake were: 'Lord, open the king of England's eyes!'

The influence exercised by Tindale's version on subsequent ones will be best considered later on. But it seems proper to notice here a question that has been raised as to his competence for the work of translating. Was he able to form an independent judgment on his Greek and Hebrew originals, or did he take his Pentateuch from Luther, and his New Testament from Luther and Erasmus?† It may be admitted at once that Tindale availed himself freely of the labours of both those scholars. His object being what it was, he would probably have thought it mere perverseness not to do so. But he did not borrow as one who could not pay back. Even in the prologues, he sometimes not only differs from, but argues against, the German translator, as in the case of the prologue to James. Tindale's great aptitude for languages is shown by various testimonies. That of Herman von dem Busche† would be thought high-flown if we did not know that it came from one not likely to be imposed upon. As regards Hebrew, in particular, one of the seven languages that von dem Busche declared Tindale to be at home in, it is not likely that he would have found it difficult to obtain instruction in it at Cologne, or Worms, or other cities where he stayed.

The question is one that, after all, can be settled only by an induction of passages on a sufficiently large scale. For that there is no room here. We give a few, taken almost at haphazard from the NT; some of which will show Tindale's obvious indebtedness to previous versions. But the general impression conveyed by them will be, we think, that he used these helps as a master, and not as a servant.‡

Lk 24⁹ An nescielatis, quod in his que patris mei sunt, oportet me esse?

Wissen ir nit, das ich seyn muss in dem das meins vatters ist?

Wist ye not that I must goo aboute my fathers busines? (Compare, as showing Tindale's freedom, the Rhemish of 1522, closely following the Latin, 'I must be about those things which are my father's'.)

Ac 9¹⁰ Vade, quoniam organum electum est mihi iste.

Gang hyn, den diser ist mir en auserwelet rustzeug.

Goo thy wayes: for he is a chosen vessell vnto me ('vessel' representing the Greek *σκεύος* more closely than the Latin or German).

Ac 27³⁰ Nautis uero querentibus fugere e nauti . . . sub pretextu uelut e prora ancoras extensuri, dixit Paulus centurioni . . .

Da aber die schiffeutt die flucht suchten . . . vnd gaben fur, sy wolten ancker auss dem hinder schiff auss strecken, sprach Paulus zu dem vnderhauptman . . .

As the shipmen were about to fle out of the ship . . . vnder a coloure as though they wolde have cast ancores out of the forshippe: Paul saide vnto the vnder captayne . . . (Compare 'hinder schiff' with 'forshippe'. The term 'vnder captayne', for centurion, seems clearly due to the German).

Ro 2¹⁸ . . . institutus ex lege: vnd weyl du auss dem gesetz vnderrecht bist; in that thou art informed by the lawe (καταχρηματισμένος ἐκ τοῦ νόμου. Note 'by' instead of 'out of').

1 Co 9¹⁹ . . . quo plures lucrificam; auff das ich ir vil (=ihrer viel) gewinne; that I myght wyne the moo (more). (The comparative is rightly kept, with the Greek and Latin, against the German).

* The English version of these nine books in 'Matthew's' Bible is not Coverdale's, and reasons are given to show that it was by Tindale. See Moulton, p. 127.

† The reviewer in the *Athenaeum* before referred to (May 2nd, 1885) holds very strongly that he did both. Admitting that Tindale possessed a fair knowledge of Greek, he yet insists that the wholesale borrowing of Luther's prologues and marginal notes, in the first Cologne fragment, justifies the charge that the work was adapted from Luther. If this was done with a Greek original, and with Erasmus' Latin rendering as an assistance, what would be done with a Hebrew original? Where could Tindale, travelling about from place to place, and busy with the publication of his treatises, find opportunities of acquiring a sound knowledge of so difficult a language? The reader will find in Eadie, i. pp. 143, 209, a collection of passages from various writers, conveying this imputation more or less directly.

‡ For this writer, sometimes latinized as *Dumaüs*, see the 'Index Biographicus' to Bocking's edition of the *Epistolae Obscurorum Virorum*, to which he was one of the contributors. His biographer, Hermann Hamelmann, speaks of him as the friend of Colet, More, and Fisher. Erasmus was one of his correspondents.

§ The editions used for this comparison are the third of Erasmus' *Novum Testamentum*, Basle, 1522; Luther's *Das neue Testament*, 'zu Basel, durch Adam Petri', 1522 (the first edition of all came out, we believe, in September 1522, at Wittenberg); and Tindale's New Testament of 1534, as reprinted in Bagster's *Hexapla*.

* Copies of this had so completely disappeared, that some began to doubt its ever having existed. But in 1861 Lord Arthur Hervey discovered a copy, bound up in an old volume with other pieces, in his library at Ickworth.

† Dore, *Old Bibles*, 1888, p. 69, where the book is described.

‡ *The newe Testament, dylygently corrected . . . by Willyam Tindale*. It was printed in Gothic letter by Martin Emperour, in 8vo. This is the edition used in Bagster's *Hexapla*. In Fry's *Bibliographical Description* it is No. 8. The copy in the British Museum is marked C. 23, a. 5.

§ This is not taking count of surreptitious editions, such as Dore gives instances of (*op. cit.* p. 27), nor of Joye's unauthorized edition in August 1534. For this last, see Westcott, *General View*, 1872, pp. 46-49.

¶ The titles of this and of the next are taken from the Catalogue of the British Museum Library. The press-marks of the two copies are C. 36, a. 2 and C. 36, b. 5.

¶ See the Introduction to Bagster's *Hexapla*, p. 19, col. 1. This edition is the one numbered 5 by Fry.

** See above, p. 241b, note f.

†† See Bradshaw's paper, 'Godfried van der Hagen,' reprinted from the *Bibliographer*, 1886.

‡‡ Reproduced in facsimile by Fry, with a translation.

- 2Co 4⁷ Habemus autem thesaurum hunc in testaceis uasculis; in irdischen gefassen; in erten vessels. (Probably Tindale took 'erten', that is, of earthenware, from the German. Wyclif's 'brill' preserves one side of the Latin *testaceis*, *terrenis*, as referring to Gideon's pitchers).
- Ph 130 secundum expectationem; wie ich endlich wartte; as I hertely loke for. (Tindale seems to catch the force of *ἀνασπασίας*, the 'earnest expectation' of one looking out eagerly for news).
- Ph 137 . . . adiuvantes decertantem fidem euangelij; vñd sampt (sammt) vns kempfft (kämpfet) über dem glauben des Euangelij; labouring as we do, to mayntayne the fayth of the gospell.
- Ph 27 . . . semetipsum inanuit; hat sich selbs geeüssert; made him silfe of no reputacion (literally 'emptied himself.' Note the freedom of the rendering).
- Ph 43 . . . compar germana; mein artiger geferte (mein trewer geselle, 1534); faythfull yockfelowe. (Wyclif has: 'Also I preie & the german fellowe').
- Ph 45 . . . modestia uestra; euwere lindigkeit; youre softenes. (Here probably the term used is suggested by the German).
- Ph 410 . . . quod iam tandem reuiguit uestra pro me sollicitudo; das ir der mals eyns wider errunet seyt von mir zu halten (das ir widder wacker worden seid, fur mich zu sorgen, 1534); that now at the last ye are revived agayne to care for me.
- Ja 132 . . . faciem natuitalis suæ; sein leiplich angesicht; his bodyly face.
- Ja 35 Ecce, exiguis ignis quantum materiam incendit; Sihe, ein klein feur, welch einen walt zündet es an; Beholde how gret a thinge a lyttell fyre kyndleth.

When we turn to the Old Testament there is, so far as the present writer can pretend to judge, less evidence of originality in Tindale's translation; but instances are not wanting to show that he did not follow blindly either Luther or the Vulgate. Sometimes he differs from both. In many cases he sides with one as against the other; sometimes mistakenly, but quite as often, we think, taking the right side. A few examples will suffice:—

- Gn 314 inter omnia animantia; vor allem viech; of all catell. (Tindale's *of* is nearer to the original 'out of,' 'from among'—see RVm—than the others).
- Gn 421 pater canentium cithara et organo; die mit harpfen vñd pfeiffen vmbgengen; all that excercyse them selves on the harpe and on the organs (Here it would have been better to render 'pipe' instead of 'organ,' with the German).
- Gn 2123 et posteris meis stirpique meæ; meine kinder . . . meyne naffen; my children nor my children's children. (Tindale, alone of the three, appears to aim at keeping the alliterative cast of the Hebrew).
- Gn 3041 Dixit: Feliciter, et idcirco vocavit nomen ejus Gad; da sprach Lea, Rustig, vñ hiess in (ihn) Gad; Then sayde Lea: good lucke; and called his name Gad. (Compare the rendering in AV).
- Gn 3519 hæc est Bethlehem; die nñ heisse BethLehem; which now is called Bethlehem. (The words are now held to be a gloss. Tindale plainly followed Luther).
- Gn 373 fecitque ei tunicam polymitam; vñd machet im einen bundten rock; and he made him a coote of many colours. (The rendering 'of many colours' is retained even in the RV, though in the margin 'a long garment with sleeves' is given. The LXX supports the former, having *μακρὰν*; and probably the same meaning was meant to be conveyed by 'polymitam' (*πολύμητος*), 'of many threads,' in the sense of damasked).
- Ex 314 Ego sum qui sum; Ich werde seyn der ich seyn werde; I wilbe what I wilbe. (See RVm).
- Ex 126 ad vespæram; zwischen abents; aboute euene. (The German is the most literal).
- Ex 1514.15 (Tindale has the past tense, along with the Vulgate and Luther; the AV has the future).
- Ex 1615 Dixerunt ad invicem, Manhu? quod significat, Quid est hoc? Das ist Man, denn sie wysten nicht. . . . They said one to another: What is this? for they wist not. . . .
- Ex 391 Fecit vestes, quibus indueretur Aaron; amtkleider zu diemen in Heylighthum; the vestimentes of ministracion to do seruyce in. ('Vestimentes of ministracion' is as literal as the AV 'cloths of service,' and more dignified).
- Lv 1290 . . . vapulabunt ambo; das sol gestrafft werden; there shalbe a payne vpon it (RV 'they shall be punished'; lit. 'there shall be an inquisition.' Tindale gives the sense, though not pointedly. AV 'she shall be scourged' conveys a wrong impression).

Tindale's last words were a prayer that the Lord would open the king of England's eyes. It is remarkable that the English version of the Bible made by the next translator we have to treat of, bore, in one of its forms, that king's imprimatur.

Miles Coverdale was born in 1488, probably in Richmondshire, in the North Riding of Yorkshire.

* The texts used are, besides a modern Vulgate, the Basel edition of Luther's Pentateuch, 1523, and the 1530 edition of Tindale's, printed by Hans Luft.

He studied at Cambridge, where he entered the convent of Augustinian Friars. In 1514 he took priest's orders. Though senior to George Stafford and Bilney, he probably fell under the same influences as they. When Barnes, who became prior of the Augustinians in 1523, was arrested and conveyed to London, Coverdale attended him, and helped him to prepare his defence. About this time he laid aside his conventual habit. In 1529 he is said by Foxe to have assisted Tindale in his work at Hamburg. In 1551 he was consecrated bishop of Exeter, but deprived in 1553, on the accession of Mary, and imprisoned. His deliverance is said to have been due to the intercession of the king of Denmark, whose chaplain, Dr. John Macbee, was his wife's brother-in-law. After living abroad in Denmark and Geneva, he returned to England in 1538, and died in Feb. 1569, at the age of 81.*

What first turned Coverdale's thoughts to the translation of the Bible is uncertain. It seems to have been, at least in part, the encouragement to undertake the task given by Thomas Cromwell, with the knowledge, if not the express approval, of Sir Thomas More.† The earliest document of Coverdale's we possess is a letter addressed by him to Cromwell, undated, but probably written in 1527, in which he reminds him of the 'godly communication' that Cromwell had held with him in the house of Master More.‡ As he goes on to speak of now beginning to 'taste of holy scriptures,' of being 'set to the most sweet smell of holy letters,' and of needing books for his work, the natural inference is that he was then engaged in the task of Bible translation. At any rate there appeared, as the result of his labours, two issues in 1535, followed by later ones, of the first complete translation of the Bible into English. The titles present an interesting, but perplexing, variety—

'Biblia | The Bible, that | is, the holy Scripture of the | Olde and New Testament, faithfully and truly translated out | of Douche and Latyn | in to Englishe. | M.D.XXXV.' (followed by texts).

'Biblia | The Byble: that | is, the holy Scripture of the | Olde and New Testament, | faythfully translated in | to Englyshe. | M.D.XXXV.' (texts). The title of an edition of 1536 varies from this last only in the spelling of one word. That of an edition of 1537 is: 'Biblia | The Byble, that | is the holy Scripture of the | Olde and New Testament, faythfully translated in Englysh, and | newly ouerseene & corrected. | M.D.XXXVII.' (texts). Imprinted in Southwarke for James Nycolson. The word 'Biblia' in all is in Roman capitals, the rest in black letter, occupying the central compartment of a page within a border of figures.§

On comparing these titles, two important differences will be noticed. Before 1537 no place of publication is given; and in the first alone is it specified that the translation is made 'out of Douche and Latyn.' With regard to the place, while there can be no doubt that the editions of 1535 and 1536 were printed abroad, opinions differ as to the claims of Antwerp and Zürich. In favour

§ See Plates I.-IV. of Fry's *The Bible by Coverdale*, 1867. No perfect copy of Coverdale's Bible is known. In the British Museum (C. 18. c. 9) is a fine copy, with titles in facsimile by J. Harris. The size of leaf is 11½ in. x 7½. The dedication, 'Unto the most victorious,' etc., begins near the top of leaf 2, and ends on the obverse of leaf 4 iii j. In line 13 it speaks of 'your dearest iust wyfe and most vertuous Pryncesse, Queene Anne.' On the reverse of 4 iii j, begins the 'Prologe,' 'Myles Couerdale vnto the Christen reader, ending on obv. of 4 7. On the reverse of this last begins a list of 'The Bokes of the hole Byble,' ending on obv. of leaf viii., and on rev. of this begins 'The first Bokes of Moses, called Genesis.'

of the former is a statement of Symeon Ruytynck, in his *Life of Emanuel van Meteren*, 1618, that Jacob van Meteren of Antwerp, the printer, employed 'un certain doctre escolier, nommé Miles Coverdale' on the work of an English translation of the Bible.*

On the other hand, certain peculiarities of type point to Zürich; and Westcott, supported by Ginsburg, is convinced that Froshover of Zürich was the printer. As to the description of the sources from which the version was made, it is most natural to suppose that the words 'out of Douche and Latyn' were omitted after the first issue, as likely to offend some English supporters of the undertaking. The mention of 'Donche' (German), in particular, might suggest a Lutheran bias. But the description was an accurate one, and in his Dedication and Prologue Coverdale openly acknowledges it. He had 'purely and faithfully translated,' he says, 'out of five sundry interpreters.' And again: 'To help me herin, I have had sondrye translations not only in latyn, but also of the Douche interpreters, whom (because of theyr synguler gyftes and speciall diligence in the Bible) I have been . . . glad to folowe.' What the 'five sundry interpreters' were is a question of much interest. Coverdale's indebtedness to the Vulgate, the Latin version of Sanctes I'agninus (first published at Lyons in 1528), Luther, the Zürich Bible (the work of Zwingli, Leo Judæ, Pellicanus, and others, 1524-29), and Tindale, are unmistakable.† But, as he specifies only 'Douche and Latyn' on his title-page, he may not have meant to include Tindale as one of the five; and if so, the fifth source may have to be sought for in some other Latin or German interpreter. In any case, the perfect candour of Coverdale's declaration in his Prologue is apparent. He had not sought the work; but when it was put upon him he had executed it with the best helps he could obtain. One or two short specimens will show the style of his translation—

Gn 49²²⁻²⁵ The frutefull sonne Joseph, that florishinge sonne to loke vpon, the doughters go vpon the wall. And though the shoters angered him, stroue with him, and hated him, yet his bowe bode fast, and the armes of his handes were made stronge by the handes of y^e Mightie in Jacob. Of him are come herdmen & stones in Israel. Of y^e fathers God art thou helped, of the Almightie art thou blessed, with blessinges of heauen from aboue, with blessinges of the depe that lyeth vnder, with blessinges of brestes and wombes.

2 K (i.e. 2 S) 5⁸⁻⁸ And the kynge wente with his men to Jerusalem, agaynst the Jebusites, which dwelt in the londe. Neuertheles they sayde vnto Dauid: Thou shalt not come hither but the blynde and lame shal dryue y^e awaie. (They thoughte plainly, that Dauid shulde not come in). Howbeit Dauid wanne the castell of Sion, which is the cite of Dauid. Then sayde Dauid the same daye: Who so euer smyteth the Jebusites, and optayneth the perquellies, the lame & the blynde, which (Jebusites) Dauids soule hateth. Herof commeth the prouerbe: Let no blynde ner lame come in to the house.

Jer 38⁷⁻¹¹ Now when Abdemelech the Morian beyng a chamberlayne in the Kynges Courte, vnderstode, that they had cast Jeremy into the dongeon: he went out of the Kynges house, and spake to the kynge (which then sat under the porte of Ben Janin) these wordes: My lord the kynge, where as these men medle with Jeremy the prophet, they do him wronge: Namely, in that they haue put him in prison, there to dye of hunger, for there is no more bred in the cite. Then the kynge commaunded Abdemelech the Morian. . . . So Abdemelech toke the men with him, & went to y^e house of Amalech, & there vnder an almyr he gat olde ragges & worne cloutes, and let them downe by a corde, in to the dongeon to Jeremy.

The tender beauty of Coverdale's translation has never been surpassed. In the Psalms especially this characteristic is noticeable. In 1662, at the last revision of the Book of Common Prayer, while the Gospels, Epistles, and other portions of Scripture made use of, were directed to be taken from

the newer version, the Psalter was left unchanged, the older version being regarded as more rhythmical for singing. Hence it is that, if the majesty or the pathos of the Psalms has sunk deep into myriads of English hearts, to Coverdale above others their debt of gratitude is due.

Coverdale's Bible had not been more than two years in circulation when there appeared what purported to be a new version, printed in 1537. To this version, commonly known as *Matthew's Bible*, some mystery attaches. The title runs: '¶ The Byble | which is all the holy Scripture: in whych are contayned the | Olde and Newe Testament truly | and purely translated into En|glysh by Thomas | Matthew. | Esaye i. | ¶ Hearcken to ye heauens and | thou earth geaue eare: for the | Lorde speaketh. | M.D.XXXVII.' Across the page at the bottom is, 'Set forth with the Kinges most gracyous lycēce.' This may accordingly be termed the first Authorized Version. On the reverse of the title is a notice of various additions made, including 'many playne expositions,' in the margin, 'of such places as vnto the symple and vnlearned seame harde to vnderstande.' A calendar and similar matter fills the next two leaves. The fourth leaf begins with 'An exhortacyon to the studye of the holye scripture gathered out of the Byble,' and has at the bottom I. R. in large floriated capitals. The rev. of this leaf and obv. of next have, 'The summe & content of all the Holy Scripture . . .,' and on the rev. of the fifth leaf is the dedication 'To the moost noble and gracyous Prynce Kyng Henry the eyght, kyng of England and of Fraunce . . . Defender of the faythe: and vnder God the chefe and supreme head of the church of Engeland . . .'. This ends on rev. of sixth leaf with, 'So be it. Youre graces faythfull & true subject Thomas Matthew,' followed by H. R. in capitals. The seventh leaf, signed *, has an address 'To the Chrysten Readers,' followed by an alphabetical 'Table of the pryncypall matters,' ending on rev. of eighth leaf. This 'Table' shows a strong controversial bias—e.g. 'Abhomynacyon. Abhomynacyon before God are Idoles & Images, before whom the people do bowe the selues, Deut. vii. d.' 'Confessyon. Judas, which confessed hym selfe to the prestes of y^e lawe, and not to God, is damned, Mat. xxvii. a.' 'Cursynge. God doth curse the blessinges of the preastes, and blesseth their cursynge, Mal. ii. a.' The ninth leaf has 'The names of all the Bokes of the Byble,' with a full-page woodcut of the Garden of Eden. With the tenth leaf a regular system of numbering the leaves begins. The first of the four sections into which the Bible is here divided closes on fol. cxlvij with 'The Ende of the Ballet of Ballettes of Salomon, called in Latyne Canticum Canticorum.' Following this is a leaf, unsigned, forming the title of the second section, or prophetic books. This title has on the obv. a centre-piece, surrounded by a woodcut border in sixteen compartments; and on the rev. a centre-piece (the seraph touching Isaiah's lips), with four large floriated capital letters at the four corners—R. G. along the top, and E. W. along the bottom. With Isaiah the numbering by folios begins afresh, and ends with Malachi on rev. of leaf xciv. Underneath are two capital letters, W. T. The Apocrypha follows, with similar title (but only fifteen compartments in border), and extends to lxxvi leaves. The New Testament in like manner is numbered to cxi leaves; and a leaf not numbered completes the work, with the colophon: '¶ To the honour and prayse of God | was this Byble prynted and fy'nesshed in the yere of oure |

* Quoted by Henry Stevens in his *Catalogue of the Caxton Celebration*, p. 83.

† See Westcott, *Append. iv.*, for the sources of Coverdale's notes (sixty-six in all), and Eadie, i. p. 285 ff.

* The copy described is in the Library of the Brit. and For Bible Society, marked 8s. 9. 2. It is in folio; size of leaf, 11½ x 8½ inches.

Lorde God a. | M.D.XXXVII. There is nothing to show where the book was printed, though the woodcut on the title, and that of Adam and Eve before mentioned, have been traced to the blocks used for a Dutch Bible printed at Lübeck in 1533. The most probable place is Antwerp; 'the larger types being apparently identical with those of Martin Emperour in the edition of Tyndale's N.T., 1534.*' While passing through the press, the sheets appear to have been bought by the London printers, Richard Grafton and Edward Whitchurch, whose names are not obscurely indicated by the capital letters R. G. and E. W. Grafton, in a letter to Archbishop Cranmer (Strype's *Cranmer*, App. 20), speaks of having invested £500—a large sum for those days—in the production of the work, and mentions that the impression would consist of 1500 copies. To prevent infringement of his rights as publisher, Grafton prays the archbishop to use his influence with Cromwell to the end that the king's licence might be obtained for the publication. Cranmer, who was probably already interested in the project, exerted himself so effectually that the king's licence was soon granted for the new translation 'to be bought and read within this realm.'† To this English version, then, as has been said, the term 'Authorized' may first be properly applied.‡

Three other points require elucidation: the meaning of the capital letters I. R. subscribed to the 'Exhortacyon,' of W. T. at the end of the Old Testament, and of the name Thomas Matthew on the title-page. The initials may be taken, with all but absolute certainty, to denote John Rogers and William Tindale. Rogers, a native of Deritend, near Birmingham, where he was born about 1500, after graduating from Pembroke Hall, Cambridge, the college of Whitgift, Bradford, and Ridley, had gone out, at the end of 1534, to be chaplain to the English factory at Antwerp. There, according to Foxe (*Acts and Mon.* vi. 591), he came under the influence of Tindale and Coverdale to such an extent as to join them 'in that painful and most profitable labour of translating the Bible into the English tongue, which is entitled "The Translation of Thomas Matthew." As Rogers moved on to Wittenberg soon after 1536, it is doubtful whether he could have had much personal intercourse at Antwerp with Coverdale; but it is highly probable that Tindale, who suffered October 6th, 1536, may have given his manuscript versions and the like into the hands of Rogers at his first arrest. John Rogers, it may be added, was the first to suffer in the Marian persecution, being burnt at Smithfield, February 1555.

Why, assuming that the Bible before us was edited by John Rogers, it should have been put forth under the name of Thomas Matthew, is not easy to explain. Some have supposed it to be a disguise for William Tindale, whose name, if openly given as the author of the greater part of the version, would have roused opposition in high quarters. Others, that it was the real name of a sharer in the work. Both suppositions seem negated by the fact that, in the register recording the arrest of John Rogers later on, he is described as John Rogers *alias* Matthew. The same motive that made him veil the name of Tindale under initials, might lead him to suppress his own.

An examination of the contents of the book shows that the Pentateuch and NT are certainly Tindale's, with slight variations, the latter having been taken, as Westcott has shown (pp. 183, 184), from the revised ed. of 1535. With equal certainty the books from Ezra to Malachi inclusive, and the Apocrypha (excepting the Prayer of Manasses), may be assigned to Coverdale. The books from Joshua to 2 Chronicles inclusive present a difficulty. It might have been expected that they would be taken from Coverdale's version, that being the only English version as yet extant in print. As a matter of fact, however, they are evidently not so taken. And it has been shown, by a comparison of renderings of identical words found in Tindale's Pentateuch and 'Epistles,' as well as in

these historical books, that the version must almost certainly be Tindale's. It has already been mentioned as probable that Tindale, at or before his arrest, would consign his unfinished translations, and the like, to the care of John Rogers.

As to the Prayer of Manasses, which was omitted by Coverdale, the translation may very well be set down to Rogers himself. It owes much to Olivetan's rendering in the French Bible of 1535. Rogers executed his task of general supervision as editor well and carefully.* But the controversial character of his annotations, and his inclusion, almost unaltered, of Tindale's Prologue to Romans, were probably among the causes which led to the production of the 'Great' Bible.

Taverner's Bible.—In the same year as the Great Bible, 1539, appeared a new edition, which, from its close relation to Matthew's, it will be convenient to examine first. Its title runs: † 'The most | sacred Bible, | whiche is the holy scripture, con|teynynge the old and new testament, | translated in to English and newly | recognised with great dilige|nce | after most faythful exemplars by Rychard Taverner. | Harken thou heuen . . . Esaie i. | Prynted at London in Fletestrete at | the sygne of the sonne by John Byd|dell for Thomas Barthlet. | Cum privilegio . . . M.D.XXXIX.'

The title is followed by 15 leaves, not numbered, of which the first has on the recto an Address to Henry VIII., on the verso 'an Exhortacion'; the next 'the Contentes of the Scripture,' and the remainder 'The names of the Bokes,' etc., followed by 'A Table of the principall matters conteyned in the Byble.' From Gn 1 the numeration of leaves begins, ending with 'Solomons Ballet' at cccxx. The prophets are numbered afresh, to the end of Malachi, at lxxxxi. The Apocrypha and NT have each a separate title-page, and number lxxv and ci leaves respectively; three unnumbered leaves of 'Table' completing the work.

In the Address to Henry VIII. the king is described as 'in erth supreme heed immediately vnder Chryst of the churche of England'; and among all his services to religion it is declared that none is greater than his sanction of the English Bible. Being essentially a 'new recognition' of Matthew's Bible, we do not look for much originality in Taverner's work. But he gives himself a much freer hand than some suppose. The more violent controversial remarks in his predecessor's notes are softened down, or omitted. Thus, in the Table of the principall matters, Matthew began his section on Altars with the words, 'An aluter was neuer commaunded to be made, but only to God,' and ended with, 'So we have no aluter but Christ.' Taverner begins, 'An aluter was commaunded to be made to God,' and leaves out the concluding sentence. Under 'Purgatorye' Matthew wrote, 'He then that wyl pource hys synnes through fyre or by any other meanes then by the passyon of Christ, denyeth hys sayd passyon . . . and shal be greuously punyshed, because he hath despyed so greate a grace.' Taverner omits the section altogether. The last chapter of Acts ends on leaf liiii; Romans begins on lxi. The inference naturally is that an intermediate sheet of six leaves had been meant to contain Tindale's Prologue to Romans, but had been cancelled.

A few examples will indicate the nature of the changes made in rendering. It will be seen that they are chiefly due to (a) the seeking after a plainer, more idiomatic rendering, (b) the influence of the Vulgate, (c) a better knowledge of Greek.

* Examples will be found in Westcott, pp. 182, 183; Moulton, pp. 129, 130.

† We quote from the copy numbered 4. c. 5 in the Brit. Mus. Library. It is in small folio; size of leaf, 11½ x 7½ inches.

* Note in the Brit. Mus. Catalogue. Mr. Sidney Lee (art. 'John Rogers' in *Dict. of Nat. Biogr.*) assigns the work to the press of Jacob van Meteren.

† Jenkyns, *Remains*, vol. i. p. 197.

‡ An edition of Coverdale's Bible in 4to (the first printed in that size), by James Nicolson, of Southwark, which appeared in this same year, 1537, had also the notification: 'Set forth with the Kynges most gracious licence.'

(a) Gn 2¹ with all theyr furniture (Matthew 'apparell,' AV 'host'); Nu 24²⁰ neuertheless (M. 'neuerthelater'); Is 2² in the last dayes (M. 'in processe of tyme'); Mt 2¹⁰ was very wrothe (M. 'exceeding wrothe'); Mt 5¹¹ (and elsewhere) pursue for 'persecute'; Mt 5⁹ vnder authority (M. 'subject to the authority of another'); Lk 24 wente up for 'ascended'; Ac 37 anone (M. 'immediately').

(b) Gn 4¹¹ a quantite of bawme (M. 'a curteaye bawme,' Vulg. *modicum resinae*); Gn 4⁹ they throw down the walls of the city (M. 'they houghed an ox,' Vulg. *suffoderunt murum*); 1 K 21²¹ include and furthest (M. 'prisoned and forsaken,' Vulg. *inclusum et ultimum*).

(c) Lk 13⁸ and if it beare frute, well and good, if not, &c. (M. 'to se whether it will beare frute, and yf it beare not,' &c.); Ro 8²⁰ creature (M. 'creatures'); Mk 14⁷ for ye have poore with you alwayes (Tind. 'shall have').

His acquaintance with the Greek article does not, however, save him from such oversights as a pinnacle (Mt 4⁶), a candlestick (51⁸), a prophet (Jn 7⁴⁰), can faith saue him? (Ja 21⁴). In Jn 7⁴⁰ 'vndoubtedly' is not an improvement on the earlier 'of a truth.' Dore (*Old Bible*, p. 148) asserts that the translation of 3 Esdras, at least in part, is original. But, so far as the present writer has examined it, it agrees with the one in Matthew.

Richard Taverner was a client and pensioner of Cromwell, who in 1536 appointed him clerk of the Privy Seal. The fall of his patron in 1540 put a stop to his literary work, and made his position unsafe. For a time he was committed to the Tower. He succeeded, however, in regaining the royal favour, and under Edward VI., in 1552, received a general licence to preach, though a layman. He died in 1575.*

The Great Bible.—Before the execution of Cromwell, on July 28th, 1540, that statesman had just time to see brought to a successful issue one great scheme on which he had set his heart. This was the production of an amended version of the Bible in English. Circumstances seemed to favour Cromwell's project. Coverdale, on whom he chiefly relied for an improved translation, was in Paris, where, in 1538, he had brought out an edition of the New Testament in Latin and English, printed by Regnault. Paper and printing were both better at that time in Paris than in London. Francis I., so long as his relations with Henry kept good, was willing, upon certain conditions, to sanction the work of Coverdale and Grafton and the French printer Regnault.† No private opinions were to be introduced. The work was to be 'citra ulla privatas aut illegittimas opiniones.' Bonner, shortly to be made Bishop of Hereford, was transferred from the court of the emperor to that of Francis, and charged 'to aid and assist the doers thereof in all their reasonable suits.' So far, at least, he seems to have regarded the translating of the Bible without disfavour. For a time, therefore, matters went smoothly. But in December 1538 the French king inclining more and more to the side of the emperor, the Inquisition was allowed to interpose, and the printers and others engaged in the enterprise had to flee for their lives. According to Grafton's own statement (*Abridgement of the Chronicles*, etc., 1564, sub anno 29 Hen. VIII.), eighty finished copies were 'seased and made confiscat.' If this was so, no copy of the eighty, which would have Paris as the place of publication, appears to have escaped destruction. Foxe is the authority for a story that 'four great dry vats full' of the printed sheets were rescued from a haberdasher, who had purchased them 'to lay caps in.' But Kingdon (p. 63) discredits the statement, on the ground that the materials seized, for the restitution of which Cromwell and Bonner were making constant efforts, would be in the custody of the university. However this may be, Cromwell succeeded in getting most of the plant transferred to London, and there, from the press of Richard

Grafton and Edward Whitechurch, newly housed in the vacated precinct of the Gray Friars, appeared, in April 1539, the first edition of the Great Bible.

The name 'Great Bible,' as being 'of the greatest volume' (both terms being used by Grafton himself), is a convenient one by which to denote the seven editions of this work issued during the years 1539–41. Of these the second and subsequent ones had a preface by Cranmer, and the name 'Cranmer's Bible' may be properly applied to them. But it is not correct to use it, as is often done, of the first edition as well, in the preparation of which the archbishop had no direct share. The dates of the seven are as follows:—(i.) April 1539; (ii.) April 1540; (iii.) July 1540; (iv.) ready in November 1540, but kept back till the following year, on account of the fall of Cromwell in July 1540; (v.) May 1541; (vi.) November 1541; (vii.) December 1541. Though no two issues are identical, the family likeness is so strong that it will suffice to describe the first, and to indicate briefly the features by which later ones may be identified. The title of (i.) is: 'The Bible in Englyshe, that is to saye, the content of all the holy scripture, bothe of y^e olde and newe testament, truly translated after the veryte of the Hebrue and Greke textes, by y^e dylygent studye of dyuers excellent learned men, expert in the forsayde tonges. Prynted by Richard Grafton & Edward Whitechurch. Cum priuilegio ad imprimendum solum | 1539.' This title, in black and red letters, is surrounded by a singularly spirited woodcut, bearing no artist's name or mark, but commonly believed to be by Holbein. In the centre at the top, a king, his crown laid aside, is prostrate on the ground before a figure of the Saviour appearing in the clouds. Lower down the central line, the same king, seated on his throne, and now easily recognizable as Henry VIII., is giving a clasped volume lettered *verbum Dei* to a group of ecclesiastics on his right, headed by Cranmer, and to a corresponding group of lay nobles and others on his left, headed by Cromwell. Beneath, on the dexter side, a preacher, not unlike Colet (who, however, had been dead twenty years), is addressing a mixed multitude on the words of 1 Ti 2¹. Labels, with suitable inscriptions in Latin, issue from the mouths of the chief characters. Some little boys, too young to have learned Latin, cry 'God save the king' in English.† Five more leaves of preliminary matter follow, containing (1) 'The Kalender,' ending with 'an Almanach for xix years'; (2) 'An exhortacyon to the studye' . . . ; (3) 'The summe and content of all the holy scripture' . . . ; (4) 'A prologue' . . . ; (5) 'A descripcyon and successe of the kynges of Juda' . . . ; (6) 'With what iudgement the boke of the Olde Testament are to be red.' Genesis begins on the seventh leaf, marked 'fo. 1.' It is worth while to give some extracts from the Prologue, 'expressynge what is meant by certayn signes and tokens that we have set in the Byble. First, where as often tymes ye shall fynde a small letter in the texte, it sygnifyeth that so moche as is in the small lettre doth abounde and is more in the common translacon in Latin, then is founde ether in the Hebrue or in the Greke. . . . Moreouer, where as ye fynde this figure ☞ it betokeneth a dyuersyte and difference of readyngs betwene the Hebrues and the Chaldee in the same place. . . . We haue also (as ye maye se) added many handes both in the mergent of thys volume and also in the

* See art. by A. F. Pollard in *Diet. of Nat. Biography*.

† The royal permission, along with many interesting letters from Coverdale and Grafton, is given in facsimile in J. A. Kingdon's *Incidents in the Lives of Thomas Poyntz and Richard Grafton*, privately printed, 1895. See also the correspondence in Pettigrew's *Bibliotheca Suseziana*, 1839, p. 231 ff.

* The copy used is that marked C. 18. d. 1 in the Library of the British Museum. It is a singularly fine copy, the leaves measuring 15 × 10 inches. A sumptuous copy on vellum, meant for Cromwell himself, is in the Library of St. John's College, Cambridge. In this the title is somewhat abridged.

† A full description of the woodcut is given in Moulton, pp. 138, 139, and in Mombert, pp. 204, 205.

text, vpon the which w^e purposed to haue made in the ende of the Byble (in a table by themselves) certen godly annotacions: but for so much as yet there hath not bene sofficient tyme minystred to the Kynges moost honorable counsell for the ouersyght and correceyon of the sayde annotacions, we wyll therefore omyt them, tyll their more conuenient leysour. . . . God saue the Kyng.' The colophon is: 'The ende of the new Testamēt: | and of the whole Byble, ffynished in Apryll, | Anno M.CCCC.XXXIX.* | A Dño factū est istud.'

Pecculiarities by which the various issues of the 'Great Bible' may be distinguished one from another have been minutely tabulated by Fry (*Description of the Great Bible*, fol. 1885). The first three editions alone have the **B** as a reference for Coverdale's intended 'annotacions', the 'conuenient leysour' for which never came. The same three editions also are the only ones which present Cromwell's coat of arms, in Holbein's woodcut, unerased. After his attainder and execution, July 28th, 1540, the circle containing his arms is left blank. Cranmer's Prologue, as was said, is prefixed to the second and following editions. In it he distinguishes two classes of people: some being too slow and needing the spur; others too quick, and needing the bridle. 'In the former sorte be all they that refuse to read the scripture in the vulgar tongue. . . . In the latter sorte be they which by their inordinate reading, vndiscrete speaking, contentions disputing, or otherwyse by their licentious living, slander and hynder the worde of God. . . . The Introduction to the Apocryphal Books, for which, however, Cranmer is not in the first instance responsible, has a curiously confused account of the term 'Hagiographa,' by which for some reason they are described:—'because they were wont to be read, not openly and in comen, but as it were in secret and aparte.' The mistake was repeated in the editions of April and July 1540, and of May and December 1541. In the fourth of the seven, the first which shows Cromwell's arms erased, the title presents, by way of compensation, the names of Cuthbert [Tunstall], Bishop of Durham, and Nicholas [Heath], Bishop of Rochester, as those by whom the work was 'ouerene.' In the title to this edition, also, the king is styled 'supreme heade of this his church and Realme of Englande.'

Who were the 'dyuerse excellent learned men,' expert in Hebrew and Greek, who helped Coverdale, we are not informed. But traces of their work may perhaps be seen in the translation of musical terms in the Psalms, and in the retention of the Hebrew titles of some of the books of the OT. Thus the first book is described as 'called in the hebrue Bereschith, and in the latyn Genesis.'

If we take it for granted that Coverdale was the working editor of the Great Bible, we shall be prepared to find that he reproduces in it very much of his own earlier version of 1535, as well as of what had been incorporated with Tindale's work in 'Matthew's' Bible of 1537. But in the OT there is evidence that this reproduction was carefully revised by the help of an edition of the Hebrew text, published at Basle in 1534-35, with a new Latin rendering by Sebastian Münster. 'Thus,' Westcott goes so far as to say (*Hist.* p. 187), 'Coverdale found an obvious method to follow. He revised the text of Matthew, which was laid down as the basis, by the help of Münster. The result was the Great Bible.' This is too unqualified a statement. For instance, in the opening chapters of Genesis, a book the version of which in Matthew's Bible was by Tindale, we find not a few examples of Coverdale's own rendering in 1535 being preferred, or of a fresh rendering being made. A very few specimens must suffice—

'Then of the euening and the morning was made *one day*' (C.); 'And the euening . . . *one day*' (G. B.); 'And so of the . . . was made the *fyrst daye*' (T.); 'Et *fiuit* uespera . . . dies unus' (Münster); 'Factumque est . . . dies unus' (Vulg.).

'And God set them in the fyrfymament' (C. and G. B.); 'put them' (T.).

'And all the hoost of them' (C. and G. B.); 'apparell' (T.). The Vulg. here has *ornatus*, Münster *exercitus*.

'The Lorde God shope man, euen of the *moultre of the erth*' (C. and T.); . . . 'of the dust from of the grounde' (G. B.).

* Kingdon (*Grafton*, p. 68), following in this Strype's *Cranmer*, p. 120, endeavours to show that the impression of 2000 copies, seized in Paris, was intended to appear in April 1539, and dated accordingly; but that, when the embargo was removed, and the copies got over to London, they were not actually published there till 1540.

'In Eden *toward* ye east' (C.); 'from the begynnynge' (T.); 'eastward from Eden' (G. B.). The Vulgate, followed by T., has a *principio*; Münster *ab oriente*.

The version of Isaiah in Matthew is by Coverdale. But that this was diligently revised for the Great Bible, a few examples from the first two chapters will show—

'An ox knoweth his LORDS' (M.); 'The ox hath knowne his owner' (G. B.).

'Like a watchhouse in tyme of warre' (M.); 'lyke a beseged cytie' (G. B.).

'Ye tyrautes of Sodoma' (M.); 'ye Lordes of Sodoma' (G. B.).

'Cease from doynge of evell & violence' (M.); '& violence' omitted (G. B.).

'Leade' (M.); 'tynne' (G. B.).

'Al heithen shal preuse vnto him' (M.); 'all nacyns' (G. B.).

'So that they shal breake . . . to make . . . & sawes therof' (M.); 'They shall breake theyr swerdes also in to mattookes . . . to make sythes' (G. B.).

In the NT the relation of the version found in the Great Bible of 1539 to those of Tindale (1534) and Coverdale (1535) may be conveniently traced by the parallel passages from St. Matthew, 52 in number, set down by Westcott (pp. 174-176), for the purpose of comparing the two latter. If the Great Bible be compared with these it will be found to agree with Tindale in 5 places, with Coverdale in 33, and to differ from both (though on the whole nearer to Coverdale) in the remaining 14.

As regards the relation of the text found in the Great Bible of April 1539 to that of the succeeding editions, Westcott has shown, by a full induction of passages, that while in the OT there is little change in the versions of the Pentateuch and the earlier historical books, a careful revision of the Hagiographa and the prophetic books is apparent in the issue of April 1540. The authority most relied on for the changes thus made is Münster. A curious circumstance pointed out by Westcott is the fact that, instead of the alterations being progressive, the text of Nov. 1540 shows a tendency to recur to that of April 1539; so that practically two groups or recensions may be recognized:—(1) April 1539, Nov. 1540, May 1541, Nov. 1541; (2) April 1540, July 1540. In the NT Erasmus occupies the position which Münster has done in the OT. A single example will show the difference paid to Erasmus—

Ja 113 'Deus enim intentator malorum est: ipse autem neminem temptat' (Vulg.).

'For Gode cannot tente vnto euyll, because he tempteth no man' (G. B., Apr. 1539).

'Nam Deus ut malis tentari non potest, ita nec ipse quemquam tentat' (Eras.).

'For as God cannot be tempted with euyll, so neither he himself tempteth any man' (G. B., May, Nov. 1540).

In the Preface to the Book of Common Prayer it is noted that 'the Psalter followeth . . . the translation of the great English Bible, set forth and used in the time of King Henry the Eighth and Edward the Sixth.' This arrangement, which was unavoidable in 1549, was left unaltered in 1662, the rhythm of Coverdale's version, and its greater fitness for singing, having in the meantime endeared it to the people. The present text of the Pr. Bk. Psalter does not, however, represent the text of any edition of the Great Bible exactly, and it contains some misprints (e.g. 'sight' for 'light' in Ps 38¹⁰). See Preface to Driver's *Par. Psalter*, and esp. the elaborate collation in M'Garvey's *Liturgie Anglicane* (1895), pp. 1*-51*.

Though Bishops Tunstall and Heath had allowed their names to stand on the title-pages of several editions of the Great Bible, and Bonner, after the royal proclamation of 1540, had duly caused six copies of the Bible to be set up for public reading in St. Paul's, it is plain that the Episcopal bench generally were only half-hearted as yet in the work of translating the Scriptures into English. A motion was brought forward in Convocation, in 1542, for undertaking a fresh version, but was

shelved by Gardiner, who stipulated for the transliteration, not translation, of many words of the original, such as *ecclesia*, *penitentia*, *pascha*, *zizania*, *didrachma*; including even some of which the meaning was obvious, as *simplex*, *dignus*, *oriens*. To have constructed a version on these principles would have been to anticipate the worst faults of the Rheims and Douai translations.

v. PURITAN. — Meantime, however, while the bishops at home were hesitating, the work of a new version, or rather of a vigilant revision of existing ones, was being actively carried on abroad. The result was the **Genevan Bible**.*

When, on the accession of Mary Tudor, in 1553, the leaders of the Reforming party sought safety on the Continent, Frankfort became for a time a centre for the refugees. But when dissensions on the subject of the English Liturgy broke out between the moderate section, headed by Cox, afterwards dean of Durham, and the more violent spirits, who followed John Knox, the latter withdrew to Geneva. Among them was William Whittingham, a native of Chester, who in 1545 had been made Fellow of All Souls', Oxford, and Senior Student of Christ Church in 1547.† In 1557 he published anonymously at Geneva a new version in English of the NT in small 8vo, bearing date 'This x of June.' This was a prelude to a greater work, an English version of the whole Bible, on which some of the exiles were engaged. The news of queen Mary's death, in 1558, drew most of these back to England; but Whittingham remained at his post, to finish the work, and with him, as Anthony a Wood tells us, there remained 'one or two more.' These 'one or two' were probably Anthony Gilby, of Christ's Coll., Cambridge, who afterwards became rector of Ashby-de-la-Zouch; 'a fast and furious stickler against Church discipline,' as he is called by Fuller, but a good scholar; and Thomas Sampson. Sampson had entered Pembroke Hall, Cambridge, but apparently had not taken any degree. After refusing the bishopric of Norwich in 1560, he was made dean of Christ Church, Oxford, in 1561. Beza gives him the character of being of 'an exceedingly restless disposition.'

By the labours of these men, and of others whose names have not come down to us, there was issued from the press of 'Rovland' Hall, at Geneva, in 1560, an English Bible, commonly called, from its place of publication, the **Genevan**, which was destined to attain lasting popularity. Its title was: 'The Bible [and] Holy Scriptures [conteyned in] the Olde and Newe [Testaments. [Translated according to the] Ebrue and Greke, and conferred With [the best translations in] diuers languages. [With] moste profitable annotations vpon all the hard places, and other things of great [importance as] may appeare in the Epistle to the Reader.' Below is a woodcut of the Israelites crossing the Red Sea, bordered by texts in small italic character. On the reverse of the title is a list of the books of the Bible, including the Apocrypha (ending with 2 Mac.). Leaves ii and iii are occupied by a Dedication to 'the moste vertuous and noble Qvene Elizabeth,' from her 'humble subjects of the English Church at Geneva.' Leaf iii is filled on both sides with an Address 'to ovr Beloved in the Lord, the Brethren of England, Scotland, Ireland, &c.,' dated 'from Geneva, 10 April, 1560.' The regular foliation begins on the fifth leaf, and

ends with the close of the Apocrypha on f. 474. The NT begins with fresh foliation, and ends on f. 122, being followed by 12 unnumbered leaves, containing proper names, with interpretation, and chronological tables. A map, folded into two leaves, is placed next after the title of the NT.

If we inquire into the causes which made the Genevan Bible so long a favourite one (Hoare estimates that 160 editions of it appeared between 1560 and the outbreak of the Civil War in England), they are not far to seek. The mere shape and size of the volume as it first appeared, a handy 4to,* was a recommendation as compared with the ponderous folios of the Great, or the Bishops', Bible. It was printed throughout in Roman and italic, not Gothic, letter. It adopted the division into verses, first introduced by Stephen in 1551, and followed by Whittingham in his NT of 1557. It retained the marginal notes, Calvinist in tone, but generally free from offensive asperity, of the NT of 1557, with the addition of similar notes for the OT,—the Apocrypha being but slenderly furnished with them. It indicated by marks of accent the pronunciation of proper names. It had woodcuts,† and convenient maps and tables.

The version of the OT is substantially Tindale's; that of the NT Whittingham's; but both are vigilantly revised. A comparison of the Genevan version of a passage from Ac 27¹³⁻²⁸ with that of Whittingham,‡ and with that of the Bishops' Bible in 1568, will suffice to show this—

Ac 27 ¹³	W. lowsed nearer (<i>ἀπαινεύοντες</i>).
	G. losed nearer.
	B. loosned unto Asson.
	W. there arose against Candie, a stormye wynd out of the northeast (<i>κατ' αὐτῆς</i>).
v. 14	G. there arose by it a stormie winde called Euroclydon.
	B. there arose against their purpose a flawe of winde out of the northeast.
v. 15	W. and draue wyth the wether (<i>ἐκπνέοντες</i>).
	G. and were caried away.
	B. and were druyen with the weather.
	W. and we were caried beneath a litle yle . . . to come by the boat (<i>ἐν τῇ βάρκῃ</i>).
v. 16	G. and we ra cuder a litle yle . . . to get the boat.
	B. but we were caried into an ile . . . to come by a boat.
	W. undergirding the shyp . . . they let slip the vessel (<i>τὸ σκάφος</i>).
v. 17	G. undergirding the ship . . . the vessel.
	B. and made fast the shippe . . . a vessel.
	W. and to haue gayed this iniurie and losse (<i>καταδύσαι</i>).
v. 21	G. so shulde ye haue gained this hurt and losse (= haue saued the losse by auoiding the danger—margin, note).
	B. neither to haue brought vnto vs this harme and losse.
	W. were caried to and fro in the Adriaticall sea (<i>διαφραγισμένοι</i>).
v. 27	G. were caried to & fro in the Adriaticall sea.
	B. were sayling in Adria.
v. 40	W. they committed the ship (italics) (<i>ἵκαν</i>).
	G. they committed the ship (italics).
	B. they committed themselves (smaller type).
v. 42	W. should flee away.
	G. shulde flee away.
	B. should runne away.
	W. on broken peeces (both words in italics) (<i>τὴν τῶν ῥῶν ἀντὶ τῆς ἀντὶ</i>) . . . that they came all safe.
v. 44	G. on certeine peeces (pieces in italics) . . . y ^e thel came all safe.
	B. on broken peeces . . . that they escaped all.
	W. the Barbarians . . . the shoure which appeared (<i>ὡς ἵκαν τὸν ἱκανισμὸν</i>).
28 ³	G. the Barbarians . . . the present shoure.
	B. y ^e strangers . . . the present rayne.
v. 5	W. a fewe stickes.
	G. a number of stickes (<i>ἐργασίας τὴν ἀλυσίαν</i>).
	B. a bondell of stickes.
v. 6	W. the worme (<i>τὸ ῥέπος</i>).
	G. the worme.
	B. the beast.

* A series of useful articles on this subject, by N. Pocock, will be found in vols. ii. and iii. of the *Bibliographer*, 1882-83. See also an essay on 'The English Bible from Henry viii. to James i.,' by H. W. Hoare, in *The Nineteenth Century* for April 1899.

† He is said to have been Calvin's brother-in-law; but this is disputed by A. F. Pollard in his art. on W. Whittingham in the *Dict. of Nat. Biography*.

* The size of page in the copy before the present writer (Brit. Mus. C. 17. b. 3) is 9½ by 6½ inches.

† Some of these are said to be from the French Bible of A. Davodean, published at Geneva earlier in the same year.

‡ Whittingham's translation is included in Bagster's *English Hexapla*, from which we quote it.

A few peculiarities of spelling may be noticed. The desire to economize space, as shown in the frequent contractions, even of short words like 'mä' (man), 'rä' (ran), has led to the reduction of double consonants and diphthongs—in many instances, to single letters. Thus we find 'delt,' 'hel,' 'wildernes,' 'confunded,' 'thought,' and many more of a like kind.

A 4to edition of the Genevan Bible, printed at Geneva in 1570, by John Crispin, professes to be the second edition; but Pocock has shown that this title really belongs to one issued at Geneva in folio without any printer's name, the OT being dated 1562 and the NT 1561. The first edition published in England was one in small folio, with Roman type, issued in 1576 by Richard Barker (*sic*). An edition of the metrical version of the Psalms by Sternhold and Hopkins was prepared for binding up along with this. Later on, in 1578, we find the Book of Common Prayer, somewhat garbled, printed in the same volume with the Genevan Bible.

No other change need be noticed, except the partial displacement of the Genevan NT by a fresh version, made in 1576, by Laurence Tomson, a private secretary of Sir Francis Walsingham. Tomson closely followed Beza, putting 'that' for the *ille* by which Beza had rendered the Greek article. Thus, in Jn 1¹, we have 'that Word' for 'the Word.' Tomson's notes were more pronouncedly Calvinistic than before. His NT was often bound up with the Genevan OT, and, as a separate book, is said to have been preferred to the other.

vi. ELIZABETHAN.—The Bishops' Bible.—It was not to be expected that the Elizabethan bishops should acquiesce in the popularity of the Genevan version. Its Calvinism, if we may judge from Whitgift's example later on, might have been tolerated by them, but not its hostility to their office. Accordingly, a move was made by Archbishop Parker for a new translation, or rather for a fresh revision of that contained in the Great Bible. The steps taken can be followed, with fair certainty, in the *Parker Correspondence*. There is extant a letter, dated Nov. 28, addressed by the archbishop to Sir William Cecil. This is referred, in the Calendar of State Papers, to the year 1566. But if, as Pocock suggests, it should be placed a year earlier, it would present to us one of the first acts in the proceedings. For in this letter the archbishop not only acquaints Cecil with his plans, but asks the busy statesman (out of compliment, we may well suppose) to undertake some portion of the translation. The general principle on which the work was to be carried out, was for certain books to be assigned to individual bishops, or other biblical scholars, who should work on the text of the Great Bible as their basis, and transmit their portions, when finished, to the primate, for his final revision.

The defects of such a scheme were obvious. There was no meeting together for the discussion of various renderings. No provision was made to secure uniformity of style. The final revision to be expected from one with so much business on hand as Archbishop Parker, one not specially distinguished as a scholar, and one who had, moreover, reserved certain books as his own particular share, was not likely to be thorough, even if deputed in part to other learned men. Accordingly, we are not surprised to find traces of haste, if not of negligence, in the work. Thus the revision of Kings and Chronicles was despatched by Bishop Sandys in about seven weeks. As an incentive to diligence, the initials of each contributor were to be printed at the end of the books undertaken by him. Comparing these with a list sent by Parker

to Cecil, Oct. 5th, 1568,* we can identify nearly all the workers with fair certainty.

According to this list, the archbishop himself undertook, besides Prefaces and other introductory matter, Genesis, Exodus, Matthew, Mark, and 2 Cor.—Hebrews inclusive. Andrew Pierson, prebendary of Canterbury (a conjectural expansion, supported by the initials A. P. O., of the single word 'Cantuarie'), had Leviticus, Numbers, Job, and Proverbs. The Bishop of Exeter (Wm. Alley) had Deuteronomy. The Bishop of St. Davids (Rd. Davies) had Joshua—2 Kings.† The Bishop of Worcester (Edwyn Sandys) had 3 and 4 Kings and Chronicles. Andrew Perne, Master of Peterhouse and Dean of Ely (a conjectural inference, like the former, by help of the initials A. P. E., from 'Cantabrigie'), had Ecclesiastes and Canticles. The Bishop of Norwich (John Parkhurst) shared the Apocryphal books with the Bishop of Chichester (Wm. Barlow). The Bishop of Winchester (Rt. Horne) had Isaiah—Lamentations; the Bishop of Lichfield and Coventry (I. Bentham) taking the rest of the Greater Prophets. The Minor Prophets fell to the Bishop of London (Edmund Grindal). The Bishop of Peterborough (Ed. Scambler) took Luke and John; the Bishop of Ely (R. Cox) Acts and Romans; the Dean of Westminster (Gabriel Goodman) 1 Corinthians; and the Bishop of Lincoln (N. Bullingham) the General Epistles and the Revelation.

It will be noticed that Parker's list omits the Book of Psalms. The initials appended to this book in the Bible itself are T. B., supposed by Strype to designate Thomas Becon, formerly one of Cranmer's chaplains, afterwards a prebendary of Canterbury. The Psalms had in fact been originally assigned to Edmund Geste, Bishop of Rochester; and if the revised rendering had been made by him on the principles he does not scruple to avow, the work might well need to be sent on to some other scholar for correction. A difficulty is also caused by the fact that the initials at the end of Daniel, T. C. L., do not appear to correspond with the 'I. Lich. and Covent.' of the list. But the explanation of Burnet is a plausible one, that Thomas Bentham, Bishop of Lichfield and Coventry (1560–1580), is meant in both cases, the confusion of L and T being easy; and that he was accustomed to sign himself 'Covent. and Lich.,' reversing the usual order.

By these united efforts there was produced, in 1568, from the press of Richard Jugge, dwelling in St. Paul's Churchyard, what well deserved the designation by which it was often known, 'the Bible of largest volume.'§ The title-page is chiefly occupied by an ornamental border, having within it, on an oblong label at the top, 'The holie Bible,'|| and in the centre, within an oval, a portrait of queen Elizabeth: above it, the royal arms; beneath, in three lines, the text *Non me pudet . . . credenti* from Ro 1⁸. The next three leaves have 'A Preface into the Bible folowynge,' by Archbishop Parker. The fifth, sixth, and part of the seventh leaves are taken up with Cranmer's 'prologue or preface.' Other preliminary matter follows, extending to the twenty-sixth leaf, Genesis beginning on the twenty-seventh. One interesting point among the subjects treated of in the Introduction, peculiar, we believe, to this Bible, is the caution to ministers against heedlessly reading aloud words or phrases which might sound objectionable. Certain 'semy circles' are used as marks to denote what 'may be left vnread in the publike reading to the people.'¶ This scrupulousness, which would have satisfied Selden, might well have been extended to the designs used for initial letters; some of which (notably that at the beginning of Hebrews in the ed. of 1572) would be more appropriate for an edition of Ovid's *Metamorphoses* than for an English Bible. Besides the copperplate engraving of Elizabeth already mentioned, there is one of the Earl of Leicester at the beginning of Joshua, and another of Sir Wm. Cecil (to represent king David?) at the beginning of the Bk. of Psalms.

* Printed in the *Correspondence of Archbishop Parker* (Parker Society), pp. 335, 336.

† That is, 2 Samuel.

‡ 'Where in the New Testament,' he writes to the archbishop, 'one piece of a Psalm is reported, I translate it in the Psalm according to the translation thereof in the New Testament, for the avoiding of the offence that may arise to the people upon diverse translations.'—*Parker Corresp.* p. 250.

§ In the copy before the present writer (Brit. Mus. 1. e. 2) the size of page is 15½ by 10½ inches.

|| Some copies have the additional words: 'conteyning the olde Testament and the newe.'

¶ The note is on the fifteenth leaf, signed '1, next after the list of 'fautes escaped.'

The 'other perusal,' of which Parker had assured Cecil that the travail of the Revisers would have the benefit, showed itself in an amended edition, published by Jugge, in 4to, the following year, with the brief title, 'The holi Bibla.' But only negligent use had been made of the criticisms called forth. Some interesting specimens of these, by a schoolmaster named Laurence, have been fortunately preserved by Strype,* and the way in which they were incorporated in the edition of 1569 shows strikingly the want of care exercised. Two examples must suffice. In Mt 28¹⁴ the traditional rendering of ἀμεμπτος, namely 'harmless,' had been retained. Laurence pointed out that 'careless' (in the sense of *securus*) was rather the word. But he must have been surprised to find himself taken so literally that in 1569 the rendering appeared, 'We will make you careless.' Again, in Mt 21²⁸ the Revisers, following the Great Bible in preference to the Genevan, had rendered καρδ-
σχόμεν 'let us enjoy' instead of 'let us take' (RV). Laurence found fault with this, on the ground that the original signified 'let us take possession or seysin (seizin) upon.' In the edition of 1569, and in every subsequent one, this appeared as 'let us season upon his inheritance' ('sease on' in AV of 1611).†

The most singular part of the matter is that, while corrections (of whatever value) were freely admitted into the second edition of 1569, the third of 1572 went back in many particulars to the first. A few examples will make this clear. For brevity, the editions may be denoted by A, B, C.

In Gn 36²⁴ in A Anah is a woman: 'she fedde'; in B, correctly, a man: 'he fedde'; C goes back to 'she.'—In Jg 5¹⁰ A reads, 'ye that dwell by Middin' (RV 'that sit on rich carpets'); B 'ye that syt vppernoste in iudgment'; C goes back to A.—In Mt 15² A has 'by the gyft that [is offered] of me, thou shalt be helped'; B 'what gyft soeuer shold haue come of me'; C agrees with A.—In Lk 22⁴ A has 'and this first taxing was made'; B 'this taxing was the first and executed when, etc.'; C goes back to A.—In Ac 1¹ A and C have 'O Theophilus'; B 'deare Theophilus.'—In Ac 7³⁴ A and C have 'I haue seene, I haue scene'; B 'I haue perfectly seene.'—In 1 Ti 1² A has 'a natural sonne'; B 'his natural sonne'; C goes back to A.

The edition of 1572, moreover, exhibited two versions of the Psalms in parallel columns: that of the Revisers themselves, and that from the Great Bible. Many subsequent editions appeared. Dore (*Old Bibles*, p. 239) enumerates nineteen in all, from 1568 to 1606 inclusive; Pocock seventeen, speaking doubtfully also of one of these, as never seen by him, an alleged folio of 1606. The British Museum Catalogue does not show this last, nor yet an 8vo (included by Dore) of 1577.

The Bishops' Bible appears never to have received the royal sanction. Parker, indeed, in his letter of Oct. 5th, 1568, before quoted, tried to procure, through Sir Wm. Cecil, such a mark of recognition. 'The printer,' he writes, 'hath honestly done his diligence. If your honour would obtain of the Queen's Highness that this edition might be licensed and only commended in public reading in churches, to draw to one uniformity, it were no great cost to the most parishes, and a relief to him for his great charges sustained.' But, so far as is known, the application was unsuccessful. Accordingly, the claim to be 'set forth by auctoritee,' made by the editions of 1574 and 1575, must be referred to the sanction of Convocation, given in 1571. The *Constitutions and Canons Ecclesiastical* of that year expressly ordain that 'every archbishop and bishop should have at his house a copy of the holy Bible of the largest volume as

lately printed at London.' A like injunction was laid upon cathedrals; and, 'as far as it could be conveniently done,' upon all churches.*

vii. ROMAN CATHOLIC.—It was not likely that English Roman Catholics should continue unmoved by this untiring work in translating the Bible. Every fresh version made by scholars of the Reformed Church was a tacit reflexion on them for making none. Accordingly, it was resolved by the leading members of the newly founded English College at Douai, that this reproach—so far as they admitted it to be a reproach—should be wiped away. The moving spirit in this undertaking, as in the foundation of the college itself, was Dr. William Allen,† made cardinal afterwards in 1587. But the actual work of making the new translation devolved almost entirely on Dr. Gregory Martin, a native of Maxfield in Sussex, who had been one of Sir Thomas White's first batch of students at St. John's College, Oxford, in 1557. Having chosen to forsake Oxford for Douai, he was made by Allen the teacher of Hebrew and Biblical literature there.‡ Dr. William Reynolds, formerly of New College, Oxford, Richard Bristow, a Worcester man, and others, took a share in the work of revision.

Amid such circumstances, recalling in some measure the origin of the Genevan version, the translation known as the *Rhemes and Doway* took its rise. The entire Bible appears to have been ready for issue together. But, owing to want of funds, a portion only could be published at a time. The NT was properly given the preference, and appeared in 1582 with the following title:—

The | Nevv Testament | of Iesvs Christ, trans-
lated faithfvly into English | ovt of the authentical
Latin, according to the best corrected copies of the
same, diligently conferred vwith | the Greeke and
other editions in diuers languages: vwith | Argu-
ments of bookes and chapters, annotations, and
other necessarie helpes, for the better vnderstand-
ing of the text, and specially for the discoverie of
the Corruptions of diuers late translations, and for
cleering the Controversies in religion, of these
daies.—In the English College of Rhemes. . .
Printed at Rhemes | by John Fogny | 1582 | *cum*
privilegio.*

The volume is in a convenient 4to size,§ printed in clear-cut Roman type, no black letter being used. In some respects the arrangement of the RV is anticipated. The text is broken up into paragraphs, not verses. But the verse numeration is given in the inner margin, an obelus being prefixed to the beginning of each verse. Quotations from the OT are printed in italics. At the head of each chapter is an 'Argument,' and 'Annotations' at the end.

Of the preliminary matter, the long Preface to the Reader, occupying leaves a ij-c iv, well merits attention. The writers address themselves to three special points: (1) the translation of the Holy Scriptures into the vernacular, and, in particular, into English; (2) the reasons why the present version is made from the Vulgate; (3) the principles on which the translators have proceeded. They do not publish their translation 'vpon erroneous opinions of necessitie that the holy scriptures should alwaies be in our mother tongue, or that they ought or were ordained of God to be read

* Cardwell, *Synodalia*, i. 115.

† Allen was born in 1532 at Rossall in Lancashire; entered Queen's College, Oxford, in 1547. He founded the seminary at Douai in 1568, and removed with it to Rheims in 1578, when disturbances in Flanders made Douai unsafe. He died at Rome in 1594.

‡ See the art. by Thompson Cooper in the *Dict. of Nat. Biography*. Martin and Bristow both died of consumption at a comparatively early age.

§ In the copy before the present writer (Brit. Mus. 1608. c. 9) the page measures $\frac{3}{4}$ by $6\frac{1}{4}$ inches.

* *Life of Parker*, ed. 1821, vol. iii. p. 258. It has been conjectured, with much probability, that the Laurence in question, 'a man in those times of great fame for his knowledge in the Greek,' was Thomas Lawrence, appointed head-master of Shrewsbury in 1568.

† See Pocock's art. in the *Bibliographer*, vol. i. p. 113, where more examples are given.

indifferently of all . . . but vpon special consideration of the present time, state and condition of our country.' Holy Church, while not encouraging, had not absolutely forbidden such versions. Using the freedom thus left, diuers learned Catholics, since Luther's revolt, had already translated the Scriptures into the mother tongues of various nations of Europe; yet still repudiating the notion that all people alike might indifferently read, expound, and talk of them.

That the Latin Vulgate should have been taken as the basis of their work, in preference to any Greek text, is defended on the ground of its antiquity, of its freedom from the discrepancies visible in MSS of the Greek, and of its having been defined as exclusively authentic by the Council of Trent. Usually it would be found that the Vulgate agreed with the received text of the Greek; and where that was not so it would probably be found in accord with readings relegated to the margin, but not necessarily of less authority on that account. The issue, we think, within ten years of the date of this Preface, of the Sixtine edition of the Vulgate in 1590, and the Clementine in 1592, with the momentous corrections of 'prelitiua', as Bellarmine called them,* must have been a shock difficult for these apologists to withstand.

As regards the style of their translation, the Rhemists profess to have had one sole object in view. This was, without partiality and without licence, to express the sense of the Vulgate with the least possible change of form; 'continually keeping ourselves as near as is possible to our text, and to the very words and phrases which by long use are made venerable . . . [not doubting] that all sorts of Catholic readers will in short time think that familiar which at the first may seem strange.' In carrying out this principle it is inevitable that some felicitous phrases and turns of expression should be hit upon in the course of a long work. 'A palpable mount' (He 12¹⁸) is better than 'the mount that might be touched' of the AV. In the first chapter of James alone it is to the Rhemish version that we owe 'upbraideth not' (v.⁵), 'nothing doubting' (v.⁶), 'the engrafted word' (v.²¹), 'bridleth not' (v.³⁰).† As Plumptre has pointed out, so great an authority as Bacon (*Of the Pacification of the Church*) goes out of his way to praise the Rhemists for having restored 'charity' to the place from which Tindale had ousted it in favour of 'love.' In particular, the closeness with which the translators kept to the Vulgate helped to save them from that needless variation in the rendering of the same or cognate words, which is an undoubted blemish in the AV. Thus, while δικαιοσύνη is correctly rendered in our version 'to justify,' δικαίος and δικαιοσύνη are more often than not represented by 'righteous' and 'righteousness.'‡ Once more, the antiquity of the MSS from which the Vulgate translation was made causes its readings at times to accord with the results of the highest critical scholarship. It will follow that the Rhemish version occasionally comes nearer our RV than does that of king James. Thus in Mt 5⁴⁴ the clauses, interpolated from the parallel passage in St. Luke, which find no place in the RV, are partially omitted in the Rhemish. So, too, this latter agrees with the RV in reading 'Christ' for 'God' in 1 P 3².

But, when every allowance of the kind is made, the fact remains that, to ordinary English readers, the translation in question must often have seemed one into an unknown tongue. What else could

* See the passages quoted by Westcott in his article on 'The Vulgate' in Smith's *DB*, vol. iii, pp. 1706, 1707.

† See Moulton, p. 187, where more examples are given.

‡ See an article in *The Month*, June 1897, pp. 578, 579. The writer appears to think that *ὑποειρηναίως*, in Ac 14²², should be translated 'by ir position of hands.'

have been thought of such specimens as these: 'I wil not drinke of the generation of the vine' (Lk 22¹⁶); 'the passions of this time are not condigne to the glorie to come' (Ro 8¹⁸); 'For our wrestling is . . . against Princes and Potestats, against the rectoris of the world of this darkenes, against the spirituals of wickedness in the celestials' (Eph 6¹²); 'But he exinanited himself' (Ph 2⁷); 'Yet are they turned about with a little sterne, whither the violence of the director wil' (Ja 3⁴).*

In 1593 the English College returned from Rheims to their old quarters at Douai, and completed their biblical labours by the issue, in 1609 and 1610, of two volumes, containing the OT and Apocrypha. In size, type, and general execution, they closely resemble the volume of the NT published nearly thirty years before. The title is: 'The | Holie Bible | Faithfully trans-lated into English, | ovt of the athenetical | Latin | Diligently conferred with the Hebrew, Greeke, | and other Editions in diuers languages. | With Argvments of the Bookes, and Chapters: | Annotations: Tables: and other helpes, | for better understanding of the text: for discouerie of | corrvptions in some late translations: and | for clearing controversies in Religion. | . . . Printed at Doway by Lawrence Kellam, | at the signe of the holie Lambe. | M.DC.IX.' The first volume extends to the end of Job. The second volume, bearing a similar title, and the date M.DC.X., comprises from Psalms to 4 Esdras. A preface to 'the right welbelovied English Reader' goes over much the same ground as that prefixed to the Rhemes NT, but more cursorily, being only about half the length of the other. The hindrances, which had delayed the appearance of the work, had all proceeded from 'one general cause, our poore estate in banishment.' The arguments for translating from the Vulgate are re-stated. The retention of Latinisms, or original forms of words, is defended. If English Protestants keep 'Sabbath,' 'Ephod,' 'Pentecost,' 'Proselyte,' and the like, why not 'Prepuce,' 'Pasch,' 'Azimes,' 'Breades of Proposition,' 'Holocaust,' and others of the same kind?

This uncompromising principle gradually gave way. In 1749-50, and again in 1763-4, editions of the Doway OT and the Rhemes NT, each edition in five vols. 12mo, were published by Richard Challoner, Bishop of Debra, *in partibus*, with the assistance of William Green, afterwards President of the College at Douai, and Walton, afterwards Vicar Apostolic of the northern district of England.† As thus revised, it is substantially the version used at the present day by English-speaking Roman Catholics. In Cardinal Wiseman's opinion, 'though Challoner did well in altering many too decided Latinisms, he weakened the language considerably by destroying inversion . . . and by the insertion of particles where not needed.'‡

The nature and extent of these changes may be judged of by a comparison of a few passages from the older and newer versions, side by side with the RV of 1885:—

1609-10.	1763-4.	1885.
2 K [28] 21 ¹⁹ Adeo- datus the sonne of the Forest a broderer . . .	Adeodatus the son of Forrest an em- broiderer . . .	Ethan the son of Jaare-oregim § . . .
